Mr. ROBINSON of Arkansas. I am inquiring of the Senator from Colorado whether the amendment was considered by the committee.

Mr. WATERMAN. It is an amendment which was printed and has been on the table for some time.

Mr. WALSH of Montana. Mr. President, I may state that the amendment was not filed until after the bill had been reported. I have conferred with other members of the committee with reference to the amendment, and the committee, I am sure, generally approve of the amendment offered by the Senator from Colorado.

Mr. KING. Mr. President, I ask the attention of the Senator from Colorado. How many land offices are there in Colorado now?

Mr. WATERMAN. There are two now, but those two are on the eastern side of the mountains. The western slope, on the western continental divide, has no land-office district. Seventy-four per cent of the public lands in the State of Colorado lie in that portion of the State, on the western continental divide. Some of those people have to go as far as 400 miles in order to get to the land office at Denver or Pueblo.

Mr. KING. Why did not the Senator move to amend the bill so as to close one of the offices east of the divide? Apparently one is all they need on the eastern side of the slope.

Mr. WATERMAN. I am interested in the western slope.

The PRESIDENT pro tempore. The Chair suggests that the matter is under control of the Secretary of the Interior.

Mr. KING. I ask the Senator, in view of the fact that the Secretary of the Interior comes from Colorado and is attributed to Colorado and made a recommendation closing a number of those offices, whether the Secretary favors the amendment?

Mr. WATERMAN. I can not answer that question. He abolished an office on the western slope and left two on the eastern slope. The western slope has the greater part of the public domain.

Mr. KING. I am not complaining.

Mr. WATERMAN. It is for the convenience of the people on the western slope that I ask that the amendment be adopted.

Mr. KING. I was curious to know why the Secretary of the Interior, from the State of Colorado and presumably familiar with conditions in the State, should abolish one office on the western slope and leave two on the eastern slope.

Mr. WATERMAN. I can not answer the Senator's question.

The PRESIDENT pro tempore. The question is on agreeing to the amendment submitted by the Senator from Colorado.

The amendment was agreed to.

Mr. BRATTON. Mr. President, I offer the following amendment.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. The senior Senator from New Mexico [Mr. BRATTON] offers, in behalf of his colleague the junior Senator from New Mexico [Mr. CUTTING], the following amendment:

On page 3, after line —, insert the following new section:

SEC. 8. That an additional land district is hereby created in the State of New Mexico to embrace lands described as follows:

"Beginning at the southeast corner of the State of New Mexico and running thence north on the east line of said State to the base line of the public-land survey in said State; thence west on said line to the range line between ranges 8 and 9 east; thence south on said range line to the first standard parallel south; thence west on said line to the range line between ranges 8 and 9 east; thence south on said line to the second standard parallel south; thence west on said line to the range line between ranges 8 and 9 east; thence south on said line to the third standard parallel south; thence east on said line to the range line between ranges 8 and 9 east; thence south on said line to the south line of the State of New Mexico; thence east on said line to the point of beginning, and that Roswell, within said district, is hereby designated as the site for the land office thereof."

On page 4, line 5, after "Idaho," insert "New Mexico."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill establishing additional land offices in the States of Montana, Oregon, Idaho, South Dakota, Colorado, and New Mexico."

BILLS PASSED OVER

The bill (H. R. 279) to amend section 8 of an act entitled "An act to incorporate the Howard University in the District of Columbia," approved March 2, 1867, was announced as next in order.

Mr. BAYARD. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 8298) authorizing acquisition of a site for the farmers' produce market, and for other purposes, was announced as next in order.

Mr. BRUCE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 10885) to amend sections 23 and 24 of the general leasing act approved February 25, 1920 (41 Stat. L. 437), was announced as next in order.

Mr. LA FOLLETTE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

REGULAR ARMY AND NAVY PENSIONS

The bill (S. 2505) granting increase of pension under the general law to soldiers and sailors of the Regular Army and Navy, and their dependents, for disability incurred in service in line of duty, and authorizing that the records of the War and Navy Departments be accepted as to incurrence of a disability in service in line of duty, was considered as in Committee of the

Whole. The bill had been reported from the Committee on Pensions with amendments which were considered on May 16 and agreed to.

The bill was reported to the Senate as amended and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ARMISTICE DAY

The joint resolution (S. J. Res. 25) to declare the 11th day of November, celebrated and known as Armistice Day, a legal holiday, was announced as next in order.

Mr. REED of Pennsylvania. Over.

Mr. KING. I move that the joint resolution be indefinitely postponed.

Mr. BORAH. Mr. President, I do not think that ought to take place after a Senator has interposed an objection.

Mr. KING. I have no objection to passing it over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

BILLS PASSED OVER

The bill (S. 1729) extending the classified civil service to include postmasters of the third class, and for other purposes, was announced as next in order.

Mr. BAYARD. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 742) to provide for the establishment, operation, and maintenance of foreign trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes, was announced as next in order.

Mr. KING. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 6669) fixing the salary of the Public Printer and of the Deputy Public Printer was announced as next in order.

Mr. KING. At the request of the senior Senator from Mississippi [Mr. HARRISON] I ask that the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1995) placing certain employees of the Bureau of Prohibition in the classified civil service, and for other purposes, was announced as next in order.

Mr. BAYARD. Over.

The PRESIDENT pro tempore. The bill will be passed over.

PRACTICE OF THE HEALING ART

The bill (S. 3936) to regulate the practice of the healing art to protect the public health in the District of Columbia was announced as next in order.

The bill had been reported from the Committee on the District of Columbia with amendments.

The PRESIDENT pro tempore. The amendments having been previously agreed to, the question is: Shall the bill pass?

Mr. LA FOLLETTE. Mr. President, may I inquire what disposition was made of the amendment proposed by the senior Senator from Maryland [Mr. BRUCE]?

The PRESIDENT pro tempore. All amendments were agreed to, the Chair understands.

Mr. BRUCE. I proposed two amendments.

Mr. COPELAND. There was a misunderstanding on my part regarding the amendment offered by the Senator. I could not myself agree to the amendment.

Mr. BRATTON. Over.

The PRESIDENT pro tempore. Objection being made, the bill will be passed over.

Mr. COPELAND. I am not offering an objection.

The PRESIDENT pro tempore. The Senator from New Mexico offered an objection.

Mr. BRATTON. In view of the disagreement between the two Senators, which will necessarily lead to debate, I think the bill should go over.

The PRESIDENT pro tempore. The bill will be passed over without prejudice, and later we may return to it.

Mr. BRUCE. I wish it distinctly understood I am not objecting to the bill and asking that it go over, because I think it is a very important bill.

Mr. PHIPPS. Mr. President, may I suggest that the Senators might settle their differences in conference? They do not seem to be very far apart. It is time the bill passed and was sent to the House. I think the two Senators can straighten out their differences in a private conference.

Mr. BRUCE. There seemed to be no serious differences.

Mr. BRATTON. I will withdraw my objection if the differences are settled.

Mr. CAPPER. Mr. President, I object to the consideration of the bill with the amendment of the Senator from Maryland on it.

The PRESIDENT pro tempore. Objection is made and the bill will be passed over.

BILLS PASSED OVER

The bill (S. 1215) for the relief of Helen F. Griffin was announced as next in order. The bill had been reported from the Committee on Claims adversely.

Mr. BRATTON. Over.

Mr. LA FOLLETTE. Mr. President, in the absence of the author of the bill I ask that it be passed over without prejudice.

The PRESIDENT pro tempore. The bill will be passed over without prejudice.

The bill (S. 2901) to amend the national prohibition act, as amended and supplemented, was announced as next in order.

Mr. BRUCE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The joint resolution (S. J. Res 117) authorizing an investigation and survey for a Nicaraguan Canal was announced as next in order.

Mr. KING. Over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

The bill (S. 2097) to provide for the protection of municipal watersheds within the national forests, was announced as next in order.

Mr. BRATTON. Over.

The PRESIDENT pro tempore. The bill will be passed over.

RESERVE DIVISION, WAR DEPARTMENT

The bill (S. 3458) to create a reserve division of the War Department, and for other purposes, was announced as next in order.

Mr. BROOKHART. Over.

Mr. REED of Pennsylvania. Mr. President, will not the Senator withhold his objection for a moment? The only objection to the bill has come from the National Guard Association. By an agreement which has already been put in the CONGRESSIONAL RECORD, the National Guard Association and the Association of Reserve Offices have agreed upon certain amendments to the bill and have agreed that with those amendments the bill might pass. I hope it will be possible for us to pass it to-night because it is of great advantage to the Reserve Officers' Association and to the reserve officers of the Army.

Mr. BROOKHART. Mr. President, I put in the RECORD last night a statement of the grounds of my objection. It goes further than any of the matters which the Senator mentions. It is an important establishment and an important policy which the National Guard Association would like to consider further. I do not think the bill ought to pass.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield?

Mr. BROOKHART. Yes.

Mr. REED of Pennsylvania. The resolution which the Senator put in the RECORD was dated May 17 of this year. The agreement signed by the president of the National Guard Association was made subsequent to that date, on May 19. In view of that and in view of the fact that the association, which has protested against the bill is now satisfied with it, I hope that the Senator will permit it to pass.

Mr. BROOKHART. I am familiar with that situation.

Mr. FLETCHER. Mr. President, what the Senator from Pennsylvania has said is quite true. The adjutant general of Florida, I know, protested against the bill. He came to Washington and was here a few days ago, and they got together on the bill. He notified me that he had no further objection to it. I think that is true of all the National Guard associations.

Mr. BROOKHART. I have some different information. I am aware of the fact, too, which the Senator mentions.

Mr. REED of Pennsylvania. Will the Senator permit me to place in the RECORD at this point a letter from the secretary of the Reserve Officers' Association?

Mr. BROOKHART. I have no objection to that.

Mr. REED of Pennsylvania. I ask permission to have printed in the RECORD at this point the letter to which I have referred.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The letter is as follows:

RESERVE OFFICERS' ASSOCIATION OF THE UNITED STATES,
Washington, D. C., May 23, 1928.

Senator DAVID A. REED,
Chairman Senate Military Affairs Committee,
United States Senate, Washington, D. C.

DEAR SENATOR: On Saturday, May 19, Gen. G. A. Fraser, adjutant general of North Dakota and president of the National Guard Associa-

tion of the United States, at the direction of the national executive committee of the National Guard Association, entered into an agreement with Gen. Roy Hoffman, president of the Reserve Officers' Association of the United States, by which certain features of Senate bill 3458, introduced by you, were eliminated. As a result of such an agreement the National Guard Association, through its president, General Fraser, joined with this association in asking the passage of the bill referred to.

On Saturday, May 19, General Fraser and General Hoffman notified you, by a joint letter, of the agreement, as herein set forth, which letter appears in full on page 9145 of the CONGRESSIONAL RECORD of Saturday, May 19.

On page 9465 of the CONGRESSIONAL RECORD of Tuesday, May 22, appears a resolution adopted by the National Guard Association executive committee two days prior to the agreement referred to, namely, May 17, which sets forth at length what was then the guard's objection to the bill, thus causing the National Guard Association to appear as still opposing the bill, when in truth and fact, as stated above, it is supporting the bill in its present form, which was rewritten in compliance with the desires of the National Guard Association and its president, General Fraser.

A continuation of the present harmonious relations between the two citizen components of the Army of the United States is most earnestly desired by both associations and is essential to the efficiency of the Army as a whole. It is, therefore, earnestly hoped you will cause the Members of the Senate clearly to understand that Senate bill 3458, as amended by the agreement of the associations mentioned, which amendment was introduced by you May 19, and appearing on page 9145 of the CONGRESSIONAL RECORD of that date, meets with the unqualified approval of the National Guard Association.

Sincerely yours,

ORVEL JOHNSON, *National Secretary.*

The PRESIDENT pro tempore. On objection the bill will go over.

BILLS PASSED OVER

The bill (S. 1624) to authorize the payment of additional compensation to the assistants to the engineer commissioner of the District of Columbia was announced as next in order.

Mr. KING. Let that bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1625) to fix the salaries of the members of the Board of Commissioners of the District of Columbia was announced as next in order.

Mr. KING. Let that bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1945) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, and for other purposes, was announced as next in order.

Mr. BINGHAM. Let that bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

DETAIL OF PUBLIC ROADS ENGINEERS

The bill (S. 1718) to authorize the President to detail engineers of the Bureau of Public Roads of the Department of Agriculture to assist the Governments of the Latin-American Republics in highway matters, was announced as next in order.

Mr. HARRIS. I ask that the bill go over.

Mr. KING. I ask that that bill go over, and I ask unanimous consent to have inserted in the RECORD a letter from the American Institute of Consulting Engineers opposing the measure. I am not indorsing their position or expressing any opinion as to the merits of their contentions. I believe that their views should be brought to the attention of the Senate, and, accordingly, have asked that the letter referred to be printed in the RECORD.

The PRESIDENT pro tempore. Without objection the bill will go over, and the letter referred to by the Senator from Utah will be printed in the RECORD.

The letter is as follows:

AMERICAN INSTITUTE OF CONSULTING ENGINEERS (INC.),
New York, May 15, 1928.

Senator WILLIAM H. KING,
United States Senate, Washington, D. C.

SIR: Please permit me to refer again to bill S. 1718, which permits the Bureau of Public Roads to act as consulting engineer to Latin-American Governments for a nominal fee, thus putting them in competition with engineers in private practice, who depend upon their fees for their entire remuneration.

If foreign governments prefer to have advice on highway matters from United States Government engineers, would it not be better to have these engineers perform these services under leave of absence without pay? Do you think it is quite right that an engineer should be paid by both Governments whose interests may not be identical? For instance, the engineer, in order to justify his pay from our own Government, might consider that he should recommend a form of pavement which would require the maximum purchase of American machinery and materials. On the other hand, if he were paid entirely by the foreign government he would naturally recommend a form of pavement which could be made up of local materials with a minimum requirement of foreign machinery and materials.

This bill establishes a bad precedent, for if highway engineers can advise foreign governments for a nominal fee, why should not officers of the Corps of Engineers advise on harbor and river improvements; engineers of the Bureau of Mines advise on mining propositions; and engineers of the Interstate Commerce Commission advise on railway surveys and traffic?

I feel sure that your final decision will not be made without carefully considering both sides of the question.

Very truly yours,

PHILIP W. HENRY, *Secretary.*

Mr. ODDIE subsequently said: Mr. President, I ask that we return to Order of Business 825, Senate bill 1718. I was out of the Chamber when that bill came up, and the Senator from Utah [Mr. KING] objected.

Mr. HARRIS. I objected to that.

Mr. ODDIE. I ask permission to insert in the RECORD, after the document that the Senator from Utah inserted in the RECORD——

Mr. ROBINSON of Arkansas. Objection is heard.

The PRESIDENT pro tempore. Objection is made.

Mr. ODDIE. Mr. President, I rise to a question of personal privilege.

The PRESIDENT pro tempore. The Senator from Nevada will state it.

Mr. ODDIE. A statement was put in the RECORD by the Senator from Utah regarding this legislation that I introduced which contains statements that I do not think can be borne out by the facts. I ask that the report of the committee be placed in the RECORD following that statement.

The PRESIDENT pro tempore. Is there objection?

Mr. ROBINSON of Arkansas. That does not state any question of personal privilege.

Mr. ODDIE. The statement I have made in this report has been questioned by the statement put in the RECORD by the junior Senator from Utah [Mr. KING]. I will say, further, that the statement from the secretary of the Civil Engineers' Association, which the Senator from Utah inserted, is ill-becoming an association composed of such fine men as the civil engineers of our country. I do not believe that that association knew about the statement made by its secretary, and I feel that in justice to this great question of public roads in the United States this report should go in the RECORD.

The PRESIDENT pro tempore. The Senator from Nevada, thinking that a question of veracity exists, undoubtedly that is a question of personal privilege, and, without objection, the report will be printed in the RECORD.

The report (No. 797) submitted by Mr. ODDIE on April 13, 1928, is as follows:

Report to accompany S. 1718

The Committee on Post Offices and Post Roads, having had under consideration the bill (S. 1718) to authorize the President to detail engineers of the Bureau of Public Roads of the Department of Agriculture to assist the Governments of the Latin-American Republics in highway matters, report the same favorably and recommend its passage.

This bill would authorize the President of the United States, upon application from the foreign governments concerned and whenever in his discretion the public interest renders such a course advisable, to detail engineers of the Bureau of Public Roads of the Department of Agriculture to assist the Governments of the Republics of North America, Central America, and South America and of the Republics of Cuba, Haiti, and Santo Domingo in highway matters.

The present law provides that the President may detail officers of the United States Army, Navy, and Marine Corps to assist the Latin-American Republics in military and naval matters. This bill is drawn with the exact wording and authorization as that with respect to officers of the Army and Navy. (See Senate hearings before Committee on Post Officers and Post Roads, March 30 and 31, 1928, pp. 4–9.)

The President in his message to Congress on December 6, 1927, called the attention of the Congress to the situation and to the advisability of authorizing him to have the same power with reference to engineers in highway matters as he possesses with respect to the officers of the Army and Navy. The President's message relating to this matter contains the following:

"While the advantage of having good roads is very large, the desire for improved highways is not limited to our own country. It should and does include all the Western Hemisphere. The principal points in Canada are already accessible. We ought to lend our encouragement in any way we can for more good roads to all the principal points in

this hemisphere south of the Rio Grande. It has been our practice to supply these countries with military and naval advisers, when they have requested it, to assist them in national defense. The arts of peace are even more important to them and to us. Authority should be given by law to provide them, at their request, with engineering advisers for the construction of roads and bridges."

A favorable report from the Department of Agriculture and from the Director of the Budget are contained in the following letters:

DEPARTMENT OF AGRICULTURE,
Washington, D. C., January 27, 1928.

Hon. GEORGE H. MOSES,
Chairman Committee on Post Offices and Post Roads,
United States Senate.

DEAR SENATOR: Further reference is made to letter of January 4 from the clerk to your committee transmitting a copy of S. 1718 for the information of the department and such suggestions concerning the subject matter of the bill as the department might wish to make.

This bill would authorize the President to detail engineers of the Bureau of Public Roads of this department to assist the Governments of Latin-American Republics in highway matters. It is believed that the purpose of the bill is very commendable. All of the Latin-American Republics have engineers highly trained in the technique of road building but few of them have had the opportunity of obtaining practical experience in carrying on any considerable program of highway construction and maintenance. Timely and valuable assistance, therefore, may be rendered these countries by the United States by furnishing advice and assistance to help their own engineers and highway officials supplement their theory of highway building with information as to the practical operations involved in properly designing highways and bridges and in the economic handling of materials and equipment in their construction. Such assistance can be rendered only by men who have had large experience in actually handling the details of the necessary operations. It is believed that the assignment of engineers in accordance with the provisions of the bill would make available to the Latin-American countries the experience acquired by our own engineers during the last 15 to 20 years from intensive road building which has been in progress in this country. It is further believed that the detail of experienced engineers in the manner proposed by the bill would serve to stimulate and cement a more friendly relationship and a better understanding with our sister Republics of the North American Continent. Furthermore, it is not believed that any additional appropriation would be necessary to enable the department to make the necessary detail of engineers for the first year at least, unless a larger demand than is anticipated for such details should be made, provided the department should be authorized to use for that purpose the administrative funds available under the Federal highway act.

The department therefore would recommend favorable action on the bill.

Sincerely,

W. M. JARDINE, *Secretary.*

Submitted to the Bureau of the Budget pursuant to Circular No. 49 of that bureau and returned to the Department of Agriculture under date of January 25, 1928, with the advice that the legislation proposed in S. 1718 is is not in conflict with the financial program of the President:

DEPARTMENT OF AGRICULTURE,
BUREAU OF PUBLIC ROADS,
Washington, D. C., February 25, 1928.

Memorandum re S. 1718, a bill by Senator ODDIE to authorize the President to detail engineers of the Bureau of Public Roads of the Department of Agriculture to assist the governments of the Latin American Republics in highway matters:

(1) A report recommending favorable action on this bill was forwarded by the department to the chairman of the Committee on Post Offices and Post Roads of the Senate on January 27, 1928. The report of the department carried the indorsement of the Bureau of the Budget.

(2) The bill is in line with the recommendation of the President.

(3) Chapter 334, acts of the Sixty-ninth Congress, first session, authorizes the President to detail officers and enlisted men of the United States, Army, Navy, and Marine Corps to assist the Governments of Latin-American Republics in military and naval matters. This bill was approved May 19, 1926, copy attached.

(4) The proposed measure, S. 1718, would only authorize the President to detail engineers to assist the Governments of other Republics of the Western Hemisphere in highway matters, in the manner now provided for detailing officers and enlisted men to assist in military and naval matters.

(5) The Department of Agriculture has received in the past, requests for assistance in highway matters with which it has not been able to comply, or even make satisfactory recommendations. It would be of no assistance to any other government to detail engineers, except those of the highest qualifications and broadest experience in the handling of highway administration, and the men best fitted are those ranking high in the organizations of the Federal and State Governments. Because of the large program of highway work now under way in the United States, there is such a demand for engineers of the highest training and experience that they are not, except under unusual circumstances, available for employment by the foreign governments. It would be possible, however, to detach such engineers from active duty for a limited period for assignment to the official personnel of other governments, were these men to understand that upon their return they would resume their positions and would not have lost an opportunity for advancement because of this foreign service.

(6) No enduring system of roads, or any other system of public improvements, can be built and developed by the engineers of another country. The other Republics of the Western Hemisphere have engineers of high technical training, but they have not as yet had the opportunity to gain experience with the unusual development of mechanical power and mechanical equipment applied to highway building in the degree that it is being used in this country. They have not had the same opportunity for experience in the development of an organization to administer a wide system of highways necessary to cover big areas. The fundamental necessity of constant and efficient maintenance is one of the principles which was most difficult to learn and to put into effect in this country. It is one of the most valuable principles that can be transplanted by the right type of engineers to our sister Republics.

(7) This Nation can not keep itself apart from highway development in the other countries of Mexico, Central and South America. Its nationals are now actively engaged in a variety of ways in matters intimately connected with the development and utilization of highways. Many of these relationships are mutually desirable. The situation, however, is not free from many undesirable aspects tending to destroy confidence and promote in place of friendship between the United States and these other countries a lack of confidence, and even much ill will. Nor is this ill will unjustified by some of the situations which have developed. But, on the other hand, lack of understanding is a more fertile cause of lack of friendship than any other.

(8) In 1925 the delegation on the part of the United States to the First Pan American Road Congress, held at Buenos Aires, had conferences with the presidents and highway officials of the principal governments of Central and South America. Without exception their attitude was one of eagerness to extend and develop improved highways throughout the individual countries. Their attitude was highly typical of the attitude of officials similarly placed in this country before the present tremendous program of highway building began. With such an attitude prevalent throughout these countries, the United States now has the opportunity to undertake a highly constructive purpose which has the possibility of cementing friendships through service, of helping to promote peace through easier policing of the countries by reason of adequate highways, and of assisting in the improvement of economic and social conditions by reason of more adequate transportation.

(9) The greatest assistance the United States can extend to the other republics is in helping to improve transportation conditions. While the proposed measure is only one of the means to this end, it will be a highly effective one over a term of years.

Respectfully submitted.

THOS. H. MACDONALD,
Chief of Bureau.

(The bill referred to in the foregoing quotation is as follows:)

[Public—No. 247—69th Cong.]

(S. 1480)

"An act to authorize the President to detail officers and enlisted men of the United States Army, Navy, and Marine Corps to assist the Governments of the Latin-American Republics in military and naval matters

"Be it enacted, etc., That the President of the United States be, and hereby is, authorized, upon application from the foreign governments concerned, and whenever in his discretion the public interests render such a course advisable, to detail officers and enlisted men of the United States Army, Navy, and Marine Corps to assist the Governments of the Republics of North America, Central America, and South America and of the Republics of Cuba, Haiti, and Santo Domingo, in military and naval matters: *Provided*, That the officers and enlisted men so detailed be, and they are hereby, authorized to accept from the government to which detailed offices and such compensation and emoluments thereunto appertaining as may be first approved by the Secretary of War or by the Secretary of the Navy, as the case may be: *Provided further*, That while so detailed such officers and enlisted men shall receive, in addition to the compensation and emoluments allowed them by such governments, the pay and allowances whereto entitled in the United States Army, Navy, and Marine Corps and shall be allowed the same credit for longevity, retirement, and for all other purposes that they would receive if they were serving with the forces of the United States.

"Approved May 19, 1926."

In addition to the indorsement of the Secretary of Agriculture and the Bureau of the Budget of the proposed legislation, the following letters have been received from Hon. Thomas H. MacDonald, Chief of

the United States Bureau of Public Roads; Dr. L. S. Rowe, Director-General of the Pan American Union; and Mr. Pyke Johnson, of the National Automobile Chamber of Commerce, in behalf of this bill. The bill also has the full indorsement of other organizations in this country interested in international road matters.

DEPARTMENT OF AGRICULTURE,
BUREAU OF PUBLIC ROADS,
Washington, D. C., March 31, 1928.

Hon. TASKER ODDIE,
United States Senate.

DEAR SENATOR ODDIE: The proposed bill providing for sending engineers to Latin-American countries is necessary to supplement other proposed legislative action, to make possible carrying into effect resolutions adopted by the recent Pan American Congress, and to place the United States in a position to render assistance in highway matters which it has not been able to do in the past.

It is not proposed to send engineers from this country for any long detail to other countries and the salary provision is necessary under the circumstances. Highway engineers have their opportunity in the United States, not in foreign countries, now. To send the type of men who are necessary (and only a few would be required) the Government must be in a position to send its own employees under orders. The most desirable engineers, in general, will not be available otherwise. These men will have to maintain, if married, establishments in both countries, or else be put to the very considerable expense of moving at short intervals.

The provision for payment of salaries is exactly the same as now prevails in the legislation providing for detail of Army engineers to foreign countries, except that Army, Navy, and Marine Corps officers in general are much higher paid than are engineers in the employ of the Government, but in no case is the provision an unreasonable one.

It is believed that this legislation is in line with the President's recommendation that we in the United States do everything possible to assist the other nations of this continent in highway development.

The Department of Agriculture indorses this legislation but does not desire it without the salary provision in the measure.

Very truly yours,

THOS. H. MACDONALD, *Chief of Bureau.*

THE DIRECTOR GENERAL PAN AMERICAN UNION,
Washington, D. C., March 3, 1928.

Hon. TASKER L. ODDIE,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR: I understand that the measure providing for the appointment of highway engineers for service in those Latin-American countries that may request the assistance of such engineers, will shortly come before the committee.

I hope that this measure will receive the favorable consideration of the committee and that it will also receive the approval of Congress. The Pan American movement rests on the basis of mutual helpfulness and cooperation between the Republics of the American Continent and on the principle of having the benefit of the experience of each placed at the disposal of all the Republics. I feel that the adoption of this measure will constitute a real service to the cause of Pan Americanism, inasmuch as it will place at the disposition of all the other Republics the experience of the highway engineers of the United States.

I beg to remain, my dear Senator,

Most sincerely yours,

L. S. ROWE.

NATIONAL AUTOMOBILE CHAMBER OF COMMERCE,
Washington, D. C., March 2, 1928.

Hon. TASKER L. ODDIE,
United States Senate, Washington, D. C.

MY DEAR SENATOR ODDIE: I am directed by Mr. Roy D. Chapin, president of the National Automobile Chamber of Commerce, to inform you that at the last meeting of the board of directors of that organization a strong resolution was passed indorsing the principle contained in your bill to authorize the President of the United States to send engineering advisers to the countries of Latin America.

In the discussion which preceded the adoption of this resolution, the point was made that nothing could be done by the United States which would be of more value to sound highway development in the countries of the Pan American Union than to place at their disposal the experience and information which this country has acquired during the past quarter of a century in highway work.

Our people believe that the consulting advice which could be given through the United States Bureau of Public Roads will be of immeasurable value in all phases of highway development, and they are hopeful that early action can be had upon the measure because of the very definite results which they expect it to bring, both in good will and from an economic point of view.

A further indorsement of your measure on behalf of the automotive industry is contained in the appearance made by Mr. A. J. Brosseau, chairman of the highway committee, at the recent hearings of the Committee on Roads in the House. At that time, too, the American Association of State Highway Officials and the American Road Builders Association gave this proposal their cordial support, as I am sure you will find every responsible group interested in international highway relations will do.

I am, sir, sincerely,

PYKE JOHNSON.

Mr. ROBINSON of Arkansas. The Senator from Nevada never attempted to state any question of personal privilege. There is no objection to his having anything inserted in the RECORD that relates to the subject matter, but it is absurd to say that he raised a question of personal privilege.

MARKETING OF PERISHABLE AGRICULTURAL COMMODITIES

The bill (S. 1294) to suppress unfair and fraudulent practices in the marketing of perishable agricultural commodities in interstate and foreign commerce was announced as next in order.

The PRESIDENT pro tempore. An amendment to the bill offered by the Senator from Idaho [Mr. BORAH] has been agreed to.

Mr. BORAH. The amendment referred to by the Chair was adopted at the last session when the calendar was under consideration.

The PRESIDENT pro tempore. That is correct.

Mr. ROBINSON of Arkansas. I should like to know the purpose and effect of the bill.

Mr. BORAH. Some Senator on the other side, I think, objected to its consideration.

Mr. ROBINSON of Arkansas. I do not object to its consideration.

Mr. BORAH. Do I understand that there was objection made to the consideration of the bill?

Mr. COPELAND. Mr. President, as the Senator from Idaho knows, I am forced to object to the consideration of the bill.

The PRESIDENT pro tempore. The bill will go over.

Mr. COPELAND. Mr. President, wait just one moment, please. Unless the Senator from Idaho is willing to eliminate section 13, I must object to the bill. Here is the trouble about the bill: There are many persons interested in the bill who have never had an opportunity to express their views, and I myself think it would be better to let the bill go over, if I may say so to the Senator from Idaho, until those persons can have their day in court.

Mr. BORAH. Mr. President, I desire to say in answer to the Senator from New York that this bill was introduced in its original form last December. It had extended consideration at the hands of the Agricultural Committee. After it came from the hands of the Agricultural Committee, the representatives of the different interests which are affected by the bill came to an agreement, and they offered 10 or 12 amendments. I accepted all the amendments which they offered, and incorporated them in a substitute for the bill, which, I understood, was satisfactory to the entire interests concerned. That substitute has been adopted. Now, in my opinion, the bill has been made to conform to the interests of those for whom the Senator from New York is speaking.

Mr. COPELAND. Unfortunately, my constituents do not think so. I think the bill is meritorious in many ways, but those interested in my State have not as yet reached the point where they are willing to agree to it; and they think they should have an opportunity to present their cause to the committee.

Mr. BORAH. Mr. President, after the negotiations which have been had, and the full understanding which has been reached on the part of those people, if they are now unwilling to stand by the agreement which was made they will have a full opportunity to be heard, and upon an entirely different bill.

The PRESIDENT pro tempore. The Chair understands the Senator from New York maintains his objection, and the bill will be passed over.

BRIDGE ACROSS SAN FRANCISCO BAY

The bill (S. 1762) granting consent to the city and county of San Francisco, State of California, its successors and assigns, to construct, maintain, and operate a bridge across the Bay of San Francisco from Rincon Hill to a point near the South Mole of San Antonio Estuary, in the county of Alameda, in said State was announced as next in order.

Mr. ODDIE. Over.

Mr. BINGHAM. I should like to ask the chairman of the subcommittee whether the subcommittee on bridges passed upon this bill.

Mr. DALE. Mr. President, this particular bill was not submitted to the subcommittee; the hearing on it was held before the full committee.

Mr. BINGHAM. Is the bill framed in accordance with the usual practice regarding bridge bills?

Mr. DALE. I can not answer the Senator as to that.

Mr. BINGHAM. Does it give the War Department the right to protect the navigability of the stream?

Mr. DALE. I understand it does.

Mr. LA FOLLETTE. Regular order, Mr. President!

The PRESIDENT pro tempore. The regular order being demanded and objection being made, the bill will be passed over.

BILLS PASSED OVER

The bill (H. R. 391) to regulate the use of the Capitol Building and Grounds was announced as next in order.

Mr. BLAINE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2475) to create a prosperity reserve and to stabilize industry and employment by the expansion of public works during periods of unemployment and industrial depression was announced as next in order.

Mr. SACKETT. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 11074) to promote the agriculture of the United States by expanding in the foreign field the service now rendered by the U. S. Department of Agriculture in acquiring and diffusing useful information regarding agriculture, and for other purposes, was announced as next in order.

Mr. KING. Over.

The PRESIDENT pro tempore. The bill will be passed over.

EMPLOYMENT OF MINORS WITHIN THE DISTRICT

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 6685) to regulate the employment of minors within the District of Columbia, which had been reported from the Committee on the District of Columbia with amendments.

The first amendment was on page 4, section 5, line 12, after the word "amusement," to insert "or as a messenger in the distribution or delivery of goods or messages for any person, firm, or corporation engaged in the business of transmitting or delivering messages"; so as to make the section read:

SEC. 5. No minor under 18 years of age shall be employed, permitted, or suffered to work (1) at operating any freight or passenger elevator, or (2) in any quarry, tunnel, or excavation, or (3) in any tobacco warehouse or cigar or other factory or place where tobacco is manufactured or prepared. No girl under the age of 18 years shall be employed, permitted, or suffered to work in any retail cigar or tobacco store, or in any hotel or apartment house, or as an usher, attendant, or ticket seller in any theater or place of amusement, or as a messenger in the distribution or delivery of goods or messages for any person, firm, or corporation engaged in the business of transmitting or delivering messages.

The amendment was agreed to.

The next amendment was on page 4, section 6, line 16, after the numeral "6," to strike out the words "No female under 21 years of age shall be employed, permitted, or suffered to work as a messenger for any telegraph or messenger company or service in the distribution or delivery of goods or messages of any kind"; in line 22, after the word "messenger," to strike out the words "for any telegraph or messenger company or service in the distribution or delivery of goods or messages," and to insert "for any person, firm, or corporation engaged in the business of transmitting or delivering messages"; and in line 26, after the word "day," to insert the words "nor shall any female between the ages of 18 and 21 be so employed before the hour of 6 o'clock in the morning, or after the hour of 7 o'clock in the evening of any day," so as to make the section read:

SEC. 6. No female under 21 years of age shall be employed, permitted, or suffered to work as a messenger for any telegraph or messenger company or service in the distribution or delivery of goods or messages at any time. No male between the ages of 18 and 21 shall be employed, permitted, or suffered to work as a messenger for any telegraph or messenger company or service in the distribution or delivery of goods or messages for any person, firm, or corporation engaged in the business of transmitting or delivering messages before 5 o'clock in the morning or after 12 o'clock midnight of any day, nor shall any female between the ages of 18 and 21 be so employed before the hour of 6 o'clock in the morning or after the hour of 7 o'clock in the evening of any day.

The amendment was agreed to.

Mr. CAPPER. Mr. President, I desire to submit two minor amendments to the bill, which I ask to have adopted.

The PRESIDENT pro tempore. The first amendment proposed by the Senator from Kansas will be stated.

The CHIEF CLERK. On page 3, line 9, it is proposed to strike out the words "or during the proscribed hours."

The amendment was agreed to.

The PRESIDENT pro tempore. The next amendment proposed by the Senator from Kansas will be stated.

The CHIEF CLERK. On page 4, line 10, after the words "hotel or," it is proposed to insert the words "for any."

The amendment was agreed to.

Mr. KING. May I ask the Senator if the amendments just offered by him were considered by the committee?

Mr. CAPPER. They were, and there was no objection on the part of anyone. The amendments were suggested by the Senator from Delaware [Mr. BAYARD], the committee considered them and found that they were acceptable in every respect. There could not possibly be any objection to them.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

REGULATION OF PRACTICE OF HEALING IN THE DISTRICT

Mr. COPELAND. Mr. President, I ask unanimous consent to return to Order Business No. 768, being the bill (S. 3936) to regulate the practice of the healing art to protect the public health in the District of Columbia. I make the request in order that I may move an amendment to the amendment offered by the Senator from Maryland.

The PRESIDING OFFICER. Is there objection to returning to Senate bill 3936?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3936) to regulate the practice of the healing art to protect the public health in the District of Columbia.

Mr. COPELAND. I ask unanimous consent to reconsider the vote whereby the amendment proposed by the Senator from Maryland was agreed to.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. COPELAND. I move to amend the amendment of the Senator from Maryland by striking out on page 2, line 2, after the word "years," the remainder of the paragraph, consisting of four lines.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

Mr. DILL. Let us have the amendment read.

Mr. BRUCE. Let us have the original amendment read as it stands now.

The PRESIDING OFFICER. The original amendment will be stated.

The CHIEF CLERK. The amendment submitted by the Senator from Maryland reads as follows:

On page 25 following line 11 insert the following amendment:

Any person who was engaged in the practice of chiropractic in the District of Columbia on or before January 1, 1928, may deliver to the commission, within 90 days after the approval of this act, a written application for a license to practice chiropractic in the District of Columbia, together with satisfactory proof that the applicant is not less than 21 years of age and of good moral character, and had previously obtained a diploma from some legally incorporated school or college of chiropractic, and had been actively engaged in the practice of chiropractic for the past 10 years, or had previously obtained a diploma from some legally incorporated school or college of chiropractic recognized by the International Congress of Chiropractic Examining Boards.

Mr. COPELAND. My amendment proposed to strike out the last four lines.

Mr. DILL. How will the amendment then read?

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 2, line 2, after the word "years," it is proposed to strike out down to and including the word "Boards," in line 5, reading as follows:

Or had previously obtained a diploma from some legally incorporated school of chiropractic recognized by the International Congress of Chiropractic Examining Boards.

Mr. DILL. Mr. President, I do not see the necessity of the amendment to the amendment. I think it puts an unjust burden on the chiropractor.

Mr. COPELAND. No; it puts all those who are in the District of Columbia in; they will have the right to practice.

Mr. DILL. What about those who may come into the District hereafter?

Mr. COPELAND. They will have to meet the requirements of the medical board, just as a doctor does.

Mr. DILL. What if they have not been engaged in the practice for 10 years?

Mr. COPELAND. This takes care of all those who are now in the District and have been in practice for 10 years, but anyone who is a graduate of a chiropractic school who comes here at any time in the future, by taking the examination, may enter the practice of chiropractic.

Mr. DILL. What about those here who have not practiced for 10 years?

Mr. FLETCHER. They will have to be examined.

Mr. DILL. I object to the amendment, and I object to the further consideration of the bill.

Mr. COPELAND. Before the bill goes over, let me make a change in language only: In line 17, on page 37, I move that the letter "(a)" be placed after the word "apply."

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 37, line 17, it is proposed to have the letter "(a)" placed after the word "apply."

The PRESIDENT pro tempore. Without objection, the amendment is agreed to, and the bill will be passed over.

EFFICIENCY OF THE MILITARY ESTABLISHMENT

The bill (S. 3089) to increase the efficiency of the Military Establishment, and for other purposes, was announced as in order.

Mr. REED of Pennsylvania. I ask that that bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

WILLIAM H. CHAMBLISS

The bill (S. 2274) for the relief of William H. Chambliss, was announced as next in order.

Mr. KING. Mr. President, let me say to those who are interested in that bill that I received a letter yesterday from the Secretary of State and I received a letter last Saturday from the Shipping Board and if those letters state the facts—and I have no reason to doubt their accuracy—then it is obvious that this bill should not be passed, and I object to it.

The PRESIDENT pro tempore. The bill will be passed over.

Mr. EDGE. Mr. President, will the Senator permit me a few minutes to present another viewpoint of the question?

Mr. KING. I will say to the Senator that I was inclined to support this bill until I made an investigation of the facts and secured from the Shipping Board and the State Department reports concerning the causes which led to the separation of Mr. Chambliss from service with the Shipping Board. Until I am convinced of the lack of verity of these reports I am unwilling to support the bill. I have been advised within the past two or three days by officials in the State Department and Shipping Board that they adhere to the positions heretofore taken by them.

Mr. EDGE. Does the Senator know that only within the last week the President of the United States commissioned this captain as a reserve officer in recognition of the fact that the Shipping Board had unjustly put him on the blacklist for six or seven years?

Mr. KING. I am familiar with the action of the President, but submit that the Senator has not quite accurately stated all the facts.

The PRESIDENT pro tempore. The Chair understands the Senator from Utah maintains his objection, and the bill will go over.

Mr. EDGE. As there seems to be some question of veracity, I hope I may be allowed to add there is no doubt about the President having commissioned him as a reserve lieutenant, is there?

Mr. KING. I understand that in a pro forma way the President has recently restored him to the naval reserves, but he has not been given a position by the Shipping Board, and this organization still maintains that the charges against him—and I do not want to repeat them—were sustained and that its action was proper. If the Senator cares to see the reports which I have received from the Shipping Board and the State Department, I shall be glad to show them to him. The President, I submit, has not determined that the discharge of Mr. Chambliss was unwarranted.

Mr. EDGE. The Senator will admit, will he not, that they absolutely reversed their position and restored his master's certificate as a captain in the merchant marine, although they kept him out of any salary for five or six years?

Mr. KING. I do not admit that the State Department or Shipping Board have reversed their position, but, upon the contrary, they adhere to it.

Mr. FLETCHER. Mr. President, is the Senator from Utah aware of the fact that Admiral Benson has written a communication in which he says he was in error about this case for a long while, and completely exonerating Mr. Chambliss?

The PRESIDENT pro tempore. The bill will be passed over.

BILLS PASSED OVER

The bill (S. 4174) to establish a woman's bureau in the Metropolitan Police Department of the District of Columbia, and for other purposes, was announced as next in order.

Mr. KING. Let that bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1749) providing for the development of hydroelectric energy at Great Falls for the benefit of the United States Government and the District of Columbia was announced as next in order.

The PRESIDENT pro tempore. Let that bill go over.

The bill (S. 3874) authorizing appropriations of funds for construction of a highway from Red Lodge, Mont., to the boundary of the Yellowstone National Park near Cooke City, Mont., was announced as next in order.

Mr. WARREN. I ask that that bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

EXTENSION OF CORRUPT PRACTICES ACT

The bill (S. 4179) to amend the corrupt practices act by extending the same to candidates for nomination and election to the offices of Representative and Senator in the Congress of the United States, and for other purposes, was announced as next in order.

Mr. SACKETT. I ask that the bill go over.

Mr. McKELLAR. Mr. President, may I ask who it was who objected to the bill?

The PRESIDENT pro tempore. The bill was objected to by the Senator from Kentucky.

Mr. SACKETT. I asked that the bill go over.

Mr. McKELLAR. Would the Senator care to hear just exactly what the bill seeks to accomplish? I do not think the Senator would object to it if he understood the bill. Will the Senator withdraw his objection long enough for me to make a statement about it?

Mr. SACKETT. Very well.

Mr. McKELLAR. This bill was introduced for the purpose of reenacting the primary law that was passed some years ago to make it accord with the opinion of the Supreme Court in the Newberry case.

It will be remembered that in that case one of the judges especially, and two or three indirectly, stated that if the law then under consideration had been passed subsequently to the adoption of the seventeenth amendment it would present an entirely different question; so this bill was introduced for the purpose of correcting that situation.

The Judiciary Committee went over the bill very carefully a number of times, both the subcommittee and the full committee, and made many amendments, and these amendments were submitted to many who were interested of the larger States, as well as of the smaller States. Then after all those amendments were made another bill was introduced containing all those amendments, and that is why the bill is reported without amendment.

In the interest of fair and honest elections, I hope this bill may pass and go over to the House, and let them act on it if it is possible.

I hope the Senator will withdraw his objection.

Mr. ROBINSON of Arkansas. Mr. President, the bill recognizes the distinction between States in the matter of population?

Mr. McKELLAR. Yes.

Mr. ROBINSON of Arkansas. It does not attempt to fix an arbitrary limitation?

Mr. McKELLAR. Not at all. The committee called in the various Senators representing the various larger States in order to get a satisfactory provision, and I think it was made satisfactory to each and to every one.

Mr. SACKETT. What is the basis of it?

Mr. BINGHAM. Let the bill be read.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

Mr. McKELLAR. It is quite a long bill.

Mr. SACKETT. I think we ought to know what it is.

SEVERAL SENATORS. Regular order!

The PRESIDENT pro tempore. The regular order is demanded, and the bill will be passed over.

BILLS PASSED OVER

The bill (S. 2069) to extend the provisions of section 1814 of the Revised Statutes to the Territories of Hawaii and Alaska was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

Mr. BINGHAM. Mr. President, will the Senator withhold his objection for a moment?

Mr. KING. Mr. President, that matter was brought up the other evening, and I took the view, as other Senators did, some of whom objected, that it is too early for Hawaii and for the Territory of Alaska to select their great men and place their statues in Statuary Hall. I think they had better wait until they become States, or, at least, until they are satisfied that the greatest men born there or reared there or developed there are ready for designation.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3770) authorizing the Federal Power Commission to issue permits and licenses on Fort Apache and White Mountain Indian Reservations, Ariz., was announced as next in order.

Mr. PHIPPS. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2330) authorizing reconstruction and improvement of a public road in Wind River Indian Reservation, Wyo., was announced as next in order.

Mr. WHEELER. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

EQUALIZATION OF PAY OF REGULAR ARMY OFFICERS

The bill (S. 3569) to equalize the pay of certain classes of officers of the Regular Army was announced as next in order.

Mr. KING. Let that go over.

Mr. SHEPPARD. Mr. President——

Mr. KING. I will hear the Senator.

Mr. SHEPPARD. May I say to the Senator from Utah that the Army pay act of 1922, which provided periodical pay increases for Army officers omitted, through an oversight, certain officers—majors, colonels, and captains, principally—who came into the Army in 1920 and who had served in the World War. They came in at such an age that if they are not given the benefit of period pay, a recognition which the act of 1922 intended them to have in common with all other officers, they will, most of them, be retired in their present rank without a pay increment of any kind. The bill corrects an evident oversight in the pay act of 1922 and ends a most unjust discrimination.

Mr. STECK. Mr. President, there has been called to my attention a class of officers who came in in 1920 and who were not commissioned as captains, but afterwards their commissions were dated back to July 1, 1920. It seems to me this bill should be amended so as to take care of those officers.

Mr. SHEPPARD. The Senator from Iowa has an amendment which will cover those officers, and I shall be glad to accept it.

The PRESIDENT pro tempore. Does the Senator from Utah maintain his objection?

Mr. KING. Mr. President, may I ask the chairman of the Committee on Military Affairs, the Senator from Pennsylvania [Mr. REED], whether this bill meets the approval of the committee and the approval of the War Department?

Mr. REED of Pennsylvania. Mr. President, the bill was very carefully studied by the committee, and the situation, in a word, is just this:

When these officers came in, they were men of mature age who came in after a very intensive experience in the World War. The Army bill of 1920, the national defense act, gave them a constructive service for the purpose of promotion; but in drawing the pay act of 1922 it was neglected to give them the advantage of the same constructive service. So it follows that a major, for example, will serve throughout 10 years of service without getting the advantage of what are called "fogies" in calculating his pay, but the moment he gets a promotion he gets the advantage of all that from constructive service. It is an inconsistency that was never intended by the pay act.

Mr. KING. I have no objection.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the first section of the act approved June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service" (42 Stat. 625), be, and the same is hereby, amended by inserting after the semicolon following the word "service" and before the word "and" in the twelfth line of the third paragraph of said section the following: "and to lieutenant colonels of the Army who were appointed to the Regular Army under the provisions of said section 24 in such grade of lieutenant colonel, and who have completed 10 years' service; and also to lieutenant colonels of the Army who were appointed to the Regular Army under the provisions of the first sentence of said section 24 in the grade of major and who have completed 19 years' service; and also to lieutenant colonels of the Army who were appointed to the Regular Army under the provisions of the first sentence of said section 24 in the grade of captain and who have completed 29 years' service"; and by inserting after the colon following the word "service" in the thirteenth line of the fourth paragraph of said section the following: "and to majors of the Army who were appointed to the Regular Army under the provisions of the first sentence of said section 24 in such grade of major and who have completed 9 years' service; and also to majors of the Army who were appointed to the Regular Army under the provisions of the first sentence of said section 24 in the grade of captain and who have completed 19 years' service"; and by inserting after comma following the word "service" in the eleventh line of the fifth paragraph of said section the following: "and to captains of the Army who were appointed to the Regular Army under the provisions of the first sentence of said section 24 in such grade of captain and who have completed 10 years' service."

SEC. 2. All laws and parts of laws in conflict herewith are hereby repealed.

The PRESIDENT pro tempore. The Senator from Iowa [Mr. BROOKHART] offers an amendment, which will be stated.

The CHIEF CLERK. On page 3, line 1, after the word "captain," it is proposed to insert:

Or whose present rank as captain dates from July 1, 1920, or earlier.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (H. R. 8988) for the relief of Milton Longsdorf was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 3241) for the relief of Seymour Buckley was announced as next in order.

SEVERAL SENATORS. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 11951) to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by the acts of March 6, 1920, and February 27, 1926, was announced as next in order.

Mr. KING. Let an explanation be made of that bill.

The PRESIDENT pro tempore. The Senator reporting the bill is not present.

Mr. BRATTON. Let it go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 11526) to authorize the construction of certain naval vessels, and for other purposes, was announced as next in order.

Mr. BLAINE. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

USE OF MAILS IN CONNECTION WITH FRAUDULENT DEVICES AND LOTTERY PARAPHERNALIA

The bill (S. 2751) to amend section 213, act of March 4, 1909 (Criminal Code, title 18, sec. 336, U. S. C.), affixing penalties for use of mails in connection with fraudulent devices and lottery paraphernalia, was considered as in Committee of the Whole.

The PRESIDENT pro tempore. This bill was considered on May 3, and an amendment by the Senator from Texas was pending, which will be stated.

The Chief Clerk proceeded to read the amendment, which was to strike out all after the enacting clause and insert the following:

That section 213, act of March 4, 1909 (Criminal Code, title 18, sec. 336, U. S. Code), be amended so as to read as follows:

"SEC. 213. No letter, package, postal card, or circular concerning any lottery, gift enterprise, or scheme of any kind offering prizes dependent in whole or in part upon lot or chance, or concerning any article, device, or thing so constructed as to have for its principal and primary use the risk of money or property by lot or chance, or concerning any unfair, dishonest, or cheating gambling article, device, or thing; and no lottery ticket or part thereof, or paper, certificate, or instrument purporting to be or to represent a ticket, chance, share, or interest in or dependent upon the event of a lottery, gift enterprise, or scheme of any kind offering prizes dependent in whole or in part upon lot or chance; and no article, device, or thing so constructed as to have for its principal and primary use the risk of money or property by lot or chance, or matter relating thereto; and no unfair, dishonest, or cheat-

ing gambling article, device, or thing; and no check, draft, bill, money, postal note, or money order for the purchase of any ticket or part thereof, or of any share or chance in any such lottery, gift enterprise, or scheme; and no newspaper, circular, pamphlet, or publication of any kind containing any advertisement of any lottery, gift enterprise, or scheme of any kind offering prizes dependent in whole or in part upon lot or chance, or containing any list of the prizes drawn or awarded by means of any such lottery, gift enterprise, or scheme, whether said list contains any part or all of such prizes, or containing any advertisement of any article, device, or thing so constructed as to have for its principal and primary use the risk of money or property by lot or chance, or containing any advertisement of any unfair, dishonest, or cheating gambling article, device, or thing, shall be deposited in or carried by the mails of the United States or be delivered by any postmaster or letter carrier. Whoever shall knowingly deposit or cause to be deposited, or shall knowingly send or cause to be sent, anything to be conveyed or delivered by mail in violation of the provisions of this section, or shall knowingly deliver or cause to be delivered by mail anything herein forbidden to be carried by mail, shall be fined not more than $1,000 or imprisoned not more than two years, or both; and for any subsequent offense shall be imprisoned not more than five years. Any person violating any provisions of this section may be tried and punished either in the district in which the unlawful matter or publication was mailed, or to which it was carried by mail for delivery according to the direction thereon, or in which it was caused to be delivered by mail to the person to whom it was addressed."

Mr. SHEPPARD. The amendment was read the other night, having been offered by me at that time. It perfects the bill, and I ask that it be agreed to.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, was read the time time, and passed.

BILLS PASSED OVER

The bill (S. 3902) to provide books and educational supplies free of charge to pupils of the public schools of the District of Columbia was announced as next in order.

Mr. PHIPPS. Let that go over.

Mr. COPELAND. Mr. President, was objection made to this bill?

The PRESIDENT pro tempore. Objection was made by the senior Senator from Colorado.

Mr. COPELAND. Are there not any words that I can use to induce the senior Senator from Colorado to change his mind?

Mr. PHIPPS. I do not think it could be done under the five-minute limit, which is in force to-night. I shall be very glad to discuss the matter with the Senator.

Mr. COPELAND. I am very sorry. I think the bill should be passed.

The bill (S. 1900) to provide for the construction of a post road and military highway from a point on or near the Atlantic coast to a point on or near the Pacific coast, and for other purposes, was announced as next in order.

Mr. WALSH of Montana. Let that go over.

Mr. DILL. Mr. President, I think this is a bill that ought to be passed. It looks to the future for a great highway across the continent. While it will be a long time before it is built, it seems to me that it has a great deal of merit. I wish the Senator could withdraw his objection.

Mr. WALSH of Montana. I simply consider the bill as so comprehensive in its scope that it ought to be discussed, at least.

Mr. DILL. I realize that. It is very desirable legislation, however.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3890) to amend section 5 of the act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1921, and for other purposes," was announced as next in order.

Mr. BROOKHART. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3210) providing for the men who served with the American Expeditionary Forces in Europe as engineer field clerks the status of Army field clerk and field clerk, Quartermaster Corps, of the United States Army when honorably discharged, was announced as next in order.

The PRESIDENT pro tempore. This bill is reported adversely.

Mr. BLAINE (and other Senators). Let it go over.

The PRESIDENT pro tempore. The bill will be passed over.

CHARLIE R. PATE

The bill (H. R. 4652) for the relief of Charlie R. Pate was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LAND OFFICE AT ROSWELL, N. MEX.

The bill (S. 3136) creating the Roswell land district, establishing a land office at Roswell, N. Mex., and for other purposes, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That an additional land district is hereby created in the State of New Mexico to embrace lands described as follows:

"Beginning at the southeast corner of the State of New Mexico and running thence north on the east line of said State to the base line of the public-land survey in said State; thence west on said line to the range line between ranges 8 and 9 east; thence south on said range line to the first standard parallel south; thence west on said line to the range line between ranges 8 and 9 east; thence south on said line to the second standard parallel south; thence west on said line to the range line between ranges 8 and 9 east; thence south on said line to the third standard parallel south; thence east on said line to the range line between ranges 8 and 9 east; thence south on said line to the south line of the State of New Mexico; thence east on said line to the point of beginning, and that Roswell, within said district, is hereby designated as the site for the land office thereof."

SEC. 2. That the Secretary of the Interior shall cause all plats, maps, records, and papers in the Las Cruces and Santa Fe land offices which relate to or form a part of the record of the lands embraced in the land district hereby created to be transferred to the same, and said district created as aforesaid shall be known as the Roswell land district.

SEC. 3. That the President is authorized to appoint, by and with the consent of the Senate, a person to act as register of the aforesaid Roswell land district; and such clerical force as may be necessary shall be assigned to the said Roswell land office by the Secretary of the Interior.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 717) to provide for the deportation of certain alien seamen, and for other purposes, was announced as next in order.

Mr. BINGHAM. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 584) for the relief of Frederick D. Swank was announced as next in order.

SEVERAL SENATORS. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 5894) for the relief of the State Bank & Trust Co. of Fayetteville, Tenn., was announced as next in order

Mr. HOWELL. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

AMENDMENT OF ACT PROVIDING CIVIL GOVERNMENT FOR PORTO RICO

The bill (H. R. 8559) to amend section 58 of the act of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes," was announced as next in order.

Mr. REED of Pennsylvania. Mr. President, that is the bill which imposes a tariff on coffee imported into Porto Rico. It seems to me this bill ought to be considered, like other tariff measures, in the Committee on Finance. Therefore, I will ask if we may not have it recommitted to the Committee on Finance for consideration; and I make that motion.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Pennsylvania.

Mr. BINGHAM. Mr. President, may I say to the Senator from Pennsylvania that the original organic act for the civil government of Porto Rico, which was reported out of the Committee on Territories and Insular Possessions, contained a 5 per cent duty on coffee imported into Porto Rico, and this bill increases it to 10 per cent; but I have no objection to its going to the Committee on Finance.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Pennsylvania.

The motion was agreed to.

The PRESIDENT pro tempore. The bill is referred to the Committee on Finance.

BILL AND JOINT RESOLUTION PASSED OVER

The joint resolution (S. J. Res. 9) to establish a joint commission on insular reorganization was announced as next in order.

Mr. LA FOLLETTE. Let that go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

The bill (H. R. 6185) for the relief of Thomas Jefferson Shropshire was announced as next in order.

The PRESIDENT pro tempore. This bill is reported adversely.

Mr. BROOKHART. Let it go over.

The PRESIDENT pro tempore. The bill will be passed over.

THE AIR CORPS

The bill (H. R. 12814) to increase the efficiency of the Air Corps was announced as next in order.

Mr. ROBINSON of Arkansas. Mr. President, I think this bill should be considered and acted upon by the Senate. I desire, however, to bring to the attention of the Senate the fact that the original bill as it passed the body at the other end of the Capitol, H. R. 12814, aimed to correct what is alleged to have been the injustice that has long been recognized as existing among the Air Corps officers. The House Committee on Military Affairs made a prolonged study of the personnel of the Air Corps. They reported this bill. A similar bill was introduced in the Senate. The House of Representatives on May 7, I think, passed this bill unanimously. The Senate Committee on Military Affairs struck out the entire House bill, and inserted other provisions only remotely related to the subject matter of the original House bill.

I point out the fact that the House bill had the approval of the Secretary of War, the Assistant Secretary in Charge of Aviation, the Chief of Staff, the Chief of the Air Corps, and I think it has also the practically unanimous indorsement of fliers throughout the country. Colonel Lindbergh appeared before both the Senate committee and the House committee and made a general statement in support of the purposes of the bill. He did not attempt to analyze the details of the bill, but was in hearty accord with the intention to create a separate promotion list.

I wish to inquire of the Senator from Pennsylvania whether he can not see his way clear to retain the House provision?

Mr. REED of Pennsylvania. Mr. President, there is very much in the idea of the House committee and the original bill that is meritorious, and we tried to preserve that in the Senate substitute; but we were all convinced that we could do no worse service to the Air Corps than to give it a separate promotion list, distinct from the promotion list of the rest of the Army.

We have tried to retain, and have retained, in the Senate substitute, the items of compulsory promotion after a certain number of years of service, and we have also, as the Senator will see in section 3, given to the Air Corps the necessary number of higher ranking officers by temporary promotions which will fill the gaps of which Colonel Lindbergh spoke. He appeared also before the Senate Committee, and with his main thought we were all of us in sympathy, but we all decided that it would be doing a poor service to the Air Corps to single it out as the peculiar beneficiary of special promotion legislation.

I might say to the Senator that the substitute bill which is reported for the Furlow bill met with the unanimous approval of the members of the Committee on Military Affairs. We differ in our views about details, but on this substitute we are unanimously in accord.

Mr. KING. Mr. President, will the Senator yield?

Mr. REED of Pennsylvania. I yield.

Mr. KING. I am compelled to state to the Senator—and I do it with much regret—that the junior Senator from Alabama [Mr. BLACK] was detained, and he asked me to object to this bill. I forgot it, and I am just reminded by Colonel Halsey of my promise that if the bill came up I would interpose an objection.

The PRESIDENT pro tempore. Objection being interposed, the bill will go over.

Mr. REED of Pennsylvania. Mr. President, if the Senator will permit me, before we go to the next bill——

Mr. KING. I withhold my objection.

Mr. REED of Pennsylvania. The Senator from Alabama is in hearty accord with the provisions of the substitute bill, but he wishes to offer an amendment to it, adding to its provisions, not changing them, but adding to them, and in his absence I have nothing to do but to acquiesce.

Mr. KING. I hope the Senator will pardon me for interposing the objection.

Mr. FLETCHER. Mr. President, the Senator may state also that this substitute meets with the approval of the Air Corps.

Mr. ROBINSON of Arkansas. That is not the information which has come to me.

Mr. BLAINE. Regular order!

The PRESIDENT pro tempore. The clerk will report the next bill on the calendar. The Senator from Arkansas can continue to hold the floor, however.

Mr. ROBINSON of Arkansas. I wish to conclude my statement. Of course, if the Senator from Wisconsin insists, I shall wait until the next bill is called before I conclude my statement, but I apprehend he will not take that course.

My information is that the Air Corps would prefer the substitute to no legislation, but that they have never abandoned their advocacy of what is known as the furlough bill. They favor that, and they would like to see it passed. If I am incorrect about that, the Senator from Pennsylvania can say so.

Mr. REED of Pennsylvania. I think the Senator from Arkansas has stated the facts exactly, but the committee tries to look at it from the standpoint of the Army as a whole, and we are convinced that it would not be for the interests of the Air Corps to adopt the furlough bill without a change.

The PRESIDENT pro tempore. The next bill will be announced.

EXTENSION OF FOURTEENTH STREET

The bill (S. 3440) to vacate certain streets and alleys within the area known as the Walter Reed General Hospital, District of Columbia; and to authorize the extension and widening of Fourteenth Street from Montague Street to its southern terminus south of Dahlia Street, was announced as next in order.

Mr. LA FOLLETTE. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

JOINT COMMISSION ON INSULAR REORGANIZATION

Mr. BINGHAM. Mr. President, I ask unanimous consent that we return to calendar 1131, Senate Joint Resolution 9, to establish a joint commission on insular reorganization. I understand that the Senator from Wisconsin [Mr. LA FOLLETTE], who asked that it go over, withdraws his objection.

The PRESIDENT pro tempore. Is there objection to returning to Senate Joint Resolution 9?

Mr. KING. Mr. President, before I consent to that, I would like to ask the Senator whether it does not contemplate the retention by the United States of control over the Philippine Islands for an indefinite period.

Mr. BINGHAM. No, Mr. President; this is merely for the creation of a joint commission of Congress to study and ascertain whether some way may not be found whereby our insular possessions may cease to be under three departments of the Government. Certain of the islands, namely, Guam, American Samoa, and the Virgin Islands, are under the Navy; certain others, namely, the Hawaiian Islands and the Aleutian Islands, are under the Interior Department; and Porto Rico and the Philippines are under the War Department.

This measure is for the creation of a commission to study and report to Congress not later than December 16, 1929, whether or not it may be feasible to create a department or bureau or central office where all insular matters may be considered.

Mr. ROBINSON of Arkansas. I think the bill has a meritorious purpose, and I am impressed that it is worthy of consideration.

Mr. KING. If that is the only purpose, I have no objection, but I do know that there is a determination upon the part of many in the United States to retain forever control of the Philippine Islands, contrary to the pledge we have made to give them independence. If this is a step in that direction—that is, to retain control and jurisdiction over the Philippine Islands—I shall be very much opposed to it.

Mr. DILL. Mr. President, may I ask the Senator from Connecticut whether this does not contemplate a bureau of foreign affairs similar to the ministries of foreign affairs of European countries?

Mr. BINGHAM. All that is contemplated is a commission of five Senators and five Members of the House to study the situation and report to the next session of Congress.

Mr. DILL. I have read the bill, but it seems to me that is exactly what it is looking to, namely, the establishment of a bureau of the foreign dominions of the United States. I do not see any necessity of it, myself. I think the bill had better go over.

The PRESIDENT pro tempore. The bill will be passed over.

POCAHONTAS FUEL CO. (INC.)

The bill (H. R. 4926) for the relief of the Pocahontas Fuel Co. (Inc.), was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

HARRY M. KING

The bill (S. 4376) for the relief of Harry M. King was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

CARL C. BACK

The bill (H. R. 1616) for the relief of Carl C. Back was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RESOLUTION PASSED OVER

The resolution (S. Res. 113) favoring a restriction of loans by Federal reserve banks for speculative purposes was announced as next in order.

Mr. EDGE. Let that go over.

The PRESIDENT pro tempore. The resolution will be passed over.

FEDERAL LAND AND INTERMEDIATE CREDIT BANK, COLUMBIA, S. C.

The resolution (S. Res. 159) to investigate the affairs and management of the Federal land and intermediate credit bank at Columbia, S. C., was announced as next in order.

Mr. BLEASE. Mr. President, it would take more than five minutes to put in the RECORD what I think ought to be placed in the RECORD relating to the matter, and I ask that the resolution go over.

The PRESIDENT pro tempore. The resolution will be passed over.

TAX ASSESSMENTS UPON HON. JAMES COUZENS

The resolution (S. Res. 213) to investigate certain circumstances connected with the matter of additional tax assessments upon Hon. JAMES COUZENS was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The resolution will be passed over.

SALARIES OF POSTMASTERS

The bill (S. 1679) amending the act of February 28, 1925, reclassifying the salaries of postmasters was announced as next in order.

Mr. KING. Let that go over.

Mr. PHIPPS. Will the Senator withhold his objection for a moment?

Mr. KING. Certainly.

Mr. PHIPPS. The bill has been amended, as the Senator will note, so that the amounts proposed to adjust the salaries in the principal post offices of the United States are now in this bill less than the amounts the Senate voted a year ago.

Mr. EDGE. Mr. President, may I interrupt the Senator?

Mr. PHIPPS. Certainly.

Mr. EDGE. For the information of the Senate, I may say that that bill passed the Senate at the last session, sponsored by the Senator from New York, Mr. Wadsworth, and it was developed during the discussion that this particular class of postmasters were the only class in the Postal Service whose salaries had not been raised by the readjustment act which had been passed raising second, third, and fourth class postmasters. This refers alone to first-class postmasters. It passed the Senate under unanimous consent a year ago with the salaries on a higher plane.

Mr. KING. Mr. President, that argument would not appeal to me at all. The fact is that we are paying Federal employees far more than people get in private life. The appropriations this year to salaries of Federal employees, only a part of the Federal employees, those who have had the benefit of retirement, will amount to $850,000,000, approximately one-fourth of all the revenue that we obtain.

Mr. EDGE. Mr. President, the Senator says the argument does not appeal to him; but does not the argument appeal to him that it means adjusting salaries on a businesslike basis? That is exactly what this bill proposes to do.

Mr. PHIPPS. Mr. President, I desire to call attention to the fact that the highest salary provided for covers the office in the city of New York, where the salary is now $8,000, which certainly should be adjusted. This bill proposes to make it $10,000. During the last Congress the Senate voted that the salary should be $12,000, and the others are in proportion. These raises are, most of them, $500 a year. The total amount involved is about $47,000. I have the data before me here, but I did not desire to take up much of the time of the Senate on it. The bill was unanimously reported by the Committee on Post Offices and Post Roads after serious consideration and after cutting down the amounts that had been previously agreed to.

Mr. KING. May I ask the Senator whether there was any difficulty in finding aspirants for these various positions?

Mr. PHIPPS. I have not had any difficulty in my experience any more than the Senator has probably had.

Mr. KING. I was asking if there was any difficulty.

Mr. PHIPPS. I submit very respectfully that a man who is loaded down with the responsibilities and duties of an office such as that of postmaster in the city of New York certainly should be recompensed to the extent of $10,000 a year. I think that is a minimum salary for that position.

Mr. KING. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

DISTRICT COURT OF THE CANAL ZONE

The bill (S. 3938) relating to the District Court of the Canal Zone was announced as next in order.

Mr. ROBINSON of Arkansas. Let the Senator reporting the bill make an explanation of it. It seems to be of considerable importance.

Mr. WATERMAN. Mr. President——

Mr. EDGE. Mr. President, I would like to have the bill go over. I have a protest from the War Department, under whose jurisdiction these courts have been and are now. They have not been even heard by the committee, and they have asked me for at least an opportunity to be heard.

The PRESIDENT pro tempore. The bill will be passed over.

ADDITIONAL JUSTICE, SUPREME COURT OF THE DISTRICT OF COLUMBIA

The bill (S. 4127) to provide for the appointment of an additional justice of the Supreme Court of the District of Columbia, was announced as next in order.

Mr. BRATTON. Let that go over.

Mr. CAPPER. Mr. President, I hope the Senator will withhold his objection, until I make a short statement. The Assistant Attorney General, Mr. Marshall, representing the Government, and the corporation counsel of the District of Columbia, Mr. Bride, came before the Committee on the Judiciary, which has this bill before it, and made the strongest kind of a showing in favor of the appointment of another judge for the District of Columbia. The Supreme Court of the District of Columbia now has the same number of judges that it had 49 years ago, in which time the population of the city has more than trebled. It now takes an average of a year and a half to bring a civil case to trial. The court is at present absolutely unable to handle the business of the district.

Mr. BRATTON. Mr. President, let me ask the Senator how many judges there are on the Supreme Court of the District of Columbia.

Mr. CAPPER. There are six judges, as there were in 1879.

Mr. BRATTON. How does that number compare with the number in other cities of substantially the same population as that of the city of Washington?

Mr. CAPPER. It is a smaller number than is required in any other city in the United States of similar population.

Mr. BRATTON. I withdraw the objection.

Mr. ROBINSON of Arkansas. Mr. President, does the court sit in divisions?

Mr. FLETCHER. I think the bill had better go over.

Mr. WALSH of Montana. Mr. President, in answer to the Senator from Arkansas, I may state that each judge sits alone. Six judges are at work all the time.

Mr. ROBINSON of Arkansas. So that the addition of another judge would facilitate the handling of the business of the court?

Mr. WALSH of Montana. Oh, yes.

Mr. ROBINSON of Arkansas. That is what I was anxious to find out.

Mr. WALSH of Montana. An additional judge is particularly needed at this time, because it is contemplated that a very large amount of work will be entailed in consequence of the construction program in the District of Columbia. Condemnation proceedings of a very extensive character will be necessary.

Mr. ROBINSON of Arkansas. I think it is very sound policy to provide an adequate number of judges to dispense justice in any jurisdiction.

The PRESIDING OFFICER (Mr. LA FOLLETTE in the chair). Objection has been made, and the bill will be passed over.

JOHNS-MANVILLE CORPORATION

The bill (S. 1547) for the relief of Johns-Manville Corporation was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with amendments, on page 1, line 6, to strike out "$6,465.37" and to insert in lieu thereof "$6,316.31," and in line 7, after the word "labor" and the comma, to insert the words "services, and material," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any funds in the Treasury not otherwise appropriated, to Johns-Manville Corporation the sum of $6,316.31 for increased cost of labor, services, and material on contract No. 3839–B for roofing at naval ordnance plant, South Charleston, W. Va.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases, was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDING OFFICER. The bill will be passed over.

NATIONAL MEMORIAL ASSOCIATION (INC.)

The joint resolution (S. J. Res. 132) to create a commission to secure plans and designs for and to erect a memorial building for the National Memorial Association (Inc.), in the city of Washington, as a tribute to the negro's contribution to the achievements of America, was announced as next in order.

Mr. KING. Let the joint resolution be read.

Mr. BRATTON. Let it go over.

The PRESIDING OFFICER. The joint resolution will be passed over.

PIER AT STONINGTON, ME.

The bill (H. R. 11950) to legalize a pier and wharf in Deer Island thoroughfare on the northerly side at the southeast end of Buckmaster Neck at the town of Stonington, Me., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time and passed.

ARMISTICE DAY

Mr. MAYFIELD. Mr. President, I ask unanimous consent to recur to Calendar 715, the joint resolution (S. J. Res. 25) to declare the 11th day of November, celebrated and known as Armistice Day, a legal holiday. It was passed over, on objection. The joint resolution simply declares——

The PRESIDING OFFICER. Is there objection to recurring to Calendar 715, as requested by the Senator from Texas?

Mr. KING. Does it create another holiday?

Mr. MAYFIELD. It simply declares that the 11th day of November, known as Armistice Day, shall be made——

Mr. BRUCE. Over.

The PRESIDING OFFICER. Objection having been made, the joint resolution goes over and the clerk will report the next bill on the calendar.

APPOINTMENT OF COURT STENOGRAPHERS

The bill (H. R. 9024) to authorize the appointment of stenographers in the courts of the United States and to fix their duties and compensation was announced as next in order.

Mr. KING. Over.

Mr. SHEPPARD. Mr. President, may I ask the Senator——

The PRESIDING OFFICER. Does the Senator from Utah withhold his objection?

Mr. KING. No.

The PRESIDING OFFICER. The bill will be passed over.

RIO GRANDE FEDERAL IRRIGATION PROJECT, NEW MEXICO-TEXAS

The bill (S. 4167) extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas, was announced as next in order.

Mr. PHIPPS. Mr. President, the House has passed the bill (H. R. 11471), Calendar 1303, which is a duplicate of the Senate bill, Calendar 1216. I ask that the House bill be substituted for the Senate bill.

The PRESIDING OFFICER. Is there objection to the substitution of the House bill for the Senate bill? The Chair hears none and lays before the Senate the House bill.

The Senate as in Committee of the Whole proceeded to consider the bill (H. R. 11471) extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas, and it was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to enter into amended contract with the Elephant Butte irrigation district, of New Mexico, and El Paso County water improvement district No. 1, of Texas, whereby, after the payment of the first four annual installments, as now provided for in existing contracts, upon the construction charge under the Rio Grande Federal irrigation project, New Mexico-Texas, the remaining unpaid construction charge per irrigable acre shall be payable annually in installments of $3.60.

SEC. 2. These annual payments shall continue until the total construction charge against said districts is paid.

SEC. 3. The existing contracts between the United States and Elephant Butte irrigation district, of New Mexico, and between the United States and El Paso County water improvement district No. 1 shall remain unaltered except as herein otherwise directed.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Without objection, Senate bill 4167 will be indefinitely postponed.

INTERNATIONAL PETROLEUM EXPOSITION, TULSA, OKLA.

The joint resolution (H. J. Res. 292) authorizing the President to invite the States of the Union and foreign countries to participate in the International Petroleum Exposition at Tulsa, Okla., to begin October 20, 1928, was announced as next in order.

Mr. FLETCHER. Mr. President, what is the need of this exposition?

Mr. THOMAS. Mr. President, the joint resolution merely authorizes the President to invite the various States and foreign countries to participate in the International Petroleum Exposition which is to be held at Tulsa, Okla., next October.

Mr. FLETCHER. Does it involve any expense on the part of the Government?

Mr. THOMAS. No expense whatever.

Mr. FLETCHER. I have no objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, and it was read, as follows:

Resolved, etc., That the President of the United States is authorized to invite by proclamation, or in such other manner as he may deem proper, the States of the Union and all foreign countries to participate in the proposed International Petroleum Exposition, to be held at Tulsa, Okla., beginning October 20, 1928, for the purpose of exhibiting samples of fabricated and raw products of all countries used in the petroleum industry and bringing together buyers and sellers for promotion of trade and commerce in such products.

SEC. 2. All articles that shall be imported from foreign countries for the sole purpose of exhibition at the International Petroleum Exposition upon which there shall be a tariff or customs duty shall be admitted free of the payment of duty, customs fees, or charges, under such regulations as the Secretary of the Treasury shall prescribe; but it shall be lawful at any time during the exhibition to sell any goods or property imported for and actually on exhibition, subject to such regulations for the security of the revenue and for the collection of import duties as the Secretary of the Treasury may prescribe: *Provided*, That all such articles when sold or withdrawn for consumption or use in the United States shall be subject to the duty, if any, imposed upon such articles by the revenue laws in force at the date of withdrawal; and on such articles which shall have suffered diminution or deterioration from incidental handling and necessary exposure, the duty, if paid, shall be assessed according to the appraised value at the time of withdrawal for consumption or use, and the penalties prescribed by law shall be enforced against any person guilty of any illegal sale, use, or withdrawal.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

YUMA AUXILIARY PROJECT, ARIZONA

The bill (S. 1142) amending the act of January 25, 1917 (39 Stat. L. 868), and other acts relating to the Yuma auxiliary project, Arizona, was considered as in Committee of the Whole, and was read as follows:

Be it enacted, etc., That the lands in the Mesa division, Yuma auxiliary project, constructed and operated pursuant to the act of January 25, 1917 (39 Stat. L. 868), and acts amendatory thereof and supplementary thereto, shall hereafter be subject to sale in tracts of 10 to 160 acres at a price to be fixed by the Secretary of the Interior and the estimated cost of constructing and providing the necessary works for the irrigation of said lands.

SEC. 2. That the purchase price of land and water right hereafter sold shall be paid to the United States in 40 equal annual installments, the first of which shall be due and payable at the date of purchase and the remaining installments annually thereafter until paid. No interest shall be payable on the amount represented by the first 10 installments, but interest at the rate of 4 per cent per annum shall be payable annually on the indebtedness represented by installments 12 to 40, inclusive, after the end of the tenth year from the date of sale. All installments unpaid when due shall bear interest at the rate of 6 per cent per annum from the date of default until paid. Contracts of six months or more in default on any installments or interest payment shall be subject to cancellation and the forfeiture of all payments made thereon: *Provided*, That the Secretary of the Interior is authorized at any time within one year from the date this act becomes effective to amend any existing uncompleted contracts for the purchase of land and water rights purchased pursuant to the act of February 21, 1925 (43 Stat. L. 962), so that the aggregate amount of the principal and interest remaining unpaid under such contract may be paid in 40 equal annual installments in accordance with the conditions of this act, beginning with the date of the amendatory contract.

SEC. 3. All acts and parts of acts in conflict with the provisions hereof are hereby repealed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 4304) to provide for the storage for diversion of the waters of the North Platte River and construction of the Casper-Alcova reclamation project, was announced as next in order.

Mr. WHEELER. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 4305) to provide for the storage for diversion of the waters of the North Platte River and construction of the Saratoga reclamation project was announced as next in order.

Mr. WHEELER. Over.

The PRESIDING OFFICER. The bill will be passed over.

YOSEMITE NATIONAL PARK BOUNDARY

The bill (H. R. 12038) to authorize the acquisition of certain patented land adjoining the Yosemite National Park boundary by exchange, and for other purposes, was considered as in Committee of the Whole.

Mr. NORBECK. Mr. President, the report of the Secretary calls attention to an error in the bill. Therefore, I want to offer an amendment to correct the error. The third word on page 2, line 23 should be "northwest" instead of "northeast."

The PRESIDING OFFICER. The Chair will inform the Senator from South Dakota that the bill on the calendar, page 2, line 23, reads as follows: "Township 3 south, range 21 east, and northwest quarter."

Mr. NORBECK. The correction has evidently been made. I withdraw the amendment.

The bill was read, as follows:

Be it enacted, etc., That for the purpose of protecting park deer along the western boundary of the Yosemite National Park, the Secretary of the Interior be, and he is hereby, authorized to acquire as part of said park, by exchange as hereinafter provided, title in fee for and on behalf of the United States of America to all that land in sections 21 and 28 in township 3 south, range 20 east, Mount Diablo meridian, lying between the abandoned railroad grade running from a point in the Wawona Road near Chinquapin to the top of the abandoned incline hoist in the northeast quarter of the southwest quarter of section 21, and the east and west center line of section 21, and in sections 22, 23, 24, 25, 26, and 27 lying between said abandoned railroad grade and the existing park boundary, containing 1,350 acres, more or less, now held in private ownership, which lands upon acquisition shall be, and are hereby, added to the park; and in exchange therefor the said Secretary be, and he is hereby, authorized to issue patent to the owner of said lands for the Government lands described as follows: That part of the north half of northeast quarter lying south of abandoned railroad grade hereinbefore mentioned, north half of southwest quarter of northeast quarter, southwest quarter of southwest quarter of northeast quarter, southwest quarter, west half of northeast quarter of southeast quarter, and southwest quarter of southeast quarter of section 25, township 3 south, range 20 east; north half of section 36, township 3 south, range 20 east, southwest quarter northeast quarter, south half northeast quarter northwest quarter, west half northwest quarter, southeast quarter northwest quarter, northwest quarter southeast quarter, and west half southwest quarter southeast quarter section 32, township 3 south, range 21 east; and northwest quarter section 5, township 4 south, range 21 east; containing 1,010 acres, more or less, which lands upon issuance of patent shall be, and are hereby, eliminated from said park.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 1314) to authorize the Secretary of War to secure for the United States title to certain private lands contiguous to and within the Militia Target Range Reservation, State of Utah, was announced as next in order.

Mr. PHIPPS. Mr. President, I notice in the language of section 3, page 2, that "for the purpose of acquiring title to the lands and improvements thereon, the sum of $54,160 is hereby appropriated." I suggest an amendment to make it read "authorized to be appropriated."

Mr. ROBINSON of Arkansas. Over.

The PRESIDING OFFICER. On objection the bill will be passed over.

TOWN OF SPRINGDALE, UTAH

The bill (H. R. 12706) for the relief of the town of Springdale, Utah, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized and directed, under such reasonable regulations as he may prescribe, to grant permission to the town of Springdale, Utah, to divert through such piping facilities as may be necessary, for domestic and other uses within the limits of said town of Springdale, Utah, water from certain springs in the Zion National Park, Utah, situated at the head of what is known as Oak Creek, which crosses the main highway about one-half mile below the park boundary, and located in approximately section 20, township 41 south, range 10 west, Salt Lake meridian.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

COMMODORE J. M. MOORE

The bill (S. 3632) for the relief of Commodore J. M. Moore, United States Coast Guard, retired, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Spanish War service of Second Lieut. James M. Moore, United States Revenue Cutter Service (now commodore, retired, U. S. Coast Guard), attached to the U. S. revenue cutter *Woodbury*, operating as a part of the Navy during the war with Spain, be considered for all purposes as continuing during the period the *Woodbury* operated as a part of the Navy in 1898.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LUCY B. KNOX

The bill (H. R. 1406) granting six months' pay to Lucy B. Knox, was announced as next in order.

Mr. HOWELL. Over.

Mr. BRUCE. Mr. President, I do not see why anyone should want to object to the bill. Was objection made?

The PRESIDING OFFICER. The Chair will inform the Senator from Maryland that the junior Senator from Nebraska [Mr. HOWELL] objected to the bill.

Mr. BRUCE. I wish the Senator would withdraw his objection?

The PRESIDING OFFICER. Does the Senator from Nebraska withdraw his objection?

Mr. HOWELL. Mr. President, it was my understanding that certain information would be furnished respecting the bill. I have not been informed as to what its nature is.

Mr. BRUCE. This is simply a bill giving this lady six months' pay to which her husband would have been entitled if he had lived six months longer. The husband died on the 6th of February, 1920. The report states:

The purpose of this bill is to authorize payment to Lucy B Knox of six months' pay at the rate received by her husband, the late Lieut. Commander Forney Moore Knox, United States Navy, at the time of his death. The records show that this officer died at Annapolis, Md., on February 16, 1920, as the result of pneumonia.

The act approved May 13, 1908, which was repealed by the act of October 6, 1917, provided for the payment to the beneficiary of an officer or enlisted man of the Navy or Marine Corps, who died as the result of wounds or disease contracted in the line of duty, of an amount equal to six months' pay at the rate received by her late husband at the time of his death. This provision of law was reenacted under the act of June 4, 1920 (41 Stat. 824–825; U. S. C., title 34, sec. 943), but at the time of Lieutenant Commander Knox's death there was no law in effect that authorized the payment of the gratuity in question to his widow.

Had Lieutenant Commander Knox's death occurred on or after June 4, 1920, his widow would have been entitled to six months' pay at the rate received by her late husband at the time of his death. However, the date of this officer's death precludes payment of the gratuity to his widow under the law, and it seems pertinent here to remark that there are many other deserving claims of a similar nature.

A number of such bills have been passed. The committee has given full consideration to it. The husband died before the law went into effect, and under the circumstances the committees of the House and Senate felt that she should receive the six months' pay.

Mr. HOWELL. I will ask the Senator from Maryland how many dependents there were in the family.

Mr. BRUCE. The lady had three young children.

Mr. HOWELL. I withdraw my objection.

There being no objection; the Senate, as in Committee of the Whole, proceeded to consider the bill, and it was read, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sum as may be necessary to pay to Lucy B. Knox, widow of the late Lieut. Commander Forney Moore Knox, United States Navy, an amount

equal to six months' pay at the rate said Forney Moore Knox was receiving at the date of his death.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JOSEPH S. CARROLL

The bill (H. R. 2477) for the relief of Joseph S. Carroll was announced as next in order.

Mr. KING. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

VINCENTIA V. IRWIN

The bill (H. R. 2494) granting six months' pay to Vincentia V. Irwin was considered as in Committee of the Whole, and was read as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sum as may be necessary to pay to Vincentia V. Irwin, widow of the late Ensign Glendon Ward Irwin, United States Navy, an amount equal to six months' pay at the rate said Glendon Ward Irwin was receiving at the date of his death.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PENSIONS AND INCREASE OF PENSIONS

The bill (H. R. 13563) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Pensions with amendments.

The first amendment of the Committee on Pensions was, on page 2, after line 19, to strike out:

The name of Harriet C. Lounsbery, chief nurse, war with Spain, and pay her a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 2, after line 22, to strike out:

The name of Charles E. Grayson, late of Company F, Second Regiment Texas Volunteer Cavalry, Indian wars, and pay him a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 3, line 7, after the words "rate of," to strike out "$20" and insert "$30," so as to read:

The name of Anna H. Valer, late Army nurse, Medical Department, Regular Establishment, and pay her a pension at the rate of $30 per month.

The amendment was agreed to.

The next amendment was, on page 7, after line 14, to strike out:

The name of Charles V. Harris, late of the Hospital Corps, United States Army, war with Spain, and pay him a pension at the rate of $72 per month in lieu of that he is now receiving, so long as he is not an inmate of a national soldiers' home or hospital.

The amendment was agreed to.

The next amendment was, on page 8, line 5, after the words "rate of," to strike out "$24" and insert "$20," so as to read:

The name of Frederick Reinsch, late of the United States Navy, war with Spain, and pay him a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 8, after line 17, to strike out:

The name of Mabel Jane Maher Boosey, late contract nurse, Medical Department, United States Army, war with Spain, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 9, after line 14, to strike out:

The name of Adam Roth, late of Company D, Seventh Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 10, line 13, before the words "per month," to strike out "$6" and insert "$4," so as to read:

The name of Ada P. Barnhart, widow of Herbert W. Barnhart, late of Company D, Fifteenth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving, and $4 per month additional on account of each minor child of the soldier until they reach the age of 16 years.

The amendment was agreed to.

The next amendment was, on page 11, line 6, before the words "per month," to strike out "$100" and insert "$75," so as to read:

The name of Ada M. Young, widow of Col. Charles Young, late of the Ninth Regiment United States Cavalry, Regular Establishment, and pay her a pension at the rate of $75 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 11, after line 6, to strike out:

The name of Alban D. Philson, late of the United States Navy, war with Spain, and pay him a pension at the rate of $30 per month.

The amendment was agreed to.

The next amendment was, on page 12, after line 19, to strike out:

The name of Lowell A. Chamberlin, late of Company B, First Regiment United States Volunteer Cavalry, war with Spain, and pay him a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 14, line 19, after the words "rate of" to strike out "$30" and insert "$20"; so as to read:

The name of Thomas A. Heard, late of Company H, Third Regiment United States Volunteer Engineers, war with Spain, and pay him a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 18, after line 20, to insert:

The name of Margaret F. Gallaher, widow of John H. Gallaher, late of Battery M, Third Regiment United States Artillery, and pay her a pension at the rate of $30 per month.

The name of Edward T. Conway, late of Company C, First Battalion United States Engineers, and Company E, Twelfth Regiment United States Infantry, and pay him a pension at the rate of $12 per month.

The name of Thomas A. McIntire, alias Thomas Ingalls, late of Company A, Sixteenth Regiment, and Company G, Second Regiment, United States Volunteer Infantry, and pay him a pension at the rate of $8 per month.

The name of August Rieke, late of Captain Timothy Sheehan's company, Fifth Regiment Minnesota Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Leon P. Chesley, late of One hundred and twenty-first Company, United States Coast Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Mary E. Evans, dependent mother of Charles E. Evans, late of Company I, Eighth Regiment California Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of Elizabeth B. Pettus, widow of Maj. Harry L. Pettus, late acting quartermaster, United States Volunteers, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Thomas F. Strafford, late of Company F, Eighth Regiment Massachusetts Volunteer Infantry, and Company K, Forty-second Regiment United States Volunteer Infantry, and pay him a pension at the rate of $12 per month.

The name of Ada G. Wilkinson, widow of Walter P. Wilkinson, late of Company F, Third Regiment New Mexico Volunteer Militia, and pay her a pension at the rate of $20 per month.

The name of Essie Horton, widow of Patrick S. Horton, late second lieutenant, Troop C, Tennessee National Guard Cavalry, and pay her a pension at the rate of $12 per month.

The name of Annie J. Davis, dependent mother of Guy F. Davis, late of Company H, First Regiment Maine Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of Juanita B. Petty, widow of Fred C. Petty, alias William W. Petty, late of Company D, Twenty-fifth Regiment United States Infantry, and Company D, Ninth Regiment United States Cavalry, and pay her a pension at the rate of $12 per month.

The name of Theodore G. Thomas, alias Theodore Smith, late of Battery A, Second Regiment United States Artillery, and pay him a pension at the rate of $50 per month for services in a campaign against hostile Indians in California in 1871, provided that he is not an inmate of a soldiers' home.

The name of Lizzie Kersten, widow of John A. F. Kersten, late of Battery F, Fourth United States Artillery, and pay her a pension at the rate of $12 per month.

The name of Don I. Littell, late of Company L, Twenty-second Regiment United States Volunteer Infantry, and pay him a pension at the rate of $17 per month.

The name of Catherine Ryan, dependent mother of William J. Ryan, late of Company K, Eleventh Regiment United States Cavalry, and pay her a pension at the rate of $20 per month.

The name of James Stuart, late of Capt. Jefferson Niles's company, Montana Volunteer Infantry, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

JOSEPH S. CARROLL

Mr. BRUCE. Mr. President, I ask unanimous consent to recur to Calendar 1226, the bill (H. R. 2477) for the relief of Joseph S. Carroll.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, and it was read as follows:

Be it enacted, etc., That in consideration of his long and faithful service in various positions at the United States Naval Academy, where he is now employed as utility man for the midshipmen's mess, and of his enlisted service in the regular Navy on various midshipmen's cruises, extending, in all, over a continuous period of 50 years, the Secretary of the Navy is hereby authorized to enlist Joseph S. Carroll as a chief commissary steward in the United States Navy and to immediately thereafter transfer him to the retired list of the Navy with the retired pay of that rating: *Provided*, That the said Joseph S. Carroll shall not be entitled to any back pay or allowances prior to the date upon which he may be transferred to the retired list, as herein authorized: *Provided further*, That the enlistment of the said Joseph S. Carroll, as herein authorized, may be effected without regard to age or physical qualifications.

Mr. BRUCE. Mr. President, this is a peculiarly meritorious case. It is that of an old colored man who was in service at the Naval Academy for a great many years, as the reading of the bill indicates. The report shows the following facts regarding his service:

Waiter, midshipmen's mess, June 5, 1875, to 1890. Paid by midshipmen.

Building attendant, 1890 to 1903. (Paid by Government; with additional duties in midshipmen's mess and as steward on each practice cruise.)

Assistant head waiter, midshipmen's mess, 1903 to 1906. (Paid by midshipmen.)

Assistant head waiter, midshipmen's mess, 1906 to 1918. (Paid by Government.)

Utility man, midshipmen's mess, 1918 to date. (Paid by Government.)

2. Carroll's service at the Naval Academy and on midshipmen's practice cruises has been continuous from June 5, 1875, to date.

3. In view of the long service rendered by Carroll as assistant head waiter and the faithful service performed by him in other positions at the Naval Academy, it is recommended that if possible a special ruling be obtained by which he can be placed on the retired list.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

HARRY M. KING

Mr. STEPHENS. Mr. President, I was detained from the Senate for a few moments and during that time Calendar No. 1161, the bill (S. 4376) for the relief of Harry M. King, was passed over on objection. I ask unanimous consent to recur to the bill and that it may be considered at this time.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill and it was read, as follows:

Be it enacted, etc., That the United States Employees' Compensation Commission be, and it is hereby, directed to hear and determine the claim of Harry M. King, who claims to have suffered physical injuries received by him in line of duty while working for the Government at Muscle Shoals, Ala., during the year 1918.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BRIDGE BILLS

The bill (S. 4438) authorizing the State of Indiana to construct, maintain, and operate a toll bridge across the Ohio River at or near Evansville, Ind., was announced as next in order.

Mr. McKELLAR. Over.

Mr. CURTIS. Mr. President, there are 14 bridge bills, reported without amendment, next on the calendar. I ask that they may be considered and passed en bloc.

Mr. ROBINSON of Arkansas. Mr. President, I think that is a bad practice. I think the numbers ought to be called.

Mr. McKELLAR. I ask that Calendar No. 1229, Senate bill 4438, may go over.

The PRESIDENT pro tempore. The bill will be passed over. The bills referred to by the Senator from Kansas will be stated by their calendar numbers.

The CHIEF CLERK. Calendar Nos. 1230, 1231, 1232, 1233, 1234, 1235, 1236, 1239, 1240, 1241, 1279, 1301, 1302.

The PRESIDENT pro tempore. Is there objection to the consideration en bloc of the bridge bills without amendment?

Mr. BLEASE. Mr. President, what is the idea of passing over the bill of the Senator from Indiana [Mr. WATSON], Calendar No. 1229?

The PRESIDENT pro tempore. Calendar 1229 was objected to by the senior Senator from Tennessee [Mr. McKELLAR]. The other bills mentioned by calendar number are reported without amendment, and after they had been disposed of several bridge bills reported with amendments will be considered.

Mr. BLEASE. I object to the balance of them, then. If the bill of the Senator from Indiana is to be passed over, then I object to the rest of them.

Mr. ROBINSON of Arkansas. Mr. President, I really think it is a bad precedent to attempt to pass bills en bloc. I suggest that the clerk call the bills in their regular order.

The PRESIDENT pro tempore. Inasmuch as objection may be interposed at any time regarding Calendar 1230, Senate bill 4439, does the Senator from Tennessee maintain his objection to Calendar 1229?

Mr. McKELLAR. I do.

The PRESIDENT pro tempore. The bill will be passed over and the next bill on the calendar will be stated.

The bill (S. 4439) to extend the times for commencing and completing the construction of a bridge across the Ohio River at or near Evansville, Ind., was announced as next in order.

Mr. BLEASE. Over. I object to all these bridge bills. The Senator from Indiana [Mr. WATSON] is absent, and if some Senator is going to object to his bill, why should we pass anybody else's bill? Why not let all of them go over?

Mr. McKELLAR. Mr. President, I am perfectly willing to give my reasons for objection to Calendar 1229, Senate bill 4438. Congress has already authorized a bridge at the same place. It has been contracted for to be built, and after it was contracted for to be built and operations begun, application was made to build another bridge right at the same point. Under those circumstances I was asked to take it up with the Senator from Indiana [Mr. WATSON]. He is not here and for that reason I asked that the bill go over. It is a perfectly normal and natural request, and I do not see why anyone should take offense.

Mr. STEPHENS. Mr. President, I should like to say just a word. These bridge bills are referred to the Committee on Commerce, and by that committee are referred to the Senator from Vermont [Mr. DALE], the Senator from Texas [Mr. SHEPPARD], and the Senator from North Dakota [Mr. NYE] as a subcommittee. Those bills are all carefully considered by that subcommittee, and are then reported to the full committee. Not a bridge bill comes before this body that has not been very carefully considered by the Committee on Commerce. We have certain rules in regard to such measures. I realize very well that the average Senator does not have an opportunity, because of his engagements and his active work on other committees and the many topics that come before the Senate, to consider these bills. I, therefore, hope that these bridge bills may be passed, because I can say to the Senate that we have given them very careful consideration. I ask my friend, the senior Senator from Tennessee [Mr. McKELLAR], to withdraw his objection and to let this bill pass.

Mr. McKELLAR. Mr. President, I can not withdraw the objection to this bill until I have had an opportunity to consult with the Senator from Indiana [Mr. WATSON] about it.

Mr. STEPHENS. But the Senator from Indiana favors the bill.

Mr. McKELLAR. He may do so.

Mr. STEPHENS. I repeat, the Committee on Commerce has given each one of these bills very careful consideration.

Mr. McKELLAR. I am sorry, but I will have to object.

Mr. LA FOLLETTE. Regular order, Mr. President.

The PRESIDENT pro tempore. The regular order is demanded. Does the Senator from South Carolina maintain his objection to the consideration of Senate bill No. 4439?

Mr. BLEASE. I withdraw the objection.

OHIO RIVER BRIDGE NEAR EVANSVILLE, IND.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 4439) to extend the times for commencing and completing the construction of a bridge across the Ohio River at or near Evansville, Ind., which was read, as follows:

Be it enacted, etc., That the times for commencing and completing the construction of a bridge across the Ohio River at a point suitable to the interests of navigation between a point in or near the city of Evansville, Ind., and a point opposite in Henderson County, State of Kentucky, to be constructed by the State of Indiana, acting by and through its highway commission, authorized by the act of Congress approved March 2, 1927, are hereby extended one and three years, respectively, from the date of approval hereof, and the act of March 2, 1927, is hereby revived and reenacted for such purpose.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

TEXAS, KENTUCKY, LOUISIANA, WEST VIRGINIA, PENNSYLVANIA, ILLINOIS, AND IOWA BRIDGE BILLS

The following bridge bills were severally considered as in Committee of the Whole, reported to the Senate without amendment, ordered to a third reading, read the third time, and passed:

H. R. 12031. An act to extend the times for commencing and completing the construction of a bridge across the Rio Grande River at or near Tornillo, Tex.;

H. R. 12100. An act to amend the act entitled "An act granting the consent of Congress to the Gateway Bridge Co. for construction of a bridge across the Rio Grande between Brownsville, Tex., and Matamoros, Mexico," approved February 26, 1926;

H. R. 12571. An act granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a toll bridge across the Cumberland River at or near Iuka, Ky.;

H. R. 12623. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Sabine River at or near Starks, La.;

H. R. 12806. An act authorizing J. H. Harvell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across New River at or near McCreery, Raleigh County, W. Va.;

H. R. 12913. An act to extend the times for commencing and completing the construction of a bridge across the Allegheny River at or near the borough of Eldred, McKean County, Pa.;

H. R. 11917. An act granting the consent of Congress to the county of Cook, State of Illinois, to widen, maintain, and operate the existing bridge across the Little Calumet River in Cook County, State of Illinois;

H. R. 11980. An act granting the consent of Congress to the Fisher Lumber Corporation to construct, maintain, and operate a railroad bridge across the Tensas River in Louisiana; and

H. R. 12235. An act authorizing B. F. Peek, G. A. Shallberg, and C. I. Josephson, of Moline, Ill.; J. W. Bettendorf, A. J. Russell, and J. L. Hecht, of Bettendorf and Davenport, Iowa, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Tenth Street in Bettendorf, State of Iowa.

RIO GRANDE RIVER BRIDGE NEAR WESLACO, TEX.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 12877) authorizing the Los Olmos International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande at or near Weslaco, Tex., which had been reported from the Committee on Commerce with an amendment on page 2, section 3, at the end of line 25, to strike out the numerals "1926" and to insert the numerals "1906," so as to make the section read:

SEC. 3. The said Los Olmos International Bridge Co., its succesors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge in accordance with any laws of Texas applicable thereto, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

SALARIES OF POSTMASTERS AND EMPLOYEES OF POSTAL SERVICE

The bill (S. 2294) to amend the first paragraph of section 7 of the act entitled "An act reclassifying the salaries of postmasters and employees of the Postal Service, readjusting their salaries and compensation on an equitable basis, increasing postal rates to provide for such readjustment, and for other purposes," approved February 28, 1925, was announced as next in order.

Mr. KING. Let that bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

MARY M. TILGHMAN

The Senate, as in Committee of the Whole, proceeded to consider the joint resolution (H. J. Res. 47) for the relief of Mary M. Tilghman, former widow of Sergt. Frederick Coleman, deceased, United States Marine Corps, which was read as follows:

Resolved, etc., That the service rendered by Sergt. Frederick Coleman, deceased, United States Marine Corps, from September 5, 1870, to the date of his death, April 29, 1900, shall be considered under the law providing for longevity pay as continuous service in the United States Marine Corps, and that the Secretary of the Navy be, and he is hereby, authorized and directed to construe the records of the said Sergt. Frederick Coleman in the United States Marine Corps as conforming with this authorization, to the end that Mary M. Tilghman, former widow of the said Frederick Coleman, deceased, shall be entitled to receive the pay, benefits, and emoluments conferred by law or regulations for continuous service in the United States Marine Corps of her late husband.

Mr. KING. Mr. President, will the Senator from Maine [Mr. HALE] tell us the purpose of the joint resolution?

Mr. HALE. Mr. President, the bill seeks to give continuity of service to the late Sergt. Frederick Coleman, United States Marine Corps, thereby granting to his former widow, Mary M. Tilghman, the money emolument conferred by law for continuous service in the Marine Corps, which will amount to $577.20, assuming that longevity pay in accordance with the laws in force during the time of Mr. Coleman's service in the Marine Corps is considered due and is to be paid.

Sergeant Coleman served 30 years in the Marine Corps, under six enlistments, and died in the service while serving under his sixth enlistment. Between his third and fourth enlistments a period of 19 days in excess of the 30-day limit allowed for reenlistment and for continuous-service purposes elapsed, so that his entire 30 years' service can not be regarded, under the law, as continuous service, which carries certain benefits of longevity pay, and the bill seeks to grant such longevity pay benefits by holding his 30 years' service to have been continuous.

Under the present law he would have been all right, as the present law extends the period for reenlistment in order to compute continuous service from one month to three months. So the committee thought that under the circumstances it was fair to consider his service as continuous.

Mr. KING. Mr. President, in my opinion retroactive legislation of this kind is not desirable.

Mr. HALE. But this man had very long service in the Marine Corps, and I hope the Senator will not object.

Mr. KING. I am not going to object; but I am apprehensive that many others may seek to secure the enactment of special bills which will be retroactively effective.

Mr. HALE. This is a peculiar case.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESCORT AT FUNERALS OF DECEASED OFFICERS, ETC.

The bill (H. R. 12694) authorizing the Secretary of the Navy to provide an escort for the bodies of deceased officers, enlisted men, and nurses was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Navy, in his discretion, is hereby authorized to furnish an escort not to exceed one person to the place of burial for the bodies of officers, enlisted men, or nurses who have lost their lives in the naval service. Such expenses as are incurred for this purpose shall be paid from the proper appropriation: *Provided*, That section 1587 of the Revised Statutes of the United States is hereby repealed.

Mr. REED of Pennsylvania. Mr. President, I should have objected to this bill except for that fact that the War Department already has the right to do what this bill gives to the Navy Department the right to do. I think it is only proper that this bill should be passed.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 5527) to prevent fraud, deception, or improper practice in connection with business before the United States Patent Office, and for other purposes, was announced as next in order.

Mr. KING. Let that bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

RALPH OLE WRIGHT AND VARINA BELLE WRIGHT

The bill (H. R. 5910) for the relief of Ralph Ole Wright and Varina Belle Wright, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Ralph Ole Wright and Varina Belle Wright, the parents of Ralph Atkinson Wright, deceased, who, while serving as a seaman, second class, at the United States Naval Training Station, at Great Lakes, Ill., while in the performance of his duty at the radio station at Great Lakes, Ill., without any fault of his own, on June 15, 1922, met his death from electric shock by coming in contact with the high-tension switches on the switchboard in basement of building No. 63, at the United States Naval Training Station, Great Lakes, Ill., in use as a transmitting and receiving radio station, the sum of $2,500, said sum to be in lieu of pension.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CONSERVATION OF RAINFALL

The bill (S. 3484) for the conservation of rainfall in the United States was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That in order to develop effective methods for the control of rainfall, for the prevention of erosion of farm, pasture, and wood lands, and for the conservation of the soil fertility of fields, pastures, and watersheds; to minimize the deposition of silt in reservoirs and the overwash of inert sands and gravels upon farm lands; to reduce the discharge of water and silt into streams from fields, pastures, and watersheds; and, in general, to aid in developing the best means of controlling, conserving, and utilizing the rain water that falls upon the land, the Secretary of Agriculture be, and he is hereby, authorized and directed to make such studies and investigations as he may deem necessary to carry out these purposes.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SOLDIERS DISCHARGED BECAUSE OF AGE MISREPRESENTATION

The bill (S. 3736) for the relief of soldiers who were discharged from the Army during the World War because of misrepresentation of age was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, or benefits upon honorably discharged soldiers of the United States Army, their widows and dependent children, a soldier who served as an enlisted man between April 6, 1917, and November 11, 1918, both dates inclusive, and who was discharged for fraudulent enlistment on account of misrepresentation of his age, shall hereafter be held and considered to have been discharged honorably from the military service on the date of his actual separation therefrom if his service otherwise was such as would have entitled him to an honorable discharge: *Provided*, That no back pay or allowances shall accrue by reason of the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SALE OF LAND AT FORT BROWN MILITARY RESERVATION, TEX.

The bill (S. 4315) authorizing and directing the Secretary of War to sell 3,304.8 square feet of the Fort Brown Military Reservation, Brownsville, Tex., to the Gateway Bridge Co., was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to sell, or cause to be sold, to the Gateway Bridge Co., a corporation organized under the laws of Delaware, at the appraised value as determined by the Secretary of War, approximately 3,304.8 square feet of ground of the Fort Brown Military Reservation, Brownsville, Tex., particularly described as follows, to wit: Beginning at an unmarked point in the north line of the Fort Brown Military Reservation, said point bearing south 66° 12′ west 22.2 feet from a 10 inch by 10 inch concrete Government monument set at intersection of north line of Levee Street with north reservation line; thence north 66° 12′ east 149.94 feet along the said north reservation line to its point of intersection with the south line of a 20-foot alley between Levee and Elizabeth Streets; thence south 43° 51′ east 21.3 feet along the south line of said alley produced to its point of intersection with a line 10 feet distant from and parallel to the quartermaster's brick wall; thence south 66° 12′ west 180.54 feet along said line 10 feet from and parallel to the quartermaster's brick wall to its point of intersection with the northeast line of the present triangular leased parcel of the Gateway Bridge Co. from the Fort Brown Reservation; thence north 25° 34′ east along said lease line 30.7 feet to the place of beginning; containing in all, 3,304.8 square feet of ground, subject to such conditions, restrictions, and reservations as the Secretary of War may impose for the protection of the reservation and to prevent the erection and maintenance of an unsightly structure or structures upon the said area.

SEC. 2. The net proceeds derived from the sale of such land shall be covered into the Treasury to the credit of the military post construction fund.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DANIEL MANGAN

The bill (H. R. 1931) for the relief of Daniel Mangan was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Daniel Mangan, late of Troop L, First Regiment United States Volunteer Cavalry, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a member of said organization on the 5th day of July, 1863: *Provided*, That no back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PAY AND ALLOWANCES OF COMMISSIONED AND ENLISTED PERSONNEL

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 12624) to amend section 17 of the act of June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended, which was read, as follows:

Be it enacted, etc., That section 17 of the act approved June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended, is hereby further amended by inserting after the words "provided in this act," and before the next proviso, line 3 of said section, the following: "which pay shall include increases for all active duty performed since retirement in the computation of their longevity pay and pay periods."

And after the phrase, "receive full pay and allowances," at the end of the last line of said section, by changing the period to a comma, and inserting thereafter the following: "and when on active-duty status, shall have the same pay and allowance rights while on leave of absence or sick as officers on the active list, and if death occurs when on active-duty status, while on leave of absence or sick, their dependents shall not thereby be deprived of the benefits provided in act approved December 17, 1919, as amended, and in the act of June 4, 1920: *Provided*, That no back pay or allowances shall accrue by reason of the passage of this act."

Mr. KING. Mr. President, I should like an explanation of the bill from the chairman of the Committee on Military Affairs.

Mr. REED of Pennsylvania. Mr. President, the circumstance that leads to the necessity for this bill is that in calculating the pay periods of officers on active service the total number of years of service is included, but when a retired officer is ordered back to active service, under a peculiar wrinkle of the law, those years that he serves when he is recalled are not included in counting the pay period under which he receives compensation. Nobody ever thought that that would be the result of the wording of the law. It amounts to very little in money, but it is of considerable importance to the few officers who are affected.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 802) to correct the military record of Curtis P. Wise was announced as next in order.

Mr. KING. Let that bill go over.

The PRESIDING OFFICER. The bill will go over.

JOHN F. WALKER

The bill (S. 2462) for the relief of John F. Walker was announced as next in order.

Mr. KING. I ask that that bill go over.

Mr. SHORTRIDGE. Mr. President, that bill was very carefully considered by the committee. The suggested amendment might cause some Senator to object, but the amendment really does not affect the bill in substance. This man was a brave soldier. He erred, but he sought to reenlist. The department favors the passage of the bill, and I think it just. If the Senator who objected had the time to look at the letter addressed to the committee, I venture to think he would agree with the department and with the committee that this bill should be passed. This may be the last opportunity to consider this bill, and I hope the Senator will withdraw his objection.

The PRESIDENT pro tempore. Does the Senator from Utah maintain his objection?

Mr. KING. I do.

The PRESIDENT pro tempore. The bill will be passed over.

Mr. REED of Pennsylvania subsequently said: Mr. President, I ask unanimous consent to return for a moment to Order of Business No. 1253, being Senate bill 2462. I doubt whether all the facts have been understood.

The PRESIDENT pro tempore. Is there objection?

The Chair hears none and lays the bill before the Senate.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2462) for the relief of John F. Walker, which had been reported from the Committee on Military Affairs with an amendment, at the top of page 2, to strike out section 2, as follows:

SEC. 2. The Secretary of War is authorized and directed to issue to John F. Walker a discharge certificate showing that he is held and considered to have been honorably discharged as of such date.

So as to make the bill read:

Be it enacted, etc., That in the administration of the pension laws or any laws conferring rights, privileges, or benefits upon persons honorably discharged from the United States Army, their widows, children, and dependent relatives, John F. Walker shall be held and considered to have been honorably discharged as a private, first class, Hospital Corps, United States Army, on December 26, 1903; but no pension, pay, nor bounty shall be held to have accrued prior to the passage of this act.

The amendment was agreed to.

Mr. REED of Pennsylvania. Mr. President, the soldier who is the proposed beneficiary of this bill is now receiving a pension under special act of Congress. The only effect of this bill will be to remove from his record the charge of desertion that stands against him. He performed actual service for five years, including the whole period of the Spanish-American War and the Boxer rebellion in China. The passage of the bill will in no way increase his money allowance, but will merely remove from his record the stain that he feels of being charged with being a deserter.

Mr. KING. Was he a deserter?

Mr. REED of Pennsylvania. He was a deserter on his second enlistment, yes; although he obtained what is called a deserter's release which exonerated him from arrest or trial or imprisonment.

Mr. KING. I should like to ask the Senator if there was any valid excuse for his desertion?

Mr. REED of Pennsylvania. I know of none, but it is merely——

Mr. KING. Is this a bill to encourage desertion from the Army after a man has taken the oath to render loyal service to his country?

Mr. REED of Pennsylvania. It happened 27 years ago. He did render faithful service through a war, and the committee felt that his desertion in peace time, particularly in view of the fact that this bill can give him no money benefit, ought not to be held against him. None of us can afford to cast a stone at another for such a peccadillo.

Mr. FESS. Mr. President, I am curious to know how this soldier can be on the pension list if he was a deserter.

Mr. REED of Pennsylvania. He was placed on the pension roll by a special act of Congress which was passed in spite of his desertion.

Mr. FESS. Then, the desertion charge ought to be removed.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of John F. Walker."

KENNEDY F. FOSTER

The bill (H. R. 4654) for the relief of Kennedy F. Foster, was announced as next in order. The bill had been reported from the Committee on Military Affairs adversely.

The PRESIDENT pro tempore. Without objection, the bill will be indefinitely postponed.

ESTABLISHMENT OF ADDITIONAL LAND OFFICES

Mr. STEIWER. Mr. President, I ask unanimous consent to reconsider the votes by which Order of Business 655, being the bill (S. 1794) establishing additional land offices in the States of Montana, Oregon, Idaho, and South Dakota, was ordered to a third reading, read the third time, and passed, may be reconsidered. I make that motion in order that I may offer two amendments to the bill. I will say that the amendments are acceptable, I believe, to the author of the bill.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the votes by which Senate bill 1794 was ordered to a third reading, read the third time, and passed are reconsidered. The bill is before the Senate, as in Committee of the Whole, and open to amendment.

Mr. STEIWER. I offer the amendment, which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 2, line 19, after the name "Umatilla," it is proposed to add the names "Malheur, Harney."

Mr. ROBINSON of Arkansas. Mr. President, I do not think this is a proper proceeding. We amended this bill once and passed it. I shall object to any further consideration of the bill.

Mr. STEIWER. May I ask the Senator to withhold his objection for just a minute?

Mr. WALSH of Montana. Mr. President, a parliamentary inquiry. What is the status of the bill now?

The PRESIDENT pro tempore. By unanimous consent the Senate returned to the consideration of the bill. Objection having been interposed by the Senator from Arkansas, the bill will be passed over.

Mr. WALSH of Montana. I do not think it was the purpose of the Senator from Oregon to have the bill passed over.

Mr. STEIWER. Mr. President, the bill as prepared by its author provides for a land-office district in the State of Oregon. It is not proposed by this amendment to add any additional land-office districts; it is proposed merely to add two counties to the district already created by the bill.

Mr. ROBINSON of Arkansas. I have no objection to that amendment and no objection to the consideration of the bill for the purpose of considering the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Oregon.

The amendment was agreed to.

Mr. STEIWER. I offer another amendment.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 2, line 21, after the word "located," it is proposed to strike out the remainder of the section and to insert in lieu thereof "by the Secretary of the Interior at some point within said land district promptly upon the approval of this act."

The amendment was agreed to.

The bill was ordered to a third reading, read the third time, and passed.

CLARENCE G. STONESTREET

The bill (H. R. 9002) for the relief of Clarence G. Stonestreet was announced as next in order. The bill had been reported from the Committee on Military Affairs adversely.

The PRESIDENT pro tempore. Without objection, the bill will be indefinitely postponed.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS

The bill (H. R. 12953) to authorize the Board of Managers of the National Home for Disabled Volunteer Soldiers to accept title to the State camp for veterans at Bath, N. Y., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CAMP SHERMAN, OHIO

The bill (H. R. 10649) providing for the transfer of a portion of the military reservation known as Camp Sherman, Ohio, to the Department of Justice, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JOHN HERVEY

The bill (H. R. 7268) for the relief of John Hervey was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WILLIAM MORIN

The bill (H. R. 2272) for the relief of William Morin was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ROBERT W. MILLER

The bill (S. 2519) for the relief of Robert W. Miller was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized to summon Robert W. Miller, late first lieutenant of Cavalry of the Regular Army of the United States, before a retiring board for the purpose of a hearing of his case and to inquire into and determine all the facts touching on the nature of his disabilities and his separation from the service, and to find and report the disabilities which in its judgment have produced his disability, if any, and whether such disability, if it exists, is an incident of service; that upon the findings of such a board the President is further authorized, in his discretion, to nominate and appoint, by and with the advice and consent of the Senate, the said Robert W. Miller a first lieutenant of Cavalry and either place him immediately thereafter upon the retired list of the Army, with the same privileges and retired pay as are now or may hereafter be provided by law or regulation for the officers of the Regular Army, or to retain him on the active list of the Army in his original place immediately following Bryan L. Davis, Field Artillery, on the promotion list: *Provided*, That the said Robert W. Miller shall not be entitled to any back pay or allowances by the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 3866) authorizing the appointment of H. P. Milligan as a major of Infantry in the Regular Army was announced as next in order.

Mr. REED of Pennsylvania. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

THOMAS PURDELL

The bill (H. R. 4954) for the relief of Thomas Purdell was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EMILE GENIREUX

The bill (H. R. 2472) for the relief of Emile Genireux was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 4107) for the relief of James Aloysius Manley was announced as next in order.

The PRESIDENT pro tempore. This bill will go over.

FRATERNAL BENEFICIAL ASSOCIATIONS IN THE DISTRICT

The bill (H. R. 10869) amending section 764 of Subchapter XII, fraternal beneficial associations, of the Code of Law for the District of Columbia, was considered as in Committee of the Whole.

The bill had been reported from the Committee on the District of Columbia with an amendment, on page 2, line 14, after the word "America," to insert "nor the supreme council of the Knights of Columbus or any subordinate council thereof," so as to make the bill read:

Be it enacted, etc., That section 764 of Subchapter XII, fraternal beneficial associations, of the Code of Law for the District of Columbia, be amended to read:

"SEC. 764. This law not to apply to associations for profit: Nothing in this subchapter shall be construed to apply to any corporation, society, order, or association carrying on the business of life, health, casualty, or accident insurance for profit or gain, and it shall only apply to fraternal beneficial associations as defined by section 749, and nothing in this subchapter contained shall be construed to affect any grand or subordinate lodge or branch of any such fraternal beneficial societies, orders, or associations which limits its certificate holders to a particular religious denomination or to the employees of a particular town or city, designated firm, business house, or corporation, or department or branch of the United States Government, nor the grand or subordinate lodges of the Independent Order of Odd Fellows, nor any grand or subordinate lodge, or other body of Free and Accepted Masons, nor the grand or any subordinate lodge of the Knights of Pythias, nor the national council or any subordinate council of the Junior Order United American Mechanics, nor the national council or any subordinate council of the Daughters of America, nor the supreme council of the Knights of Columbus or any subordinate council thereof, or similar orders, associations, or societies that do not have as their principal object the issuance of benefit certificates of membership in case of death or the payment of sick, funeral, or death benefits exceeding in amount $100."

Mr. ROBINSON of Arkansas. I think this bill should be explained, Mr. President, I ask the Senator from Wisconsin to explain the amendment that is proposed.

Mr. BLAINE. Mr. President, this is a House bill which gives certain privileges to fraternal benefit associations, exempting them from the general insurance law, and exempting orders such as the Independent Order of Odd Fellows, the Free and Accepted Masons, and the Knights of Pythias; and then the House added to those exemptions the national council or any subordinate council of the Junior Order United American Mechanics, and the national council or any subordinate council of the Daughters of America; and we added the Knights of Columbus.

Mr. ROBINSON of Arkansas. Is the report unanimous?

Mr. BLAINE. Yes.

Mr. ROBINSON of Arkansas. I have no objection to the present consideration of the bill.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

OWNERS OF SCHOONER "WILLIAM MELBOURNE"

The bill (H. R. 3971) for the relief of the owners of the schooner *William Melbourne* was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FRANK E. SHULTS

The bill (H. R. 9380) for the relief of Frank E. Shults was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WIDOW OF SURG. MERVIN W. GLOVER, UNITED STATES PUBLIC HEALTH SERVICE, DECEASED

The bill (H. R. 12063) for the relief of the widow of Surg. Mervin W. Glover, United States Public Health Service, deceased, was considered as in Committee of the Whole, and was read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized to pay, out of any money in the Treasury not otherwise appropriated, to the widow of Mervin W. Glover, deceased, the sum of $4,725, being the amount of salary for one year.

Mr. KING. Mr. President, I should like to ask whether, under the law, it is the custom to make provision of this kind?

Mr. COPELAND. That has been done in a number of instances in connection with officers of the United States Public Health Service who were injured in the service.

This man was engaged in the pursuit of his duty when he was struck on the head by a cargo boat hook, and died as the result of the injury. He left a wife and two small children. He was for a long time in the service of the Public Health Service. As I say, in deaths among officers of the Public Health Service, which were directly due to injuries received in line of duty, the Congress has passed claims bills allowing from one to two years' pay and allowances to the widows and orphans of the officers.

Mr. KING. If a captain or a major were to die or be killed, would his family receive compensation?

Mr. COPELAND. I do not understand the Senator's question.

Mr. KING. The officers of the Public Health Service are somewhat analogous to those in the Army. They have their titles. I am inquiring whether in the military and naval service the same privilege is accorded to the family of the deceased?

Mr. COPELAND. The Senator from Pennsylvania [Mr. REED] can answer that question.

Mr. KING. I do not think that is the rule at all. If we allow this compensation, it seems to me that every employee of the Government would expect to receive it.

Mr. COPELAND. They come under the pension law, I may say to the Senator from Utah.

Mr. REED of Pennsylvania. Mr. President, I am not familiar with this bill. It seems to award a year's salary as compensation for an accidental death.

Mr. COPELAND. The question asked by the Senator from Utah was whether or not, if a military officer were killed under such circumstances, his family would be taken care of. Of course they would, under the pension law. That is, there would be a pension provided.

Mr. REED of Pennsylvania. No, Mr. President; there is no system of compensation for the families of officers of the Army who are killed in the performance of their duty. Whatever they may receive is payable to them under the pension law, as a matter of grace from Congress.

Mr. COPELAND. Under the pension law, yes; but here is a service where there is no pension law.

Mr. KING. Mr. President, let me ask the Senator a question. Take the employees in the Treasury Department, or in any of the executive departments of the Government. We have now nearly 700,000 employees.

Mr. COPELAND. They would be taken care of under the compensation laws.

Mr. KING. Would they?

Mr. COPELAND. They would.

Mr. REED of Pennsylvania. There is no compensation law for officers of the Army.

Mr. COPELAND. No; but the Senator is now speaking about another type of employee in one of the departments here. If he were killed, he would be taken care of under the compensation law.

Mr. HOWELL. Mr. President, this accident occurred in 1914 and the man did not die until 1923. The accident resulted in a blow on the head, which in turn resulted in a tumor on the brain.

Mr. KING. It is, of course, a case that is very appealing. The only question in my mind is whether or not we ought to provide for every employee in every department of the Government and for their families when death comes to them.

Mr. REED of Pennsylvania. There is no provision to-day for officers of the Army or Navy who are killed under the same circumstances.

Mr. KING. Would there be provision for those in the Diplomatic and Consular Service, for instance?

Mr. REED of Pennsylvania. Not so far as I know.

Mr. PHIPPS. Mr. President, in that service there is precedent, because we have customarily awarded at least six months' salary to the widow of the deceased, and have always provided the expenses attendant upon the funeral and bringing the body back to the United States for interment.

The PRESIDENT pro tempore. Does the Senator from Utah maintain his objection?

Mr. KING. I have not objected, but it is a dangerous precedent.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JOHN B. MOSS

The bill (S. 2989) for the relief of John B. Moss was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 1, line 6, after the words "sum of," to strike out "$5,000" and insert "$2,500," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to John B. Moss, out of any money in the Treasury not otherwise appropriated, the sum of $2,500 as full compensation for death of his minor son, Neal Moss, on April 1, 1926, caused by the explosion of shell which he found in the ground at Camp Blackjack.

Mr. REED of Pennsylvania. Mr. President, will the Senator explain that bill, please?

Mr. HARRIS. Mr. President, the Government during the war rented this man's farm as a target range. In the contract they agreed to return it to the owner in as good condition as it was before. About two years ago this farmer and his two sons were at work on the farm and a shell that had been left there by the Army exploded and tore this boy to pieces, tore his legs off, so that he was hardly recognizable. The War Department sent a board there to investigate the matter, and they found that the facts were just as I have stated.

I ask that we reject the amendment of the committee and leave the $5,000, just as the bill originally provided.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the committee.

Mr. REED of Pennsylvania. Mr. President, all over the United States in 1917 and 1918 target ranges were established, and projectiles were fired; and a certain proportion of those shells fired by our artillery failed to explode. That is true of every type of gun in every army. The United States was not negligent in this matter. It rented this farm for part of a target range. It fired a large number of shells, and some of them failed to explode. If we are going to pay everybody who monkeyed with those unexploded shells, we shall be starting in upon a long series of payments.

I should not object to the bill if it were not for the large sum of money asked. It seems to me that $2,500 is very liberal under the circumstances.

The PRESIDENT pro tempore. Does the Senator ask that the bill go over?

Mr. REED of Pennsylvania. No.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the committee. [Putting the question.] The Chair is in doubt.

Mr. ROBINSON of Arkansas. The Senate does not understand the effect of the amendment.

The PRESIDENT pro tempore. The amendment will be stated for the information of the Senate.

The CHIEF CLERK. The committee proposes, on line 6, to strike out "$5,000" and insert in lieu thereof "$2,500."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOHN M. BROWN

The bill (H. R. 7708) for the relief of John M. Brown was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BATON ROUGE NATIONAL CEMETERY

The bill (H. R. 8742) to authorize the Secretary of War to convey to the city of Baton Rouge, La., a portion of the Baton Rouge National Cemetery for use as a public street, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

UNITED STATES BUREAU OF FISHERIES

The bill (H. R. 13383) to provide for a five-year construction and maintenance program for the United States Bureau of Fisheries was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with an amendment, on page 2, after line 12, to insert:

(6) The enlargement of the fish-cultural station at Saratoga, Wyo., at a cost not to exceed $35,000.

So as to make the bill read:

Be it enacted, etc., That there are hereby authorized to be appropriated during the fiscal year beginning July 1, 1928, such amounts as may be necessary for—

(1) The establishment of a fish-cultural station in each of the following States, at a cost not to exceed the amount specified: New Mexico, $50,000; Idaho, $60,000.

(2) The establishment of a fish-cultural substation in each of the following States, at a cost not to exceed the amount specified: Wisconsin (in the southern part of the State), $50,000; Montana, $35,000.

(3) The establishment of fisheries laboratories in the State of Washington, at a cost not to exceed $100,000, and a laboratory in the Territory of Alaska, at a cost not to exceed $50,000.

(4) The establishment of experimental and bass and trout stations in the State of Maryland or West Virginia, at a cost not to exceed $60,000.

(5) The purchase and repair of the Rogue River substation in the State of Oregon, at a cost not to exceed $35,000.

(6) The enlargement of the fish-cultural station at Saratoga, Wyo., at a cost not to exceed $35,000.

SEC. 2. There are hereby authorized to be appropriated during the fiscal year beginning July 1, 1929, such amounts as may be necessary for—

(1) The establishment of a fish-cultural station in each of the following States, at a cost not to exceed the amount specified: Alabama, $50,000; Indiana, $50,000; Louisiana, $50,000; Tennessee (in the central part of the State), $50,000; Pennsylvania, $100,000.

(2) The establishment of a fish-cultural substation in each of the following States, at a cost not to exceed the amount specified: New Hampshire (in the White Mountain Forest), $25,000; South Carolina,

or the enlargement of Orangeburg station in said State, $35,000; Texas (in the western part of the State), $35,000; Colorado, $20,000.

(3) The purchase of Mill Creek station in the State of California, at a cost of not to exceed $20,000.

(4) The enlargement of Cape Vincent station in the State of New York, at a cost not to exceed $25,000.

SEC. 3. There are hereby authorized to be appropriated during the fiscal year beginning July 1, 1930, such amounts as may be necessary for—

(1) The establishment of a fish-cultural station in the State of Florida, at a cost not to exceed $100,000.

(2) The establishment of a fish-cultural substation in each of the following States at a cost not to exceed the amount specified: Maine, $35,000; Virginia (in the eastern part of the State), $75,000; North Carolina (in the eastern part of the State), $35,000; Mississippi, $35,000; Minnesota (in the Rainey Lake or Lake of the Woods region), $35,000; New York, $35,000.

(3) The establishment of a marine fish-cultural station in the State of Texas (on the Gulf coast of the eastern part of the State) at a cost of not to exceed $100,000.

SEC. 4. There are hereby authorized to be appropriated during the fiscal year beginning July 1, 1931, such amounts as may be necessary for—

(1) The establishment of a fish-cultural station in the State of New Jersey at a cost not to exceed the amount of $75,000.

(2) The establishment of a fish-cultural substation in each of the following States at a cost not to exceed the amount specified: Illinois, $35,000; Nevada, $35,000.

SEC. 5. There are hereby authorized to be appropriated during the fiscal year beginning July 1, 1932, such amounts as may be necessary for—

(1) The establishment of a fish-cultural station in the State of Ohio at a cost not to exceed $75,000.

(2) The establishment of a fish-cultural substation in each of the following States at a cost not to exceed the amount specified: Kansas, $35,000; North Dakota, $35,000; Arkansas, $35,000.

(3) The purchase and repair of the Little White Salmon station in the State of Washington at a cost not to exceed $25,000.

(4) The establishment of a fish-cultural station in the State of Georgia for the propagation and hatching of shad and such species of fresh-water fish as may be feasible, desirable, and suitable for food purposes, at a cost not to exceed $35,000.

SEC. 6. There is hereby authorized to be appropriated such amounts as may be necessary not to exceed $35,000 for the establishment of an experimental and bass and trout station in the Pisgah National Forest or in the Great Smoky National Park in the State of North Carolina upon the acquisition of said park by the United States.

SEC. 7. (a) The stations, substations, and laboratories authorized by sections 1, 2, 3, 4, 5, and 6 shall be located in the States and parts thereof and in the territory specified, at such suitable points as may be selected by the Secretary of Commerce.

(b) Any appropriation made under authority of sections 1, 2, 3, 4, 5, and 6 may be expended for the purchase of sites, the purchase of equipment, the construction of buildings and ponds, and for such other expenses as may be incidental to the cost of the establishment, purchase, or enlargement, as the case may be, of the station, substation, or laboratory in question.

(c) No part of an appropriation made under authority of sections 1, 2, 3, 4, 5, or 6 shall be expended in the construction, purchase, or enlargement of a station or substation until the State in which such station or substation is to be located shall have by legislative action accorded to the United States Commissioner of Fisheries and his duly authorized agents the right to conduct fish hatching and fish culture and all operations connected therewith in any manner and at any time that may by the commissioner be considered necessary and proper, any laws of the State to the contrary notwithstanding. The operation of any station, substation, or laboratory established, purchased, or enlarged under authority of this act shall be discontinued whenever the State ceases to accord such right; and such operation may be suspended by the Secretary of Commerce whenever in his judgment State laws or regulations affecting fishes cultivated are allowed to remain so inadequate as to impair the efficiency of such station, substation, or laboratory.

SEC. 8. There are hereby authorized to be appropriated, in addition to all other amounts authorized by law to be appropriated, the following amounts during the fiscal years specified:

(1) For the purpose of providing adequate maintenance costs and personnel for the Division of Fish Culture, Bureau of Fisheries: Fiscal year beginning July 1, 1928, $100,000; fiscal year beginning July 1, 1929, $200,000; fiscal year beginning July 1, 1930, $300,000; fiscal year beginning July 1, 1931, $400,000; fiscal year beginning July 1, 1932, $500,000. Of each amount authorized by this paragraph to be appropriated, 70 per cent shall be for miscellaneous expenses, Division of Fish Culture, and 30 per cent for salaries at the seat of government and elsewhere.

(2) To meet the demand for fundamental knowledge regarding our great commercial fisheries and for developing the natural cultivation of oysters, mussels, and other mollusca, and the improvement of pond cultural and other operations of the division of inquiry, Bureau of Fisheries, respecting food fishes: Fiscal year beginning July 1, 1928, $50,000; fiscal year beginning July 1, 1929, $100,000; fiscal year beginning July 1, 1930, $150,000; fiscal year beginning July 1, 1931, $200,000; fiscal year beginning July 1, 1932, $250,000. Of each amount authorized by this paragraph to be appropriated, 60 per cent shall be for miscellaneous expenses, division of inquiry, and 40 per cent for salaries at the seat of government and elsewhere.

(3) To provide for the proper husbandry of our fisheries, improvements in methods of capture, merchandising, and distribution of our fishery harvest, including saving and utilization of waste products, and other operations of the division of fishery industries, Bureau of Fisheries: Fiscal year beginning July 1, 1928, $35,000; fiscal year beginning July 1, 1929, $70,000; fiscal year beginning July 1, 1930, $105,000; fiscal year beginning July 1, 1931, $140,000; fiscal year beginning July 1, 1932, $175,000. Of each amount authorized by this paragraph to be appropriated, 60 per cent shall be for miscellaneous expenses, division of fishery industries, and 40 per cent for salaries at the seat of government and elsewhere.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

OHIO RIVER BRIDGE, RIPLEY, OHIO

The bill (S. 4450) authorizing the Ripley Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ripley, Ohio, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with an amendment, on page 2, line 17, after the word "charge," to strike out "toll" and insert "tolls"; so as to make the bill read:

Be it enacted, etc., That in order to facilitate interstate commerce, improve the postal service, and provide for military and other purposes the Ripley Bridge Co., its successors and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Ohio River, at a point suitable to the interests of navigation, at or near Ripley, Ohio, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the Ripley Bridge Co., its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said Ripley Bridge Co., its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of Ohio, the State of Kentucky, any public agency or political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interests in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall at any time be taken over or acquired by the States or public agencies or political subdivisions thereof, or

by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 6. The Ripley Bridge Co., its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War and with the Highway Departments of the States of Ohio and Kentucky a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States shall, at any time within 3 years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said Ripley Bridge Co., its successors and assigns, shall make available all of its records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to the Ripley Bridge Co., its successors and assigns; and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

WABASH RIVER BRIDGE

The bill (S. 4451) to amend the act entitled "An act granting the consent of Congress to Roy Clippinger, Ulys Pyle, Edgar Leathers, Groves K. Flescher, Carmen Flescher, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Wabash River," approved May 1, 1928, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with amendments, on page 1, line 3, after the word "act" where it occurs the second time, to strike out "granting the consent of Congress to" and insert "authorizing"; and on the same page, line 7, after the words "Wabash River," to insert "at or near McGregors Ferry in White County, Ill."; so as to make the bill read:

Be it enacted, etc., That section 1 of the act entitled "An act authorizing Roy Clippinger, Ulys Pyle, Edgar Leathers, Groves K. Flescher, Carmen Flescher, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Wabash River at or near McGregors Ferry in White County, Ill.," approved May 1, 1928, is amended by striking out the words "at or near McGregors Ferry in White County, Ill., and a point in Posey County, Ind.," and inserting in lieu thereof "at or near New Harmony in Posey County, Ind., and a point in White County, Ill."

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend the act entitled 'An act authorizing Roy Clippinger, Ulys Pyle, Edgar Leathers, Groves K. Flescher, Carmen Flescher, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Wabash River at or near McGregors Ferry in White County, Ill.,' approved May 1, 1928."

SANTA ROSA SOUND BRIDGE

The bill (S. 4456) granting the consent of Congress to the boards of county commissioners of the counties of Escambia and Santa Rosa, in the State of Florida, to construct, maintain, and operate a free bridge across the Santa Rosa Sound in the State of Florida, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with amendments, on page 1, line 6, after the word "Santa," to strike out "Rose" and insert "Rosa"; and in line 9, after the words "in accordance with the," to insert "provisions of the," so as to make the bill read:

Be it enacted, etc., That the consent of Congress is hereby granted to the boards of county commissioners of the counties of Escambia and Santa Rosa, in the State of Florida, to construct, maintain, and operate a free bridge across Santa Rosa Sound, at a point suitable to the interests of navigation, at or near Deer Point in Santa Rosa County or at or near Sharp Point on Santa Rosa Island, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting the consent of Congress to the boards of county commissioners of the counties of Escambia and Santa Rosa, in the State of Florida, to construct, maintain, and operate a free bridge across Santa Rosa Sound in the State of Florida."

PERDIDO BAY BRIDGE, FLORIDA

The bill (S. 4457) authorizing the Northwest Florida Corporation, its successors and assigns, to construct, maintain, and operate a bridge across Perdido Bay at or near Innerarity Point in Escambia County, Fla., to the mainland of Baldwin County, Ala., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with an amendment, on page 2, line 1, after the word "near," to strike out "Innerarity," and insert "Inerarity," so as to make the bill read:

Be it enacted, etc., That in order to facilitate interstate commerce, improve the postal service, and provide for military and other purposes the Northwest Florida Corporation, its successors and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Perdido Bay, at a point suitable to the interests of navigation, at or near Inerarity Point, in Escambia County, Fla., to the mainland of Baldwin County, Ala., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the Northwest Florida Corporation, its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said Northwest Florida Corporation, its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of Florida, the State of Alabama, any public agency or political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual

cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interests in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall at any time be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 6. The Northwest Florida Corporation, its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War and with the Highway Departments of the States of Florida and Alabama, a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department or either of such States shall, at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said Northwest Florida Corporation, its successors and assigns, shall make available all of its records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to Northwest Florida Corporation, its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or persons.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill authorizing the Northwest Florida Corporation, its successors and assigns, to construct, maintain, and operate a bridge across Perdido Bay, at or near Inerarity Point in Escambia County, Fla., to the mainland of Baldwin County, Ala."

MISSISSIPPI RIVER BRIDGE, AITKIN, MINN.

The bill (H. R. 13069) granting the consent of Congress to the State of Minnesota to construct, maintain, and operate a free highway bridge across the Mississippi River at or near Aitkin, Minn., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TETON NATIONAL PARK

The bill (S. 4385), to establish the Teton National Park in the State of South Dakota, and for other purposes, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That when 90 per cent of the privately owned lands within the areas hereinafter described shall have been acquired and transferred to the United States for park purposes, without expense to the Federal Treasury, such areas shall be, and are hereby, dedicated and set apart as a public park for the benefit and enjoyment of the people, under the name of the Teton National Park: *Provided*, That the State of South Dakota shall have first constructed the highways hereinafter described.

SEC. 2. That the areas to be included in said Teton National Park are situated in the State of South Dakota and lie within the boundaries particularly described as follows: Beginning at the northeast corner of section 13, township 3 south, range 18 east, Black Hills meridian, thence west 4 miles, thence north 1 mile, thence west 8 miles, to the southwest corner of section 6, same township and range, thence north 2 miles, thence west 2 miles, thence north 1 mile, thence west 1 mile, thence north 2 miles, to the northeast corner of section 16, township 2 south, range 16 east, Black Hills meridian; thence west 7 miles, thence south 1 mile, thence west 3 miles, to the northwest corner of section 24, township 2 south, range 14 east, Black Hills meridian; thence south 3 miles, thence east 1 mile, to the southeast corner of section 36, same township and range; thence south 3¾ miles, thence east 2 miles, thence north ¾ mile, to the southwest corner of section 16, township 3 south, range 15 east, Black Hills meridian; thence east 2 miles, thence north 3 miles, thence east 6½ miles, thence south 2 miles, thence east ½ mile, to the northwest corner of section 13, township 3 south, range 16 east, Black Hills meridian; thence south 1 mile, thence east 1 mile, thence south ½ mile, thence east 1 mile, thence south ½ mile, to the southwest corner of section 20, township 3 south, range 17 east, Black Hills meridian; thence east 4 miles, thence south 1 mile to the northwest corner of section 36, same township and range; thence east 6 miles to the northwest corner of section 36, township 3 south, range 18 east, Black Hills meridian; thence south 1 mile, thence east 1 mile, thence north 1 mile, thence east ½ mile, thence north 3 miles, thence west ½ mile, to the point of beginning, and also the following-described tract of land:

Beginning at the northeast corner of section 8, township 4 south, range 13 east, Black Hills meridian, thence west 1 mile, thence south 4 miles, to the southwest corner of section 29; thence east 2¼ miles, thence north 2 miles, thence west ¾ mile, thence north 1½ miles, to the center of section 9; thence west ½ mile, thence north ½ mile, to the point of beginning.

That all of the publicly owned lands within the areas described are hereby dedicated and set aside for the purposes aforesaid, and the Secretary of the Interior, in his discretion, is hereby authorized to exchange alienated lands within said areas for unappropriated and unreserved public lands of approximately equal value in the State of South Dakota outside of said areas.

SEC. 3. That the establishment of said park is conditioned upon the State of South Dakota first constructing the following highways in accordance with specifications to be determined and provided by the Bureau of Public Roads in the Department of Agriculture: A highway commencing at the north boundary of the park in township 3 south, range 18 east, Black Hills meridian, and extending down through Cedar Pass to Interior, thence northwesterly up Big Foot Pass, thence along the top of the rim within the park boundary to a point 9 miles south of Wall, there to join with a second highway to be constructed by said State from Wall through Scenic to a point within the park 10 miles south of Scenic, having a total length of approximately 40 miles.

SEC. 4. That the administration, protection, and promotion of said Teton National Park shall be exercised under the direction of the Secretary of the Interior by the National Park Service, subject to the provisions of the act of August 25, 1916, entitled "An act to establish a National Park Service, and for other purposes," as amended by the act of June 2, 1920 (41 U. S. Stat. L. 732).

SEC. 5. That the Secretary of the Interior be, and he is hereby, authorized to permit examinations, excavations, and gathering of objects of interest within said park by any person or persons whom he may deem properly qualified to conduct such examinations, excavations, or gatherings, subject to such rules and regulations as he may prescribe: *Provided*, That the examinations, excavations, and gatherings are undertaken only for the benefit of some reputable museum, university, college, or other recognized scientific or educational institution, with a view to increasing the knowledge of such objects and aiding the general advancement of geological and zoological science.

SEC. 6. That this act shall become effective if and when all of the above conditions shall have been fully complied with to the satisfaction of the President of the United States, who shall then issue a proclamation declaring that the conditions precedent herein required have been complied with, and said proclamation shall formally dedicate and set aside the areas herein described in accordance with the provisions of section 1 hereof.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

POLICING MILITARY ROADS

The bill (S. 4461) to provide for the policing of military roads leading out of the District of Columbia, was announced as next in order.

Mr. COPELAND. Mr. President, this is a bill proposing to police military roads leading out of the District of Columbia?

Mr. REED of Pennsylvania. That is right.

Mr. COPELAND. Does it provide that the military may fire at innocent citizens in automobiles, as happened to one Jacob D. Hanson at Niagara Falls?

Mr. BRUCE. Let the bill go over. We do not want any Federal officers coming over our roads in Maryland near Washington for any purpose.

Mr. REED of Pennsylvania. Mr. President, the principal need for this bill is in the State of Virginia. There are 46 miles of military highways in Arlington County, Va., which are owned by the United States and over which neither the constables nor the local police authorities of Virginia have any authority. In consequence of that fact, there happen every 24 hours on those roads——

Mr. BRUCE. Mr. President, I will say to the Senator that if he will amend the bill so as to limit it to Virginia I have no objection; otherwise, I ask that it go over. We do not want any Federal police officers in Maryland.

The PRESIDENT pro tempore. The bill will go over.

Mr. REED of Pennsylvania. I beg the Senator to hear me out.

Mr. BRUCE. Our experience is that it results in nothing but disorder and bloodshed.

Mr. REED of Pennsylvania. I can not hear the Senator.

Mr. BRUCE. Our experience is that the presence of Federal police officers on our roads results in nothing but disorder and bloodshed.

Mr. REED of Pennsylvania. Perhaps the Senator will hear me out as to the conditions in Virginia.

Mr. BRUCE. I just said to the Senator that if he will amend the bill so as to limit it to Virginia, I have nothing to say about it. If they like that sort of thing, they are welcome to it.

Mr. REED of Pennsylvania. Will not the Senator kindly hear me out?

Mr. BLEASE. I think if the Senator from Pennsylvania will have a private talk with the Senator from Maryland and explain the real purpose of the bill, the Senator from Maryland will not object.

Mr. REED of Pennsylvania. I will try to do that, but before the bill goes over——

Mr. BLEASE. I mean a private talk.

Mr. REED of Pennsylvania. I will be glad to give the Senator some of the lurid details in private, but in the meantime I wish the Senate to bear with me for two minutes. At the present time it is possible for the United States to police those roads across the river by the use of soldiers from Fort Myer, but there is nothing more demoralizing to the morale of those troops, nothing for which soldiers are less fitted, than the business of civilian policing. This bill would not permit the Capital Park Police to go on the roads that belong to the States, but would permit them only to go out for a distance of 5 miles on roads now owned by the United States, but which are not now policed by anybody.

Mr. BRUCE. To what roads is the Senator referring? I confess that I am ignorant as to this subject of military roads. What roads are these military roads leading out of the city of Washington into the State of Maryland?

Mr. REED of Pennsylvania. If the Senator wishes an illustration, he can go across the old bridge opposite the foot of Fourteenth Street, and when he reaches the Virginia side follow the road that leads to Fort Myer, and if he will do it this evening he will find better arguments for the passage of this bill than anything I can say.

Mr. BRUCE. The Senator will get me back to Virginia. I originated there, but some people are so unkind as to say that no man who leaves the State of Virginia ever goes back.

Mr. PHIPPS. Having gone over the bill, I find no reference whatever to the State of Maryland, and I am sure it applies only to the State of Virginia.

Mr. BRUCE. As I understand the Senator, there are not any military roads leading out of Washington into the State of Maryland?

Mr. REED of Pennsylvania. I do not know of any.

Mr. BRUCE. I will ask the Senator to limit his bill to the State of Virginia. We want no Federal police in Maryland.

Mr. REED of Pennsylvania. Mr. President, if the Senator wants such conditions in Maryland——

Mr. BRUCE. We take care of law and order in Maryland.

Mr. REED of Pennsylvania. I am glad to accept an amendment. I want to get the bill through.

The PRESIDENT pro tempore. The amendment will be stated.

Mr. BRUCE. I observe that neither of the Senators from Virginia are here. They may not want to have the bill passed. I ask that it may go over.

Mr. REED of Pennsylvania. Mr. President, I am quite sure the Senators from Virginia would not for a moment object to this bill, and I am willing, in order to get it through, to offer an amendment, on page 1——

Mr. BRUCE. I call the Senator's attention——

Mr. REED of Pennsylvania. Will not the Senator listen to my statement? It is impossible to conduct business in the Senate if the Senator breaks into the middle of every sentence. Certainly we sit here and listen to him.

Mr. BRUCE. I do not propose to have the Senator prescribe standards of deportment for me.

The PRESIDENT pro tempore. The time of the Senator from Pennsylvania has expired, and the clerk will call the next bill.

DONALD M. DAVIDSON

The bill (S. 3088) for the relief of Donald M. Davidson was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized to summon Donald M. Davidson, formerly second lieutenant of the Field Artillery, unassigned, of the Army of the United States, before a retiring board to inquire whether at the time of his honorable discharge March 12, 1920, he was incapacitated for active service and whether such incapacity was the result of an incident of service, and whether such discharge should have been made, and upon the result of such inquiry the President is authorized to nominate and appoint, by and with the advice and consent of the Senate, the said Donald M. Davidson a second lieutenant in the Army of the United States and place him immediately thereafter upon the retired list of the Army as a first lieutenant with the same privileges and retired pay as are now or may hereafter be provided by law or regulation for officers of the Regular Army: *Provided*, That said Donald M. Davidson shall not be entitled to any back pay or allowances.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MUSCLE SHOALS—CONFERENCE REPORT (S. DOC. NO. 142)

Mr. McNARY. I ask unanimous consent to submit the report of the committee of conference on Senate Joint Resolution 46, the Muscle Shoals resolution.

The PRESIDENT pro tempore. Without objection, the report will be received and it will lie on the table and be printed.

The report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the title of the joint resolution and agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the text of the joint resolution and agree to the same with an amendment as follows:

In lieu of the language put in by the House, insert the following:

"That for the purpose of maintaining and operating the properties now owned by the United States in the vicinity of Muscle Shoals, Ala., in the interest of the national defense and for agricultural and industrial development, and to aid navigation and the control of destructive flood waters in the Tennessee River and Mississippi River Basins, there is hereby created a body corporate by the name of the 'Muscle Shoals Corporation of the United States'—hereinafter referred to as the corporation. The board of directors first appointed shall be deemed the incorporators and the incorporation shall be held to have been effected from the date of the first meeting of the board. This act may be cited as the 'Muscle Shoals act of 1928.'

"SEC. 2. (a) The board of directors of the corporation—hereinafter referred to as the board—shall be composed of three members, not more than two of whom shall be members of the same political party, to be appointed by the President, by and with the advice and consent of the Senate. The board shall organize by electing a chairman, vice chairman, and other officers, agents, and employees, and shall proceed to carry out the provisions of this act.

"(b) The terms of office of the members first taking office after the approval of this act shall expire as designated by the President at the time of nomination, one at the end of the second year, one at the end of the fourth year, and one at the end of the sixth year, after the date of approval of this act. A successor to a member of the board shall be appointed in the same manner as the original members and shall have a term of office expiring six years from the date of the expiration of the term for which his predecessor was appointed.

"(c) Any member appointed to fill a vacancy in the board occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

"(d) Vacancies in the board so long as there shall be two members in office shall not impair the powers of the board to execute the functions of the corporation, and two of the members in office shall constitute a quorum for the transaction of the business of the board.

"(e) Each of the members of the board shall be a citizen of the United States, and shall receive compensation at the rate of $50 per day for each day that he shall be actually engaged in the performance of the duties vested in the board, to be paid by the corporation as current expenses, not to exceed, however, 150 days for the first year after the date of the approval of this act, and not to exceed 100 days in any year thereafter. Members of the board shall be reimbursed by the corporation for actual expenses (including traveling and subsistence expenses) incurred by them while in the performance of the duties vested in the board by this act.

"(f) No director shall have any financial interest in any public-utility corporation engaged in the business of distributing and selling power to the public nor in any corporation engaged in the manufacture, selling, or distribution of fixed nitrogen, or any ingredients thereof, nor shall any member have any interest in any business that may be adversely affected by the success of the Muscle Shoals project as a producer of concentrated fertilizers.

"(g) The board shall direct the exercise of all the powers of the corporation.

"(h) All members of the board shall be persons that profess a belief in the feasibility and wisdom, having in view the national defense and the encouragement of interstate commerce, of producing fixed nitrogen under this act of such kinds and at such prices as to induce the reasonable expectation that the farmers will buy said products, and that by reason thereof the corporation may be a self-sustaining and continuing success.

"SEC. 3. (a) The chief executive officer of the corporation shall be a general manager, who shall be responsible to the board for the efficient conduct of the business of the corporation. The board shall appoint the general manager, and shall select a man for such appointment who has demonstrated his capacity as a business executive. The general manager shall be appointed to hold office for 10 years, but he may be removed by the board for cause, and his term of office shall end upon repeal of this act, or by amendment thereof expressly providing for the termination of his office. Should the office of general manager become vacant for any reason, the board shall appoint his successor as herein provided.

"(b) The general manager shall appoint, with the advice and consent of the board, two assistant managers who shall be responsible to him, and through him, to the board. One of the assistant managers shall be a man possessed of knowledge, training, and experience to render him competent and expert in the production of fixed nitrogen. The other assistant manager shall be a man trained and experienced in the field of production and distribution of hydroelectric power. The general manager may at any time, for cause, remove any assistant manager, and appoint his successor as above provided. He shall immediately thereafter make a report of such action to the board, giving in detail the reason therefor. He shall employ, with the approval of the board, all other agents, clerks, attorneys, employees, and laborers.

"(c) The combined salaries of the general manager and the assistant managers shall not exceed the sum of $50,000 per annum, to be apportioned and fixed by the board.

"SEC. 4. Except as otherwise specifically provided in this act, the corporation—

"(a) Shall have succession in its corporate name.

"(b) May sue and be sued in its corporate name, but only for the enforcement of contracts and the defense of property.

"(c) May adopt and use a corporate seal, which shall be judicially noticed.

"(d) May make contracts, but only as herein authorized.

"(e) May adopt, amend, and repeal by-laws.

"(f) May purchase or lease and hold such personal property as it deems necessary or convenient in the transaction of its business and may dispose of any such personal property held by it.

"(g) May appoint such officers, employees, attorneys, and agents as are necessary for the transaction of its business, fix their compensation, define generally their duties, require bonds of them and fix the penalties thereof, and dismiss at pleasure any such officer, employee, attorney, or agent, and provide a system of organization to fix responsibility and promote efficiency.

"(h) The board shall require that the general manager and the two assistant managers, the secretary and the treasurer, the bookkeeper or bookkeepers, and such other administrative and executive officers as the board may see fit to include, shall execute and file before entering upon their several offices good and sufficient surety bonds, in such amount and with such surety as the board shall approve.

"(i) Shall have all such powers as may be necessary or appropriate for the exercise of the powers herein specifically conferred upon the corporation, including the right to exercise the power of eminent domain.

"SEC. 5. The board is hereby authorized and directed—

"(a) To operate existing plants for experimental purposes, to construct, maintain, and operate experimental plants at or near Muscle Shoals for the manufacture of fertilizer or any of the ingredients comprising fertilizer for experimental purposes.

"(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants. Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program;

"(c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce;

"(d) To cooperate with national, State, district, or county experimental stations or demonstration farms, for the use of new forms of fertilizer or fertilizer practices during the initial or experimental period of their introduction;

"(e) The board shall manufacture fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen. The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

"(f) Under the authority of this act the board may donate not exceeding 1 per cent of the total product of the plant or plants operated by it to be fairly and equitably distributed through the agency of county demonstration agents, agricultural colleges, or otherwise as the board may direct for experimentation, education, and introduction of the use of such products in cooperation with practical farmers so as to obtain information as to the value, effect, and best methods of use of same.

"(g) The board is authorized to make alterations, modifications, or improvements in existing plants and facilities.

"(h) To establish, maintain, and operate laboratories and experimental plants, and to undertake experiments for the purpose of enabling the corporation to furnish nitrogen products for military and agricultural purposes in the most economical manner and at the highest standard of efficiency.

"(i) The board shall have power to request the assistance and advice of any officer, agent, or employee of any executive department or of any independent office of the United States, to enable the corporation the better to carry out its powers successfully, and the President shall, if in his opinion the public interest, service, and economy so require, direct that such assistance, advice, and service be rendered to the corporation, and any individual that may be by the President directed to render such assistance, advice, and service shall be thereafter subject to the orders, rules, and regulations of the board and of the general manager.

"(j) Upon the requisition of the Secretary of War or the Secretary of the Navy to manufacture for and sell at cost to the United States explosives or their nitrogenous content.

"(k) Upon the requisition of the Secretary of War the corporation shall allot and deliver without charge to the War Department so much power as shall be necessary in the judgment of said department for use in operation of all locks, lifts, or other facilities in aid of navigation.

"(l) To produce, distribute, and sell electric power, as herein particularly specified.

"(m) No products of the corporation shall be sold for use outside of the United States, her Territories and possessions, except to the United States Government for the use of its Army and Navy or to its allies in case of war.

"SEC. 6. In order to enable the corporation to exercise the powers vested in it by this act—

"(a) The exclusive use, possession, and control of the United States nitrate plants Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings connected therewith, all tools and machinery, equipment, accessories, and materials belonging thereto, and all laboratories and plants used as auxiliaries thereto; the fixed-nitrogen research laboratory, the Waco limestone quarry, in Alabama, and Dam No. 2, located at Muscle Shoals, its power house, and all hydroelectric and operating appurtenances (except the locks), and all machinery, lands, and buildings in connection therewith, and all appurtenances thereof are hereby intrusted to the corporation for the purposes of this act.

"(b) The President of the United States is authorized to provide for the transfer to the corporation of the use, possession, and control of such other real or personal property of the United States as he may from time to time deem necessary and proper for the purposes of the corporation as herein stated.

"SEC. 7. (a) The corporation shall maintain its principal office in the immediate vicinity of Muscle Shoals, Ala. The corporation shall be held to be an inhabitant and resident of the northern judicial district of Alabama within the meaning of the laws of the United States relating to venue of civil suits.

"(b) The corporation shall at all times maintain complete and accurate books of accounts.

"SEC. 8. (a) The board shall file with the President and with the Congress, in December of each year, a financial statement and a complete report as to the business of the corporation covering the preceding fiscal year. This report shall include the total number of employees and the names, salaries, and duties of those receiving compensation at the rate of more than $2,500 a year.

"(b) The board shall require a careful and scrutinizing audit and accounting by the general accounting office during each governmental fiscal year of operation under this act, and said audit shall be open to inspection to the public at all times and copies thereof shall be filed in the principal office of the Muscle Shoals Corporation at Muscle Shoals in the State of Alabama. Once during each fiscal year the President of the United States shall have power, and it shall be his duty, upon the written request of at least two members of the board, to appoint a firm of certified public accountants of his own choice and selection which shall have free and open access to all books, accounts, plants, warehouses, offices, and all other places, and records, belonging to or under the control of or used by the corporation in connection with the business authorized by this act. And the expenses of such audit so directed by the President shall be paid by the board and charged as part of the operating expenses of the corporation.

"SEC. 9. The board is hereby empowered and authorized to sell the surplus power not used in its operations and for operation of locks and other works generated at said steam plant and said dam to States, counties, municipalities, corporations, partnerships, or individuals, according to the policies hereinafter set forth, and to carry out said authority the board is authorized to enter into contracts for such sale for a term not exceeding 10 years and in the sale of such current by the board it shall give preference to States, counties, or municipalities, purchasing said current for distribution to citizens and customers.

"SEC. 10. It is hereby declared to be the policy of the Government to distribute the surplus power generated at Muscle Shoals equitably among the States within transmission distance of Muscle Shoals.

"SEC. 11. In order to place the board upon a fair basis for making such contracts and for receiving bids for the sale of such power it is hereby expressly authorized, either from appropriations made by Congress or from funds secured from the sale of such power, to construct, lease, or authorize the construction of transmission lines within transmission distance in any direction from said Dam No. 2 and said steam plant: *Provided*, That if any State, county, municipality, or other public or cooperative organization of citizens or farmers, not organized or doing business for profit, but for the purpose of supplying electricity to its own citizens or members, or any two or more of such municipalities or organizations, shall construct or agree to construct a transmission line to Muscle Shoals, the board is hereby authorized and directed to contract with such State, county, municipality, or other organization or two or more of them, for the sale of electricity for a term not exceeding 15 years, and in any such case the board shall give to such State, county, municipality, or other organization ample time to fully comply with any local law now in existence or hereafter enacted providing for the necessary legal authority for such State, county, municipality, or other organization to contract with the board for such power: *And provided further*, That any surplus power not so sold as above provided to States, counties, municipalities, or other said organizations, before the board shall sell the same to any person or corporation engaged in the distribution and resale of electricity for profit, it shall require said person or corporation to agree that any resale of such electric power by said person or corporation shall be sold to the ultimate consumer of such electric power at a price that shall not exceed an amount fixed as reasonable, just, and fair by the Federal Power Commission; and in case of any such sale if an amount is charged the ultimate consumer which is in excess of the price so deemed to be just, reasonable, and fair by the Federal Power Commission, the contract for such sale between the board and such distributor of electricity shall be declared null and void and the same shall be canceled by the board.

"SEC. 12. The net proceeds derived by the board from the sale of power and any of the products manufactured by the corporation, after deducting the cost of operation, maintenance, depreciation, and an amount deemed by the board as necessary to withhold as operating capital, shall be paid into the Treasury of the United States at the end of each calendar year.

"SEC. 13. The Secretary of War is hereby empowered and directed to complete Dam No. 2 at Muscle Shoals, Ala., and the steam plant at nitrate plant No. 2, in the vicinity of Muscle Shoals, by installing in Dam No. 2 the additional power units according to the plans and specifications of said dam, and the additional power unit in the steam plant at nitrate plant No. 2: *Provided*, That the Secretary of War shall not install the additional power unit in said steam plant until, after investigation, he shall be satisfied that the foundation of said steam plant is sufficiently stable or has been made sufficiently stable to sustain the additional weight made necessary by such installation.

"SEC. 14. It is hereby declared to be the policy of the Government to utilize the Muscle Shoals properties for the fixation of nitrogen for agricultural purposes in time of peace.

"SEC. 15. The Secretary of War is hereby authorized, with appropriations hereafter to be made available by the Congress, to construct, either directly or by contract to the lowest responsible bidder, after due advertisement, a dam in and across Clinch River in the State of Tennessee, which has by long usage become known and designated as the Cove Creek Dam, according to the latest and most approved designs of the Chief of Engineers, including its power house and hydroelectric installations and equipment for the generation of at least 200,000 horsepower, in order that the waters of the said Clinch River may be impounded and stored above said dam for the purpose of increasing and regulating the flow of the Clinch River and the Tennessee River below, so that the maximum amount of primary power may be developed at Dam No. 2 and at any and all other dams below the said Cove Creek Dam.

"SEC. 16. In order to enable and empower the Secretary of War to carry out the authority hereby conferred, in the most economical and efficient manner, he is hereby authorized and empowered in the exercise of the powers of national defense in aid of navigation, and in the control of the flood waters of the Tennessee and Mississippi Rivers, constituting channels of interstate commerce, to exercise the right of eminent domain and to condemn all lands, easements, rights of way, and other area necessary in order to obtain a site for said Cove Creek Dam, and the flowage rights for the reservoir of water above said dam and to negotiate and conclude contracts with States, counties, municipalities, and all State agencies and with railroads, railroad corporations, common carriers, and all public-utility commissions, and any other person, firm, or corporation, for the relocation of railroad tracks, highways, highway bridges, mills, ferries, electric-light plants, and any and all other properties, enterprises, and projects whose removal may be necessary in order to carry out the provisions of this act. When said Cove Creek Dam and transportation facilities and power house shall have been completed, the possession, use, and control thereof shall be intrusted to the corporation for use and operation in connection with the general Muscle Shoals project and to promote flood control and navigation in the Tennessee River, and in the Clinch River.

"SEC. 17. The corporation as an instrumentality and agency of the Government of the United States for the purpose of executing its constitutional powers, shall have access to the Patent Office of the United States for the purpose of studying, ascertaining, and copying all methods, formulæ, and scientific information (not including access to pending applications for

patents) necessary to enable the corporation to use and employ the most efficacious and economical process for the production of fixed nitrogen, or any essential ingredient thereof, and any patentee whose patent rights may have been thus in any way copied, used, or employed, by the exercise of this authority by the corporation, shall have as the exclusive remedy a cause of action to be instituted and prosecuted on the equity side of the appropriate district court of the United States for the recovery of reasonable compensation.

"The Commissioner of Patents shall furnish to the corporation, at its request and without payment of fees, copies of documents on file in his office.

"SEC. 18. The Government of the United States hereby reserves the right, in case of war, or national emergency declared by Congress, to take possession of all or any part of the property described or referred to in this act for the purpose of manufacturing explosives or for other war purposes; but, if this right is exercised by the Government, it shall pay the reasonable and fair damages that may be suffered by any party whose contract, for the purchase of electric power or fixed nitrogen or its ingredients, is thereby violated after the amount of the damages have been fixed by the United States Court of Claims in proceedings instituted and conducted for that purpose under rules prescribed by the court.

"SEC. 19. (a) All general penal statutes relating to the larceny, embezzlement, conversion, or to the improper handling, retention, use, or disposal of public moneys or property of the United States, shall apply to the moneys and property of the corporation and to moneys and properties of the United States intrusted to the corporation.

"(b) Any person who, with intent to defraud the corporation, or to deceive any director or officer of the corporation or any officer or employee of the United States (1) makes any false entry in any book of the corporation, on (2) makes any false report or statement for the corporation, shall, upon conviction thereof, be fined not more than $10,000 or imprisoned not more than five years, or both.

"(c) Any person who shall receive any compensation, rebate, or reward, or shall enter into any conspiracy, collusion, or agreement, express or implied, with intent to defraud the corporation or wrongfully and unlawfully to defeat its purposes, shall, on conviction thereof, be fined not more than $5,000 or imprisoned not more than five years, or both.

"SEC. 20. In order that the board may not be delayed in carrying out the program authorized herein the sum of $10,000,000 is hereby authorized to be appropriated for that purpose from the Treasury of the United States, of which not to exceed $2,000,000 shall be made available with which to begin construction of Cove Creek Dam during the calendar year 1929.

"SEC. 21. That all appropriations necessary to carry out the provisions of this act are hereby authorized.

"SEC. 22. That all acts or parts of acts in conflict herewith are hereby repealed.

"SEC. 23. That this act shall take effect immediately.

"SEC. 24. The right to alter, amend, or repeal this act is hereby expressly declared and reserved."

And the House agree to the same.

CHAS. L. MCNARY,
G. W. NORRIS,
E. D. SMITH,
Managers on the part of the Senate.

JOHN M. MORIN,
W. FRANK JAMES,
B. CARROLL REECE,
PERCY E. QUIN,
WILLIAM C. WRIGHT,
Managers on the part of the House.

DISPOSITION OF CONDEMNED ORDNANCE

The bill (H. R. 6049) to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective departments was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ELBERT L. COX

The bill (H. R. 10702) for the relief of Elbert L. Cox was considered as in Committee of the Whole.

Mr. KING. Let some explanation be made of the bill.

Mr. REED of Pennsylvania. The Senator who reported the bill is not here. I remember the case, however. This officer was a second lieutenant in France who was given authority——

Mr. KING. Is this the cigarette case?

Mr. REED of Pennsylvania. Over a group of men who were unloading cigarettes.

Mr. KING. I am familiar with it. I have no objection.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

GEORGE ADAMS

The bill (H. R. 1072) for the relief of George Adams, was announced as next in order.

The PRESIDENT pro tempore. The bill was reported adversely, and without objection, it will be indefinitely postponed.

AMENDMENT OF INTERSTATE COMMERCE ACT

The bill (S. 668) amending section 1 of the interstate commerce act, was announced as next in order.

SEVERAL SENATORS. Over.

Mr. ROBINSON of Arkansas. Mr. President, this bill ought to be considered. It has been passed by the Senate twice, and favorably reported during two other sessions of Congress. Every time it has been voted on by the Senate, it has passed almost unanimously. The conditions which now exist make a stronger case for the bill than has ever existed before. I hope the Senate will take action on the bill.

Mr. BRUCE. I ask that the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

WILLIAM J. COCKE

The bill (S. 1958) for the relief of William J. Cocke was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with amendments, on page 1, line 6, to strike out "$46,431.32" and to insert in lieu thereof "$4,624"; and on page 2, line 1, change the period after the word "Carolina" to a comma, and insert the following: "less indebtedness of said Cocke to the United States in the amounts of $304.96 for printing costs in the case of William J. Cocke against United States (62 C. C., p. 108), for recovery under above contracts, in which the petition of said Cocke was dismissed, and $274.26 on account of failure to make payment for garbage delivered to him at Camp Bragg, Fayetteville, N. C., under contract of May 15, 1919, or a total indebtedness on such accounts of $579.22. Said sum, less indebtedness to the United States, shall be accepted in full and final release of all claims of William J. Cocke against the United States growing out of the above contracts," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to William J. Cocke, of the State of North Carolina, the sum of $4,624, for losses growing out of contracts with the War Department, one dated July 1, 1918, for the purchase of garbage from Camp Green, situate at or near the city of Charlotte, State of North Carolina; and the other September 23, 1918, for Camp Wadsworth, situate at or near the city of Spartanburg, State of South Carolina, less indebtedness of said Cocke to the United States in the amounts of $304.96 for printing costs in the case of William J. Cocke against the United States, 62 Court of Claims, page 108, for recovery under above contracts, in which the petition of said Cocke was dismissed, and $274.26 on account of failure to make payment for garbage delivered to him at Camp Bragg, Fayetteville, N. C., under contract of May 15, 1919, or a total indebtedness on such accounts of $579.22. Said sum, less indebtedness to the United States, shall be accepted in full and final release of all claims of William J. Cocke against the United States growing out of the above contracts.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

COURT OF CUSTOMS APPEALS

The bill (H. R. 6687) to change the title of the United States Court of Customs Appeals, and for other purposes, was considered as in Committee of the Whole.

The bill had been reported from the Committee on the Judiciary with amendments, on page 3, after line 18, to insert the following:

SEC. 4. That section 4914 of the Revised Statutes of the United States be amended to read as follows:

"SEC. 4914. That court, on petition, shall hear and determine such appeal on the evidence produced before the commissioner at such early and convenient time as the court may appoint: and the court may adjudge that such applicant is entitled, according to law, to receive a patent for his invention, as specified in his claim, or for any part thereof, as the facts in the case may appear, and such adjudication, if

it be in favor of the right of the applicant, shall authorize the commissioner to issue such patent on the applicant complying with the requirements of law."

And on page 4, line 7, to change the number of the section from 4 to 5, so as to make the bill read:

Be it enacted, etc., That the title of the United States Court of Customs Appeals, created by the act approved August 5, 1909, is hereby changed to the United States Court of Customs and Patent Appeals.

SEC. 2. (a) The jurisdiction now vested in the Court of Appeals of the District of Columbia in respect of Appeals from the Patent Office in patent and trade-mark cases is vested in the United States Court of Customs and Patent Appeals.

(b) Sections 4911 (44 Stat. 1336), 4912 (sec. 60, title 35, U. S. C.), and 4915 (sec. 63, title 35, U. S. C.) of the Revised Statutes, as amended, and section 9 of the act entitled "An act to authorize the registration of trade-marks used in commerce with foreign nations or among the several States or with Indian tribes, and to protect the same," approved February 20, 1905 (U. S. C., title 15, sec. 89), are amended by striking out the words "Court of Appeals of the District of Columbia" wherever they occur therein and inserting in lieu thereof the words "United States Court of Customs and Patent Appeals" in each instance.

(c) Where before the effective date of this act an appeal from the decision of the Patent Office has been filed with the Court of Appeals of the District of Columbia—

(1) If any hearing before said court has been held in the case, or if the case has been submitted for decision, then further proceedings in respect of the case shall be had in the same manner and with the same effect as if this act had not been enacted.

(2) If no hearing before said court has been held in the case, and the case has not been submitted for decision, then the appeal, together with the original papers, printed records, and record entries duly certified, shall, by appropriate orders duly entered of record, be transferred to the United States Court of Customs and Patent Appeals, and further proceedings in respect of the case shall be had in the same manner and with the same effect as if the appeal had been filed in said court.

(d) Nothing contained in this act shall be construed as affecting in any way the jurisdiction of the Court of Appeals of the District of Columbia in equity cases.

SEC. 3. The opinion of the Court of Customs and Patent Appeals in every case on appeal from the decision of the Patent Office shall be rendered in writing, and shall be filed in such case as part of the record thereof, and a certified copy of said opinion shall be sent to the Commissioner of Patents and shall be entered of record in the Patent Office.

SEC. 4. That section 4914 of the Revised Statutes of the United States be amended to read as follows:

"SEC. 4914. That court, on petition, shall hear and determine such appeal on the evidence produced before the commissioner at such early and convenient time as the court may appoint; and the court may adjudge that such applicant is entitled, according to law, to receive a patent for his invention, as specified in his claim, or for any part thereof, as the facts in the case may appear, and such adjudication, if it be in favor of the right of the applicant, shall authorize the commissioner to issue such patent on the applicant complying with the requirements of law."

SEC. 5. This act shall take effect 30 days after its enactment.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CLARA PERCY

The bill (S. 3453) to confer jurisdiction upon the Court of Claims to hear and determine the claim of Clara Percy was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That within one year from the enactment of this act a petition may be filed with the Court of Claims by or on behalf of Clara Percy for a hearing upon a claim for damages suffered by the said Clara Percy on account of the death of her husband, Elmer Charles Percy, who was struck and fatally injured by a United States Government truck in Balboa, Canal Zone. Jurisdiction is hereby conferred upon such court to hear and determine such claim and to render a judgment or decree thereon in a sum not to exceed $10,000: *Provided*, That said cause shall be tried and judgment rendered upon the same principles and under the same measures of liability as in like cases between private parties and with the same rights of appeal: *Provided further*, That notice of the suit shall be given to the Attorney General of the United States, and upon such notice it shall be the duty of the Attorney General to appear and defend for the United States.

SEC. 2. There is authorized to be appropriated such sum as may be necessary to pay the amount of any judgment rendered by the court.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EMPLOYEES' COMPENSATION

The bill (S. 3433) to amend an act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," as amended, was considered as in Committee of the Whole.

The bill had been reported from the Committee on the Judiciary with an amendment, on page 2, line 12, to strike out "5" and insert "3," so as to make the bill read:

Be it enacted, etc., That the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916, as amended, be amended as follows:

"That any person employed as a nurse or orderly in a tubercular ward of a hospital, home, or institution, operated by the United States Government, who before entrance into such employment was subjected to a medical examination and such examination did not reveal any active or inactive tubercular germs, shall be conclusively presumed to have entered such employment free from tuberculosis, and tubercular germs subsequently discovered upon examination, while so employed, shall be presumed to have been contracted in the course of such employment, and compensation shall be paid and hospitalization shall be authorized therefor by the United States Employees' Compensation Commission according to the provisions of this act.

"Where a person has resigned or has been discharged from such employment and three years thereafter, upon examination, is found to have tubercular germs, such person shall be presumed to have contracted the disease while employed as a nurse or orderly, and compensation shall be paid and hospitalization authorized by the United States Employees' Compensation Commission according to the provisions of this act."

The amendment was agreed to.

Mr. REED of Pennsylvania. I ask that we may have an explanation of the bill. There is no report accompanying it.

Mr. BLAINE. I ask that the bill may go over for the present.

The PRESIDENT pro tempore. The bill will be passed over.

SALARIES OF JUDGES

The bill (H. R. 11463) to fix the salaries of certain judges of the Territories and insular possessions of the United States was announced as next in order.

Mr. KING. I ask that that go over.

Mr. BINGHAM. Mr. President, will not the Senator withhold his objection for a moment?

Mr. KING. I have some amendments, and it would lead to considerable discussion. I think the Senator will not make any time by having it considered now.

The PRESIDENT pro tempore. The bill will be passed over.

FLOOD CONTROL ON THE MISSOURI RIVER, NEBR.

The joint resolution (S. J. Res. 80) authorizing an appropriation for bank protection for the control of floods and the prevention of erosion of the Missouri River at and near the town of Niobrara, in the State of Nebraska, was considered as in Committee of the Whole.

The joint resolution had been reported from the Committee on Commerce with amendments, on page 1, line 5, after "$250,000," to insert the words "or so much thereof as may be necessary"; and on line 10 to add a proviso as follows: "*Provided*, That the local interests shall contribute one-third of the cost of the said work," so as to make the joint resolution read:

Resolved, etc., That there is authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, the sum of $250,000, or so much thereof as may be necessary, for bank protection for the control of floods and the prevention of erosion of the Missouri River at and near the town of Niobrara in the State of Nebraska; said work to be carried on under the control and supervision of the Chief of Engineers of the War Department: *Provided*, That the local interests shall contribute one-third of the cost of the said work.

The amendments were agreed to.

Mr. REED of Pennsylvania. I ask that the joint resolution may go over.

Mr. NORRIS. I ask the Senator to withhold his objection a moment.

Mr. REED of Pennsylvania. I withhold my objection.

Mr. NORRIS. This joint resolution presents an emergency proposition. It is conceded that unless something is done for the protection of the banks of the Missouri River, on the line between Dakota and Nebraska, the town of Niobrara, one of the oldest towns in the State, will be destroyed. Everybody is favorable to it—the engineers, the committee unanimously, and everybody—but there was no authority to take any action. It is provided that the citizens shall pay one-third of the expense of doing this work. If it is not done, it means the destruction of a town; it may be at the next high water. The danger is imminent, and I hope the Senator will not make any objection to the joint resolution. This is probably the only opportunity we shall have to pass it, and if it goes over until December it may be that the whole town will be wiped out.

Mr. REED of Pennsylvania. I have read the report and I have no further objection.

Mr. STEPHENS. Mr. President, will the Senator yield a moment?

Mr. NORRIS. I yield.

Mr. STEPHENS. I was on the subcommittee that considered this matter, and the matter was thoroughly considered by the full committee. This measure met the approval both of the subcommittee and the full committee. I think it ought to be passed.

Mr. NORRIS. I thank the Senator.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

FLOOD CONTROL ON THE MISSOURI RIVER, S. DAK.

The joint resolution (S. J. Res. 91) authorizing an appropriation for bank protection for the control of floods and the prevention of erosion of the Missouri River at and near the town of Yankton, in the State of South Dakota, was considered as in Committee of the Whole.

The joint resolution had been reported from the Committee on Commerce with amendments, on page 1, line 5, after "$250,000" to insert the words "or so much thereof as may be necessary," and to add a proviso at the end of the joint resolution as follows: "*Provided*, That the local interests shall contribute one-third of the cost of the said work," so as to make the joint resolution read:

Resolved, etc., That there is authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, the sum of $250,000, or so much thereof as may be necessary, for bank protection for the control of floods and the prevention of erosion of the Missouri River at and near the town of Yankton in the State of South Dakota; said work to be carried on under the control and supervision of the Chief of Engineers of the War Department: *Provided*, That the local interests shall contribute one-third of the cost of the said work.

The amendments were agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

COMPENSATION TO WORLD WAR VETERANS

The bill (S. 3258) to amend section 300 of the World War veterans' act, 1924, as amended, was considered as in Committee of the Whole, and was read as follows:

Be it enacted, etc., That the second paragraph of section 300 of the World War veterans' act, 1924, approved June 7, 1924, as amended, is amended to read as follows:

"The insurance shall be payable only to a spouse, child, grandchild, parent, brother, sister, uncle, aunt, nephew, niece, brother-in-law, or sister-in-law, or to any or all of them, or to a trust company or bank authorized to do a general trust business under the laws of the State in which it is incorporated or under the national banking laws, if such trust company or bank has been designated by the insured as trustee for any or all of the foregoing beneficiaries, and also during total and permanent disability to the injured person."

Mr. BRATTON. Mr. President, I offer an amendment to the pending bill.

The PRESIDENT pro tempore. The clerk will state the amendment.

The CHIEF CLERK. At the conclusion of the bill add a new section, as follows:

That the third paragraph of subdivision (7) of section 202 of the World War veterans' act, 1924, as amended by the act approved July 2, 1926, is amended by striking out the period at the end thereof and inserting a colon and the following: "*Provided further*, That the rating of any person once awarded compensation under this provision shall not thereafter be so modified as to discontinue such compensation or to reduce it to less than $50 per month, and any such person whose rating has heretofore been so modified shall be restored his rating of tuberculous disease of a compensable degree, completely arrested, and payments thereunder shall be resumed from the date of the approval of this amendatory act."

Mr. REED of Pennsylvania. Mr. President, the effect of this amendment would be to give a permanent life-time pension to any veteran of the World War who ever showed symptoms of tuberculosis prior to January 2, 1925, and subsequently had those symptoms arrested. We all know that tuberculosis can be cured. We all know that many a veteran showed symptoms of tuberculosis prior to the date stated, and is to-day just as well as we are. This is an amendment which would have the effect of giving such a soldier a permanent life-time pension of $50 per month.

The original bill to which the amendment is offered is entirely meritorious, and was unanimously reported by the Finance Committee yesterday. It enables any soldier to designate a trustee for the beneficiaries. I should be very sorry to see the amendment adopted, but I would be equally sorry to see the original bill fail.

Mr. COPELAND. Mr. President, may I ask the Senator a question?

Mr. KING. I will ask that the bill go over if any amendment is offered.

Mr. SHORTRIDGE. I hope the Senator will withhold that objection.

The PRESIDENT pro tempore. Does the Senator ask that the bill go over?

Mr. KING. If there are any amendments offered. I have no objection to the original bill.

Mr. BRATTON. Will the Senator withhold his objection until I explain the purpose of the amendments?

Mr. KING. Mr. President, the Finance Committee is considering measures now for compensation, and so on, for soldiers, and it seems to me that this is not an appropriate place to consider the whole question.

Mr. SHORTRIDGE. Might not the matter be disposed of in this way? Objection is made to the proposed amendment, but there is no objection made to the bill as reported.

Mr. BRATTON. Mr. President, if the Senator will withhold his objection——

The PRESIDENT pro tempore. Does the Senator from Utah maintain his objection?

Mr. KING. Does the Senator from New Mexico insist upon his amendment?

Mr. BRATTON. I do not want to prejudice the bill of the Senator from California. I am going to be brief with my observations. I think the amendment is altogether meritorious, and I can not conceive of any valid objection against it. But in view of the fact that we are proceeding upon the Calendar for Unobjected Bills, if the Senator from Utah maintain his objection and makes it impossible for me to have the amendment adopted, I shall withdraw it rather than prejudice the bill of the Senator from California. But I should like to have the Senator from Utah withhold his objection, and likewise the Senator from Pennsylvania, if they will be good enough to do that, until I can explain the amendment.

Mr. KING. I have no objection to the Senator explaining his amendment.

Mr. BRATTON. On July 2, 1926, an amendment to the World War veterans' act was approved dealing with ex-service men who have a tuberculous disease. After dealing with the several ratings applicable to ex-service men falling in certain classes, this provision was added:

That any ex-service person shown to have a tuberculous disease of a compensable degree who, in the judgment of the director, has reached a condition of complete arrest of his disease, shall receive compensation at not less than $50 per month.

The amendment that I offer is to the effect that any ex-service man shown to have had a tuberculous disease of a compensable degree—meaning that the bureau must have made that determination and must have made that diagnosis, and likewise that the bureau has decided subsequently that the tuberculous disease, once of a compensable degree, has reached a stage of complete arrest—is automatically given a sick status with compensation of $50 a month.

It was the intention of the bill then, and was so stated upon the floor, that an ex-service man falling in that class should have assurance that his compensation should continue at that figure, unchanged upward or downward. The Senator from Arizona [Mr. ASHURST], who proposed the amendment and who championed it on the floor of the Senate, stated emphatically that that was his understanding. I supplemented what he said, representing one of the Southwestern States where a

great many men live who have tuberculosis or have had tuberculosis at some time in the past and who have reached the stage of arrest. But, notwithstanding what was said at the time the bill was passed, the bureau, in administering the law, arrogated unto itself the right to say that notwithstanding, according to its own records, a man did have tuberculosis of a compensable degree at some time in the past, and notwithstanding he has been paid at $50 per month, that now, upon a review of the record, it is decided that he never did have tuberculosis of a compensable degree and consequently his $50 is taken away from him in direct conflict with the plain language of the act, and particularly with the discussion that occurred on the floor of the Senate at the time the bill passed.

The amendment which I now propose——

The PRESIDENT pro tempore. The time of the Senator from New Mexico has expired.

Mr. SHORTRIDGE. Mr. President, I would not be willing to have a meritorious bill passed over, temporarily at any rate, because of the proposed amendment which has provoked the argument. May I suggest to the Senator from New Mexico that the relief which he seeks by the proposed amendment be secured by an independent bill?

Mr. BRATTON. Mr. President, will the Senator yield?

Mr. SHORTRIDGE. Pardon me just an instant. It could be offered and speedily considered by the committee, and perhaps passed through the Senate before we adjourn. I now yield to the Senator from New Mexico.

Mr. BRATTON. That is exactly what I did on the 27th of April. It has been before the committee, of which the Senator from California is a member, since that time. I called it to the attention of the chairman of the committee about 10 days ago and asked him when we might expect the bill to be considered.

He gave me assurance then that as soon as the revenue bill was disposed of my bill would receive prompt consideration. Certain bills were reported from the Committee on Finance yesterday. I am told by a member of the subcommittee having jurisdiction of legislation of this kind that the bill was not even presented to the committee. Obviously, unless the bill is attached as an amendment to the pending bill, it will not pass during this session of the Congress.

Mr. SHORTRIDGE. I would not express it in that way. If I attended the session of the committee, I do not recall that the bill was taken up.

Mr. BRATTON. That is what I complain about.

Mr. SHORTRIDGE. But may I suggest to the Senator that there is no rule which would prevent him consulting the committee to-morrow, and the committee might be polled and his bill could be reported. That is done frequently. I do not think the Senator's bill will suffer by withdrawing his proposed amendment and permitting this bill to go through to-night.

Mr. BRATTON. I will assure the Senator again that I am not going to have his bill prejudiced by insisting upon the amendment.

The PRESIDENT pro tempore. The Senator from New Mexico withdraws his amendment.

Mr. ASHURST. Mr. President, I join with the Senator from New Mexico in urging that at some appropriate time the amendment which he proposes should be enacted into law. The Senator has so clearly, so correctly, and so concisely stated the purpose of his amendment that nothing I could say would add to the force of his argument. I rather think that he has acted wisely, however, in withdrawing it rather than imperil the passage of the bill.

All that the Senator from New Mexico stated is true. The amendment to which he referred and which I caused to be adopted in 1926 has been misconstrued, to use the most liberal language, by the Veterans' Bureau.

I ask at this juncture to have printed in the RECORD a letter upon this subject by me to the Veterans' Bureau and the reply of the bureau.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The letters are as follows:

MAY 2, 1928.

Hon. FRANK T. HINES,
Director United States Veterans' Bureau, Washington, D. C.

DEAR GENERAL HINES: When H. R. 12175 was pending in the Senate of the Sixty-ninth Congress I offered the following amendment, which amendment was adopted by the Senate and which became a part of Public, No. 448, and for the lack of a better description has come to be known as the Ashurst amendment, to wit:

"That any ex-service person shown to have had a tuberculous disease of a compensable degree, who, in the judgment of the director, has reached a condition of complete arrest of his disease, shall receive compensation of not less than $50 per month: *Provided, however,* That nothing in this provision shall deny a beneficiary the right to receive a temporary total rating for six months after discharge from a one year's period of hospitalization: *Provided further,* That no payments under this provision shall be retroactive and the payments hereunder shall commence from the date of the passage of this act or the date the disease reaches a condition of arrest, whichever be the later date."

Will you please inform me as to the number of ex-service men now receiving compensation under the provisions of my amendment; and also please further advise me as to the gross sum of money (compensation) which to date has been paid to ex-service men under and by virtue of this Ashurst amendment?

Sincerely yours,

HENRY F. ASHURST.

WASHINGTON, *May 4, 1928.*

Hon. HENRY F. ASHURST,
United States Senate, Washington, D. C.

MY DEAR SENATOR ASHURST: This will acknowledge receipt of your letter of May 2, 1928, requesting information as to the number of beneficiaries, and the cost, under the provision allowing the $50 statutory award.

You are advised that 39,634 veterans are receiving this statutory award at the present time. To date this legislation has caused an expenditure of approximately $28,800,000.

Very truly yours,

FRANK T. HINES, *Director.*

Mr. BRATTON. Mr. President, will the Senator yield to me?

Mr. ASHURST. I yield.

Mr. BRATTON. It is not my purpose to affect the amendment of the Senator from Arizona except to make the law so plain that even the bureau can not misconstrue it.

Mr. ASHURST. I thank the Senator.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

POLICING OF MILITARY ROADS LEADING OUT OF THE DISTRICT

Mr. BRUCE. Mr. President, if I may be permitted a moment or two, I should like to say that neither of the Senators from Virginia have any objection to the passage of the bill (S. 4461) to provide for the policing of military roads leading out of the District of Columbia. Therefore, if the Senate will amend the bill so as to make it inapplicable to Maryland I shall have no objection to it.

Mr. REED of Pennsylvania. I thank the Senator and ask that the bill be now considered.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 4461) to provide for the policing of military roads leading out of the District of Columbia.

Mr. REED of Pennsylvania. I offer an amendment

The PRESIDENT pro tempore. The amendment proposed by the Senator from Pennsylvania will be stated.

Mr. REED of Pennsylvania. I move, on page 1, line 8, after the word "roads" to insert the words "in the State of Virginia."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

RELIEF OF WORLD WAR VETERANS

Mr. ASHURST. Mr. President, I beg pardon of the Senator from Pennsylvania, but I wish to address to him a question at this time. Some few evenings ago I offered an amendment to the tax bill, which was a rescript of House bill 13039, the World War veterans' bill as it passed the House. I am quite disturbed by a sentence I heard fall from the lips of the Senator from New Mexico [Mr. BRATTON] to the effect that the Committee on Finance has not even considered, much less reported, House bill 13039. Am I correct?

Mr. REED of Pennsylvania. I can explain that.

Mr. BRATTON. Let me say to the Senator that I referred to the bill which I offered as an amendment to the bill of the Senator from California.

Mr. ASHURST. Will the Senator from Pennsylvania kindly advise us as to when we may expect a report on House bill 13039?

Mr. REED of Pennsylvania. The Finance Committee met yesterday afternoon and ordered a favorable report upon that bill, with certain amendments, and also upon the bill amending the adjusted compensation act without amendment. One of them, I think, was reported to-day by the Senator from Utah [Mr. SMOOT]. The other one is in my office, and I hope to be able to report it as soon as the Senate shall meet to-morrow.

Mr. ASHURST. I am content. That is the clear and manly statement I would expect from the Senator.

COMPENSATION OF CUSTOMS EMPLOYEES

The bill (S. 4075) to adjust the compensation of certain employees in the Customs Service, was announced as next in order.

Mr. EDGE. Mr. President, this bill is identical with House bill 13143, being Order of Business 1304, which has passed the House, and, as I have indicated, is on the calendar. I ask unanimous consent that the House bill may be substituted for the Senate bill now before the Senate.

The PRESIDENT pro tempore. Without objection, the substitution will be made.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 13143) to adjust the compensation of certain employees in the Customs Service, which was read, as follows:

Be it enacted, etc., That the following annual rates of compensation are hereby established for the employees in the Customs Service hereinafter specified:

(a) Laborers, $1,500.

(b) Verifers, openers, and packers, $1,680, $1,740, $1,800, $1,860, $1,920, $1,980 and $2,040.

(c) Clerks entrance salary, $1,700; clerks having one year's satisfactory service, $1,800; clerks having two years' satisfactory service, $1,900; clerks having three years' satisfactory service, $2,000; clerks having four years' satisfactory service, $2,100; thereafter promotion of clerks to higher rates of compensation shall be in accordance with existing law.

(d) Customs guards, $1,860, $1,920, $1,980, $2,040, $2,100, $2,200, $2,300 and $2,400.

(e) Inspectors, $2,100, $2,200, $2,300, $2,400, $2,500, $2,600, $2,700, $2,800, $2,900, $3,000, $3,100, $3,200, and $3,300.

(f) Station inspectors, $3,000, $3,100, $3,200, 3,300, $3,400, $3,500, and $3,600.

SEC. 2. All new appointments of employees specified in section 1 shall be made at the minimum rate of the appropriate salary range.

SEC. 3. Nothing in this act shall be construed to prevent the promotion of any employee at any time to a vacant position in a higher grade, and when so promoted such employee shall receive the compensation fixed in accordance with law for such position; and nothing herein contained shall be construed to reduce the rate of compensation of any employee in the Custom Service.

SEC. 4. There are hereby authorized to be appropriated such sums as may be necessary to pay the rates of compensation herein established.

SEC. 5. (a) Sections 1 and 2 of this act shall take effect on July 1, 1928.

(b) The remainder of this act shall take effect on the date of its enactment.

Mr. KING. Mr. President, I call the Senator's attention to the report of Mr. Mellon, the Secretary of the Treasury, in which he says:

The proposed legislation is in conflict with the financial program of the President.

It does not have the approval of the Secretary of the Treasury.

Mr. EDGE. Mr. President, if the Senator will permit me just a few minutes I think I can—I hope so, at least—satisfy him as to the justness of this bill. It is the result of a thorough investigation by a subcommittee of the Ways and Means Committee of the House. It provides a minimum salary on entrance into the Customs Service of $1,500 a year, taking the place of the present entrance salary of $1,320 a year.

I think it should require very little argument to convince the Senate that $1,500 a year in such a very important service as is the Customs Service of the United States is about as low an entrance salary as this Government should pay. This proposed readjustment of customs salaries merely places the compensation of customs employees in the lower grades throughout the United States absolutely on a parity with the present salaries paid to post-office employees.

The bill was reported from the Ways and Means Committee of the House by unanimous vote; it passed the House of Representatives likewise by unanimous vote; it is on the Calendar to-day from the Finance Committee of the Senate, having been reported by unanimous vote, and, in view of the lateness of the session, I hope the Senator from Utah will permit the customs employees, especially in the lower grades, at least to be placed on a parity with the employees in the postal service of the United States. I assure the Senator that is all this bill provides.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The PRESIDENT pro tempore. Without objection, Order of Business 1296, being Senate bill 4075, will be indefinitely postponed.

PROPERTY DEVISED TO UNITED STATES BY WESLEY JORDAN

The joint resolution (H. J. Res. 77) concerning lands and property devised to the Government of the United States of America by Wesley Jordan, deceased, late of the township of Richland, county of Fairfield, and State of Ohio, was considered as in Committee of the Whole, and was read, as follows:

Resolved, etc., That the acceptance of the devise and bequest made by Wesley Jordan in his last will and testament to the Government of the United States of America and recorded in volume 34, page 386, of the will records of Fairfield County, Ohio, be declined by the Government of the United States of America, and that the estate of the said Wesley Jordan be, and is, forever discharged from any obligation to the United States of America growing out of said last will and testament of said Wesley Jordan, deceased.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

IMPORTATION OF CARILLONS OF BELLS

The bill (S. 2355) to remit the duty on a carillon of bells to be imported for Princeton University, Princeton, N. J., was announced as next in order.

Mr. REED of Pennsylvania. Mr. President, the bill the title of which has just been stated and the two following bills—that is, Orders of Business Nos. 1298, 1299, and 1300, being Senate bills 2355, 2907, and 793, were authorized by the Finance Committee to be reported by me favorably if the fact appeared that there was no industry in the United States capable of manufacturing such carillons. On investigation we are told that there is an establishment in Troy, N. Y., that is capable of doing it. Pending the investigation of that statement, in good faith to the Finance Committee, I ask that the three bills to which I have referred may go over.

The PRESIDENT pro tempore. Without objection, the bills will be passed over.

Mr. FLETCHER. Mr. President, may I state just briefly that I have introduced a similar bill to admit free of duty a carillon of bells which Mr. Edward Bok, of Philadelphia, Pa., and, I am proud to say, a resident for some months during the year of Florida, proposes to import for the purpose of constructing a carillon tower and bells at Mountain Lake, Fla. It is a pure donation, a public-spirited undertaking by him. Under the law he has to pay $40,000 duty on those bells because he has to get them abroad. He can not get them in the United States.

I am quite certain that the Senator will find that the bells that are needed by Mr. Bok, whether or not that applies to the people mentioned in these bills, will have to be imported, and that they are not made in the United States, and can not be made here. They have to have a peculiar tone, which the manufacturers of bells in this country are unable to produce, though they do make a number of bells here; I have not any question of that.

It may be that these particular bells can be manufactured here; but these carillon bells which Mr. Bok proposes to import can not be made here. He has investigated that subject.

He assures me that that is the fact. I have introduced a bill to allow Mr. Bok to import these bells free of duty. It is purely an altruistic movement on his part; but I can not get any report upon my bill. I think we ought to be treated alike. The Finance Committee ignores that bill, and reports out three other bills.

Mr. REED of Pennsylvania. I asked the clerk yesterday to give me all of the bills on this subject that have been introduced. If he has omitted the Senator's bill, I will look to it to-morrow. All I can say is that I hope that Mr. Bok's carillon will be sweeter than the tone of his letters on the subject of the World Court.

The PRESIDENT pro tempore. The bill will be passed over.

Mr. BARKLEY. Mr. President, I should like to ask the Senator from Pennsylvania where are the bells involved in the three bills on the calendar? Have they been shipped? Are they on their way?

Mr. REED of Pennsylvania. Yes, Mr. President. One set of them has not yet been imported, but is about to be, to Princeton University. One set has been imported to Grace Church, in Plainfield, N. J. Another set, I understand, has been imported to a church in Providence, R. I. I think I have stated the history of them correctly.

Mr. BARKLEY. Mr. President——

Mr. PHIPPS. I call for the regular order.

The PRESIDENT pro tempore. The regular order is demanded.

SAVANNAH RIVER BRIDGE, SYLVANIA, GA.

The bill (S. 4474) authorizing the South Carolina and the Georgia Highway Departments to construct, maintain, and operate a toll bridge across the Savannah River at or near Burtons Ferry, near Sylvania, Ga., was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That in order to promote interstate commerce, improve the Postal Service, and provide for military and other purposes the State Highway Departments of the respective States of Georgia and South Carolina, jointly and severally, or either of them, be, and are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Savannah River at a point suitable to the interests of navigation, at or near Burtons Ferry, near Sylvania, Ga., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the State Highway Departments of the respective States of Georgia and South Carolina, jointly and severally, or either of them, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, maintenance, and operation of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such States.

SEC. 3. The said State Highway Departments of the respective States of Georgia and South Carolina, jointly and severally, or either of them, are hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. In fixing the rates of toll to be charged for the use of such bridge the same shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the cost of such bridge and its approaches, including reasonable interest and financing cost, as soon as possible, under reasonable charges, but within a period of not to exceed 10 years from the completion thereof. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the cost of the bridge and its approaches, the expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 5. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ALTAMAHA RIVER BRIDGE, TOWNS BLUFF FERRY, GA.

The bill (S. 4487) authorizing the Uvalda Booster Club, its successors and assigns, to construct, maintain, and operate a bridge across the Altamaha River at or near Towns Bluff Ferry, connecting Montgomery and Jeff Davis Counties, Ga., was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That in order to promote interstate commerce, improve the Postal Service, and provide for military and other purposes, the Uvalda Booster Club, its successors and assigns, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Altamaha River, at a point suitable to the interests of navigation, at or near Towns Bluff Ferry, connecting Montgomery and Jeff Davis Counties, Ga., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. After the completion of such bridge, as determined by the Secretary of War, either the State of Georgia, any political subdivision thereof within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of such State governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion cost, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches, and acquiring such interests in real property; and (4) actual expenditures for necessary improvements.

SEC. 3. If such a bridge shall at any time be taken over or acquired by the State of Georgia, or by any municipality or other political subdivision or public agency thereof, under the provisions of section 2 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 4. The Uvalda Booster Club, its successors and assigns, shall, within 90 days after the completion of such bridge, file with the Secretary of War and with the Highway Department of the State of Georgia, a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and at the request of the Highway Department of the State of Georgia shall, at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said Uvalda Booster Club, its successors and assigns, shall make available all of its records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 2 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 5. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to the Uvalda Booster Club, its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 6. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MONUMENT ON SITE OF BATTLE BETWEEN SIOUX AND PAWNEE INDIANS

The bill (H. R. 9194) authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle between the Sioux and Pawnee Indian Tribes in Hitchcock County, Nebr., fought in the year 1873, was considered as in Committee of the Whole.

The bill had been reported from the Committee on the Library with amendments, on page 1, line 3, after the words "authorized to," to strike out "accept the donation of such land as may be deemed appropriate, not exceeding 40 acres," and insert "erect a suitable monument and historical tablets"; in line 6, after the word "on," to insert the words "or near"; in line 9, after the word "soil," to strike out "and to erect thereon a suitable monument and historical tablets" and insert "the title to the land deemed appropriate for the site shall be vested in the State of Nebraska, and care of the site and monument shall be without expense to the Federal Government"; and on page 2, line 9, after the words "United States," to strike out the remainder of the bill, so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to erect a suitable monument and historical tablets on or

near the site of the battle between the Sioux and Pawnee Indians near the Republican River in Hitchcock County, Nebr., the last battle between Indian tribes on American soil. The title to the land deemed appropriated for the site shall be vested in the State of Nebraska, and care of the site and monument shall be without expense to the Federal Government.

SEC. 2. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $7,500, or so much thereof as may be necessary, to carry out the provisions of this act: *Provided*, That the said monument shall be the work of an artist who is a citizen of the United States.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

EROSION OF SHORE LANDS

The bill (S. 3637) to provide Federal cooperation with the States in devising means to protect valuable shore lands from damaging erosions, and for other purposes, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Coast and Geodetic Survey of the Department of Commerce is authorized and directed to cooperate with appropriate agencies in the various States in studies to devise more effective means of preventing erosions of the shores by waves and currents; and for this purpose, under the limitations of existing law, to purchase instruments and supplies, to employ personnel for duty in the District of Columbia and in the field, to pay subsistence to employees engaged on field duty, to perform travel incident to the field work and as may be necessary to cooperation with the various States and to enter upon such other undertakings and incur such other expenditures as may be necessary: *Provided*, That no part of any sum hereafter appropriated for carrying out the provisions of this act shall be expended for field work in any State which does not contribute to the project such funds, supplies, and/or services as the Secretary of Commerce may consider appropriate.

Mr. COPELAND. Mr. President, reserving the right to object, I should like to ask the Senator from Pennsylvania, the chairman of the Committee on Military Affairs, what has become of the bill permitting the American Legion of the State of New York to borrow certain surplus property from the War Department?

Mr. REED of Pennsylvania. Mr. President, that bill was laid upon the table by unanimous vote of the Military Affairs Committee, in pursuance of a policy to decline to lend War Department equipment to State encampments of the American Legion, or of the Veterans of Foreign Wars, or of the Confederate Veterans, or of the Grand Army of the Republic, or of the United Spanish War Veterans, or of the other various veterans' societies. We have reported out favorably all such bills to authorize loans for national encampments of those organizations; but it is perfectly obvious that the supplies of the War Department would not be sufficient to furnish camp equipment to all of the State organizations of veterans of various groups who desire to borrow it.

Mr. COPELAND. By what authority, may I ask the Senator from Pennsylvania, did the committee decide to establish such a policy?

Mr. REED of Pennsylvania. By the authority that is vested in the committee to pass upon these bills according to its best discretion.

Mr. COPELAND. I think it is a very wrong thing to deny a great organization like the American Legion of the State of New York or any other State which is proceeding to use materials——

The PRESIDENT pro tempore. The time of the Senator from New York has expired.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AERONAUTICAL CONFERENCE, WASHINGTON, D. C.

The joint resolution (S. J. Res. 161) authorizing the President to invite representatives of foreign governments to attend an international aeronautical conference on civil aeronautics in Washington on December 12, 13, and 14, 1928, was considered as in Committee of the Whole and was read, as follows:

Resolved, etc., That the President be, and he is hereby, authorized and requested to invite representatives of foreign governments to attend an international aeronautical conference on civil aeronautics to be held in Washington, D. C., December 12, 13, and 14, 1928.

SEC. 2. That the sum of $24,700, or so much thereof as may be necessary, is hereby authorized to be appropriated for the expenses of such meeting, including salaries in the District of Columbia or elsewhere, rent in the District of Columbia, printing and binding, transportation subsistence or per diem in lieu of subsistence (notwithstanding the provisions of any other act), contract stenographic reporting services, official cards, and such expenses as may be actually and necessarily incurred by the Government of the United States by reason of such invitation in the observance of proper courtesies.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ENGINEERS AND ECONOMISTS FOR RECLAMATION WORK

Mr. PHIPPS. From the Committee on Irrigation and Reclamation I ask unanimous consent to report a bill.

The PRESIDENT pro tempore. Without objection, the report will be received.

Mr. PHIPPS. I report without amendment the bill (S. 4528) authorizing the Secretary of the Interior to employ engineers and economists for consultation purposes on important reclamation work.

The bill would simply authorize the Reclamation Service to employ needed expert engineers and geologists at a rate a little higher than is authorized by the present law, the number being limited and the amount per annum that anyone could receive being limited.

Mr. ROBINSON of Arkansas. I did not object to the report being received, but I object to present consideration.

Mr. ODDIE. I object to the consideration of the bill.

The PRESIDENT pro tempore. The bill will go to the calendar.

ISSUANCE OF IMMIGRATION VISAS

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the joint resolution (S. J. Res. 5) to grant a preference to the wives and minor children of alien declarants in the issuance of immigration visas, which was to strike out all after the enacting clause and insert a substitute.

Mr. REED of Pennsylvania. I move that the Senate disagree to the amendment of the House, ask for a conference on the disagreeing votes of the two Houses, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the President pro tempore appointed Mr. JOHNSON, Mr. REED of Pennsylvania, and Mr. KING conferees on the part of the Senate.

Mr. REED of Pennsylvania. I am authorized by the senior Senator from California [Mr. JOHNSON] to say that he does not desire to serve on the conference committee and requests that the Senator from New Hampshire [Mr. KEYES] be named in his place.

The PRESIDENT pro tempore. Without objection, the senior Senator from California will be excused from service upon the conference committee on the part of the Senate and the junior Senator from New Hampshire [Mr. KEYES] will be appointed in his stead.

GOLD STAR MOTHERS' TRIP TO EUROPE

Mr. COPELAND. Mr. President, I would like to ask the Senator from Pennsylvania [Mr. REED] if the Committee on Military Affairs have decided that the gold star mothers can not go abroad?

Mr. REED of Pennsylvania. May I say to the Senator from New York that the matter was referred to a subcommittee of which the Senator from Connecticut [Mr. BINGHAM] is chairman. They have held very patient and exhaustive hearings. They have had applications from every variety of relative of every variety of dead and injured and disabled veterans to take a trip to Europe.

The committee are patiently trying to work out something that they think the country will approve. The House passed the bill apparently without a great deal of consideration. The committee is trying to work out a satisfactory measure.

Mr. COPELAND. The Senator from New York does not understand the expression "without consideration." Does the Senator mean without any consideration?

Mr. CURTIS. Mr. President, I demand the regular order.

The PRESIDENT pro tempore. The regular order is demanded. The Senator from Vermont [Mr. DALE] is recognized.

CONSIDERATION OF BRIDGE BILLS

Mr. DALE. On behalf of the Committee on Commerce I report just four more bridge bills. The Senator from Tennessee [Mr. MCKELLAR], the Senator from Mississippi [Mr.

STEPHENS], and the Senator from Ohio [Mr. FESS] are very anxious to get these bills through to-night.

Mr. McKELLAR. I hope the bills on being reported will be put on their passage.

The PRESIDENT pro tempore. Without objection, the reports will be received.

Mr. DALE. From the Committee on Commerce I report back favorably without amendment the bill (H. R. 13141) authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn., and I ask for its present consideration.

There being no objection, the bill was considered as in Committee of Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. DALE. From the same committee I report back favorably, with an amendment to the title, the bill (H. R. 13203) granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a toll bridge across the Cumberland River at or near Burnside, Pulaski County, Ky., and I ask for its present consideration.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The title was amended so as to read: "An act granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a toll bridge across the Cumberland River at or near Burnside, Pulaski County, Ky."

Mr. DALE. From the same committee I report back favorably without amendment the bill (H. R. 12894) to extend the times for commencing and completing the construction of an overhead viaduct across the Mahoning River at or near Niles, Ohio, and I ask for its present consideration.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. DALE. From the same committee I report back the bill (H. R. 13380) authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark., and I ask for its present consideration.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SENATOR EARLE B. MAYFIELD

Mr. THOMAS. Mr. President, I ask unanimous consent to have printed in the RECORD a statement of the junior Senator from Texas, EARLE B. MAYFIELD, in support of his candidacy for reelection to this body.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SENATOR EARLE B. MAYFIELD ANNOUNCES FOR REELECTION—CITES RECORD OF LAWMAKING IN STATEMENT

To the Democrats of Texas:

Through the grace of the Democratic Party of Texas I became United States Senator on March 4, 1923. My present term of office will expire March 3, 1929. I am a candidate for the Democratic nomination of United States Senator, subject to the action of the approaching Democratic primaries in July and August.

I have always held to the theory that a representative of the people should welcome the opportunity of giving an account of his stewardship. As a candidate seeking the Democratic nomination for United States Senator I am willing to stand or fall by the record I have made during the short time I have represented the people of Texas in the United States Senate. In considering my record the people are requested to remember that during the first two years of my term as Senator practically all of my time was consumed in resisting the contest of my election, and I was thus prevented from serving the people of Texas as I could have served had not that unfair and unholy contest been filed.

REPRESENTS ALL CLASSES

When I accepted the Democratic nomination for the office of United States Senator at the Democratic State convention held in the city of San Antonio in September, 1922, I said that I would go to Washington to represent all of the people of Texas, without respect to religious faith or creed. I have scrupulously lived up to that promise. The doors of my office have swung wide open to Protestants and Catholics, Gentiles and Jews, and my services have been given freely to all alike. My greatest ambition has been to render a worth-while service to the State of Texas, and my greatest desire has been to merit the confidence and esteem of the good men and women who honored me with their suffrage. It has been the rule of the Democratic Party of our State, since the days of Sam Houston, to give the incumbent in office a second term, where he has even fairly discharged the duties of his office. I am not seeking the suffrage of the Democrats of Texas upon that basis alone, but I submit that a review of my record will furnish no excuse why I should be made an exception to this time-honored custom of our party.

ALWAYS ON JOB

During my term as Senator, I have not been absent from Washington a single day while the Senate has been in session. I have not been out of my office or the Senate Chamber a single day while the Congress has been in session, except on account of personal sickness or that of some member of my family. I have remained at my post of duty and have undertaken to attend to the business of the people of Texas in a business-like way. Mail coming to my office has been answered promptly and departmental matters have been given my undivided attention. When the Congress has adjourned I have returned to Texas, keeping my office in Washington open during vacation, and at the same time maintaining an office at Austin, in order to give prompt attention to the business of my constituents.

REMAINS AT POST

At a later date I will return home to give a more extended account of my stewardship as your Senator, but I can not get my consent at this time to leave my post of duty when such important measures as farm relief, tax reduction, and flood control are pending in the Congress.

For 15 years our State has been torn asunder by bitter, personal, abusive, mud-slinging campaigns. I will not be a party to the continuation of that character of politics. My campaign will be placed upon a high plane, worthy of the great office of United States Senator. I will discuss measures and not men, principles and not persons, issues and not individuals. With St. Paul I can say, "The power which God has given me I will use to construct and not to tear down." If I can not be reelected United States Senator upon my own merits, surely I do not want to be elected upon the demerits of others, if such they have.

Important legislation is generally formulated in the committees. I am a member of the following committees of the Senate: Agriculture and Forestry, Interstate Commerce, Banking and Currency, Public Buildings and Grounds, Claims, and Interoceanic Canals. At this time Texas is particularly interested in the questions of agriculture, transportation, and finance. Being a member of the committees of the Senate that formulate legislation affecting agriculture, the railroads, and the banks of our State, I submit I am in a position to render greater service to our people than were I not a member of these important committees. As a member of the Committee on Public Buildings and Grounds, I am in a position to render special service to the various cities and towns of our State that need post-office buildings. My membership on the Committee on Claims enables me to give special attention to the claims of our people against the Federal Government. The rule of seniority obtains in the Senate, and I will retain my membership upon the above committees as long as I am a Member of the Senate. A new man would, in all probability, not be appointed to any of these committees.

LAWS HE SPONSORED

I am author of the law that permits the Interstate Commerce Commission to authorize emergency freight rates into drought or flood stricken areas. With this law in effect, the people of a drought or flood stricken area will never suffer on account of high freight rates, as did the farmers suffer in the drought-stricken areas of central Texas in 1925.

I am author of the law that confers power upon the Secretary of War to prescribe just and reasonable tolls for transit over bridges constructed across the Red River, that constitutes the boundary line between Texas and Oklahoma. Under this legislation the tolls over these bridges can be reduced to a just and reasonable basis.

I am author of the law that directs the Secretary of Agriculture to make a general survey of the "carry-over cotton" in the United States, by grade and staple length, separating the low grade, dog-tail, unspinnable cotton from the high grade, commercial, spinnable cotton. When this bill was introduced in the Senate in December, 1926, the price of cotton had reached the lowest point since 1921 and was selling around 10 cents per pound. By the time the bill had been enacted into law the price of cotton had advanced 3 cents per pound, or $15 per bale. Mr. Theodore Price, editor of Commerce and Finance, of New York City, one of the greatest authorities on cotton in the world, is reported as having stated that the reaction to the downward trend in the cotton market in the early months of 1927 was due to this measure. The measure had the support of all the cotton organizations and associations of the South.

WOULD BOOST CONSUMPTION

Believing that one of the best ways to deal with the surplus of any commodity is to bring about an increased consumption of that commodity, I secured the adoption of an amendment to the agricultural appropriation bill in the last Congress, that directed the Secretary of Agriculture to make a scientific investigation into the potential uses of cotton, with a view of bringing about an increased consumption of that commodity. The investigation conducted by Dr. B. Youngblood, formerly of the agricultural and mechanical college of our State, shows that bagging made of low-grade cotton is in every respect preferable to jute bagging. Expert authorities of the Department of Agriculture tell us we would create markets for 2,000,000 bales of cotton, by wrapping the cotton crop of the South with bagging made of low-grade cotton, and by shipping our rice, sugar, salt, corn, bran, oats, cement, potatoes, meats, and such commodities in sacks made of low-grade cotton, instead of burlap sacks made of jute, and by substituting the use of cotton manufactured fabrics. The creation of such markets, says Doctor Youngblood, would bring about an increase of 4 cents per pound in the price of cotton, or $20 a bale, above that which our farmers would receive were the new markets for this additional amount of cotton not created.

REPORTS CUT DOWN

I am coauthor of the law that limits the Department of Agriculture to the issuance of monthly cotton-crop reports instead of semimonthly reports. It is agreed by all that this law has had a sane, constructive effect on the cotton market and has been productive of beneficial results throughout the South.

I am coauthor of the law that amended the interstate commerce act in seven different ways, all of which gave real substantial relief to the shippers of our country and were advocated by every shippers' association in the United States.

I am author of the law that authorized the Secretary of Agriculture to permit the readmission of cattle from Mexico into the State of Texas, under certain regulations. This legislation prevented the confiscation of several thousand head of cattle owned by our Texas cattlemen.

OTHER LEGISLATIVE ACTS

I am author of Senate Resolution No. 40, which directs the Secretary of Agriculture to advise the Senate of the cause of the wide fluctuations in the price of wheat after February 20, 1927. This resolution was strongly supported by the Texas Wheat Growers' Association.

I am author of Senate resolution 152, which provides for the investigation of the affairs of the Federal Reserve Bank of Dallas. The presentation of this resolution was requested by the West Texas Chamber of Commerce and supported by a large number of member banks of the Federal Reserve Bank of Dallas. I am anxious to know why the cotton farmers of Texas, who have excellent security, can not borrow money for less than 5 per cent interest, and only then for a short period of time, and yet our Texas bankers are compelled to ship millions of dollars of our surplus funds to New York City, where it is loaned to New York Stock Exchange speculators at 1¾ per cent interest.

AGAINST SPECULATION

I have given my enthusiastic support to measures introduced in the Senate the purpose of which has been to prohibit gambling in the prices of farm products through futures exchanges. Our cotton farmers will never secure the real worth of their cotton as long as the price is dominated by gamblers on cotton-future exchanges.

I have now pending in the Senate a measure which provides that the United States Government shall bear all expenses incurred in the eradication and control of diseases of livestock and of agricultural pests introduced into the United States from any foreign country. These invasions always affect the common prosperity, constitute a national menace, and threaten the general welfare. Upon the Federal Government alone must rest the responsibility for all such invasions, because the Federal Government has absolute control of quarantine stations and regulations. It should therefore be the policy of the Federal Government to bear the entire expense of eradicating such diseases and pests.

COTTON OIL BILL UP

I have now pending on the Senate Calendar S. 1414, the purpose of which is to place the New York produce exchange and other futures exchanges dealing in cotton-oil option contracts under the jurisdiction of the Secretary of Agriculture. This bill, if enacted into law, would save the cotton farmers and the cotton-oil manufacturers of the South several million dollars every year, because it would free the cotton-oil market from manipulations.

I secured the passage of a measure through this session of the Senate that prohibits predictions with respect to cotton prices, in any report or bulletin issued by the Department of Agriculture or the Department of Commerce. When Secretary Jardine issued a statement last fall, that the future prices of cotton would be lower, he dealt the cotton farmers of the South the severest blow they have received in the last quarter of a century. On December 8 last the Department of Agriculture estimated the 1927 cotton crop at 12,769,000 bales, which was 5,180,000 bales less than the cotton crop of 1926 at the same date. In view of the short crop, the price of cotton should have immediately advanced $5 to $10 a bale, but instead it declined $2 a bale. Why? Because Secretary Jardine drove the supporting influences out of the cotton market and practically destroyed the market for cotton when, without authority at law, he predicted that the future trend of cotton prices would be lower. When this measure is enacted into law never again will our cotton farmers be dealt such a blow as Secretary Jardine gave them last September.

FARM TRAFFIC AID

I supported the Hoch-Smith resolution, which recognized the existing depression in agriculture and directed the Interstate Commerce Commission to make "the lowest possible lawful rates on agriculture, compatible with the maintenance of adequate transportation service."

I have supported all measures providing for future development of agricultural extension work and for the complete development of vocational education in the several States.

Earnestly desiring to secure cheap fertilizer for the farmers of the South, I gave my active support to Senate Joint Resolution No. 46, sponsored by Senator NORRIS, dealing with the disposition of Muscle Shoals. This resolution provides for Government operation of the power plants and also the nitrate fertilizer plants, with the surplus power to be sold and profits utilized for Government manufacture of fertilizer. If the terms of this resolution are faithfully carried out, it will not be long until the farmers of the South will have cheap fertilizer and will no longer be at the mercy of the Fertilizer Trust.

FAVORS PENSIONS

I supported actively the legislation that granted increased pensions to certain soldiers and sailors of the war with Spain and the Philippine insurrection.

I introduced in the Senate at this session of the Congress Joint Resolution No. 25, which declares the 11th day of November, celebrated and known as "Armistice Day," as a legal public holiday. This resolution has the indorsement of many of the American Legion posts.

After becoming United States Senator on March 4, 1923, my first official act was to call upon General Hines, Director of the United States Veterans' Bureau, for the purpose of urging him to favor the proposition of the Federal Government purchasing the American Legion hospital at Kerrville, Tex. I am glad to be able to say that this conference culminated in the taking over of the Kerrville Hospital by the United States Government. From that time down to the present hour I have welcomed the opportunity of serving our World War veterans. It has been my pleasure to give 100 per cent support to the legislative program as sponsored by the American Legion.

FOR TIGHT ALIEN REIN

I have not wavered in my support of measures the purpose of which has been to tighten up our immigration laws. I believe in keeping America absolutely Anglo-Saxon. I supported the amendment to our immigration laws providing for the exclusion of the Japanese and also voted for an amendment which, if adopted, would have prohibited all immigration for a period of five years. I believe preference should be given to immigrants who have been raised on a farm and who will agree to work on the farms in the United States. I supported the amendment to our immigration laws which, though not increasing the quota, gave preference to members of separated families.

I believe with all my heart in the provision written into the Clayton antitrust law by my illustrious predecessor that "the labor of a human being is not a commodity or article of commerce." My record upon labor measures during my first term as United States Senator has been just the same as it was when I was a member of the Texas State Senate and a member of our railroad commission. In a letter to me dated March 16, 1928, transmitting my labor record, as taken from the CONGRESSIONAL RECORD and compiled in the office of the National Legislative and Information Bureau at Washington, Arthur J. Lovell, vice president of the Brotherhood of Locomotive Firemen and Enginemen and national legislative representative, said: "You will observe your record has been 100 per cent, so far as we are concerned."

FOR DRY STATUTES

I have supported every measure coming before the Senate during my term of office, the purpose of which was to strengthen our prohibition laws and uphold the Federal Constitution. An editorial in the Home and State (March, 1927), speaking of my prohibition record, said: "From Dr. F. Scott McBride, general superintendent of the Anti-Saloon League of America, we quote as follows: 'I have been very much pleased at the aggressive attitude taken by Senator MAYFIELD from your State, in relation to our prohibition legislation. Of course, our great leader, Senator SHEPPARD, is always active and always willing to help. We are greatly indebted to Texas for the aggressive attitude of your Senators.'"

I received a letter from Hon. Wayne B. Wheeler, general counsel and legislative superintendent of the Anti-Saloon League of America, dated March 4, 1927, in which he said:

"At the close of another session let me thank you again on behalf of the various church denominations, which we represent, for the splendid support you have given legislation necessary to enforce the eighteenth amendment, also for your support of the cloture rule, without which the reorganization-civil service bill could never have been passed. The great body of voters in your State who believe in the eighteenth amendment and its enforcement will appreciate your loyal support of this cause."

FOR BETTER MAILS

I have given my enthusiastic support to all legislation affecting the interest of city, town, and rural letter carriers and also the railway mail carriers. I have also given my hearty support to all legislation which proposes to restore the postal rates on newspapers to the 1920 basis.

Since I have been Senator I have supported revenue measures which reduced Federal taxes $859,000,000, and I am giving my enthusiastic support to the tax measure now pending in the Senate, which will reduce taxes something like $275,000,000. I voted against amendments that would have placed a tax on drafts and checks given by the people and also voted against the amendment that would have taxed telephone and telegraph messages. I have voted all along to repeal the wartime nuisance taxes, including the tax on admissions and the automobile tax.

I have voted for all motions and resolutions offered in connection with the investigation of the leases of the naval oil reserves (Teapot Dome and Elk Hills) and for the annulment of the lease to the Mammoth Oil Co., a subsidiary of the Sinclair Oil Co.

AGAINST WARREN

I voted for the resolution to investigate the administration of the Department of Justice as administered by Harry M. Daugherty, Attorney General, which not only brought about Daugherty's resignation as Attorney General but also the resignation of William J. Burns, head of the bureau of investigation under Daugherty, and the resignation, prosecution, and conviction of A. E. Sarpain, warden of the Atlanta Penitentiary. I voted for the motion to consider in the open Senate the nomination of Charles B. Warren to succeed Daugherty as Attorney General and subsequently voted against the confirmation of Warren. I voted for the resolution requesting President Coolidge to demand the resignation of Mr. Denby, Secretary of the Navy, on account of his connection with the leasing of the naval reserves.

I supported actively Senate bill 1095, the purpose of which is to drive from the United States Capitol the unscrupulous, dishonest lobbyist who is falsely representing that he can improperly influence Senators and Congressmen.

FOR DEBT PAYMENTS

I voted against all foreign debts settlement measures because the settlements have practically amounted to cancellations, and I am unalterably opposed to the cancellation of the debts due the United States by foreign countries.

I supported Senate Resolutions 195, 227, 258, and 324 that created a special committee—the Reed committee—to investigate senatorial campaign contributions and expenditures.

I have given my enthusiastic support to every measure coming before the Senate which had for its purpose the development, maintenance, and improvement of the military posts of Texas.

I supported Senator ROBINSON'S [Arkansas] resolution declaring it to be the sense of the Senate that the controversies between the United States and Mexico should be submitted to arbitration. I believe in the self-determination of all nations, whether large or small, and therefore am unalterably opposed to any country interfering with the internal and domestic affairs of another.

FOR HOUSTON CHANNEL

I have never neglected an opportunity to urge the necessity of needed appropriations for the Houston Ship Channel, and additional appropriations for all the various ports of Texas. I appeared before the Rivers and Harbors Committee of the House and made an argument for the completion of the intracoastal canal, showing the great relief that the construction of this project would bring to the people of Texas in the way of reduced freight rates.

I have given my enthusiastic support to legislation providing Federal aid for the improvement of our public highways and for the study and investigation of improved methods of road construction which directly benefits all the people, irrespective of occupation. I have strenuously resisted the efforts of Senators representing Northern States, that had already completed their road-construction program, to do away with Federal aid for the improvement of public highways.

BACKS MERCHANT MARINE

I supported actively Senate bill 744, the purpose of which is to expand the American merchant marine and to maintain it under Government control. This measure contains a provision which will prevent the development of a monopoly in shipping by prohibiting the sale of a ship to private interests except by the unanimous vote of the Shipping Board. I have always advocated a merchant marine sufficient to carry American commerce, thereby providing for our farmers a fixed and certain market for their products.

I have given my enthusiastic support to every measure coming before the Senate during my term of office relating to irrigation and reclamation projects.

As a member of the Committee on Claims of the Senate I have given prompt attention to the claims of all citizens of Texas against the Federal Government. It was my pleasure to report to the Senate the bill that gave relief to the widows and orphans of the men killed and wounded in the Houston riot, precipitated by negro soldiers stationed in that city during the war.

FARM PROBLEM VITAL

The restoration of the rights of the States to regulate purely intrastate commerce and the placing of agriculture upon a permanent, remunerative basis are the biggest economic questions before the American people to-day and will, therefore, constitute the paramount issues in my campaign for the Democratic nomination of United States Senator. The policy of permitting the Interstate Commerce Commission to regulate commerce wholly within a State brings into issue the entire subject of the relative functions of the State and the Nation in our scheme of government as applied to our industrial affairs and focuses attention on the wisdom of our dual form of government. If my candidacy for reelection to the Senate means anything it means a continuation of the fight which I have been making for the constitutional rights of the State of Texas. It's the people's battle that I am waging to determine whether their rights to regulate the railroads wholly within their State shall be permanently denied. To do this means to give 11 men in Washington absolute control not only over commerce between the States, but also over commerce wholly within the States, and surely such a policy is contrary to the spirit and genius of our institutions and destructive of our dual form of government.

TOO MUCH INTERFERENCE

The Esch-Cummins law not only clothes the Interstate Commerce Commission with power to make freight rates applicable to commerce moving wholly within the State of Texas, but the act nullifies practically every statute in our State regulating railroads. It destroyed the Hogg stock and bond law, under which the Texas railroad commission regulated the amount of securities a railroad could issue. It destroyed the statute providing 3 cents per mile as the maximum charge for passenger fares in Texas. It destroyed the statute providing that when once a railroad had been constructed in Texas it could not be abandoned until the consent of the legislature had been secured.

It destroyed that provision of our State constitution which forbids the consolidation of parallel and competing railroads. It destroyed that provision of our State constitution which gave any railroad corporation or association the right to construct and operate a railroad between any points within the State of Texas. However urgent the need of a railroad between two or more communities in our State, not one foot of railroad can be constructed under the Esch-Cummins law until the consent of the Interstate Commerce Commission at Washington has been secured.

PRODUCT OF RAILROADS

The Esch-Cummins Act is the product of the railroads. They succeeded in writing into it everything they desired at the time it passed the Congress, but for the last three years they have been clamoring for additional legislation that would permit the gigantic consolidation of all of the railroads of the United States into 15 or 20 groups.

Under the proposed railroad consolidation measures State charters would be replaced by Federal charters, and this would finally force all railroad litigation into the Federal courts. Moreover, under the proposed legislation the railroads could repudiate their contractual and statutory obligations to the various communities in the several States from which they have received large sums of money and valuable land donations in consideration that they would maintain their shops and general offices in certain communities. The transportation issue is, therefore, of paramount importance and can not be minimized.

ABUSE STATE RIGHTS

Substantial relief can not be secured for our people until the Esch-Cummins Act has been so amended as to restore to the States exclusive power to authorize new railroad construction within their respective boundaries, and until the rate-making section of the act has been repealed, and the Congress has defined the powers of the Interstate Commerce Commission, so that it can not destroy the rate-making functions of the States as it did in the Shreveport rate case. I secured the passage of a measure twice through the Senate giving railroads the right to extend their lines into the undeveloped sections of Texas without being compelled to secure the permission of the Interstate Commerce Commission, but the measure was sandbagged in the Committee of Interstate Commerce of the House of Representatives.

This was the first decentralizing power measure that has passed the Senate in the last 50 years. At the time I first passed this measure through the Senate there were pending before the Interstate Commerce Commission applications for permission to construct 981.11 miles of new

railroad in Texas, representing an expenditure of something like $50,000,000, and if my measure had not been given knockout drops in the Interstate Commerce Committee of the House, railroads would now be under construction into many sections of our State that are totally without transportation facilities.

WOULD RESTORE POWER

I now have pending in the Senate a measure which, if enacted into law, would restore to the States the rate-making powers they possessed before the enactment of the Esch-Cummins law and before the decision in the Shreveport rate case. During the Sixty-ninth Congress I offered this bill in the form of an amendment to the McNary farm relief bill, but it was defeated by 8 votes, which was the smallest vote by which any of the amendments to this bill were defeated. If the people of Texas will honor me with a second term in the United States Senate, and the politicians will cease their warfare upon me for only a limited time, I am willing to give bond that I will secure the enactment of both of these measures into law, and our people will then be given the relief to which they are justly entitled and the States will have restored to them the rights they reserved when they came into the Union.

FARMER BADLY TREATED

Of no less importance to the stability of the Nation is the placing of agriculture upon a permanent, remunerative basis. In order to make secure the future of our Government action by the Congress along two general lines is necessary. In one direction we must modify our national policies, which operate to the disadvantage of the farmers. We should recast the provisions of the tariff with a definite view to improve the relative position of agriculture and livestock, in comparison with other groups. There should be no discrimination between raw materials and finished products in the raising of revenue.

A competitive tariff would give our farmers and livestock men a tariff on their raw products sufficiently high to equalize the difference in the cost of production of raw products in foreign countries that employ pauper labor. The farmers' share of the national freight bill is disproportionately heavy and should be reduced at the earliest possible moment. Manipulation of the prices of farm products through future exchanges should be prohibited at once. But when these and other reforms have been accomplished, the great task is still to be done. That task is to provide a method by which our farmers will be able to handle their crop surpluses for their own benefit, rather than to continue a system under which the surpluses enrich others at their expense.

UNITED STATES ONLY COTTON SURPLUS

The only country that produces a surplus of cotton is the United States, and whenever there is world surplus it is produced by our country. The surplus therefore determines the price. If we could withdraw from the market the temporary surplus of cotton raised in the United States and hold that surplus until it is needed, we would then regulate the supply with the demand and thereby stabilize the price of cotton upon the basis of the supply not exceeding the demand. It is therefore apparent that the one thing needed in the South to-day is the establishment of the machinery by which we can retire a temporary surplus of cotton from the market and hold that surplus until it is needed. This is the aim and purpose of the McNary farm measure, for which I voted three times in the Senate.

The Federal Government has spent multiplied millions of dollars in encouraging our farmers to a greater production. From its Treasury has flowed untold millions for reclaiming swamp lands, for irrigating arid lands, for destroying agricultural pests and insects, all of which have resulted in an increased production, and yet the Government has left our farmers without the machinery by which at least a moderate surplus can be carried forward until it is needed.

ABOUT EQUAL

Investigations have shown that there is no such thing as maintaining a surplus of cotton over a period of five years. One year there is a surplus, but the next year it is wiped out by droughts, floods, or by the boll weevil and the bollworm. So it has been demonstrated that in a period of five years supply and demand are equalized. While occasionally we produce more cotton in one year than the world can consume in one year, yet we have never produced over a period of five years more cotton than the world needed and could consume during that time. The "carry-over" from year to year is not a true surplus; it is merely that part of the crop not temporarily needed but which will be needed to supply a deficiency in the years of smaller production.

If the McNary measure had been in effect in September, 1926, the cotton farmers of the South would have been saved not less than $600,000,000, and the truth of the statement is easily established. When the farmers began marketing their cotton in the early part of September, 1926, the price of middling cotton was around 20 cents per pound. About that time it was reported that there would be a surplus of 3,000,000 bales of cotton, and down went the price to 10 cents per pound within 30 to 60 days.

SURPLUS THEORETICAL

If the McNary farm measure had been in effect at that time, the Federal farm board would have come to the rescue of the cotton farmers of the South and retired about 2,000,000 bales of the purported surplus from the market and our farmers would undoubtedly have received 20 cents a pound for their cotton. Why? Because that was the price of cotton about June 1, 1927, and we had not produced one single bale of cotton in addition to the 1926 crop.

While the cotton crop of 1926 was in the hands of the farmers it was a purported surplus that sent the price down to 10 cents per pound, but as soon as the farmers had sold their cotton and it had become the property of others, the surplus disappeared and the price steadily advanced until it reached 20 cents per pound by June 1, 1927.

The South produces a world necessity and should be the richest spot on the face of the globe, and yet our farms are plastered with mortgages and our people are impoverished and discouraged. Why? Because our farmers have not received governmental aid and protection.

ALL OTHERS PROSPEROUS

The railroads are prosperous, the public utilities are prosperous, manufacturing is prosperous, and so is organized labor. Why? Because they have been given governmental aid, supervision, and protection. If it is a sound public policy for the Government to protect the railroads that haul the farmers' cotton and the manufacturers that spin and weave it, I submit that it is a sounder public policy to protect the farmers that produce the cotton for the protected railroads to haul and which the protected manufacturers weave and spin.

It seems to me that if our Government can afford to make outright gifts of $30,000,000 for the relief of people in foreign nations and a straight-out subsidy of $529,000,000 to the railroads, and then is generous enough to loan over two and one-half billion dollars to foreign nations after the war was over, it certainly can afford to loan our farmers $400,000,000 by which they can free themselves from industrial slavery. When I return home to campaign the State I will be glad to give my view more fully on these two most important questions.

RECALLS CONTEST

The good people of Texas have not forgotten that I was practically robbed of the first two years of my term in the Senate by the filing of the contest of my election. A subcommittee of the Committee on Privileges and Elections of the Senate, composed of three Republicans and two Democrats, for a period of 23 months, conducted the investigation of my election to the Senate and reported unanimously to the full committee that the charges against me had not been sustained. The full Committee on Privileges and Elections, composed of seven Republicans and six Democrats, reported unanimously to the Senate that I was entitled to my seat, and the United States Senate, composed of 53 Republicans and 43 Democrats, unanimously adopted the report of the full committee.

Never in the history of contested-election cases in the United States Senate was there such a unanimity of opinion; but, nevertheless, the contest literally robbed me of the first two years of my term in the Senate. I am now asking the Democrats of Texas to give me a full term in the Senate, where, unmolested or harassed by unscrupulous politicians, I can dedicate my entire efforts to the unselfish service of my native State. All I ask is a fair chance.

WIFE SHADOWED

The Democrats of Texas are fair-minded people and will mete out exact justice to everyone. I know my appeal will not be denied. From the time I received the Democratic nomination for United States Senator in 1922 until the United States Senate in February, 1925, unanimously decided the contest of my election in my favor, I was hounded and pursued by my enemies without shadow or turning. At every opportunity they thrust their poisonous spears into my side. During the long-drawn-out contest I practically slept on a bed of thorns. Detectives even followed Mrs. Mayfield as, in company with the wives of other Senators, she returned the social calls of her friends, and they followed me day and night. My mind went whirling around like a potter's wheel, and I often wonder how in the world I escaped the asylum. I could not possibly have borne all that came to me during those years had it not been for that help that comes from above? yielded to man through prayer.

NO MALICE IN HEART

It may be that I was permitted to pass through that Gethsemane in order that I might be prepared to more truly appreciate the sufferings that come to so many of our people. My troubles, however, were not without their recompense, because I learned from actual experience that God never sends us a cross to bear that He does not provide a Cyrenian to help us carry it.

There are scars, but no malice in my heart. With an abiding confidence in the justice of the people and with their interests to lead me "as a cloud by day and a pillar of fire by night," upon the record herein reviewed I shall prosecute my candidacy for the Democratic nomination for United States Senator, subject to action of the approaching Democratic primaries.

SALARIES OF TERRITORIAL JUDGES

Mr. BINGHAM. Mr. President, some time ago the Senator from Utah [Mr. KING] objected to Calendar 1292, the bill (H. R. 11463) to fix the salaries of certain judges of the Terri-

tories and insular possessions of the United States. A House bill increasing the salaries of certain judges in Porto Rico, at the expense of Porto Rico, was passed some time ago. A delegation has been to see me several times urging that the bill be passed. The bill is now in the hands of the Judiciary Committee. I ask unanimous consent that the Judiciary Committee may be discharged from the further consideration of the bill and that the bill may be laid before the Senate for immediate consideration.

Mr. KING. I have no objection, except that I shall vote against the bill.

Mr. ROBINSON of Arkansas. Mr. President, may I inquire if the Judiciary Committee considered the bill and reported on it?

Mr. BINGHAM. The bill for which I am now asking consideration is a part of the bill (H. R. 11463) which the Judiciary Committee has already reported. The Senator from Utah objected to the consideration of the entire bill, but does not object to the consideration of that particular part of it which is a separate bill.

Mr. BLAINE. Mr. President, may I inquire what insular possession it affects?

Mr. BINGHAM. Porto Rico.

Mr. BLAINE. The Committee on the Judiciary has considered the salaries of several of the judges of the several insular possessions. I think it would be unfair to consider the salary of the judges of only one of the possessions under the circumstances. I believe we ought to consider them all at the same time, under the same bill, as reported by the Judiciary Committee.

The PRESIDENT pro tempore. Objection is made.

RECESS

The PRESIDENT pro tempore. The hour of 10.30 o'clock having arrived, under the unanimous-consent agreement previously entered into, the Senate will stand in recess until 11 o'clock a. m. to-morrow.

Thereupon the Senate (at 10.30 p. m.), in accordance with the order previously entered, took a recess until to-morrow, Thursday, May 24, 1928, at 11 o'clock a. m.

NOMINATIONS

Executive nominations received by the Senate May 23 (legislative day of May 3), 1928

UNITED STATES DISTRICT JUDGE

William B. Lymer, of Hawaii, to be United States district judge, district of Hawaii, vice John T. De Bolt, term expired.

UNITED STATES ATTORNEY

Ross R. Mowry, of Iowa, to be United States attorney, southern district of Iowa. A reappointment, his term having expired.

POSTMASTERS

CALIFORNIA

Marion W. Bessom to be postmaster at Lawndale, Calif., in place of M. W. Bessom. Incumbent's commission expires June 5, 1928.

Clyde W. Holbrook to be postmaster at Venice, Calif., in place of C. W. Holbrook. Incumbent's commission expires June 5, 1928.

COLORADO

Oscar L. Morris to be postmaster at La Salle, Colo., in place of O. L. Morris. Incumbent's commission expires May 26, 1928.

CONNECTICUT

Margaret C. Kelly to be postmaster at Noroton, Conn., in place of M. C. Kelly. Incumbent's commission expired December 19, 1927.

GEORGIA

Ella M. Withrow to be postmaster at Odum, Ga. Office became presidential April 1, 1921.

IDAHO

Leslie A. Baskett to be postmaster at Nez Perce, Idaho, in place of C. B. Billups, removed.

INDIANA

Pearl B. McCord to be postmaster at Winslow, Ind., in place of Leroy Dearing. Incumbent's commission expired February 8, 1928.

KANSAS

Nettie P. Anderson to be postmaster at Hudson, Kans., in place of G. E. Smith, removed.

Walter M. Wheatcroft to be postmaster at Utica, Kans., in place of W. E. Traylor, removed.

KENTUCKY

James I. Harlan to be postmaster at Barlow, Ky., in place of J. I. Harlan. Incumbent's commission expires June 6, 1928.

MASSACHUSETTS

John A. Bell to be postmaster at Leicester, Mass., in place of J. A. Bell. Incumbent's commission expired May 20, 1928.

Aloysius B. Kennedy to be postmaster at Rochdale, Mass., in place of A. B. Kennedy. Incumbent's commission expired December 18, 1927.

MINNESOTA

Charles L. Coy to be postmaster at Alexandria, Minn., in place of R. K. Brough. Incumbent's commission expired December 4, 1926.

MISSOURI

Charles H. Duncan to be postmaster at Tarkio, Mo., in place of C. H. Duncan. Incumbent's commission expired January 14, 1928.

NEW HAMPSHIRE

John H. Garvin, jr., to be postmaster at Sanbornville, N. H., in place of J. H. Garvin, jr. Incumbent's commission expires June 6, 1928.

NEW YORK

Mabel L. Morse to be postmaster at Portland, N. Y., in place of G. W. Fuller. Incumbent's commission expired January 8, 1928.

OKLAHOMA

Lee Hilton to be postmaster at Barnsdall, Okla., in place of Lee Hilton. Incumbent's commission expires June 4, 1928.

OREGON

William D. Hardesty to be postmaster at Freewater, Oreg., in place of W. D. Hardesty. Incumbent's commission expires June 6, 1928.

PENNSYLVANIA

Clyde S. McNeely to be postmaster at Dauphin, Pa., in place of C. S. McNeely. Incumbent's commission expired February 15, 1928.

Glenn V. Rice to be postmaster at Eldred, Pa., in place of G. V. Rice. Incumbent's commission expired January 16, 1928.

John H. Lyter to be postmaster at Elizabethville, Pa., in place of J. H. Lyter. Incumbent's commission expires June 6, 1928.

Thomas W. Watkins to be postmaster at Frackville, Pa., in place of T. W. Watkins. Incumbent's commission expired March 21, 1928.

Homer D. Sarge to be postmaster at Pine Grove, Pa., in place of H. D. Sarge. Incumbent's commission expires June 6, 1928.

William W. Thorn to be postmaster at St. Clair, Pa., in place of W. W. Thorn. Incumbent's commission expired February 29, 1928.

Homer B. Asheld to be postmaster at Tunkhannock, Pa., in place of May Hoadley. Incumbent's commission expired January 22, 1928.

Leon E. Mayer to be postmaster at Boyertown, Pa., in place of L. F. Gilbert, deceased.

TENNESSEE

Jesse W. Alexander to be postmaster at Carthage, Tenn., in place of F. S. Pickering. Incumbent's commission expired February 8, 1927.

TEXAS

Azro C. Oyler to be postmaster at Edinburg, Tex., in place of E. S. Dougherty. Incumbent's commission expired March 3, 1927.

Helen Newton to be postmaster at Morgan, Tex., in place of Helen Newton. Incumbent's commission expired December 19, 1927.

WASHINGTON

William F. Cantrell to be postmaster at Toppenish, Wash., in place of J. A. White, deceased.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 23 (legislative day of May 3), 1928

DIRECTOR OF WAR FINANCE CORPORATION

George R. Cooksey.

JUDGE OF THE MUNICIPAL COURT OF THE DISTRICT OF COLUMBIA

Robert E. Mattingly to be judge of the municipal court, District of Columbia.

UNITED STATES CIRCUIT JUDGES

Xenophon Hicks to be United States circuit judge, sixth circuit.

John H. Cotteral to be United States circuit judge, eighth circuit.

UNITED STATES ATTORNEY

Lewis L. Drill to be United States attorney, district of Minnesota.

REAPPOINTMENTS IN THE ARMY

OFFICERS' RESERVE CORPS

Thomas Edward Hambleton to be brigadier general, Adjutant General's Department Reserve.

Edward Orton, jr., to be brigadier general, Auxiliary Reserve.

PROMOTIONS IN THE NAVY

To be commander

Alger H. Dresel.

To be lieutenant commander

Joseph W. Gregory.
Robert Stanley Robertson, jr.

To be lieutenant (junior grade)

Robert H. Keliher.

To be surgeon

Thomas H. Taber.

To be chief pay clerks

Ole R. Vikre.
Jared R. Huggett.
Robert I. Baxter.
Thomas A. Grigsby.

POSTMASTERS

FLORIDA

Gladys F. Tierney, Hialeah.

IOWA

Frank C. McClaskey, Toledo.

KANSAS

Charles T. Murray, Isabel.
Charles J. Roy, Wilsey.

KENTUCKY

Edna W. Morin, Alexandria.
John P. Lawton, Central City.
John M. Burkholder, Crofton.
Edgar Renshaw, Hopkinsville.
Trilby A. Russell, Kevil.
Gertrude Berry, La Center.
Ruby M. Wood, Salt Lick.

MAINE

Henry W. Perry, Fort Fairfield.
Stella L. Hill, Northeast Harbor.

MISSISSIPPI

Mary R. Nettles, Duncan.
William L. Jansen, Okolona.

MISSOURI

George R. Steiner, Belle.
John B. Wilson, Maysville.

NEBRASKA

George W. Nicholas, De Witt.
Thomas Werner, Humphrey.

NEW HAMPSHIRE

Everett F. Tozier, Salmon Falls.

OHIO

Earl W. Starkey, Flushing.
Henrietta Bennett, Tippecanoe City.

PENNSYLVANIA

William C. Drager, Boiling Springs.
Ruth S. Waters, Dallas.
Samuel M. Carnell, Dott.
Ray K. Garmen, Lemoyne.
Maurice G. Coffey, Mill Hall.
Teresa G. Burke, Renova.
Laura C. Ehler, Shippenville.
Martin T. Weaver, Strasburg.
Jerold J. O'Connell, Valley Forge.

TEXAS

Charles A. Quails, Post.
Ben M. Vick, Valentine.

UTAH

William S. Anderson, Moroni.
Hans P. Ipson, Panguitch.

WISCONSIN

Gertrude C. Grinde, Dallas.
Frederic D. Keithley, Land O'Lakes.

HOUSE OF REPRESENTATIVES

WEDNESDAY, *May 23, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father of mercies, Thou art the true source and rule for our essential and practical lives. For all that Thou hast wrought of comfort, of peace, and warmth of heart we thank Thee. Forgive our feverish anxieties, our inconstant wills that render duty a sluggish burden. Bless us with minds calmed and fortified by moments of withdrawal which permit God to speak to our souls. Let us fold away old sorrows, old doubts, and old conflicts; let them leave a slight memory while we share the more blessed things of life. Touch the divine which is imprisoned in every breast and bring to life its trembling note, and may we hear the song that was meant to be. Shield our country against all wrong and injustice, and may it always be a defender of the helpless, an example for the oppressed, and a Christian light for all the world. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate agrees to the amendment of the House of Representatives to the bill (S. 1145) entitled "An act to authorize an appropriation for roads on Indian reservations."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5898) entitled "An act to authorize certain officers of the United States Navy and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered."

The message further announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11134) entitled "An act to authorize appropriations for construction at military posts, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12381) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors."

The message further announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House of Representatives to the joint resolution (S. J. Res. 23) entitled "Joint resolution providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779."

The message also announced that the Senate had passed bills, a joint resolution, and a concurrent resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 1965. An act to authorize the appointment of a district judge for the northern district of Mississippi;

S. 2372. An act to amend section 201, subdivision (1), of the World War veterans' act, 1924, as amended;

S. 4148. An act authorizing and directing the Secretary of War to grant certain land to the city of St. Paul, State of Minnesota;

S. 4465. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across White River at or near Clarendon, Ark.;

S. 4503. An act authorizing the Secretary of War to convey the Fort Griswold tract to the State of Connecticut;

S. J. Res. 142. Joint resolution authorizing the erection of a Federal reserve bank building in the city of Los Angeles, Calif.; and

S. Con. Res. 21. Concurrent resolution recalling S. 3752 for correction.

The message further announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 10014. An act for the relief of A. F. Gallagher;

H. R. 12676. An act to amend section 2 of an act approved February 14, 1926, granting consent of Congress for the construction of a bridge across Red River at or near Fulton, Ark.;

H. R. 12677. An act to amend section 2 of an act approved March 12, 1928, granting consent of Congress for the construction of a bridge across the Ouachita River at or near Calion, Ark.;

H. R. 13342. An act to authorize a per capita payment to the Pine Ridge Sioux Indians of South Dakota; and

H. R. 13481. An act granting the consent of Congress to the Alabama State Bridge Corporation to construct, maintain, and operate bridges across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama.

The message also announced that the Senate had resolved that the report of the committee of conference on the disagreeing vote of the two Houses on the amendment of the House of Representatives to the joint resolution (S. J. Res. 46) entitled "Joint resolution providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes," be recommitted to the committee of conference.

INDEBTEDNESS OF AUSTRIA TO THE UNITED STATES

Mr. SNELL, from the Committee on Rules, presented the following resolution for printing under the rule:

House Resolution 221

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H. J. Res. 247, to authorize the Secretary of the Treasury to cooperate with the other relief creditor governments in making it possible for Austria to float a loan in order to obtain funds for the furtherance of its reconstruction program, and to conclude an agreement for the settlement of the indebtedness of Austria to the United States. That after general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by those favoring and opposing the bill, the bill shall be read for amendment under the five-minute rule. At the conclusion of the reading of the bill for amendment the committee shall arise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and the amendments thereto to final passage without intervening motion except one motion to recommit.

RETIREMENT OF EMPLOYEES IN THE CLASSIFIED CIVIL SERVICE

Mr. SNELL, from the Committee on Rules, presented the following resolution for printing under the rule:

House Resolution 222

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of S. 1727, to amend the act entitled "An act to amend the act entitled 'An act for the retirement of employees in the classified civil service, and for other purposes,' approved May 22, 1920, and acts in amendment thereof," approved July 3, 1926, as amended. That after general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by those favoring and opposing the bill, the bill shall be read for amendment under the five-minute rule. At the conclusion of the reading of the bill for amendment the committee shall arise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and the amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. BANKHEAD. Mr. Speaker, I would like to state that a great many Members of the House have inquired of me, as a member of the Rules Committee, what has been done with the Dale bill. The rule which has just been presented simply provides for the consideration of the House amendments to the Dale bill, which is the civil service retirement bill, so the same subject matter is involved.

Mr. SNELL. The gentleman's statement is correct.

MY PROHIBITION RECORD

Mr. BLACK of Texas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on my prohibition record in Congress.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. BLACK of Texas. Mr. Speaker, at the outset of this extension of remarks I want to say a few words about the responsibility which I think should govern a candidate for public office in stating facts to the people. It is my view that when a candidate for public office publishes literature in his campaign or makes speeches to the people he should use the utmost care to state his facts correctly. It is all right for him to make any kind of an argument that he wants to make. For if he states the facts correctly the people will be able to properly appraise his argument. But if he knowingly states his facts falsely or states them in a way to mislead his hearers, the people are deceived and he is not entitled to their confidence. He is not a truthful man. The most important qualification for any public official is to be a truthful and an honest man.

The purpose of this extension of remarks is to give the correct facts about my prohibition record. I am anxious that my constituents, whether they be for prohibition or against it, shall know exactly where I stand. I respect the opinions of others and I ask the same consideration for myself. In a statement published in the CONGRESSIONAL RECORD April 28, 1928, I included the following letter from the late Wayne B. Wheeler written me on June 7, 1924:

Hon. EUGENE BLACK, M. C.,
Washington, D. C.

DEAR MR. BLACK: At the close of another session of Congress I want to thank you for the splendid cooperation and help you have given in maintaining prohibition and its enforcement through national legislation. Our opponents are planning to defeat Congressmen with dry records in the hope that it will prevent their successors from following their example. The people of your district stand for law enforcement, and I feel sure they will not allow you to suffer because of the splendid record you have made.

Yours cordially,

W. B. WHEELER.

In discussing this letter, which I printed, my opponent for renomination, in a printed circular which he is widely distributing in the congressional district which I have the honor to represent, makes the following statement, which I quote exactly as it was printed:

Mr. BLACK has made the wet Democrats believe that he was against the Volstead Act and was very liberal in his prohibition views, but now he is trying to make the dry Democrats believe that he is ultradry and has been acting in accord with the late Wayne B. Wheeler, president of the Anti-Saloon League, and cites evidence that Mr. Wheeler commended him one time, June 7, 1924. The letter quoted by him was written just two days after Mr. BLACK had voted for a bill in accordance with Mr. Wheeler's wishes. After that, however, and before Mr. Wheeler died, Mr. BLACK cast two important ballots contrary to Mr. Wheeler's wishes and against the cause he represented. Mr. Wheeler's lips being sealed with death can not defend himself when a letter is presented that would meet with his displeasure, and would cause a prompt explanation if he were living.

The above charge is ridiculously untrue, as I shall presently show. What ballots did I so cast? When were they cast? The statement does not say. I challenge anyone, I care not who he is, to point to any such ballots that I cast either before or after Mr. Wheeler's death. I have cast no such ballots. I was last elected to Congress in November, 1926, and on November 8, 1926, I received the following letter from Mr. Wheeler:

DEAR MR. BLACK: Congratulations on your election. Your splendid record is ample justification for the confidence which the people have in you. It is heartening to the friends of the eighteenth amendment to know that for the eighth time under national prohibition the people have by overwhelming majorities in national primaries and elections sustained Senators and Congressmen who stand for the maintenance and enforcement of prohibition.

Anticipating the pleasure of seeing you at the Capital in the near future, I am

Yours very cordially,

W. B. WHEELER.

This letter was written only a few months prior to Mr. Wheeler's death, September 5, 1927. After Mr. Wheeler's death Dr. F. Scott McBride took up his work and became the general superintendent of the Anti-Saloon League of America. On April 5, 1928, less than two months ago, Doctor McBride wrote me the following letter:

DEAR MR. BLACK: I have looked over your record as Congressman from the first district in relation to prohibition measures.

You have served the district since 1915 and have voted consistently for all prohibition measures. While you were unintentionally absent on one occasion when the national prohibition act was voted upon, yet you were present and voted for the measures concerning it and voted for it on its final passage over the President's veto on October 27, 1919, which was the real test as to that measure. This gives you a splendid record on prohibition measures.

I am glad to report to you this record, and I congratulate you on this splendid service on behalf of this cause.

Very sincerely yours,

F. SCOTT MCBRIDE,
General Superintendent.

I had no thought of publishing these letters from Mr. Wheeler and Doctor McBride until my opponent attacked my prohibition record and made statements about it which are wholly untrue.

If a Member of Congress like myself who voted to submit the prohibition amendment and then voted for the Volstead Act to enforce it, and has resisted every effort to weaken prohibition enforcement, has not the record of a prohibitionist, then I do not know what it takes to make that kind of a record. The people are entitled to know the facts, and that is the purpose, and only purpose, of this statement in the CONGRESSIONAL RECORD.

Having submitted these facts, I now leave the matter to the judgment of the people.

THE VETO

Mr. CANNON. Mr. Speaker, I ask unanimous consent to proceed for one-half minute and to revise and extend my remarks.

The SPEAKER. The gentleman from Missouri asks unanimous consent to address the House for one-half minute and to revise and extend his remarks. Is there objection?

There was no objection.

Mr. CANNON. Mr. Speaker, the President in an interview published in this morning's papers declares that the McNary-Haugen bill is unconstitutional and announces that he—

is willing to approve a bill for relief of farmers framed in accordance with suggestions embodied in his annual messages to Congress.

In other words, he proposes to usurp the duties of the legislative branch of the Government in writing the bill and the prerogatives of the judicial branch of the Government in determining its constitutionality. He demands the right to indict the law, to construe the law, and to execute the law. In all the history of medieval autocracies no absolute monarch claiming to rule by divine right ever asked more than that.

The framers of the Constitution wisely provided that there should be three branches of Government—the legislative, the executive, and the judicial. The duties of each are clearly defined and the encroachment of any one of the three on the prerogatives of the other two is jealously guarded against by the provisions of that immortal document. And yet in this authorized interview appearing this morning in every daily paper in the land the executive branch of the Government seriously proposes to impose its interpretation of the constitutionality of the pending bill in preference to submitting it to the Supreme Court, and to dictate to the legislative branch of the Government a new bill to take its place. Why a Congress to enact laws or a Supreme Court to interpret them if the President is to assume the functions and duties of both?

In his threat to veto the farm bill the President proposes to exercise a power possessed by no ruler in Europe to-day.

While the King of England is theoretically authorized to veto acts passed by the British Parliament, that power has not been exercised in the last 220 years and has long been obsolete. The President of France may return a bill to the Chamber of Deputies for reconsideration, but is without the power of veto. Likewise, the President of the German Republic, while he may submit to the people an act of the Reichstag, is also denied the power of veto. And the power of veto as here proposed to be exercised by the President is at variance with the intentions of the convention which drafted the Constitution. Jefferson, who had as large a part as anyone in the formation of the Government, agreed with Washington that the principal advantage of the bicameral system of government was that it constitutes a safeguard against undigested legislation—that the Senate is the saucer in which to cool the hot coffee from the House.

For the same reason he approved the Executive's power of veto as a check upon hasty and ill-considered legislation, to be invoked when the Congress, swept by some sudden gust of passion or excitement, rushed through measures without due consideration and deliberation; or, if occasion demanded, a recourse through which opportunity might be afforded for the people to pass upon debated measures as represented by candidates at the biennial elections.

Certainly no one will contend that the bill sent to the President has been casually or hastily considered. With the possible exception of the tariff, no legislation before the Congress and the people since the Civil War has received such exhaustive and detailed consideration. It has been a dominant national issue for the last eight years and for the second time in the last two years has been passed by both Houses by substantial majorities. If this were the first time it had been submitted to the President for approval he might have reason to feel warranted in exercising the right of veto in order to sound public sentiment on the question. But there can now be no doubt on that point. Two years have elapsed since his first veto. During that time the issue has been submitted to the people through the candidacy of Members of Congress who have voted on the bill or whose attitude on it was clearly set forth in preelection platforms. Practically every Member of the House of Representatives who voted to send the bill to the President in 1926 was before his constituents for reelection the following November and the House returned from that election passed the bill by even a larger vote than that of its predecessor. In fact the last election was to all intents and purposes a plebiscite on the McNary-Haugen bill and the voters in the various congressional districts by reelection emphatically approved the action of their Representatives in supporting the bill and in effect instructed them to continue that support. Will the President deliberately override these instructions?

The Government of the United States is essentially a government by the people. All action by governmental agency is predicated upon the consent of the governed and all authority is administered in accordance with the will of the people. Farm relief was an issue in the campaign of 1924 and again in 1926 and each time was indorsed for enactment by unequivocal party platform declarations and by the election of Members of Congress pledged to its support. How often must the voters indorse this bill at the polls; and how often must their representatives in Congress pass it before the President acknowledges the mandates of the people?

If the President persists in his intention to veto the bill, in whose name does he propose to veto it? Not in the name or the interest of the farmers of the country. The official representatives of the farm organizations appearing before the committees of the House and Senate have indorsed this bill with greater unanimity than that shown by any other industry in advocating national legislation. Not in the name of the people at large. Their representatives have twice passed the bill in both Houses of Congress. An inspection of the last roll call discloses with startling force the strength of this indorsement. The following States voted unanimously for the bill, regardless of party alignment: Wisconsin, Indiana, Kansas, Nebraska, North Dakota, South Dakota, Iowa, Colorado, and Montana. The Nevada and the New Mexico Representatives also supported it. All but one in Oregon and all but one in Washington supported it. In Michigan all but 2 of the 12 Congressmen supported it. All but 1 of the 10 Congressmen from Minnesota supported it. Eight of 10 Congressmen from Tennessee favored the bill. Twelve of the 16 Congressmen from Missouri registered their support. Eight of 10 in Kentucky were for the bill. Even in Illinois 18 of the 25 Congressmen participating favored the measure. And sufficient Members from the remaining States supported the bill to give it an increased vote over that of 1926 in both House and Senate.

In fact, the ever-increasing support of the bill in each succeeding Congress is the most convincing demonstration of its merit that could be offered. From its inception it has been relentlessly opposed by the great industrial, commercial, and banking interests, by every metropolitan newspaper, by the United States Chamber of Commerce, by the National Grain Dealers' Association, by the packers, by the dominant interests of Wall Street, by the State agricultural colleges receiving Federal aid through the Department of Agriculture, by the President of the United States, by the Secretary of Agriculture, the Secretary of the Treasury and the Secretary of Commerce, by the steering committee and the party leaders of the House, and by one of the best paid and most efficient lobbies ever assembled in Washington. The congressional committees have been subjected to incredible pressure to prevent its being reported out. No possible argument that could be made against the bill has been overlooked and no influence which could be brought to bear against it has been neglected.

And yet in the face of this formidable opposition the bill has gained steadily in public favor and in congressional support. In 1922 the opposition was so strong that its friends were un-

able to even reach a vote in the House. In 1924, after a desperate fight, it lost by a margin of 70 votes.

In 1925 it lost by only 45 votes. In 1927 its support forged ahead for the first time and the bill was passed by a majority of 36 votes. And by 1928 so rapid had been the growth of favoring sentiment that nearly 50 votes had been gained and the bill was passed by 83 votes. In the Senate the gain was even more pronounced and the bill received more than two-thirds of the votes cast. There can be but one explanation of this steady and consistent increase in the support of the bill against such seemingly insurmountable obstacles, and that is its intrinsic merit.

> Truth crushed to earth shall rise again,
> But Error, wounded, dies amid his worshippers.

If the bill were wrong in theory or method or if the people were not genuinely in favor of it, its first defeat would have been fatal and certainly the President's veto would have ended all hope of further consideration. The very fact that it has thrived on such implacable opposition is in itself a convincing argument in its favor.

In this connection the charge has been repeatedly made, both in the press and on the floor, that the McNary-Haugen bill was originated for political purposes—that those who supported it were merely playing politics. Nothing could be further from the truth. In order to support the bill Members had to break deliberately with the administration. They had to repudiate definitely the party leaders on both sides of the aisle. They had to abandon all hope of support and favor from the metropolitan newspapers, and had to brave the determined opposition of great forces which wield political power in every State of the Union. Every man who suppported the measure took his political life in his hands and, especially in the early days when the bill had few friends and seemed a hopeless cause, it took courage of the highest order to come out and take a stand for it against the powerful foes which have fought it without ceasing every day of the six years since it was introduced in the House.

But, granting for the sake of argument, now that the bill has become popular, that its support is of a political nature as charged, the contention that it is political is a confession that the people want it. Manifestly it would not be politic to oppose what the people want or to support what they oppose. Hence the charge that the advocates of the bill are animated by political considerations is an acknowledgment that it is indorsed by a majority of the electors who will elect the next Congress. Our system of government is framed for the express purpose of expressing the will of a majority of the qualified voters. If they want this bill and have continued to express that desire with increasing emphasis in the last three congressional elections, why should they not have it? Who is so wise—even though he may have happened to be elected President of the United States—as to feel warranted in holding himself and his judgment superior to the legally expressed will of the people? We settled that question in this country more than a hundred and fifty years ago and if persistently denied the right to govern themselves, the people will again settle the same question in the same way in November, 1928.

Every consideration has been shown the President and his advisers in the formulation of this bill. Every effort short of actual abandonment of the basic principle involved has been made to meet his views and comply with his wishes as expressed in his last veto. Out of the 12 objections set out in that message 11 have been removed in writing the present bill. Surely the President can come one-twelfth of the way toward a compromise if we go eleven-twelfths of the way to meet him. In an endeavor to please the President we have cut out of this bill every item objected to in his last message except the equalization fee. To surrender that is to cut the heart out of the bill. Nothing effective would remain, and this is precisely the reason industry demands the elimination of the equalization fee. If the fee is retained, the plan is practicable. It will work. It will place agriculture on a basis of economic equality with other industry and will insure its prosperity and success as promised in the national platforms of both parties.

The President insists, however, that the equalization fee is unconstitutional, and in his interview this morning agrees to sign the bill if the fee is eliminated. If he is correct in the charge that the fee is unconstitutional, then it will be a simple matter to submit the question to the Supreme Court, where it properly belongs, and if the President is right in his contention, the Supreme Court will rule it out and every objection urged by the President against the bill will have been agreed to.

If, on the other hand, the Supreme Court finds that the fee is constitutional, it will show the President's apprehension to have been unfounded and will give him just the bill he wants. In either event the principal argument against the bill will have been disposed of to the satisfaction of all concerned. What more could the President ask?

Only the Supreme Court is authorized to decide whether the fee is constitutional. When the President and the Supreme Court differ on such questions, the opinion of the Court is the law and the opinion of the President has no standing whatever. Why should he deny the farmers of the Nation the right to have their case judged by the Supreme Court when he has repeatedly and freely granted that right to disputed legislation proposed by every other interest in the land?

In conclusion we should not lose sight of the fact that this is the last opportunity to help the farmer. We are already in the closing hours of the session. Congress must adjourn promptly in order to give the national conventions an opportunity to meet and put out more molasses to catch more flies, for both parties will undoubtedly adopt platforms with long planks expressing undying affection for the farmer and assuring him that if he will just elect them to office they will lead him to a land flowing with milk and honey?

If the President vetoes this bill on the eve of adjournment, there will be no further opportunity for farm legislation by this Congress. Under these circumstances will the President by vetoing this bill close the last door open to farm relief for the next two years? And if so, at whose behest and in whose interest will he veto it?

IMMIGRATION PROBLEMS

Mr. BOX. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on immigration problems.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. BOX. Mr. Speaker, during the present session of this Congress and during former Congresses, being a member of the House Committee on Immigration and Naturalization and, therefore, charged with the duty of giving special attention to the subjects with which that committee deals, and because of the immediate and very great importance of these problems, I have given them much study and have spoken several times during this session on several phases of this great subject, during which I have emphasized the restriction of Mexican immigration.

I have been urging the restriction of immigration since I entered Congress in 1919, and had much to do with writing and passing the act of 1921, placing a quota limitation of 3 per cent, based on the census of 1910, which cut European immigration to less than one-half its former volume. Knowing that that act was temporary and that it admitted entirely too many immigrants from Europe and all the world, I continued my efforts and had pending a bill reducing immigration to 2 per cent of the natives of each country from which we receive immigrants in the United States, according to the census of 1890. Provisions contained in that bill became the backbone of the immigration act of 1924. It had been pending two or three years before Chairman JOHNSON or the committee proposed a bill containing these provisions; but when the bill was reported it was named for the chairman of the committee, which is customary.

It will be seen that I contributed in good measure to the writing and passage of the act of 1921, first heavily reducing Old World immigration, and the act of 1924 further reducing that immigration and stopping Japanese immigration.

My bill, from which the fundamental features of the act of 1924 were taken, provided for the application of the quota restrictions of the immigration law to Mexico, but I was unable to get it included then, although, of course, I supported that act and helped to pass it because it did place heavy restrictions on European immigration, virtually stopped Asiatic immigration, and put new checks on Mexican immigration which, if enforced, would keep out the greater part of that immigration now.

On more than one occasion I spoke at considerable length before the House committee then considering my bill (H. R. 6465) for the restriction of Mexican immigration. An address on the same subject was delivered by me on January 19, 1928, at Continental Memorial Hall, in the city of Washington, before an audience composed of representatives of patriotic societies from all over the country, then holding a conference at the National Capital to promote the enactment of laws restricting immigration. All the speeches and statements made by me on these several occasions were actually delivered, none of them being at the time merely written remarks. All were printed in the CONGRESSIONAL RECORD or in the committee hearings. As I am required to pay the expense of reprinting such speeches and statements, the cost of printing in a separate pamphlet all that I have said on this subject would be prohibitive. More-

over, they would be too voluminous to be generally read. I therefore present for printing parts of the CONGRESSIONAL RECORD and the reports of committee hearings embodying a small part of the matter presented by me in these speeches and statements.

This arrangement of portions of the CONGRESSIONAL RECORD and the record of committee hearings made during the present session of Congress, dealing with immigration problems and my own connection therewith, follows the general outline of my address to the immigration conference held in Washington on January 19, 1928, as printed in the CONGRESSIONAL RECORD:

Mr. Chairman, ladies, and gentlemen, I forecast that during the present session of Congress immigration discussion and legislation will probably center around four important questions:

(1) Shall our deportation laws be strengthened, extended, and better enforced?

(2) Shall the endless chain of relationship existing between immigrants and their kindred abroad be permitted to start dragging out of Europe thousands of those whom the laws now exclude?

(3) Shall we retain in the law the national-origins provisions, written into the act of 1924, making it more accurately and adequately serve the Nation's purpose to keep itself American, or shall they be suspended or repealed at the dictation of certain hyphenated minorities of our population?

(4) Shall the quota provisions of the immigration law be made applicable to Mexico, South America, and adjacent islands?

To this last question I shall devote my brief remarks.

The people of the United States have so definitely determined that immigration shall be rigidly held in check that many who would oppose this settled policy dare not openly attack it. The opposition declares itself in sympathy with the policy and then seeks to break down essential parts of the law and opposes any consistent completion of it making it serve the Nation's purpose to maintain its distinguishing character and institutions. Declaring that they do not believe that paupers and serfs and peons, the ignorant, the diseased, and the criminal of the world should pour by tens and hundreds of thousands into the United States as the decades pass, they nevertheless oppose the stopping of that very class from coming out of Mexico and the West Indies into the country at the rate of 75,000, more or less, per year.

Every reason which prompts restriction applies to Mexican peon immigration.

Every reason which calls for the exclusion of the most wretched, ignorant, dirty, diseased, and degraded people of Europe or Asia demands that the illiterate, unclean, peonized masses moving this way from Mexico be stopped at the border. Few will seriously propose the repeal of the immigration laws during the present Congress, but the efforts of those who understand and support the spirit and purpose of these laws to complete them and make them more effective by the application of their quota provisions to Mexico and the West Indies, will be insidiously and strenuously opposed.

After I had made this last statement, and while the committee was considering my bill H. R. 6465 during the present session, more than 100 of the strongest railroad systems of the United States, representing many thousands of miles of railroad covering every part of the country, appeared in opposition to the bill. Beet-sugar manufacturing companies, mining companies, land-development promoters, and many kindred concerns came before the committee to oppose the bill. These classes of importers and employers of labor have opposed every proposition to restrict immigration throughout the country's history. In 1913 they urged that the enactment of the literacy test then proposed and now a part of the law would ruin them and the country. I quote from evidence taken on the hearing:

Mr. PATTEN. The arguments used and suggested by opponents of a Mexican quota are that there is an inadequate supply of cotton croppers and day laborers, and a Mexican quota will labor starve certain industries. That same argument was used against the Burnett or illiteracy test bill and later against the Johnson quota law, as well as previously against Chinese, East Indian, and Japanese exclusion.

Mr. BOX. Who said it then?

Mr. PATTEN. The same people who are saying it now.

Mr. BOX. Did the railroads also say it?

Mr. PATTEN. They did. I have here [indicating] a copy of a letter sent to Congressmen and published in the CONGRESSIONAL RECORD in 1913. It was written by Mr. William R. Smith, then State solicitor of the Atchison, Topeka & Santa Fe Railway Co., one of whose officials, I think the successor of the author of this letter, has personally appeared before your committee this year in opposition to a Mexican quota. In this letter Mr. Smith, solicitor, Atchison, Topeka & Santa Fe Railway Co., declared the Santa Fe could not maintain its way and operate safely if the Burnett illiteracy bill became a law. As a matter of fact, the safest and most prosperous years of Santa Fe operation have been since the Burnett illiteracy test enactment.

The congressional and committee records contain abundant record of such opposition to former legislation from these sources.

Their favorite turn is to persuade members of the Cabinet and other advisers of the President that some dire evil will result from the checking of immigration. Usually they have induced the President to use all the influence of his great office against the restriction of immigration. Often they have persuaded him to veto such bills. In 1879 President Hayes vetoed the first Chinese exclusion act. (2 I. C. R. 580.) In 1882 President Arthur vetoed an act suspending Chinese immigration for a period of 20 years. (2 I. C. R. 581.)

On March 3, 1897, President Cleveland vetoed an immigration act excluding illiterates. (2 I. C. R. 573.) President Taft vetoed an immigration bill in 1913 containing a restriction against the admission of illiterates. (CONGRESSIONAL RECORD, special sess, 59th Cong., p. 101.) In 1917 President Wilson vetoed an act excluding illiterates, but Congress passed it over his veto.

If the misguided gentlemen who thus influenced the action of these Presidents and others had had their way and the people had not asserted themselves through the action of their Representatives in Congress, all of our larger cities and much of our country would now have a population and political rings much like those of Chicago, Philadelphia, New York, Pittsburgh, and others I could name. Such elements are strong and bad enough now to distress a country-loving citizen.

The admission of a large and increasing number of Mexican peons to engage in all kinds of work is at variance with the American purpose to protect the wages of its working people and maintain their standard of living. Mexican labor is not free; it is not well paid; its standard of living is low. The yearly admission of several scores of thousands from just across the Mexican border tends constantly to lower the wages and conditions of men and women of America who labor with their hands in industry, in transportation, and in agriculture. One who has been in Mexico or in Mexican sections of cities and towns of southwestern United States enough to make general observation needs no evidence or argument to convince him of the truth of the statement that Mexican peon labor is poorly paid and lives miserably in the midst of want, dirt, and disease. In support of this I quote from the committee hearings:

Mr. Box. Mr. T. H. Williams, head of the firm of T. H. Williams & Co., merchants, said to be large merchants, of Austin, Tex., writes me under date of March 5, 1928, saying:

"As a business man of long experience (more than 40 years), and chamber of commerce connection for many years, I desire to express myself as vigorously as I may. I very deeply resent the propaganda conveying the idea that the best business interests and higher class business men desire a liberal immigration of Mexicans. I deeply deplore the statement that the chambers of commerce are combating the Box bill, as I believe but a small minority do so.

"I wish to say as a business man and from long observation that they ruin the country in more ways than one. Mexican cheap labor of every character has already driven out practically all negro labor in southwestern Texas; hundreds of business establishments are employing Mexican girls and boys at such a low wage that even a self-respecting Mexican can not suitably live, and have, or course, displaced our American cheaper class labor almost entirely. Even a most casual inspection will demonstrate this to be true, more especially in San Antonio and all southwestern Texas cities and communities.

"Again, their standards of living are so low that no merchant of standing wishes their patronage, as they can not afford to carry the low quality of merchandise asked for. Another sinister feature is that they steal more than they buy in the better stores.

"It is a criminal offense to give them the places belonging to our own American girls and boys. Everyone now knows that there is a most terrible amount of unemployment now prevailing, and our own people are suffering from lack of work.

"Think of the vast majority of your constituency, who love our State and who live under the above-outlined conditions, and who are heartily in favor of the Box bill. * * *"

Mr. E. Clements Horst, head of the firm of E. Clements Horst Co., exporters, of San Francisco, Calif., having offices at San Francisco, New York, and London, wrote me a letter on March 27, 1928, from which I quote:

"I am extensively engaged in farming in California and Oregon. I farm about 8,000 acres, all in peaches, pears, prunes, olives, grapes, hops, and other intensive crops that require my employment of many thousands of laborers during the harvest and canning season. My operations include the packing and canning of the fruits, etc., grown by my company as well as those of other farmers. * * *

"There are plenty of shortsighted American farmers who believe that importations of any kind of cheap labor will help their condition.

"Mexican laborers can, of course, be herded like cattle; they put up with any sort of camp and living conditions; that importation of that

sort of labor reduces living conditions for ranch labor below the standard that any American workers can or ought to be expected to work."

Ralph H. Smith, associate entomologist, University of California, in a letter to me dated March 1, 1928, says in part:

"* * * Every day in the year there are thousands of men in southern California going hungry and Mexicans doing the work these men should do. Only can one understand the fullness of the Mexican menace by living in this region and seeing the deplorable conditions these degraded people are imposing on our schools and our social and public life. They breed like rats and live like rats. * * *"

Clement Knoll wrote me a letter from Detroit, Mich., on February 27, 1928, from which I quote:

"That they can not get self-respecting men, with families to support, to work under conditions that prevail is the truth. That they can not get them under decent prevailing conditions is a falsehood. * * *

"Give me or any other man a decent wage and fair conditions, and we will not balk at working at any kind of labor. * * *

"With all this unemployment in this country it is not fair to us to cause an influx of more jobseekers. * * *."

A. A. Wright, president of the Wright Loan & Securities Co., which has a good capital and appears to be a substantial business concern, of Houston, Tex., writes me from that place under date of February 29, 1928, a letter from which I quote:

"As my concerns are members of the 'American plan' or 'open shop,' our sentiments regarding Mexican immigration can not be attributed to overfriendliness toward organized labor. The unemployment situation here is becoming quite acute, and in the opinion of the writer will grow more so and extend over a protracted period, and we think that the Mexican immigration—or at least most of the Mexicans are very much the least desirable that come into our Nation. Their standard of living is so low that they can sell their services at such price as to disastrously affect our native laborers. * * *"

I quote from a telegram sent by C. O. Griffin, of Lindsay, Calif., February 29, 1928:

"Mexican labor receives lowest wages paid this section. Living conditions this class intolerable. * * *"

I quote from a letter written March 5, 1928, to me from San Antonio, Tex., by R. T. Glenn:

"A Mexican laborer can live and does live on about 15 cents per day table expenses. This is common knowledge here. As for housing, from one to three families live in one shack. * * *"

H. H. Maris, who signs as president of the Humanitarian Heart Mission, writes me from Denver, Colo., March 1, 1928, a letter from which I quote:

"The sugar beet company imports the very poorest and ignorant Mexicans with large families; brings them to Denver, working them in the beet fields until snow flies. They then congregate in Denver with $15 to $20 to keep a large family, and no possible means of support by labor in sight, through the winter season. The police and city kangaroo courts vag most of the men, keeping them in jail for the winter, leaving their poor mothers and their children to starve through these desolate months. Children absolutely barefooted in the snow. I have seen 29 men and women in one room with an old, dirty bed mattress laying on the floor of the room, all of the 29 adults using the mattress for a pillow, the small children and babies in the center of the mattress and the adults laying on the floor with only newspaper under them. * * *"

Dealing with the living conditions of Mexican peons, P. G. Nelson, of San Antonio, Tex., wrote me March 3, 1928, saying:

"Take the horrid habitations, bull pens, so-called, along S. Laredo, S. Santa Rosa, S. Concho, S. San Saba, S. Pecos, S. Leona, and S. Medina, also along S. Flores between Flores and M. K. & T. Railroad tracks south of Katy depot, and you will find barefooted and ragged children, dirty men and women, living in the filth, mud, and dirt, in the most deplorable and dilapidated shacks. * * * They live among dogs, goats, chickens, horses, and burros, and you can go there all day long almost and never hear a word of English spoken. * * *"

In industry and transportation they displace great numbers of Americans who are left without employment and drift into poverty, even vagrancy, being unable to maintain families or to help sustain American communities. Volumes of data could be presented by way of support and illustration of this proposition.

Again I quote from my statement before the committee:

Mr. Box. I read now from a letter by a prominent physician, whom I know very well. He is a prosperous and active physician. He is one of my constituents. Writing under date of or about February 4, 1928, he said:

"I read with much interest your reply to the ——— Chamber of Commerce as to the Mexican immigration quota in the Dallas News of February 4, and I wish to congratulate you.

"I have been watching with that degree of interest that I feel any good citizen would the matter of controlling Mexican immigration into the United States and particularly our own dear land of Texas. When you began calling the attention to restriction of such immigration I was inclined to disagree with you in this matter. So for the past few months I have been trying to inform myself as to whether or not such restriction would be to the interest of the State and Government. I have been entirely convinced that your position is undeniably correct. * * *

"* * * I met our mutual friend, ——— ———, on the street this morning and he told me that he was just back from some point in Oklahoma where he had been at work as foreman of construction of a pipe line, and that more than 100 citizens of the county in which he worked had been discharged and replaced by the dirtiest group of Mexican peons that he had ever seen in his life, and that he resigned his position as foreman rather than work this class of labor. He said that he had orders to discharge the men who were working for him and that they were respectable citizens of this particular county, and that the men told him they were doing this work, almost all of them, because they needed money to pay their taxes. * * *"

Mr. Box. I quote from a letter written at Del Rio, Tex., which is very near the Rio Grande, dated November 25, 1927:

"DEAR SIR: Find list of signers inclosed in support of the Box immigration bill.

"The chambers of commerce of southwest Texas have gone on record as opposing your immigration legislation, but they do not represent the real sentiment of the people, just the merchants and large landowners.

"Southwest Texas is already Mexicanized and the wave is gradually and somewhat rapidly spreading north and east.

"I sincerely hope that you may succeed at this session of Congress in having your measure enacted into law.

"Very truly,

"M. R. NELSON,
"Head of History Department, Del Rio High School."

The proprietor of a country hotel in west Texas, who does not want his name used, wrote me February 24, 1928, a letter from which I quote:

"The * * * pipe line and construction is laying off all the white men and putting on Mexican labor, even going so far as to hunt up Mexican labor when there is an abundance of white labor here. * * *"

G. M. Cloud wrote me from Austin, Tex., February 24, 1928, a letter from which I quote:

"A number of others working on a natural-gas pipe line had lost their jobs through no fault of theirs and were supplanted by Mexicans who would work for less money. This same fellow told me that Mexican renters had nearly all the farms in that vicinity. * * *"

I quote from a letter written by Mr. R. S. Martin, of Corpus Christi, Tex., February 16, 1928:

"I have seen several men come to this place seeking work; said they had read big advertisements from the chambers of commerce, and when they applied for work were turned down and while there at the job would see Mexicans taken on and placed at work. * * *"

I quote from a telegram by J. Malcolm Brown, sent from Fort Worth, Tex., March 7, 1928:

"* * * Find Mexicans displacing native labor on railroad section work, railroad shops, oil fields, coal mines, public-road work, packing houses, printing offices, restaurants, laundries, garment factories, and in many other occupations. At least 30,000 Mexicans unemployed in Texas, with twice that many natives unemployed. * * * Fort Worth Typographical Union, No. 198, voted that the above message be sent you."

The Golden Rule Mining Co., by E. M. Jackson, wrote me from Dragoon, Ariz., February 29, 1928, a letter from which I quote:

"You will find that there are thousands of our American boys out of work who would be glad to get some of the positions that are being filled by Mexicans. * * * One of the reasons for this state of affairs is that a Mexican will work for so much less than an American. * * *"

I quote from the letter of Hardeman Roberts, of Devine, Tex.:

"These farmers in other parts are mostly home owners and taxpayers trying to educate their children, and are gradually being forced to quit the farm or sell out and rent. * * * If this keeps up, you can easily see the finish in 20 years. * * *

I recently saw two orphan boys, working to get money to go to college, let out with all the rest of the Americans and Mexicans put on in their places. * * *"

I quote from a letter written by a young man in Los Angeles, Calif., on March 3, 1928:

"Introducing myself as one of the thousands of the younger generation of wage earners who wishes to give his personal viewpoint of the Mexican labor situation as it is in Los Angeles and elsewhere where I have been looking for work, I have been as far as Douglas, Ariz., and have been unable to get employment of any kind this winter, mostly on account of Mexican and cheap labor. My brother and many acquaintances have had the same disagreeable experience.

"Please consider me, not as a child laborer, but as the younger American worker. * * *

"In the community where I reside the Mexicans are increasing in alarming numbers. They are given preference over the white people in

public and amusement places, as well as business. Of course, preference must be given to the majority. The Mexicans seem to be the majority.

"I remain truly yours,

"ROBERT J. OWEN."

It is said that farmers need them. On the contrary, American farmers, including those of Texas and the Southwest, as a class do not need them or want them. I state the rule as of country-wide application, without denying that a small percentage of farmers want them, and that in some restricted regions this percentage is considerable. I doubt if a majority of the bona fide farmers of any State want or need them. I have given much attention to the question and am convinced that as a state-wide or nation-wide proposition they are not only not needed and not wanted, but the admission of great numbers of them to engage in agricultural work would be seriously hurtful to the interests of farmers, farm workers, and country communities. They take the places of white Americans in communities and often thereby destroy schools, churches, and all good community life.

This proposition is supported by evidence before the committee, from which I quote:

Mr. BOX. I received a letter lately, dated February 5, 1928, written by a constituent of my friend Black, in which he says:

"The Mexicans are beginning to be felt in northeast Texas by moving on large tenant farms, crowding out white tenants. Landlords who live in near-by towns prefer them, for they can be driven almost like slaves, will live in barns, sheds, or tents, and are exceedingly insanitary, illiterate, treacherous, and undesirable as citizens. White children object to their presence in schools. Practically they pay no taxes."

Another Texas farmer writes:

"In a few years more with this horde of Mexicans, Texas alone will produce 10,000,000 bales of cotton."

Here is a man writing from Marfa, Tex.:

"I was born 33 miles southwest of San Antonio and reared among the Mexicans, and can speak and write the Spanish language. I am a contractor and builder, and work all classes of labor. When I was a boy I was raised on a farm and we had a good home and did our work and made money, but the Mexican renters came and soon the country was all rented to shack renters, and our schools were full of Mexicans and farm improvements went to ruin and soon all the people left in the country were a few who had no children to send to school."

He further says:

"There are thousands along the border who are with you more than you think, but they are too timid to do as I am doing."

Mr. BOX. I now present a statement by a man who says he has been in the banking, ranching, and farming business in west Texas. He makes some reference to the attitude of Members of Congress, and I have deleted everything that refers to any Member of Congress or his position, except myself. Therefore, there will be some omissions. However, I ask that all else be read.

(Mr. Box's secretary read as follows:)

SAN ANGELO, TEX., *February 16, 1928.*

Congressman BOX,
Washington, D. C.

DEAR MR. BOX: For some time I have wanted to write you and commend you for the stand you take to regulate the Mexicans the same as any other foreigner coming to this country. * * *

* * * The ones benefiting most from the Mexican people coming to the country are the men living in town who own farms running from 300 acres to 5,000 acres. As this man can raise cotton with Mexican share croppers by furnishing them a small hut or tent to live in, with a team costing not over $75 and this man can, of course, raise cotton for 10 cents and make money, or rendering his 300 acres to 5,000 acres at $10–$15, while his neighbor, the small man who owns 150 acres, renders his at $25–$50 per acre and sending his children 10 miles to school or town because there being no school near him, caused by Mexicans occupying all the farms around him. Mr. Baskin, of Milan County, Tex., a merchant, who owns 8,000 acres of farm, accumulated by him the last few years by the fact that the American owners of small farms could not hold their farms and raise their children under existing conditions. These farms are now almost exclusively occupied by Mexican share croppers. Just across the Brazos from this country, between Mumford and Marlin, I notice the Mexicans are crowding out our good old American negroes, whom we have to put up with, and I am sure that you have observed the same conditions reaching even as far as your home, Marshal. In 1906 I bought land in Dimmit County and at that time the Mexican share croppers were beginning to get good hold as far up as Pearsall, they having the preference then as tenants as they were satisfied with jacal that would be built for $25 for them to live in and the cheapest kind of mules for a team. Since then I have seen them cover the country all the way to the Red River and even into the beet fields of Colorado, and I am told that they have covered the entire United States, working for the railroad and other public works, until there now are over 1,000,000 Mexicans in our country.

Now, I want you to understand that I really like Mexicans myself, but think that if California had a right to stop the Chinese and Japanese from coming to their State that every Southern State has a hundred times more reasons for stopping the Mexicans from coming to our State than California had from stopping the Chinese or Japanese.

There was a time when it seemed that the boll weevil would bankrupt the South, but this has been overcome by the farmers being able to poison the boll weevil and other insects, but they have not found any way of holding down the overproduction of cotton caused by the Mexican menace which enables any man in the South plains country to put in from 800 to 5,000 acres in cotton simply by using tractors and cheap Mexican labor or share croppers. An old friend of mine, P. C. McCoy, used to live on his farm in San Saba County, planting 40 to 50 acres in cotton and working it with his family. Last year I found him at Lubbock, Tex., living in town, but having 860 acres in cotton raised by Mexican share croppers. He is about the smallest farmer in his neighborhood. While I was out in Tahoca County I met farmers owning as much as 5,000 acres in cotton, living in town and relying upon the semiannual Mexican to handle these crops, of course competing with our good Americans who were planting 50 to 80 acres, cultivating it themselves, paying taxes on their land at about $100 per acre, and educating their American children.

* * * * * * *

I am 50 years of age and have been doing business for 35 years farming, ranching, banking, and lending money to farmers and stockmen, without prejudice or bias, and I think I am able to see things as they are. I hope you will succeed in having your bill passed, which, I understand, is to regulate the Mexican people the same as any other foreigner coming to this country.

Yours truly,

J. E. ODIORNE, *San Angelo, Tex.*

I quote further from my statement before the committee in support of the proposition that the farmers do not need them:

Mr. BOX. The next expression I have is from Prof. Max Handman, sociologist of the University of Texas, Austin, Tex. Professor Handman is an expert on Mexican educational work and similar subjects. He is often called to other Texas cities to deal with the educational, social, and racial problems which these people present. During 1926 Professor Handman delivered an address at Cleveland, Ohio, before the National Conference of Social Work, from which I shall quote in a little while. He does not here declare upon any particular legislation, and I do not quote him as supporting this bill. I read his words to show you the problem. He says:

"This increase in numbers of the Mexican farmer has had some very disastrous consequences upon the effort of the American community to keep up its school system. This is partly because of the gradual moving away of the white farmer with his tradition of schooling and self-help in matters of schooling, and partly because of the concentration of land which will accumulate taxes on him who has accumulated land. The rural schools in many Texas communities have thus been disrupted. * * *"

American farmers are now burdened with a surplus of staple farm products which they can not sell profitably at home or abroad. That surplus weighs down the prices of the entire crop in both the domestic and foreign markets until it threatens agriculture with financial ruin. Individual farmers, farm organizations, their Representatives in Congress, students of farm economics, bankers, and business men of the farming sections, all are striving to find a means of getting rid of this surplus of farm products, with its dead weight upon the price of farmers' crops. Congress is continually being urged to make appropriations to help carry the farmers' surplus, to levy taxes on farm products, to restrain overproduction, and otherwise to provide a method of getting rid of this oversupply of the farmers' leading crops. The President in his messages to Congress has repeatedly discussed this surplus and dealt with proposed remedies for it.

The importers of such Mexican laborers as go to farms at all want them to increase farm production, not by the labor of American farmers for the sustenance of families and the support of American farm life but by serf labor working mainly for absentee landlords on millions of acres of semiarid lands. Many of these lands have heretofore been profitably used for grazing cattle, sheep, and goats. Many of them are held by speculative owners.

A great part of these areas can not be cultivated until the Government has spent vast sums in reclaiming them. Their development when needed as homes for our people and in support of American communities is highly desirable. Their occupation and cultivation by serfs should not be encouraged. These lands and this mass of peon labor are to be exploited in the enlargement of America's surplus farm production, possibly to the increased profit of these speculative owners, but certainly to the great injury of America's present agricultural popula-

tion, consisting of farmers, living and supporting themselves by their own labor and that of their families on the farms of America.

As pointed out in my statement, such things as the Boulder Dam project will bring into cultivation new areas supposed to produce hundreds of thousands or millions of bales of cotton and heavily of other farm crops. My information from California is that nearly all the farm work in that region is done by peon labor; that there are great areas out there which have not heretofore been cultivated. Two things are required to develop and thereafter utilize them—a big appropriation by the Federal Government and a big importation of peon labor.

While we are counseling about surpluses and disagreeing about measures for the protection of agriculture from the consequence of these great surpluses, shall we run out there and spend more millions making the surpluses larger while we spend more millions here to reduce and handle these surpluses?

The dreaded surplus, which already makes an abundant crop worse for farmers as a whole than a scant one, is to be made more dreadful by the importation of foreign labor working for lower wages and under harder conditions. The surplus which I have mentioned often hurts worse than a pest of locusts on the wheat crop or of boll weevil in the cotton fields.

While farmers, business interests in agricultural sections, Congress, and the President are deep in the consideration of the great problem presented by the farm surplus, and when presidential campaigns may turn on the condition and its consequences, labor importers are scheming and propagandizing for the purpose of bringing in armies of alien peons, claiming that they are needed on the farms, where they would only make the farm-surplus problem worse. If the Government tries to relieve this distress of the farmer caused by surplus production, shall it at the same time be de-Americanizing farms and farming communities and making the surplus and price situation worse by importing masses of serf laborers? Some think that agricultural prices can be sustained by a high tariff. Why have a tariff wall to keep out the products of pauper labor abroad and at the same time be bringing in armies of peons to increase the oversupply inside the tariff wall to the ruin of our own farmers?

Another purpose of the immigration laws is the protection of American racial stock from further degradation or change through mongrelization. The Mexican peon is a mixture of Mediterranean-blooded Spanish peasant with low-grade Indians who did not fight to extinction but submitted and multiplied as serfs. Into that was fused much negro slave blood. This blend of low-grade Spaniard, peonized Indian, and negro slave mixes with negroes, mulattoes, and other mongrels, and some sorry whites, already here. The prevention of such mongrelization and the degradation it causes is one of the purposes of our laws which the admission of these people will tend to defeat.

Every incoming race causes blood mixture, but if this were not true, a mixture of blocs of peoples of different races has a bad effect upon citizenship, creating more race conflicts and weakening national character. This is worse when the newcomers have different and lower social and political ideals.

Again I quote from my statement before the committee:

THE ALIEN MEXICAN PEON IS NOT GOOD MATERIAL FOR THE MAKING OF AN AMERICAN CITIZEN

Mr. Box. Gentlemen have insisted that the Mexican population is desirable, or at least is not objectionable from the standpoint of citizenship, and that Mexicans do not vote. They support this mainly by a statement that Texas has devised laws which will and do prevent them from voting. This is not exclusively or chiefly a Texas question. If Texas has been compelled to protect her elections against such undesirable mass voting, it is reasonable to conclude that all of the many other States to which these aliens are going will have to take special measures to protect themselves from the corruption of their electorate against this kind of people. But I am sorry to have to advise you that even in Texas the passage of the poll-tax laws 12 or 15 years ago, or about that time, and other protective measures during the succeeding 8 or 10 years, did not stop the Mexicans from voting in great numbers.

Again referring to Mexicans in elections, from scores of sections in California, in Colorado, in Arizona, in New Mexico, and in Texas, come numerous complaints that many of these Mexicans vote in elections; that they are voted in "herds like sheep," and many other sickening things as to their status, action, and general undesirability as citizens.

As indicating their general character in this respect, I restate a lot of facts presented by me in a former hearing before this committee. I dislike to uncover the shame of any State before the people of the country and the world, but men are trying to perpetuate these conditions and pursuing a course which will make the system more enormous and scandalous. Only for the purpose of trying to avoid the further growth of the evil, I present some of these facts in the hope that the country will protect itself against the menace from this source.

"A professional man and property owner, who resides in a city of considerable size near the Mexican border, where this element is large, wrote me discussing these hearings under date of January 7, 1926, saying, among other things:

"'Mr. Wardheeler, Mr. Buy-up-the-election, Messrs. Pack-the-ballot-box and Steal-the-election are going to Washington with orders to get your scalp.'"

In a speech made on the floor of the House on July 26, 1919, Congressman HUDSPETH said, among other things:

"For 16 years I served as a State senator and representative and passed on numerous Mexican questions that confronted the legislature. I drafted the bill to organize the Rangers' Home Guard, to protect the border against Mexican cattle thieves—1,000 Texas Rangers. * * * And I ask you, gentlemen, is it fair or right that a city of the importance and prosperity of El Paso should be blighted by irresponsible Mexican bandits or by warring factions in that land of the sweet 'manana'? But of greater import than this, should our free-born American citizens be subjected to continued humiliation at the hands of these same self-styled and self-confessed despisers of Americans? * * * I say to you that it does not take much to start a revolution in Mexico. One Mexican steals a cigarette from another, and it starts a revolution. Revolutions have come and revolutions will go."

Congressman HUDSPETH was referring to the Mexico-born Mexicans, of the kind these importers want to bring into the United States. Are such people a desirable element for American population?

Mr. Box. The Mexicans vote in some sections of Texas in great numbers. On page 206 of the supplement to the senate journal of Texas of the thirty-sixth legislature, 1919, will be found a poll list of voters at one box. I shall omit the names of counties and officials to avoid all offensive features about the locality. I will try to call a few of the names, and the list can be copied.

Jose Esparza, Francisco Bueno, Thomas Betts, Ramon Esparza, T. M. Harven, Remejio Villarial, Julian Sanches, Ysidoro Perez Garza, Lino Leal, Atanasio Martines, Hurwano Guiros, Matias Tirres, Antonio Esparza, Padlo Leal, Gretoria Torres, Tomas Rodriguez, Liamon Guereno, Francisco Esparza, Serapio Pardo, Antonio Rodriguez, Tirso Gomes, Pedro Esparza, Juadalupe Benavides, Wenceslao Guzman, Juan Leal, Foriolo Rodriguez, F. Jesus Cantu, Martin Cavazos, Yida Leslie, H. W. Leslie, Maximo Rodriguez, Apolinas Rodriguez, Ernesto Esparza, Esequiel Cavazos, Hasedonio Rodriguez, J. F. Moody, Rosalio Rodriguez, L. A. Schiecger, Mrs. L. A. Schiecger, Edward Schiecger, A. E. Agee, Aniseto Rodriguez, Elefenso Gallegos, Vincente Rodriguez, T. O. Crockett, B. E. Crockett, John C. Fry, C. C. Wood, Cayetano Garcia, A. T. Hood, V. L. Vandabar, Margarito Guerrero, L. E. Keller, Jesus Tapia, Macarie Martines, S. P. Young, Felistiano Tapia, Simon Garcia, Jesse M. Buck, H. H. Buck, J. E. Keller, Antonio Garcia, Carlos Esparza, Ysidro Garcia, Luis Aguire, Davi Kellos, Desiderio Yanes, Pablo Silvas, Rocindo Aguire, Desiderio Tribinio, R. G. Garza, Juan Ramos, Rafael L. Guerra, Evaristo Canas, Yplito Canales, Nestor Alcala, Jose Yanes, Susano Gonzales, Modesto Gonzales, A. E. Carmichail, Angel Ramos, Cliofas Gomez, Encarnacion Martinis, Antonio G. Cavazos, George A. Fearnow, Mrs. George A. Fearnow.

On page 273 will be found another full list and on pages 274, 275, 448, 586, 587, 588, and the book, which is a large volume, is full of them.

Now, this is an examination conducted by attorneys in an election contest in Texas (reading from supplement of the Senate Journal, p. 158):

"Q. Who is in control of the politics of the county—of the offices?—A. Mr. ——

"Q. How is he in that control?—A. By the Mexican vote.

"Q. Through that Mexican vote does he control the officers in the county?—A. Yes, sir.

"Q. The county judge?—A. Yes, sir.

"Q. Sheriff?—A. Yes, sir.

"Q. Commissioners' court?—A. Yes, sir.

"Q. And the other officers?—A. Yes, sir.

"Q. And the finances of the county?—A. Yes, sir.

"Q. Well, how is that Mexican vote handled? Is it an intelligent Mexican vote or an illiterate Mexican vote?—A. Well, it is mixed. There's some very intelligent Mexicans and there's lots of them are illiterate.

"Q. Does Mr. ——— control the appointment of the people who hold the elections in that county?—A. That's the way I understand it."

Pages 760 and 761 show the testimony of a member of the Texas Legislature, a man who had been for several terms, about conditions down there. I believe I will not give his name:

"A. I was a representative; yes, sir.

"Q. Of what counties?—A. Well, when I came to the legislature in 1911—I was elected in 1910—came in 1911, and I represent ———, ———, ———, and ——— Counties, I think was my district at that time. At a called session of that legislature, the legislature redistricted

the representative districts and changed it until it is now ——— and ——— and ——— Counties.

"Q. What legislatures were you a member of?—A. I was a member of the thirty-second, thirty-third, and thirty-fourth."

I will skip quite a number of questions that throw no light on this controversy. They do throw a little, but would take too much space:

"Q. Was there at that time a discussion of the illiterate Mexican vote along the border in the legislature?—A. There wasn't as great a discussion as there has been this time, but almost as great. There were charges and countercharges of men, different sides, each side charging the other with having paid the poll taxes of the Mexicans. I don't know whether there was anything going on here— "

That is the Senate, you understand—

"but in the House of Representatives they were in a turmoil about it. One man, they were asking for a division of counties down there, making new counties, and the people who wanted a new county in —— County, alleged that one boss man down there, an anti——— man who was there had paid enough poll taxes to control the election of the officers. Now, we had given those people a new county; they had come to us complaining in the thirty-second legislature that they were under Mexican rule—that all the officers down there were Mexicans. The legislature gave them a county, called ——— County, and they were going back there to get together and elect their officers, and all that kind of doings. In the thirty-third legislature those people came back and asked for a division of ——— County— "

That is the new one—

"on the ground that the big boss had gotten their poll taxes and put them in his safe and gotten Mexican officers and controlled everything—everything of that kind—and in view of that there was a great deal of discussion about the illiterate voters."

Here is a letter from the State Democratic chairman of Texas relative to the situation there. I will just give the part of it on this situation. This is on page 838, in speaking of a contest between men for office before the election, the State Democratic chairman wrote:

"In the face of the evident frauds in the primary election in your senatorial district, as disclosed before the committee on credentials at Waco, and the action of the State Democratic convention in declaring ——— to be the rightful nominee for senator, you are without doubt justified in asking the voters of that senatorial district to scratch the name of ——— and write the name of ——— on the ticket before casting the ballot in the November election."

I mention these things as showing the character that was given to the political contest in certain localities. I do not exaggerate gentlemen, when I tell you this entire large volume is full of that kind of stuff, which it took weeks to develop and it would probably take weeks for you to hear it all.

A MEMBER. When was that contest?

Mr. BOX. In 1919.

The CHAIRMAN. Is there any evidence in there as to how they voted or may have voted as to their knowledge of the candidates?

Mr. BOX. That is my next point. They are very ignorant. I read from page 62:

"Q. Now, isn't it a fact that the way you got that ticket that the chairman of the precinct, Mr. ———, had a marked ticket and showed it to you?—A. Marked ticket?

"Q. Yes; and showed it to you, and you remembered the names?—A. Well, he told me the way we ought to vote, you know; but he did not have a marked ticket.

* * * * * * *

"Q. What did he say?—A. Why, he just stated he wanted to vote for these candidates, and I just said it was my opinion to vote for them, too, myself.

* * * * * * *

"Q. Did you make out all of the tickets that you fixed that day the same way; for the same candidates?—A. For the fellows who didn't know how to make out their own tickets; yes.

"Q. Made them all the same way?—A. Because I asked them who they wanted to vote for, and they said, 'We will do it the way you are going to vote, you know.'

"Q. They said, 'We will do it the way you are going to vote'?—A. Yes; and I voted it just the way I did my own.

* * * * * * *

"Q. And you made out about half of the tickets of that box?—A. About half."

On page 641 I will read one or two questions and answers of voters who testified:

"Q. You don't know who you voted for, do you? Could you give the name of anybody you voted for in the primary?—A. No, sir; I did not."

Mr. BOX. I did not get the name of this one. I am going to give the names of a good many, but I just give these to show the character of the vote (reading):

"He handed it to me, and I put it there in the presence of the presiding judge.

"Q. In the November election, you did the same thing, didn't you?—A. Yes, sir."

Now, at pages 643 and 644; this is another Mexican testifying, at page 643:

"Q. When you got there in the November election it was all ready for you then, too, wasn't it?—A. It was; certainly.

* * * * * * *

"Q. Do you know who you voted for in the regular election for governor?—A. I do not, sir.

"Q. Do you know who you voted for, for State senator?—A. Voted for Mr. Democrata.

"Q. For Mr. Democrata?—A. Yes, sir.

"Q. Who was he?—A. I don't know him, sir.

"Q. Have you ever met him?—A. No, sir.

"Q. Where does he live?—A. I do not know where he is now. That's all he knows (this is the interpreter speaking) is Mr. Democrata. That's all he knows about it."

* * * * * * *

"Q. What was he running for?—A. I ignore everything, sir; I don't know anything about it; they never tell us anything.

"Q. They never tell you anything?—A. They tell us to vote; that is all.

"Q. They tell you to vote. And in the November election they had all the tickets ready there, and you just come in and get a ticket and stick it in the box?—A. That is all; yes, sir.

"Q. Did you vote on November 5, 1918, in ——— County?—A. No; I only voted in the primaries."

Page 497, another Mexican:

"Q. Are you an American citizen by birth?—A. No.

* * * * * * *

"Q. Have you ever declared your intention of becoming an American citizen?—A. No.

* * * * * * *

"Q. Did you vote on November 5, 1918, in ——— County?—A. Yes."

Another Mexican, same page:

"Q. Are you an American citizen by birth?—A. No.

* * * * * * *

"Q. Have you ever declared your intention of becoming an American citizen?—A. Never have.

* * * * * * *

"Q. Did you vote on November 5, 1918, in ——— County?—A. Yes."

While I was making a statement of these or similar facts before this committee on February 2, 1920, the late Hon. W. N. Vaile, then a member of this committee, interrupted me and said:

"Mr. VAILE. There are several counties in Colorado where each party has been accused in turn of voting the whole county, practically, and I guess this accusation could be sustained by a large preponderance of the evidence." (Hearings, February 2, 1920, p. 308.)

Mr. J. J. Jewitt, manager of the Riverton Lumber Co., of Riverton, Wyo., writes:

"I have seen enough of these people to come to the conclusion that they make a very poor class of citizens. I sincerely trust that something can be done to prevent hordes of these ignorant people from entering the United States * * *."

Mr. Hardeman Roberts writes from Devine, Tex., and in speaking of those who are opposing this legislation mentions several classes and lists "the politician who is building up an easily controlled voting machine in all the border cities," saying "The Mexicans will soon have the voting strength as they are most all voted either legally or illegally."

Mr. August Fast writes from Denver, Colo., as follows:

"We have never been able to assimilate them, no more than Texas has. * * *"

Ex-Secretary David F. Houston, formerly a member of President Wilson's Cabinet, and for a long time president of the University of Texas, located at the State capital, where he became thoroughly familiar with these people, in a letter of February 24, 1928, approving my position, said:

"I do not understand what certain people in Texas are thinking about when they clamor for the admission of more Mexicans. They are evidently disposed to sell their birthright for a mess of pottage. The arguments that those use who wish the admission of ignorant labor are similar to those used by the people who gave us slavery. I shall have no fear of America if we can have the right sort of people. The right kind of people can run any sort of government; the wrong sort of people can not run any kind of government. It is evident that we are going to need better and better people."

Mr. W. L. Rider, civil engineer, writes me from El Paso, Tex., under date of February 27, 1928:

"There are various political disadvantages in the Mexican situation which permits an inferior foreign element unfamiliar with American traditions to match their votes against intelligent American citizens. This has reference to the peon type, who are excluded from the franchise in Mexico but are permitted to vote over here. * * *"

The commander of an American Legion post in a good Texas town 75 to 100 miles from the Mexican border wrote me under date of February 27, 1928, saying:

"Any man with vision of 10 years ahead can see that unless the present influx of Mexicans is checked they will be in control of this country; that is, economic and political control by reason of being the balance of power. The man who controls the Mexican vote in San Antonio to-day dictates the politics of the Bexar County political machine. The same is true of this town, and I say this without fear of successful contradiction. * * *"

Writes P. G. Nelson, of San Antonio, Tex.:

"If the present influx of Mexicans keeps up for another 10 or 15 years, together with the natural increase, Uncle Sam had better move our southern boundary to * * * or near the Red River line, because the Mexicans will have nearly all of Texas * * * and it will be an utter impossibility for a white man who wants to live as a human and an American should live, to compete with them and even exist, much less live. * * *"

Every normal American feels a special interest in our ex-service men. Employment for decent returns is necessary to a chance for them to make their way in the world.

MANY OF THE NATION'S EX-SERVICE MEN AMONG THOSE BEING DISPLACED BY MEXICAN PEONS

This, too, is supported by statements before the committee, from which I quote:

Mr. Box. The commander of an American Legion post in a substantial Texas town wrote me a letter February 27, 1928, from which I quote:

"As a commander of * * * American Legion post, I recently attempted to place some ex-service men in employment on the farms. They were very pointedly told that they could go to work with and perform the same labor as the Mexicans at $1.25 per day. They had to decline the employment because they could not support a family on that wage. * * *"

N. E. Rafert writes me from Roscoe, Calif., under date of February 21, 1928, complaining of the flooding of the country with Mexican labor and the crowding out of white labor by the Mexican peons, mentioning many pathetic incidents and relating one in which a needy veteran of the World War figured pathetically. After seeing that white men were repeatedly denied employment on a certain job, while Mexicans were being constantly taken on, the writer undertook to intercede for his needy friend on the ground that he was an ex-soldier. I quote his exact words:

"I reminded him of Mr. Chitwood; that he was an ex-soldier, and needed work. The boss said, 'I don't give a damn if he is an ex-soldier; I would rather hire a Mexican.'"

Adlai S. Baker, an attorney of El Paso, Tex., wrote me March 19, 1928, saying, in part:

"An American ex-service man came in and asked the secretary of the * * * to find him a job. She said she could not. The man asserted that he was hungry and broke. She refused to give him or lend him anything. A few minutes after he went out a greasy Mexican woman came in for help. The * * * secretary gave her an order for $5 worth of groceries. * * *"

"I ask you in all candor, who was entitled to the groceries?

"An ex-service man, who remained in the office after the hungry ex-soldier had gone told of the gift to the Mexican.

* * * * * * *

"The writer is an ex-soldier who was disabled in France fighting for this country. I fought and many others fought to keep this country safe for Americans. Now, many of my comrades who gave their all can not get a job because some peon has taken it away. The country is being taken by aliens, not with bayonet and bullet but by a peaceful penetration and settlement. * * *"

Mr. Box. Read the other letter which came in from the soldier while we were at lunch.

(Mr. Box's secretary read as follows:)

ARLINGTON, CALIF., *February 17, 1928.*

Hon. JOHN C. BOX,
Member of Congress, Second Congressional District, Texas,
Washington, D. C.

HONORABLE SIR: Am inclosing an editorial taken from the Daily Press, of Riverside, Calif., February 13, 1928, having reference to the Mexican immigration question.

This also is having serious effect upon thousands of our former military service men, who are asking for the right to work and live. These men had the "guts" 10 years ago to offer their lives for the country when the Nation's honor was at stake. Our country should now protect them and their families against this horde of inflowing non-English, un-American, uneducated, diseased peons.

Very respectfully,

DANIEL R. CAMPBELL.

Mr. Box. The government which does not protect the welfare of its working people, who are always a majority of its men, is derelict. The government which calls millions of its men, most of whom are working people, to its defense and requires of them the sacrifice of their time, their safety, their limbs, and even their lives, to maintain its freedom, standing, and power, and to help preserve its wealth, and thereafter disregards their welfare or the welfare of the laboring majority of them and permits peon aliens to supplant them in its industries, is not only derelict but it shows base ingratitude and stupid disregard for its own permanent welfare. Yet that is what the foregoing shows that the Government of the United States is being caused to do by selfish interests and leaders whose ears these selfish interests have.

Mexico's Government has always been an expression of Mexican impulses and traditions. Rather, it is an exhibition of the lack of better traditions and the want of intelligence and stamina among the mass of its people. One purpose of our immigration laws is to prevent the lowering of the ideals and the average of our citizenship, the creation of race friction and the weakening of the Nation's powers of cohesion, resulting from the interimixing of differing races.

ANOTHER RACE PROBLEM BEING CREATED

Again I quote from the committee hearings:

Mr. Box. In my original statement before this committee on this bill I pointed to several instances of race trouble created by the presence of these Mexican peons. I now call attention to other instances of race and labor trouble combined arising from the importation and use of such labor. I quote from a letter written by Mrs. A. L. Temple, of San Jose, Calif., on March 6, 1928. Mrs. Temple writes that she has worked in fruit picking and packing and lemon washing crews and at similar work from the line of Mexico into Washington State. Speaking of an incident, which she says occurred at Yakima, Wash., last November, Mrs. Temple says:

"After repeated failures to get work the white men chased the Filipinos from the fields, forcing them to board a train and leave permanently. They were justified in doing this. If the stream of blacks [meaning Mexicans] keep coming there will be more of such occurrences. * * *"

In another letter from west Texas it is said:

"This last year the ——— Oil Co., in laying a pipe line from west Texas to the coast, attempted to work all Mexicans here and was only prevented by the people arming themselves and not letting the Mexicans take their place."

This writer adds:

"My people came to this country when it was a part of Mexico and I would hate to see it go back to a majority Mexican population, especially of the peon class."

Hon. S. L. Wilson, superintendent of public schools, of Gregg County, Tex., wrote me a letter under date of March 9, 1928, from which I quote:

"Fight 'em, Mr. Box! One race question is too much; let's settle this other one by keeping them out. That you are correct there isn't a shadow of a doubt. 'What profiteth a man if he gain the whole world and lose his own soul?' Shall we sell Texas for cheap labor? What difference will it make whether they come from this continent or across the waters? Shall we ruin Texas in order to keep South American Republics in a good humor? If it isn't good for the North to let in white folks from across the Atlantic, how in the name of common sense can it be all right to let in hordes of another race across the Rio Grande? * * *"

Quoting again from Professor Handman, I read from his forecast of the race trouble the presence of masses of Mexicans will create:

"He will organize his group politically, and then what? Will he tolerate a school system which gives American children a good school building and nine months of schooling, but gives the Mexican children in the same community five months of schooling and a miserable wooden structure, and which spends on 58 American children $1,669 and on 182 Mexican children $724? I am not afraid of social conflicts, but social conflicts waged on the basis of race or nationality are the most cruel, the most intense, and the most useless. For the sake of a speeding up in the exploitation of our natural resources and the creation of a handful of newly rich and a greater consumption of high-priced automobiles are we creating for ourselves a social problem full of dismal prospects, of race hatreds, of bruised feelings, of social ostracisms, and, perhaps, of lynchings and the race wars of a twentieth century American city?"

Items like these could be quoted indefinitely.

Mr. Edward Gardner Lawrence, an editorial and feature writer and an author of several books, writes me under date of February 6, 1928, from El Paso, Tex., where he was sojourning, as follows:

"I have been in El Paso for six weeks, and the knowledge gained during that period of conditions on the border qualify me to intelligently second your remarks made in a letter to the Lufkin Chamber of Commerce. * * *

"God knows we have one wretched race problem on our hands—may another one not be added."

Mr. Percival J. Cooney, director of Americanization in the high school of El Monte, Calif., writes me under date of February 2, 1928, in part, as follows:

"For 15 years I have been in touch with the Mexican problem in California. I speak Spanish and know the Mexican immigrants intimately.

"Based on this experience, I have come to the conclusion reluctantly that the restriction on Mexican immigration is not only advisable but a positive necessity. If we do not have restriction, in a few years we will face intermarriage and a frightful race problem. In some communities in southern California feeling is already running high on this question. * * *"

I now read from a Texas press report dated February 9, 1926. It says:

MEXICANS ASK RACIAL EQUALITY IN TEXAS

"SAN ANTONIO, TEX., February 9, 1926.—Gov. Miriam A. Ferguson has been petitioned to put a ban on racial discrimination against Mexicans.

"Alejandro P. Carrillo, consul general of Mexico at San Antonio, who was denied service Sunday in a Granger, Tex., café, is the author of a protest growing out of the affair, which he referred to as a 'shameful discrimination.' Carrillo and Mexican conferees of Granger tried to get dinner at a restaurant and were invited to eat in the kitchen.

MIDNIGHT RAIDERS RAID MEXICAN CAMPS—OUTBREAK FOLLOWS WARNING SIGNS POSTED TWO WEEKS AGO—PEACE OFFICERS WILL EXTEND PROTECTION TO WORKERS

"With the darkness of night covering their deeds, 15 or 20 masked night riders last night visited Mexican camps and struck cold, chilling terror into the hearts of men, women, and children.

"This is the second demonstration made against the Mexicans in the past two weeks. On the former occasions signs were posted in their camps notifying them to leave the city at once. However, this notice was not obeyed, and it is thought to have brought forth the deeds of last night.

"Camps visited are situated on the Tiffin Road, on the Hamon Railroad near the Sinclair camp, and south of the Texas & Pacific station."

To keep out the illiterate and the diseased is another essential part of the Nation's immigration policy. The Mexican peons are illiterate and ignorant. Because of their insanitary habits and living conditions and their vices they are especially subject to smallpox, venereal diseases, tuberculosis, and other dangerous contagions. Their admission is inconsistent with this phase of our policy. Supporting this, I quote again from the hearings:

Mr. BOX. Now we come to the question of diseases among these people. A very large percentage of these unfortunate Mexican peons are afflicted with tuberculosis, venereal diseases, and the like.

I take from a recent report of the California Immigration Study Commission the following:

"Dr. S. J. Holmes, of the University of California, at a San Francisco meeting, discussing the Mexican influx, said of the Los Angeles epidemic: 'There were 32 cases of pneumonic plague, with 30 deaths; 7 cases of bubonic plague, with 5 deaths. This was confined, I believe, exclusively to the Mexican quarter.'"

Continuing his discussion of the conditions which breed disease and make it hard to control among these unfortunate people, Doctor Holmes said:

"In the campaign undertaken no less than 145,000 rats were exterminated; 2,473 buildings were demolished, which buildings had an appraised value of $747,000. At least 7,500 buildings were made ratproof, at an approximate expenditure to property owners of $2,777,000."

In a letter of January 24, 1928, the president of the California Immigration Study Commission, says:

"MY DEAR CONGRESSMAN BOX: Vincente Espinosa's case typifies the sanitation danger of unrestricted Mexican immigration. Two Espinosa children contracted smallpox. Their home was quarantined. Vincente had, however, the Mexican passion for gambling. Despite the quarantine, he slipped out to the pool room. Two men contracted the disease from him. Both died. Before dying they passed the disease on to 10 others. Of these, three more died. Vincente was sentenced to 30 days in jail.

"These five deaths illustrate the need of placing Mexico under the quota. * * *"

Quoting from the Texas Argus of January, 1928, page 9, I find the following:

"During the first 11 calendar months of 1927 there were a total of 2,732 deaths in San Antonio from all causes. Of this number, 575 were children under 2 years of age, or slightly more than 21 per cent. Of this number—575 children—there were 443, or 77 per cent, of them Mexicans, leaving only 132 of all other races combined. * * *"

Mr. BOX. Note that according to this report that the Mexican one-third of the population of San Antonio suffered 77 per cent of the child mortality.

I must give you one or two more pieces of evidence disclosing the great number of paupers and public charges which come upon us as a part of the flood which these selfish interests are loading upon our communities. On page 16 and 17 of A Report on the Indigent Migratory Consumptive in Certain Cities of the Southwest, published by the United States Public Health Service in 1923, will be found a discussion of one phase of this question as existing at San Antonio, Tex., some time prior to that, when the Mexican alien population of that city was considerably less than at present. I quote one paragraph from page 17 of the report mentioned:

"Race: More than one-half of all the cases were Mexicans. The migration question is a serious one for the border or near-border cities. Many migrants get in without examination by coming over the border without passing through the immigration stations. Although it is not possible to get statistical facts on the subject, the consensus of opinion among social workers in that region is that tuberculosis is very prevalent among the Mexicans. They, more than the resident Americans, are availing themselves of the facilities offered by the city of San Antonio. It is estimated that there are 35,000 Mexicans in a total population in San Antonio of 161,000, but over one-half of the cases of tuberculosis cared for were Mexicans."

These figures show that at that time the Mexican population, composing less than one-fourth of the total, furnished more than one-half the pauper consumptives.

The total Mexican population, alien and foreign born, of San Antonio was then probably less than 25 per cent of the whole population of the city. It has greatly increased and is now said to be 30 to 33 per cent of the entire population. The city has grown and its alien Mexican population has greatly increased since then.

As bearing upon this same phase of Mexican mass immigration, I quote from a statement made in the Star-News, of Passadena, Calif., on February 10, 1928, by Dr. J. L. Pomeroy, county health officer of Los Angeles County:

"CITES MENACE OF MEXICAN PROBLEM—HEALTH OFFICER OF COUNTY URGES CONTROL PLAN—POINTS TO DANGER FROM DISEASE—COST OF CARING FOR MANY INDIGENTS BURDENSOME

"LOS ANGELES, February 10.—An earnest plea that employers of foreign labor awake to the seriousness of the Mexican problem facing California was made by Dr. J. L. Pomeroy, county health officer.

"'Probably no other organization is as cognizant of the seriousness of the Mexican problem as is the county health department,' said Doctor Pomeroy. 'On it falls the burden of the battle against infectious disease brought in by these people, of the taking care of the sick themselves, and, indirectly, of relief for the indigent.

"'Our tuberculous division alone found 4,000 cases to have been infected before they crossed the border. This is practically true of all the infectious diseases we find in these people. A few years ago the fearfully virulent black smallpox was brought here from Mexico. It cost the county 200 deaths and the vaccinating of more than a million persons to stamp it out.

"'Of 25,000 persons supported by county relief, 80 per cent are Mexicans. The county sanitarium became so crowded with Mexican tuberculosis patients that a ruling had to be made requiring a patient to be a resident in the county a year before being eligible to admittance.

PAYS HUGE SUMS

"'The county is paying staggering sums to take care of Mexico's sick and indigent people,' the county health officer avers."

In a report by the California Commission of Immigration and Housing made to the governor of that State in January, 1926, it is said:

"The Mexicans as a general rule become a public charge under slight provocation and have become a great burden to our communities.

"In Los Angeles, where approximately 7 per cent of the population is Mexican, the outdoor relief division states that 27.44 per cent of its cases are Mexican. The bureau of Catholic charities reports that 53⅔ per cent of its cases are Mexicans, who consume at least 50 per cent of the budget. Twenty-five per cent of the budget of the general hospital is used for Mexicans, who comprise 43 per cent of its cases. The city maternity service reports 62½ per cent of its cases Mexicans, using 73 per cent of its budget. The bureau of municipal nursing and division of child welfare both state that 40 per cent of their clients are Mexican, and in the day home of the Children's Hospital 23 per cent of the children cared for are Mexican, while 12 per cent of the out-patient department cases are Mexican.

"In Pasadena, where 2.8 per cent of the population is Mexican, 6 per cent of the cases of its welfare department are of that nationality.

"The Long Beach welfare department reports that 21 per cent of its cases are Mexican, using 16 per cent of its budget, while only 1 per cent of the population of the city is of that nationality.

"Orange County, in which 10 per cent of the population is Mexican, reports that one-third of the general hospital cases are Mexican, as are also 50 per cent of the cases of the county aid commissioner, using 30 per cent of the budget.

"The county of San Diego reports that half of the patients of the county hospital are Mexican, while in the city of San Diego, where 5 per cent of the population is Mexican, two-thirds of the milk delivered from the free-milk station goes to that nationality.

"In San Bernardino County the welfare department reports 36.2 per cent of its cases Mexican, using 30 per cent of its budget. The county hospital states that 25 per cent of its cases are Mexican, using 35 per cent of its budget.

"The Associated Charities of Santa Barbara, wherein the Mexicans are 13 per cent of the population, reports 23 per cent of its cases Mexican, using 15 per cent of its budget. The general hospital reports 47 per cent of its cases Mexican and the Cottage Hospital Dispensary 75 per cent of its cases of that nationality.

"The Mexican population of Fresno County is estimated at 6 per cent of the total. Here the public-welfare department reports 13.7 per cent of its cases Mexican, using 9 per cent of its budget.

"For the most part the Mexicans are Indians, and very seldom become naturalized. They know little of sanitation, are very low mentally, and are generally unhealthy. Their children, however, who are born here are citizens and have all rights and privileges as such. This second generation has given our school department, juvenile and other courts a tremendous amount of trouble, and no doubt this will continue."

The percentage of Mexican population in these regions has greatly increased since 1926. All my advices indicate that the percentage of diseased paupers has even more rapidly increased. I quote further from the same report, presented by me during the committee hearings:

"To sum up the elements of danger from the unrestricted immigration of Mexicans:

"1. They drain our charities.

"2. They or their children become a large portion of our jail population.

"3. They affect the health of our communities.

"4. They create a problem in our labor camps.

"5. They require special attention in our schools and are of low mentality.

"6. They diminish the percentage of our white population.

"7. They remain foreign."

Mr. Box. One of the leading reasons for refusing to admit a large number of these Mexicans is that so many of them become paupers. One of the big reasons that prompted our immigration laws is the necessity of protecting the country against great numbers of people who become public charges. If one is liable to become a public charge that is sufficient ground to exclude him from the United States.

The protection of American society against the importation of crime and pauperism is yet another object of these laws. Few, if any, other immigrants have brought us so large a proportion of criminals and paupers as have the Mexican peons. This is proven by the hearings from which I quote:

Mr. Box. Turning to the State of California again, the California Immigration Study Commission submits a report, one paragraph of which reads as follows:

"* * * At a Commonwealth club meeting, called to discuss Mexican immigration, State Prison Director Alco stated: 'In San Quentin prison, of 3,358 prisoners, we have 438 Mexicans. Forty per cent * * * are eligible for deportation. Of the entire violations of prison laws and rules, 60 per cent are charged to the Mexican population. Of the 113 prisoners executed since 1893, 13 were Mexicans. California is supposed to have almost as many Mexican prisoners as the entire prison population of Rhode Island or of Nevada.'"

The States are having difficulties with the Mexicans. The following is a clipping from the El Paso Daily Times of January 8, 1926, showing the indictments returned by one grand jury:

NARCOTIC INDICTMENTS

"Those named in indictments returned for violation of the narcotic laws included:

"Saul Hernandez, Gonzales Lopez, Clemente Holguin, Gil Ornelas, Pedro Maldonado, Luis Munoz, Fernando Gonzales, Manual Gonzales, Francisco Salario, William A. Fullmer, N. C. Norris, G. L. Crowder, Francisco Anchondo, Edward I. Hoffman, E. Marquez, Pedro Marquez, William Bentley and Cipriano Arroya.

LIQUOR INDICTMENTS

"Liquor indictments named Isaac Martinez, Jose Maria Rubio, Alejo Najero, Senovio Rodriguez, Jose Martinez, Crispen Tarrango, Manuel Salazar, Rosendo Rizo, John J. Nolan, Jesus J. Alivas, Emiliano Villareal, Guadalupe Garcia, Juan Aguilar, Jesus Torres, Enrique Lazcano, Miguel Guerra, Feliciano Campo, Jose Gonzales, Enrique Gallegos, Martin H. Holguin, Luis Marquez, Teodora Alvarado, Pedro Hernandez, Francisco Valesquez, Felipe Rivera, Guadalupe Hernandez, Jose Hernandez, Ventura Galindo, Harry Stringham, Jesus Salas, Andreas Mora, Pedro Hernandez, C. Provincio, Benito Martinez, Robert Gonzales, Demas Dias, Juaquin Martinez, Victor Moncada, Pablo Baisa, Edward Kelly, Hannigan Mills, Frank H. Payne, Enrique Lazcano, Pedro Estrada, Manuel Corta, Felix Lara, Eustacia Alvarez, Raynundo Barron, Jesus Abeyta, Herculano Ruelas, Jesus Uranga, Victor Villareal, and Nat Lewis.

ALIENS INDICTED

"Violations of immigration and passport laws included Josefa Ruinz, Andre Vega, Francisco Ramirez, Pedro Garcia, Antonio Navarro, Berta Trejo, Francisco Sanchez, Lorenzo Acosta, N. F. Castango, Juan Delgado, Manuel Gracia, Genaro Alonzo, Jesus Navarrete, Catariono Rodarte, Antonio Ronquillo, R. G. Obise, Joaquin Hernandez, Pascuel Reyes, Jose Carbajal, Juana Ramirez, Domencio Facciola, Rocco Fida, Antonio Castagno, Angelo Daviolo, and Michael Kado.

"Gerardo Marquez was charged with conspiracy to violate the immigration laws.

"In a statement made before the House committee on February 9, in which he opposed the passage of the Box bill, but advised the committee that he believed it would be unsafe to loosen the immigration laws to permit more Mexicans to come in, Hon. CLAUDE HUDSPETH, Representative in Congress from the El Paso district, presented the following telegram:

"'Records Federal court, July, 1924, to February, 1925, inclusive, show out of 619 indictments 387 Mexican names, 127 Americans, and 105 European names. Many of these Mexicans probably American citizens for years. Records do not show citizenship. * * *'"

The number of such reports coming from California, Colorado, Arizona, New Mexico, and the whole Southwest, through the press and from public and private charity organizations, is very great and covers the whole period of mass peon immigration from its beginning until now.

The volume of Mexican immigration, the attending circumstances, and the prospects for its continuance and enlargement are such as to make this an important part of one of the Nation's greatest problems. Mexico has nearly 15,000,000 people who are prolific breeders, capable of producing millions of new inhabitants every year.

Their economic condition will continue worse than ours for an indefinite time and cause their laborers to want to migrate to the United States. Under a well-known law of population, the gaps left at home by those who come from year to year will be rapidly refilled by natural increase. Thus Mexico will become an inexhaustible source of this low-grade immigration.

Immigrants who have poured upon our shores from Europe and Old World countries have had to pay the expense of land travel in reaching foreign seaports, after which the heavy expense of ocean transportation had to be paid. Mexico's masses have only to tramp to the border. The expense of their transportation, whether paid by them or others, is trifling compared to the cost of crossing the ocean from Europe or Asia to America. The methods by which labor importers reach them and induce them to come are inexpensive and easy. The building of barriers against the flood flowing in from elsewhere must increase the inpouring from Mexico. Unless it is checked it will continue with increasing volume. The hearings from which I quote sustain this proposition:

Mr. Box. There has been no United States census since 1920, but there have been many estimates of the alien Mexican population now in the United States. Some have placed it as high as 4,000,000. Others place it at 3,000,000. Both of these figures are probably somewhat high.

The Los Angeles Times, which is opposing this legislation, in its issue of September 4, 1927, says:

"Immigration officials estimate that at least 50 per cent of the, at least, 1,500,000 Mexicans [meaning alien Mexicans] in the United States, entered illegally. * * *"

This estimate, made by the department best informed on the subject, is probably conservative in being too low.

In 1920 there were 486,418 alien-born Mexicans in the United States. The difference between these figures and the 1,500,000 represents our gain in alien-born Mexican population within the last eight years, and amounts to more than 1,000,000, and considerably more than 100,000 for each year of the period. The average number of incoming alien Mexicans shown by the report of the Commissioner General of Immigration since 1920 is a little less than 50,000 per year—48,570 annually, to be exact. In other words, our increase in alien-born Mexican population has been greater than the sum total of all the incoming immigrant Mexican aliens shown by the report of the Commissioner General of Immigration.

Whether we take the actual figures of the census covering the period from 1910 to 1920, or the census for 1920 and the present estimated alien-born Mexican population in the United States, we are gaining in our alien-born Mexican population faster, rather than slower, than the reports of the Commissioner General of Immigration show.

In addition to the above, I state to the committee that the alien Mexican population of the United States is increasing at an enormous rate. This increase is manifest in the villages, in the sawmills, on the railroads, in the slums of the cities, in moving trainloads of them, and in swarming Mexican populations extending from the border of Mexico to the Canadian line and far eastward.

The white laborers and citizens of Hawthorne, Los Angeles County, Calif., send me a resolution passed at a public meeting in which they say:

"* * * When the crop season is over these Mexicans, or a great majority of them, drift into the towns, thereby taking the common-

labor work from poor white laborers by doing such work at greatly reduced prices for their labor than the poor white man can afford to work for. As evidence of this fact more of these Mexicans are now at work in the cities of this State while there are no less than 100,000 idle white men in the city of Los Angeles alone."

J. C. Brodie, of Superior, Ariz., writes:

"I have lived in Arizona 30 years. During that time the Mexican population, due to unrestricted immigration, has increased three times faster than the white population, * * * while white districts in our camps, towns, and cities have been abandoned by the whites and taken possession of by the Mexicans. * * *"

Mrs. C. I. Dunham, of Pomona, Calif., writes:

"It seems that in just a short while all the white working people will have to leave our wonderful southern California and give it up to the lowest class of Mexicans. * * *"

R. C. Joslyn, of Phoenix, Ariz., writes:

"Instead of returning to Mexico, thousands of Mexicans have remained, and a greater portion of the imported horde is remaining each year, thus swelling the ranks of those who have been imported in preceding years."

James Mack, of El Paso, Tex., writes:

"A permanent race migration is in progress. * * *"

The Arizona State Labor Journal of January 18, 1928, among other things, said:

"* * * The permanent Mexican population of Los Angeles, San Diego, El Centro, Yuma, Phoenix, Tucson, Pueblo, El Paso, San Antonio, Houston, Dallas—in fact, every city and town in all the States on the Mexican border—is growing by leaps and bounds. Every citizen in the Southwest knows this to be true. * * *"

From San Jose, Calif., Mrs. A. L. Temple writes:

"It is claimed that Mexican laborers nearly all return to Mexico when the season's work is done. This is not true, and most of those claiming it know it is not true, and those who believe it to be true can assuredly find how false the statement is if they desire to do so."

From Wistner, Okla., H. L. Hunnicutt writes:

"Are they going to run us out of our own country and take it away from us entirely? It has all but come to that now."

H. Eugene Tenney, a traveling lecturer who has recently been visiting in the Southwest and observing conditions, writes me from El Paso, Tex., saying, among other things:

"Nearly all come to stay, notwithstanding the erroneous statements to the contrary."

Mrs. Linnie Lee Blades writes me from Sugar Land, Tex., which is 300 or 400 miles from the Mexican border, relating the following incident:

"I overheard this conversation not long ago. A stranger stepped off an evening train one Saturday evening and hailed a fellow with this: 'Say, Buddie, what you call this—Mexico? Why, I have been all over Mexico, and I never saw more Mexicans at a place this size!' The man replied: 'Yes, Mister; this is Mexico; they've moved 'er across the Rio Grande!'"

Hon. L. H. Harrison, probation officer of Fort Collins, Colo., wrote me on March 8, saying, among other things:

"The flood of immigration into the United States from the Republic of Mexico * * * is growing at an alarming rate and threatens dire injury to wholesome American community life. * * *"

County Judge A. B. Crane, of Raymondville, Tex., in the Mexican border country, under date of March 10, 1928, writes me saying, among other things:

"These Mexicans never go back to Mexico. They go on north and soon learn to say that they are native-born Mexicans and that they are citizens. * * *"

R. L. Williams, of Brownwood, in western Texas, writes:

"I resided in old Mexico following my profession of mining engineer for 15 years. Speak and read Spanish fluently. * * * On account of the political turmoil in Mexico practically the entire labor class will move to United States in next five years. Wouldn't surprise me to see 5,000,000 here by 1930. * * *"

* * * * * * *

Arthur Campbell writes from Denver, Colo., March 4, 1928, saying, in part:

"If you don't put the bars up now, this will be a black man's country inside of 50 years. I know what I am talking about from two years' experience working in the Colorado coal mines. * * *"

W. S. Parker, writing from Houston, Tex., under date of March 14, 1928, to a Texas Representative in Congress, said, in part:

"For the past 18 months I have covered most of the territory in Texas in a car and it is astounding to discover the number of native-born white men footing it around the State looking for work. I give lots of these fellows lifts in my car and have plenty of opportunity to size them up. The Mexicans are far too numerous for their line of work and they are tramping in an effort to obtain employment. Sometimes I see as many as 20 in a bunch camped along streams in abject poverty.

"These Mexicans are not confining their service to agriculture and stock raising. They are in Houston, Beaumont, Port Arthur, Galveston, and in the smaller towns by the thousands, living in rag shacks, penniless. They are now forming a great portion of our criminal element. They are bootlegging and hijacking and indulging in petty thieving to a large extent on account of meager employment. They are in such condition that they will work for less than half what it requires for a decent American citizen to exist upon, and they are entering the channels of labor in every line, displacing thousands of honest citizens of this country.

"The sawmill country is infested with them and they are holding down wages around these mills to an average of $1.50 per day. The * * * mills are like Mexican villages, and around these plants you can see a long line of Texas boys striving to obtain employment even at those prices, but they can't obtain it because the Mexican spends all his money in the commissaries and can be cuffed around by a foreman to a greater extent than a negro. They are even driving the negro away from these industrial plants into our cities * * *."

Hon. George W. P. Hunt, present Governor of Arizona, writing me about this subject on March 13, 1928, says in part:

"I am convinced that there are at present in the State of Arizona more Mexican workmen than we can possibly assimilate for many years.

"The Highway Department of the State of Arizona has on file more than 3,000 applications for employment by citizens of our State. I believe that a large proporiton of these citizens of Arizona who are without jobs have been supplanted in their former employment by Mexican immigrants.

"I am very confident that there now exists in Arizona a large surplus of both citizen and alien labor, and that no necessity for further supplies of labor at this time exists in this State. I believe the existing surplus is sufficient to care for our labor needs for a long time ahead * * *."

Mr. F. J. Stuart writes me from Dallas, Tex., under date of March 21, 1928, saying in part:

"I have been advertising or business manager of daily papers in El Paso, San Antonio, Houston, and Fort Worth. I have lived in Texas for 35 years. I have traveled all over the State for years. I know every section of Texas.

"The State is flooded with Mexicans, who have driven white men and negroes from their jobs, lowering wages, and brought ruin to untold numbers. * * *

"Mexicans swarm across the Rio Grande like vermin escaping from a bonfire. I do not believe that a respectable fraction of them cross legally * * *."

Members of the committee can, by consulting with gentlemen who have no financial interests in the question and who have watched this movement of population, verify the statement that we have a great Mexican migration to the northward which is increasing and seriously menacing the welfare of laboring people, working in transportation, in industry, as farm laborers, farm tenants, and small farmers, and imperiling social and health conditions and the public welfare.

The most dangerous mass immigration now menacing us is that from Mexico.

Our efforts to deal wisely and adequately with Mexican peon immigration from the standpoint of public and patriotic interest are opposed by the same selfish interests which have hindered all the Nation's efforts in dealing with our immigration, namely, the short-sighted, present profit-seeking interests of those who want cheap labor. If it were not for this opposition, the grave question which I am suggesting would be settled soon, and the settlement made would be with a patriotic view to the public welfare now and hereafter.

If we ask Mexico, Haiti, Cuba, and South America to consent to the application of this necessary restriction, they will, of course, refuse, and the evil stream will continue to pour its pollution into the mass of our population.

Efforts to obtain the consent of foreign countries to our immigration policy have been an unbroken failure throughout the history of our dealing with the problem. More than one presidential administration tried to settle the Chinese immigration question by the Burlingame treaty, in which it was recited that the right of races to migrate was inherent and inalienable. This was to apply as between the hundreds of Chinese millions and America. The United States Congress had to cut the Nation's way out of that ruinous entanglement.

Italy did not consent to our present law, but wanted to handle the subject by treaty to which her consent would be necessary, but the Constitution had vested this power in Congress, and Congress exercised it, accomplishing the Nation's purpose and helping to save its future. Other instances could be cited; one more will be enough. Japan had interests and a will concerning Japanese immigration in conflict with the interests and will of the United States. Every effort was made to avoid having America declare its will by congressional action as our Constitution contemplates. So long as we dickered with that question, consulting any but our constitutional rule, it remained un-

settled and troublesome. It would have been with us yet had Congress waited for the consent of a foreign power or left that question to be settled in any but the constitutional way; but the will of America was accomplished in the manner provided by the fathers. The world did not crumble, its peace was not disturbed, but our friends of former times remain our friends, respecting us and being by us respected. Any other course would have continued the question and the irritation it caused.

These and other national experiences in dealing with the immigration problem should be recalled by the public when men say that in this instance we must consult the wishes of the people south of the Rio Grande or farther south.

Ladies and gentlemen, practically all of the reasons which have moved the United States to adopt and adhere to the policy of restricting immigration from Europe and Asia argue for the restriction of peon immigration from Mexico and the countries to the south and east. The difficulties which folly and greed have heretofore thrown in the Nation's path are being thrown in its way now. Let us hope that the people of these times and the membership of this Congress will be as wise and courageous as those who have preceded us.

Quotations from statements of other Representatives in Congress before the committee in support of the Box bill:

HON. EUGENE BLACK, REPRESENTATIVE FROM TEXAS

Mr. BLACK. My name is EUGENE BLACK and I represent the first congressional district of the State of Texas. I wish to record my support of the Box bill, which is to place under quota restrictions certain countries in the Western Hemisphere, which at the present time are exempted from the quota restrictions by subdivision (c), section (4) of the immigration act of 1924.

* * * * * * *

The Texas papers carried an account of my reply to the West Texas Chamber of Commerce, and since then I have received a good many letters commending my stand. One of these is from a school superintendent of a town in west Texas, and, among other things, he says:

"Permit me to congratulate you upon your stand in favor of Mr. Box's plan for restricting Mexican immigration and against the selfish, nearsighted, provincial policy of the West Texas Chamber of Commerce as expressed in Secretary Wade's communication to you.

"I assure you that the attitude of the West Texas Chamber of Commerce is not representative of the opinion of a majority of the people of west Texas. It is founded, in my opinion, upon the overwilling desire of a few to 'boost,' as they think, this section at any cost. Personally, I think the cost is too high.

"I have had many opportunities to observe the deleterious effects of Mexican immigration upon the schools, community, and farm life of west Texas. I have lived in west Texas since 1906 and have seen the vast increase in Mexican population in that time. I have seen whole communities become Mexicanized, great plantations once farmed by whites, now tilled by exclusively Mexican labor. The white cotton farmer is forced off the farm. The schools are severely injured, the community life reverts to that of Mexico."

I do not think this school superintendent overstates the seriousness of the situation. I think he voices what is in the minds of many thousands of people in Texas.

* * * * * * *

Mr. SCHNEIDER. Have you any idea of what percentage of the immigrants from Mexico and the countries of continental America and adjacent islands are of the white race?

Mr. BLACK. No; I did not come armed with statistics in regard to that. However, I can get that for you. I have a large amount of data in my files, but my colleague, Judge Box, has made as exhaustive a study of this immigration subject as any man in Congress, and I know that he is prepared to go into every phase of the matter, and I felt it would be an imposition on the committee for me to come prepared to discuss the statistical features of it, knowing that Judge Box intended to cover every phase of it.

HON. MORGAN G. SANDERS, REPRESENTATIVE FROM TEXAS

Judge Box. I will now ask Mr. SANDERS, of the third congressional district of the State of Texas, to make a statement in regard to this bill.

* * * * * * *

Mr. SANDERS. Thank you. I desire to say, at the outset, that when I was first elected to Congress I advocated prohibiting all immigration. I still feel that way about the matter of immigration.

I am supporting Judge Box's bill whole-heartedly.

* * * * * * *

I know I voice the sentiment of the majority of the citizens, not only in my district but in the great State of Texas, when I say they indorse the Box bill. The only opposition to it that I know anything about comes from that class, small in numbers, who are farming by proxy—that is, who do not till the soil themselves, but have their land cultivated by cheap Mexican labor.

* * * * * * *

I want to give you an extract from a letter which I have received from Mr. J. L. McKinley, a farmer at Big Sandy, Tex., which shows you how the farmers are feeling generally on this proposition.

"I wish you would render all the assistance you can to the Hon. JOHN C. BOX in trying to control the hordes of daily germ-carrying Mexicans from flooding our State with cheap labor. They are hurting the cause of all the common people to such an extent that it will breed something bad if not stopped. I have been here a long time and must say that I have never seen the like before. Thousands of people can't get work and other thousands who are lucky enough to get work find wages so low that they can't make both ends meet and it is all caused by these hordes of Mexicans. They are used by the trainloads on all big construction works and our common labor is crowded out. We don't need them on the farms. We are raising too much cotton now. They ruin the schools; they carry germs; they add nothing to society. All they want is a hovel in which to stay. Must we common people be brought to their level. We can not do so. Please do what you can to help us."

* * * * * * *

HENDERSON CHAMBER OF COMMERCE,
Henderson, Rusk County, Tex., February 10, 1928.

Hon. MORGAN G. SANDERS, M. C.,
Washington, D. C.

DEAR MR. SANDERS: I am requested to advise you that the Henderson Chamber of Commerce has passed a resolution indorsing the bill of your colleague the Hon. JOHN C. BOX on immigration, having particular reference to the provision to prohibit the importation of the large quantities of Mexicans to Texas.

We are of the opinion that these are brought in to cultivate large acreage on cheap labor, in competition to the tenant farmer, who, we believe, it is the Government's duty to protect and encourage.

Large acres of the western plains through the importation of the Mexicans are being cultivated in cotton on a large scale, which is disastrous to the entire South, as the one particular question with us is to reduce rather than increase the present cotton acreage.

We are advising you that you may know our attitude in the matter.

With kindest personal regards, I am yours truly,

E. M. PRESTON, *Managing Director.*

HON. MILES C. ALLGOOD, REPRESENTATIVE FROM ALABAMA

Mr. RUTHERFORD. The white people are now willing to work upon their farms, and they do more work than when the negroes predominated in those communities.

Mr. ALLGOOD. That is right

The CHAIRMAN. If the colored people leave those communities, the white people have to do the work there, if there is any work done?

Mr. ALLGOOD. Obviously.

Mr. BOX. And as a result the community has a greater degree of prosperity?

Mr. ALLGOOD. Yes. We are fairly prosperous down there. Our people are marrying, rearing families, and establishing homes. We have no rich people there. In these counties I represent there is not a single millionaire.

The CHAIRMAN. Is not this about the picture—you feel that your State and the whole South is coming up from conditions that were thrown upon it, and that as it comes up and raises cotton as a crop, if cotton is raised by labor not continuously employed in the southwestern part of the United States, and that cotton raised in the southwestern part of the United States comes in competition with your cotton, which is raised by people who stay in your communities all the year round, you will be at a decided disadvantage and the whole machinery will be thrown out of balance?

Mr. ALLGOOD. That is the story. Furthermore, in the Southwest that land does not require fertilizer to produce cotton. Our land does require fertilizing.

Mr. BOX. Can your small farmers live and compete with Mexican peon labor which cultivates the vast level areas of the Southwest, where the land does not have to be fertilized?

Mr. ALLGOOD. Not in accordance with the standard of living that an American should have. The American could go down to the standard of the peon. However, who wants to see us go to that standard?

CONFERENCE REPORT—PENSIONS

Mr. KNUTSON. Mr. Speaker, I submit a conference report on H. R. 12381, granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and so forth, and certain soldiers and sailors of wars other than the Civil War, and the widows of such soldiers and sailors, for printing under the rule.

BILLS FOR THE RELIEF OF FRANK A. GRAB, ALEXANDER GINGRAS, AND MARY M'CORMICK

Mr. VINSON of Georgia. Mr. Speaker, I am directed by the Naval Affairs Committee to ask unanimous consent to take from the Speaker's table H. R. 1951, granting six months' pay to

Frank A. Grab; H. R. 11978, granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service; and H. R. 5897, for the relief of Mary McCormick, and agree to the Senate amendments.

The SPEAKER. The Clerk will report the first bill suggested by the gentleman from Georgia, with the Senate amendment.

The Clerk read the title of the bill, as follows:

A bill (H. R. 1951) granting six months' pay to Frank A. Grab.

The Clerk read the Senate amendment.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The SPEAKER. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

The SPEAKER. The Clerk will report the next bill, with the Senate amendment.

The Clerk read as follows:

A bill (H. R. 11978) granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service.

The Clerk read the Senate amendment.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The SPEAKER. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

The SPEAKER. The Clerk will report the next bill, with the Senate amendment.

The Clerk read as follows:

A bill (H. R. 5897) for the relief of Mary McCormick.

The Clerk read the Senate amendment.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I shall not object; but does not this amendment simply make the bill meaningless?

Mr. VINSON of Georgia. I will state to the gentleman from New York that they must prove their dependence.

Mr. LAGUARDIA. And if they were dependent upon this boy he would not be in the Navy at $21 per month?

Mr. VINSON of Georgia. That is correct.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

THOMAS HUGGINS

Mr. UNDERHILL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table H. R. 2657, for the relief of Thomas Huggins, and agree to the Senate amendment. I do this by authority of the Committee on Claims.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to take from the Speaker's table H. R. 2657, with a Senate amendment, and agree to the Senate amendment. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill and the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment.

The Senate amendment was agreed to.

ST. JOSEPH'S ROMAN CATHOLIC CHURCH, EAST BATON ROUGE, LA.

Mr. SINNOTT. Mr. Speaker, by direction of the Committee on Public Lands, I call up from the Speaker's table the bill (S. 3620) granting certain land to the congregation of St. Joseph's Roman Catholic Church, in the parish of East Baton Rouge, La., and ask unanimous consent for its present consideration.

The Clerk read the bill, as follows:

Be it enacted, etc., That there is hereby granted to the congregation of St. Joseph's Roman Catholic Church in the parish of East Baton Rouge, La., all the proprietary right, title, and interest of the United States to and in that certain tract of land in the United States Reservation or Garrison Grounds in the city of Baton Rouge, La., formerly used as a graveyard or burial ground by the congregation of St. Joseph's Church of said city in the parish of East Baton Rouge, which is not included in any of the lots or streets of said city, but lies on North Street and between Uncle Sam Street and the lot of the private property of H. E. Hausey, measuring 214.5 American measure, on line of said Hausey, running north by a depth of 497 feet, more or less, running east to the west line of Uncle Sam Street between parallel lines, and containing approximately 2.45 acres, as described in the act entitled "An act to provide for the disposal of a portion of the United States Military Reservation at Baton Rouge, La.," approved September 30, 1890; and the Secretary of the Interior, after such survey as he may deem necessary, shall, as a further evidence of title, direct the issuance of a patent in accordance with the provisions of this act.

SEC. 2. That the provision "unless hereafter required by the Secretary of War for the use of the United States for military purposes" be, and it is hereby, stricken from the act of September 30, 1890 (26 Stat. 503), and any implied conditions of reversion of title to the Government of the United States contained in said act be, and the same are hereby, repealed, it being the purpose and intent of this act to grant to the congregation of St. Joseph's Roman Catholic Church of Baton Rouge, La., free from restriction, reservation, or condition, full and complete title in and to the lands described in section 1 hereof.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

REGULATING POSTAL RATES

Mr. GRIEST. Mr. Speaker, I call up the conference report on the bill (H. R. 12030) to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes, and ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. The gentleman from Pennsylvania calls up the conference report on the bill H. R. 12030, and asks unanimous consent that the statement may be read in lieu of the report. Is there objection?

There was no objection.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12030) entitled "An act to amend Title II of the act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 9, 24, and 25.

That the House recede from its disagreement to the amendments of the Senate numbered 21, 22, 23; and number 8 with amendments so as to make the amendment read as follows:

"That section 202, Title II, act of February 28, 1925, is amended by the addition of a paragraph 4 to read as follows:

"'(4) *Provided*, That in the case of duplications entered as second-class matter where the number of individual addressed copies or packages to the pound is more than 32 and not in excess of 48, the rates of postage thereon shall be double the rates prescribed in paragraphs (1), (2), and (3-a) of the act of February 28, 1925; where the number of individual addressed copies or packages to the pound is more than 48 and not exceeding 64, the rates of postage shall be three times the regular rates, and for each additional 16 individually addressed copies or packages or fractional part of such number of copies or packages there may be to the pound the rates of postage shall be correspondingly increased over the regular rates.'"

And the Senate agree to the same.

The committee of conference have not agreed on amendments 1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, and 20.

W. W. GRIEST,
C. W. RAMSEYER,
THOS. M. BELL,
Managers on the part of the House.

GEO. H. MOSES,
L. C. PHIPPS,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (H. R. 12030) entitled "An act to amend Title II of the act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes," submit the following statement in explanation of the effect of the action agreed upon by the conferees and embodied in the accompanying conference report, namely:

The differences between the House conferees and those of the Senate are on amendments 1 to 20, inclusive, which include rates on second-class mail matter and fourth class, the Senate insisting on a reduction in second-class matter below the so-called 1921 rates provided for in the House bill; the Senate conferees also insisting on the elimination in all zones of the so-called "service charge." Outside of second and fourth class rates the conferees are in agreement.

The House bill, to which the House conferees adhered, effects a reduction in revenue of $3,860,000 on second-class matter and $2,200,000 on fourth-class matter. The Senate bill, to which the Senate conferees adhered, effects a reduction in revenue of $7,610,000 on second-class matter and $14,640,000 on fourth-class matter.

W. W. GRIEST,
C. W. RAMSEYER,
THOS. M. BELL,
Managers on the part of the House.

Mr. GRIEST. Mr. Speaker, the situation here seems to be somewhat unusual and I will make a brief statement preliminary to moving for an agreement to the request of the Senate for a further conference.

At the last meeting of the conferees the House conferees understood that the Senate conferees were going back to the Senate for further instructions, which they did; and no doubt in accordance with proper procedure they presented a partial report to the Senate, and in order to keep the records of the House in proper shape it then became necessary for that partial report to be presented here also. This report was rejected by the Senate on Saturday last and a request made to the House for further conference.

The only amendment of importance agreed upon was on third-class mail. The other important amendments, on second-class mail and fourth-class mail, were not touched upon in the report, having been disagreed to in conference.

The parliamentary situation now seems to require that the partial report which was filed here shall be voted down and that the conferees be instructed to agree to the further conference asked for by the Senate. I therefore move that the report be voted down.

The SPEAKER. The question is on agreeing to the conference report.

Mr. KINCHELOE. Mr. Speaker, will the gentleman yield for a question?

Mr. GRIEST. Yes.

Mr. KINCHELOE. As I understand, one of the main things in disagreement between the conferees for the House and the Senate was with respect to the postal rates on second-class mail matter.

Mr. GRIEST. That was not the only one.

Mr. KINCHELOE. That was one of the main ones.

Mr. GRIEST. That was one of the three main ones. The three main things in disagreement were third-class mail rates, second-class mail rates, and fourth class.

Mr. KINCHELOE. The House adopted the 1921 rates and the Senate is insisting on the 1920 rates.

Mr. GRIEST. That is correct.

Mr. ASWELL. Will the gentleman yield?

Mr. GRIEST. Yes.

Mr. ASWELL. Was there a proposal made by the Senate conferees to agree on the 1920 rates in the first four zones?

Mr. GRIEST. That is the Senate bill.

Mr. ASWELL. Did they not try to compromise with our House conferees?

Mr. GRIEST. I believe they did.

Mr. ASWELL. It was so stated by Senator MOSES.

Mr. GRIEST. Yes.

Mr. ASWELL. What was the objection to accepting that very reasonable and proper compromise?

Mr. GRIEST. We did not come to an issue on that question. We simply passed that over.

Mr. ASWELL. Would it not be in order to move to instruct the conferees to agree to that, the Moses compromise?

Mr. GRIEST. I think not. We have to agree or disagree to the conference report.

Mr. BYRNS. I notice a statement made by one of the Senators on the proposition with reference to second-class mail, that the conferees on the part of the Senate proposed a compromise to the conferees on the part of the House which would strike a mean between the two figures which the Senator quoted, and would result in a reduction in revenue of $6,600,000. The statement was made that the House bill reduces the rate to a point where the postal revenues will suffer an estimated loss of $3,860,000. The Senate bill, it was stated, would reduce the revenue to $7,610,000. The Senator to whom I am alluding, as shown by the RECORD, made the statement that the Senate conferees proposed to the House conferees a compromise between the House bill and the Senate bill on rates on second-class mail matter which would reduce the revenues $6,600,000.

Mr. GRIEST. I do not recall the exact amount, but there was a compromise spoken of.

Mr. BYRNS. Of course, this matter has just come up and some of us at least have had no opportunity to even think of preparing an amendment, but it does seem to me on an important matter like this, especially with reference to rates on second-class mail matter, when the Senate conferees come with a proposition of compromise, willing to surrender their position and to go halfway in accepting the provisions of the House, there ought to be some disposition to compromise the matter.

Mr. SNELL. Is it not the fact that there is much more at stake than the one item which the gentleman has presented?

Mr. GRIEST. Yes; the gentleman seems to think that only second-class rates are involved.

Mr. BYRNS. My understanding is that was the main question of difference at issue between the conferees.

Mr. GRIEST. Oh, no; not at all.

Mr. BYRNS. And that an agreement could probably have been reached on the other matters in disagreement.

Mr. CRAMTON. Will the gentleman yield for a question?

Mr. GRIEST. Yes.

Mr. CRAMTON. As I understand the situation, inasmuch as the Senate has already recommitted the report, the gentleman asks the House to vote down this report and send the bill back to conference.

Mr. GRIEST. Yes.

Mr. CRAMTON. And the action which the gentleman now asks the House to take would be merely a preliminary proceeding to get the matter back into conference?

Mr. GRIEST. That is all.

Mr. CRAMTON. And would not be taken as a final expression of the House on any of the matters involved?

Mr. GRIEST. Not at all.

Mr. TILSON. The conferees will be free to confer as they were before if we vote down the partial conference report.

Mr. GRIEST. Yes.

Mr. BYRNS. If that is the case, I see no objection.

Mr. DENISON. Will the gentleman from Pennsylvania state to the House if he can about what the two bills we passed over the President's veto yesterday would add to the expense of the Post Office Department?

Mr. GRIEST. That has no relationship to this bill pending to-day, but I would say about $8,000,000.

Mr. RAMSEYER. It is more than that; it is between nine and ten million dollars—or to be exact, $9,721,097—if the other House passes the bills over the veto.

Mr. DENISON. In view of that fact we have by those two bills increased the expenditures of the Post Office Department $10,000,000, and it seems to me the compromise proposed by the Senate on the rate question is not much of a compromise, and I hope that the House conferees will not agree to it.

Mr. ARNOLD. Will the gentleman yield?

Mr. GRIEST. Yes.

Mr. ARNOLD. Does there seem to be any prospect for working out a conference report whereby the provisions of the House bill will be taken on the second-class mail?

Mr. GRIEST. It is going to be very difficult to work out a compromise on the whole bill, because we have to consider fourth-class mail and third-class, as well as first-class mail, but we are trying to agree. There are many other meritorious things in the bill not in dispute that are very important that we ought to reach a conclusion if possible.

Mr. ARNOLD. I was wondering why the conferees came back without an agreement?

Mr. GRIEST. Simply because of the parliamentary move to enable the Senate conferees to get a further expression from the Senate. We did not anticipate that it would come back to the House but discovered later that it should come here also in order to make a complete record.

Mr. ARNOLD. Then there is some prospect of the Senate receding?

Mr. GRIEST. There is a prospect; yes.

Mr. ASWELL. Will the gentleman yield?

Mr. GRIEST. I will.

Mr. ASWELL. Was it not proposed in conference that the Senate would yield on all other points if you would give them the 1920 second-class rates on the first four zones?

Mr. GRIEST. It was not; I was in conference all the time, and there was no such proposition made.

Mr. ASWELL. Has it not been made outside?

Mr. GRIEST. That I do not know.

Mr. ASWELL. It has been said to me that the Senate would yield on all other points. I believe the House conferees know this to be true.

Mr. GRIEST. I will ask the gentleman from Iowa [Mr. RAMSEYER] if I am not correct?

Mr. RAMSEYER. The gentleman from Pennsylvania is correct in his statement. The conferees agreed on the third-class rate, for instance; they agreed on the amendment as to library books; they agreed on the amendment in regard to the lighter stuff of second-class mail, where there are 32 or more pieces to the pound, and then they agreed on the disposition of the amendment for a parcel-post director; but on the amendments touching other second-class mail and fourth-class mail the Senate conferees wanted instructions.

The situation over in the Senate is this: The Senate by its action on Saturday rejected the entire report. They did not approve of the action of the conferees on the third-class matter or on the lighter stuff in the second-class mail or that relative to parcel-post director, and so everything is in the same situation it was when we went to conference before. As stated by the gentleman from Pennsylvania, the only thing that we can possibly do is to go back into conference, and the way to get into conference is to vote down the report and let the Speaker appoint conferees.

Mr. ASWELL. I would like to ask the gentleman if he heard any suggestion that the Senate would yield on all points except the second-class mail in the first four zones?

Mr. RAMSEYER. Oh, you can hear all kinds of statements from the outside.

Mr. ASWELL. Does not the gentleman believe that that can be reached, and would the gentleman agree to that Moses compromise if it can be reached?

Mr. RAMSEYER. The gentleman is asking a difficult question. We have got to pay some consideration to the revenue for the Post Office Department. We have got to pay some attention to the revenue of the Treasury. Every deficit in the Post Office Department comes out of the Treasury. The estimated deficit in the Post Office Department for this year will be $32,000,000. The added deficit on account of reduced rates in this House bill will be $13,000,000, which will make $45,000,000. The action of the House on yesterday will add $10,000,000 more, and that will make $55,000,000. If we accept the Senate bill it will add $25,000,000 more to the Post Office deficit, which would make a total of $80,000,000 deficit.

Mr. ASWELL. What other department, except the Patent Office, pays its own way?

Mr. RAMSEYER. The Post Office Department is an example of the Government in business, and it ought to be conducted on a business basis. I have contended for years here that it ought to be self-sustaining. It has been the policy of every Postmaster General in the history of the country to make the Post Office Department as nearly as possible self-sustaining.

Mr. ASWELL. Has it been self-sustaining lately?

Mr. RAMSEYER. Yes, at times; but more often there has been a deficit.

Mr. ASWELL. Does not the gentleman from Iowa recognize that if the 1920 rates were adopted on second-class matter the hundreds of thousands of pounds of mail that are now being handled by express companies and by trucks would come back to the Post Office and the department would not lose half as much as the gentleman says it would.

Mr. RAMSEYER. The gentleman from Iowa does not realize that, and that claim has not been urged by any representative of the newspapers.

Mr. ASWELL. I do not represent the newspapers, but I think it is true. I represent the American people.

Mr. RAMSEYER. Oh, I do not mean congressional Representatives.

Mr. ASWELL. It has been demonstrated over and over again before the gentleman's committee that that is true. If the gentleman is not convinced, I can show him.

Mr. RAMSEYER. Oh, no. I have heard all of the testimony. I have heard all of the claims of the representatives of the newspaper associations, and when I say that I do not mean Representatives in Congress. I use the term "representative" instead of the term "lobbyist." There has not been a claim like that put forward by any of those representatives. The strongest claim that has ever been made by responsible representatives of newspaper publishers is that it might add $1,000,000 to the revenue, which would still leave you four or five million dollars added deficit on second-class mail.

Mr. LAGUARDIA. The gentleman does not want to leave the impression that private operation would conduct the Post Office more efficiently and more economically, and transfer at the same time a letter from New York to San Francisco for 2 cents.

Mr. RAMSEYER. No. I said that this is an example of Government in business, and I want it conducted in a business way.

Mr. BYRNS. Mr. Speaker, will the gentleman yield?

Mr. RAMSEYER. Yes.

Mr. BYRNS. Do I understand that if this motion of the gentleman from Pennsylvania [Mr. GRIEST] prevails the House conferees will be in the position of the fullest and freest sort of conference, and the gentleman, as a conferee, will approach this matter in a spirit of compromise if one can be reached between the House and the Senate?

Mr. RAMSEYER. Certainly.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was rejected.

Mr. GRIEST. Mr. Speaker, I move to disagree to the Senate amendments and agree to a further conference asked by the Senate.

The motion was agreed to.

The SPEAKER appointed the following conferees: Mr. GRIEST, Mr. RAMSEYER, and Mr. BELL.

HARDWOOD-TREE INDUSTRY IN GEORGIA

Mr. EDWARDS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein an address by Gov. L. G. Hardman, of Georgia, on the opportunity and use of the hardwood-tree industry in Georgia.

The SPEAKER. Is there objection?

There was no objection.

Mr. EDWARDS. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address by Gov. L. G. Hardman, of Georgia, on the opportunity and use of the hardwood-tree industry in Georgia:

Most of us when we think of trees think in general terms; a felled tree is a source of lumber, and a living tree provides either shade or fruit for human consumption. It seldom occurs to us that the uses of trees, growing or cut, are widely varied and dependent on the kind of tree. Failing to comprehend the values of forest trees while they are alive, we may think of forest conservation as a sort of self-sacrificing act whereby we forego immediate profit in order that the next generation may have sufficient lumber for the manufacture of necessary articles.

A brief examination of the uses of trees will show that this attitude is a mistake. The value of the fruit of our forest trees as stock food is one that is too frequently overlooked. In Georgia we have numerous fruit-bearing hardwood trees. Too many of us destroy these trees that produce berries, acorns, chestnuts, chinquapins, muscadines, etc., and then after the land is cleared we plant crops of corn and peanuts to supply for hogs and cattle the nutrition they might have had from the tree fruits.

More than 20 years ago I planted honey locust, black locust, persimmon, mulberry, and black walnut trees to furnish feed for stock, and at the same time to grow timber for industrial uses. Some of the trees I havce found very serviceable as feed, because their fruits ripen at seasons when there is no grazing crop.

Examination of specific values of some of the hardwood trees of Georgia may be of interest.

The wild persimmon grows practically without attention on waste lands, and within 15 or 20 years produces a splendid timber crop. According to weights that I have estimated and measured, an average tree bears 720 pounds of fruit annually. Ten thousand trees, which would not cover more than 100 acres, would thus furnish 720,000 pounds of valuable feed for cattle, hogs, sheep, and colts. As the fruit contains 5 to 25 per cent of sugar, depending on the variety grown, its nutritive value is high. The pulp and seed are ground before feeding. If the persimmon is harvested before it ripens it has a high content of tannin, or tannic acid, which is valuable in the process of tanning leather.

The possibility of producing sugar commercially from the fruit is an alluring problem for experiment. If the sugar content is 20 per cent, we might have, besides our cattle feed, 14,000 pounds of sugar from 100 acres. If this sugar should prove to be of commercial utility a helpful industry might be added to the South, the magnitude of which may be seen when we compare the sugar content of the persimmon with that of the beet. When Napoleon in 1801 suggested making sugar from beets about 6 per cent was the estimated yield of beet sugar. An apparent objection that the persimmon seed would be difficult to remove might be overcome by the cultivation of a variety which has been found in Banks, Habersham, and Jackson Counties, Ga., and which is seedless. The timber of the persimmon tree is a most satisfactory fuel; a cord of the air-dried wood yields the same amount of heat as a ton of bituminous coal of good grade. Industrially, the wood is indispensable in the manufacture of shuttles used in textile mills; besides the home consumption, more than half of the shuttle blocks manufactured in America are used in foreign countries. Persimmon wood is used exten-

sively in the manufacture of golf clubs, and more than 100,000 rough persimmon blocks are used annually in making shoe lasts.

The dogwood, like the persimmon, is a hardwood tree of superior properties in hardness, toughness, fineness of texture, and smoothness when subjected to wear. Its timber uses are the same as those of the persimmon. The tree is easily and quickly grown on almost any type of land in Georgia. In the fall the tree bears beautiful red berries, good food for birds as well as cattle; when these berries mature they drop to the ground. The dogwood has an artistic as well as a utilitarian value; the beauty of 10,000 dogwoods blossoming on a 100-acre tract would be almost indescribable.

Although the sourwood was regarded by old-time lumbermen of the South as a sort of weed of the forest, it is now being exploited because of the decreasing supply of more valuable woods. Its size, however, necessarily restricts its use as timber to the making of small articles, such as golf clubs, tool handles, mallets, and bearings for machinery. The sourwood tree is oblong in shape, with spreading limbs and delicate white flowers, which bloom in June and July.

The tree occasionally attains a height of more than 50 feet, and has a tall, straight, slim trunk nearly 20 inches in diameter. Usually, however, the diameter does not exceed 10 inches. The flowers, on panicles or stems, somewhat like the lily of the valley, are 7 to 8 inches long. Presently the bloom drops, leaving a graceful seed pod. The beauty of both flower, leaf, and pod makes the tree commercially valuable for decorating purposes. But the chief value is it's honey-producing quality. The flowers are the source of the most beautiful honey and one of the most delicious flavors known. Mr. T. V. Cantrell, of Cleveland, Ga., who is one of the largest honey producers in the States, writes:

"I have known one yard of 50 hives of bees in Union County, Ga., to store 2,000 pounds of sourwood honey in one season—about 40 pounds per hive. I believe that other bees in the locality, including wild bees in the forest, must have taken at least that much additional honey. This would bring the estimated production to 4,000 pounds within the radius of this yard."

The tree derives its name from the fact that its leaves contain an acidic substance which, when the leaves are chewed, temporarily relieves thirst. As the acid imparts a characteristic sour taste, the descriptive name was applied.

The honey locust, a somewhat less valuable variety of hardwood, is useful in making pins, posts, railroad ties, and wagon wheels. Locust fence posts endure for years. When dry the wood is also one of the best of fuels. Both the thorny and thornless varieties of honey locust grow in Georgia. The thorny variety bears enormous crops, with the locust 6 to 12 inches long and having meat on the thick side, with many seed. Cattle find this locust very palatable. On suitable soil a 25-year-old tree should produce from 20 to 40 bushels of fruit. One hundred acres of trees would yield 500,000 pounds of cattle feed. Not only is the fruit excellent stock feed but it may also be made into a refreshing drink with a delicious flavor. Like the sourwood, the honey locust produces honey, though less valuable than the former.

Posts made from the black locust endure for from 50 to 75 years. Hence the black locust is most valuable for posts for telephone lines and for all uses where the wood is constantly exposed to the weather or is placed in the earth. The ease with which it is transplanted or reseeded makes it valuable in restoring the fertility of waste lands. Mr. R. S. Maddox, state forester of Tennessee, has for years encouraged its use in the reclamation of land. Trees which he planted in 1914 have grown into post sizes and have been cut. In 1927 he planted 150,000 seedlings.

As far south as Columbia, Ga., black walnut is cut and shipped for commercial use. This tree is one of the most valuable in America; planting of the trees on the unused farm land in Georgia would prove an excellent investment. Some idea of its worth in the furniture industry may be gained from the statement of one manufacturer—that one cord of high-grade walnut timber, made into the highest grade of furniture, might be valued as high as $500,000. No other American timber is so highly prized for this use. Moreover, while growing, the tree is a thing of beauty, with its conical shape and low-hanging branches. Naturally a large tree, it would grow to magnificent proportions if given time and a favorable site. Though we rarely see a walnut tree more than 30 inches in diameter, breast high, logs as large as 77 inches at the small end have been cut, and heights of 125 to 150 feet are on record. The black walnut tree is a prolific bearer of a useful fruit. There is a growing demand for the kernels of the nuts, which are used chiefly in candy making, and which are gaining popularity in breads, cakes, and salads. Prices to the grower are commonly from $1 to $2 a bushel, but have recently ranged up to $4. The Georgia black walnut is of excellent quality, superior to the Ohio product. The hull of the walnut contains a dye, the properties of which have not been definitely determined, though dye was used extensively for dyeing jeans and woolen materials in the South during the Civil War. Research may disclose in the walnut hull a great value for dye manufacturers.

The mulberry, the white oak, and the post oak are other Georgia hardwoods that might be considered. Mulberry wood is very satisfactory for fence posts. A Florida farmer wrote in the Tampa Daily Times that he knew of mulberry fence posts that had lasted for more than 80 years. As the wood is not easily burned, it is excellent for use in fences along railroads. Mulberry is also used by coopers in making tubs, kegs, vats, and firkins. The growing trees are useful as windbreaks for orchards, for besides furnishing protection from the wind they provide food for birds which might otherwise destroy more valuable fruit; and for hogs and cattle it is valuable food.

The value of the white oak acorn in feeding hogs and producing pork is almost equal to that of potatoes and peanuts; its effect in producing soft pork is similar to that of peanuts. In White County, Ga., I have a tract of 2,000 acres in which I have preserved all trees that grow fruit, berries, or any food. On this farm is a dairy. When the acorns and mast begin to ripen and drop in autumn the hogs are so well satisfied with the products of the forest that they will hardly come for the skimmed milk that is fed them.

Any flowering tree has an added value in that it aids the growth and propagation of birds, and birds are necessary to successful farming, because they kill insects that otherwise would devastate the fields. Some birds feed upon the flower of the tree, and all birds fatten upon the many insects that are attracted to the flowers for sustenance. And so, by protecting and cultivating the trees that have been mentioned, we produce timber, fruit, and birds.

The Federal Government, by research and experimental work on the 700 acres in Georgia, dedicated as a laboratory under the direction of the Government, may give aid possibly far more valuable than that of lending money to the farmers. It is far better to educate the farmer to utilize his own resources and stimulate him to intellectual expansion concerning his own affairs than to lead him to be dependent upon the Government to furnish him money that he can never return. The farmer, like every other citizen, must finally depend upon the development of his own brain power and energy to sustain him and make him a stronger man, a better citizen, and a more active element in the State.

I am offering to the United States Government 700 acres of land, to be accepted either in north Georgia, south Georgia, or middle Georgia, on which are to be placed 70,000 hardwood trees, planting 100 acres in persimmon, 100 acres in dogwood, 100 acres in walnut, 100 acres in black locust, 100 acres in honey locust, 100 acres in sourwood, and 100 acres in mulberry, making 70,000 trees for research and demonstration to the farmers of the South and the Nation.

This will bring a very profitable crop for food for cows, hogs, sheep, wild game, and birds, and at the same time a wonderful timber crop. Ten per cent of the 6,000,000 acres of land in Georgia, which is now unused, if utilized, would provide 600,000 acres in trees; and 10,000 trees to 100 acres would give 600,000,000 trees, which would, by reforestation and reclamation, produce an immense amount of food for stock, animals, and birds, and be practically no cost to the farmer. The value of the timber in 25 years could hardly be estimated.

A recent analysis by the United States Department of Chemistry shows that the persimmon produces 33 per cent of sugar. So the amount of sugar alone produced by these 600,000,000 trees we can hardly imagine.

In 20 years, valuing the 600,000,000 trees at $1 a tree, would give to the farmers of Georgia $600,000,000, which would be almost equal to a $35,000,000 crop each year for 20 years—and without any, or very little, cost for the production.

We shall ask the present Congress, through a bill to be introduced, to appropriate $60,000 to establish this orchard of hardwood and fruit-producing trees.

MICHAEL ILITZ

Mr. JAMES. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 6908) for the relief of Michael Ilitz, with a Senate amendment thereto, and agree to the Senate amendment.

The SPEAKER. Does the gentleman do this by virtue of direction of the committee?

Mr. JAMES. Yes.

The SPEAKER. The gentleman from Michigan asks unanimous consent to take from the Speaker's table the bill H. R. 6908, with a Senate amendment thereto, and agree to the Senate amendment. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the Senate amendment.

The Clerk read the Senate amendment.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

BOULDER DAM

Mr. SMITH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

The question was taken; and on a division (demanded by Mr. BROWNING) there were—ayes 140, noes 11.

So the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 5773, with Mr. LEHLBACH in the chair.

The Clerk read the title of the bill.

Mr. DOUGLAS of Arizona. Mr. Chairman, I yield myself one hour. The bill under consideration, known as the Boulder Dam bill, provides for the construction of a dam, not 550 feet high, as has been so frequently stated, but 677 feet high. The height of a dam is measured from its base to its summit, not from the water level to the summit. The bill appropriates $41,500,000 for the purpose of constructing that dam. The bill likewise provides for the construction of a power plant, and, according to the report on which the bill is predicated, the capacity of that power plant will be 1,000,000 horsepower, or three times the size of any existing hydroelectric plant anywhere in the world. The bill provides for an appropriation of $31,500,000 for the construction of that plant. Also the bill provides for the construction of an all-American canal, and according to the report on which the bill is predicated, $31,000,000 are appropriated for the construction of that canal. In total, the cost of the project, according to the report, is $104,000,000. The difference between $104,000,000 and $125,000,000, or $21,000,000, is reserved for interest.

That is the project which this bill authorizes. In addition, and as a separate and distinct part of the legislation, there is a provision for the ratification of a compact allocating waters between seven States and to which seven States are by the terms of the compact woven into the fabric of the compact upon the ratification of but six of the seven States.

The bill further provides for congressional amendments of State water codes. Further than that, it vests in the Secretary of the Interior complete and absolute control over the waters of the Colorado below Boulder Dam.

The compact phase of the measure could be adequately taken care of by a resolution or an act providing for ratification. I point out to Members of the House that there are two very distinct and separable portions of the bill, the first providing for the construction of the project, and the second dealing with allocation of waters as between States.

There have been so many misstatements made with reference to the project and with reference to the bill that I shall not take the time to refute each one by itself. I shall refute them during the course of my argument. Nor do I intend to deal in matters of personalities. I assume that this House is composed of Members who can not be led by appeals to prejudice and appeals to passion. I assume that Members of this House, when they act upon a measure, act according to the merits and to the facts, rather than to fancy. So I shall predicate my argument against the bill upon the incontrovertible and indisputable facts which are relative to the issue. And may I say further that my opposition to this measure is not because I am the Representative of one of the seven States from the Colorado River Basin. Were I from Maine or any other State I would be equally opposed to it; and I shall not, if I can avoid it, predicate my argument upon any sectional controversy. The Boulder Dam bill is larger than the seven States of the Colorado River Basin. I am opposed to it because I am opposed to the principle upon which it is built. I am opposed to it because it is predicated upon unsound economics. I am opposed to it because it has been absolutely inadequately engineered. I am opposed to it because it is a violation of the very principle which has made this Government great. And, finally, I am opposed to it because I am opposed to giving Mexico 5,000,000 acre-feet of water against the future development of our own country.

The fundamental issue involved in this bill is whether or not the Federal Government is going to undertake the burden of running an industrial enterprise. The issue is not public ownership versus private ownership. Members of the House, the city of Los Angeles has filed on two power sites on the Colorado River, and the numbers of their applications before the Federal Power Commission are Nos. 238 and 647. The city of Los Angeles, if it wants to spend its own money and assume the hazards itself, has a perfect right to go on the Colorado River and develop its power project, rather than come to Congress and attempt to persuade the Congress to appropriate the money, assume the hazards, and bear the inestimable losses. So the issue is not one of public ownership as against private ownership. The issue is one of ownership by those who are not to be served, namely, all the people of all the States, versus the people who are to be served, namely, the people of Los Angeles. That is the issue. And the corollary of that issue, and arising out of it there is the old threadbare issue of whether the States are to be maintained in their vigor and vitality, or whether, through the process of infiltration on the part of the Federal Government, they are to be destroyed. The Federal Government is a government of delegated powers. All other powers are reserved to the States or the people. The very minute the Federal Government, under the guise of a fictitious constitutional authority, enters the boundaries of a State, ignores the laws of that State, and engages in an industrial enterprise, then to the extent to which the Federal Government does that it imposes restrictions and limitations upon the sovereignty or quasi sovereignty of that State.

Let us take an extreme case. Let us assume that the Federal Government goes into the State of Minnesota, and under the proceedings in eminent domain and through an attempt to exercise a fictitious constitutional authority it acquires all the property within the State of Minnesota. What political rights are left to the State of Minnesota? It can elect a legislature, but in respect to what can the legislature legislate? It can elect a governor, but in respect to what can the governor govern? So that the fundamental issue in this bill is whether the Federal Government is going to undertake an industrial enterprise and whether in so doing it is going to impose unwarranted and unjustifiable limitations upon the quasi sovereignty of States. That, members of the committee, is the fundamental issue.

There are other issues, but they are of lesser importance, although they in themselves are of inestimable importance. The first is, Are the bill and the project economically sound? I am absolutely certain that they are not. I am absolutely certain that the Federal Government can never be reimbursed for its expenditures. The second question is, Has the project been adequately engineered? The record, as I shall produce it, is conclusive that it has not been adequately engineered. The fourth is, Is Congress going to make a gift of 5,000,000 acre-feet of water to the Republic of Mexico? And, finally, there are the legal questions.

The fundamental question, Mr. Chairman, depends upon exactly what this project is. I have stated that it involved the embarkation of the Federal Government in an industrial enterprise, and now I shall analyze the project and prove that it is that and very little else.

What are the arguments that have been urged in behalf of the bill?

The members of this committee and of this House have heard many eloquent speeches on the subject of flood control. They have been told there are 65,000 people in the Imperial Valley who from day to day are living in the fear that this great river will break through its banks and inundate them and that it will drown the mothers and the fathers and the little children.

Well, members of the committee, there are photographs out here in the hall. I think they were here yesterday. Those photographs show the city of Yuma under water. Those photographs were shown for the purpose of creating a false impression. The flood in Yuma of January, 1916, which is the flood of which these photographs were taken, was not from the Colorado River; the flood in Yuma of 1916 was from the Gila; and there is no proposal in this bill to store the waters of the Gila. As evidence of that I submit herewith a letter from the United States Geological Survey, addressed to Senator CARL HAYDEN, in which it is shown that on January 22, 1916, there was a flood of 200,000 second-feet on the Gila—it is that flood of which these photographs were taken; that on January 31, there was another flood on the Gila or 141,000 second-feet. I just mention this to the members of the committee so they will not be misled by the photographs showing Yuma under water.

Mr. LAGUARDIA. But the Gila is a tributary of the Colorado?

Mr. DOUGLAS of Arizona. But the Boulder Dam is 300 miles up the Colorado from the point of confluence between the two streams.

Let us go into the history of this menace to the Imperial Valley. Before I do that I would like to make it very clear to the members of the committee that I believe there is a menace, on the lower Colorado, and that there is a slight menace to the Imperial Valley, but it is not commensurate with $125,000,000.

In 1905 the people of the Imperial Valley were diverting waters from the Colorado. Their head gate silted up and they could not draw waters out of the stream. So they descended approximately 4 miles down the stream on the Mexican side of the line and there the farmers of the Imperial Valley—and not the waters of the Colorado River—cut a break in the banks of the Colorado approximately 100 yards long. Shortly after the farmers had made the break there was a flash flood on the

Gila, which widened the break, and that was the cause of the only flood the Imperial Valley has ever experienced, and the break in the banks of the Colorado was due to a man-made break and not to a water-made break. I refer the committee in this connection to page 166, House Document 504, of the Sixty-second Congress, and also to the report of the all-American canal, dated June 17, 1919. How many lives were lost during the period in which the Colorado flowed into the Salton Sea for 18 months? Eight; just eight. Six of them were lives which were lost as the result of falling off the levee on which they were working, and two of them were lost in an attempt to cross the stream on a temporary cableway. There was no loss of life during that flood of 18 months due to any inundation. The only loss of life there was due to negligence and carelessness.

And what was the property destruction? Not over $5,000,000, including approximately 27 miles of transcontinental railroad track. What is the logic of appropriating $125,000,000 to protect property or destructible property not in excess of $5,000,000? And, members of the committee, that was in 1905, when there were no railroad tracks on the levees, when there were no rock quarries, and when there was no rolling stock. To-day there is a railroad track on top of every levee; to-day the district is equipped with rolling stock, and to-day the district has a tremendous rock quarry, with approximately 70 cars loaded with rock always available. If the Southern Pacific Railroad was able to close the wide gap made in 1905, to bring the railroad in, to develop the rock quarries, and to bring in the rolling stock, how much better equipped is the Imperial irrigation district to-day to handle a similar problem?

Let us assume the Colorado should break through its banks and should flow into the Salton Sea. There will be no immediate inundation. The waters of the Colorado will have to follow the line of drainage which has already been made, and that line of drainage is approximately 1,000 yards wide and 40 to 80 feet deep. There is no irrigation in that line of drainage, so that the effect of breaking the banks of the Colorado will simply be that the waters of the stream would flow down through this already created drainage line into the Salton Sea, and it would require 15 years to inundate the Imperial Valley. That, members of the committee, is not a statement made by myself but it is made by the United States Geological Survey. The Bureau of Reclamation even goes further and says it will take 40 years to inundate the Imperial Valley.

Now, let us look at it from a business point of view. What is the value of the property to be protected? The board of equalization of California reports that for the years 1925–26 the total value of property in the Imperial County of California—and that is very much larger than the Imperial Valley—is but $36,125,953. Secretary Hoover has stated that the value of property to be protected in the entire Colorado Valley is between $65,000,000 and $75,000,000. Now, I submit, is it sound business to assume the tremendous engineering hazard and the inestimable economic loss, on top of the outright appropriation of $125,000,000, to protect property of that value when the same protection can be given for from $4,000,000 to $22,000,000? In 1911 the Southern Pacific Railroad submitted an offer to the Federal Government to restore the Colorado to its old banks and to maintain it there at a cost of $1,500,000.

Mr. SWING. The word "maintain" should be left out, because that is not included.

Mr. DOUGLAS of Arizona. They offered to maintain it for one year. The Southern Pacific Railroad offered to throw the river into its old channel and to maintain it there for a period of one year, and if it failed to do that, then the Federal Government would not be required to put up one cent. Further than this, if the cost exceeded $1,500,000, then the Southern Pacific Railroad would assume the burden of such excess.

The Reclamation Service has estimated that a 4,000,000 acre-foot dam can be constructed for $22,000,000. The Federal Power Commission and the United States Geological Survey have estimated that a 10,000,000 acre-foot dam can be constructed for not more than $15,000,000, including damages to Needles and the vicinity.

The Bureau of Reclamation has estimated that adequate flood control can be given for from $4,000,000 to $5,000,000.

Now, what is the logic of assuming this tremendous amount of $125,000,000 for the purpose of protecting property which is not one-third the amount of the appropriation when adequate protection can be given for a relatively small amount?

Further than this, members of the committee, if this bill is passed, there will be no immediate flood control given, because I can assure the members of this committee that the State of Arizona will immediately bring suit to enjoin the construction of this dam. It took 11 years, I believe, to solve the case of Colorado against Wyoming. I think it took approximately an equal amount of time for the court to decide the case of Kansas against Colorado. If this bill passes, there will be no immediate flood control for the lower basin.

Mr. Brockman, a director of the Imperial irrigation district, on April 18 of this year stated the real reason for flood control. He said:

> Congressman PHIL SWING and members of the lobby which the irrigation district is maintaining at Washington realize the Imperial Valley is in need of a flood-control project, not because of any immediate flood menace but in order to restore confidence and revive slumping land values.

This is a statement made by a director of the Imperial irrigation district.

Mr. Remele, of the Imperial Valley Credit Association, in referring to a speech made by Senator COPELAND on October 10, 1927, where Senator COPELAND made the statement, "Floods are greatly feared," stated:

> And this is the statement to which I particularly wish to object as a misleading one. The reason that it is misleading is that the word "flood" conveys to most people a concept of a disaster like the recent one in the Mississippi River. Nothing of the kind is possible here. Twenty years ago the entire Colorado River flowed into the Salton Sea for 16 months, but the women and children were never in any danger.

Governor Emerson, of Wyoming, has stated that there is no emergency of sufficient urgency to influence Congress to pass this legislation at this session, and I ask unanimous consent to insert in the RECORD a statement of Governor Emerson.

The CHAIRMAN. Without objection, it is so ordered.

The matter referred to is as follows:

> Governor Emerson stated (p. 206, hearings before Senate Committee on Irrigation and Reclamation, 70th Cong., 1st sess., S. 728 and S. 1274):
>
> "Few realize the real magnitude of the great project that is proposed at Black or Boulder Canyon—a dam twice as high as any dam that has been constructed in the world heretofore; a reservoir seven or eight times the capacity of any reservoir that has been constructed heretofore. The magnitude of this project is so great that we should be sure we are right before we go ahead. There is no such urgency for relief from conditions applying to the physical situation upon the lower river as to warrant any course but to allow all reasonable time and effort for the completion of the seven-State agreement by the approval of all the seven States.
>
> "I feel that it would be a decided mistake to see a project authorized at this session of Congress, as by so doing it is certain that an advantage would be given in negotiations to one of the three States of the lower basin. The carrying on of negotiations looking forward to the complete acceptance of the seven-State compact would thereby, in my opinion, be seriously handicapped.
>
> "I wish to submit that the approval by all seven States of the Colorado River compact, representing an equitable agreement for the use and distribution of the water of the Colorado River system, will be most valuable to each of the seven States. It is essential, it seems to me, not only in consideration of the matter of equity to all of the States, but also as a means of clearing the situation in a practical way for the orderly development of the river."

Mr. DOUGLAS of Arizona. There is one further point I would like to leave with the committee before disposing of this question of flood control and that is simply to ask you this question: In the construction of this high dam, twice as high as any dam heretofore constructed, will you not possibly be creating a menace infinitely greater than the present one?

It has been stated by reputable engineers, among whom is W. G. Clark, that Boulder Canyon is in an earthquake area. Two months ago there was an article in the Literary Digest showing the location of seismic disturbances throughout the world, and there was a large, black dot over Boulder Canyon. Mr. Clark testified he had twice seen evidences of earthquake at Boulder Canyon.

The Reclamation Service itself, in its report on which this bill is predicated, says, on page 71, of volume 5:

> Any dam built on the lower Colorado might possibly be subjected to damage from earthquake, and in this respect it is believed a rock-filled dam for Boulder Canyon would not be as safe a structure as the concrete dam proposed. An earthquake shock of sufficient force to cause a lowering of the crest of a rock-filled dam and not to cause overtopping would result in its destruction.

Members of the committee, I do not say a dam can not be built which will resist the shock of an earthquake. I think it can, and I think all engineers will agree that it can, but the point I want to make is that the Reclamation Service, in the design and estimates of its dams, has decreased the factor of safety as it has increased the height of the dam. All of its low dams are predicated upon a 30-ton pressure dam and its

high dam is predicated upon a 40-ton pressure dam, so they have decreased the factor of safety by at least 25 per cent. A 40-ton pressure dam is not a dam with a generous base.

In order to check my conclusion I wrote to the Federal Power Commission and asked them if I was right, and this is the reply which I received from that commission on April 16:

Your understanding as to the maximum pressures permitted in the design of the Boulder or Black Canyon Dams of various heights, included in the Weymouth report, seems to be correct, and your deduction that as the height of the dam has been increased the factor of safety has been decreased is also correct so far as consideration of maximum pressures on the foundations are concerned.

Mr. WILLIAMSON. Will the gentleman yield for a question at that point?

Mr. DOUGLAS of Arizona. With pleasure.

Mr. WILLIAMSON. What is the factor of safety according to the plans you have in mind?

Mr. DOUGLAS of Arizona. For the high dam or the low dam?

Mr. WILLIAMSON. For the high dam.

Mr. DOUGLAS of Arizona. The factor of safety for the high dam is less than any dam which has heretofore been constructed.

Mr. WILLIAMSON. Less than the Roosevelt Dam?

Mr. DOUGLAS of Arizona. Much less than the Roosevelt Dam.

Mr. LAGUARDIA. That is a matter that can be easily corrected.

Mr. DOUGLAS of Arizona. Easily corrected, sir, by increasing the cost 12 per cent, as the Reclamation Service says.

Mr. ENGLEBRIGHT. Is the type the same for the two dams?

Mr. DOUGLAS of Arizona. Absolutely the same—gravity-section dams.

Now, in addition to that, during the period of construction, there are to be diversion tunnels, temporary rock-fill cofferdams, and excavation of 587,000 cubic yards of sand, gravel, and boulders. The tunnels will divert only 100,000 second-feet—the cofferdams holding the water back so that the water will run through the diversion tunnels. The flood of the Colorado at Boulder Canyon reaches a stage of 200,000 second-feet, and the capacity of this tunnel is only 100,000 cubic feet, so it will take three days of 200,000 second-feet flood to overtop the cofferdams, destroy them, and send a wall of water over 70 feet high roaring down the canyon to inundate and destroy everything before it.

So I simply ask if Congress is to proceed to authorize the construction of this dam, will it not insist that there be additional engineering study before imposing on all of the people on the coastal plains of the Colorado drainage—imposing upon them a menace infinitely greater than the existing one? I am certain—and I think the Members of the House are certain—that this bubble of flood control, this great emergency to protect no lives but to protect property less than the value of the appropriation, is not the real prime motive behind this bill.

With reference to desilting, I need not only point out that Mr. Durand, one of the impartial partial advisors of the Secretary of the Interior, stated that for many years this dam would not desilt, and I need not point out that Governor Scrugham, another impartial partial advisor to the Secretary of the Interior, makes exactly the same statement.

Mr. Chairman, I ask unanimous consent to insert those in my speech.

The CHAIRMAN. Without objection, it is so ordered.

The matter referred to is as follows:

Proponents of the bill have maintained that the waters of the Colorado must be desilted and that the Boulder Canyon Dam will accomplish the object. The Boulder Canyon Dam is situated approximately 200 miles upstream from the point at which imaginative persons have claimed that the city of Los Angeles will divert Colorado River waters for domestic use and 308 miles above the point at which waters are diverted or may be diverted for the irrigation of lands in the Imperial Valley. However much the waters of the Colorado may be desilted as a result of storage at Boulder Canyon those waters will as soon as they are let out of the dam and during the course of their passage of 308 miles over a silty river bottom pick up so much new silt that Boulder Canyon Dam for desilting purposes may just as well never have been constructed.

In this connection, Professor Durand, one of the advisers to the Secretary of the Interior, makes the following statement:

"It should be noted, however, that the building of a large storage reservoir at any point on the river suited to entrap and hold the silt entering the river above the Grand Canyon section will not in itself furnish a complete and immediate solution of the silt problem. It would, however, immediately remove the menace of flood devastation and would enormously reduce the expense in connection with the other aspects of the problem.

"Upon the completion of such a dam and reservoir there would remain in the bed of the river below the dam site large quantities of silt to be picked up and carried along by the previously desilted water discharged from the reservoir." (Hearing on H. R. 5773, January 14, 1928, pt. 4.)

J. C. Scrugham confirms such statement as follows:

"The silt menace will continue for several years after the impounding reservoir is constructed, as the desilted water will again pick up previously accumulated bed silt until the flow below the dam scours a comparatively clean channel. Since no practicable large storage sites exist below the Williams and Gila Rivers, the silt from these sources will continue to discharge into the main river. However, the impounding dams to be constructed on the Gila will minimize the flood and silt dangers from this source, while the difficulties originating in the Williams River are said to be negligible." (J. C. Scrugham's report to Secretary of Interior, 1928, p. 5; hearing on H. R. 5773, pt. 4.)

Desilting the waters of the Colorado can not, therefore, be the object of this bill.

Mr. DOUGLAS of Arizona. I say that the project is not primarily for the purpose of desilting. If that were one of the primary objects, the dam would be constructed on the plain below and not 308 miles up in the canyon section.

Now as to irrigation, which is another reason upon which the proponents urge the bill. This bill provides for a dam which will store 26,000,000 acre-feet of water. On page 3 of the ninth volume of the Weymouth report—and that is the report upon which the bill is predicated—the statement is made that less than 1,000,000 acre-feet of storage is necessary to provide an adequate amount of water for all the irrigation requirements in the lower basin, and that a hundred years from now when the basin is completely developed it will require 15,000,000 acre-feet. On page 117 of the first volume of the Weymouth report it is said that 400,000 acre-feet of water is necessary to provide for irrigation.

It should be pointed out that this bill is not going to irrigate any additional lands in the United States. There is an authorization in it for an additional appropriation of $18,407,000 for the canals to the Coachella Valley and for the works necessary to bring in the side projects surrounding it. This bill will irrigate only the privately owned land in the Imperial Valley. What is the justification of Congress expending this large amount of money to increase the value of land for private owners?

Mr. SMITH. Is the gentleman sure that he is correct about that?

Mr. DOUGLAS of Arizona. I am. The gentleman will find it on page 86, Senate Document 142, "Problems of the Imperial Valley and Vicinity," with relation to additional amount of money which must be appropriated, and he will also find it on Plate 21.

Mr. SMITH. That is contrary to the information that was given the committee.

Mr. DOUGLAS of Arizona. Doctor Mead the other day stated emphatically that it was his understanding that this would not irrigate any additional land.

Mr. JACOBSTEIN. Can the gentleman state any special interests that are behind this bill?

Mr. DOUGLAS of Arizona. The Imperial irrigation district and the city of Los Angeles have already spent $129,000 up to 1924 in an attempt to persuade Congress to pass the bill.

Mr. JACOBSTEIN. Can the gentleman state how soon this land to be irrigated is liable to come into competition with other agricultural land?

Mr. DOUGLAS of Arizona. Whenever the project is completed, if it is ever completed.

Mr. JACOBSTEIN. Is that a serious problem, in the gentleman's mind?

Mr. DOUGLAS of Arizona. I do not think there will be an additional amount of land brought in in the Imperial Valley except 100,000 acres privately owned; but when I come to handle the Mexican question I shall prove to you that over 600,000 acres of land will immediately be brought into cultivation across the line, and that that acreage, with existing acreage, if planted in cotton, will produce 1,000,000 bales of cotton a year, and that they propose to plant it in cotton.

Mr. LAGUARDIA. I do not get the point of the gentleman's statement that this water will benefit only private owners.

Mr. DOUGLAS of Arizona. Because the all-American canal delivers water only to privately owned lands.

Mr. LAGUARDIA. Is not all land under cultivation in this country privately owned?

Mr. DOUGLAS of Arizona. Oh, no.

Mr. LAGUARDIA. The purpose is to turn it over to private ownership.

Mr. DOUGLAS of Arizona. Yes; but, as I have said before, all the Imperial Valley is interested in is to increase the land values of private owners.

Mr. LAGUARDIA. That is true of every reclamation project.

Mr. DOUGLAS of Arizona. Oh, no, it is not; because in almost all reclamation projects there is a quantity of public land which is withdrawn from entry, which can then be entered under the reclamation law. Does the gentleman understand?

Mr. LAGUARDIA. And pay a proportionate share of the cost?

Mr. DOUGLAS of Arizona. Yes. Inasmuch as only 400,000 acre-feet of storage is necessary to supply an adequate water supply, how can you justify, on the ground of irrigation, a dam which will store 26,000,000 acre-feet of water? Surely not for irrigation.

So far as domestic water is concerned I refer you to Mr. McClure's report, the State engineer of California for 1924, in which he says that within 40 or 50 years Los Angeles may have to take some water from the Colorado. I also refer you to Bulletin No. 4 of the State of California, in which they say the additional water supply is for irrigation and not for domestic purposes. I submit that according to every engineer except those of the city of Los Angeles, double the amount of domestic water can be obtained from the present source of water for Los Angeles, and that in so doing through the use of the head sufficient power will be developed to largely compensate for the cost. Just after the St. Francis Dam burst the city engineer of Los Angeles came out with the statement that there was no water shortage, and that the breakage of the dam, the failure of the dam, would not affect the domestic water supply. Finally, let us see what the increase in the demand has been since 1923 when there was a report made to the Los Angeles Chamber of Commerce. In 1923 the consumption of water in the city of Los Angeles was 287 second-feet. In 1927, four years later—almost half the time up to the point at which it was said in 1923 there would be a shortage in 1933—the domestic consumption was 295 second-feet, or an increase of 8 second-feet of water. Members of the committee, the only reason the appeal for domestic water has been made is to try to influence this Congress to adopt a new policy, and, under the guise of domestic water needs, develop a great power project.

I come now to the question of navigation.

Mr. MOORE of Virginia. Before the gentleman goes to that question, where does Los Angeles secure its water supply?

Mr. DOUGLAS of Arizona. From Owens Valley and wells.

Mr. MOORE of Virginia. Entirely independent of the Colorado River?

Mr. DOUGLAS of Arizona. Yes. Los Angeles is 300 miles and more from the Colorado River.

Mr. MORTON D. HULL. Before the gentleman proceeds to the question of navigation, would he feel like referring to the provisions in the bill for the appraisal of lands benefited by the irrigation project?

Mr. DOUGLAS of Arizona. That provision applies to lands which will be irrigated when Congress appropriates another $18,407,000.

Mr. MORTON D. HULL. The language of the bill is not clear to me.

Mr. DOUGLAS of Arizona. The bill authorizes the Secretary of the Interior to construct a canal to the Imperial and Coachello Valleys. The appropriation bill in specific terms is only for the all-American canal to the Imperial Valley. If the Coachello Valley, where there are public lands, and if the areas in the vicinity of the Imperial Valley are to be brought in under cultivation, then the Congress must appropriate another $18,000,000.

Mr. SWING. Mr. Chairman, if the gentleman will permit, I think perhaps the gentleman from Illinois [Mr. MORTON D. HULL] is referring to the limitation on the area that one person can hold after the canal is built, requiring that any large holding must be broken up, and if it is not broken up, it must be turned over to the Secretary of the Interior, who may sell it at an appraised price, so that no one will hold over a maximum of 160 acres.

Mr. DOUGLAS of Arizona. That is in the bill. I thank the gentleman. In this connection I might state also that the Imperial Valley and southern California is deluged with advertisements now "Buy land in Imperial Valley now; speculate on Boulder Dam."

Mr. COLE of Iowa. In case this dam is built, and in the event that it goes out either because of an earthquake or from some other cause, what would be the liability of the United States Government?

Mr. DOUGLAS of Arizona. My dear sir, I can not answer that question because I do not know.

Mr. COLE of Iowa. The Government would be liable for the damage incurred, would it not?

Mr. LAGUARDIA. Yes; if it is liable for measles and smallpox and other acts of nature.

Mr. DOUGLAS of Arizona. I should think that California, having asked for the dam, if she should suffer in consequence of it, would have but little cause for bringing suit for damages against the Federal Government.

Mr. COLE of Iowa. It would not have resulted if the Government had not interfered with nature?

Mr. DOUGLAS of Arizona. I can not answer your question.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. Certainly.

Mr. JOHNSON of Texas. Will the gentleman describe the location of this dam? In what State is it?

Mr. DOUGLAS of Arizona. One end of it is in the State of Nevada, and one end of it is in the State of Arizona. In other words, it is approximately 320 miles north of the Mexican line.

Mr. JOHNSON of Texas. How far is it from California?

Mr. DOUGLAS of Arizona. About 70 miles. The river forms the interstate line.

Now, as to the question of navigation—here is a report by Dr. Elwood Mead, Director of Reclamation:

(B) IRRIGATION DEFEATS NAVIGATION

The present Commissioner of the Bureau of Reclamation, Elwood Mead, and W. W. Schlecht and C. E. Grunsky, constituting the All-American Canal Board, report on pages 13 and 14 of their report on the all-American canal of 1920 to the effect that there are great difficulties on the Colorado in connection with navigation; that the construction of the Laguna Dam in 1904 has interposed a barrier to navigation 12 miles above Yuma; that the construction of that dam "is an indication that the United States regards the navigability of the Colorado River as of no importance. The utilization of the river's waters for irrigation far outweighs any possible utilization thereof for navigation."

Maj. R. R. Raymond, of the Corps of Engineers of the United States Army, reported in House Document No. 1141 of the Sixty-third Congress, second session, as to the navigability of the Colorado.

The report of the Commissioner of Reclamation on the all-American canal contains the following with reference to Major Raymond's report:

"He visited the river, however, and says:

"'Below Yuma the river flows through a delta country, which is constantly being built up by the large quantity of silt carried by the river. The channel is unstable and can not be made stable at reasonable cost. At present the principal channel in Mexico passes through Volcano Lake. In addition to the fact that this part of the river lies in a foreign country, it should be noted that there is so little water available in the river below the heading of the Imperial Canal during low stages that navigation throughout the year is impracticable. The amount of water extracted from the river for irrigation will increase rather than decrease.'

"After referring to the fact that the growth of commerce along the river would imply an increase of the demand for irrigation water, Major Raymond concludes that—

"'The improvement of the Colorado River for navigation would defeat its own ends and would be a detriment to the adjacent country, except possibly that flood control would be beneficial.'

"He finds the situation such that he does not even recommend a survey of the river, and says:

"'Attention is invited to the conclusion reached by officers who have examined this river heretofore, which agree with my own. The development of the country by irrigation in recent years makes the improvement even less desirable to-day than it was formerly.'"

Surely the above should be conclusive as to the navigability of the Colorado River.

He said there is no navigation on the Colorado, and he includes in his report a statement by the Army Board of Engineers in which they advise against improving the stream for navigation. There is so much evidence against navigation on the Colorado that it is extraordinary that the proponents of the bill have the temerity to inject it. I am not a mind reader, but I rather suspect that they will introduce a committee amendment, not now in the bill, to improve the Colorado River for navigation for the purpose of creating a subterfuge which Congress could exercise under the guise of a constitutional right.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield again?

Mr. DOUGLAS of Arizona. Yes.

Mr. JOHNSON of Texas. Is there any navigation on the Colorado River?

Mr. DOUGLAS of Arizona. There is not. There is one ferry from Parker across the river. The evidence is so preponderant that it is perfectly ridiculous.

And now let us see when this amendment to improve the navigation was first offered. Approximately three weeks after the hearings on the bill had been closed. If navigation was one of the primary objects of the bill, why did not the bill contain a provision when it was first introduced? For fear that this bill would have been committed to the Committee on Interstate and Foreign Commerce, where it would have been given a real economic investigation.

Mr. COLTON. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. COLTON. Is it not also the fact that at the meeting at Santa Fe, all the seven States declared that irrigation was the primary purpose?

Mr. DOUGLAS of Arizona. Yes. I will come to that. Now, I will come to the bill itself. Section 1, as it is now, does not contain any provision for the improvement of navigation. But there is to be a committee amendment offered, "For the purpose of controlling the floods and improving navigation." What the House will do with the amendment I do not know. Later in the bill there is to be another committee amendment offered for the improvement of navigation.

Mr. TUCKER. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. TUCKER. I notice that the words "improvement of navigation" in the bill are in italics.

Mr. DOUGLAS of Arizona. That is a committee amendment to be offered.

Mr. TUCKER. What do the italics mean?

Mr. DOUGLAS of Arizona. That is a committee amendment that will be offered.

Mr. BECK of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. BECK of Pennsylvania. Would the construction of this dam and power plant in fact improve the navigation of the river?

Mr. DOUGLAS of Arizona. It has been stated emphatically that the Colorado can not be used for irrigation and navigation. This has been assumed to be an irrigation bill. The two purposes are incompatible. You can not leave water in a stream for navigation and take that same water out of the stream for irrigation.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield there?

Mr. DOUGLAS of Arizona. Yes.

Mr. JOHNSON of Texas. Is the proposed all-American canal to be used for irrigation or navigation?

Mr. DOUGLAS of Arizona. Irrigation, with power plants on it.

Now, section 12 provides for the ratification of the Colorado River compact. Section 12 (b) subjects all the rights of the United States to the terms of the Colorado River compact. The Colorado River compact is made an integral part of this legislation, all its terms and conditions are in this bill, just as much as if they had been recited in the bill.

Now, let us see what section 4 (a) of the compact says. It says:

> The Colorado River has ceased to be navigable for commerce.

So that the effect, members of the committee, of this phrase, "improving navigation" is that the proponents of the bill have attempted to create a constitutional authority which they have in section 12 destroyed. The stream can not be both navigable and nonnavigable. So that it can hardly be claimed that navigation is a primary object of this bill.

And now we come to the question of power. Since required irrigation storage does not exceed 400,000 acre-feet; since, even assuming that California or Los Angeles want 300 second-feet of water on the completion of the dam, and that is only 219,000 acre-feet; since flood control can be given at from 4,000,000 to 8,000,000 acre-feet of storage at the very maximum, why build a dam which will store 26,000,000 acre-feet of water? There can be only one reason, and that is to get the height for head for power; and the power features of the bill are the primary objects of the bill.

I submit that that contention is inescapable and incontrovertible, and can not be answered. The city of Los Angeles itself in resolutions which it has passed has designated Boulder Dam as a power dam. The Federal Power Commission, in a letter written on March 24, 1924, and signed by the present Secretary of the Interior and Secretary Weeks and Secretary Wallace, state that this is a power project, and that the power is not incidental, for the reason that this power is not to be sold for the purpose of irrigating lands. It is to be sold 300 miles from the dam to the city of Los Angeles at a profit.

Finally, let us look at the three words on the first and second pages of the bill, for the purpose of making the project a "financially solvent undertaking." The use of the word "solvent" tells the whole story. The use of the word "solvent" is conclusive evidence that it is a power project, and that power is not incidental; that it is primary; and that the purpose of it is to derive sufficient revenues to repay the Government for the cost. That is a very novel theory upon which the Federal Government, without constitutional authority, can go into the boundaries of a State, refuse to recognize the laws of that State, and enter an industrial enterprise in order to make another of its activities solvent. I submit that if that theory is correct, then, the Federal Government should go up into Brooklyn and establish a button factory for the purpose of making its Army financially solvent. I submit that one is just as sound as the other.

Members of the committee, you can not escape the fact that this is a power project three times larger than any other in existence in the world, and that if it is constructed it means that the Federal Government is going to inject itself into an industrial enterprise, and in so doing it is going to restrict and limit the rights of States. Further than that, in so doing it vests in the Secretary of the Interior complete control over the waters of the Colorado in and below Boulder Dam. In doing that, members of the committee, there will be erected upon the ruins of the rights of States a great tyrannical, socialistic bureaucracy. Democracy will be in its throes of death. [Applause.]

I know there are a great many Members of the House who are in favor of destroying the States; who are in favor of creating and erecting upon their ruins a great tyrannical bureaucracy. I appreciate that. To them I say, examine into the economics of this bill and determine whether it is a sound venture in which to inject this new policy or in which to proceed upon this new policy. If they are consistent and if they want a great bureaucratic form of government imposed upon what has been a democracy then I suggest that they determine for themselves whether this is a sound venture on which to start.

The whole argument dealing with the economics of the bill is a complicated one. I shall point out that the bill contains provisions for appropriations in excess of $125,000,000. I shall point out, in the first place, that although in the $125,000,000 there is not an appropriation for a canal to the Coachella Valley that nevertheless the Secretary of the Interior, in section 1, is authorized to construct the canal, and that to do so there must be additional appropriations of $18,407,000. I shall point out in sections 2–c, 4–b and section 5 of the bill that there are very pecific authorizations for appropriations for operation and maintenance, which are not included in the $125,000,000. So the bill itself contains authorizations for appropriations in excess of $125,000,000. Now, what will the operating deficits amount to, even assuming the Federal Government is to be reimbursed? This Congress will be called upon to appropriate at least $26,000,000 to make up the operating deficits during the period in which 3,600,000 kilowatt-hours of energy or 133,000,000 kilowatt-hours of energy, in excess of the present consumption in all of southern California, is to be absorbed. You can not take that amount of power and suddenly dump it on the market and expect to sell it. It must have a market and the market must develop before it can be absorbed.

There are some engineers who say that this is not true, that surplus power has a dump value; but I submit this to the gentlemen of the committee that power with dump value will have a value of only the fuel cost of developing similar power in the load centers. That is true. Now, then, it costs 1.9 mills in Los Angeles to-day to develop power by steam, and it will cost 1.9556 mills to transmit Boulder Dam power to Los Angeles. In other words, Boulder Dam surplus power or dump power has less than any value in the load center.

Mr. MERRITT. Does that expense of the Boulder Dam power involve interest on the investment or simply the transmission line?

Mr. DOUGLAS of Arizona. That is only the transmission cost, because it has absolutely nothing to do with the cost of power at the switchboard, but just the cost of transmission. If the Boulder Dam surplus power is to be sold in the load center, then it can not be sold at any more than the cost of developing a like amount of power by fuel. Now, then, if it costs more to transmit Boulder Dam power from the switchboard at Boulder Dam, 300 miles from the city of Los Angeles, than the fuel cost of similar power in the load center, then that Boulder Dam surplus power can have no value whatsoever.

Mr. LINTHICUM. How far can they profitably transmit power?

Mr. DOUGLAS of Arizona. They can transmit power great distances, but when you say profitably, that is another question. As the distance of transmission increases the capital investment increases, not in proportion to the distance, but at a very much more rapid rate.

Mr. ROBSION of Kentucky. Will the gentleman yield?

Mr. DOUGLAS of Arizona. I will be delighted to yield, sir.

Mr. ROBSION of Kentucky. I got the impression here that Los Angeles strongly favored this as a power proposition.

Mr. DOUGLAS of Arizona. The gentleman is right. May I answer your question later on, as I am coming to the reason for that?

Mr. ROBSION of Kentucky. Let me ask just one short question. If Los Angeles can develop power for less cost in Los Angeles than the cost of transmission from this dam to Los Angeles, why are they interested?

Mr. DOUGLAS of Arizona. I will explain that to the gentleman. I am very glad he has raised that point.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. DOUGLAS of Arizona. Mr. Chairman, I yield myself an additional 30 minutes.

The CHAIRMAN. Without objection, the gentleman from Arizona is recognized for 30 minutes.

There was no objection.

Mr. LINTHICUM. May I modify my question by asking how far power can be transmitted?

Mr. DOUGLAS of Arizona. I think power can be transmitted probably 1,000 miles, but the capital investment would be terrific.

Mr. LINTHICUM. It would not be profitable at that distance?

Mr. DOUGLAS of Arizona. I am sure it would not be profitable unless there was a terrific amount of power being transmitted.

Mr. SNELL. Has there ever been any power transmitted any such distance as that?

Mr. DOUGLAS of Arizona. I know of none that has ever been transmitted any such distance.

Mr. SNELL. And would not the distance contemplated here be about the limit of the distance which it could be transmitted?

Mr. DOUGLAS of Arizona. Yes.

Mr. SNELL. And probably the outside limit.

Mr. DOUGLAS of Arizona. I think there is one place where it is transmitted slightly over 300 miles.

Mr. SNELL. And that is about the limit of any power transmitted in the United States.

Mr. SWING. The gentleman will recall that the city of Yuma, in his own State, is getting power 500 miles away.

Mr. DOUGLAS of Arizona. From additional plants.

Mr. WELLER. Referring to the question of my colleague from New York, does the gentleman mean to indicate that Los Angeles is the only market for this power?

Mr. DOUGLAS of Arizona. Sir, Arizona will take no power, the State of Nevada has said she will take some for the purpose of mining a great lead-zinc deposit, which has never been drilled, which has never been outlined, the tonnage of which no one knows and if anyone is going to sell power to such a mining prospect they are taking a gamble which is absolutely unjustified.

Mr. WELLER. Is that what this amounts to?

Mr. DOUGLAS of Arizona. That is what it amounts to so far as Nevada is concerned.

Mr. WELLER. And Los Angeles is the only present market.

Mr. DOUGLAS of Arizona. Los Angeles is practically the only present market. Nevada may take a slight amount, Arizona may take 1,000 kilowatts or 1,300 horsepower, but what is that compared with 550,000 horsepower? Does that answer your question?

Mr. WELLER. Yes.

Mr. DOUGLAS of Arizona. The rest of Arizona is adequately supplied with power infinitely cheaper than the Colorado River power ever can be.

Mr. MOORE of Virginia. Will the gentleman yield for a question, and I ask this with an open mind. As I understand, the gentleman argues that this is a power project.

Mr. DOUGLAS of Arizona. Yes.

Mr. MOORE of Virginia. And I further understand that the gentleman argues or intimates it is instigated by Los Angeles which desires to use the power?

Mr. DOUGLAS of Arizona. Very largely.

Mr. MOORE of Virginia. And yet I further understand that the gentleman has given us figures showing that the cost of transmission from Boulder Dam added to the cost of the production of the power would place the power in Los Angeles at a much higher figure than it is produced there now by steam plants.

Mr. DOUGLAS of Arizona. That is right, sir. Your question is why does Los Angeles want the power, and I will tell you why, sir, because there has been a perfectly ridiculous figure made at which this power will be sold to Los Angeles, and that figure approximates the present cost in Los Angeles. If the power is sold at that figure then the deficit to the Federal Government at the expiration of 50 years will be $322,000,000. Does that answer your question, sir?

Mr. MOORE of Virginia. But, as I understand, the bill provides that the official of the Government charged with the duty must assure himself in advance that he has contracts that will protect against a deficit.

Mr. DOUGLAS of Arizona. "In his discretion," sir, and the figure which has been given at which the power will be sold and from which there will be sufficient revenues to reimburse the Federal Government in 40 years is so low that at the expiration of 50 years the deficit to the Federal Government will be $322,000,000, and I will come to that later and prove it.

Mr. LAGUARDIA. In all fairness, that is on the assumption that during the 50 years conditions will remain the same and Los Angeles will be the only market for the power.

Mr. DOUGLAS of Arizona. Oh, no. Let me point this out to the gentleman. The power must be sold or contracted for before the project is constructed. So if the power is contracted before the project is constructed, how can you shift any amount of power from Los Angeles to anywhere else after the project has been constructed?

Mr. LAGUARDIA. Assuming there is no other market all the time.

Mr. DOUGLAS of Arizona. But the terms of the bill provide you must contract the power before the project can be constructed, and if all the power is contracted for with Los Angeles before the project is constructed, after the project is constructed, assuming there is a change in conditions, how can power be taken from Los Angeles and transmitted elsewhere?

Mr. LAGUARDIA. But if all the power is contracted for, then there can not be any such loss as the gentleman anticipates; and if it is not contracted for, they can not build the project.

Mr. DOUGLAS of Arizona. My dear sir, may I point this out to you: The contracts are not to be made for immediate delivery of power. The contracts call for delivery of power, and those contracts will call for increasing deliveries over a period of 9 to 10 years—and this is Los Angeles's assumption, not mine—after the project has been completed. Does that answer your question?

Mr. SWING. The provision in the bill requires a rate which will insure payment of all expenses of operation and maintenance and repayment within 50 years.

Mr. DOUGLAS of Arizona. A rate that will insure that there will be no deficit, as assumed by the advisor of the Secretary of the Interior, will instead of amortizing the project, create a deficit of $322,000,000.

Mr. SWING. Does not the gentleman know that under this bill if it becomes a law he must require a rate that will insure payment?

Mr. DOUGLAS of Arizona. "In his discretion." Let me point out this, that there is nothing in the bill which provides that contracts must be made, because it says "or otherwise."

Mr. SWING. The Government must be assured full repayment with interest in 50 years.

Mr. DOUGLAS of Arizona. If there is no contract, how can the Government be assured—let me read the provision in the bill itself. I am going to offer an amendment that every contractee must put up a mortgage bond. Then you might possibly have the financial part solved.

Here is the provision:

> (b) Before any money is appropriated or any construction work done or contracted for, the Secretary of the Interior shall make provision for revenues, by contract or otherwise, in accordance with the provisions of this act, adequate, in his judgment, to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within 50 years from the date of the completion of the project, of all amounts advanced to the fund under subdivision (b) of section 2, together with interest thereon.

Mr. SWING. The gentleman is going to offer an amendment to strike that out?

Mr. DOUGLAS of Arizona. Yes.

Mr. SWING. I will accept it.

Mr. DOUGLAS of Arizona. I shall offer an amendment providing that the contractee shall put up a mortgage bond for twice the amount of the contract.

Mr. SWING. Why not make it three times the amount?

Mr. DOUGLAS of Arizona. Will the gentleman accept it?

Mr. SWING. No. The gentleman has said that no amendment will satisfy him; he is offering amendments to kill the bill.

Mr. DOUGLAS of Arizona. If Congress is going to pass a bill, I would like to see the Federal Government assured of the return of its money. [Applause.]

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. WAINWRIGHT. What is the power to be developed?

Mr. DOUGLAS of Arizona. Five hundred and fifty thousand firm or constant horsepower.

Mr. WAINWRIGHT. How much of that has a market in sight?

Mr. DOUGLAS of Arizona. When the power first comes in there is no particular market for it at all. It must be absorbed as the market requires it. The city of Los Angeles and the Federal authorities have estimated that it will require at least nine years to absorb this amount of power.

Mr. WAINWRIGHT. So as a matter of fact the director would have a hard time to find an immediate market?

Mr. DOUGLAS of Arizona. Well, it depends on who the contractee is and in what amount he contracts for the power.

Mr. CRAIL. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. CRAIL. The dam could not be completed in nine years.

Mr. DOUGLAS of Arizona. I said nine years from the completion of the project.

Mr. CRAIL. Is it not true that the power market of California for a long period has doubled every four years?

Mr. DOUGLAS of Arizona. That is not the fact.

Mr. CRAIL. Can the gentleman tell us the fact about it?

Mr. DOUGLAS of Arizona. For one abnormal year—1923—the gentleman would be correct, but the line, according to this chart, since that time is a flat line.

Mr. CRAIL. Who made the chart?

Mr. DOUGLAS of Arizona. This was made from information obtained from the United States Geological Survey. The city of Los Angeles is said to be willing to take all of the power. In spite of the fact that she is now developing power from hydroelectric plants and distributing it for 4 mills, she wants the Boulder Canyon power, which, as a matter of fact, will be costly power because of the deficits during the period in which a great amount of power will be absorbed; nevertheless, she wants it because the adviser to the Secretary of the Interior, Mr. Durand, who is the only one of the special impartial advisers of the Secretary of the Interior who has made a semianalysis of the economic situation, states that if the power is sold for 1.67 at the switchboard, or 3.52 at Los Angeles, the Federal Government will be reimbursed in 40 years. As a matter of fact, the Federal Government will have upon its hands an operating deficit of $322,000,000. Professor Durand, in making that statement, assumed a three and a half year period of absorption, and a three and a half year period of absorption, instead of a nine-year period of absorption, is responsible for his figure. There is no justification whatsoever, according to the records of growth of load in California, or according to accurate estimates, as accurate as any estimate may be, for such future growth of Los Angeles. The Federal Power Commission estimates that it will be at least nine years before the 3,600,000,000 kilowatt-hours will be absorbed, and that it may be 12 years or more before the 3,600,000,000 kilowatt-hours will be absorbed. The carrying charges during that period of absorption of approximately between $26,000,000 and $33,000,000, Professor Durand completely ignored in his financial set-up.

Mr. MERRITT. That is per annum?

Mr. DOUGLAS of Arizona. No; that is total. If you take Professor Durand's figures of 1.67 and assume revenues over a nine-year period, you find that, including amortization, the annual revenues will never, even with the entire amount of power sold, be sufficient to meet the operating expenses. Thereafter the annual charges increase each year, because of interest compounded on the deficits which are never wiped out. Is that clear? The city of Los Angeles is perfectly willing to take power at this figure of 3.52 mills, which is the estimate to-day at which the power is going to be sold. But at that estimate the Federal Government can never be reimbursed; and that, sir, is without examining the estimate of the cost of the project.

Mr. MONTAGUE. For information, may I ask the gentleman this further question: According to the gentleman's statement, this power cost at which Los Angeles is willing to take the power is more than the cost of the production of power at Los Angeles by Los Angeles itself?

Mr. DOUGLAS of Arizona. If Los Angeles should pay what she ought to pay for this power in order to reimburse the Federal Government, then she would be paying more than what the same power could be produced for in the load center; but if she pays the figure which this impartial adviser to the Secretary of the Interior says is sufficient to reimburse the Federal Government, then she will be getting power for a little less than it is now costing.

Mr. MERRITT. I thought the gentleman said a little while ago that they could produce steam-produced electricity in Los Angeles at 1.9.

Mr. DOUGLAS of Arizona. No; that is the fuel cost only.

Mr. MONTAGUE. That is what confused me.

Mr. ROBSION of Kentucky. I am not clear about this Los Angeles matter. Los Angeles wants power and is willing to pay the 3.6 and a fraction, and it is the gentleman's theory of this matter that the Government would furnish the power at that rate.

Mr. DOUGLAS of Arizona. That is the figure which is now recited as the figure at which it will be sold.

Mr. ROBSION of Kentucky. If that is done, that will be less than the cost of the production to the United States Government?

Mr. DOUGLAS of Arizona. Absolutely; by over a mill.

Mr. ROBSION of Kentucky. And finally, altogether there will be a deficit of more than $300,000,000?

Mr. DOUGLAS of Arizona. Yes; assuming the estimated cost to be accurate.

Mr. ROBSION of Kentucky. Under what authority would the Secretary of the Interior make such a contract, when it is at a loss, and the bill provides that it shall not be made at a loss?

Mr. DOUGLAS of Arizona. May I point out to the gentleman that it is entirely within the discretion of the Secretary of the Interior.

Mr. ROBSION of Kentucky. But to reach your point, the gentleman assumes that the Secretary of the Interior is going to disregard the provisions of this law.

Mr. DOUGLAS of Arizona. Very well. What is his discretion? It may be anything. Now we will take up one other point, and we will assume that he does not. We will assume that he sells this power for exactly what it is worth, and this is the cost of power, assuming the $125,000,000 estimate to be accurate. What is that power worth in Los Angeles? The Federal Power Commission engineers—that is, the engineers of the present Federal Power Commission—estimate that that power will have to bring a minimum of 4.77 mills in the load center if the Government of the United States is to be reimbursed; and that, sir, as I say, is assuming the estimated cost to be accurate. Does the gentleman see what I mean? Now, then, it costs the city of Los Angeles on her aqueduct 4 mills to develop power. That is her statement.

It costs the Southern California Edison 4.17 mills to develop power. In its new steam plant which it is installing of 360,000 kilowatts they estimate the cost will be 3.86 mills. Assuming that the Secretary of the Interior sells Boulder Dam power at exactly what it is worth or at cost translated to the load center of 4.77 mills, is it sound policy for this Government to attempt to make a project solvent by trying to sell something for more than that commodity is worth?

Mr. ROBSION of Kentucky. Just one other statement. Does the gentleman believe that the city of Los Angeles will be the purchaser of this power provided the contract is made and a contract is required to pay the Government the actual cost of the power?

Mr. DOUGLAS of Arizona. I am sure that if you make the city of Los Angeles put up mortgage bonds she will not do it.

Mr. SWING. Mr. Chairman, in order to be fair to the House, will not the gentleman give the House the basis of his assumption with reference to the all-American canal? Is any revenue contemplated under the gentleman's assumption?

Mr. DOUGLAS of Arizona. There will be $700,000 to take care of maintenance. This estimated cost of power by the Federal Power Commission is predicated on the accuracy of the $125,000,000 figure, but I shall prove to you that the project can not possibly be constructed for that. Nevertheless, that has been assumed as being accurate.

No other power in competition with Boulder Canyon power when it comes on the market; a nine-year period of absorption; depreciation figures held down below the depreciation figures allowed by the railroad commission of the State of California; the revenue to reimburse the Federal Government for the cost of the power plant and of the dam and of the all-American canal; but it is assumed that a sufficient revenue from the Imperial Valley will be forthcoming to at least pay for the maintenance.

Mr. O'BRIEN. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. O'BRIEN. Considering the natural depletion of fuel, can the city of Los Angeles continue to produce the power it needs?

Mr. DOUGLAS of Arizona. I am glad to answer that question. I have obtained from the Internal Revenue Bureau figures as to the cost of fuel. In 1900 the cost of fuel in Los Angeles was 90 cents a barrel and in 1927, 82 cents.

Now, assuming that the cost of fuel should go up to a much higher point, you must bear this in mind: The number of heat units used and necessary to develop a kilowatt-hour has been decreased from 22,500 to 13,100 in the last three years. There has now been developed a mercury plant which is developing power for 10,000 British thermal units per kilowatt-hour. There has been developed in England a new steam boiler which will take a pressure of 3,200 pounds, and it is estimated that in the mercury plant, if it is not producing the necessary British thermal units this new boiler certainly will. In addition to that, there are millions of tons of coal in Utah which are not now being used in California, but which are susceptible of being used there, and it is my understanding that the same group of people advocating the Boulder Canyon bill in a written report known as the giant power advisory report have stated that the by-product from the use of coal will be sufficient to pay for the coal; so that if they continue to produce power by fuel, there will be no fuel cost at all. [Laughter.] Here is what the Secretary of the Interior says:

[Excerpt from letter of Secretary Work to HIRAM JOHNSON dated January 27, 1928]

In his letter of January 27, 1928, to Senator HIRAM JOHNSON, Secretary Work states with reference to the revenue from power:

"The amount of this revenue can not at present be determined, but enough is already known to be certain that the margin between the payments needed to reimburse the United States in 50 years, and the value of power to those who purchase it, will be small, and with the improvements in methods of generating power by other means, it may become even less in the future. Consequently, there is nothing to-day on which the amount of such a toll could be certainly determined, and if the United States is to assume all of the responsibilities and all of the hazards of this development, it would be very unwise at this time to agree to the payment of any sum to either of these States."

Mr. COLE of Iowa. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. COLE of Iowa. Suppose that this project should cost more than $125,000,000. How would that additional cost be provided for? Will Los Angeles guarantee the Government to come out without loss?

Mr. DOUGLAS of Arizona. It is not stated. No.

Mr. COLE of Iowa. The late Martin B. Madden, with whom I talked about this project, informed me that there was good engineering authority for stating that that project, instead of costing $125,000,000, might cost $250,000,000, because there were so many contingencies.

Mr. DOUGLAS of Arizona. Mr. E. C. LaRue, of the Geological Survey, on April 27 of this year stated that the dam alone would cost over $80,000,000, and the project would cost probably in the neighborhood of $155,000,000, and that in addition to that there would be appropriations of $200,000,000. Col. William Kelly, formerly of the Federal Power Commission, has estimated this project to cost over $200,000,000. It is perfectly obvious that if the estimated cost goes up above $125,000,000 then the deficit to the Federal Government increases not proportionately but in geometrical progression.

Mr. COLE of Iowa. If the Federal Government is going to put all this money in, for rights of the taxpayers ought there not to be somebody to guarantee an income?

Mr. DOUGLAS of Arizona. I am going to offer an amendment to provide that there must be mortgage bonds placed behind every contract in an amount equal to twice the amount of the contract.

Mr. LaGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. LaGUARDIA. Is there any power company in the country that would buy first-mortgage bonds?

Mr. DOUGLAS of Arizona. Has the Federal Government ever gone into the power business as an industrial enterprise before? [Applause.]

Mr. Smith. Reference was made to Mr. LaRue and to Mr. Kelly. Will the gentleman inform the House in whose employment they are?

Mr. DOUGLAS of Arizona. Mr. LaRue for 15 years was employed by the Department of the Interior, and finally resigned because they would not let him speak against Boulder Dam. For approximately 27 years Colonel Kelly was in the United States Army, in the Corps of Engineers. He was chief engineer of the Federal Power Commission created by this Congress to act as an agent of Congress, and he was called upon to make investigations of the Colorado River, and he did, and he reported against Boulder Canyon when he was in the employ of the Federal Power Commission.

Mr. SMITH. Will the gentleman tell——

Mr. DOUGLAS of Arizona. I will tell the story. Subsequent to that, Colonel Kelly was employed, because of his ability, by the National Electric Light Association, and subsequent to that by one of the power companies in Buffalo. If you are going to claim that simply because a man has demonstrated his ability and has received a good offer his honor is to be impugned, then I have little confidence in the House. [Applause.]

Mr. SMITH. In whose employment is Mr. LaRue?

Mr. DOUGLAS of Arizona. Mr. LaRue is a consulting engineer of the city of Los Angeles, and when he testified against Boulder Dam he was in the employ of the Federal Government. [Applause.]

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. MOORE of Virginia. Aside from the personality of these people, which is of no particular interest to me, are we not obliged to take this view, frankly, of the bill, that if it is enacted into law then we must proceed with any expenditure that may be conceivably necessary to complete the project, on one condition only, namely, that the Secretary of the Interior must have reached the conclusion in advance, according to the exercise of his best judgment, that it is safe to go ahead with it? That is about the statement of the case.

Mr. DOUGLAS of Arizona. That is about the statement of the case.

Mr. MOORE of Virginia. So far as the heart of the case is concerned?

Mr. DOUGLAS of Arizona. Yes.

Mr. MOORE of Virginia. The gentleman who happens to hold the office of Secretary of the Interior has got to come forward and say that he has become satisfied and that his judgment has brought him to the conclusion that it is proper to go ahead with the project; then we go ahead and we are committed to an unlimited expenditure.

Mr. DOUGLAS of Arizona. Absolutely.

The CHAIRMAN. The time of the gentleman from Arizona has again expired.

Mr. DOUGLAS of Arizona. Mr. Chairman, I yield myself 15 minutes additional. As to the engineering of the project——

Mr. WELLER. Before the gentleman proceeds, will he yield for a question?

Mr. DOUGLAS of Arizona. Yes.

Mr. WELLER. It was said yesterday that this being a national project—that is, a project which embraced and benefited seven States of the Union—that the Congress of the United States should take action, enact this law, and make this appropriation. Does the gentleman contend that outside of the irrigation feature and the flood feature there is any benefit at all to these seven States, with the exception of the city of Los Angeles?

Mr. DOUGLAS of Arizona. Let me point this out to you: The bill, as I pointed out at the beginning, is divisible into two heads. There are two parts of the bill—that part which authorizes the project and that part which provides for the ratification of the Colorado River compact. The Colorado River compact, if ratified by all the seven States, will give protection to all of the basin against the day when these States may want to apply the water to beneficial use. California and Mexico, however, are the only two that will derive any benefit from the project. Does that answer the gentleman's question?

Mr. WELLER. Yes; it does.

Mr. DOUGLAS of Arizona. Now, I would like to make a few references with respect to the extent to which this project has been engineered. Yesterday the gentleman from Utah [Mr. LEATHERWOOD] explained the origin of the project. He told you the city of Los Angeles, through its control of the funds for the investigation of the project, had practically controlled the report on the project.

I would like now, if I may, to attempt to give some picture of its magnitude. The dam is 677 feet high. It will contain approximately three and a quarter times as much concrete as any other dam in the world. It is twice as high, lacking about 10 feet, as the highest existent dam in the world. There has to be excavation to bedrock, in order to place the concrete of the permanent cofferdam on bedrock, of 580,000 cubic yards of sand, gravel, and boulders within a period of 90 days, and to do that there will have to be developed the second largest hoisting mining operation in history. There must be drilled, blasted, quarried, and transmitted by cableway over the Colorado and dumped 700 feet from the cableway into

the river 921,000 cubic yards of loose rock, of which, I think, 120,000 cubic yards are to form an earth mattress on the top of these cofferdams, and in 69 days. The surface mining operation involved will be the second largest in history. The Utah Copper Co. now mines approximately 27,000 cubic yards. To do that it has spent 20 years and over $15,000,000 in perfecting this operation. It has over 70 miles of standard-gauge railroad track; it has 23 great electric steam shovels, and it uses 20,000 kilowatts. The Reclamation Service in its report passes the surface mining operation over as though it could be accomplished in the shake of a guinea pig's tail. They have not even provided in their estimate of cost for a power plant. You can not conduct a mining operation of that magnitude or a cableway operation, the speed of which will be twice the speed of any cableway operation which the world has ever before seen, without having a large power plant, and the power required for this operation will be in the neighborhood of 8,000 kilowatts and will cost the Federal Government $1,600,000. That will be absolute scrap when the project is completed. These are just a few of the inadequacies in the engineering features.

I have covered the diversion of water. I have told you how the Reclamation Service, in order to keep down their estimated cost and keep down the yardage of concrete in the dam, has decreased the factor of safety as the height of the dam has been increased. That is true, and that is a matter of record. I have introduced a letter from the Federal Power Commission to confirm my conclusion.

Mr. JOHNSON of Texas. What height would the dam have to be to afford full protection?

Mr. DOUGLAS of Arizona. It would have to be 402 feet high. There is another dam at Topock 100 feet high, but that is not included in this project. The base of the dam will be about 300 feet long and the walls of the canyon rise almost vertically for about 400 feet and then they spread out. The top of the dam will be 1,160 feet long, I think.

Then let us see what the engineers said. Here is a long report by Herman Stabler, of the United States Geological Survey, in which he condemns the project, and I ask unanimous consent to insert in the RECORD what he says.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. DOUGLAS of Arizona. It is not necessary to read it to the members of the commitee, but in his report he states that there must be additional facts secured before the Government is justified, or anyone else, in going ahead with the project.

Mr. ABERNETHY. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. ABERNETHY. Is that engineer now in the employ of any of the power companies or is he in the employ of the Government?

Mr. DOUGLAS of Arizona. He is still in the employ of the United States Geological Survey.

Mr. ABERNETHY. What attack has been made on his report?

Mr. DOUGLAS of Arizona. None; but they may try to impugn his honor.

Mr. ABERNETHY. It seems that all of the engineers who have reported against it are in the employ of the Power Trust, and I would like to know whether there is anything wrong with this man.

Mr. DOUGLAS of Arizona. There is nothing wrong with this man, sir, and there is nothing wrong with the ability or the integrity of other men.

Mr. ABERNETHY. I just wanted to know, because I am seeking light.

Mr. DOUGLAS of Arizona. Colonel Kelly is the man, I believe, against whom the attack will be made, and I should like to say to the House that I know Colonel Kelly personally and I do not know of any person with a higher standard of honor and of truth and of legitimate and proper performance of his duty than Colonel Kelly.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Certainly.

Mr. LAGUARDIA. Without impugning the honor of Colonel Kelly, how long would he remain in his present employment if he entertained any other views?

Mr. DOUGLAS of Arizona. May I state to the gentleman from New York that when Colonel Kelly wrote this report he was in the employ of the United States Government and in the employ of nobody else?

Mr. LAGUARDIA. And immediately thereafter he went into the employ of the Power Trust.

Mr. DOUGLAS of Arizona. It may be quite true that he did go into the employ of a power company, but the fact that he did does not condemn his report. It is merely indicative of the man's ability. [Applause.]

Mr. SMITH. Colonel Kelly, at the time he made his report, was detailed to the Federal Power Commission from the Army, was he not?

Mr. DOUGLAS of Arizona. Yes.

Mr. SMITH. And he was connected with the Federal Power Commission at that time.

Mr. DOUGLAS of Arizona. I have stated that. He was the chief engineer of the Federal Power Commission and a colonel in the United States Army.

Now, let us see what the Secretary of the Interior himself has said:

> An opinion is no better than the reasons for it. Whether or not it is practicable at any cost to divert through tunnels in the canyon walls such a body of water from the river long enough to build this substructure, whether the mass of masonry unapproached in size in the history of engineering is practicable, or whether it is impossible to give more than an intelligent guess of its cost are problems not to be passed upon by one man alone, but should challenge the judgment of the country's ablest engineers and be subject to deliberate review by the Congress.

Then the Secretary goes on to suggest lines of inquiry. This letter was written after the Weymouth report, on which this bill is predicated, was submitted. Since that date there has been no additional investigation of the Colorado except a supplementary report written by Mr. Weymouth in which there are some statements made which condemn the project.

Mr. ABERNETHY. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. ABERNETHY. I understand, though, that the Secretary of the Interior is now for the project?

Mr. DOUGLAS of Arizona. The Secretary of the Interior is now for the project. The only reason I conclude——

Mr. ABERNETHY. And so is Secretary Hoover. Secretary Hoover is a great engineer; what have you to say about him?

Mr. DOUGLAS of Arizona. Yes; but Secretary Hoover has never——

Mr. ABERNETHY. He may not make a good President, but he is a good engineer.

Mr. DOUGLAS of Arizona. He is a good mining engineer, sir, and Secretary Hoover has never examined the estimates of cost of the project or the designs, and he has never approved them. Does that answer your question?

Mr. ABERNETHY. Yes; and I want to say I have been very much interested in the gentleman's argument, and I may say that he has made a very profound argument against this proposition, but speaking about this man Kelly, going back to that a moment, if the gentleman does not mind, I am wondering if the fact——

Mr. DOUGLAS of Arizona. I do not like to have my time consumed by statements. There are plenty of other engineers that I shall mention who have disapproved this project.

Mr. ABERNETHY. I understand the gentleman has four hours at his disposal.

Mr. DOUGLAS of Arizona. I have only five minutes left of the time that I am going to take now.

Mr. ABERNETHY. Of course, if the gentleman does not want to answer my question——

Mr. DOUGLAS of Arizona. I will be very pleased to answer the gentleman's question if he will ask it quickly, but please do not make a statement.

Mr. ABERNETHY. I am not trying to make a statement. I do not believe I will interrupt the gentleman any further.

Mr. SMITH. Is it not a fact, and one that the gentleman should state in quoting the Secretary of the Interior, that that quotation comes from a joint letter signed by the members of the Federal Power Commission?

Mr. DOUGLAS of Arizona. No; it was not. This is a letter addressed to you, sir, signed by the Secretary of the Interior himself, dated March 17, 1924. [Applause.] You will find it in part 3 or part 4 of the hearings.

Mr. SMITH. The letter was addressed to me, but it was also signed by the others——

Mr. DOUGLAS of Arizona. No; it was not. It was signed by the Secretary himself.

Mr. SMITH (continuing). And doubtless prepared by Colonel Kelly and Mr. Merrill, the secretary of the Federal Power Commission.

Mr. DOUGLAS of Arizona. The gentleman's statement is absolutely untrue. The gentleman will find that the letter is addressed to him, dated March 17, 1924, and is signed by Secretary Work and no one else. [Laughter and applause.]

Now, here is Mr. Newell, former Chief of the Bureau of Reclamation, who, on March 20 of this year, in speaking of high dams, said:

And how does this apply to propositions now pending before the Congress, for example, the Boulder Dam? It is true that considerable time and money have been spent in surveys; various engineers have agreed on certain fundamentals; those who dissent have held their peace. There is little doubt but what if private capital were proposing to build a structure of this kind there would be continuous study and observation of all of the phenomena peculiar to that locality. "With the valor of ignorance," Congress, however, is satisfied to discuss the legal or political status and assume that all of the forces, such, for example, as those that have overthrown the St. Francis Dam, are well enough known. Is it true?

I submit, members of the committee, that it is not.

Here is a report written by five of the most eminent engineers that can be found for the American Engineering Council; all of them have either been president or vice president, past president, or past vice president of the American Society of Civil Engineers, and the chairman was on the giant power survey of Governor Pinchot in Pennsylvania.

These men, after having specifically spent three months examing all of the reports relative to the Boulder Canyon project, including this infamous or famous Weymouth report, concluded on April 16, 1928, as follows. It is addressed to the American Engineering Council, which represents the cream of the engineering profession in the world. They can not be impugned—they are all consulting engineers, and most of them are being consulted by the municipal water companies and other public companies, not private interests.

On April 16, 1928, they report to the American Engineering Council as follows:

STATEMENT CONCERNING BOULDER DAM PROJECT ISSUED BY AMERICAN ENGINEERING COUNCIL

American Engineering Council, representing 43,000 professional engineers, is an organization conducted for the purpose of affording a means through which engineers may express their views concerning national questions of an engineering character. National problems, such as flood control, utilization of natural resources, and the like, come within its purview of activity.

Consequently council has given careful consideration to the Boulder Dam project, which has been under consideration by the Congress. In keeping with its usual practice the council appointed a special committee composed of most eminent engineers experienced in such matters to review all data and information available relating to the Boulder Dam project. This committee after due deliberation submitted a report to the council, which has been approved by the executive committee thereof. The report is as follows:

"Your committee is unanimously agreed that the information set forth in the reports which have been submitted to us is not conclusive as to the engineering feasibility of the plan outlined in the Swing-Johnson bill, and that before either the Government or private capital would be justified on engineering or economic grounds in committing themselves to the expenditure involved the development of the river for the purpose in view should be further and most thoroughly investigated to determine how the results which it seeks to accomplish can be secured with a reasonable assurance of success.

"FRANCIS LEE STUART, *Chairman.*
"ALLEN HAZEN.
"CLEMENS HERSCHEL.
"J. WALDO SMITH.
"LEWIS B. STILLWELL."

TRAINING AND EXPERIENCE OF MEMBERS OF THE COMMITTEE

Allen Hazen, consulting civil engineer, vice president American Society of Civil Engineers, vice president Hazen & Whipple, engineers, 25 West Forty-third Street, New York City.

Education: Massachusetts Institute of Technology, Boston, Mass. Honorary degree doctor of science, New Hampshire and Dartmouth Colleges. In charge State board of health experiment station, Lawrence, Mass., 1888–1893.

In charge sewage disposal, World's Columbian Exposition, Chicago, 1893.

In private practice, Boston, 1894–1897, and in New York City since 1897, work mainly on city-water supplies.

Chief engineer Albany water-filtration plant, built 1889–1899, and other putrification works.

Consulting engineer for water-purification works, Washington, D. C.

Author: The Filtration of Public Water Supplies, 1895–1900; Clean Water, 1907; Meter Rates for Water Works, 1917; also numerous articles on water supply and sewage disposal; joint author Hydraulic Tables, with Gardiner S. Williams, 1905.

Member American Society of Civil Engineers, American Public Health Association, etc.

Clemens Herschel, consulting civil and hydraulic engineer, past president American Society of Civil Engineers, 2 Wall Street, New York City.

Education: S. B. Larence Scientific School (Harvard), 1860. Hydraulic engineer Holyoke (Mass.) Water Power Co., 1879–1889. Railroad commissioner of Massachusetts, 1881–1883. Consulting engineer of several of the large water-power companies of Niagara Falls, 1884–1904. Engineer and superintendent East Jersey Water Co., 1889–1900. Inventor of Venturi water meter for which was awarded Elliot Cresson gold medal of Franklin Institute.

Member American Society of Civil Engineers, Boston Society of Civil Engineers, Institute of Civil Engineers of Great Britain.

Author: Continuous Revolving Drawbridges, 1875; One Hundred and Fifteen Experiments, 1897; Frontinus and the Water Supply of the City of Rome, 1899; also various contributions on engineering topics in technical journals.

J. Waldo Smith, consulting civil engineer, past vice president American Society of Civil Engineers; construction engineer for Board of Water Supply of New York, Municipal Building, New York City.

Education: Phillips Academy, Andover, Mass., S. B., Massachusetts Institute of Technology, 1887; director of engineering Stevens Institute of Technology, 1918; director of science Columbia University, 1918.

Chief engineer of his home town at age of 17; assistant engineer Holyoke (Mass.) Water Supply Co., 1887–1889; resident engineers (two years), principal assistant engineer (six years) East Jersey Water Co., on design and construction of a supply of 50,000,000 gallons of water per day for Newark, 1890–1897; chief engineer and superintendent Passaic, Acquackanonk, and Montclair water companies in New Jersey on maintenance, extension, and operation of water supply, 1898–1900.

Consulting engineer Jersey City Water Supply Co.; built filtration plant at Little Falls, N. J., and directed design and construction of supply of 50,000,000 gallons daily for Jersey City, 1901–1903.

Chief engineer for aqueduct commissioners, New York, N. Y., in charge of all construction work of Croton water system, involving completion of New Croton Dam, Muscoot Dam, Jerome Park Reservoir, and design of Cross River Dam, 1904–5.

Chief engineer Board of Water Supply, New York, to secure an additional supply of 500,000,000 gallons of water per day from Catskill Mountains from 1905–1922.

Consulting engineer for Board of Water Supply of New York, and in connection with water supplies for Philadelphia, Providence, Boston, and Kansas City, and consulting engineer for the Moffat Tunnel.

Awarded John Fritz medal in 1918 for achievement providing city of New York with water.

Chairman military engineering committee of New York, which organized a course of military engineering, lectures given by officers of Corps of Engineers, Eastern Department, United States Army, immediate result of which was voluntary drilling of considerable numbers and many applications for first Plattsburg camp, 1915–16; on declaration of war commissioned under direction of Chief of Engineers, United States Army, recruited Eleventh Engineers Regiment.

Member: American Society of Civil Engineers; American Society of Mechanical Engineers; Institution of Civil Engineers of Great Britain; American Water Works Association; and various other scientific and allied technical societies.

Lewis Buckley Stillwell: Consulting electrical engineer; past president American Institute of Electrical Engineers; Century Club, New York City.

Education: Wesleyan University, 1882–1884; Lehigh University, E. E., 1885; M. S., 1907; D. Sc., 1914; Wesleyan University, Sc. D., 1907.

Assistant electrician, Westinghouse Electric & Manufacturing Co., 1886–1890; chief engineer (electrical), 1890–1898.

Electrical director Niagara Falls Power Co., 1897–1900. In practice as consulting electrical engineer in New York since 1900.

Consulting engineer Manhattan Elevated Railway Co. (electrification of elevated lines in New York City), 1899–1906.

Electric director Rapid Transit Subway Construction Co., 1900–1909.

Consulting engineer Hudson Co., 1905–1913.

Member Erie Railroad Electrification Commission.

Consulting engineer United Railways & Electrical Co. of Baltimore, Md., 1906–1920; Interborough Rapid Transit Co., 1909–1920; New York, New Haven & Hartford Railroad Co. (Hoosac Tunnel electrification), 1910–11; New York, Westchester & Boston Railroad Co., 1911–1915; Lehigh Navigation Electric Co., 1912–1918.

Consulting engineer Holland vehicular tunnels, 1924.

Member: Board of economics and engineering of National Association Owners Railroad Securities, 1921–22; National Research Council; American Institute of Consulting Engineers; American Society of Civil Engineers; British Institute of Electrical Engineers; president Engineering Foundation; Royal Society of Arts, Great Britain; Franklin Institute; life trustee of Princeton University; board of directors, Chamber of Commerce of United States, 1921–1923.

Francis Lee Stuart: Consulting engineer; past vice president American Society of Civil Engineers; 949 Broadway, New York City.

Education: Graduate Emerson Institute, Washington, D. C.

Entered Baltimore & Ohio service, 1884, experience in the various engineering departments of railroads.

District engineer of eastern side of Nicaragua Canal, Nicaragua Canal Commission, 1897.

Division engineer, Isthmian Canal Commission, 1899–1900.

Assistant engineer and later engineer of surveys, Baltimore & Ohio Railroad, 1900.

Chief engineer, Erie Railroad, 1905–1910; chief engineer, Baltimore & Ohio, 1910–1915.

Began private practice in 1915 and has continued to date, during which time has served in following capacities:

Chairman terminal port facilities committee of War Industries Board, and member depot board, War Department, 1917–18.

Chairman budget committee, United State Railroad Administration, 1918–1920.

Engineering expert, port development commission, Baltimore, 1921.

Member technical advisory board, New York port authority, 1921.

Member transit advisory board of Philadelphia, 1923.

Retained by 11 trunk-line railroads, serving port of New York, investigate and report on transportation matters.

Consulting engineer, Cunard project and Hydroelectric Power Commission, Niagara Falls, Canada, 1920–21.

Consulting engineer, greater harbor committee of two hundred of Los Angeles Chamber of Commerce, connection with railroad and harbor problem.

Member board of review, Sanitary District, Chicago's lake-leveling controversy and remedial program.

Chairman committee on value diverted water for transportation from Lake Michigan to Gulf of Mexico.

Member committee Great Lakes regulation; giant power advisory board, State of Pennsylvania.

President International Conveyor Corporation, Terminal Operating Corporation, Stuart Patents Corporation.

More than 40 patents, mainly for inventions substituting improved machinery and methods for present practices.

Member: American Society of Civil Engineers; American Academy of Political and Social Science; American Association of Port Authorities; and various other scientific and allied technical organizations; past president New York Society of Terminal Engineers.

Mr. GIFFORD. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Certainly.

Mr. GIFFORD. In reading many of these speeches and some others from the other branch, I would like to ask the gentleman if he would withdraw his objection if there was a proper allocation of water and profit granted to Arizona?

Mr. DOUGLAS of Arizona. I would not; because this project is unsound and the bill is unconstitutional.

Mr. OLIVER of Alabama. Will the gentleman yield?

Mr. DOUGLAS of Arizona. I will.

Mr. OLIVER of Alabama. Has Arizona at any time indicated that if the present situation was acceded to they would sign the compact?

Mr. DOUGLAS of Arizona. The compact and this bill are two separate things; that I have explained already to two gentlemen. The project is one part of the bill and the compact is another. If Arizona gets what she thinks she ought to have, a reasonable allocation of water and the right to tax the use of her natural resources used elsewhere, then Arizona will ratify the Colorado River pact. But that is an entirely different question from this specific project.

Mr. OLIVER of Alabama. That would remove the objection that Arizona makes to the project?

Mr. DOUGLAS of Arizona. It would not remove my objection to the project.

Mr. OLIVER of Alabama. Would it not remove the objection that Arizona has?

Mr. DOUGLAS of Arizona. I am not aware that it would. I have no knowledge what Arizona would do; I only know what I would do.

Mr. OLIVER of Alabama. I understand that if Arizona were assured that the situation were acceded to she would ratify the compact?

Mr. DOUGLAS of Arizona. Yes.

Mr. OLIVER of Alabama. This plan of course results from a study of the engineers who favor the dam at this point?

Mr. DOUGLAS of Arizona. The engineers of the Reclamation Service and the Los Angeles Bureau of Power and Light.

Mr. DENISON. Will the gentleman state what he thinks this project does for Mexico?

Mr. DOUGLAS of Arizona. I was going to reserve 15 minutes to do that later. This project never has been adequately engineered. There has never been an independent board of engineers which sat upon it and approved it. There was one board in 1924, three members of which were men who drafted the report which was being reviewed and three were independent. These members of the board split. That board did not approve the project.

Mr. MOORE of Virginia. Will the gentleman yield?

Mr. DOUGLAS of Arizona. I will.

Mr. MOORE of Virginia. This compact that has been spoken of does not in any way contemplate the aid of the Government of the United States to this project or any other?

Mr. DOUGLAS of Arizona. It does not mention this project. The compact is an effort to allocate water between the two basins, and has nothing whatever to do with this or any other program of development.

The gentleman from California will doubtless mention Mr. Hill, Mr. Wiley, Mr. Savage, General Goethals, and Mr. Mulholland. Now, Mr. Mulholland has approved the project, but Mr. Mulholland was in the employ of the agency that wanted the project built, namely, the Los Angeles Power & Light Co. General Goethals never examined the estimated cost of the project or the design.

The Secretary of Commerce, Mr. Hoover, has never examined the estimate of cost and the designs and has never approved them. Mr. Hill, Mr. Wiley, Mr. Munn, and Mr. Savage submitted a report as to the cost of the dam in which they stated that a 26,000,000 acre-foot dam would cost $50,000,000 instead of $41,500,000. None of these gentlemen—Mr. Hill, Mr. Wiley, Mr. Munn, Mr. Savage—has ever on his own accord submitted any additional evidence to the committee as to the extent to which they have examined the estimates and the designs of the problem, and as to whether or not they have approved it or disapproved it. Whenever they are mentioned they will be mentioned by hearsay, and by hearsay only. The only engineers that have ever approved it are those of the Bureau of Reclamation, which, like all bureaus, is anxious and ambitious to enlarge its sphere of influence over the destinies of people, and the engineers of the Los Angeles Bureau of Power and Light. They are the only ones that have ever approved this project. All other engineers have either disapproved of it or have remained silent, and I submit to the Members of this House that in view of the preponderance of evidence against the engineering feasibility and against the costs of this project it has been most decidedly inadequately engineered.

Mr. FLETCHER. What would the flood danger be to the Imperial Valley if they should have a flood there?

Mr. DOUGLAS of Arizona. According to the United States Geological Survey, it would take at least 15 years, and according to the United States Bureau of Reclamation it would take at least 20 years to inundate the Imperial Valley.

Mr. FLETCHER. But what would be the cost?

Mr. DOUGLAS of Arizona. It is difficult to say. The value of the property is $36,000,000, as stated by the board of equalization in the State of California for the year 1925–26.

Mr. FLETCHER. The gentleman speaks about engineers being divided in their opinion. The Wright brothers were trying to experiment with a flying machine, and some very prominent engineers expressed themselves to the effect that it could never be accomplished. In view of that, does the gentleman think that we should consider the statement of these engineers?

Mr. DOUGLAS of Arizona. What engineers?

Mr. FLETCHER. To whom the gentleman has just referred.

Mr. DOUGLAS of Arizona. I think before Congress is called upon to be the engineers and economists of a project of this magnitude, many times larger than any heretofore known in the world, there should be some very definite and specific agreement among competent, independent engineers, as to its economic and engineering feasibility. [Applause.]

Mr. Chairman, in view of all this evidence relative to the economic soundness of the project, relative to its engineering infeasibility, I submit to the members of this committee that there is but one course of action which the House can intelligently take, and that is to demand more and further investigation before the Government takes upon itself the tremendous engineering hazards involved, the terrific financial losses, and the possibility of imposing upon the Southwest a calamity infinitely greater than the one with which the Southwest is now confronted. [Prolonged applause.]

The gentleman from California has stated that the Southern California Edison Co. would build the Boulder Dam. This is untrue. The following is the testimony of the president of that company:

(See page 509)

Mr. WINTER. You spoke about a dam producing 300,000 horsepower. Have you figured on the height of the dam?

Mr. BALLARD. About 300 feet.

* * * * * * *

(See page 522)

Mr. BALLARD. We would develop first 300,000 horsepower, and as soon as the market indicates it will absorb more than that, in time to permit of additional construction work to meet that additional market. It is a matter of market.

* * * * * * *

(See page 524)

Mr. BALLARD. Under this bill, it is my opinion, it is liable to have to dig up an additional $67,000,000, according to our figures. * * *

With reference to Mexico I submit the following:

CONTRACT BETWEEN SOUTHERN PACIFIC CO. AND IMPERIAL VALLEY IRRIGATION DISTRICT

Mr. DOUGLAS. Yesterday Mr. SWING said that it would be necessary to throw some water into the Salton Sea in order to prevent an excess from flowing into Mexico, and he said we would not have to do that in violation of a contract with the Southern Pacific Railroad Co. In that connection I would like to refer to a contract between the Southern Pacific Railroad Co. and the Imperial Valley irrigation district. That contract is dated December 28, 1915. Among other things it provides, in clause V, that, "The Southern Pacific Co. further agrees that it will cause the Southern Pacific Land Co. to grant an easement unto the Imperial irrigation district, pursuant to which the Imperial irrigation district shall have the right to flow any excess water over and upon the lands of the Southern Pacific Land Co. submerged by the waters of the so-called 'Salton Sea': *Provided*, That such easement shall not be construed to permit the said Imperial irrigation district to overflow any of the Southern Pacific Land Co.'s lands not now submerged and lying above a contour line 238 feet below the sea level * * *."

That, I understand, was the contour line at the time this contract was entered into.

Continuing—

"* * * *And provided further*, That as the level of the said Salton Sea may be lowered by reason of the excess of evaporation over the normal inflow of waters, and the water thereby caused to recede from any additional lands of the Southern Pacific Land Co., all such lands lying 3 feet above the highest level of water in said lake during any calendar year shall thereafter be free from the said easement of overflow and thereafter it shall be the duty of the Imperial irrigation district to so regulate the inflow of waste waters from its irrigation canals and ditches into the Salton Sea that there shall be no resubmergence, except as above provided, of such lands of Southern Pacific Land Co. from which, by the due natural process of excess of evaporation over inflow of water, the waters of said Salton Sea shall have receded. The Southern Pacific Co. further agrees to secure a similar easement from the New Liverpool Salt Co. over the lands of that company now submerged in the so-called Salton Sea and to convey, or cause to be conveyed, the same to the Imperial irrigation district. The grant of these easements shall not prejudice or affect any rights which the Southern Pacific Co. or the New Liverpool Salt Co. might otherwise have to use waste water from the system of the California Development Co."

This had to do with the transfer of certain property of the company or its subsidiaries to the Imperial irrigation district.

There is in a contract between the New Liverpool Salt Co. and the Southern Pacific Co., which contract has been assigned, a provision to the same effect (pp. 271–272 hearings, pt. 2 of 5773).

GEORGE F. HOLBROOK'S REPORT ON SALTON SEA

Mr. DOUGLAS. I have two excerpts from a report on "Probable Future Stages of the Salton Sea," by George F. Holbrook, assistant engineer, United States Geological Survey, dated July 18, 1927. They read as follows:

"(b) The contract between the Southern Pacific Co. and the Imperial irrigation district, granting a flowage right of way to the district, will be an impediment that will have to be removed before the irrigation district can waste any more water into the Salton Sea than at present.

"(e) In order to evaporate the amount of water that may be wasted into Salton Sea under conditions of ultimate development an average water surface area of 239,000 acres will be necessary. This corresponds to elevation—228 feet." (From Hearings 5773 Ct. 3.)

[Excerpt from letter of Federal Power Commission signed by Weeks, Secretary of War; Work, Secretary of Interior; Wallace, Secretary of Agriculture]

In the letter of the Federal Power Commission, signed by John W. Weeks, Secretary of War, Hubert Work, Secretary of the Interior, and Henry C. Wallace, Secretary of Agriculture, the paragraph dealing with Mexico confirms my contention as follows:

"The regulation of the Colorado River to the extent proposed by the Boulder Canyon Dam will produce in the lower river a minimum discharge far in excess of present irrigation requirements in the United States. The surplus waters will pass into Mexico and will undoubtedly be put to use for irrigation there. Once put to use, their subsequent withdrawal for use elsewhere would be difficult, if not impracticable. It would therefore seem highly desirable to reach a general agreement with Mexico on the problem of the lower river before extension storage is provided in the United States. The construction of the all-American canal will not obviate the necessity of constant dealings with Mexico in connection with irrigation or protection of lands in the United States. Irrespective of the amount of flood-control storage in the United States, it will for many years, at least, be necessary in the protection of the Imperial Valley to maintain levees and revetments in Mexico, and arrangements must be effected whereby this work can be carried on whenever necessary without interference."

HEARINGS, UNITED STATES SENATE, COLORADO RIVER BASIN, 1925

(Page 614)

Secretary HOOVER. That proceeds on the hypothesis that in the treatment of Mexico for many years to come before we use most of the water it would be better to allow the flood flow to go down to Mexico and thus deprive Mexico of any water in the dry seasons. I think if we stabilize the river at all it will be likely to increase the flow into Mexico during the low-water season.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON IRRIGATION AND RECLAMATION,
Wednesday, May 16, 1928.

(Pages 52–55)

Mr. DOUGLAS. Mr. Chairman, I have a question which I would like to ask Doctor Mead, if I may. It is not relative to the present meeting, but it is relevant to the international situation.

Doctor MEAD. Yes.

Mr. DOUGLAS. And that is this, sir: I think it is on page 23 of volume 9 of the Weymouth report on the Colorado River development below the Grand Canyon, which, as you recall, was written in June, 1924, that there is the statement that to develop the amount of power upon which the financial set-up you have submitted to Congress is predicated 10,010,000 acre-feet of water as a minimum must be discharged from the Boulder Canyon Dam. How is that water to be disposed of, Doctor, below the Boulder Canyon?

Doctor MEAD. Well, the water goes to meet the needs of the land already irrigated and the lands proposed to be irrigated in Arizona and California, and the rest of it goes down to Mexico; that is all.

Mr. DOUGLAS. I think this is a very important point, Doctor, in the absence of a treaty with Mexico.

Doctor MEAD. Yes.

Mr. DOUGLAS. I feel this way: That Mexico, as I recall it, has 834,000 acres of land susceptible of very quick irrigation on the delta of the Colorado, owned by one company; and of that 834,000 acres of land somewhere between 200,000 and 230,000 are now under cultivation. That is approximately a statement of the facts, is it not, Doctor?

Doctor MEAD. I think so.

Mr. DOUGLAS. It means 600,000 acres, as a minimum in Mexico, to which water can be very easily applied, which remain to consume any surplus flowing into Mexico, either from the Colorado at the international boundary line or from diversion from the all-American canal. I think that that 600,000 acres as a minimum can be placed under irrigation or cultivation very much more quickly and very much more speedily than can any of the mesa lands in the Imperial Valley or any of the lands in the Chuckawala or any of the lands in the Parker Gila project. Inasmuch as there is no restriction upon the amount of water which Mexico can use which has its origin in the Colorado, I am rather inclined to believe that the discharge of 10,010,000 acre-feet of water from the Boulder Dam as a minimum will supply to Mexico an amount of water greatly in excess of the amount which Mexico is now applying to beneficial use.

Doctor MEAD. I think I can make a stronger statement for a treaty than you can.

Mr. DOUGLAS. I think we are in accord on that, are we not?

Doctor MEAD. Certainly; and I favored the extension—it is this: That if we do not have any Boulder Dam, the water that comes down that river has to go into Mexico?

Mr. DOUGLAS. Yes, sir.

Doctor MEAD. It can be used in very large amount. It is of the utmost importance to the national peace of the two countries and to the protection of our rights that we have a treaty at the earliest possible date.

Mr. DOUGLAS. Of course, all of the minimum flow of the Colorado has been appropriated.

Doctor MEAD. Now you are coming into a thing——

Mr. DOUGLAS. That is a legal question the courts will have to determine. But approximately that is true?

Doctor MEAD. Yes.

Mr. WINTER. How long a period of time will elapse before the 10,000,000 acre-feet you speak of would be used—not until a dam is erected and time has elapsed to get to that point, would it?

Mr. DOUGLAS. Doctor, in the first place, I think the Reclamation Service indicates that between seven and eight years will be required for the construction of the dam. Therefore, in order that any of the 10,010,000 acre-feet of water to be discharged from the Boulder Dam may be applied to beneficial use in this country in excess of the amount which is now applied to beneficial use in this country, many millions of dollars will have to be expended on additional canals from the Imperial irrigation district of the Coachella Valley on the east mesa and on the west mesa, on the Dos Palomas project, on the Parker Gila project, and on the Chuckawala project.

Doctor MEAD. That is my understanding from legislation now pending, that no additional lands are to be brought under cultivation within the near future.

Mr. WINTER. Do you not think a treaty might be concluded within seven or eight years?

Mr. DOUGLAS. As I understand it, in 1910 a commission appointed by the President pressed the necessity of a treaty at that time. That was 18 years ago, sir; there is as yet no treaty between this country and Mexico.

Thereupon, at 1.03 o'clock p. m., the committee adjourned to meet at the call of the chairman.

Inasmuch as water—the 10,010,000 acre-feet as minimum—which must be discharged from Boulder Dam can not be turned into the Salton Sea, it must flow, at least in the amount of the 5,000,000 acre-feet which can not be put to use in this country, into Mexico.

The evidence submitted above is conclusive.

Mr. SMITH. Mr. Chairman, I yield one hour to the gentleman from California [Mr. SWING]. [Applause.]

Mr. SWING. Mr. Chairman and gentlemen of the House, I want to congratulate my colleague [Mr. DOUGLAS of Arizona], who has just preceded me, on presenting as forcefully, as effectively as it is humanly possible to present it, the side of the case against the Boulder Dam project. It is far easier to handle the negative of a proposition than it is the affirmative; it is easier to ask questions than to answer them; and to express doubts than to present positive proof. I only wish I had the time to go fully into each and every one of the contentions made by the gentleman from Arizona [Mr. DOUGLAS]. They ought to be answered. They can be answered. They have been answered in the investigations made of the project and in the hearings held on this bill. No project has ever been presented to Congress which has been so thoroughly studied. I sat on the Flood Control Committee from the 1st of November, until the time the hearings were closed in the latter part of January, morning, afternoon, and night, and I can truthfully say that the investigations and surveys and reports on the Boulder Dam project are more complete, more thorough, more exhaustive than were the engineering plans for the $325,000,000 flood-control works that Congress authorized on the Mississippi River.

ENGINEERING FEATURES FULLY INVESTIGATED AND ARE DEPENDABLE

The first survey was authorized by the Kinkaid Act in 1920. Thereafter, pursuant to said act, the Reclamation Service, under Arthur P. Davis, made its first and preliminary report in 1921. They made their final report in 1922. The engineering data, investigations, and conclusions are embodied in Senate Document 142, Sixty-seventh Congress, embracing 325 printed pages. The report covers every phase of the project as well as its relation to the general development of the Colorado River and was the result of two years of surveys and studies by the best engineers in the Reclamation Service.

Congress, after receiving this report, considering the magnitude and importance of the problem, continued to support with appropriations a further study of the subject under the direction of F. E. Weymouth, who succeeded Mr. Davis as chief engineer of the Reclamation Service. In 1921, the Interior appropriation bill carried $100,000 for the study of the Colorado River problem. The same appropriation bill for 1922 carried another $100,000, and in 1923 an additional $25,000 to complete the study and make the report. In addition to this, the local communities affected put up $185,000 of their own money which, together with the first $20,000 appropriated under the Kinkaid Act, makes $430,000 for surveys and engineering studies of the project. The Weymouth report was not only the result of the exhaustive study and matured judgment of the best Reclamation Service engineers, but in addition there was called in the best engineering talent of the West to act as an advisory board. This board consisted of Louis Hill, well-known consulting engineer of Los Angeles; James Munn, of Denver, Colo.; and A. J. Wiley, of Boise, Idaho.

The Boulder and Black Canyon sites were most carefully studied by eminent geologists. Homer Hamlin, Dr. F. L. Ransome, and Capt. H. A. C. Jenison, on behalf of the Government, made exhaustive surveys and investigations and approved the proposed site for the high dam. In addition, the Bureau of Standards was called in to make tests and pass upon the rock, sand, and gravel proposed to be used in the construction of the dam and also the foundation rock upon which the dam was to rest.

The Weymouth report consisting of nine volumes of typewritten material is filled with exhaustive studies by experts and specialists of all the problems embraced in or related in any way to this project. Its conclusions coincide quite closely with the Davis report prepared and submitted two years prior. It is the most complete and exhaustive study ever made of any project in advance of its authorization by Congress. Certainly the engineering data is more complete than that for the Mississippi flood works recently authorized.

January 15, 1924, Secretary Work appointed—

a committee of engineers who have worked over the field to review and collate the data gathered and furnished me (Secretary Work) in abstract, data which I should review.

Because of their general familiarity with the Colorado River problems the Secretary added:

Field investigations by this committee are not contemplated.

The engineers then appointed were: Col. Spencer Cosby, Corps of Engineers, United States Army; Col. William Kelly, chief engineer Federal Power Commission; Herman Stabler, of the United States Geological Survey. There was subsequently added E. B. Debler, chief electrical engineer Reclamation Service; Walker R. Young, who was in charge of investigations at Boulder Canyon for about three and one-half years; and F. E. Weymouth, chief engineer. On January 19, 1924, the Secretary in a letter to Chairman SMITH reported: "Some of the committee are already at work." The engineering data gathered for the Weymouth report was placed at the disposal of the engineers as rapidly as it could be made available. By February 28, 1924, the entire report was before them. Their report to the Secretary was made March 17, 1924, after two months' intensive study of all available engineering data.

Some point has been made that the engineers did not agree on all details. The principal difference was that Colonel Kelly and Mr. Stabler favored two dams in place of the one proposed by the Reclamation Service at Boulder.

DISCUSSION OF ENGINEERS OTHER THAN POWER COMPANY ENGINEERS WHO OPPOSED BOULDER DAM

Mr. Stabler proposes two dams for one, recommended by the Reclamation Service. His testimony was:

* * * Consideration of * * * a scheme of development in the light of present information on dam and reservoir sites indicates that the most complete use of water for irrigation, the most complete development of power resources, and the most effective prevention of excessive flood flows, will be accomplished if a dam is built at Mohave Canyon for flood control and supplementary regulation of flow for irrigation, if a dam is built in the vicinity of Boulder Canyon primarily for power purposes. * * * (1924 hearings, H. R., p. 1532.)

In a letter dated January 13, 1928, addressed to Hon. L. W. Douglas, inclosing a letter previously written, Mr. Stabler says:

* * * Because the conclusions of the engineers of the Bureau of Reclamation advocate committing one of the cardinal sins of water-resources engineering, I find myself unable to agree wholly with them. This seriously objectionable feature is that of skimming the cream of power potentialities on the lower Colorado River at the expense of ultimate development merely to obtain a greater profit from the sale of energy. (1928 House hearings, p. 369.)

Thus Mr. Stabler's only objection to the plan is that the Government will get all the "cream" to the disadvantage of subsequent power development. I am for my Government having the "cream."

In a letter written by Mr. Stabler to the Secretary of the Interior (p. 369, House hearings, 1928):

* * * The most favorable site for a dam to accomplish adequate flood control * * * is at Mohave Canyon, * * *. This site is adapted to the generation of power only to a very minor degree and the cost of its development would necessarily have to be borne by public funds or by assessment on the lands benefited.

He then says:

But the lands can not stand this additional burden. The only other known site on the river suitable for flood control and supplementary storage for irrigation is the Boulder Canyon reservoir

site. * * * Built to a height of 605 feet, and a portion of the capacity reserved for flood control and irrigation storage, the power phase of the development could probably be made to pay the entire cost. (1928, House hearings, p. 370.)

Mr. LaRue also proposes two dams, one in Glen Canyon and one in Mohave Canyon. But on examination as to his substitute plan he was unable to show that it was feasible:

Senator JOHNSON. But you do not know as yet whether either one of these two dams that you propose can actually be built?

Mr. LARUE. We do not know. * * *

Senator JOHNSON. I am asking you this question: You do not know whether you can build either of these two or any of them, do you?

Mr. LARUE. No. * * *

Senator JOHNSON. So the fact is that you do not know now where you can build or when or how or whether they can be built at all.

Mr. LARUE. There is one thing I do know now, and that is that the dam should not be built at Boulder Canyon. That is very definite in my mind.

Senator JOHNSON. I realize that. * * * But I am endeavoring to ascertain what you are really suggesting to this committee as a substitute for the plan we have proposed; and as I understand you, you are not able at the present time, with the data at your command, to suggest a definite substitute * * *.

Mr. LARUE. Well, unfortunately, it is correct. (Hearings, United States Senate, 1924–25, p. 539.)

Then we have Col. William Kelly. He includes Bullhead in the Reclamation Service plan, although it will not be required for 50 years and maybe longer. He proposes three dams in his plan:

Colonel KELLY. I have taken first the Boulder Canyon Dam proposed by the Reclamation Service engineers. Under that plan a dam 605 feet is to be built.

On the ultimate development, as proposed by the Reclamation Service, in order to get the maximum power output from this Boulder Canyon Dam, a dam is to be built at Bullhead which would have a storage capacity of 1,600,000 acre-feet.

I have proposed a dam at Mohave Valley 180 feet high, a dam at Boulder Canyon 385 feet high, and a dam at Devils Slide 300 feet high, reserving the same amount of storage for flood protection and irrigation at the Mohave Dam; that is, 4,000,000 acre-feet on the ultimate development.

Mr. HAYDEN. How does the cost of the three dams which you propose compare with the cost of the two dams proposed by the Reclamation Service?

Colonel KELLY. Using the same estimates and units of cost the three-dam proposition will come to $76,000,000 as against $64,000,000; that is, $12,000,000 more. (1924 House hearings, pp. 1244–1245.)

Thus, Colonel Kelly's substitute of three dams for the Boulder Canyon project involves an expenditure of $12,000,000 additional.

Also Colonel Kelly recently wrote Mr. DOUGLAS a letter attacking the Reclamation Service estimates of cost, saying the project will cost $200,000,000.

Now, Colonel Kelly was called before the House committee and was examined in great detail on different occasions, and at no time did Colonel Kelly during any of the hearings ever offer any criticism of the cost estimate of the Reclamation Service, and it is only when this bill is up and is ready to be considered and ready to be acted upon that he changes his position, and in his letter to Mr. DOUGLAS undertakes to belittle the cost estimate of the Reclamation Service. I do not charge that his present position of vice president of the Buffalo, Niagara & Eastern Power Co. has anything to do with his new views.

It is a strange thing, in discussing the cost estimate of the Reclamation Service, that when Mr. Weymouth made the cost estimate of $28,000,000 for the building of a 300-foot flood-control dam he is promptly told by these same critics he is too high. But when he says that a 550-foot dam can be built for $41,000,000, they say he is too low. On a low dam he is too high and on a high dam he is too low, and yet he uses identically the same basis, the same cost units for arriving at his conclusions.

Now let us consider the facts regarding the resolution adopted by the American Engineering Council criticizing the project. I read from an insert by Mr. DOUGLAS himself in the hearings of the House committee. On January 10, from the public affairs committee of the engineering council, came a recommendation that the council reaffirm its opposition to the Swing-Johnson bill. Their opposition was not based on any insufficiency of the engineering, but, according to the newspapers, it was based upon the fact that the Government was going to build a power plant in connection with the project. The next sentence in this letter is that the executive secretary was directed to make particular efforts to call the attention of Congress to the action of the committee. Furthermore, "If necessary, a special committee should be appointed to oppose the Swing-Johnson bill."

Thereafter, in February, this committee of five was appointed to find reasons for the action which the American Engineering Council had already taken. So they first rendered their judgment and then they proceeded to search for the evidence to support it.

Now, the evidence is that only the chairman of that committee, Mr. Francis Lee Stuart, made any real study of the project and on his report to the president of the Engineering Council was based the resolution which has been read and put into the RECORD. And what does Mr. Stuart say in his report to the president of the Engineering Association? I have the report here, published in the United States Daily of April 23, 1928. Does he doubt that Boulder Dam can be built at the site which has been proposed, and be made secure and effective? His own words are—

Undoubtedly such a dam—

referring to the one proposed by the Reclamation Service—

undoubtedly such a dam could be built, and if of a generous gravity section it can be built in such a way as to insure the safety of the people below it from earthquake or other disasters.

That is the report which has been presented to you as condemning the engineering features of this bill.

He further declared—and I quote his words:

Owing to the fact that the river rises in, flows through, or bounds on seven States and disgorges into the ocean through a foreign country, that the question has intrastate, interstate, and international aspects, and that there must be continual conflict between the use of water for flood prevention, drought, and irrigation purposes, desilting, domestic use, and the generation of power, I am strongly of the opinion that the matter should not be left to private interests but should be under the control of the Federal Government for all such purposes, to the fullest extent which does not confiscate State rights, including, if necessary, the making of prime power for sale to other agencies at the hydro-electric plants in order to avoid political turmoil which will ensue from conflicting interests of private parties.

In other words, he has virtually indorsed the very proposal which we are here presenting to Congress. I further quote his language:

I am not in favor of trying to block the bill.

And if he is not trying to block the bill, then what is there to the assertion that they have criticized the engineering sufficiency of the plan that is now being presented?

He suggests, on the contrary, an amendment, and the amendment goes only this far, that instead of proposing to build one dam, 550 feet high, with a capacity of 20,000,000 acre-feet, he proposes that it be left with the Secretary of the Interior as a matter of option to build two dams instead of one, and he makes that proposal because he says that, so far as he can find out, there has not been a sufficient study of the silt problem to ascertain the amount of silt which would flow into the dam and likely to decrease its capacity. But while he was writing that report there was on the Government printing press a 93-page study of the project by eminent engineers of an entirely different and separate department of the Government, the Department of Agriculture. After an exhaustive investigation Mr. Samuel Fortier and Mr. Harry F. Blaney set out their conclusions in this separate study and report, which is a confirmation of the judgment and the opinion of the engineers of the Interior Department. They say:

The most feasible and economical means of solving the silt problem, and that is the basis of the flood problem, is to impound the river behind a dam as is proposed by the Reclamation Service, such as is proposed at Boulder Canyon. * * * Owing to the magnitude of the normal quantity of silt transported into the lower basin, it would be unwise to attempt to control the river by a relatively low dam located below the canyon section, since a reservoir of 12,000,000 acre-feet capacity would have one-third of its capacity taken by silt in 30 years, if no other reservoirs were built above it during this period.

Thus the engineering council confirms and approves everything we are asking for, except that they say they are in doubt about the silt problem, and they asked for further information, and that further information has now been given to them by the report of the irrigation engineers of the Agricultural Department recommending the Boulder Dam.

Now, who else outside the engineers for the power companies are opposing this proposition? Oh, yes; there was Mr. Hogan, of New York, but Mr. DOUGLAS did not refer to his privately employed engineer who appeared before the committee and testified against the bill.

After Mr. Hogan had testified that it would cost from $182,000,000 to $210,000,000 to build this and had attacked the sufficiency of the estimates of the Reclamation Service, Mr. ARENTZ asked him when he had first looked into the merits of the Boulder Dam project, and Mr. Hogan replied:

Mr. DOUGLAS came to New York something over two weeks ago, I think, and called on General Parsons and myself. General Parsons is the senior member of our firm, and he came to us seeking information. He wanted to know what we knew about Boulder Canyon and if we thought well of it, and after we had told him what we knew about it, of our own experience with it—

Which was nothing, because their experience was limited to a report on Diamond Creek site, 100 miles above Boulder Canyon—

and that we did not think the project a feasible one in its present form, he then asked me to come down here. I came down here last Monday afternoon and was unable to testify and went back.

In other words, one week after he had been employed on a project, with the plans and specifications for which he was entirely unfamiliar, he was ready to testify that the Government engineers, who had spent years studying the problem, were wrong and that their carefully made cost estimates were unreliable and that in his opinion it would cost nearly twice as much. I am not surprised that his testimony was quoted here to-day.

Gentlemen of the committee, I have lived in the Imperial Valley all of my adult life. I have described it frequently as a valley situated like a saucer, the basin of which is 250 feet below the level of the sea, and this great, uncontrolled Colorado River, the third largest in the United States, is flowing around half of the circumference of that saucer with the old law of gravitation having three and a half times the pull on the river down into the valley against the gravity pull for it to go on into the Gulf of California. I am surprised that even the opponents of this measure would make slighting reference to the serious menace to the Imperial Valley and other communities in the lower basin.

THERE IS A GRAVE FLOOD MENACE TO LIFE AND PROPERTY WHICH DEMANDS PROMPT ACTION

The reason this bill is before Congress is because on the lower Colorado River there exists a flood menace, which proportionate to population is greater than that of the Mississippi. There is nowhere a situation which compares with the menace which exists there.

You have the great Imperial Valley below sea level with 65,000 American citizens and $149,000,000 worth of property in that basin alone, and other lower-basin communities there is additional property to make in the aggregate $200,000,000 of property, all below the level of the river.

I resent the way the opposition has tried to minimize and belittle the serious and growing menace to life and property in many communities in the lower Colorado River Basin. They damn this situation with faint praise. The trouble is that Arizona's greed and her desire to hold up the project until she can compel revenue has deadened her ears to the cry of humanity and made her blind to an impending catastrophe which imperils her own people, only somewhat less than it threatens citizens in California. Before the bitterness over her fight for royalty and revenue arose, Arizona's public men made a record on this phase of the situation to which I call your attention.

Governor Hunt in his message to the sixty-sixth Legislature of Arizona said:

The danger of the loss of life and destruction of property which hangs over the Yuma and Imperial Valleys, due to the menace of the uncontrolled flood waters of the Colorado River, makes it imperative that this menace be removed at the earliest possible time. (House hearings, 1928, pt. 2, p. 178.)

Senator HAYDEN, former Member of the House, presented to the Committee on Irrigation and Reclamation during the Sixty-eighth Congress information setting forth the views of various citizens of Arizona on the Colorado River project, including extracts from speeches made by himself. He has made a long study of the Colorado River problem and his views are interesting and sound. He says:

The engineers agree that sooner or later a calamity is bound to occur, because the Colorado is continually raising its delta by the deposit of over 100,000 acre-feet of silt each year. The river can not continue to run on top as a ridge. It must break over some time.

The only way that such a disaster can be prevented is to build a great dam in the canyon of the Colorado which will be high enough to create a reservoir of a size sufficient to store the entire flow of the river for over a year. Such reservoir sites have been found and the question now is to determine which site is the best and how the dam shall be constructed. * * * A solution must be found and the work commenced without delay. If nothing is done, California will be the first to suffer, but Arizona can not escape sharing the tremendous loss of life and property which is sure to come if we do not exert every effort to control the floods of the Colorado River. (House hearings, 1928, pt. 2, pp. 175–176.)

Prof. George Smith, of the University of Arizona, in Bulletin No. 98, published in 1922, said:

The people of the Imperial Valley for 16 years have been fighting a defensive battle against the Colorado, sometimes gaining, sometimes losing, but in the main, losing. They can not hold out for many years more. At least once every year, in June, and sometimes at other seasons, the river threatens to change its course from the Gulf of California to the Imperial Valley, as it did in 1905. The only protection at the present is the system of levees called, respectively, the first, second, and third lines of defense. Frequently the floods break through the first and second lines of defense and reach the third line.

Each year the river, through silt deposition, builds up that part of the alluvial fan in front of the levees, in some years as much as 4 feet; and each year the levees must be raised an equal amount. Over one-quarter of a million dollars is expended each year by the farmers of the Imperial Valley in this work. The limit will be reached soon. Levees 40 or 50 feet high can not be maintained. (House hearings, 1928, pt. 2, p. 176.)

I want to read from a pamphlet published by Senator Mulford Winsor, president of the Arizona State Senate and spokesman before the House committee for the Arizona Colorado River Commission. His pamphlet is entitled "The Menace of the Colorado." He lives himself in the Yuma Valley by the side of the Colorado River and knows what he is talking about when he says:

There can be no question that the impelling force behind the movement, now under way, for the conversion of a national menace into a national asset, is recognition of the necessity for prompt action to protect and preserve imperiled lives and property. In every public discussion this phase of the subject holds first place. In every stated order of importance of the ends to be achieved by development of the Colorado River, the prior right of flood control is conceded. It is the heart of humanity responding to a just call for succor. The safety of women and children is threatened; homes and towns and cities are in the path of destruction; an agricultural empire faces extinction. * * * The necessity for protection is imminent. It will not permit of delay. * * * Nor has the necessity for control of the Colorado's floods been overdrawn. * * * The necessity for control of this unruly giant of rivers is positive, irrefutable, imperative.

Addressing the Senate committee at Phoenix, Ariz., November 2, 1925, Mr. McClouskey, then secretary to Governor Hunt and now one of Arizona's Colorado River commissioners, stated:

A portion of Arizona is menaced by the stream. Down there in the Yuma country the stream is a menace. You have seen it yourself. The Imperial Valley is menaced. We want that menace removed. (Senate hearings, pt. 3, p. 363.)

Thomas Maddox, civil engineer, once candidate for governor and now one of Arizona's Colorado River commissioners, addressing the Senate committee, said:

We (Arizona and California) are both playing a game, with the future on the stakes. Arizona is risking some slight possible damage in the vicinity of Yuma, but California is gambling that a flood like that of 1884 will not drown out her whole Imperial Valley before flood protection is finally secured. * * * We are approaching a wet portion of our cycle in rainfall. Two years have been wasted already in talk. (Senate hearings, 1925, pt. 3, p. 411.)

The Colorado River committee of the Arizona State Assembly of the American Society of Engineers declared:

Lands in Arizona along the lower Colorado are menaced by floods as well as the Imperial Valley. From Arizona's standpoint this is not as big an item as water for irrigation and power, but the risk is imminent and the need for action is immediate. (House hearings, 1928, pt. 2, p. 178.)

George H. Maxwell, of Phoenix, Ariz., speaking for the National Reclamation Association, said:

I have followed the development of the Imperial Valley from that time until now. I am as firmly convinced as I am that I am alive that if the Imperial Valley must wait for protection from the flood menace that hangs over it until the controversies which the bill now pending before this committee brings up have been settled the Imperial Valley is doomed. (P. 1289, hearings, H. R. 2903, 68th Cong.)

Senator H. A. Elliott, representing the Governor of Arizona before the Federal Power Commission in 1923, said:

Need for development of Colorado River is pressing. We hear the cries for flood control to prevent the destruction of life and property in the lower basin daily. (1924 House hearings, Information, p. 28.)

Dwight B. Heard, of Phoenix, Ariz., discussing the Colorado River problems, said:

The whole country is awakened to the need of flood control and to the tragedy of the Imperial and Yuma Valleys of California and Arizona, with their thousands of homes lying at the mercy of the flood ravages of the Colorado River.

During the great floods of 1906 the very existence of the Imperial Valley was at stake, and was saved only through the desperate efforts of the engineers of the Pacific system.

Relief (from the floods which have inundated a great home-making district south of Yuma and the Palo Verde Valley) has been but temporary, and no permanent assurance of safety can be given until one of the more important dams is constructed. (1924 House hearings, Information, pp. 185–186.)

With the foregoing testimony from an admittedly hostile source, it ought not to be necessary to call other witnesses, but I will read the statements of a few others.

Secretary Herbert Hoover, who gave a great deal of time to the study of the Colorado River while representing the Federal Government on the Colorado River Commission, said:

The people in the Imperial Valley, and the Yuma Valley, too, are carrying on a day-to-day fight with the floods of this uncontrolled river. At any time it may by unusual flood break through the dikes which these people are maintaining. Such a break has occurred once in recent history; and it costs an enormous sum of money to put the river back to where it belongs; and a second break would undoubtedly do much more damage than the first because of the channels created by the first break.

We have a population of 50,000 or 60,000 people that are in acute jeopardy from the floods of this river. The problem of controlling the flood flow of this river is one of the most acute problems of river control in the whole of our country. (House hearings, 1924, p. 64.)

Governor Dern, of Utah, says:

Imperial Valley is below sea level, and the river flows on the crest of the flat rise between the gulf and the valley. In the flood season the river tends to flow into the valley, threatening the destruction of nearly half a million acres of land and the homes of 75,000 people.

Speaking for Utah, I feel free to say that we think California is entitled to protection from floods, elimination of silt, stabilization of irrigation water supply, and domestic water for her cities. (House hearings, 1928, pt. 2, p. 235.)

Edward E. Spafford, national commander of the American Legion, has had occasion to study this problem, and in a recent letter to Chairman ADDISON T. SMITH, he said:

I had an opportunity of personally visiting the Imperial Valley and to there visualize the great danger of the life and property which now exists because of the uncontrolled Colorado River. If something is not done in the near future, the Government of the United States will have more to answer for than they did during the flood of the Mississippi Valley.

Some time ago the War Department had occasion to send Col. T. H. Jackson, of the Army Engineers, from San Francisco to the Imperial Valley to study the flood menace and make a report on the flood situation. In this report, made November 17, 1926, Colonel Jackson stated:

That the present situation is a serious one can not be denied, and it is obvious that action, prompt and vigorous, is necessary to prevent it from becoming more serious. To meet the present situation, therefore, it is necessary that some plan be adopted at once and carried out promptly. * * * The information available warrants, in my opinion, the following conclusions:

(a) The floods of the Colorado River present a serious problem and one that will increase in magnitude until the silt carried by the river is removed by storage. Thereafter the menace of the floods will decrease.

The Colorado River Commission of the Colorado Basin States unanimously adopted the following resolution emphasizing the flood menace and urging early action:

The Colorado River Commission at its twenty-seventh meeting held November 24, 1922, adopted the following resolution concerning flood control:

"The members of the Colorado River Commission have had constantly before them the great menace by annual floods to the lives and property of the people of the Imperial and Palo Verde Valleys in California, and the Yuma Valley in Arizona, and the anxiety of their thousands of citizens.

"Therefore they earnestly recommend and urge the early construction of works in the Colorado River to control the floods and permanently avoid the menace, such construction to be made subject to the Colorado River compact."

D. E. Carpenter, representing the State of Colorado and speaking also for Utah and New Mexico, before the Federal Power Commission September, 1923, said:

It became apparent years ago that the continued accumulation of silt in the south was piling up a hill at the mouth of the stream, making a hurdle through which the river was compelled to jump or digress its course to bring ruin and destruction to the land adjacent to it. The danger of damage increases rather than diminishes. (House hearings, 1924, information, pp. 51–52.)

The situation is so serious that the Federal land bank in this district has taken notice of it. They sent their engineer to Imperial Valley to study the problem several years ago, and after he had made his report they ceased making loans. On November 4, 1927, the following letter was written to Messrs. W. A. Potter & Son, who sought a loan on some farm land in Imperial Valley:

GENTLEMEN: Answering your favor of October 29, this bank ceased making loans in the Imperial Valley some years ago, and we must stay out of that territory until the flood hazard has been eliminated.

Yours very truly,

THE FEDERAL LAND BANK OF BERKELEY,
By SIMS FLY, *Treasurer.*

No one who is not blinded by partisan passion or controlled by prejudice can fail to visualize the desperate situation of the 65,000 people who live in this valley, shaped like a saucer, with the uncontrolled Colorado River running around a portion of the circumference of that saucer, threatening to break into the valley and destroy it, because the fall of the country toward the valley is three and one-half times as great as the fall toward the Gulf of California. The opposition would minimize this great danger to life and property. There is no necessity to speculate as to what might happen if the river broke into Imperial Valley. That has already happened and we know what took place in 1905–6. Eight lives were lost, 180,000 acres were permanently inundated by the newly created Salton Sea, and 25,000 to 30,000 additional acres were so washed over and cut up as to be permanently worthless. Much of this was in a high state of cultivation.

Some have undertaken to calculate the number of years it will take to completely fill up the Imperial Valley, but they seem unconcerned with what would happen at the first rush of water if the river broke at Volcano Lake levee at the height of flood season, with 100 square miles of water, 10 to 15 feet deep, backed up against the levee as I have myself seen it in the past. With ten to fifteen times the population and with ten times the values in property, of course, the loss is bound to be very heavy. The river has temporarily been forced away from the Volcano Lake levee but no one believes it can be kept away for long unless control reservoirs are built.

The river broke into the city of Yuma and inundated the business section 4 feet deep, with heavy property losses, in the year 1916. Mr. William Wisner, member of the Arizona Legislature and former president of Yuma Water Users' Association, described what happened:

* * * I remember distinctly the morning it broke; we had notified some of the people that if there was any serious danger I would come up with a team to help move stuff out. When I heard the signal, I think, in less than 15 minutes it was too late. I came up and found the water on it several feet deep, running a current down the main street in Yuma. I saw boats during the flood go down the main street. I saw the water from 3 to 4 feet deep in the hotel where, I imagine, you gentlemen are stopping. The water in the bank was 4 inches below my safe-deposit box. It also farther down broke in the valley and covered quite a number of acres of land; I couldn't tell you how many, though. The river went down and scores and scores of adobe houses melted like sugar and dropped in. Some of the main buildings on Main Street were seriously damaged. There was much loss of merchandise. The water remained in the valley for several months, until it dried away. * * * It killed out large quantities of alfalfa; some fields for a year or two grew no crops; large quantities of sediment were deposited there.

Another break into the Yuma Valley inundated 1,500 acres in 1921. Mr. Wisner describes this break as follows:

In 1921 it broke down at the 17-mile post, the greatest danger spot, the greatest menace that we have in the valley. * * * I was down there every day as president of the water users' association; I was watching it and watching it, and it was cutting and cutting, and there were 1,500 acres under water 6 feet deep, and we had practically no more dirt to build a levee anywhere, and it was within an inch of the

top. The river dropped at that time, or the levee would have broken, or this dike that we had built, and had it broken the crops of the entire lower valley would have been destroyed. * * * We are confronted with the same danger every year, but we have this advantage: When the river breaks into the Yuma Valley the water will run out again after the flood is over. Imperial Valley, situated below the level of the sea, has no such condition.

The river broke into Palo Verde Valley and inundated 30,000 acres and the town of Ripley in the year 1922. How S. C. Evans, State senator and mayor of Riverside, Calif., testified regarding this break:

We had a flood down in Palo Verde Valley. I went down there at the request of our board of supervisors; and we formed a Red Cross organization there, and even went so far as to ship boats down from our city lake so that the people could go around and rescue those who were on little islands like that [indicating on photograph], 40 feet by 100 feet in size, and who may have been there a day and a half or two days before they were taken off. The loss of the livestock and equipment and from the cutting off of the surface ground was very great. And the suffering of the people was tremendous, because the people who go into these new countries to take up these farms are not people of means. They are the real farmers, people who have brawn and muscle and the desire to plant something on their own land and see it grow; and when a catastrophe like that comes along it wipes out all of their reserve resources; it takes their houses; it takes their farming equipment; it takes their livestock; it takes everything; and you can see that the loss is tremendous. (P. 154, hearings, H. R. 2903, 68th Cong.)

True, if on a 30-mile front the river should happen to break at identically the same place where it broke in 1905 and 1906, then, of course, the majority of the water would flow down the old channel. But there is one thing we know about the Colorado and that is that the only thing certain about it is its uncertainty. The place where it broke before is probably the last place where it would break again.

This is especially true since that break has been repaired with the greatest possible skill and strengthened with great masses of rock. Therefore, it is unthinkable and unreasonable to speculate that on a 30-mile river front, this river will the next time break out at identically the same place where it broke the last time.

Mr. GOLDSBOROUGH. Will the gentleman yield there?

Mr. SWING. For a brief question; yes.

Mr. GOLDSBOROUGH. How many times has the Imperial Valley been flooded by the Colorado River, so far as the gentleman knows?

Mr. SWING. The entire river flowed into the valley for 18 months in 1905 and 1906, and created the Salton Sea. It has broken through the levees five or six different times since that time, but fortunately at places where it could be held in check, flooding only a few thousand acres; but it can easily be seen why the people are panic stricken. What is it that is causing what has been referred to as slumping values except the likelihood of recurring floods?

Mr. GOLDSBOROUGH. If the gentleman will permit, what is the estimated value of the land in the Imperial Valley and the improvements?

Mr. SWING. One hundred and forty-nine million dollars in the Imperial Valley Basin, which includes the Coachella Valley. An estimate has been referred to here of $36,000,000. That is only the taxable property which, under the law of California, excludes such property as banks, railroads, telegraph and telephone companies, and all other quasi public utilities. It excludes all public property such as roads, bridges, and schoolhouses. Furthermore, the assessed value is 40 per cent valuation of the property.

Mr. GOLDSBOROUGH. What will it cost simply to control the waters of the Colorado River and protect the Imperial Valley alone?

Mr. SWING. One hundred and four million dollars to permanently control it. I do not know whether the gentleman refers to levees or not, but I want to say that the levees are now 18½ feet high and built of the only material that can be secured there, which is silt, and it is very unsafe. It is built over lands full of mud geysers and on silt. They are expensive to build and are not safe. In the Mississippi River they have found that in places the foundations on which the levee is to rest would not support the weight of the levees much higher because the land would settle under them.

Mr. GOLDSBOROUGH. The $104,000,000 covers the whole plan?

Mr. SWING. Yes, with $21,000,000 interest which the Government never appropriates, but charges back and requires the people to pay; $41,000,000 would build the reservoir.

Mr. CROSSER. Will the gentleman yield?

Mr. SWING. I will yield.

Mr. CROSSER. Do I understand the gentleman's contention is that this proposed dam will completely take care of the flood?

Mr. SWING. Yes, sir. If no other reservoirs are built they say it will be a hundred years before the silt will in any way encroach on the storage capacity of the reservoirs, and 300 years before the dam would fill up. But even then the dam would retain its value for power. Each additional reservoir built would prolong the life of this reservoir.

Now I think a conclusive answer to the engineering difficulties which has been greatly magnified by the opposition is that the private power companies to-day have filings on every power site on the Colorado River, including the Boulder Dam site.

PRIVATE POWER COMPANIES SEE NO ENGINEERING OR ECONOMICAL OBSTACLES TO BUILDING DAMS IN CANYON SECTION OF COLORADO RIVER

R. H. Ballard, then vice president and general manager Southern California Edison Co., now president, testified before the House committee—1924 hearings, page 492—that the engineers of his corporation had gone thoroughly into the question of the practicability, from both an engineering and economical standpoint as to building dams in the canyon section of the Colorado River. Mr. Barre, their executive engineer, had gone thoroughly over the various sites, including Boulder and Black Canyons, and had made a study of their possibilities and had made 20 or 30 different reports to the company thereon, recommending development. I read from the hearings:

Mr. RAKER. What I was trying to get, that from your engineer, Mr. Barre, and his consultation with other engineers, from the examination made, they have determined that these various dams could be placed on the Colorado River at a price that would justify their construction.

Mr. BALLARD. Yes, sir.

Mr. RAKER. Has the board of directors of the company discussed this matter to the extent that the board is of the opinion—that is, the governing board is of the opinion—that it is feasible and practicable, as you have stated Mr. Barre has advised you?

Mr. BALLARD. Yes, sir; the board has discussed it and the president has discussed it with the board, the feasibility and practicability of it, with the result that the president's letter to you gentlemen states the willingness of the company to proceed at once with an expenditure of $30,000,000 or $40,000,000 of power on the work (p. 492).

Mr. Ballard further read from a memorandum of a statement made by John B. Miller, president of the Southern California Edison Co., dated August 3, 1921, to this effect:

The experience of many years of water-power development and long-distance transmission of electric power, during which time world's records were constantly broken, in building one of the largest power developing and transmission systems in the world, have so trained our executive and engineering forces that they do not look with apprehension upon the difficulties which must be overcome in making this enormous development, probably the greatest in the world.

The private power corporations have not changed their minds since that date. They want these power sites now, and they want all of them if they can get them, and that is why they are fighting my bill.

Senator PHIPPS, in discussing the Boulder Dam project and particularly the power possibilities, said:

Were it known to-day that this bill is passed and it becomes known that the Boulder Dam is to be built and that the power is to be produced, applicants who are interested in at least one other site on the Colorado River will promptly * * * make application for their permits to build a dam at least 380 feet in height on the Colorado River for the purpose and the sole purpose of producing hydroelectric power. (CONGRESSIONAL RECORD, May 2, 1928, p. 7623.)

Thus we see the fears expressed by opponents of the bill about the difficulties of diverting the water from the site and putting in the foundation between floods, and so forth, do not alarm private power companies. These contentions apply only if the Government is to do the job.

Mr. CROSSER. Will the gentleman yield?

Mr. SWING. I yield.

Mr. CROSSER. As a matter of fact the real objection comes from the power companies of the country, does it not?

Mr. SWING. I have witnessed a great amount of it; yes.

Mr. CROSSER. It has been suggested that perhaps the proponents are concerned only from the flood-control standpoint. It would be a great benefit to the people in that valley.

Mr. SWING. It is a question of life or death—we have to decide here and now whether we are to give the Imperial and Coachella Valleys and a dozen other communities on the lower

Colorado flood protection or whether we are going to abandon them to destruction by the Colorado River—as was suggested by some extreme Members in the Mississippi River debate that the lands subject to overflow were not worth the capital that would be required to protect them. But I, for one, am not prepared to say that we are going to ask any part of our country to take a backward step and abandon the communities which hardy pioneers have built up at such sacrifices to themselves and at such benefit to the country. The Imperial Valley is one of the greatest producers in the world. Products shipped out of that valley have reached as high as $50,000,000 a year.

Mr. CRISP. Mr. Chairman, will the gentleman yield?

Mr. SWING. Yes.

Mr. CRISP. I have approached this subject with an open mind. The gentleman from Arizona [Mr. DOUGLAS] in his speech stated that the natural drainage, if there was a freshet, or a flood, would be in the old channel, which would not empty itself into the Imperial Valley, and, therefore, that there is no menace of flood. I would like to hear the gentleman upon that proposition.

Mr. SWING. If, on the 30-mile front, the river should happen to break in identically the same place where it broke in 1905, it would, in all probability, flow down the old channel, but if it broke anywhere else on the 30-mile front, of course, it would necessarily devastate great areas of the valley, and would probably catch some of the cities in the valley as well.

Mr. DOUGLAS of Arizona. Mr. Chairman, will the gentleman yield?

Mr. SWING. Yes.

Mr. DOUGLAS of Arizona. If the waters from the Colorado should break through their banks at almost any point, because of the contour, the topography of the land, would not those waters follow the channel already dug?

Mr. SWING. No; the channel already dug reaches back only a short distance below the boundary line. There are approximately 30 or 40 miles between where that definite channel ends, and where the river is now flowing, and if it broke any place there, it would not go into the old channel.

Mr. DOUGLAS of Arizona. The old river channel leads up to Volcano Lake.

Mr. SWING. Oh, no.

Mr. DOUGLAS of Arizona. Not to the depth of 80 feet, but the old channel leads up there.

Mr. SWING. It leads up toward that but stops a good many miles away from Volcano Lake.

Mr. GOLDSBOROUGH. Mr. Chairman, will the gentleman yield?

Mr. SWING. Yes.

Mr. GOLDSBOROUGH. What I am trying to find out is this: Is the primary purpose of this legislation flood control, or the desire for an indirect Government subsidy?

Mr. SWING. This bill would not be here now or at any other time were it not for the fact that the lives of a hundred thousand people and everything they possess in the world in the lower Colorado River Basin are actually menaced and in danger.

The problem then comes up, and it is for you to decide—do you want to vote $28,000,000 to $30,000,000 out of the Treasury of the United States for flood control without any expectation of getting it back and then only do part of the job, or would you rather vote some more money and make sure of the complete return of your investment. It is up to you, it is your business entirely. For one, I, looking at it from the viewpoint of a national legislator, see an unusual opportunity to turn a national menace into a national asset. We have here a place where the Government has the right to build a reservoir and to store unused water, here we have an engineering agency that has built the finest dams in the world, our country has ample credit, and it is my opinion that we ought to be able to utilize this dam site, this water and this power market that exists to-day to accomplish this great and badly needed flood-control work, and at the same time get the Government back the money invested in it. There is no other place in the United States where it is possible to completely and practically permanently control the floods and at the same time get back every dollar expended in doing so.

Just a moment now on the cost. It has been charged that only two projects constructed by the Reclamation Service were completed in recent years within the cost estimate. That statement is completely erroneous. Of 19 major dams built by the Reclamation Service, beginning when the organization was still experimental, and running through the period of the war when all prices increased, you will be surprised and gratified to find that only seven cost more than the original estimates, and that on the remaining 12 the Government saved nearly $2,000,000 more than it has run behind on the seven in question. I desire to read a letter giving the facts and figures:

UNITED STATES DEPARTMENT OF THE INTERIOR,
BUREAU OF RECLAMATION,
Washington, April 26, 1928.

Hon. PHIL D. SWING,
House of Representatives.

DEAR MR. SWING: In response to your verbal inquiry I take pleasure in transmitting a list showing a comparison of the estimated and actual costs of the principal dams constructed by the Bureau of Reclamation.

It will be noted that on some of these the actual cost has exceeded the estimates, but the dams for which this is true are in all cases those which were constructed in the early years of the bureau's existence. The first 10 years of our construction activities were years of rapidly rising costs in all lines and construction work executed in many cases several years after the preparation of the estimates naturally showed higher unit and total costs than were stated in the preliminary figures.

During the past five years we have made a number of contracts for the construction of irrigation works in which total sums were named to cover the work included in the respective contracts, and in every case the contemplated works have been completed within the figure stated in the contract. Due to the uncertainties involved on account of unexpected foundation conditions, unanticipated flood heights, and many other risks, the estimating of the costs of dam construction is naturally one of the most difficult features of our engineering work, and the enviable record achieved on our more recent dams, as shown in the following table, is one of which any engineering organization might well be proud.

Principal dams constructed or under contract by the Bureau of Reclamation

Name	Project	Estimated cost	Actual cost
American Falls [1]	Minidoka	$8,500,000	$7,300,000
Arrowrock [1]	Boise	6,250,000	4,496,731
Avalon	Carlsbad	162,000	[2] 315,989
Belle Fourche	Belle Fourche	1,040,416	[3] 1,259,515
Black Canyon	Boise	1,800,000	1,492,305
East Park	Orland	198,000	196,120
Echo	Salt Lake Basin	[4] 1,394,590	[5] 1,125,098
Elephant Butte [1]	Rio Grande	5,600,000	5,004,216
Gibson	Sun River	[4] 1,826,195	[5] 1,566,240
Guernsey	North Platte	1,780,000	1,700,351
Kachess	Yakima	712,000	661,000
Keechelus	Yakima	[6] 1,069,000	[7] 1,892,778
Laguna	Yuma	972,455	[5] 1,980,462
McKay	Umatilla	2,500,000	2,116,828
Pathfinder [1]	North Platte	[9] 1,000,000	[4] 1,794,366
Roosevelt	Salt River	[10] 3,750,000	[11] 3,806,277
Shoshone	Shoshone	[12] 1,000,000	1,439,135
Stony Gorge	Orland	[4] 609,524	[5] 518,904
Tieton [1]	Yakima	4,020,000	3,756,256

[1] Dam and reservoir.

[2] Increase due to use of concrete core-wall instead of sheet piling, two new tunnels to increase spillway capacity, and an additional spillway of reinforced concrete. These changes cost over $100,000.

[3] Failure of contractors delayed work two years, and this, together with additional construction of a gravel berm and installation of auxiliary valves, increased the estimated cost.

[4] Engineer's estimate.

[5] Contractor's bid.

[6] Modified by board report of Dec. 16, 1913, to $1,337,000.

[7] Difficulty of obtaining suitable material increased cost by $240,000. Other changes which greatly increased the original estimate were riprapping, inclusion of concrete cut-off wall, changes in tunnel scheme, increased excavation for spillway and heavier concrete lining, additional road construction, and clearing and logging reservoir—the latter item alone costing $290,000.

[8] The surface of the dam was paved with concrete instead of rock as originally intended due to poor quality of rock obtainable. Notwithstanding predictions of geologists, the rock uncovered in the quarries was found unsuitable for such paving, and its use had to be abandoned in favor of concrete. Sluiceways were also paved with concrete for the same reason. There was considerable waste in quarrying, at times 50 per cent, due to poor quality of rock, thereby greatly increasing excavation quantities. Use of sheet piling had to be considerably increased. The river break into Salton Sea increased transportation difficulties by rendering the river unnavigable. There was a large increase in cost due to increase in price of labor and materials.

[9] No detailed estimate found, but early board reports show $1,000,000 allowed for Pathfinder Reservoir.

[10] 190-foot dam.

[11] 220-foot dam.

[12] No detailed estimate found, but early correspondence gives $1,000,000 as the preliminary estimate.

Yours very truly,

EDWARD MEAD, *Commissioner.*

I desire also to quote from a letter from Mr. F. E. Weymouth, former chief engineer of the Reclamation Service, and now in private practice:

So far as I know there is no basis whatever in the statement that the large dams built by the Reclamation Service cost more than estimated. I personally know that Arrowrock Dam and Reservoir was

built for $1,500,000 less than our estimate, and we saved a year in the estimated time in doing it. I know this because estimates for this dam and its construction were made under my personal supervision.

I am quite sure that the Elephant Butte Dam was built within the estimate and at a very low cost.

The same statement is true for the Jackson Lake Dam.

I was in charge of all of the engineering and construction work of the Reclamation Service from 1916 to 1924, and during that period every dam and canal structure was built for less than our estimate with a few minor exceptions.

Certain "interests" have made it a business to try and destroy the reputation of the Reclamation Service as a part of its campaign to prevent the construction by the Government of Boulder Canyon Dam.

The depth of bedrock here is not much greater than that which has been handled by the Reclamation Service of the United States heretofore. At Arrowrock they went down 92 feet to bedrock for a dam 349 feet high. At Elephant Butte they went 101 feet to bedrock for a dam 306 feet high, and at Shoshone they went 82 feet to bedrock for a dam 328 feet high. Here the estimated depth is 110 to 125 feet. Something was said about the aggregate mining requirements to go down to bedrock, and that it could not be done within one season between high water one year and high water of the next. That is correct. I am glad to verify Mr. DOUGLAS's conclusion.

Mr. Weymouth himself makes the statement that it can not be done and that he had no intention of trying to do it. He proposed the first year after he had put in his cofferdam and diversion tunnels, which will take care of the low flow, to put in only a portion of the foundation, the toe and the heel, and be satisfied with that for a first year's construction, and the second year go back and put in the remainder of the foundation between the toe and the heel.

They are not undertaking to do something that is impossible. They have had lots of experience, and they are going about this in a very businesslike and efficient engineering manner.

Mr. DOUGLAS of Arizona. Mr. Chairman, will the gentleman yield?

Mr. SWING. Yes.

Mr. DOUGLAS of Arizona. Will it not take 820,000 cubic yards before you can put in a cofferdam? It is in the Weymouth report, volume 5, page 118.

Mr. SWING. I am perfectly willing to take Mr. Weymouth's statement as to what he will do. He will not attempt to do the impossible. He has built several dams, including the highest dam in the world, successfully, and not one of his dams has ever been criticized or found fault with.

Mr. DOUGLAS of Arizona. Does not the gentleman know that Mr. Weymouth in his report says that 589,000 cubic yards can not be moved in 69 days?

Mr. SWING. The flood season comes in June and July, and in the other periods of the year the water is generally low.

Now, what is the requirement in the selection of a dam site? There is a proper relation between one dam site and another. The Colorado River is going to prove in the years to come the greatest asset that the Nation possesses. It has a potential development of 8,000,000 horsepower, and with the improvements in the transmission of electricity you are going to see the power produced on that river sent practically across the continent. It is important that we should plan wisely now in order that whatever we do now should fit in with the ultimate scheme of development in the next 100 or 200 years and not have people saying hereafter that we messed it up. So the Reclamation Service has made every possible study of the best utilization of this river.

There is also a certain economic height to which a dam should be built to get the maximum results for the expenditure. You can not go 100 feet to bedrock and then build a 10-foot dam above it. That would clearly be uneconomic. They have carefully worked out what is the economic height of this dam. Six hundred and five feet would be the economic height whereby the Government would get the maximum from its expenditures. But because Arizonia is interested in Bridge Canyon, about 100 miles upstream, the department has decided to reduce the height of the dam to 550 feet in order to save that site for future use. The engineers have given their opinion as to the needed capacity for this reservoir. Mr. Davis has made this report:

> For silt, 6,000,000 acre-feet.
> For storage for all uses, 12,000,000 acre-feet.
> For flood control solely, 8,000,000 acre-feet.
> Making a total of 26,000,000 acre-feet.
> This represents the minimum capacity that should be considered at present. A less amount will provide less power head and less water, and will increase the unit cost of power; it, of course, will have a shorter life.

A reservoir for this capacity can be formed by building a dam at Boulder Canyon lower site to raise the water 550 feet.

Mr. O. C. Merrill, referring to the companion Senate bill, filed a statement with the Senate committee, in which he said:

> I deem it unnecessary to add anything to my testimony before the committee concerning the relation of the proposed dam to a comprehensive scheme of development of the river other than to say that a dam of approximately the capacity named in S. 1868 (20,000,000 acre-feet at Boulder) appears to be reasonably adaptable to such a scheme.

Mr. Frank E. Weymouth stated:

> The above summary shows that the 550-foot dam at Black Canyon fits into a proper scheme of river development, that no resources are lost because of it, but on the contrary it fits into a plan of greater development than heretofore suggested.

Mr. E. C. LaRue, in his Water Supply Paper 395, gives the following:

> The table (p. 198) indicates that during 1909 it would have been necessary for flood to store 6,330,000 acre-feet to maintain a flow at Yuma of 50,000 second-feet or less.
>
> * * * It is estimated that for the 20-year period 1895 to 1914 a mean discharge of 15,750 acre-feet or 21,800 second-feet could have been maintained at Hardyville by utilizing storage reservoirs with an aggregate capacity of 25,000,000 acre-feet. Such regulation would increase the navigability of the stream and make possible the maximum use of the waters of the Colorado River for power development.
>
> * * * The storage required to regulate the flow to meet the demand for irrigation of the 2,730,000 acres of land below Virgin River could be estimated with a fair degree of accuracy if there were to be no increase in the use of water on the upper reaches of the Colorado.
>
> * * * To augment the low-water flow during the years 1902 to 1906, inclusive, 14,000,000 acre-feet of storage would have been required.
>
> To make up the losses due to evaporation and other causes it is probable that a storage of 18,000,000 acre-feet would be required. This may be considered a maximum storage requirement.

If we add 5,000,000 acre-feet for silt, Mr. LaRue's estimate is approximately that of the Reclamation Service.

SHAMEFUL TO USE ST. FRANCIS DAM DISASTER AS ARGUMENT AGAINST BOULDER DAM

The shock of the tragedy which followed the failure of the St. Francis Dam left a marked impression on the public mind of the country, but there has never been one bit of question as to the origin or cause of the failure of that disaster. Every group of engineers or public officials who have studied that disaster have unanimously agreed that "the dam failed as the result of defective foundations." That is, the concrete work of the dam proper was rested upon rock or conglomerate formation which when wet did not possess the power of resistance needed to support the weight of the dam and the pressure of the water. All the engineers who studied the St. Francis Dam agreed that there is nothing in that failure to indicate that the accepted theory of gravity dams is in error, or that there is any question about the safety of concrete dams designed in accordance with that theory when built upon sound bedrock.

When this disaster occurred, I promptly called on those who had any knowledge of both the Boulder Dam site and the St. Francis Dam site to advise me as to what effect or bearing, in their judgment, the St. Francis Dam disaster had on the proposal to build a high dam at Boulder Canyon.

I received replies as follows: Former Governor and former State Engineer J. G. Scrugham, of Reno, Nev., special advisor to the Secretary of the Interior, states:

> St. Francis Dam disaster has no bearing on Boulder Canyon construction, as physical conditions are entirely different. Boulder Dam founded on monolithic rock braced between almost vertical canyon walls.

Dr. W. F. Durand, one of Secretary Work's special advisors on Boulder Dam, states:

> Do not consider St. Francis Dam disaster cause for any modification my report to Secretary Work. Geological and physical conditions entirely different in the two cases. Dam site and foundation condition Boulder Canyon carefully and thoroughly examined by deep rock borings and extended study by geological experts. Safety high dam Boulder Canyon based upon these two lines evident.

Governor and former State engineer, Frank C. Emmerson, of Wyoming, also a member of Secretary Work's advisory board, states:

> I do not consider that the failure of the St. Francis Dam would require modification of my report as a special advisor to Secretary

Work upon the Colorado River project. The said report states, under the discussion of conclusion 5, that at either Boulder Canyon or Black Canyon is found available an "excellent dam site, both as to foundation conditions and side-wall materials." Either the granites of Boulder Canyon or the breccia of Black Canyon are of such strength as to safely carry the heavy loads that would be entailed by the weight of the dam itself and the pressures that would result from the impounding of water.

Mr. A. J. Wiley, member of the American Society of Civil Engineers and member of the American Institute of Consulting Engineers, of Boise, Idaho, who studied the Boulder Dam project for the Secretary of the Interior, and who also acted as chairman of the governor's board for the examination of the St. Francis failure, states:

The St. Francis Dam did not fail because of any defect in the accepted theory of solid concrete gravity dam design. It failed simply and solely because the material upon which it was built was not strong enough to resist the pressure transmitted to it by the dam * * *.

As compared with the strength of 523 pounds per square inch when dry to practically zero when wet, as shown for the red conglomerate foundation under the west wing of the St. Francis Dam, the granite bedrock at the Boulder Canyon site of the Boulder Canyon Dam has a compressive strength of 22,200 pounds per square inch when dry and 19,000 pounds per square inch when wet. The breccia foundation of the Black Canyon, which will probably be the adopted site for the Boulder Canyon Dam, has a compressive strength of 13,900 pounds per square inch when dry and 11,100 when wet. The maximum compressive stress on the foundation will be about 550 pounds.

Dr. F. L. Ransome, professor of economic geology of the California Institute of Technology, formerly of the United States Geological Survey, who spent more than a month carefully studying the Boulder Canyon site on the ground and made a favorable report thereon to the Interior Department, states:

The disaster of the St. Francis Dam was clearly due to the placing of the dam on an improper foundation. Nothing in the failure indicates that the design and construction of the dam itself were at fault. The gravity-type concrete dam is still regarded by engineers as one of the safest and most permanent of man-made structures. I still regard the Boulder Canyon and Black Canyon sites as excellent for a high dam. There is no possibility at either of these sites for such a failure of foundation rock as occurred at the St. Francis Dam. During my careful examination of the Boulder and Black Canyon sites, I saw no earthquake cracks and no evidence of the geological recent movement of the rocks. Had such cracks as are mentioned by Mr. DOUGLAS been present, they could not have escaped my notice.

NO EVIDENCE OF EARTHQUAKES IN VICINITY

True, there have been found some old faults in the surface of the earth near the Boulder Dam site, but all the evidence, according to Doctor Ransome, "indicate some measure of antiquity." There has not been, he says, any movement along these faults "since civilized man inhabitated North America."

The report of this eminent geologist is found in volume 5 of the Weymouth report, and I quote from it:

* * * The essential conclusion, with reference to dam construction, is that no fault in the vicinity of Boulder Canyon is associated with features such as are recognized as characteristic of the faults known to have been active since civilized man inhabited North America (p. 189).

None of the faults seen shows evidence of recent movement and none is so situated as to interfere in any way with the maintenance of a high concrete dam at the lower dam site.

At a point on the Arizona side of the canyon, determined to be about 900 feet above the river, were found potholes and channels worn in the andesite by a stream that once flowed at that level but which could not possibly flow there with the topography anything like it is to-day. * * * There has been no movement on the fault since these channels were cut. The existence of these well-preserved potholes and channels demonstrates (1) that the fault has undergone no movement during a period long enough for the river to cut down over 900 feet through hard rock.

I have personally talked with many of the oldest residents of the town of Las Vegas, only 25 miles away, on the north side of the canyon, and none of them ever recollect at any time anything more than the slight shaking of the windows.

I can not understand how men in serious debate can draw on their imagination to supply arguments which do not exist in fact. The unfounded assertion that this dam is to be built in the heart of an earthquake area has only been advanced because of the knowledge that the public generally is only vaguely informed as to the location of the Boulder Dam site and its geological formation. There has been no geologist who has made a study of the Colorado River Canyon who has asserted that the canyon is a fault. On the contrary, all agree that this canyon is the result of millions of years of erosion.

Mr. W. G. Clark, a witness who appeared before the House committee in 1924, made some reference to what he thought was an earthquake when rocks fell in the canyon while he was camping on the southern rim of the canyon. Rocks, of course, fall from time to time in the canyon due to erosion, weather conditions, and so forth. Clark was interested in a scheme of development which made it important for him to have earthquakes in this locality as a part of the proof of his case.

I have just received a letter from Mr. Charles A. Palmer, president of the Comanche Mining & Reduction Co., referring to Clark's testimony, in which he states:

I was out on the river with Mr. P. J. Sullivan, my wife, and a party of several others, when the earthquake of San Francisco occurred, and we were right on the river and we did not feel any sign of the disturbance that had occurred at San Francisco or along the coast and knew nothing of it until 10 days afterwards when parties came from Las Vegas and told us that San Francisco had been totally destroyed by earthquake and fire.

Now, as I have been along the Colorado River for years and am an engineer myself, I question if Mr. Clark was on the south side of the Boulder Canyon and could see the rock falling on the north side, thousands of tons, without feeling the tremor on the south side. I do not think that any engineer would take that statement seriously; that an earthquake could make a movement of such unusual crash and not have caused the south side of the canyon to shake.

I have been along the Colorado River for years in the investigation of water, power, and mining projects, and have studied the conditions there thoroughly, and, in my opinion, I do not think that there is any more chance for earthquakes in that location than in any other part of the United States; and I can say one thing: That I have never felt a tremor anywhere along the Colorado River.

Furthermore, Mr. Clark's fears were negatived by General Goethals, who was called as a witness by Mr. Clark:

General GOETHALS. I have seen the fault which Mr. Clark pointed out that he had noticed there.

Mr. HAYDEN. Are you convinced that the danger from earthquakes is so serious that a rigid masonry type of dam should not be adopted at that site?

General GOETHALS. No. As between the masonry dam and the concrete or the rock-filled dam going to that height I would rather put in a rock-filled dam; that is all.

Mr. HAYDEN. Any type of dam, if properly constructed, would be a safe dam at Boulder Canyon?

General GOETHALS. I think so.

General Goethals was himself advocating a rock-filled dam a thousand feet high.

DOCTOR RANSOME, AFTER A LONG AND CAREFUL STUDY OF THE SITES ON THE GROUND, APPROVES LOWER DAM SITE AT BLACK CANYON

The breccia as a whole is a strong, hard, impervious rock and would be excellent material on and against which to construct a dam (p. 228).

In short, there is no reason to apprehend that water impounded behind a high dam at the lower dam site could escape around or under the dam (p. 232).

I just want to say this: My home is in the Imperial Valley. Everything I possess, which is not much, is in the Imperial Valley. I am more concerned than any man on the floor of this House in ascertaining and being certain that the engineering features of this project are going to be safe and are going to hold. I would be the last one to come here and advocate a dam which would engulf me and what little I have, as well as my friends and neighbors, in destruction. [Applause.] After most careful study I am satisfied with the engineering features that have been proposed by the Reclamation Service.

THE BOULDER DAM PROJECT IS ECONOMICALLY SOUND AND THE GOVERNMENT IS CERTAIN TO GET ITS MONEY BACK

Having demonstrated that there is a tremendous, imminent, and increasing flood peril to the entire lower basin of the Colorado River from the uncontrolled condition of the river, and having shown that there is an engineeringly sound remedy in the Government's proposal to build a high dam at Boulder Canyon, I now offer the proof to show that the Government can undertake this vitally necessary humanitarian project without the risk of the loss of a single dollar to the United States Treasury. The project is unique in this respect. God in his wisdom has prepared a place for man by one undertaking to control for centuries to come the flood menace on this river, and at one and the same time, as has been so ably said by Secretary Work, "turn a natural menace into a national asset."

The pending bill contains a provision which has never been inserted in any legislation heretofore, and provides that before a dollar can be appropriated or before any contracts can be made or any money expended there must be in the hands of the Secretary of the Interior solvent and binding contracts from agencies, public and private, agreeing to take the benefits of the project on terms dictated by the Secretary of the Interior which will guarantee the return to the United States Government of not only every dollar expended but 4 per cent interest as well.

The opposition goes into a long, minute, and fine-spun argument to show that if the cost of steam production continues to decline in the future as rapidly as it has in the past few years, then a question may arise as to whether hydroelectric power will be cheaper 50 years from now than steam power. This hypothetical situation need not worry Congress. It is the problem of the local communities who are advocating the project and who must obligate themselves to take water and power at rates to be fixed by the Secretary of the Interior before the project can ever begin. If the flood menace is so serious to them, if domestic water is so necessary, if agricultural development at a future date is so desirable that they are willing to pay something more than the actual cost of the power in order to secure the solution of the whole river problem, that is their affair and their decision to make. But without contracts which will fully repay the Government there will be no project.

However, every person who has made any study of the oil situation knows, first, that nature is not now engaged in the creation of new oil supplies; second, that nowhere in the world have the oil fields and possible oil fields been so thoroughly explored and developed as in southern California, and nowhere is the supply being taken out of the ground and exhausted more rapidly than there. The history of every oil field is the history of every oil well. It may start as a gusher but in a few years it must be pumped, and finally it fails as a commercial producer. While there have been ups and downs in the price of oil in the past 10 years because of unnatural and undesirable overproduction, nothing is more certain to minds who have studied the problem than that the price of oil in southern California must of necessity climb in the future. Hence, since the cheapness of steam power in southern California is based primarily upon cheap fuel oil, the cost of steam power in the future is bound to increase.

The hypothetical proposal of how many British thermal units per kilowatt-hour will be required in the future to develop electricity by steam is purely theoretical, and the proposal that the cost of steam production in California will continue to be reduced is purely imaginative.

I quote Mr. C. P. Dunn, chief engineer of the Portland Electric Power Co., from his article "Steam and hydraulic generation" published in the Electrical World, April 21, 1927, in which he states:

> We read in the current discussions of steam versus hydro that there is still room for further advances in steam economy while hydro efficiency has practically reached the ultimate, with the present 92 or 93 per cent efficiency obtainable in hydraulic prime movers. This sort of statement is only partly true and is misleading. It is true that there is room for further improvement with respect to thermal efficiency in steam plants, and some such improvement will take place in the near future. The economic benefits of this improvement will be partially offset by the gradual upward trend of fuel prices. It is true that the efficiency of waterwheels and generators has practically reached the theoretical limit, but this does not by any means indicate that the ultimate economy in hydro construction has been reached.

Notwithstanding the talk about cheap steam power, one thing is very evident—the electric power companies are reaching out to lay hold of all available water-power sites. This belies the assertion that the time has arrived or will in any human probability arrive when electricity can be generated by steam cheaper than by water power. What is the meaning of all the filings made by the private power companies upon each and every power site on the Colorado River if steam is now or if it is going to be a cheaper source of electricity than water.

R. H. Ballard, president of the Southern California Edison Co., testifying before the House committee, said they had made filings on Colorado River sites that would develop 3,000,000 horsepower; that the filings were made in good faith; and that their investigations and studies justified the conviction that dams at Boulder Canyon and other sites in the canyon section of the river were not only "feasible and practicable" but the power market in the Southwest was sufficient to justify construction, beginning at once and continuing at the rate of $30,000,000 to $40,000,000 per year. He said:

> Mr. RAKER. What I was trying to get, that from your engineer, Mr. Barre, and his consultation with other engineers, from the examination made, they have determined that these various dams could be placed on the Colorado River at a price that would justify their construction.
>
> Mr. BALLARD. Yes, sir.
>
> Mr. RAKER. From which, if constructed, the power company would be able to build them, commencing in a reasonable time and continuing and would be able to dispose of their bonds and still be able to pay a reasonable rate of interest on the money they had to use, a reasonable dividend upon the stock, as well as all taxes and maintenance and upkeep.
>
> Mr. BALLARD. That is true; yes, sir.
>
> Mr. RAKER. As well as the depreciation.
>
> Mr. BALLARD. Yes, sir.
>
> Mr. RAKER. And also a reasonable fund to be laid aside for contingencies.
>
> Mr. BALLARD. Yes, sir.
>
> Mr. RAKER. Has the board of directors of the company discussed this matter to the extent that the board is of the opinion—that is, the governing board is of the opinion—that it is feasible and practicable, as you have stated Mr. Barre has advised you?
>
> Mr. BALLARD. Yes, sir; the board has discussed it and the president has discussed it with the board, the feasibility and practicability of it, with the result that the president's letter to you gentlemen states the willingness of the company to proceed at once with an expenditure of $30,000,000 to $40,000,000 of power on the work (p. 492).
>
> Mr. SWING. What is the aggregate horsepower of all the sites covered by your filings?
>
> Mr. BALLARD. I think about 3,000,000 horsepower.
>
> Mr. SWING. And you stated you filed those in good faith and within a week after your permit was granted you would go to work?
>
> Mr. BALLARD. Yes (1924 House hearings, p. 527).

Col. William Kelly, who while chief engineer for the Federal Power Co. showed his hostility to the Boulder project in every way possible, and who now since becoming vice president of the Buffalo, Niagara & Eastern Power Co. is continuing the same attack, did admit that there was no question but that all the hydroelectrical power that could be developed on the Colorado River—between 3,000,000 and 4,000,000 horsepower—would be needed within the next 50 years.

He testified:

> Colonel KELLY. The Colorado River constitutes the only big remaining source of power in the southwest section of this country, and every kilowatt-hour that can be developed from the Colorado River will be needed. (1924 House hearings, p. 1229.)
>
> Mr. SWING. You thought that the power possibilities of the canyon section would be developed during the next 50 years?
>
> Colonel KELLY. That was my judgment on it.
>
> Mr. SWING. That would aggregate about 3,000,000 horsepower?
>
> Colonel KELLY. Between three and four million horsepower.
>
> Mr. SWING. You feel now that there is a growing power market in the Southwest, and particularly in southern California, which is going to make necessary the early development of this canyon section?
>
> Colonel KELLY. I have always felt so. (1924 House hearings, p. 1281.)

Mr. Stabler, of the United States Geological Survey, quoted by the opposition as unfriendly to the Boulder project, unhesitatingly declares that there exists an assured market for the power:

> Conditions in the power market of the Southwest are such that we may reasonably expect all power sites on the Colorado River west of (below) the Grand Canyon National Park to be needed within the comparatively near future. (1924 House hearings, p. 1532.)

Secretary Hoover, who appeared before the Irrigation Committee, and speaking of the power market in the Southwest, said:

> At this moment there is probably an immediate need of, say, 200,000 horsepower; 10 years hence there is a possibility of a need of a million horsepower. (122 House hearings, p. 59.)

Senator PHIPPS, of Colorado, who is himself heavily interested in a private power company operating in the Southwest, stated to the Senate in the CONGRESSIONAL RECORD of May 2, 1928, that he knew of a power company that was to-day ready to proceed with the building of a dam 380 to 400 feet high in the canyon section of the Colorado River for the purpose of producing hydroelectric power and would do so even if the Government proceeded with the Boulder Dam project. (CONGRESSIONAL RECORD, p. 7626.)

Senator PHIPPS, last Congress, stated in the CONGRESSIONAL RECORD:

One thing is admitted on all sides—by those who favor Government ownership and by those who advocate private operation—there is a real need for this additional power in the West. (CONGRESSIONAL RECORD, 69th Cong., 2d sess., p. 1335.)

Again, this year, in the RECORD of May 2, he says:

Mr. President, bear in mind that the demands for power, hydroelectric or steam electric, in California and that section of the country, have increased so rapidly that they have doubled in the last five or six years. Personally I am of the opinion that no matter what developments may come in the lessening of cost of electrical power produced by steam, it will still be found practicable and economical to construct hydroelectric plants and produce power on our western rivers. * * * I think there is ample leeway in the possibilities of a hydroelectric plant such as would be created at Boulder Canyon Dam to enable the department to safely figure upon a return.

The foregoing certainly ought to convince everyone that there is a sure market in the Southwest for all the power which can be developed as an incident to Boulder Dam and that the Government will get back every dollar expended on this project.

MEXICAN COTTON ARGUMENT

I want to take a few minutes on the question of cotton growing in Mexico.

There has been broadcast through the South that southern Members of Congress should oppose the Boulder Dam legislation because it will bring 1,000,000 acres additional cotton land into competition with the South. The statement is false in toto and without any foundation whatever.

The bill itself does not authorize a single dollar to reclaim any new land in the United States. Public land that might be reclaimed is withdrawn from entry to prevent speculation, but no new reclamation project is authorized by this bill. All that is postponed to some future date, when conditions justify it and Congress sees fit to authorize it. That time must of physical necessity be 10 years away, because it will take that long to build the works now authorized in the bill.

But it is claimed that after the dam is completed and the power plants are built, in order to make the project pay back the cost to the Government enough water must be released to run the power plants, and that this will require between 11,000 and 12,000 cubic second-feet continuous flow, which will of necessity have to go into Mexico, where 1,000,000 acres will be reclaimed by it and planted to cotton by cheap Mexican labor.

Instead of the above being the result of the project, that is the very thing the project is designed to make impossible.

Let us consider the facts. Assume 12,000 cubic second-feet continuous flow, what becomes of it? I have a table showing the distribution of 12,000 cubic second-feet, leaving only a sufficient amount flowing into Mexico to irrigate the present lands now under cultivation.

Water estimated to be used in the United States at time of completion of dam, based on what is now being used

	Second-feet
Imperial Valley	6,000
Mexico	3,000
Palo Verde Valley	700
Yuma project	1,600
Coast cities for domestic water	400
Total	11,700

The above makes no allowance for possible uses of new projects.

	Second-feet
Present use:	
Imperial Valley and Mexico	7,200
Palo Verde Valley	700
Yuma project	1,400
Total	9,300

Present area Salton Sea, 180,000 acres with 3-foot variation; assuming constant area would equal 540,000 acre-feet not based on evaporation figure, which would give a larger amount, equals 740 second-feet continuous flow, or 3,000 second-feet for 90 days.

Estimate of amount of water necessary to operate Boulder Canyon plant to a capacity of 550,000 firm horsepower, assuming maximum draw down of 11,000,000 acre-feet per annum

	Acre-feet
Capacity Boulder Canyon Reservoir, elevation 1,200	26,000,000
Capacity Boulder Canyon Reservoir, elevation 1,100	15,000,000
Difference in capacity	11,000,000
	Feet
Average elevation	1,150
Elevation, low water (present)	647
Average power head	503

Firm power taken as ultimate of 550,000 horsepower, over-all efficiency 83 per cent.

$$\text{H. P.} = Q \times h \times .1134 \times \text{efficiency, or}$$

$$Q = \frac{\text{H. P.}}{h \times .1134 \times \text{efficiency}}, \text{ or}$$

$$Q = \frac{550{,}000}{503 \times .1134 \times .83} = \frac{550{,}000}{47{,}343} = 11{,}617$$

$$Q = 11{,}617 \text{ sec.-ft.}$$

Therefore, to operate the proposed plant at full capacity of 550,000 horsepower, firm power would require a continuous flow of 11,617 second-feet, equaling 8,480,410 acre-feet per annum.

The all-American canal, built to a 10,000-cubic-second-foot capacity, will furnish the means whereby surplus water can be dumped into the Salton Sea from time to time during the irrigation period of the year, thereby artificially restoring the fluctuation of the river which now exists.

The testimony of Secretary Hoover and F. E. Weymouth, former Chief of the Reclamation Service, is that with the high all-American canal the United States will have the complete control of the flow of the river and can prevent extension of irrigated area in Mexico.

I read from Mr. Weymouth, former chief engineer of the Reclamation Service, on this very subject:

If a high dam is constructed at Black or Boulder Canyon with large storage capacity, it would be entirely practical to control the floods of the river and during the months of July, August, and September hold back the entire flow of the river except that needed for irrigation in the United States. In that way no water would go down at all during that period to Mexican lands. In other words, a high dam with large reservoir capacity could be regulated even to the extent of withholding all water from new areas in Mexico for a three months' period in each irrigation season, when water is most needed, and stop development there beyond the present area being irrigated.

If a low dam is constructed for flood control only, as has been suggested by some, it would have the effect of improving the water supply for lands located in Mexico and would so improve the water supply for those lands that the development there would proceed more rapidly than now, even. (1925 Senate hearings, pp. 799–800.)

Secretary Hoover, testifying before the Senate committee, stressed the importance of a high dam on the Mexican situation. He said:

If we wanted to prevent the irrigation of lands in Mexico by way of holding up the flow in the low-water season—that is, if we wanted to deliberately do that—you could do it more effectively at Boulder Dam than anywhere else, because you have a larger body of water to deal with. In a large reservoir like this we could hold back water during the summer and let it down in the winter, when they could not use it; that is, if we wanted to be malevolent. (1925 Senate hearings, p. 614.)

Senator HAYDEN, when a member of the House Reclamation Committee, raised the question whether diversion in Mexico was possible because there was no place below the international boundary line where a diversion dam could be put in, on account of there being "no rock abutment" on either side of the river in Mexico. He said:

If a diversion dam were built in the channel of the Colorado River in Mexico, the water would wash around one end or the other of it; therefore the diversion from the Colorado River must be in the United States in order to irrigate the lands in Mexico. (House hearings, 1924, 1265.)

Again, Mr. Stabler testified on this point, as follows:

Mr. HAYDEN. There has been testimony before this committee that it would be very difficult to maintain a heading anywhere in old Mexico for diversion out of the Colorado River after the water passed the international boundary line. Are you familiar with the delta of the Colorado River?

Mr. STABLER. I have never been down there, but from what I have read of it and heard of it I think it is probably true that the heading would be difficult to maintain. (1924 House hearings, 1543.)

The fact is, as is now evident to every person who has followed in the newspapers the exposure of the power propaganda being brought to light by the Federal Trade Commission, that this whole cotton argument was conceived in the minds of the power corporations and assiduously broadcasted through the newspapers of the South.

However, this strange situation has been brought to light: While the cotton argument is strong in Georgia, the Carolinas,

Alabama, Mississippi, and Texas; in Florida the newspapers were filled with the contention that the new land was to be planted to tomatoes; in the Middle West States their contention was that there would be competition to the corn-growing belt; and in the Northwest they raised the fear of wheat competition. This is now all a great hoax gotten up to defeat this project.

A high dam at Boulder Canyon, with the all-American canal, will give the United States Government the absolute manual control over the flow of the river, so that by diverting it through the all-American canal into the Salton Sea it will be possible to restore, after the dam is built, by artificial fluctuation of the river the variations which exist to-day, and still allow the power plants from 10,000 to 12,000 second-feet of water.

The Salton Sea covers to-day 180,000 acres, and the evaporation upon that service, in that hot, dry climate in the Imperial Valley, is 5 feet a year. They can, therefore, dump 900,000 acre-feet into Salton Sea without raising its surface.

It is not necessary to run it in there continuously to accomplish the desired end because in that dry climate if you take water off of the crops for 15 days you can destroy them. Thus by putting surplus water through the all-American canal into the Salton Sea for intervals of 15 days it will be possible to definitely limit the water which can be beneficially used in Mexico, in the absence of a treaty. That is what we intend to do unless a treaty is made. If a treaty is negotiated then of course the treaty will govern. It will be possible to put into the Salton Sea under this method, about 3,000 second-feet, continuous flow, for 90 days.

Mr. LANKFORD. Will the gentleman yield?

Mr. SWING. Yes.

Mr. LANKFORD. Will the gentleman tell us for the benefit of some of the Members what the Salton Sea is?

Mr. SWING. The Salton Sea was created by the overflow from the Colorado in 1905–6 and is the warning which nature has put there for us to remind us what this river has done and is trying to do every year, and what it will do again the next big flood if no provision is made in the meantime to control this river.

I want to take the few minutes I have remaining to refer to the so-called question of constitutional rights. Has the United States Government the right to build this dam for flood control or for navigation?

On the Mississippi flood-control hearing we appealed to the Department of Justice to give the Flood Control Committee their opinion. Assistant Attorney General Wheat gave us his opinions, and I will read from his statement:

> Assuming that the Federal Government has a constitutional power and authority to expend money for flood-control works, has it the authority and legal right to exclusively determine the character of the works to be constructed and the place where they will be located? Or, have the States in which the works are to be built certain sovereign rights (other than the right to have its citizens, as individual owners, compensated for property taken or damaged) to participate in the determination of the character of the works and their location? And is the consent of the States under these circumstances a condition precedent to the Federal Government proceeding with the carrying out of a flood-control program within those States?
>
> It seems to be plain that, assuming the end to be accomplished is within the powers conferred upon the Federal Government by the Constitution, all means and methods necessary and appropriate to accomplish that end are also within those powers, and that Congress may choose the means and methods whereby the powers are to be exercised without let or hindrance from any State.
>
> Is flood-control work a proper function of the Federal Government; and if so, under what circumstances can the Federal Government spend money on that kind of work?
>
> Is flood control limited to cases where it is incidental to and in aid of navigation, or can it be predicated on the broader basis of aid to commerce by preventing an interruption or threatening interruption of interstate commerce over interstate highways, railroads, post roads, etc.?
>
> I would answer the questions as follows:
>
> (1) Flood-control work is a proper function of the Federal Government, and Congress is the sole judge of the circumstances under which money for that purpose shall be spent.
>
> (2) The power of Congress is not limited to cases where it is incidental to and in aid of navigation, but may be predicated upon the broad basis of aid to commerce by preventing the interruption or threatened interruption of commerce and the destruction, injury to, or impairment of the efficiency of the agencies engaged in commerce.

Now, with regard to Arizona itself, I will not insert in the RECORD, but I will call your attention to what is shown in the appendix to the hearings, at page 596, a very able brief written by Ross & Casey, of Arizona, and not under the employ of anybody in California, but written for the benefit of the people in Arizona, in which they arrive at this conclusion:

> To sum up, it seems to us that the rights of the Federal Government to withdraw the river, for the purposes of development, from State sovereignty is undoubted. It seems to us equally undoubted that the Federal Government has already taken the necessary steps to consummate this withdrawal. Likewise, the right of the national withdrawal does not depend upon whether the river is navigable or nonnavigable.

On this point let me refer to the testimony of a very able Member of the Congress, Senator HAYDEN, who at that time was an honored Representative in this House. In making an address to this House on another subject, he said:

> As a Representative from Arizona, however, I do not have to read the contradictory decisions of the Supreme Court to find out whether or not the United States owns the public lands that are within the boundaries of my State. Congress and the people of Arizona have entered into an agreement which settles that question forever. The enabling act, under which Arizona was admitted into the Union "on an equal footing with the original States," provides that the people of the State shall agree to forever disclaim all right and title to the public lands. Congress passed this act, and the people of Arizona adopted an irrevocable ordinance as a part of their constitution, which is as follows:
>
> "The people inhabiting this State do agree and declare that they forever disclaim all right and title to the unappropriated and ungranted public lands lying within the boundaries thereof and to all lands lying within said boundaries owned or held by any Indian or Indian tribes, the right or title to which shall have been acquired through or from the United States or any prior sovereignty, and that until the title of such Indian or Indian tribes shall have been extinguished the same shall be and remain subject to the disposition and under the absolute jurisdiction and control of the Congress of the United States."
>
> Another ordinance in the constitution of the State of Arizona reads as follows:
>
> "There are hereby reserved to the United States with full acquiescence of this State all rights and powers for the carrying out of the provisions by the United States of the act of Congress entitled 'An act appropriating the receipts from the sale and disposal of public lands in certain States and Territories to the construction and irrigation works for the reclamation of arid lands,' approved June 17, 1902, and acts amendatory thereof or supplementary thereto, to the same extent as if this State had remained a Territory."

Mr. HAYDEN has made this so much plainer than I can that I want to quote him:

> But referring to the much-discussed Boulder Canyon and Black Canyon Dam, the fact that these power sites are within this State has led a number of people to assume that they belonged to the State and that the State alone could determine how they shall be utilized. Upon being informed for the first time that such is not the case, that the title to all the power sites on the Colorado River is in the United States, it is but natural that some citizens of this State should cry out that Arizona has been robbed by the Federal Government of the greatest of her natural resources. That the title of the United States to those power sites is perfectly good can be determined by an examination of the facts of history. (Hearings, 68th Cong., Inf., p. 39, 49.)

He starts in with the Indians and traces title through the Crown of Spain, the Republic of Mexico, to the United States, the formation of a territory.

It was made before the Kiwanis Club of Phoenix, Tuesday, June 19, 1923, but the law has not been changed since that time. The statement was inserted by Mr. HAYDEN in the hearings on my bill.

He goes on down and then says:

> No one who is familiar with the law and decisions will deny that the power sites belong to the United States Government.

Hon. Mulford Windsor, president of the Arizona State Senate and Colorado River commissioner, representing the governor before the House and Senate hearings, is in accord with Senator HAYDEN. In the 1924 House hearings, "Information," page 3, he is quoted:

> Arizona does not possess a single site on the Colorado River upon which to construct a dam for the harnessing of floods, for the storage or diversion of water for irrigation, or for the creation of hydroelectric power. All are owned by the United States and are held in pursuance of the established national policy of conservation of the country's natural resources. Their status was fixed by the Arizona enabling act and confirmed in the State constitution.

* * * * * * *

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. SWING. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD, and anyone who is interested in these questions will find an amplification of the matters I have discussed here as well as some additional ones. [Applause.]

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. DOUGLAS of Arizona. Mr. Chairman, I yield 45 minutes to the gentleman from Utah [Mr. COLTON]. [Applause.]

Mr. COLTON. Mr. Chairman and members of the committee, in my experience in this House I have found that sometimes in the heat of debate we get sidetracked, so to speak, from the main issue. We will usually find that in every debate there, perhaps, are two or three fundamental issues. I think you will find this is true in this particular case. The engineering problems, the economics, and the legal phases are the vital issues.

I shall not speak of the engineering problems involved in this bill. I do submit, however, that with the showing already made it is sufficient to justify the submission of any plans that may be worked out in connection with this project to a board of competent engineers, independent of the Reclamation Bureau. That it is of such tremendous importance that no steps ought to be taken along this line until we are sure it is a feasible proposition.

The testimony thus far before this committee, and not disputed, is that the power bureau of Los Angeles has contributed $140,000 to the Reclamation Service to work out a power project on the Colorado River. The other engineering departments of the United States Government, in so far as they have reported at all, are adverse to this project, and so I say there ought to be ample assurance that the project is feasible and that showing has not thus far been made. Neither shall I speak of the economics of the project.

I want to speak of another phase of the question. Utah is among the upper-basin States. Her motives have been entirely misunderstood by the proponents of this measure. For some reason there is being whispered around a rumor that every man who is opposed to this proposition is in some mysterious way influenced by the Power Trust, if there is such a thing. Because the Power Trust is for or against the measure is no argument in my mind for or against the bill. Because there are some people who are opposed to this fundamentally does not argue that the Power Trust or any power interests have had any influence over these Members. It is unfair and unjust to make such a charge.

I hope you will believe me when I say to you to-day that no representative of the power companies has ever sought to influence my vote with reference to this matter whatever, and I am sure this is true of most, if not all, of the others.

Mr. LAGUARDIA. Will the gentleman yield right there?

Mr. COLTON. Yes.

Mr. LAGUARDIA. Of course, I believe the gentleman, and I am sure all my colleagues do, but, on the other hand, the Power Trust has been very loud in denouncing anyone who favored this project as a bolshevist, as unsound economically, as a demagogue, and a few other choice epithets.

Mr. COLTON. But that is no argument one way or the other; on the other hand, those who have honestly and conscientiously, upon principle, opposed this have been denounced more strongly than those who have been for it. Worse things have been said of the opponents than of the proponents.

Mr. LAGUARDIA. That is impossible.

Mr. COLTON. I hardly think so, but it is no argument, nevertheless.

Yesterday on the floor of the House it was stated that the Governor of Utah had never spoken against this bill. Now, friends, what are the facts? I have before me here, first, a resolution passed at a meeting of the governors and other representatives in December of last year when the governors of all the Western States asked Congress not to act upon this measure. I will read the entire resolution:

Whereas it is the conviction of the governors and interstate water commissioners and other representatives of the States of Colorado, New Mexico, Utah, and Wyoming, the four States of the upper basin of the Colorado River, that the interstate agreement embodied in form by the Colorado River compact as negotiated at Santa Fe, N. Mex., in November, 1922, should be completed and placed in full force and effect through approval and acceptance by the seven Colorado River States, in order that the way may be properly cleared for the orderly development of the Colorado River; and

Whereas substantial progress has been made during the past few months toward the completion of the said compact and negotiations are now being carried on in a competent manner looking to such completion; therefore be it

Resolved, That it is the firm belief of the representatives of the four said upper basin States as assembled at Denver, Colo., this 19th day of December, 1927, that no legislation proposing the construction of any project upon the Colorado River should be enacted by Congress or otherwise authorized by any Federal agency before the negotiations now in progress have been completed and every reasonable effort exhausted to reach such agreement between the seven States.

W. H. ADAMS,
Governor of Colorado.
GEO. H. DERN,
Governor of Utah.
FRANK C. EMERSON,
Governor of Wyoming.
EDWARD SARGENT,
Lieutenant Governor of New Mexico.
DELPH E. CARPENTER,
Interstate River Commissioner for Colorado.
FRANCIS C. WILSON,
Interstate River Commissioner for New Mexico.
L. WARD BANNISTER,
Counsel for the City of Denver.
M. C. MECHEM,
Representing New Mexico.
WM. L. BOATRIGHT,
Attorney General of Colorado.

Every one of these States was represented; and, in fact, there were representatives besides the four States who signed this resolution. That reflects the attitude of the State of Utah.

These men are saying in effect that if you will give us a little time we will work this problem out in a reasonable manner for the protection and benefit of all of the seven States. It has been said here that we have spent all these years in investigating and trying to get together. Do you know that there was no official attempt of all of these States to get together until after we had adjourned Congress last summer? In fact, as I recall, the first meeting was in August. This was a big proposition. Those men had a big task. You can not solve this problem in a day, and I submit that there has been no unreasonable delay. I submit that if you will give the seven States a reasonable time they will work it out on constitutional grounds and work it out on lines that will not strike at the very vitals of our industrial life, as I think I can show you this bill does.

Why? Because one of the basic principles upon which our industrial life is based is about to be violated in the passage of this bill, and I want to show you in what way as best I can in the limited time at my disposal.

Just a word further about Utah's attitude. We are not so much concerned about power development. That will not make so much difference to us for a time, at least, but we are opposed to the power development even in our own State until our rights are protected. We are bitterly opposed to building a dam anywhere on the Colorado River until certain basic principles are settled and adjusted according to our laws and our Constitution.

Here is what the governor and legislature of my State have said regarding this project:

As Governor of the State of Utah, I protest against the passage of the Swing-Johnson bill, and convey to you the definite pronouncement of the Utah Water Storage Commission, which is the official State body in charge of the State's water resources, and also a resolution passed by the Legislature of Utah, February 25, 1927, which reads as follows:

Resolution, protesting against the passage of the Swing-Johnson bill, pending in Congress, or other similar legislation

"Be it resolved by the Legislature of the State of Utah (the Governor concurring therein), That the State of Utah, through its legislature, hereby protests against the passage of the present Swing-Johnson bill, or any similar legislation, by Congress until provisions are made therein for an equitable apportionment of the waters of the Colorado River.

"Resolved further, That the Governor of the State of Utah forward certified copies of this resolution to the President of the United States, the Secretary of State of the United States, to the Senators and Representatives in Congress from this State, and to the Governors of the States of Arizona, Colorado, California, New Mexico, Wyoming, and Nevada."

The official position of Utah is that we are opposed to any and all development on the lower river in advance of the completion of the compact. Utah has opposed development not only on the lower river but on the upper river as well, for a large dam and reservoir in the

upper basin would, to some extent, equalize the flow of the lower river and make it possible to use additional water for irrigation in the Imperial Valley and Mexico, which would cause new claims of priorities to be set up against us. We have therefore protested against and held up the construction of a power dam at Flaming Gorge, on the Green River, in Utah. I am sure this is good evidence that we are in earnest in the position we have announced.

It ought not to be necessary to eliminate the fourth proposition, that Utah is fighting in behalf of private power interests. I hope that by the time I have finished, this falsehood will have been exposed. Utah is fighting nobody's battle but her own, and it is a libel on our State to accuse her of fighting the battle of any special interest.

Members of the committee, that is the very foundation on which our opposition rests—power has nothing to do with it. We are opposed to the development of power in our own State or in any other State until this matter is adjusted, and I will show you in a few minutes why. We rest our opposition on principle, not because of any special interest.

Mr. EVANS of California. Did not the Governor of Utah go further and say that he would be in favor of it when the seven-State compact was ratified?

Mr. COLTON. Probably he may have done so, although I have not seen his statement going that far. But you are proceeding on the theory that it should be done without the seven-State compact.

Mr. EVANS of California. A six-State compact that embodies the principles of the seven-State compact.

Mr. COLTON. That is incongruity. I can not see how that is possible.

Mr. MONTAGUE. Will the gentleman yield?

Mr. COLTON. I will.

Mr. MONTAGUE. Suppose you have the compact. The question is whether the United States should be liable for the operation of this great enterprise—if it be a private enterprise.

Mr. COLTON. That is a question quite apart from the compact.

Mr. MONTAGUE. Seven States have no right to put the United States into private business.

Mr. COLTON. No.

Mr. SNELL. Will the gentleman yield?

Mr. COLTON. I will yield to the gentleman from New York.

Mr. SNELL. How many States have absolutely ratified the compact unconditionally?

Mr. COLTON. Five. California and Arizona have never ratified the seven-State compact unconditionally. I believe California did at first and then rescinded.

Mr. SNELL. The legislatures of those States have not ratified it.

Mr. MORROW. Will the gentleman yield?

Mr. COLTON. I yield.

Mr. MORROW. Was not the compact signed by the commissioner from Arizona, and was not the compact ratified by the legislatures of six States, and the only failure was the State of Arizona, and was not the gentleman who spoke here to-day [Mr. DOUGLAS] the cause of that failure?

Mr. COLTON. California ratified it, and then receded and put a condition on it.

Mr. MORROW. I am talking about ratifying it in the first instance. They receded because Arizona refused to sign.

Mr. LEATHERWOOD. Mr. Chairman, will the gentleman yield?

Mr. COLTON. Yes.

Mr. LEATHERWOOD. Is it not a fact that after California had gotten the upper-basin States to ratify the so-called six-State compact she then put a condition upon her ratification?

Mr. COLTON. I think the gentleman's statement is right.

Mr. EVANS of California. And will the gentleman state the condition attached by California? The condition which California attached to the seven-State compact was merely that she would be bound by it when the high dam was built, and that is to guarantee a large storage.

Mr. COLTON. Oh, yes; when she got everything she wanted, she would ratify it.

Mr. EVANS of California. That was the only thing, and at that time there was a question raised about building a low dam there which would give nobody any water.

Mr. COLTON. The official position of Utah is that we are opposed to any and all development on the lower river in advance of the completion of the compact. Utah has opposed development not only on the lower river, but on the upper river as well, for a large dam and reservoir in the upper basin would to some extent equate the flow of the lower river and make it possible to use additional water for irrigation in Imperial Valley and Mexico, which would cause new claims of priority to be set up against us. We have, therefore, been against the construction of a power dam at Flaming Gorge on the Green River in Utah. I am sure this is good evidence that we are in earnest in the position we have announced.

I repeat again, the power discussion, so far as the basic principles involved in this bill are concerned, has nothing to do with it, and Utah is not opposing this because of any power development.

We are more closely related economically to California than we are to Arizona. Our economic interdependence is admitted and recognized by everybody. We can not reach the eastern markets; we are shut off by the Rocky Mountains; the freight rates are too high. The only outlet we have is California, and we are interested in California's development; we are interested in her growth. Every increase in the population of California provides potential customers for the products of Utah, and we are anxious to have that development go forward, but we are not anxious to have it go forward at the sacrifice of that which is so vital to our State.

When the pioneers first went into Utah they were the first of the Anglo-Saxon race to adopt and to put into practice the art of irrigation. They have grown up from the very cradle with irrigation and all its problems. Water and water rights are woven into the warp and woof of our economic life. There is nothing dearer to the people of the West than that. Whenever you threaten to trespass upon their water rights you touch the most tender spot in their economic life. Does this bill do that? I think I can show you it does. But first may I call your attention to a historic fact for a moment? The genesis of this Government shows that it is a government of delegated powers. The 13 independent States of the original Union were independent, sovereign States. When they got together to form the Union and to adopt the Constitution, they were very jealous of surrendering their rights, and it is a well-settled point in law that among the things that they sacredly and jealously kept to themselves was the right to control the waters of their streams—the streams in those States. They surrendered only one important function to the Congress, and that was the control of commerce, of navigation. That is the only exception to the general rule. They reserved all of the other rights with reference to the waters of their streams. I think that is so well settled by our courts that I need only take the time to read to this committee from the syllabus of one or two of the leading authorities. The doctrine was first announced in a decision by Chief Justice John Marshall himself, and, so far as I know, has been adhered to ever since. In one of the early cases of Martin against Waddell, found in Forty-first United States, 410, it is stated:

> For when the Revolution took place the people of each State became themselves sovereign, and in that character hold the absolute right to all their navigable waters, and the soils under them, for their own common use, subject only to the rights since surrendered by the Constitution to the General Government.

In Kansas *v.* Colorado (206 U. S. 46) it was said:

> The Government of the United States is one of enumerated powers; that it has no inherent powers of sovereignty; that the enumeration of the powers granted is to be found in the Constitution of the United States, and in that alone; that the manifest purpose of the tenth amendment to the Constitution is to put beyond dispute the proposition that all powers not granted are reserved to the people, and that if in the changes of the years further powers ought to be possessed by Congress they must be obtained by a new grant from the people. While Congress has general legislative jurisdiction over the Territories and may control the flow of waters in their streams, it has no power to control a like flow within the limits of a State, except to preserve or improve the navigability of the stream; that the full control over those waters is, subject to the exception named, vested in the State.

In the case of Scott *v.* Lattig (227 U. S. 229, 242), Justice Van Devanter, in rendering the opinion of the court, said:

> It was settled long ago by this court, upon a consideration of the relative rights and powers of the Federal and State Governments under the Constitution, that lands underlying navigable waters within the several States belong to the respective States in virtue of their sovereignty and may be used and disposed of as they may direct, subject always to the rights of the public in such waters and to the paramount power of Congress to control their navigation so far as may be necessary for the regulation of commerce among the States and with foreign nations, and that each new State, upon its admission to the Union, becomes endowed with the same rights and powers in this regard as the older ones. (County of St. Clair *v.* Lovingston, 23 Wall. 46, 68; Barney *v.* Keokuk, 94 U. S. 324, 338; Illinois Central Railroad Co. *v.*

Illinois, 146 U. S. 387, 434–437; Shively *v.* Bowlby, 152 U. S. 1, 48, 50, 58; McGilvra *v.* Ross, 215 U. S. 70.)

In Hardin *v.* Jordan (140 U. S. 381) it is said:

"Such title being in the State, the lands are subjected to State regulation and control, under the conditions, however, of not interfering with the regulation which may be made by Congress with regard to public navigation and commerce. The State may even dispose of the usufruct of such lands, as is frequently done by leasing oyster beds in them and granting fisheries in particular localities; also by the reclamation of submerged flats and the erection of wharves and piers and other adventitious aids of commerce. * * *

"This right of the States to regulate and control the shores of the tidewaters and the land under them is the same as that which is exercised by the Crown of England. In this country the same rule has been extended to our great navigable lakes, which are treated as inland seas; and also, in some of the States, to navigable rivers, as the Mississippi, the Missouri, the Ohio, and in Pennsylvania, to all the permanent rivers of the State; but it depends on the law of each State to what waters and to what extent this prerogative of the State over the lands under water shall be exercised. In the case of Barney *v.* Keokuk (94 U. S., 324) we held that it is for the several States themselves to determine this question, and that if they choose to resign to the riparian proprietor rights which properly belong to them, in their sovereign capacity, it is not for others to raise objections."

I want you to mark that, because it was said yesterday on the floor of this House that the Federal Government owned and controlled the water that flowed over its own public lands. That is absolutely contrary to my understanding of the law. When my State was admitted into the Union they put into its basic law, and this Congress approved that constitution, that the waters within the borders of that State, the beneficial use of them, would be forever reserved to the people of the State.

Our whole industrial life had been built up upon the theory that the State owns the waters, and a man in my State to-day can not acquire the ownership of any water for any purpose. He can acquire the right to use any water, and as long as he puts that water to a beneficial use he can assert control over it; but when he ceases to put it to beneficial use it reverts to the State and is again subject to appropriation by any other citizen within the State. So that when you say that the Government of the United States owns and controls waters within that State, can not you see that you strike at the very basis of our industrial life? You are saying that you are going to take it away from the States and place it in the Federal Government, and section 5 of this bill asserts that very principle. It provides that the Secretary of the Interior shall have control of all of the water stored in the reservoir and its delivery to any part of the river below. We deny that in principle and say it is against the very contract that this country has entered into with our Western States and contrary to the decisions of the United States Supreme Court.

Mr. BANKHEAD. As I understand, the whole theory of this bill is predicated on the recognition of the right that the gentleman is now asserting, for the reason that nothing can be done by Congress under this bill until the States acting through this compact shall determine what their respective rights are in reference to this matter.

Mr. COLTON. I will answer in this way: If the gentleman from Alabama were stating the proposition correctly, there would not be the slightest objection to this bill other than from the engineering and economic standpoint. I feel sure that it is not fully understood. We do not get full protection under this bill, for there is no seven-State compact. Arizona is not a party at all to this compact.

She and her citizens may appropriate water at any time.

Mr. DOUGLAS of Arizona. Arizona is a party to it, but Arizona has not ratified it.

Mr. COLTON. Yes. The gentleman's statement is more accurate. Arizona can grant applications for water if my theory is correct, and her citizens can acquire rights by prior usage to every bit of water belonging to the upper States. There is absolutely no protection against her and her citizens. The gentleman from Alabama [Mr. BANKHEAD] has stated the principle for which Utah is contending. We have been pioneers in the development of the Colorado River. We are anxious to see California prosper. This development, however, must not be made at the injury and expense of other States.

Mr. OLIVER of Alabama. Mr. Chairman, will the gentleman yield?

Mr. COLTON. Yes.

Mr. OLIVER of Alabama. Judging from the gentleman's statement, if the principle enunciated by my colleague from Alabama [Mr. BANKHEAD] is correct, there would be left only the question of engineering. I assume the gentleman does not agree with my colleague from Alabama that it is economic.

Mr. COLTON. Economic in what respect?

Mr. OLIVER of Alabama. The gentleman from Arizona [Mr. DOUGLAS] lays great emphasis on the fact that it is uneconomic. Is it uneconomic to save the Imperial Valley, which he said has a value of $36,000,000? Does he agree with him on that?

Mr. COLTON. I have no facts in regard to the economics, but my contention is that the premise of Mr. BANKHEAD is wrong.

Mr. OLIVER of Alabama. If that statement carries weight, should it not be remembered that the capital invested in the Imperial Valley produces every year $50,000,000 worth of products that go out every year to feed the public? And is it uneconomic to spend $125,000,000 on a project that will insure the bringing to that community every year of $50,000,000?

Mr. COLTON. Even that does not do away with the fundamental principle to which I have referred. You gentlemen who have contended for State rights heretofore, and I have followed you all my life in your contention—I have followed you and sympathized with you. What becomes of that doctrine if this bill is passed? What of our contract? You give us the right to the water. We have gone ahead and exercised that right all these years. Our industrial life is built on it. Now you say, without Arizona's consent, you may go in there and appropriate the water and put it to a beneficial use.

I want you to get this point: This compact, if it is adhered to, gives the upper basin States 7,500,000 feet of water, and it gives the lower basin 8,500,000 feet of water. Doctor Mead, testifying before the Committee on Irrigation the other day, said it would take 10,010,000 feet to turn the power plant turbines to their capacity. What becomes of the excess of 2,500,000 acre-feet? He said it must go down to Mexico. That will take away from us 2,500,000 acre-feet of water and reduce us from 7,500,000 feet to 5,000,000 acre-feet.

Mr. WINTER. Mr. Chairman, will the gentleman yield?

Mr. COLTON. Yes.

Mr. WINTER. Will they do that under this pact?

Mr. COLTON. I am not sure; but Arizona is not a party to the compact. And then this question is in my mind: Can Congress at this late date set aside the doctrine of first in use, first in right? Therefore, I say it is a serious question for us to allow this plant to use 10,500,000 acre-feet of water in the dam. Prior usage may give a right to it, and we may be estopped in the courts, at least, in asserting our right to it after it has been put to a beneficial use.

Mr. ARENTZ. Mr. Chairman, will the gentleman yield?

Mr. COLTON. Yes.

Mr. ARENTZ. Following that line of "first in use, first in right," you know the land in Utah will not be subject to cultivation possibly for 50 years or 75 years. You want to stop the appropriation of water that should go to the land in Utah, and is there any other way of doing that except by a definite allocation of water to Utah, so that you can hold it in perpetuity? I do not see what can be done.

Mr. COLTON. Congress can not allocate water. I want to say to the gentleman that I have here figures showing that in two counties of my State they have now 277,839 acres under cultivation, and there is enough land susceptible of practical irrigation and reclamation to make a total of 689,762 acres in those two counties, so that there are 300,000 acres in two counties alone of my State that are now susceptible of reclamation and irrigation, and the projects for reclamation are perfectly feasible. We say we are not opposing this dam, provided it will not be under terms that are injurious to Utah. But we must have future development protected. There are seven or eight other counties in my State which have lands capable of reclamation.

Mr. LEATHERWOOD. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. LEATHERWOOD. I just want to call the gentleman's attention to the fact that the gentlemen who are raising the question about our refusal to go ahead without a full seven-State compact in every case have insisted that in their State they be absolutely protected without any question.

Mr. COLTON. I think the gentleman is right in that.

Mr. WHITE of Colorado. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. WHITE of Colorado. A while ago the gentleman stated that he doubted whether or not Congress had the power at this late date to nullify, abrogate, or change the doctrine of priority in the use of the water.

Mr. COLTON. I think they have not that power.

Mr. WHITE of Colorado. There is no attempt to do anything of that kind by this bill. On the contrary, the bill expressly provides for a compact among six States, and the only State that has shown the slightest tendency to stay out of the compact is Arizona. Now, how can that affect a State that is not a member of the compact?

Mr. COLTON. It can not. Moreover, I admit we are somewhat protected so far as California is concerned, although even that is a question in my mind. As the gentleman from Arizona has stated, you have an interstate compact made by seven States, and I do not believe six States may make it binding on the other. I would like to hear the opinion of the gentleman from Virginia [Mr. MONTAGUE] on that. He is a good lawyer. That raises a serious question at least. Let me point out to the gentleman just what this bill provides. In section 5 it is provided:

That the Secretary of the Interior is hereby authorized, under such general regulations as he may prescribe—

To do what?

to contract for the storage of water in said reservoir and for the delivery thereof at such points on the river and on said canal as may be agreed upon, for irrigation and domestic uses.

The CHAIRMAN. The gentleman has used 30 minutes.

Mr. COLTON. I thank the Chair. If that does not give him absolute control of this water, or if it does not seek to give the Secretary of the Interior absolute control of this water, I can not understand the English language; and, gentlemen, that is exactly what we are objecting to. We are saying the Federal Government is trespassing upon territory that does not belong to it whenever it attempts to regulate or control the waters of a river when it is not for the express purpose of navigation and commerce. That is the only power the Congress of the United States has over the water in the streams of this country, and the basic principle upon which Utah has rested its opposition to this bill is that the States control the water for all other purposes.

All of this talk about power and the influence of the Power Trust is absolutely not true, so far as my State is concerned. However, I am not saying the power associations are not opposed to the bill. You had your offices flooded the other day with communications from the manufacturers of fertilizer, and every business that finds its own territory being invaded by the Federal Government protests. But that does not change the principle.

Mr. LEA. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. LEA. Does the gentleman construe this bill as giving Arizona any legal right to acquire water as against Utah that she does not possess to-day?

Mr. COLTON. No; but we are protected now by the law which forbids the Federal Power Commission from granting any applications for licenses.

Mr. LEA. But that is temporary.

Mr. COLTON. Absolutely. There is only one thing for us to do, either to extend that or make those States get together on a division, and I say they will get together if you will give them a reasonable time.

Mr. LEA. Does the gentleman think it is a fair proposition, where two States are in a controversy over adverse rights, to compel one State to wait for relief until the other gets its demands?

Mr. COLTON. I would not be in favor of that if that question were presented, but I say to you that in one little, short summer, commencing in August, you can not work out a great big proposition like this, and I say it is unreasonable to think the matter can be settled in such a short time. However, I understand that they were within 5 per cent of a division of the water last summer at Denver, and the only thing that has prevented further negotiations and the one thing in my judgment which has prevented those States from getting together now is the threat that this legislation is going to be passed, whether they want it or not.

Mr. DAVIS. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. DAVIS. What is the difference in principle between your contention and the contention of the Tennessee delegation against the inclusion of Cove Creek in the Muscle Shoals bill without recognizing the rights of Tennessee?

Mr. COLTON. I listened to the gentleman's argument the other day and the argument made by the gentleman from Tennessee [Mr. BYRNS], and I said, "That is the very contention of Utah on the Boulder Dam bill."

Mr. DAVIS. Did the gentleman from Utah vote for the amendment offered by the Tennessee delegation?

Mr. COLTON. If I was on the floor of the House I did vote for it, but I am not sure whether I was here when it was being considered. However, I will say if I had been here I would have voted for it and I will vote for it, but I do not recall whether I did vote for it or not. However, I am sure I did not vote against it.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. LAGUARDIA. Absolving the gentleman from Tennessee and the gentleman from Utah of any connection or influence with the Power Trust, is not the same objection to be made to the one proposition as to the other, and that is the Power Trust?

Mr. COLTON. Oh, no. I must be a poor teacher, because I have tried my very best to explain this. The gentleman can not appreciate, living in New York, how vital this question of water rights is.

Mr. LAGUARDIA. Yes; we can. We are up against the same thing.

Mr. COLTON. With us water is life. We have built our whole economic life upon the principle that when you go out and use water you acquire a right to it. We say that you are going to put this water to a beneficial use in a way that we can not protect ourselves and thereby acquire a right to it when we get ready for development. When we can convince people that in our States there is the finest soil, the finest climate, the finest crops in all the world, they will come there to live, and we want water for them. You talk about the productivity of the Imperial Valley, they have got all their soil from Utah, Colorado, and Wyoming. Whatever they have down there is what we have sent them. [Laughter.] It is not sufficient for us to give them their land, but now they want us to give them our water.

Mr. SCHAFER. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. SCHAFER. But the Power Trust that is opposing this Boulder Dam project with Utah does not think very much of the water rights because they filed application and they are willing to take all the water rights if they can get them.

Mr. COLTON. Yes; and we will fight them just as strong as we can.

Mr. LAGUARDIA. Then the gentleman had better join the ranks and fight the common enemy.

Mr. COLTON. We will, if you will protect our rights and not take them away from us without our consent.

Now, Mr. Chairman, I have asked leave to extend my remarks. I have not the time to go into all the phases of this matter. I ask you to strip this of all its camouflage, to take away the smoke screen. I want you to see a picture of Utah up there on the headwaters of this stream—and this is true of all the other States—struggling along trying to build up a community, trying to perpetuate a civilization which we think is one of the finest in the world, with the finest school system, with fine public buildings. We are trying and pleading and working every day to get more taxable property on our rolls. In my State only 25 per cent of the land is taxed. Seventy-five per cent of it is public land.

Now, by the passage of this bill you will create a situation where by equating the flow of this stream you will permit the acquiring of water rights in Mexico, in California, and in Arizona that will forever say to us that we must continue to be a State of small proportions so far as taxable property is concerned.

We are asking you to get down to basic principles. We are asking you not to be carried away by any sentimental plea that is not justified by the facts.

We are with you on flood control. We are ready to vote to-morrow for a bill that will adequately protect the people down there.

I wish I had read more of the decisions, because I see before me two distinguished lawyers; but I shall extend my remarks by putting in the RECORD a long line of decisions holding that the water is reserved to the States subject only to the power of Congress to regulate commerce and navigation, and that this extends to the beds of the streams on navigable rivers. We are saying now that this is the well-settled rule of law; do not violate the rule by passing a bill that squints at the doctrine that the Federal Government can come in and regulate and control—as was contended on this floor yesterday—own and control the waters of those States, simply because they flow over the lands of the Government.

We are asking you not to reduce us to a dependent colony. If we were admitted into the Union, as we believe we were, on an equal footing with all the other States, then we have the right to control these waters, and from the beginning we have recognized the doctrine of first in use, first in right, and because of our statutes and because of our laws that do recognize this doctrine, we can not go into the courts and assert a different doctrine. We are bound by our own decisions, and therefore if they do acquire a right to the use of this water, we are injured forever so far as the future development of our State is concerned.

Mr. VINSON of Kentucky. Will the gentleman yield?

Mr. COLTON. I will.

Mr. VINSON of Kentucky. If this bill becomes a law, what will be the loss to Utah in water and water rights?

Mr. COLTON. All that they put to a beneficial use before we get ready for development.

Mr. VINSON of Kentucky. What would be the amount in acre-feet?

Mr. COLTON. It is pretty hard to tell. There has been allotted to the upper-basin States 7,500,000 acre-feet. No division yet has been made as between the upper-basin States. I think when it does come to dividing that, of course the rights that are already acquired will all be recognized, and then it will probably be worked out on the basis of lands that are susceptible of reclamation by the people of the States.

Mr. VINSON of Kentucky. Who made the allocation of 7,500,000 acre-feet?

Mr. COLTON. It was made by representatives from each of the seven States, who met in 1922 at Santa Fe, N. Mex.

Mr. VINSON of Kentucky. That is in the compact that has not been completely ratified?

Mr. COLTON. It is. There are only two ways by which this water may be allocated—by a compact between the States and by decision of the Supreme Court.

Mr. EVANS of California. As I understand, the compact has not yet been ratified?

Mr. COLTON. No; but we believe it will be if you will give us time to work it out, and it will save long years of expensive litigation.

Mr. LEA. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. LEA. Does the gentleman know of any beneficial use to which Arizona can put the water within the next 20 years which would deprive Utah of water?

Mr. COLTON. The State of Utah only wants an ample guaranty that when she gets ready for development her rights to the water will not be gone. That is why we are insisting that this does not give us that guaranty.

Mr. SMITH. Will not the gentleman answer more extensively the inquiry of the gentleman from California?

Mr. COLTON. I will yield to the gentleman from Arizona [Mr. DOUGLAS] to do that.

Mr. DOUGLAS of Arizona. Even though the gentleman from California may have no knowledge of the water that may be employed in Arizona to such an extent as to interfere with the water rights of Utah, the gentleman must know that there are over 800,000 acres of land in Mexico to which water can be applied beneficially which will interfere with the water rights of the States.

Mr. COLTON. We adopted the basic law of prior appropriations from Mexico. That was unknown in the common law. Whatever basic foundation we had for the doctrine of prior usage, giving prior rights, we received from Mexico. Now, if we permit them to apply the beneficial use of water to 800,000 acres, how can we deny the same right that we have contended for ourselves—first in usage, first in right?

Mr. TAYLOR of Colorado. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. TAYLOR of Colorado. Is not Mexico rapidly bringing her lands under cultivation while we are fighting uselessly among ourselves?

Mr. COLTON. If we are fighting among ourselves, I contend that it is only since last August when we first got together officially to solve this great problem, and I contend that it is not useless fighting.

Mr. LEATHERWOOD. Mexico is using her land, and if this goes through Mexico will treble her acreage.

Mr. COLTON. That is my understanding of the situation.

Mr. CRAIL. Will the gentleman yield?

Mr. COLTON. Yes.

Mr. CRAIL. Did not the gentleman from Nevada say at the conference last summer that when they got along to an agreement, Arizona backed out and had something else, and he believed they never would agree?

Mr. COLTON. I heard that, but I do not know that it appears anywhere in the report of the statement issued by the governors of the States. On the contrary, a very optimistic spirit prevails in their statements. They think if they can get together they can solve this problem and give the Imperial Valley flood control much quicker than you can if you jam this bill through over the protest and against the will of the people of these States. We are only asking for a square deal. [Applause.]

Mr. SMITH. Mr. Chairman, I yield 10 minutes to the gentleman from Michigan [Mr. MAPES].

Mr. MAPES. Mr. Chairman, I am in favor of this legislation. [Applause.]

Last year after the adjournment of the short session of Congress on the 4th of March, before the activities, or at least before the superactivities of the power people, or of the Hearst publications, as alleged here in the debate, and uninfluenced by them, in the quiet of my office I studied the hearings on this Boulder Dam project, read the majority and minority reports of the committees of the House and of the Senate, and the speeches in the CONGRESSIONAL RECORD on the subject, and reached the conclusion that when the matter came before this Congress I would support it.

Without attempting now to describe the local conditions which lead me to the conclusion that I reached—others more familiar with them have already done that—I will only say that for one I am satisfied as to the need of the legislation in so far as it relates to flood control, irrigation, and domestic water supply, and the magnitude of the project, the interstate and international interests affected by it, as well as its general public nature seem to require that the improvement be made by the Federal Government if it is to be made at all.

I am not so keen about the water-power feature of it, although I am not afraid of that. It seems to be the only way to finance the proposition so as to reimburse the Government for its expenditures in constructing the dam and irrigation works, and linked together with the other features of the bill as it is, I shall support it. To me there is no question of national water-power policy involved—that was announced by the passage of the water power act of 1920. Boulder Dam is an individual, specific problem, and must be considered as such and solved without regard to any question of permanent or national policy. [Applause.]

No one need get alarmed over the Government's getting into business as far as this project is concerned. At most it would require a very limited number of people to take care of the Government's end of the business in the sale and distribution of the water power as provided in the bill after the dam is completed. The Secretary of the Interior is given three alternatives for disposing of the water power or the water for power purposes. He may, in his discretion, provide for the delivery at the switchboard of the electrical energy generated at the dam, or he may lease the dam, in separate units or as a whole, with the right to generate electrical energy, or alternatively he may lease the use of the water for the generation of electrical energy. In no event is he allowed to enter into the retail distribution of power nor the wholesale distribution of it except at the switchboard. Certainly the Government will not be carrying on any great amount of business under the terms of the bill.

Those who oppose the legislation because they do not believe that the Government should go into business might well complain for the lack of foresight and business judgment on the part of those who are responsible for the legislation if the water-power feature of it was eliminated and no provision was made for reimbursing the Government for its expenditures in constructing the works.

The bill provides that the Government shall advance the money for the construction of the properties, but that it shall be repaid the entire cost, including interest, by the users of the water—no work is to be done, the project is not to be started, until such repayment is assured. The Secretary of the Interior is required to secure contracts for the delivery of water from the reservoir for irrigation and domestic use and for the sale of the power at the power plant, or contracts for lease of the use of the water for the generation of electrical energy, in amounts sufficient to repay the entire cost of the project, with interest at 4 per cent per annum, before any step is taken toward the construction of the properties. He is enjoined from proceeding with the work until such contracts have been secured. Under the terms of the bill the Government will be completely reimbursed within a period of 50 years and it is estimated by some that it will be so reimbursed within 25 years.

Mr. MONTAGUE. Will the gentleman yield?

Mr. MAPES. I will; but I have only 10 minutes.

Mr. MONTAGUE. Does the gentleman think that validation or exercise of an unlawful power will make that power lawful?

Mr. MAPES. No; I do not.

Mr. MONTAGUE. What, in the gentleman's opinion, has the Federal Government the right to do?

Mr. MAPES. The gentleman knows that I can not go into that subject in 10 minutes. I will leave that to the constitutional lawyers.

Mr. MONTAGUE. That is not a constitutional question, but a governmental question.

Mr. MAPES. My understanding is that the financial plan and provisions of the bill were prepared and recommended by the Secretary of the Treasury, Mr. Mellon.

It is stated in an extensive report of the Secretary of the Interior in 1922 and generally admitted to be the fact, that—

without the power the reservoir is not feasible at all, as the expense would be too great to be borne by the other interests alone.

The project in one form or another has been recommended by every President since and including Roosevelt, and this particular bill is recommended by the Secretary of the Interior and his department and, as I understand it, by President Coolidge.

In a speech prepared to be delivered at San Diego, Calif., the delivery of which was prevented by death, President Harding said:

I should indeed be proud if during my administration I could participate in the inauguration of this great project by affixing my signature to the proper legislation by Congress through which it might be launched.

In a letter addressed to the chairman of the committee reporting this bill, dated January 4 of this year, the Secretary of the Interior, Doctor Work, says:

The general plan and purpose of this measure have my support, and I favor its being made a national undertaking, to be carried out and administered by the Federal Government.

He continues:

The settlement of interstate and international problems growing out of the use of this river will be promoted by the construction of these works.

He further states that—

The plan incorporated in the bill for power development is approved.

In a statement appearing in the United States Daily, under date of May 5, 1928, purporting to give the views of the President, it is stated:

The President's views are as follows:

"In his various messages to Congress the President has recommended the construction of the Boulder Dam project. He is greatly in hopes that some solution of the problem may be had at this session."

The article continues:

"The President understands that the Boulder Dam project is one that has been before the Senate and House for a number of years. It also has had mature consideration by the Department of the Interior, which has worked out a reasonable solution which the President feels should be adopted."

The solution which the Department of the Interior has worked out and which "the President feels should be adopted" is embodied in the pending bill. [Applause.]

Mr. SMITH. Mr. Chairman, I yield 15 minutes to the gentleman from Wyoming [Mr. WINTER].

Mr. WINTER. Mr. Chairman, ladies, and gentlemen of the committee, I had not expected until this morning to take any part in this debate. Certain matters and arguments, however, have been made and have arisen which seem to make it necessary for me, representing one of the States of the Colorado River Basin, to at least make clear the position of my State. I have as much regard for my State and its rights as has any gentleman on this floor for his State and its rights. I have the same interests to protect as the gentleman from Utah [Mr. COLTON] has spoken of with reference to his State. I call attention to the fact now that Colorado, New Mexico, and Wyoming, being of the upper division of States, with Utah as the fourth State, do not take the position that the gentleman from Utah has taken with reference to his State with respect to this legislation. Utah stands alone in having receded from a ratification by its legislature of the six-State compact. I take it for granted that all will concede that the Representatives of those other three States are just as jealous of the rights and the future of their States as is the gentleman from Utah. It is a question of difference of opinion. I might add here that there was a time when the Representatives of Utah were favorable to this legislation on the six-State basis, and Utah has yet to explain why after entering into a ratification of the six-State basis she saw fit to withdraw from the agreement with the other five States. The mistake made by the gentleman from Utah is in ignoring the fact and the effect of the inclusion in this bill and its incorporation as a part of the bill, of the Colorado River compact. The States therein control the rights which he so earnestly urged. Those rights are secured by the compact. Without the compact Utah and every other upper division State is in constant daily danger of the permanent loss of their waters by prior appropriations by the lower division States. The State rights he speaks of are empty shadows if the water has been appropriated elsewhere.

It would require the entire eight hours allowed for general debate upon this bill to present a complete and logically arranged exposition of the arguments for and against the measure. Therefore all that one Member can do in the short space of 30 minutes or even 1 hour is to touch upon a few of what he considers to be the most important features or questions which have not been elucidated by preceding members. I am, therefore, to-day attempting to present only a partial discussion of a few questions involved in the bill.

Those questions happen to be some questions which have had the especial attention of the gentleman from Pennsylvania [Mr. BECK], one of the ablest Members of this body when it comes to constitutional matters, and also the attention of the gentleman from Virginia [Mr. MONTAGUE]. Naturally I might well hesitate in speaking before these distinguished gentlemen.

Other Members have shown the physical conditions, length, and volume of the river; the number of States involved; the area of drainage; the need of flood protection; the conditions of the river as to navigability and improvement thereof; the needs of the Imperial Valley for protection from flood and the future reclamation of great additional areas of fertile lands; the needs of the cities of southern California for a supply of stored water from the Colorado, first for domestic use, and second, power in transporting the water for domestic use and electrical energy for commercial uses. The engineering features have been presented. The economic soundness has been discussed. I shall not, therefore, attempt to discuss any of these questions.

This bill involves international relations, interstate relations, and relations between the United States and the States of the Colorado River Basin.

The right of the United States to build a structure on the Colorado River rests primarily on the interstate-commerce clause of the Constitution, which authorizes the Federal Government by giving it the power of regulating interstate and foreign commerce, to do whatever is necessary to maintain or improve navigation. This may be accomplished by regulating the flow. Regulation of flow is secured by storing the flood waters by means of a dam and discharging them in a low-water season.

There is no express provision in the Constitution authorizing the Government to engage in flood control per se, but it is assumed that such a right and duty is included in the power to regulate the flow to benefit navigation to assist interstate commerce.

In the case of the Colorado River if the Boulder Dam be built it will eventually and permanently regulate the flow and improve navigability from the dam 200 miles south to the Gulf of California and thus to the Pacific. North of the dam it will create a deep navigable body of water approximately 75 miles in length. At present the River, while practically unnavigable, is navigable in fact and in law. This may be denied, but as only a court can ultimately answer the question as far as I am concerned I agree to the proposition that the Colorado River at the Boulder Dam is a navigable stream.

The question is not as it was presented here by the able gentleman from Arizona [Mr. DOUGLAS], whether navigation is actually taking place on the stream. The question is simply and clearly whether it is a navigable stream in fact and in law.

The bill, then, is founded upon the theory, which can not be denied or overthrown, that the Government may proceed, build the Boulder Dam, because: First, an international stream and treaty relations are involved; second, improvement of navigation; third, flood control for protection of life and property.

I care not how much these matters may me minimized. They have been admitted to be in this proposition. Therefore the power and the right and authority of the United States Government to proceed for these purposes can not be questioned. Men might differ and argue as to the amount of money the United States Government ought to invest for these purposes, but they can not question the authority of the Government to do these things in the performance of these functions.

Thus the dam may be built for the above purposes without the consent of the States of Arizona and Nevada, on whose soil the dam is to be built, or any other State on the river. As amended by the committee, the title of the bill expressly includes the improvement of navigability.

Much was made of the fact that this has not been in the title of the bill during all of the years this bill has been before our committee. That is immaterial. The question is simply whether or not this stream is a navigable stream at the place where it is proposed to erect the structure. If it is, the Government can proceed, and there is constitutional basis for its action. As printed, it includes protection of the lower Colorado River Basin by flood control.

Next, as to the building of a dam to impound waters for irrigation, the Supreme Court has decided that question and held

that it is a constitutional right of the Government to improve its own lands for settlement.

This brings us, however, in contact with the rights of the States. Under the reclamation law the Secretary of the Interior complies with the laws of the States regarding the appropriation of water in those States. He obtains a permit from the State to build a dam and create a reservoir within its borders. This is true of the arid States, because the doctrine of riparian rights is abolished and superseded by the doctrine of prior appropriation.

This was provided for in the enabling acts of Congress and the constitutions of those States and has been recognized by the Congress since 1866 when it conceded and consented to and provided for the regulation of the use of water for mining and irrigation purposes by the local laws and district or State government. Repeatedly, the Congress has recognized this principle with respect to those States and the use and control of the waters within a State by that State has been recognized, together with the principle of prior appropriation by the United States Supreme Court.

If, then, the Boulder Dam were to be merely a reclamation dam, compliance with the reclamation law and the decisions of the courts would be required. That is, compliance with the laws of those States with reference to the acquiring of a water right by the issuance of a permit would be a condition precedent.

Likewise, if the proposed dam was one solely for power and was to be built under the provisions of the Federal water power act, under the provisions of that act, the parties applying for a license from the Federal Power Commission are required to first secure the permit from the State. Thus we have the rights of the States with reference to the use of the waters of the States firmly established in the reclamation law, in the Federal water power act, and in the decisions of the Supreme Court.

But, as we have stated, this proposed Boulder Dam is a project on which the Government can proceed under its constitutional functions of navigation and flood control without the consent of the States of Arizona and Nevada or any of the States of the Colorado River Basin.

I am well aware of the fact that there is a contrary theory which absolutely ignores and denies the rights of States to the use and control of waters of the State, except the ownership of the State to the bed of a navigable stream. I am absolutely in accord with the gentleman from Utah [Mr. COLTON] with reference to the rights of States respecting the use and control of the waters of the States, and that applies both to navigable and nonnavigable streams and is so expressed in our organic laws.

Again, under the Constitution, the States of Arizona and Nevada own the bed of this navigable stream at the point where the dam is to be built, but that ownership and right we have seen is subordinated in this case to the right of the Federal Government to build the dam and operate it and use it for the purposes granted by the Constitution.

However, in my judgment, the Government's superior right ceases with the doing of those things which are necessary in and to the exercise of its constitutional functions.

Further, it can constitutionally make use of any benefits created which are incident to or flow out of the exercise of its main power or function to improve navigation.

One of these incidents is power. When power is created as an incident of the building of a dam and the storing of waters for the constitutional purpose of navigation or flood control that power may be used and controlled by the United States.

The real problem arises, however, when we come to the question of the creation of power in an amount beyond that which can be used for the construction, operation, and maintenance of the dam or construction, operation, and maintenance of an area irrigated therefrom. The question then is, Can the Government after it has fulfilled every constitutional function operate further with the power and sell the use of the water or sell or lease such excess hydroelectric energy for a profit?

The element of power is almost necessarily present in every dam that has been constructed in our western country. The fact is that nine out of the reclamation dams erected by the Reclamation Service to-day have power plants built by the Government in connection with the projects and are serving, first, for the construction of the projects, and second, for their operation, and, third, for the use of the settlers upon the projects, who, by their hard-earned dollars, in time pay for the project and who will ultimately own it.

Mr. SINNOTT. Mr. Chairman, will the gentleman yield?

Mr. WINTER. Yes.

Mr. SINNOTT. I know the gentleman has given a great deal of study to the question of western water rights and the respective rights of the Federal Government and the States. I know the gentleman is familiar with the Chandler-Dunbar decision. Will the gentleman apply that decision to the present situation wherein the Supreme Court held that where the Government built a navigation dam, any incidental power that might be developed at that dam could be leased?

Mr. WINTER. Yes; I am measurably familiar with that decision and the gentleman has stated it correctly, but I must point out and again emphasize that word "incident" or "incidental." I believe there is a limit to the extent that the Government can proceed with governmental operations as an incident to the exercise of its main power or function.

The CHAIRMAN (Mr. ACKERMAN). The time of the gentleman from Wyoming has expired.

Mr. SMITH. Mr. Chairman, I yield three more minutes to the gentleman.

The CHAIRMAN. The gentleman is recognized for three minutes more.

Mr. WINTER. I thank the gentleman for the three minutes.

Again, if it can do so for a profit for the purpose of repaying the Government its expenditure, can it go further and engage in and remain in the business of selling power purely for profit? Further, if it does so purely for profit after the cost of the structure with interest has been repaid, can it ignore and refuse to recognize the claims of the States where the structure is located in view of the fact that the use of the water and the ownership of the bed of the stream on which the dam and the reservoir rest are unquestionably in the States?

I now quote a resolution adopted at a conference of the governors of the States of the upper division on the Colorado River, to wit, Wyoming, Utah, Colorado, and New Mexico, August 29, 1927, having been a member of the subcommittee which drafted the resolution:

Whereas it is the settled law of this country that the ownership of and dominion and sovereignty over lands covered by navigable waters within the limits of the several States of the Union belong to the respective States within which they are found, with the consequent right to use or dispose of any portion thereof, when that can be done without substantial impairment of the interests of the public in the waters, and subject always to the paramount right of Congress to control their navigation so far as may be necessary for the regulation of commerce with foreign nations and among the States; and

Whereas it is the settled law of this country that, subject to the settlement of controversies between them by interstate compact or decision of the Supreme Court of the United States, and subject always to the paramount right of Congress to control the navigation of navigable streams so far as may be necessary for the regulation of commerce with foreign nations and among the States, the exclusive sovereignty over all of the waters within the limits of the several States belongs to the respective States within which they are found, and the sovereignty over waters constituting the boundary between two States is equal in each of such respective States; and

Whereas it is the sense of this conference that the exercise by the United States Government of the delegated constitutional authority to control navigation for the regulation of interstate and foreign commerce does not confer upon such Government the use of waters for any other purposes which are not plainly adapted to that end and does not divest the States of their sovereignty over such waters for any other public purpose that will not interfere with navigation: Therefore be it

Resolved, That it is the sense of this conference of governors and the duly authorized and appointed commissioners of the States of Arizona, California, Colorado, New Mexico, Nevada, Utah, and Wyoming, constituting the Colorado River Basin States, assembled at Denver, Colo., this 23d day of September, 1927, that:

The rights of the States under such settled law shall be maintained.

The States have a legal right to demand and receive compensation for the use of their lands and waters except from the United States for the use of such lands and waters to regulate interstate and foreign commerce.

The State or States upon whose land a dam and reservoir is built by the United States Government or whose waters are used in connection with a dam built by the United States Government to generate hydroelectric energy are entitled to the preferred right to acquire the hydroelectric energy so generated or to acquire the use of such dam and reservoir for the generation of hydroelectric energy upon undertaking to pay to the United States Government the charges that may be made for such hydroelectric energy or for the use of such dam and reservoir to amortize the Government investment, together with interest thereon, or in lieu thereof agree upon any other method of compensation for the use of their waters.

We, the undersigned committee, to which has been referred the foregoing resolution, as presented to the conference on August 29, 1927, by Senator KEY PITTMAN, having adopted certain amendments unanimously, which are now incorporated therein, we recommend that the resolution set out above be adopted.

KEY PITTMAN,
FRANCIS C. WILSON,
WM. R. WALLACE,
CHARLES E. WINTER,
A. H. FAVOUR,
DELPH E. CARPENTER.

It might be claimed with considerable reason and force that the right of the State, suspended for and to the extent of the exercise of the constitutional Federal function, again attaches at the point when and where the Government ceases to operate for that purpose. If the rights of the States do not again fully obtain at such point, completely and as a matter of legal right so that it could demand either all of the benefits of the structure or a reasonable compensation, at least in my judgment certain equities arise. As a matter of fact, these equities arise in point of time coincident with the operation for profit to be applied to the repayment of the Government and not removed in point of time in this case from 30 to 50 years to the time when the Government has been fully repaid with interest.

It is on the basis of such equity that the following provisions as committee amendments were adopted, which provisions are in the Senate bill and will be offered by the committee here:

On page 8, line 7, change the word "license" to "licenses" and add "except that preference to applicants for the use of water and appurtenant works and privileges necessary for the generation and distribution of hydroelectric energy, or for delivery at the switchboard of a hydroelectric plant, shall be given, first, to a State for the generation or purchase of electric energy for use in the State, and the States of Arizona, California, and Nevada shall be given equal opportunity as such applicants.

"The rights covered by such preference shall be contracted for by such State within six months after notice by the Secretary of the Interior and to be paid for on the same terms and conditions as may be provided in other similar contracts made by said Secretary."

Page 6, line 6, after the period, add the following paragraph:

"If during the period of amortization the Secretary of the Interior shall receive revenue in excess of the amount necessary to meet the periodical and/or accrued payments to the United States as provided in the contract or contracts executed under this act, then immediately after the settlement of such periodical and/or accrued payments he shall pay to the State of Arizona 18¾ per cent of such excess revenues and to the State of Nevada 18¾ per cent of such excess revenues."

If we concede that the Government in building a dam for navigation or flood control may build a dam much higher than necessary for such purposes, plus irrigation, and create power beyond those purposes with the object of selling water for power or creating and selling power to repay the cost of the structure, the question will eventually arise as to what are the rights of the States whose waters and lands are used after the Government has been repaid. This bill does not provide for that contingency. Hence, we need not be particularly concerned as to that in deciding our vote on the measure before us, but there might well be a surplus of receipts, and there will be under a wise and proper administration of the act, from the sale of power above that necessary to meet the fixed annual return to the Government. It would seem clear that the States should receive such surplus as compensation annually during the period of amortization of the Government costs, in view of all of the foregoing and the further fact that these great Government structures can not be taxed; whereas if built by private capital, under the Federal water power act, there would be a substantial income in taxes to the State or States where the structure be located.

I represent Wyoming, one of the States of the Colorado River Basin and one of the four States comprising the upper division, namely, Wyoming, Utah, Colorado, and New Mexico. A practical situation confronts those States. As matters stand now and as they stood in 1922, the upper-division States were and are subject to the law of prior appropriations. This means nothing more or less than the loss of the use of the waters of the Colorado and the ultimate failure to make productive by the beneficial use of those waters probably a million acres in each of those States. This is so because of the certain prior development and use of the waters in the lower division of States, particularly Arizona and above all of California.

When California and Arizona 10 years ago began the advocacy of a Government dam for flood control for protection of life and property in both of those States, the upper States were sympathetic and entirely willing that such a project might go forward, but recognized that water rights initiated for flood protection, reclamation, domestic use, or power in the lower reaches of the river would gradually appropriate all of the volume of the flood waters of the river and leave the upper States waterless. This meant ultimately billions of dollars of loss and failure to develop and settle those States.

Hence negotiations then began for an interstate compact which, if signed by all of the seven States, would substitute for the law of prior appropriations the principle of equitable divisions. This was done, and the Colorado River compact was written and on the 24th day of November, 1922, at Santa Fe, N. Mex., was signed, providing for a division of the waters of the river—7,500,000 acre-feet to the upper division and 7,500,000 acre-feet to the lower division.

All of the States excepting Arizona have at one time or another ratified, either conditionally or unconditionally, the seven-State compact and later the six-State compact, which was an agreement among six States to be bound by the terms of the seven-State compact and waiving that portion of that compact which required ratification by seven States. Arizona has seen fit to refuse to enter the compact. I recognize her right to so refuse. I do not recognize and deny her right to prohibit the other six States of the Colorado River Basin or other five States or any number of States to enter into a compact and support in Congress a bill which incorporates, recognizes, and will put into operation such compact. Arizona will not be bound by any compact to which she is not a party. That is the limit of her right.

My State and every State of the upper division is in daily peril of the acquirement of water rights for irrigation and power on the lower Colorado. By act of its legislature and by reason of the refusal of Arizona for six years to enter the compact, Wyoming ratified a six-State compact.

Even though Utah has withdrawn her ratification of the six-State compact, I feel it my duty to my State, and in justice to the other upper-division States, to secure our future by the passage of this bill, so long as it requires, as it does, the ratification of the compact by the State of California.

It might as well be stated clearly and openly that our chief danger of the rapid and prior appropriation of the waters of the Colorado River for irrigation and power lies in the geographic position, topography, wealth, and command of financial resources of California.

It is perfectly natural, on the other hand, for California, which has already acquired the right to nearly all of the natural flow of the stream, to refuse to enter into a compact unless and until provision is made by legislation for the storage of flood waters from which she could guarantee by her signature to and membership in the compact the use of 7,500,000 acre-feet to the upper States.

Thus we have necessitated a compact involved in flood protection and new storage by legislation incorporating and subject to the terms of the compact.

Arizona has certain rights as a State which as legal propositions I believe are inherently hers and belong to each and every Western State in the arid region and which, in my judgment, involving the beds of navigable streams, belong to every State in the Union. She may and probably will begin litigation at once if this bill becomes a law. She may thereby delay the operation of the act and the construction of the dam, not, in my judgment, for a long term of years but only for the shortest time that would be consumed with the courts expediting the case. I for one shall be glad to have those State rights ultimately determined and declared by the court of last resort. The time has come when they should be defined. Unless this bill is passed, thus finally forcing the issue, we will encounter another period of waiting and inaction when the time and condition and progress demand action.

From the practical viewpoint, the division of water and the preferential right to the use of power, the recognition of the right of the State to receive compensation for the use of its land and water in lieu of taxation, being recognized in the bill, Arizona might well now under this bill and with the provision for the compact support the measure and complete a full seven-State compact.

Her demands for years have now practically been met. To resist and refuse further, in my judgment, is following the shadow rather than the substance. It is emphasizing legal technicalities instead of securing a substantial and practical right and development of her State. I do not consider it my duty to further endanger the rights and welfare of my State to uphold Arizona in the assertion of a legal or constitutional right or principle which after all, if sustained, will bring her no practical benefit, but, on the contrary, delay for a generation the upbuilding of her area and development of her resources. For even though the Supreme Court of the United States would ultimately sustain certain propositions with reference to the rights of the State, the practical situation is such with navi-

gability involved, with flood control involved, with an international treaty involved, and under the circumstances of the ownership of the Government of the public lands on her side of the river above high-water line and the land to be submerged by the reservoir and the land over which canals will run for reclamation and the lands to be reclaimed, that, first, the technical claims of Arizona may not be sustained as not involved in the controversy or, if sustained, will leave her helpless to proceed to the appropriation of water resources for irrigation and power within her borders for the reason that while she may be the master and arbiter as to the use of the waters, the fact remains that the Government by its ownership of the public lands may make the water rights of the State futile and unavailable.

I therefore question whether substantial results be obtained by Arizona, even though she be right on certain abstract principles. I say abstract for the reason that though maintained and substantiated they can not be applied by reason of surrounding conditions. She is not independent and can not be where the rights of other States and the rights of the General Government are also involved.

The order or precedence of the different causes or purposes in the use of waters involved in this bill are legally as follows:

Flood control—in other words, the preservation of property and of life—is given first consideration in the States and by the Federal Government. It requires no argument to show that that is a point upon which there is no disagreement. We all consider that the salvation and protection of life first and of property second is a first essential and a proper function in the business of the Government and of the State.

The second use recognized by the statutes of the States is domestic use; where there are different applications for the use of a given amount of water, the statutes of the States place the necessity of that use and preference in granting the use, first, to domestic purposes; second, to irrigation or reclamation; and lastly, to power.

So we have these four elements in this order—flood control, domestic use, reclamation, and power.

Regardless of the amount of power involved in this bill, this order and precedence are present in the bill. If you will look into the history of the Colorado River compact, which is incorporated in this bill, you will find that it originated in and was caused by the appeals years ago by the inhabitants of California and of Arizona for protection from the floods of the Colorado River. This is the origin and the genesis of the matter.

The history of the compact shows it originated and was joined in by the upper States, meaning Wyoming, Colorado, Utah, and New Mexico, because of these very appeals from California and Arizona. We recognized the danger then and we were willing that not only flood protection should proceed in the lower reaches of the river, but also development for other purposes, because we recognized that they were immediately involved; that we were face to face at once with the further needs of reclamation, domestic use, and of power, along with flood control.

The dam proposed in this bill is necessary, not for one, but for all of these objects. When all these necessities, opportunities, and demands are presented in one project, good sense and good business require their combination and a dam sufficient for all of these purposes. It would be folly to build a dam for any one of these purposes without considering and including the others. Altogether they present a case of overwhelming necessity, opportunity, development, and creation of wealth.

The power is last in the order of necessity and legal precedence and therefore and in that sense it is incidental. Because of its volume, importance, and as a source of revenue to repay the cost of the structure, the power feature is apt to be looked upon as dominant. It would be improvident and unreasonable with the erection of a dam necessary to flood control and reclamation and to provide water for domestic use to stop at that point when under the same operation and the same machinery, the same system and organization, the dam can be built 100 or 200 feet higher, particularly when the canyon structure and dimensions make it easily possible and beneficial and should be taken advantage of.

Much is said of the Nation going into the realm of Government ownership and operation of the public utilities because in the bill it is proposed, while constructing the rest of the project, to build at the one available site a power plant through which discharged water will create electrical energy. The fact is that the bill does not require construction of the power plant, but it does give the Secretary of the Interior discretion to do so if deemed advisable. Such discretion should be given the Secretary as a matter of protection to the United States and the public interest.

What is the difference essentially between the Government erecting a dam and selling the water therefrom to municipalities and private corporations to create power for retail distribution, and selling them the power at the switchboard? I am satisfied that should be in the bill if for no other purpose than to give the Government the means of protection of that feature in case it should be found necessary to use it in the public interest. The object, if the right is exercised, is the sale of power at the switchboard wholesale, and not retail distribution.

Starting from the basis that there is no disagreement as to the necessity of the dam for flood control, the only question presented is whether the Government shall stop at the completion of the dam, which necessarily includes a tunnel for the discharge of the waters, or finish the job by putting up the power plant and wholesaling the power at the switchboard.

I can conceive of several reasons why the Government should construct the plant. In the first place, I am convinced that the Government can build the power plant in connection with the other features and will build it more cheaply than any private corporation can build it.

There has been some criticism of the estimates of the cost of the project made by the engineers of the Reclamation Service. This was in connection with the estimate as to how much the dam was going to cost. You are all aware that the total estimated cost is $125,000,000, roughly divided as one-third for the dam, one-third for the power plant, one-third for the all-American canal to conduct the water on American soil to the Imperial Valley.

It has been said that there is much doubt about the estimate. It has been said that the estimates we had were made by the reclamation engineers, who, forsooth, were said to be interested in the project for some ulterior and illogical purpose of self-laudation and self-aggrandizement in building so great a structure. I do not think that any Member will take that seriously. Certain arguments were advanced to show that the estimates of the reclamation engineers on other projects have been unreliable because later on the construction of the projects cost two or three times the original estimates.

Now, I want to do the engineers of the Reclamation Service justice. In the first place, those estimates were made on reclamation projects by Government engineers years before the construction was taken up and many years more before the completion of the construction. It may have been 5 years or 10 years. It requires but the statement to recall to your minds that in that time, within the last 10 or 15 years, the prices of labor and material have more than doubled and in many cases trebled.

Again, in the original cost estimate of the engineers on the projects, it was not known that drainage would be necessary on these projects. In other words, the projects were built, they were completed, and the land was irrigated, and then, by reason of some subsurface formation in the form of a great saucer, the waters collected and it was found after years had elapsed that great drainage ditches were necessary. In some cases those drainage ditches cost very nearly as much as the original reclamation canals. These items alone would account for immense increase without any fault being attached to the original estimates of the reclamation engineers.

In former years we were dealing more or less experimentally with this whole reclamation proposition, and it is true that underestimates were made in the very beginning of the construction of these projects, but experience through these years has given the engineers many more facts and data to be taken into consideration, and now instead of underestimating these projects it is rather the habit of the engineers to overestimate the cost. The last two great dams have been constructed under the estimates.

This estimate for the Boulder Dam is not a lump sum, somebody's guess, but separate estimates have been made on every portion of this project, as I understand it, even including a 20-mile railroad from the nearest railroad point to bring in the supplies and material. In the event that this project should cost ten, twenty, or even thirty million dollars more than the estimates, the only result is that it will take a few years longer under the contracts to pay out the entire sum. There is no possibility of loss to the Government, because these estimates may be exceeded by a few million dollars. As now estimated, as I recall it, the demands for power upon which contracts would be entered into by the Secretary before beginning construction or expending one dollar are sufficient so that in the course of 25 or 30 years the entire cost of the project will be repaid, and the only effect of a possible excess over the $125,000,000

estimated would be a few years longer to complete the entire repayment.

The Government will later on want to use some of the power itself in the construction of the all-American and later other canals.

Fundamentally I am opposed to Government ownership and operation. I favor private enterprise. But sometimes it is bound, in the public interest, to enter to a certain protective extent.

Are the upper States protected? My State, Wyoming, is one of the upper-division States. We entered into the seven-State compact, and when Arizona refused to sign we were one of the six States ratifying what is known now as the six-State compact, which simply means that six States agreed to be bound by the terms of the original seven-State compact. This bill, in my judgment, gives these upper States very substantial protection. I may say, as a starting point upon this subject, that these upper States, as matters are now, without the passage of this bill, without a compact, in view of the decisions of the United States Supreme Court with reference to prior appropriations of water, are absolutely without protection; that we need the protection of the compact, and that I for one am going to continue to stand for the preservation of the compacts as far as we have them now, with the hope always that all of the seven States will finally come in and we will have a complete seven-State compact.

The upper States are protected. This bill gives them substantial, if not complete, protection. If the bill fails, an opportunity to secure the rights of the upper States to that extent will have been lost. If the bill passes, we receive a great measure of protection, even though but six States are bound and one, Arizona, is not.

The passage of the bill completes and fulfills the condition which California attached, and she becomes bound absolutely with six States; or else not a dollar will be expended, not a foot of construction go forward. That would accomplish the purpose of the six States which agreed that the terms of the seven-State compact should be binding upon six States so agreeing.

Utah is a sovereign State and, of course, can do as she pleases. Utah withdrew unexpectedly and without intimation or warning and so far as I know or can learn, at the very time, after four years of effort, when California, in which State our real danger of prior appropriation exists, was being brought into the six-State compact by a similar bill one year ago. It was a time, as I view it, to proceed, not to withdraw; a time when the object of long years of work could have been accomplished.

Regardless of the theories of State rights as to the bed of the stream and control of the use of the water of this stream by the States, it being navigable, with which I agree, the Government controls the public lands above high-water mark, where the dam will be built and the land flooded by a storage of the water, and the public lands over which the canals must run to divert the water around the dam for power, or to distant areas for reclamation in California and Arizona. Hence the Government can require Arizona, before she perfects any water rights, even though she is out of and not bound by the compact, to conform therewith, which means that the rights of the upper States to their equitable division of the water will be protected. Utah, when it ratified the six-State compact, without Arizona, accepted then the theory that protective provisions could be and would be as they are incorporated in this bill. As for California, she must ratify, or the project does not proceed. Moreover, an amendment to this bill which will make the Federal Power Commission subject to its provisions and to the compact, thereby protecting the upper-division States, is proposed and accepted. This insures against appropriation by Arizona. The upper-division States, with the exception of Utah, have remained in the compact and are supporting this bill for the reason that they believe that the rights of the upper-division States are protected therein and that the six-State compact would be perfected by the passage of this bill, which would fulfill the condition of California's entrance.

Now, the compact would have to be ratified by six States as a six-State compact. But I still hope that Arizona will yet ratify and complete the seven.

Especially do I consider it my duty to support this bill for the reason that I am thereby protecting the water rights of my State and the other States of the upper division. We of the upper States must bear in mind that without the compact and without this bill, which insures a six-State compact, we are in constant and certain danger of the exercise of the appropriation rights by all the lower States under the present laws and decisions of the United States Supreme Court. Therefore I feel in duty bound, as a Representative of my State as a State ratifying the seven and the six State compact, in view of the tremendous benefits of this bill to all the States of the Colorado River Basin and to the United States, to support this bill.

With the amendments, I favor the passage of the bill. [Applause.]

Mr. SMITH. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. DAVENPORT].

The CHAIRMAN. The gentleman from New York is recognized for 10 minutes.

Mr. DAVENPORT. Mr. Chairman, I have my time for the discussion of this measure partly from proponents and partly from the opponents of the bill; from the proponents because I am a friend of the urgent need of the people in the Imperial Valley, a friend of the development of power on the Colorado for the great region of the Southwest, and have always supported the expediting of the decision upon this question. I have some time from the opponents of the measure because I have consistently criticized this bill in what seems to me to be two important respects.

In the first place, I question the wisdom of sending this bill to the Supreme Court of the United States with the Federal legal theory of the Reclamation Service written into the structure of it. I am in no position to pretend to say whether its course to and through the Supreme Court will or will not be beset with difficulty. I only know that some of the questions raised by the bill have never been passed upon by the highest court.

And, besides, there are practical reasons of importance which have inclined my mind to another sort of bill with another sort of structure, and I have introduced such a bill, H. R. 5770, embodying the principles of the so-called Port of New York Authority and applying them to the Colorado region in the form of a Colorado River authority. A Colorado River authority or a public corporation representing the seven States at the heart of this bill instead of the National Government would to my mind have some obvious advantages. In the first place, the Colorado River authority would use private capital and not current national revenues immediately taken from the taxpayers.

If it is said that the money which the National Government advances upon this project is to be returned to the Government, the answer is that it may or may not be returned, but it will never be returned to the same taxpayers who furnished the funds. An entirely new set of taxpayers will get the benefit of any return there may be. Under a Colorado River authority or public corporation, consisting of representatives from the several States of the region, private capital would be used for the project and used only when the project seemed financially and practically sound. An authority representing the States of the region, like the Port of New York Authority representing New York and New Jersey, could borrow capital as cheaply as the National Government, or practically so, if the earning power of the project is to be what its proponents maintain. That is the experience under the Port of New York Authority, which was borrowing money the last I knew at 4.01 per cent. Every bit of control over allocation of water and power and of rates that can be exercised by the National Government could be exercised by an authority or public corporation representing the States.

This Boulder Dam project has national implications, but it is fundamentally regional, like the developments on the Tennessee, or like coming developments on the St. Lawrence and the Columbia. If the regional States own it and manage it, the National Government is thereby not under the necessity of taking on one more great business enterprise at a time when the Government has plenty to do as it is. And I believe that cooperating States under a local regional authority or public corporation would develop a better feeling than has been developed under the national structure of this bill, and that responsible representatives of the several States, charged with the duty of bringing things to pass, would accomplish the task; and that all the Nation would have to do would be to furnish that sort of a legal structure to the enterprise which would drive in a recalcitrant State if it persisted too long in its contumacy.

But H. R. 5773 is built upon the national theory, with any advantages or disadvantages that there may be in such a plan, and upon that I do not linger.

I wish to limit myself in the brief time at my disposal to one section of this bill as it stands, section 6, which to my mind condemns it unless certain fundamental changes are made. You will notice that there are three alternatives in section 6 about the power plant. It is about the power plant that a great part of the controversy over this bill has raged. Everybody agrees, in view of the flood-control and irrigation factors connected with this measure, that the United States should

build the dam. But with respect to the power plant, in section 6 there are three alternatives. First, the Secretary of the Interior—that is, the National Government—may build the power plant, operate it, and wholesale the electrical energy produced. Second, the Government may build the power plant, but enter into contract or lease of a unit or units of the plant, with the right to generate electrical energy to be in municipal or private hands. Thirdly, the Government may lease the falling water and let a municipality or a corporation build the power plant and operate it. Under the circumstances in that region at the present time, of course, it would be a private corporation which would construct the power plant.

These alternatives are at the discretion of the Secretary of the Interior.

I maintain that the Government, which is to build the dam, should also build the power plant. In the first place, because of economy in construction. One of the large elements of cost entering into the construction of a power project, or of any other project of magnitude, is the preliminary work and the equipment necessary to do the job. If the National Government is to build the dam, it will have on hand when the dam is completed the plant and equipment necessary to continue the construction of the power house. In fact, as the physical situation is in Boulder Canyon, the dam and the power house are practically a continuous structure. If the power house is to be built by a separate agency, as it may be under this bill, that agent will have to assemble organization and equipment of its own, and this assembling, equipment, and depreciation during the construction period will be largely a duplication of cost. It is much more economical to build as one continuous job.

In the second place, interest on investment is an important element of cost. The United States can borrow the thirty millions for the power plant at 4 per cent or a little more. A private corporation would pay 5½ per cent or 6 per cent. An increase of 1 per cent in interest rate over the cost of money to the United States is an increase in fixed charges of 25 per cent; an increase of 2 per cent in interest rate over the cost of money to the United States is an increase in fixed charges of 50 per cent. All to stand as an added burden upon the consumers. And these additional burdens under the circumstances, if the private corporation builds the power plant, will much more than offset any probable increased efficiency of a private construction organization over a government organization in this field of dam and power-plant building. And it is more than likely to offset any loss due to the elimination of the right of taxation of the power plant. In the third place, for recapture purposes, the lower the cost of the power plant, the better for the United States. Unfortunately, however, I am not able to find any provisions for recapture or for safeguarding recapture in this bill. And in the fourth place, if the United States owns the development entirely, the power plant as well as the dam, it has complete control over it. Its arm may be made to stretch farther toward the protection of the consumer. If the United States owns the plant, it would be in better position to assume operation itself, if operation by another agency proved unsatisfactory.

It is practicable in the canyon to build one power plant and only one. A sprinkling of power stations in the canyon would not be feasible—and the separate switchboards, separate banks of transformers, separate high-tension switches, separate everything for each plant—each agency maintaining and operating a force of its own—there would be no economy about that. For all these reasons, the third alternative in section 6, namely, the granting of the right to a private corporation to construct the power plant, should be stricken from the bill. [Applause.]

Again, the second alternative in section 6 should be scrutinized closely by this House. The second alternative contemplates a single Government-built plant, but the Secretary of the Interior at his discretion may lease a unit or units to different municipalities or corporations. Picture this plant leased to different entities not sympathetic with each other. If the power plant is to be operated efficiently, it must be susceptible of being operated as a single unit. It should be a plant that would make possible the delivery of energy on to the same transmission network, in accordance with the needs of different sections at different times of the day—depending upon the necessity of peak loads at different points at different times—to get the best results the generators in the great plant must operate in synchronism; that is, deliver energy onto the same transmission lines under the same frequency. Units of the plant operating at different frequencies could no more deliver to the same transmission line than two street cars of different gauge could operate on the same track. In order to get the best results, as I understand it, it is necessary to operate with the generators of a great power plant as you would play upon the keys or the pipes of a great organ, and yet you have a provision in this bill to lease separate units to separate entities, with no provision for a sympathetic unison of power.

There should be another amendment to section 6. This leasing of units should be allowed only on condition that if two or more such contracts of lease be entered into, provision shall be made for operation of the plant under joint agreement in terms approved by the Secretary of the Interior, for the purpose of providing for the most economical utilization of the available energy.

And again, and finally, there is no effective attempt in this measure to protect the consumers of the southwestern section of the country from extortionate charges in rate making. The California commission is a good commission, but under recent judicial economics it is helpless when operating only under the police power of the Constitution. So is every State commission.

And this brings up the whole question of whither we have drifted in this country, so far as commission control of public utilities is concerned. If recent judicial findings mean what they seem to mean with respect to what constitutes valuation for rate-making purposes for public utilities, the regulatory process of control by commissions is in danger of being seriously interfered with and brought practically to naught.

What I am adverting to is not a matter of constitutional or statutory interpretation, of which the higher courts are our experts and guides; it is rather a matter of judicial economics which in several findings has recently been generally interpreted to run contrary to the principles and rules of public-utility economics as they have hitherto been understood by the American people. A public utility in the United States receives certain exceedingly valuable privileges from sovereignty, that is, from the public. The chief privileges are the right to take advantage of the State's power of eminent domain, to extend the range of its activities through or across your property or mine upon payment of a fair compensation. Another privilege is the privilege of being a monopoly, of receiving the support of the State to prevent competition, because competition is wasteful in the case of public utilities. A third privilege is the important one of being permitted under legal ruling to insure to its investors a reasonably liberal return of profit upon its capital investment; and that reasonable return has usually been construed as the lowest price at which, in the long run under good management, sufficient capital will be attracted to the public-utility business to keep it active, serviceable, and progressive.

A fair capital basis for public-utility rate making in this country has been reckoned to be actual prudent investment. This is the rule laid down in the Federal water power act. It is the rule laid down historically by the Interstate Commerce Commission. It is the rule laid down by State commissions—for example, the States of Massachusetts, California, and many others. It is a rule which has commended itself to the common sense of the American people, in view of the unusual privileges conferred by the American people upon this particular kind of property known as public-utility property.

But it is a rule which has recently been greatly altered through the energetic activities of educational propaganda and professional legal argument by the representatives of powerful public-utility producers.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. DOUGLAS of Arizona. Mr. Chairman, I yield five additional minutes to the gentleman.

The CHAIRMAN. The gentleman from New York is recognized for five additional minutes.

Mr. DAVENPORT. In case after case the producer is coming forward to contend that rates should be fixed on what it would cost to reproduce public-utility property new, regardless of original cost or actual investment, and the contention appears oftentimes to be made because under certain conditions reproduction cost is greater than actual cost and makes a more profitable rate base. This is the point of most acute conflict to-day between the public-utility owner and producer on the one hand and the consumer on the other. From the standpoint of sound economics or a wise social policy, values for rate-making purposes in excess of actual prudent investment are without justification, and the claim for such values is not consistent with either the privileges or the obligations of public-service corporations.

The courts have recently been interpreted to lend a considerable measure of support to these latter-day claims for inflated capitalization on the part of public utilities; and if the interpretation is true, it is partly because of the courts following decisions made at a time when the distinction between a private and a so-called quasi-public business had not been clearly worked out, and partly because of the handicap of limited economic training among jurists. From Smyth

against Ames in 1897 to the Indianapolis Water Co. decision in 1926, the altered attitude toward evidence of value and measurement of value is marked and significant.

This recent theory of public-utility economics of basing capitalization for rate making upon reproduction new, together with allowance for enhanced going-concern value and the like, means in a period of rising prices the granting of the highest possible earning power to a public utility, whereas the fundamental rule of public control has been to limit earning power to reasonable compensation, in view of the privileges and obligations of this kind of property.

It means a form of protection and guaranty thrown around this kind of property which is granted to no other. You may own a fine house and have accumulated wealth. I may have no reserves and wish to purchase a home. You generously loan me $10,000 in 1914, payable in 1924. In 1924 the level of prices has materially changed in my favor, but you do not demand of me—and the courts would not support you if you did—$15,000 in payment of the loan instead of $10,000. [Applause.]

The Indianapolis Water Co. decision of 1926 is already on the way to plague the courts; as, for instance, in the Massachusetts Worcester Electric Light case. Massachusetts was the first State in the Union to put its utilities under legal control, including the rate base of actual prudent investment. In the recent Worcester Electric Light case, however, counsel for the utility has succeeded in overturning in the lower courts the historical basis of valuation, and the issue will finally be determined in the Supreme Court of the United States. In Massachusetts public opinion is asking the legislature for the authority to put into the contract agreement with public utilities, in the case of new projects and in the expansion of old ones, the principle of actual prudent investment, which has been the policy of the old Bay State from the beginning.

And here is another important case. The St. Louis & O'Fallon Railroad refused to accede to the declared right of the Federal Government to recapture some of its earnings under the transportation act, and based its refusal on the ground that it was entitled to a rate of profit based on reproduction cost of its property. The Interstate Commerce Commission decided against the railway, and the lower court is adverse also, but not on a clear ground at all of repudiation of this new theory of valuation, and this case is already on its way to the final judgment seat. All over the country these controversies are springing up in terms of the new theory of protection and guarantee of public-utility properties and profits.

This trend away from the older and sounder views of public control has gone so far in the Interborough Rapid Transit case, now engaging the attention of the city of New York, the Supreme Court, and the country, that even the principle of contract is being attacked, and the opinion of a Federal court obtained that the rate of fare fixed in an agreement between the city of New York and the Rapid Transit Co. is not binding. Of course, I do not pretend to say whether in this particular case the fixing of the actual and arbitrary rate is or is not confiscatory. The decision against the city of New York in the lower Federal court seems, as I have seen it summarized, to be based upon the fact that prior to the last contract between the city and the Interborough, the State had passed a regulatory law and set up a commission and had not exempted from the area of this law the Interborough fare contract. Therefore the court appears to reason, the police power of the State is superior to the city's right to contract; and, therefore, the whole question of fares based upon higher valuation than originally contemplated may reasonably come up; and the field is wide open for a new sort of public utility valuation to be considered.

Far be it from me to pass upon the question whether this is or is not good law, but even if it is, it certainly would not apply if the State had expressly authorized the cities to make such contracts with utilities, or had declared the actual prudent investment method of fixing values and fares to be the sound one.

It is very evident that in the extreme uncertainty which prevails, if we mean to protect adequately the consumer in the region covered by any one of these great public resource projects like Boulder Dam, we must use something more than the police power of the Constitution, something in addition to commission control, whether State or Federal.

The next logical step in public-service regulation is to invoke the contract power of the Constitution. In the case of new public utility enterprises, and in the expansion of existing ones, we may provide that the right to engage in business shall be granted under terms of a specific enforceable contract in which rights and obligations, rate base and return thereon, shall be clearly set forth. This, applied to the future and to new capitalization, will infringe upon no vested rights.

And so there should be a third amendment to section 6 invoking the contract authority of the Constitution, which is needed in this bill to protect the consumers of the whole southwestern section of the country.

And I suggest the following:

As a condition to the lease of the said plant or any unit or units thereof, and as a condition to the sale of electrical energy therefrom, every lessee, and every purchaser if the United States operates the plant, shall agree that the property of such lessee or purchaser, used and useful in connection therewith, shall be valued, whether by the agencies of the States or of the United States, and whether for regulation of rates or for taxation or for State or municipal acquisition and use, at its fair value, not to exceed the net investment of the said lessee or purchaser and said net investment shall be ascertained in accordance with the provisions of the Federal water power act and the regulations of the Federal Power Commission.

Every lease and every contract for the sale of power shall provide that the resale price thereof, with the transformation, transmission, and distribution of such energy, extending to sale to the ultimate consumer, shall be subject to the regulation and control of said Federal Power Commission or of the appropriate authorities of any State or States in which such power is transmitted, distributed, sold, or used according to the respective jurisdictions of said Federal Power Commission or said State Authority, as provided in sections 19 and/or 20 of the Federal water power act.

When the time comes I want to offer a simple amendment of that sort.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. DOUGLAS of Arizona. I yield to the gentleman two minutes more.

Mr. DAVENPORT. Here is a bit of testimony from the director of the joint utilities committee, who was recently questioned before the Federal Trade Commission on the interest of the joint utilities in Boulder Dam. It seems to have a significant bearing on section 6.

Q. Wasn't it true that the joint committee is opposed to the Government selling any current generated from the dam in Boulder Canyon to any except utility companies?—A. I think the statement in that letter, if I may summarize it, was to this effect: That the position of the joint committee was that the bill should follow the recommendations made by Secretary Work in his message, namely, that bids should first be asked for a private development of that river, construction of the power houses, etc. Failing that, for the leasing of the power house. Failing that, for the sale of electrical current to the highest bidder at the switchboard. I believe that that from my memory is a correct summary of what was said in that letter.

These are practically the provisions of section 6, which I am criticizing:

Q. What is the purpose or object of spreading all these pamphlets throughout the country, represented by all these documents that have come in here?—A. I think you will find, if you look through our publications, that there has been practically nothing in the line of what you call propaganda since last December, or November, whichever the month was, when the attitude of the committees toward Boulder Dam was formally stated. Prior to that time there was an issuance of a considerable amount of matter, including the two books I have spoken of, which did deal with the subject generally. I think you will find very little in the way of publication since the period I have just mentioned. In fact, I think I would be safe in saying, nothing.

All of which would indicate that with section 6 in the bill the so-called power trust is not now violently opposed. I submit this testimony without further comment. [Applause.]

Mr. DOUGLAS of Arizona. Mr. Chairman, I ask unanimous consent to extend my remarks generally, and in particular to include the statement of the Southern California Edison Co. to the effect that they would not build the Boulder Dam, and the testimony of Secretary Hoover in respect to the Mexican situation, and the statement of the Geological Survey with reference to the Mexican situation, and the contract between the Southern Pacific Railroad and the Imperial irrigation district; also including a letter signed by Secretaries Weeks, Work, and Wallace, all of which prove conclusively and incontrovertibly that Mexico will derive a great measure of advantage from the construction of the dam.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona to extend his remarks in the RECORD in the manner indicated?

There was no objection.

Mr. SMITH. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. ACKERMAN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, had come to no resolution thereon.

PERMANENT CONSTRUCTION AT MILITARY POSTS

Mr. SINNOTT. Mr. Speaker, by direction of the Committee on the Public Lands, I ask unanimous consent to call up Senate Concurrent Resolution 21 and consider the same.

The SPEAKER. The gentleman from Oregon asks unanimous consent to call up Senate Concurrent Resolution 21. The Clerk will report it.

The Clerk read as follows:

Senate Concurrent Resolution 21

Resolved by the Senate (the House of Representatives concurring), That the action of the Speaker of the House of Representatives and the Vice President of the United States in signing the enrolled bill (S. 3752) to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926, be, and the same is hereby, rescinded, and that the Secretary of the Senate be, and he is hereby authorized and directed, in the reenrollment of the bill, to make the following correction: On page 2, line 11, of the engrossed bill strike out the word "therefore" and insert the word "theretofore."

The SPEAKER. Is there objection to the present consideration of the Senate concurrent resolution?

There was no objection.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

CREWS OF U. S. S. "REPUBLIC," ETC.

Mr. WHITE of Maine. Mr. Speaker, I present for printing, under the rule, conference report on the bill S. 1609, recognizing the heroic conduct, devotion to duty, and skill on the part of the officers and crews of the U. S. S. *Republic*, *American Trader*, *President Roosevelt*, *President Harding*, and the British steamship *Cameronia*, and for other purposes.

The SPEAKER. Ordered printed.

The conference report and accompanying statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1609) recognizing the heroic conduct, devotion to duty, and skill on the part of the officers and crews of the U. S. S. *Republic*, *American Trader*, *President Roosevelt*, *President Harding*, and the British steamship *Cameronia*, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendments of the House, and agree to the same.

WALLACE H. WHITE,
FREDK. R. LEHLBACH,
EWIN L. DAVIS,
Managers on the part of the House.

CHAS. L. MCNARY,
DUNCAN U. FLETCHER,
W. L. JONES,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1609) submit the following written statement explaining the action agreed upon by the conference committee:

The House amended the Senate bill by striking out sections 3 and 4 thereof. These sections authorized the striking of gold medals to be given to the captain of each of the ships taking part in the rescues specified in section 2 of the bill and to each person certified by such captain as having shown special courage and to have faced special danger in such rescue, and authorized an appropriation to cover the cost of the medals and their distribution.

The objection to the substance of these two sections is that they authorize a person not in the service of the Government, but in civilian employment, to bestow congressional medals in his discretion, thereby establishing what your conferees believe to be an unwise precedent.

The Senate conferees have receded and agreed to the House amendment striking out these sections.

WALLACE H. WHITE, Jr.,
FREDK. R. LEHLBACH,
EWIN L. DAVIS,
Managers on the part of the House.

LOAN OF AERONAUTICAL EQUIPMENT TO MUSEUMS, ETC.

Mr. WAINWRIGHT. Mr. Speaker, I present for printing, under the rule, the conference report on the bill (S. 1822) to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions.

The SPEAKER. Ordered printed.

VETO OF FARM RELIEF BILL

Mr. SHALLENBERGER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. SHALLENBERGER. Mr. Speaker and gentlemen of the House, we are about to end the first and longest session of the Seventieth Congress. Little legislation of importance aside from flood control has been enacted. The Republican Party is evidently disorganized and demoralized and can no longer function as a majority party should do. Aside from measures that fatten special interests or pour a flood of Federal money into favored districts, the session has been barren of results.

The Ways and Means Committee refuses to function and is afraid to touch the tariff. The Committee on Interstate and Foreign Commerce fails to report any bills of major importance, although the coal business is paralyzed, the miners out of work, and railroad rates sadly in need of adjustment. If either agriculture or coal mining is to recover from present disaster and distress, it is quite apparent another Congress must act.

The most important work of the session, the farm relief bill, is again killed by a presidential veto. The last Congress passed a similar measure and with a word the President nullified all the work Congress had put forth upon it for years past.

The present Congress, in response to an increased demand from the people, again passed a bill that had been overwhelmingly recommended by the Committee on Agriculture. It passed Congress by twice the majority of a year ago. Again the President wills its defeat and vetoes the bill.

Only the other day Secretary Mellon said in a public interview that the President was more important to the Republican Party than the platform upon which he was elected. This veto illustrates the force of this assertion. A platform declares party promises and principles. A President can destroy both platform pledges and the efforts of Congress to carry them out. It has been done in this case. Both Republican and Democratic Party platforms in 1924 pledged farm-relief legislation. Congress has twice made good the promise and twice the President has nullified its efforts by a veto.

A year ago in this Chamber I listened to a speech by President Coolidge commending the life and deeds of George Washington. To veto a bill giving a square deal to agriculture, as compared with other national interests, is not following in the footsteps of George Washington. It puts Calvin Coolidge out of line with the record of the great Presidents of this Republic—Washington, Jefferson, and Lincoln.

The immortal Washington was President eight years—tremendous years—when the Nation was in the making. He used the veto but twice, and then only on matters of little moment. One a bill relating to a regiment of dragoons and the other dealing with apportionments.

Thomas Jefferson, the greatest constructive statesman this country or any other Nation ever knew, never used the veto power during the eight years that he presided over the destiny of the American Republic.

Abraham Lincoln, by many thought the greatest of the immortal three in his understanding of true Americanism, like Washington, only used the veto twice, and both times upon bills dealing with mere details—not great principles of government or the general welfare. One bill that Lincoln disapproved concerned the appointment of minor officers in the Navy, and the other the issuance of bank notes of less denominations than $5.

It is interesting to study the origin, the development, and the decline of the idea of the veto power in governments. The veto is the voice of autocracy, not of democracy. It was born of the doctrine declared by Louis the Grand, when he cried, "The state, I am the state!" It is a part of the doctrine of the

divine right of kings. Its purpose was to protect the prerogatives of kings. It has come to be used to defeat the will of the people as expressed by Congress, their voice under the Constitution.

Calvin Coolidge has the veto power, because 2,000 years ago Augustus Cæsar asserted his authority to use it upon the Senate of Rome, and backed that assertion with an army. Later the Cæsars passed that power down to the kings and kaisers that followed after them, until at last it came down to English Kings. When 150 years ago our fathers framed our Constitution and our laws, they adopted the principles and practices of the unwritten constitution of England. Since an English King still claimed the power of veto, it was granted to our President in our own fundamental law. But the veto power of the British King is as dead to-day in England as William the Conqueror himself.

Not for 200 years has any English King dared to use the veto power upon the Parliament of England. If George V, King though he is of Great Britain and Ireland and Emperor of India, were to attempt to use the veto power even once upon the Parliament of England when it speaks for England, it would end even the name of Kings in England.

But here in free America the people may fight for years for a bill dealing with the life or death of a great industry essential to the welfare of the people. The demand for it rises in such a tide as to drive it through both Houses of Congress by a big majority.

At last the bill comes up to the President, and he passes judgment upon us all. He takes his pen in hand and writes "Veto"! I forbid it, like Cæsar of old, and so ends the struggle of the people to get relief by law.

Our Government is not a democracy nor an autocracy; it is a representative Government. Four hundred and thirty-five Congressmen and 96 Senators are the only voice the people have in this Republic that can speak for them in law.

If a President still has the power that once belonged to kings, to use it like a king is not in keeping with American ideals.

A study of the history of my country convinces me that if Washington, Jefferson, or Lincoln were President to-day and confronted with this great responsibility, they would not defy the representatives of the people, but would recognize and respect their right to speak for the Nation and sign the bill.

THE GOVERNMENT IN BUSINESS

Mr. LANKFORD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a statement of the National Fertilizer Association and my own remarks in reply thereto.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. LANKFORD. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to make some observations concerning a letter which I understand all Members of Congress received from the National Fertilizer Association, of Washington, D. C., on May 22, 1928, which is as follows:

In view of the very short time before you will be asked to vote on the conference report on the Muscle Shoals bill—perhaps it will be to-day—I want to give you this brief message correcting misinformation that I find is being circulated:

When the House passed the Muscle Shoals bill last Wednesday, it followed rather closely the national defense act of 1916. In other words, production was limited to fixed nitrogen, striking out complete fertilizer. As you know, the national defense act states that the Muscle Shoals property should be used "for the production of nitrates or other products needed for munitions of war, and useful in the manufacture of fertilizers and other useful products." The law does not authorize production of fertilizer, but fixed nitrogen, which is only one of several ingredients of complete fertilizer. This fact the House fairly recognized when it adopted amendment after amendment restricting production to fixed nitrogen only.

But—

The conferees named by the House and the Senate have reported a bill that, if approved, will put the Government directly into the complete fertilizer business—not only nitrates but complete fertilizer. Under the conferees' bill the governmental corporation is directed "to operate existing plants, to construct, maintain, and operate experimental or producing plants at or near Muscle Shoals for the manufacture, distribution, and sale of fertilizer, or any of the by-products of the same."

The conferees' bill framed quickly over Sunday overrides the specific action of the House—overwhelmingly expressed—removing complete fertilizers from the measure. In fact, the conference report in some respects produce a more drastic fertilizer bill than either legislative body has approved.

A false report has been circulated at the Capitol that the conference report is satisfactory to the fertilizer industry. This is manifestly untrue because our industry would be subjected to Government competition which President Coolidge has termed "paralyzing monopoly."

Mr. Speaker, not only was this letter mailed to each Member of Congress, but it was also spread over an entire page of the Washington Post, in large type, as appears in the issue of that paper of this date. This is only a sample of the propaganda which is going the rounds against the manufacture of cheap fertilizer at Muscle Shoals for the farmers.

I understand every Member of Congress has been simply deluged with telegrams and letters protesting against the manufacture of fertilizers at Muscle Shoals. I know I have received more telegrams and letters objecting to the Government going into the manufacture of fertilizer than I have ever received in opposition to any other one matter. I have not received a single letter from the farmers who buy fertilizer in behalf of the manufacture of cheaper fertilizer at Muscle Shoals. I wonder why this is? I believe I know. I have told my farmer friends in Georgia that I would vote for cheaper fertilizer for them at every opportunity. They show their faith in me by quietly waiting, even though I am beseiged by the National Fertilizer Association and all the combined fertilizer interests.

Down in Georgia the farmers are busy making a crop, hoping to be able to pay their guano bill and other necessary items and have a few dollars left in the fall they can call their own. I can see them as up and down the row they go. They are plowing in the fields in Atkinson County, where my father was born. They are plowing in old Appling County, now Clinch, where my mother was born. They are plowing where I plowed, where my father plowed, and where my friends live and labor now. None of them are here taking part in the great fight for cheaper fertilizer. They are too busy trying to make a crop to pay enormous profits to the fertilizer companies, which profits the National Fertilizer Association is now using in this bitter fight against the farmer. Some one said recently that the fertilizer people were spending an enormous amount of their money in the fight. I replied, "They made the money out of the farmers and now they are fighting the farmer with the money they made out of him."

Yes, Mr. Speaker, the farmers, as ever, are working, waiting, and trusting us.

The Fertilizer Trust, in the meantime, is active. Money is being spent. Members of Congress are being besieged. Some are being threatened with defeat if they vote for cheaper fertilizers. There are lawyers, lobbyists, and fertilizer men here representing the side of the Fertilizer Trust. Oh, what an array of talent against the manufacture of fertilizers at Muscle Shoals. Bushels of telegrams in opposition to cheap fertilizers are coming to Members of Congress; wagon loads of letters and printed propaganda in opposition are being delivered. And yet the farmers are not telling us they favor the manufacture of cheaper fertilizers. It seems to be all one way unless we remember there is another side to the matter.

Well, I like fair play. Both sides should be represented, and especially those with a just cause should have representation. So I find myself marked on the side of the buyers of fertilizers—the farmers, if you please—rather than with those who sell to the farmers. I am with the farmers because I was raised with them, have always loved them and their folks, and have always been the recipient of their love, respect, and confidence. They have done more for me than I have ever been able to do for them, and now it is my purpose to at least present briefly their side of this controversy and also to vote for the manufacture of cheaper fertilizers for the farmers. I fully believe that the manufacture of fertilizers at Muscle Shoals means cheaper fertilizers for the farmers.

To tell the whole story of Muscle Shoals would require the writing of many books. I wish to only briefly, in a few sentences, point out some of the inconsistencies of the National Fertilizer Association and its allied interest. To begin with, objection is made to the Government going into business. The Government is already in business at Muscle Shoals. Fabulous sums of money were spent there during the World War and since. The Government owns one of the most valuable pieces of property in the world at Muscle Shoals. It was improved as a war measure so as to obtain an abundance of cheap nitrate for war purposes in war times and for fertilizer purposes in peace times. We will need this property if another war should come.

In my heart, I feel the farmers need it in operation now in order to give them cheaper—much cheaper—fertilizer. The Government is already in business at Muscle Shoals. What shall we do? Shall we give away the plant costing the taxpayers hundreds of millions of dollars in order to get out of business? Shall we give away all Government property in order

to get the Government out of business? Shall we give away the fabulously valuable oil properties, public lands, and timber properties of the Government in order to get the Government out of business? Shall we stop the United States mail system and deliver it to private interest in order that postal and parcel-post charges may be doubled several times in order to get the Government out of business? Shall we give away all Government-owned ships to get the Government out of business. Shall Congress cancel all foreign debts in order to get the Government out of business, and to enable the international bankers to collect greater interest on safer loans?

Shall we close down the rural credit system and put an end to all Government aid to road improvements to get the Government out of business? In short, shall Congress tax the common people unto death to buy and improve great properties needed for governmental purposes, and then give these properties to the big rich in order to get the Government out of business? Shall we stop the regional banking system to get the Government out of business?

Everyone will readily agree that the answer to these questions is no—a thousand times no. Then, there is but one answer to the demand that the Government give away Muscle Shoals in order to get out of business, and that is an emphatic no!

We, as Members of Congress, are engaged in the greatest business on earth—that of governing the greatest people on earth. The Government can not get out of business and continue to be a Government. The Government is in business on every hand by day and by night for other folks, why not for the farmers? The very people who object so bitterly to the Government being in business for the farmers, advocate most earnestly the bill being modified so as to require the Government to engage in business for the fertilizer manufacturers. They are frantic when it is suggested that the Government at Muscle Shoals manufacture finished fertilizers for the farmer, but they chuckle with the selfish delight of anticipated additional profits when it is proposed that the Government manufacture cheap nitrates to be sold to the manufacturers of fertilizers.

In effect, it is urged that it would be treasonous for the Government to engage in any business that would in the least lessen the profits of either those who sell to the farmers or who buy their products at a sacrifice, but that it would be an act of the highest patriotism to perpetuate the Government in the business of helping others make additional profits out of the farmers.

It is the same old story of attempting to help others on the theory that part of their profits may eventually ooze through their pockets and in some mysterious way help the farmers. Plenty of people are willing to help the farmers if they, at the same time, help other people more. They are not willing to help the farmers if it interferes in the least with any other business.

Many, many there are who want to get the Government out of business and want to get themselves in business by grabbing our great national assets, such as our oil properties, timber and mining lands, power sites, improved and unimproved, such as Boulder Dam and Muscle Shoals, and, in fact, all properties of whatever nature. The Power Trust and the National Fertilizer Association would be delighted to get the Government out of business at Muscle Shoals by the Government practically giving this great God-given asset to the combined power and fertilizer interests.

These selfish interests either want Muscle Shoals donated to them or operated for their special benefit. They would much prefer that this great plant—paid for with the people's money and erected on a site specially prepared by the great I Am—be closed down and rot to the ground rather than for it to be operated in behalf of the farmers and ultimate consumers of electrical energy.

This is not a rash statement, but is the awful truth. Last summer, in company with my father-in-law, Mr. J. S. Lott, of Douglas, Ga., and my son, Chester, I visited Muscle Shoals, and with the assistance of my good friend Congressman ALMON, who represents that district, we inspected the Muscle Shoals properties and found that the machinery and equipment for the manufacture of fertilizer ingredients and fertilizer were idle and going to decay, but that electrical energy was being generated for the Alabama Power Co., and by them in turn sold to the consumers for ten times what the power company was paying the Government for it.

I repeat, the fertilizer plants are idle because the fertilizer manufacturers do not want cheap fertilizers manufactured there for the farmers; the power plants are going, making electrical energy, not for the common people but for the power combines to sell to the common people at ten times selling price of the Government. Oh, the inconsistency and seriousness of the doctrine that Muscle Shoals must be closed down or be operated for the trusts of the country, and that it is all right for the Government to be in business for the profiteers but not for the common people.

The National Fertilizer Association is now urging that either nothing be done and the fertilizer plants stand idle or that they be operated for the use of the fertilizer manufacturers. The usual inconsistencies of the big corporations are in evidence. When this Congress attempts to secure a reasonable bid for a Muscle Shoals lease, the guano manufacturers and power people will not make even a decent offer and contend that neither nitrate nor fertilizers can be made successfully and that there is not a sufficient market for electrical power to authorize a reasonable bid for a power lease.

Now, the Government is proposing to operate the plant and manufacture fertilizer and power and the power people say there is a splendid market and the Government should not go into the power business except for the benefit of the Power Trust, and the guano manufacturers say guano can be produced so cheaply as to cause the closing of most guano concerns. They object to this Government going into business unless it is for their sole benefit. The guano concerns say the plan will not help the farmers, as they will not buy for cash and in the next breath say the manufacturers will be all ruined as the Government will also inaugurate a credit system if necessary.

Again, they say that only farmers living close by could afford to buy the guano on account of freight cost on long hauls, and yet the Baltimore fertilizer folks are some distance away and are most vicious in their attacks upon the plan to manufacture fertilizers at Muscle Shoals. Of course, they are simply beating the air. We all know that cheap fertilizers sold at Muscle Shoals either for cash or otherwise would reduce the price of all fertilizers, whether made at Muscle Shoals or not. This should be so, for there would also be an abundance of cheap nitrate for the manufacturers.

The Federal rural credit system makes only a small per cent of the farm loans, but it also holds down the rate of interest on all loans made by other loan concerns. So would it be in the sale of fertilizers.

There is much more I would like to say on this subject; however, this will suffice as an indication of my feelings in the matter.

CONSTRUCTION AT MILITARY POSTS

Mr. McSWAIN. Mr. Speaker, I present a conference report on H. R. 11134, to authorize appropriations for construction at military posts, and for other purposes, for printing under the rule.

PROMOTION IN THE ARMY

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on H. R. 13509, popularly known as the Wainwright-McSwain bill, and to print a letter and a portion of the House report in connection therewith.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. McSWAIN. Mr. Speaker, in the Committee on Military Affairs H. R. 13509, called the Wainwright bill, was amended by inserting a section, on my motion, as follows:

SEC. 4. That the Secretary of War be, and he is hereby, directed to cause the "promotion list," created pursuant to the provisions of section 24a of the Army reorganization act of June 4, 1920, to be revised and rearranged in the following respects and particulars: That upon the passage of this act the names of all captains and lieutenants on the present promotion list, who were first commissioned in the Regular Army or Philippine Scouts to date after April 5, 1917, and before July 2, 1920, shall be rearranged on said promotion list in three groups in the order next below mentioned, the first group comprising the names of all such officers who held the permanent grade of captain in the Regular Army or Philippine Scouts on June 30, 1920, and those appointed in that grade in the Regular Army to date from July 1, 1920, otherwise than by promotion who were not officers of the Regular Army on June 30, 1920; the second group comprising the names of all such officers who held the permanent grade of first lieutenant in the Regular Army or Philippine Scouts on June 30, 1920, and those appointed in that grade in the Regular Army to date from July 1, 1920, otherwise than by promotion, who were not officers of the Regular Army on June 30, 1920; and the third group comprising all other names to be rearranged hereunder; and within each group the names shall be arranged in the order of active Federal commissioned service rendered between April 6, 1917, and November 11, 1918, both dates inclusive, the name of the officer or officers having the greatest length of such service appearing first: *Provided*, That any captain or first lieutenant of the Regular Army as of June 30, 1920, who on July 2, 1924, was in a permanent grade lower than held on June 30, 1920, shall in such rearrangement be considered to be in such lower

grade: *Provided further,* That among officers of the same group whose lengths of service are equal, arrangement shall be in the order of ages, the oldest first; and, if it shall all occur in any group that two or more officers have the same length of such service and the same age, their names shall appear with relation to each other in the same order as upon the present promotion list: *Provided further,* That each class of the United States Military Academy within the rearrangement hereby required which was graduated during the calendar year 1917 shall be treated as a unit, without change of relative order or contiguity of names within the class, and shall be placed in said rearrangement as a unit in the first group, and within said group according to the rules above prescribed, the age factor to be determined by the age of the oldest member of the class, and each class of the United States Military Academy within the rearrangement hereby required, which was graduated during the calendar year 1918, shall be similarly treated, and shall be placed in the second group: *And provided further,* That the names of the individual officers within the required rearrangement whose original places on the promotion list shall have been changed in conformity with any special enactment of Congress, or pursuant to sentence of court-martial, shall be raised above or lowered below the place fixed by the foregoing rule, by the same number of files, respectively, that are, immediately prior to such rearrangement, above or below the place on the promotion list they would have occupied without such enactment or sentence.

This extract from the report will give Members some idea of the injustice done in 1920, and the means of correcting same:

In the spring of 1921 the first promotion list was announced by the War Department, and it was then for the first time officially made known to the candidates who in the meantime had severed their civilian connections and definitely made the Army their career that, in so far as the grades of captain, first lieutenant, and second lieutenant were contained, their grade meant nothing in determining promotion-list standing. Such was not the case with the colonels, who were placed among the colonels of the Regular Army, with the lieutenant colonels, who were placed among the lieutenant colonels of the Regular Army, nor with the majors, who were placed among the majors of the Regular Army.

The captains, first lieutenants, and second lieutenants, however, found their grades ignored and themselves scrambled together and likewise, that in the main, they were placed among and below the first lieutenants of the Regular Army and in general the regular officers were above the emergency officers.

Men who had not qualified for a grade above second lieutenant found themselves promoted in a single day to the grade of captain and placed over those who had qualified for first lieutenant and captain. This was done as a result of the War Department's interpretation of section 24a, subsections 3 and 4, that grade had nothing to do with determining position on the promotion list so far as captains and first and second lieutenants were concerned, but that captains and first and second lieutenants would be arranged merely in accordance with length of credited commissioned service rendered prior to November 11, 1918, and of course this service was measured as we have already shown, to the advantage of the Regulars and the disadvantage of the emergency officers.

On the other hand, the successful candidates for grades of captain and first lieutenant have contended and do contend that the examinations had determined their relative merit; that there had always been a distinction between the grades; that precedents of the past, notably in 1901, indicated that officers would be placed among other officers of their same grade; that in no armies of the world, where there was not a system of promotion by selection, could second lieutenants jump over captains; that they were placed in their grades by the act which stated that vacancies remaining (thereafter) should be filled by promotion, and that that, of course, meant that the vacancies would be at the foot of the grade and would be filled by the promotion of the seniors of the next lower grade; that their understanding and interpretation of the law was correct, and that under it the successful candidates for captain should have been arranged among themselves according to length of commissioned service and then, by the same rule, placed among the then regular captains; that the successful candidates for the grade of first lieutenant should have been similarly arranged among themselves and among the then first lieutenants of the Regular Army, and similarly for the second lieutenants.

Ever since that time the question has been presented at each session of Congress, so that no laches can be alleged.

PRECEDENTS IN THIS AND OTHER ARMIES

Testimony before this committee has been to the effect that in no army in the world where there is not selection are lieutenants thus jumped over captains. It was also shown that in 1901 officers were taken into the Army in grades higher than the lowest and that some made second lieutenants had more service than those made first lieutenants, but nevertheless they were arranged among the second lieutenants and not jumped over those appointed first lieutenants.

It also appeared that the very act under discussion provided that captains in the Judge Advocate General's Department should in the future be taken in and placed immediately below the junior captain of the Army, though it is, of course, apparent that such new captains would have less service than the first lieutenants and second lieutenants over whom they would be placed.

Furthermore, it was shown to the committee that in 1923 the present act was amended to provide that those officers originally appointed captains but demoted in the reduction of 1922 should be the first promoted back to captains, and such was established as the method of promotion from first lieutenants to captains—giving effect thus to the grade to which appointed.

It is not a satisfactory answer to say that certain captains by reason of their appointment in that grade are still drawing the pay of that grade, even though down among the lieutenants, and therefore have been benefited by the act. The fact remains that while the act specifically stated that the appointments should be made in the grade for which found qualified, nevertheless, under the operation of the promotion list as it was formed by the War Department many of those found qualified only as second lieutenants were promoted to captains and hundreds of them were promoted to first lieutenants, while other officers found fitted for original appointment as first lieutenants and captains are below them on the promotion list, and unless that list is revised and rearranged will remain below them for all time.

It is contended by some, and particularly by the beneficiaries of the present arrangement on the list, that the arrangement established in the committee bill herewith will nullify the provision of section 24a of the national defense act wherein it is stated that "in general the first name on the list shall be that of the officer having the longest commissioned service, the second name that of the officer having the next longest commissioned service, and so on."

There would be merit in this contention were the list actually arranged in that manner, but it was not so arranged because of the numerous exceptions to the rule contained in the act itself. In fact these exceptions are so numerous as to themselves result in setting aside that enunciated principle. These are some of the exceptions: The officers of 1901 are not so arranged on the list; the emergency officers appointed in the field grades are not so arranged; the National Guard officers who had border service are not so arranged; the combatant branch reserve officers who were called to active duty for attendance at training camps are not so arranged; the officers in company grades who had Spanish War service are not so arranged; the emergency officers in company grades are not so arranged; and the provisional Regular officers are not so arranged.

It appears further from the testimony presented to this committee that the promotion list as formed by the War Department in 1920 in accordance with its interpretation of the act has been decidedly injurious to the interests of the Army and does not result in a system of promotion based on equity and merit, so that it is contrary to the principle laid down by Congress in the first sentence of section 24a.

All of the general officers of the personnel board who testified before the committee stated that they thought a law which produced such a scrambling was wrong and that they never would have favored one producing such results.

A similar conclusion must be drawn from the remark contained in the report of the Secretary of War, which reads as follows:

"(c) Officers appointed July 1, 1920, are preceded on the promotion list by others appointed the same date in lower grades.

"This has operated to the disadvantage of about 900 officers appointed as captains who are preceded by younger officers appointed lieutenants. The disadvantage worked constitutes a material hardship and is inimical to the efficiency of the Army in that it places hundreds of officers in a submerged promotion status due to their being preceded by many hundreds of younger officers."

It is, therefore, the opinion of your committee that the present arrangement of officers on the promotion list, which scrambled captains, first lieutenants, and second lieutenants irrespective of grades, is contrary to the best interest of the service, and that the promotion list should be revised and rearranged as provided in the bill herewith.

Having reached that conclusion, the committee adopted as a principle the statement of General Walker, former Chief of Finance, that the correction of a wrong can not result in doing another injustice. It also adopted the principle that it was immaterial how many would be affected one way or the other.

Further, the committee was not concerned with the number of files which it was shown various individuals would drop or rise on the promotion list under the proposed bill. It was apparent that the number of files changed by a correct rearrangement was an accurate gauge of the benefits or injuries received under the present incorrect arrangement.

Those who most greatly benefited by the present arrangement are, of course, those who will and do claim to be most adversely affected and they may generally be grouped as the provisional second lieutenants of the Regular Army of June 5, 14, and 16, 1917, and those of

August 7–10, 1917; the former emergency officers who were appointed second lieutenants in 1920 as the result of the examinations; and a smaller number of former emergency officers who were appointed first lieutenants in 1920, but who have early dates for commencement of service.

LETTER JUST RECEIVED

MAY 21, 1928.

Hon. J. J. McSWAIN,
Washington, D. C.

DEAR SIR: Some time ago I received a copy of the speech which you made in support of your promotion bill. Since that time, as I understand, what I consider the essential part of your bill from my point of view has been incorporated in the revised Furlow bill as reported out of committee. As the Chief of Staff of the Army has recently announced his approval of the latter bill, I think there can be no impropriety in my writing to you on the subject.

I am one of the class of officers adversely affected by the War Department's interpretation of the act creating the original single list. A graduate of the first Fort Oglethorpe training camp, which you yourself attended, with uninterrupted service, originally appointed captain in 1920, and now 43 years old, I am preceded on the promotion list by hundreds of men far younger than I who were originally appointed in lower grades. My case is merely typical and has no special merit. There is something incongruous, and even absurd, in the sight of gray-haired captains marching on foot with their companies, led by a youthful major on horseback. It is not an unusual sight at present, and in a few years it will be a common one. Some of the younger officers who have benefited by our misfortune even see an element of humor in such a situation.

I do not propose to review the arguments, for you have heard them over and over again. However, I inclose a clipping from the last Army and Navy Journal which sums up the case rather well and to which I desire to invite your attention.

As a member of the Army and a South Carolinian (Lancaster County), I take the liberty of expressing my appreciation of the great interest you are taking in legislation for the benefit of the service.

Very sincerely,

———— ————,
Captain, Infantry.

FAVORS BLACK-M'SWAIN BILLS

EDITOR ARMY AND NAVY JOURNAL: Several letters have appeared against the Black and McSwain bills, but I have noticed none in favor of them in your paper. Fearing that our legislators may think there is no interest in these bills, and that those they are trying to help do not appreciate their efforts, I ask that you publish this in your issue.

It appears to me that the letter in your issue of April 28, signed A. B. C., is rather misleading and somewhat biased. He states that 2,500 officers would lose and from 1,800 to 2,000 officers would gain if these bills are passed. These figures are evidently taken from a quick and acknowledgedly rough estimate contained in the testimony of Major Summers, published in your same issue. From his testimony, the major is not an enthusiastic supporter of either bill. This is well evidenced by the examples he cited as to the effect of the bill. Even accepting these figures as correct, should not the fact that justice is being done to 2,000 officers outweigh the fact that 2,500 other officers will have to wait a few more years for promotion? Particularly when it is acknowledged that the 2,000 are, in most cases, older men than the 2,500 and will reach retirement age more quickly, thereby making places for those who are now held up. In other words, while these 2,500 (provisionals mostly) will not gain their majority so soon they will eventually be eligible for the highest rank, whereas some 1,400 emergency officers will be retired before they can possibly reach the grade of colonel, under the present conditions.

In the first training camp an opportunity was given all men under 27 years of age (29 in the engineers) to take the examination for provisional second lieutenant. Six hundred and thirty-five of these, who took the examination, were successful, and all of them (then first lieutenants in the Regular Army) were placed ahead of those of us who were examined in 1920 and commissioned captains. Most of us could not take these examinations because we were too old. Yet this very fact, and the further fact that many of us were married, meant that we would not be drafted and were offering our service without any thought of later compulsion. In addition we were also passed on the promotion list by a number of second lieutenants, who had a few months, weeks, or even days more commissioned service than we.

It is useless to go into the details of what we consider our injustices. They have been outlined very fully and ably in the report of the Senate committee on the Black bill, published in your issue of April 21. If one has read that and is not persuaded of the justice of our cause, nothing I can say will alter his opinion. I can not believe that the majority of those whose promotion will be retarded by the operation of these bills will become disgruntled because justice will be done to others, even at their expense. As we see it, the position they occupy is the result of a misinterpretation of the law, and it is a fact that many of them did not expect this preference when they accepted their first commission in the Regular Army. Some few, who had inside information as to the way the law was to be administered, did expect this, but it was the exception. Practically as a unit the emergency officers who came in in 1920 were led to expect that captains would be graded amongst themselves, first lieutenants amongst themselves, and second lieutenants amongst themselves.

If this was not the way the law was expected to be applied in June, 1920, why did the examining boards go to the trouble of preparing one examination for candidates for captain, a different one for candidates for first lieutenant, and still a third for second lieutenant? And why were we recommended for one of these grades and commission in that grade actually issued and accepted by us as a captain or a lieutenant?

A. B. C. has called the Black-McSwain bill unjust, but he failed to point out wherein the injustice lies. There are, undoubtedly, many injustices to individuals and to classes in the present promotion list. The War Department acknowledges this. Why not accept this opportunity to correct the acknowledged injustice to several thousand officers, with the minimum of injury to others?

I believe that the Black bill should be passed because it gives the bulk of emergency officers the position these officers believed they were to have when they accepted their permanent commission; this was based on the wording of the law, the action of the examining boards, and the issuance of commissions in the grade for which recommended by these boards;

It aids materially in placing the older men above the younger in the "hump";

It provides for promotion for length of service; the liberal retirement features will accelerate promotion; no one is to be forced out and no officer demoted by any provision therein;

It is the only bill I have seen which attempts justice to those who abandoned their civil occupations because they loved the service, and at the same time it combines the best features of many other bills.

CAPTAIN.

EXTENSION OF REMARKS—BOULDER DAM

Mr. SMITH. Mr. Speaker, I ask unanimous consent that all Members who desire to do so may extend their remarks on H. R. 5773 for five legislative days.

The SPEAKER. The gentleman from Idaho asks unanimous consent that all Members may extend their remarks on House bill 5773 for five legislative days. Is there objection?

There was no objection.

Mr. EVANS of California. Mr. Speaker, in the time allotted to me, I shall attempt to direct the attention of the committee to the part that is being taken in this proposed legislation by the city of Los Angeles and the communities adjacent to that city, or, in other words, the part that is being taken by that section of country known as the coastal belt in southern California. In this connection I want to emphasize one thing, and that is there is a vital distinction between Los Angeles and all the rest of this section comprising the coastal belt. The impression one ordinarily gets from hearing this section mentioned is that it is all Los Angeles. This is decidedly not the case. The city of Los Angeles, it is true, is the metropolitan center of this section, a city of approximately a million and a quarter people, but there are more than this many people residing outside of the city and in close proximity therewith than are within the boundaries of the city. There are more than 50 incorporated cities within a radius of 60 miles of the city of Los Angeles with populations from 140,000 down. These cities are all connected with each other by highly developed and thickly settled urban territory. It is with these outside sections in mind I wish to speak particularly.

I share with the people of the country the deep interest in protecting Imperial Valley from flood menace. We realize how grave this menace is. If such a catastrophe comes to Imperial Valley as came to the Mississippi Valley during the last year, and which is altogether not only probable but practically certain if relief is not afforded, this Congress would no doubt hasten to spend even more money, if necessary, for the protection of life and property in that valley than is called for in this bill; that is to say, that after the disaster has come and we have visualized the gravity of its consequences we would be ready to respond in an effort to relieve, but often after it is too late. But that feature of the legislation will be covered by my colleague from California, Mr. SWING, who is a resident of that valley and who is better informed as to the condition that prevails there than any other man, either inside or outside of this Congress.

The gentleman from Nevada [Mr. ARENTZ] on yesterday stated that he had lived with this project for the improvement of the Colorado River for the past six or seven years and that he had come to the point where he considered that it was almost a part of himself. I dislike to refer to my own experience in matters

of this kind, but it is consistent for me to say that I have lived with the water problems of Los Angeles and vicinity for the past 15 years. There has not been one day during that time up until a year and a half ago that I have not been directly connected with one or more pieces of litigation involving water rights in this section, which litigation involved the title and amount of water that is there and the condition of the water level in different sections of this coastal belt.

The gentleman from Utah [Mr. LEATHERWOOD] yesterday stated that upon investigation it had been ascertained that this section had available sufficient water for its use for the next 50 years and that all this claim of water scarcity in Los Angeles and vicinity was a fraud, sham, and delusion. If all the engineers of Utah, of Arizona, and of California, and all the Congressmen from these and all the other States of the Colorado River Basin, should come here and state to this committee that the water level in this section was not being depressed at an alarming rate and that this section was not approaching a crisis in the matter of a water supply, I for one would know that the statement was not true. I would know this from what I have seen with my own eyes and from investigations that I have personally made, from scores of measurements of wells that I have witnessed being made during the past years at different points in that section.

What are the actual facts with reference to this water supply in the city of Los Angeles and adjacent communities? Here are the facts and the figures: In the city of Los Angeles there is available from local sources 139 second-feet. The Los Angeles aqueduct, which brings water in from Owens Valley, a distance of 256 miles, has a total capacity of 400 second-feet, which amounts in all to 539 second-feet total capacity for the city. During the past three years the Los Angeles aqueduct has carried into the city of Los Angeles an average of 266 second-feet, which was all that was available from that source. While the aqueduct has a capacity of 400 second-feet, there is no certainty that the city will obtain the full capacity. In fact, it never has been able to receive the full capacity, and probably never will.

It can only receive the amount that is available in the valley, and this depends entirely on the rainfall and the snow in the mountains above. So I say that during the past three years, when the demand has been probably the greatest ever in history, the average has been only 266 second-feet. When this amount is added to the local supply of 139 second-feet it will be shown that the city of Los Angeles has for the past three years used an average amount of 405 second-feet for a population of at least a million and a quarter people. If the population continues to increase at the rate of 100,000 a year, as it has in the past few years, the city will have 2,500,000 twelve years from now, or double the population it now has. If it requires 405 second-feet to supply one and a quarter million at this time, it undoubtedly will require twice that amount, or 810 second-feet to supply the 2,500,000 twelve years from now. Instead of having a requirement of 810 second-feet twelve years from now, if steps are not taken to augment the supply the city will find itself short the difference between 810 second-feet and the 539 second-feet available, or 141 second-feet below the necessary amount for the population that will be there.

It ought not to require a great deal of argument on the part of the people of this section to convince the members of this committee and the public generally that the charges made against the people of the Los Angeles territory are utterly untrue, as well as ludicrously stupid. In pursuing such a course the people of this section would have everything to lose and nothing to gain. If this area had a reliable and sufficient water supply for the next 50 years it would be the proudest boast of their whole history; to make it known to the world would be of greater economic value than could be bought by the expenditure of hundreds of millions of dollars.

There is no possible way that this section could be benefited by advertising to the world a pending water shortage when in fact none existed.

Instead of concealing the facts regarding their water supply, the people of this section have endeavored to place before the committee, and will place before Congress, a true statement of the conditions as greatly as they regret the necessity therefor. The conditions as herein set forth exist, nevertheless, and it is the duty as well as the obligation of the people to make known the facts in their true light and in time to meet the shortage with which the section is inevitably faced.

In order to arrive at a safe estimation as to how long the present supply of this section will be sufficient it is necessary to take into consideration only two major factors; first, the amount of water available from all sources, and, second, the present population and the rate of increase in population. For the purpose of dealing with the first factor it is known that water reaches this area from two, and only two, sources—the rainfall and the supply that is brought in from the Owens River through the Los Angeles aqueduct, over a distance of 250 miles. Rainfall records have been kept at probably more than a hundred points distributed over this area by the Government for the past 78 years and these are available and show a mean annual precipitation of 15 inches.

This entire precipitation falls in a period of about three months of the year, leaving the remaining nine months subject to extreme drought. The only means of conserving this rainfall is by storage reservoirs by which the storm run-off is held and retarded in the mountains, and by the natural storage capacity of the stream basins lying within this area. The underground storage is by far the most efficacious, as the low coastal belt is composed of soft deposits of gravel and detritus, which is of great depth and capable of retaining a large amount of saturation. This section is compelled to rely almost entirely on this underground storage to bridge over the cycle of dry years that come more or less at regular intervals. This precipitation is very erratic in quantity and ranges from 5 inches per annum to as high as 38 inches. A large portion of this water sinks into the soil of this coastal belt and becomes available by pumping for domestic use. This source of supply amounts to approximately 139 second-feet, together with the 400 second-feet afforded by the Owens River Aqueduct, making a total of approximately 539 second-feet for the city of Los Angeles proper, which is materially greater than is available for that part of the area outside of the city of Los Angeles which has not the benefit of the aqueduct water. By the use of every possible means of conservation, through storage reservoirs in the mountains and using every means to intercept the rainfall and cause it to lodge in the soft sand, gravel, and detritus, of which the soil of this coastal belt is characteristic, there is available from all sources a total of 539 second-feet, with the city of Los Angeles being preferred by reason of having the exclusive use of the 400 second-feet coming from the aqueduct.

But this condition in Los Angeles city proper is in no sense comparable to the condition that exists outside the city of Los Angeles. Bear in mind that the people outside the city of Los Angeles have no interest in, nor receive any of the benefits from, the Los Angeles aqueduct of 400 second-feet. They are left to rely on local developments, and it is in these sections that the crisis is rapidly approaching.

At this point I want to read to the committee a telegram received from the chief engineer of the water department of the city of Pasadena. This, gentlemen of the committee, is fairly typical and representative of the attitude of the people of the cities of this coastal belt, and also gives a short description of the conditions as exist in that section. It is typical also of telegrams that I have received since this bill has been up at this session of Congress from the 40 to 50 other cities of this section. It reads as follows:

Hon. W. E. EVANS,

House of Representatives, Washington, D. C.:

The city of Pasadena is an active supporter of legislation leading to construction of the Boulder Canyon Dam in the belief that only from the Colorado River can an adequate domestic water supply be secured for the cities, towns, and communities of southern California. While we are directly interested in the regulation of the river for flood control and irrigation, Pasadena's prime interest in the Boulder Dam project is in the procurement of an adequate water supply.

Pasadena's present surface and ground water supplies are overdrawn beyond their safe yield, not only by Pasadena, but by the following additional incorporated cities: South Pasadena, San Marino, Alhambra, San Gabriel, Sierra Madre, Arcadia, Monrovia, and communities of La Canada, Flintridge, and Altadena, whose combined drafts with that of Pasadena result in a present overdraft of 9,000,000 gallons daily in excess of the average replenishment, which has resulted in a recession in ground water levels of 65 to 80 feet in 11 years, until our pumps are now placed 300 feet below the surface of the ground. Pasadena alone has grown in population from 45,000 in 1920 to present 80,000, and in assessed valuation from $73,000,000 to $188,000,000, and in use of water from 7,000,000 to 12,000,000 gallons daily in same period. Above listed neighboring communities drawing upon same source of water supply are growing at even greater rates. The immediate and future welfare of Pasadena depends upon prompt procurement of additional water supply not possible to develop from local sources. Wherefore, Pasadena urges upon you and your colleagues the enactment of the Boulder Dam legislation.

CITY OF PASADENA,
By SAMUEL B. MORRIS,
Chief Engineer Water Department.

This telegram points out the fact that the water level in this city is being reduced.

In support of this statement with reference to the rapidity with which the water supply in this section is approaching inadequacy, certain statistical facts are interesting relative to the varying conditions of the water plane in the coastal belt.

The water level in this section has gradually dropped during the past few years to an alarming extent. It is a matter of but a few years ago when there were to be found scattered over this basin a number of artesian or self-flowing wells. Practically all, if not entirely all, have disappeared during the very recent years. Records are being made of the water plane throughout this basin and show a gradual decrease from 2½ to 3½ feet per year, according to the particular location in the basin. A certain well-known well situated southeasterly of the city of Los Angeles on what is known as the Santa Ana part of the basin yielded until recent years a flow which under its own pressure stood 60 feet above the ground surface. The water level in that same well is now 50 feet below the ground surface. Another well, located in the San Fernando Valley, which is quite typical and representative of that basin, has dropped a distance of about 60 feet during the past 20 years. It is a fact subject to positive and conclusive demonstration that the water plane in this entire metropolitan area is being gradually depressed at an enormous rate, and that at the present rate of increase of population will necessarily soon become completely exhausted.

I submit, in all sincerity, that any claim or representation on the part of the opponents of this legislation that the water scarcity in southern California is exaggerated by the people of that section is unwarranted and wholly without support in fact. There could be no possible reason why the people of that section would exaggerate the condition.

The question has been asked during the course of the debate on this bill, and properly asked, What assurance will the Government have of being reimbursed in the amount that it advances for the construction of this project? The bill provides that no work shall begin or no money be expended until the Secretary of the Interior shall have received and approved valid contracts on the part of the communities benefited, agreeing to take the water and the power from this dam in the quantity and at a rate that will return to the Government the full amount expended, along with interest at 4 per cent, in a period not exceeding 50 years. This sounds practical and businesslike. The only question that may remain in the minds of members of the committee is as to the responsibility of the contracts. Let us see for a moment what will be behind the contracts for water and for power. The State of California has recently enacted a law providing for the formation of a great metropolitan water district, embracing all the cities of the coastal belt and other property within this section not included within the cities, authorizing the said district to issue bonds up to 15 per cent of the assessed valuation of the property in the district, to pay for water and power received by the district. The assessed valuation of the property of this district, which will be behind the bonds that will be issued, has been estimated conservatively at $2,000,000,000. So it will readily be seen that the bonding capacity of this district, even on the basis of an assessed valuation of $2,000,000,000, will be $300,000,000.

So, in answer to the gentlemen, we feel secure in saying that a bonding capacity of $300,000,000, secured by assessed valuation of over $2,000,000,000, is a safe guaranty to the Government for the payment of the money advanced on this project.

I submit, gentlemen of the committee, that this legislation is urgently needed; that it is fair, clean, and businesslike; that it is based on principles economically sound; and that in all good conscience it should be enacted by this Congress.

ORDER OF BUSINESS

Mr. BANKHEAD. At this time is the majority leader prepared to make any announcement about a night session for tomorrow night? There has been some report that the gentleman was going to ask for a night session in order to consider bills on the Private Calendar.

Mr. TILSON. I had not thought of doing that earlier than Friday night. If we do not have the regular Friday for the Private Calendar, I think I shall ask for a night session Friday night.

Mr. HASTINGS. For the consideration of the Private Calendar?

Mr. TILSON. Yes.

Mr. LOWREY. I want to say to the majority leader that many Members are getting very much interested about the Private Calendar and the Consent Calendar, and I think they would be glad to do some night work.

Mr. TILSON. Well, they may get the opportunity.

Mr. LOWREY. I hope so.

MUSCLE SHOALS

Mr. CHINDBLOM. Mr. Speaker, may I inquire as to the parliamentary situation with reference to the Muscle Shoals bill? I am informed that the Senate took action recommitting the bill. The House conferees have reported to the House.

Mr. LAGUARDIA. The Senate did not take action to recommit the bill but to recommit it to the conferees.

Mr. CRAMTON. There is a message to the House of that action by the Senate.

The SPEAKER. But it requires no action by the House.

Mr. CHINDBLOM. Had not the House conferees reported to the House?

The SPEAKER. But the House has not acted on the conference report. The managers are still in existence, and the Chair was given to understand that the conferees will meet to-night and hope to reach an agreement.

Mr. TILSON. The papers are with the conferees on the part of the Senate.

The SPEAKER. They are.

Mr. BANKHEAD. Mr. Speaker, as I understand, in answering the parliamentary inquiry of the gentleman from Illinois, the Chair stated that no action on the part of the House is necessary.

The SPEAKER. That is correct.

SENATE BILL REFERRED

A bill of the following title was taken from the Speaker's table, and, under the rule, referred to the appropriate committee, as follows:

S. 4063. An act to amend certain sections of the teachers' salary act, approved June 4, 1924, and for other purposes; to the Committee on the District of Columbia.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 2808. An act for the relief of Ella G. Richter, daughter of Henry W. Richter;

H. R. 5475. An act authorizing the New Cumberland Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near New Cumberland, W. Va.;

H. R. 5898. An act to authorize certain officers of the United States Army, Navy, and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered;

H. R. 6569. An act for the relief of Frank Hartman;

H. R. 8926. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across Red River at or near Garland City, Ark.;

H. R. 10014. An act for the relief of A. F. Gallagher;

H. R. 12479. An act authorizing the sale of all of the interest and rights of the United States of America in the Columbia Arsenal property, situated in the ninth civil district of Maury County, Tenn., and providing that the net fund be deposited in the military post construction fund;

H. R. 12676. An act to amend section 2 of an act approved February 14, 1926, granting consent of Congress for the construction of a bridge across Red River at or near Fulton, Ark.;

H. R. 12677. An act to amend section 2 of an act approved March 12, 1928, granting consent of Congress for the construction of a bridge across the Ouachita River at or near Calion, Ark.;

H. R. 12821. An act to authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes; and

H. R. 13342. An act to authorize a per capita payment to the Pine Ridge Sioux Indians of South Dakota.

The SPEAKER announced his signature to enrolled bills and a joint resolution of the Senate of the following titles:

S. 1145. An act to authorize an appropriation for roads on Indian reservations;

S. 2965. An act authorizing the State of Indiana, acting by and through the State highway commission, to construct, maintain, and operate a toll bridge across the Wabash River, at or near Vincennes, Ind.;

S. 3864. An act to create a new division of the District Court of the United States for the Northern District of Texas; and

S. J. Res. 23. Joint resolution providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army,

and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval bills of the following titles:

H. R. 971. An act for the relief of James K. P. Welch; and

H. R. 12821. An act to authorize an appropriation to provide additional hospital domiciliary and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes.

ADJOURNMENT

Mr. SMITH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 16 minutes p. m.) the House adjourned until to-morrow, Thursday, May 24, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Thursday, May 24, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON BANKING AND CURRENCY

(10.30 a. m.)

To amend the act approved December 23, 1913, known as the Federal reserve act; to define certain policies toward which the powers of the Federal reserve system shall be directed; to further promote the maintenance of a stable gold standard; to promote the stability of commerce, industry, agriculture, and employment; to assist in realizing a more stable purchasing power of the dollar (H. R. 11806).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To regulate the distribution and promotion of commissioned officers of the line of the Navy (H. R. 13683).

COMMITTEE ON THE JUDICIARY

(10 a. m.)

To amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity (H. R. 7759).

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. SNELL: Committee on Rules. H. Res. 221. A resolution providing for the consideration of H. J. Res. 247, a joint resolution to authorize the Secretary of the Treasury to cooperate with the other relief-creditor governments in making it possible for Austria to float a loan in order to obtain funds for the furtherance of its reconstruction program, and to conclude an agreement for the settlement of the indebtedness of Austria to the United States; without amendment (Rept. No. 1826). Referred to the House Calendar.

Mr. SNELL: Committee on Rules. H. Res. 222. A resolution providing for the consideration of S. 1727, an act to amend the act entitled "An act to amend the act entitled 'An act for the retirement of employees in the classified civil service, and for other purposes,' approved May 22, 1920, and acts in amendment thereof," approved July 3, 1926, as amended; without amendment (Rept. No. 1827). Referred to the House Calendar.

Mr. LOWREY: Committee on Coinage, Weights, and Measures. H. R. 12451. A bill to establish an assay office at Dahlonega, Lumpkin County, Ga.; with amendment (Rept. No. 1829). Referred to the Committee of the Whole House on the state of the Union.

Mr. JEFFERS: Committee on the Civil Service. H. J. Res. 238. A joint resolution providing for the granting of veterans' preference in civil-service examinations; with amendment (Rept. No. 1830). Referred to the House Calendar.

Mr. RAMSEYER: Committee on the Post Office and Post Roads. H. R. 13449. A bill to provide for the promotion of clerks and general mechanics in the motor-vehicle service; without amendment (Rept. No. 1835). Referred to the Committee of the Whole House on the state of the Union.

Mr. RAMSEYER: Committee on the Post Office and Post Roads. H. R. 13450. A bill to provide for the promotion of clerks, general mechanics, driver mechanics, and garagemen drivers in the motor-vehicle service; without amendment (Rept. No. 1836). Referred to the Committee of the Whole House on the state of the Union.

Mr. ZIHLMAN: Committee on the District of Columbia. H. J. Res. 307. A joint resolution to preserve for development the potential water power and park facilities of the gorge and Great Falls of the Potomac River; with amendment (Rept. No. 1837). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. WAINWRIGHT: Committee on Military Affairs. H. R. 10812. A bill for the relief of Donald M. Davidson; without amendment (Rept. No. 1831). Referred to the Committee of the Whole House.

Mr. HOFFMAN: Committee on Military Affairs. H. R. 11181. A bill for the relief of William Parish; with amendment (Rept. No. 1832). Referred to the Committee of the Whole House.

Mr. WHITE of Colorado: Committee on the Public Lands. S. 4327. An act to relinquish the title of the United States to land in the claim of Seth Dean, situate in the county of Washington, State of Alabama; without amendment (Rept. No. 1833). Referred to the Committee of the Whole House.

Mr. JAMES: Committee on Military Affairs. H. R. 13440. A bill for the relief of Howard P. Milligan; with amendment (Rept. No. 1834). Referred to the Committee of the Whole House.

Mr. HILL of Washington: Committee on the Public Lands. H. R. 12322. A bill to quiet title and possession with respect to certain lands in Faulkner County, Ark.; with amendment (Rept. No. 1838). Referred to the Committee of the Whole House.

Mr. LUCE: Committee on the Library. H. R. 12456. A bill awarding a congressional medal of honor to Lincoln Ellsworth; with amendment (Rept. 1839). Referred to the Committee of the Whole House.

Mr. REECE: Committee on Military Affairs. H. R. 13633. A bill for the relief of Martin G. Schenck, alias Martin G. Schanck; without amendment (Rept. No. 1843). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 13894) granting an increase of pension to Josephine Alexander, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. JENKINS: A bill (H. R. 13976) granting the consent of Congress to the International Business Co. (Inc.) and its successors and assigns, to construct a bridge across the Ohio River at or near Ashland, Ky.; to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH: A bill (H. R. 13977) authorizing the Secretary of the Interior, through the Commissioner of Indian Affairs, to settle claims by greement arising under operation of Indian irrigation projects; to the Committee on Indian Affairs.

By Mr. SNELL (by request): A bill (H. R. 13978) to amend section 5 of the act of March 2, 1895, relating to official bonds; to the Committee on the Judiciary.

By Mr. WYANT: A bill (H. R. 13979) to provide for the erection of a monument upon the Bushy Run battle field, in Westmoreland County, Pa.; to the Committee on the Library.

Also, a bill (H. R. 13980) to provide for the erection of a monument at the grave of Gen. Arthur St. Clair, at Greensburg, Pa.; to the Committee on the Library.

By Mr. GRAHAM: A bill (H. R. 13981) to permit the United States to be made a party defendant in certain cases; to the Committee on the Judiciary.

By Mr. KVALE: A bill (H. R. 13982) to fix the time for the meeting of the Seventy-first Congress; to the Committee on the Judiciary.

By Mr. McLEOD: A bill (H. R. 13983) to require the Director of the United States Veterans' Bureau to provide a flag hereafter to drape the casket of each deceased veteran not dishonorably discharged, and for other purposes; to the Committee on World War Veterans' Legislation.

By Mr. SINNOTT: Joint resolution (H. J. Res. 318) amending the joint resolution entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjust-

ment of the Northern Pacific land grants, and for other purposes," approved June 5, 1924 (43 Stat. 461), as amended by the joint resolution approved March 3, 1927 (44 Stat. 1405); to the Committee on the Public Lands.

By Mr. LINTHICUM: Joint resolution (H. J. Res. 319) to provide for discontinuing at Baltimore the use of the buildings formerly erected as an immigration station, and the grounds adjacent to Fort McHenry Military Reservation and National Shrine, as prohibition enforcement headquarters; to the Committee on Ways and Means.

By Mr. REED of New York: Concurrent resolution (H. Con. Res. 40) to provide for the printing of additional copies of the hearings held before the Committee on Education of the House of Representatives on the bill to create a department of education; to the Committee on Printing.

By Mr. BOYLAN: Resolution (H. Res. 223) to pay officers and employees of the House of Representatives, including the office of the legislative counsel, their respective salaries on the 1st and 15th days of each month; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DEMPSEY: A bill (H. R. 13984) to authorize the President to present the distinguished-service cross to Pvt. Wilton E. Kilmer; to the Committee on Military Affairs.

By Mr. GREGORY: A bill (H. R. 13985) granting a pension to Sarah Elizabeth Skaggs; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13986) for the relief of Arthur B. Fleming; to the Committee on Military Affairs.

By Mr. HILL of Washington: A bill (H. R. 13987) for the relief of Herman Wulff; to the Committee on Military Affairs.

By Mr. HOWARD of Oklahoma: A bill (H. R. 13988) for the relief of Peter Shapp; to the Committee on Indian Affairs.

By Mr. IRWIN: A bill (H. R. 13989) granting a pension to Louis M. Hampton; to the Committee on Pensions.

By Mr. JAMES: A bill (H. R. 13990) to authorize the President to present the distinguished flying cross to Orville Wright; to the Committee on Military Affairs.

By Mr. KNUTSON: A bill (H. R. 13991) granting an increase of pension to Martha H. French; to the Committee on Pensions.

By Mr. LEAVITT: A bill (H. R. 13992) for the relief of N. P. Nelson & Co.; to the Committee on Claims.

By Mr. WILSON of Louisiana: A bill (H. R. 13993) authorizing the President to reappoint Briscoe A. Trousdale, jr., formerly a second lieutenant of Field Artillery, an officer of Field Artillery, United States Army; to the Committee on Military Affairs.

By Mr. WOLVERTON: A bill (H. R. 13994) granting a pension to Mary Vanderherchen; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7749. By Mr. DEMPSEY: Petition of citizens of Rochester, N. Y., urging passage of House Joint Resolution 27; to the Committee on the Library.

7750. By Mr. FITZPATRICK: Petition of Federal Grand Jury Association for the Southern District of New York City, N. Y., opposing the passage of the Senate bill purporting to take from the Federal judges their ancient power freely to comment upon the evidence in trials by jury; to the Committee on the Judiciary.

7751. By Mr. O'CONNELL: Petition of Brooklyn Chamber of Commerce, Brooklyn, N. Y., favoring the passage of House bill 12578, to authorize certain carriers to extend credit on freight transported; to the Committee on Interstate and Foreign Commerce.

7752. Also, petition of the American Agricultural Chemical Co., New York, opposing the conference report on Muscle Shoals; to the Committee on Military Affairs.

7753. Also, petition of Baugh & Sons, Baltimore, Md., opposing the conference report on Muscle Shoals; to the Committee on Military Affairs.

7754. Also, petition of Hilda Rabenbauer, Brooklyn, N. Y., opposing the passage of the conference report on Muscle Shoals; to the Committee on Military Affairs.

7755. By Mr. QUAYLE: Petition of Baugh & Sons, Baltimore, Md., opposing the Muscle Shoals bill as agreed by the conferees; to the Committee on Agriculture.

7756. Also, petition of Brooklyn Chamber of Commerce, Brooklyn, N. Y., favoring the passage of House bill 12578, to authorize certain carriers to extend credit on freight transported; to the Committee on Interstate and Foreign Commerce.

7757. Also, petition of the American Agricultural Chemical Co., New York City, opposing the Muscle Shoals bill as agreed to by the conferees; to the Committee on Agriculture.

7758. Also, petition of William H. Shute, John MacMurray, M. Stanford, John Botts, Ralph E. Carter, G. A. Gildersleeve, F. W. Watson, and W. S. Welshonce, of Brooklyn, N. Y., and G. M. Barnes and Edward Fales, of Long Island, favoring the passage of House bill 12032 (Navy warrant officers' pay bill); to the Committee on Naval Affairs.

7759. Also, petition of National Fertilizer Association, of Washington, D. C., opposing the report of the conferees on the Muscle Shoals bill; to the Committee on Agriculture.

7760. Also, petition of Federal Grand Jury Association, of New York City, opposing the passage of Senate bill purporting to take from the Federal judges their ancient power freely to comment upon the evidence in trials by jury; to the Committee on the Judiciary.

7761. Also, petition of American Association Creamery Butter Manufacturers, of Washington, D. C., favoring the passage of House bill 10958, amending the oleomargarine law; to the Committee on Agriculture.

7762. By Mr. YATES: Petition of voters of Chicago, Ill., urging the passage of a pension bill increasing the pensions of widows of Civil War veterans to $50 per month; to the Committee on Invalid Pensions.

SENATE

THURSDAY, *May 24, 1928*

(Legislative day of Thursday, May 3, 1928)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	McKellar	Shipstead
Barkley	Fletcher	McLean	Shortridge
Bayard	George	McMaster	Simmons
Bingham	Gerry	McNary	Smith
Black	Gillett	Mayfield	Smoot
Blaine	Glass	Metcalf	Steck
Blease	Greene	Moses	Steiwer
Borah	Hale	Norris	Stephens
Bratton	Harris	Nye	Swanson
Brookhart	Harrison	Oddie	Thomas
Bruce	Hawes	Overman	Tydings
Caraway	Hayden	Phipps	Tyson
Copeland	Heflin	Pine	Vandenberg
Couzens	Howell	Pittman	Wagner
Curtis	Johnson	Reed, Mo.	Walsh, Mass.
Cutting	Kendrick	Reed, Pa.	Walsh, Mont.
Dale	Keyes	Robinson, Ark.	Warren
Deneen	King	Sackett	Waterman
Dill	La Follette	Schall	Wheeler
Edge	Locher	Sheppard	

Mr. McMASTER. I desire to announce that my colleague the senior Senator from South Dakota [Mr. NORBECK] is detained at home because of illness. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Seventy-nine Senators having answered to their names, a quorum is present.

NIGHT WORK IN THE POSTAL SERVICE—VETO MESSAGE

The VICE PRESIDENT. In accordance with the unanimous-consent agreement of yesterday, the Chair lays before the Senate the veto message of the President of the United States of the bill (H. R. 5681) to provide a differential pay for night work in the Postal Service. The question is, Shall the bill pass, the objections of the President to contrary notwithstanding? The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. McKELLAR (when Mr. NEELY's name was called), The senior Senator from West Virginia [Mr. NEELY] is unavoidably absent. If he were present, he would vote "yea."

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES], who is detained from the Senate on account of illness. I transfer that pair to the senior Senator from Louisiana [Mr. RANSDELL] and vote "yea."

The roll call was concluded.

Mr. BROUSSARD. I desire to announce that my colleague the senior Senator from Louisiana [Mr. RANSDELL] is unavoidably absent. I wish this announcement to stand for the day.

Mr. FLETCHER. I wish to announce that my colleague the junior Senator from Florida [Mr. TRAMMELL] is unavoid-

ably absent. I ask that this announcement may stand for the day. If my colleague were present, he would vote "yea."

Mr. NYE. I desire to announce that my colleague the senior Senator from North Dakota [Mr. FRAZIER] is unavoidably absent. If he were present, he would vote "yea."

Mr. McMASTER. I desire to announce that my colleague the senior Senator from South Dakota [Mr. NORBECK], if present, would vote "nay."

Mr. TYSON (after having voted in the affirmative). On this vote I have a pair with the junior Senator from West Virginia [Mr. GOFF]. I transfer that pair to the senior Senator from West Virginia [Mr. NEELY] and let my vote stand.

Mr. GERRY. I desire to announce that the junior Senator from New Jersey [Mr. EDWARDS] is unavoidably absent on account of illness in his family. If present, he would vote "yea."

Mr. CURTIS. I wish to announce that on this question the Senator from North Dakota [Mr. FRAZIER] and the Senator from Florida [Mr. TRAMMELL] are paired with the Senator from Delaware [Mr. DU PONT]. If present, the Senator from North Dakota and the Senator from Florida would vote "yea" and the Senator from Delaware would vote "nay."

I also desire to announce that on this vote the senior Senator from Indiana [Mr. WATSON] and the junior Senator from Indiana [Mr. ROBINSON] are paired with the senior Senator from South Dakota [Mr. NORBECK]. If present, the Senators from Indiana would vote "yea" and the Senator from South Dakota would vote "nay."

The roll call resulted—yeas 70, nays 9, as follows:

YEAS—70

Ashurst	Edge	McKellar	Shipstead
Barkley	Fess	McLean	Shortridge
Bayard	Fletcher	McMaster	Simmons
Black	George	McNary	Smith
Blaine	Gerry	Mayfield	Steck
Blease	Glass	Moses	Stephens
Borah	Hale	Norris	Swanson
Bratton	Harris	Nye	Thomas
Brookhart	Harrison	Oddie	Tydings
Broussard	Hawes	Overman	Tyson
Bruce	Hayden	Pine	Vandenberg
Caraway	Heflin	Pittman	Wagner
Copeland	Howell	Reed, Mo.	Walsh, Mass.
Couzens	Johnson	Reed, Pa.	Walsh, Mont.
Cutting	Kendrick	Robinson, Ark.	Waterman
Dale	Keyes	Sackett	Wheeler
Deneen	La Follette	Schall	
Dill	Locher	Sheppard	

NAYS—9

Bingham	Greene	Phipps	Steiwer
Curtis	Metcalf	Smoot	Warren
Gillett			

NOT VOTING—15

Capper	Goff	King	Robinson, Ind.
du Pont	Gooding	Neely	Trammell
Edwards	Gould	Norbeck	Watson
Frazier	Jones	Ransdell	

The VICE PRESIDENT. The yeas are 70 and the nays are 9. Two-thirds of the Senators present having voted in the affirmative, the bill is passed.

ALLOWANCES TO FOURTH-CLASS POSTMASTERS—VETO MESSAGE

The VICE PRESIDENT laid before the Senate a message from the House of Representatives announcing that the President of the United States had returned to the House of Representatives in which it originated the bill (H. R. 7900) granting allowances for rent, fuel, light, and equipment to postmasters of the fourth class, and for other purposes, and had proceeded in pursuance of the Constitution to reconsider the same and resolved that the bill do pass, two-thirds of the Representatives present voting in the affirmative.

The veto message of the President of the United States was read, as follows:

To the House of Representatives:

Herewith is returned, without approval, H. R. 7900, a bill granting allowances for rent, fuel, light, and equipment to postmasters of the fourth class, and for other purposes.

The bill would necessitate an increase of approximately $2,865,000 in the annual postal expenditures, based upon the aggregate compensation of postmasters of the fourth class for the fiscal year 1927. This amount would be increased or decreased as the compensation of postmasters for the fiscal year 1929 increases or decreases.

It is well known that fourth-class post offices are generally carried on in connection with the private business of the postmasters, usually in country stores, and are regarded as beneficial to the business. The space occupied is ordinarily insignificant and the location of the post office in the storerooms seldom involves additional expense for rent, light, and fuel.

The compensation of postmasters of the fourth class was materially increased by the act of June 5, 1920; again by the act of July 21, 1921; and again by the act approved February 28, 1925. In the debates preceding the passage of these acts the fact that postmasters at offices of the fourth class are required to furnish at their own expense quarters, including light and fuel, was brought out. It is not improbable, therefore, that part of the increase in compensation granted by these acts was due to the fact that the postmasters are required to furnish these facilities.

I believe that postmasters of fourth-class post offices are now reasonably compensated and, therefore, am not in favor of the additional compensation which this bill provides for.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 18, 1928.*

The VICE PRESIDENT. The question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding? The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. SWANSON. Making the same announcement as on the last roll call with regard to my pair with the senior Senator from Washington [Mr. JONES] and its transfer, I vote "yea."

The roll call was concluded.

Mr. McKELLAR. I desire to announce that the senior Senator from West Virginia [Mr. NEELY] is unavoidably absent. If he were present, he would vote "yea."

Mr. NYE. I desire again to announce that my colleague [Mr. FRAZIER] if present would vote "yea." I understand he is paired on this question with the Senator from Florida [Mr. TRAMMELL] and the Senator from Delaware [Mr. DU PONT].

Mr. TYSON. I desire to announce that I have a pair with the junior Senator from West Virginia [Mr. GOFF]. I do not know how he would vote on this question. Therefore I transfer my pair to the junior Senator from New Jersey [Mr. EDWARDS] and vote "yea."

Mr. CURTIS. I desire to announce the following special pairs on this vote:

The Senator from North Dakota [Mr. FRAZIER] and the Senator from Florida [Mr. TRAMMELL] with the Senator from Delaware [Mr. DU PONT]; and

The senior Senator from Indiana [Mr. WATSON] and the junior Senator from Indiana [Mr. ROBINSON] with the Senator from South Dakota [Mr. NORBECK].

If the Senator from North Dakota [Mr. FRAZIER], the Senator from Florida [Mr. TRAMMELL], the senior Senator from Indiana [Mr. WATSON], and the junior Senator from Indiana [Mr. ROBINSON] were present they would vote "yea," and the Senator from Delaware [Mr. DU PONT] and the Senator from South Dakota [Mr. NORBECK] would vote "nay."

Mr. GERRY. I wish again to announce that the junior Senator from New Jersey [Mr. EDWARDS] is detained from the Senate by illness in his family. If he were present, he would vote "yea."

The roll call resulted—yeas 63, nays 17, as follows:

YEAS—63

Ashurst	Dill	Locher	Shipstead
Barkley	Edge	McKellar	Shortridge
Bayard	George	McLean	Simmons
Black	Gerry	McMaster	Smith
Blaine	Glass	McNary	Steck
Blease	Hale	Mayfield	Stephens
Bratton	Harris	Moses	Swanson
Brookhart	Harrison	Norris	Thomas
Broussard	Hawes	Nye	Tydings
Bruce	Hayden	Oddie	Tyson
Caraway	Heflin	Pine	Vandenberg
Copeland	Howell	Pittman	Wagner

NOT VOTING—14

Capper	Goff	Neely	Trammell
du Pont	Gooding	Norbeck	Watson
Edwards	Gould	Ransdell	
Frazier	Jones	Robinson, Ind.	

The VICE PRESIDENT. On this question the yeas are 63, the nays 17. Two-thirds of the Senators present having voted in the affirmative, the bill is passed.

RURAL POST ROADS—VETO MESSAGE

Mr. ODDIE. Mr. President, I ask that the veto message on the roads bill be placed before the Senate.

The VICE PRESIDENT. The Chair lays before the Senate a message from the President of the United States. The message has been read.

Mr. ODDIE. Yes; the message has been read.

Mr. CURTIS. Mr. President, I ask that the message be again read. My recollection is that there were comparatively few Senators present when the message was read before.

The VICE PRESIDENT. The Secretary will read the veto message.

The Chief Clerk read as follows:

To the Senate:

There is returned herewith, without my approval, S. 3674, a bill to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes.

The bill would authorize appropriations of $3,500,000 each for the fiscal years 1929, 1930, and 1931 to be allocated to States having more than 5 per cent of their area in unappropriated or unreserved public lands, nontaxable Indian lands, or other Federal reservations, for the construction, by the Bureau of Public Roads, of the main roads through such lands.

From 1917 to 1929, inclusive, Federal appropriations aggregating $840,000,000 have been authorized for cooperative construction of rural post roads and appropriations aggregating $733,200,000 have been made to meet the requirements as they have developed. From 1922 to 1929, inclusive, Federal appropriations aggregating $58,000,000 have been authorized for forest-development roads and forest highways, and appropriations thereunder aggregating $54,055,000 have been made. From 1925 to 1929, inclusive, $10,000,000 have been appropriated for the construction of roads in national parks.

While expenditures from appropriations for cooperative construction of rural post roads are contingent upon equal contributions by State or local agencies, no such requirement obtains with reference to appropriations for roads in national forests and national parks, since such roads are required for the protection, administration, utilization, or development of Federal resources. The bill would provide for entire construction from Federal funds of main roads through unappropriated or unreserved public lands and nontaxable Indian lands. Such expenditures could not be justified on the basis of protection or development of Federal resources and would constitute a radical departure from the established policy of Federal aid on a cooperative basis in road construction.

Having in mind the increasing ability of the States to finance road construction due to the general adoption of the gasoline tax and the increase in revenue from this source which would accrue to States from roads constructed through public and Indian lands therein, I see no reason why the States should be relieved from their contribution toward the construction of these roads as required by existing law. I am constrained therefore to return this bill without my approval.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 18, 1928.*

Mr. ODDIE. Mr. President, I shall refrain from going into any lengthy debate on this road bill. I think in two minutes I can point out several very important items which I think will convince the Senate of the justness of this bill.

The President, I believe, has been wrongly informed by the Budget on some of the items that have been mentioned in his veto message. For instance, he speaks of the gasoline tax of which the States avail themselves for road work, but the records show that in most of the Western States—in fact, all of the public-land States but California—the gasoline-tax receipts are far below the amount these various States expend on their roads. Furthermore, the records show that under the present rate of building it would take many years for the States to complete their road systems in the national forests, Indian reservations, and on the public domain.

Mr. REED of Missouri. Mr. President, will the Senator yield for a question for information?

Mr. ODDIE. Yes; I yield to the Senator.

Mr. REED of Missouri. After these roads are built, is there anything in the bill imposing upon the States any duty to maintain them?

Mr. ODDIE. The States have to spend every dollar of the maintenance money on these roads on the public domain.

Mr. REED of Missouri. The States must keep them up?

Mr. ODDIE. Yes.

Mr. REED of Missouri. Therefore they need the gasoline tax with which to do that?

Mr. ODDIE. Yes; and the gasoline tax is not ample for that. The records show that the present building program of roads in the national forests will take many years for completion. For instance, in Arizona it will take 45 years to complete these roads, 95 years in California, 90 years in Colorado, 24 years in Idaho, 33 years in Montana, 55 years in Nevada, 30 years in New Mexico, 30 years in Oregon, 28 years in Utah, 8 years in Washington, and 31 years in Wyoming.

Mr. ROBINSON of Arkansas. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Arkansas?

Mr. ODDIE. I do.

Mr. ROBINSON of Arkansas. Attempting further to clear up the subject about which the Senator from Missouri asked the Senator from Nevada, as I understand the appropriations contemplated by this bill are to be applied in the construction and improvement of highways which come under the general road act of July 11, 1916; and that act contemplates arrangements with the States for the maintenance of all highways to which Federal aid has been contributed?

Mr. ODDIE. Yes; the Senator is correct.

Now, Mr. President, just one word about what these roads mean to the national forests. These forests comprise 160,000,000 acres of land owned by the Federal Government. They contain 600,000,000,000 feet of standing timber, and they contain our main watersheds of the western country. The preservation of the forests of our western country means the life of our Nation to a very large extent. Forest fires are destroying our forests to a tremendous extent; and by building these roads faster fire-fighting forces can be brought to these forest areas quickly and the fires extinguished more rapidly.

Mr. President, the problem is an economic one. The Western States are not asking anything unreasonable. They are doing more than their share in this road-building program; and in the interest of justice and of the building up of our economic industries and preserving our natural resources, I ask that this bill be passed.

Mr. BORAH. Mr. President——

Mr. ODDIE. I yield to the Senator from Idaho.

Mr. BORAH. How much is the general appropriation for roads this year?

Mr. ODDIE. The general appropriation is $75,000,000, and, in addition, $7,500,000 for roads in the national forests.

Mr. BORAH. This is in addition to that?

Mr. ODDIE. In addition to that.

Mr. BORAH. Seven million five hundred thousand dollars, and $75,000,000, and then this $3,000,000?

Mr. ODDIE. Three million five hundred thousand dollars for three years only.

The leading automobile and good roads organizations of the country have strongly indorsed this bill, among them being the American Automobile Association, the American Association of State Highway Officials, the Bureau of Public Roads, and others.

Mr. PITTMAN. Mr. President, this bill, of course, is intended for a special purpose. Under the general law now in existence, the Western States that have over 5 per cent of their areas in unappropriated, unreserved public lands are to-day cooperating with the Government in the building of roads on the public lands; but there are places, mind you, such as in northwestern Arizona, where an interstate road comes down through Utah, through a part of Arizona, Nevada, and California to the coast. But the area that is passed through in the northwest corner of Arizona is all public land. It is unoccupied; it is unimproved; no one lives there. It is all public land. When you come to that part of it, you have one little section there of a system of public roads that no one improves. The State of Arizona will not adopt it as a part of the State highway system because there is no taxable property in that county and the county does not want any road and it does not benefit the State of Arizona; and at the present time there is no authority for the Federal Government to build a road on that kind of land. The road law that we have was based upon the States building roads with Federal aid, and the State had to accept the proposition before the Government could spend a cent on a road; and one of the conditions was that the State had forever to maintain that road, on Government land.

In our State 87½ per cent of the area is public land, and yet we have to maintain forever those roads on that 87½ per cent. That is not the question, however. We come down now to a proposition where these interstate highways are going to be obstructed, because there is no existing law under which such areas can be improved unless we do pass such an act as this.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield for a question?

Mr. PITTMAN. I yield.

Mr. ROBINSON of Arkansas. I understood the Senator to say that 87½ per cent of the total area of the lands in the State of Nevada are public lands.

Mr. PITTMAN. They are.

Mr. ROBINSON of Arkansas. In that view of the matter the whole burden of road construction that is imposed on the non-public-land States, and which is borne in part by the lands of the States, must rest upon 12½ per cent of the lands of

Nevada, while the public lands are benefited just as much as if the lands were in private ownership?

Mr. PITTMAN. That is true.

Mr. BORAH. Mr. President, may I ask the Senator a question?

Mr. PITTMAN. I yield.

Mr. BORAH. Is it true that under the law the Western States will have to keep up these roads after they are built?

Mr. PITTMAN. Yes.

Mr. BORAH. Well, that is a very serious matter.

Mr. PITTMAN. We are stuck for it already.

Mr. ROBINSON of Arkansas. They have to keep them up now, so far as they are kept up.

Mr. BORAH. We now have all that we can carry in the way of keeping up roads. If these extensive roads are going to be built and this vast burden is intended to be placed upon us, we had better have an understanding now.

Mr. PITTMAN. Under this bill there is going to be no vast road building. The vast road building has already been started and is nearly completed under existing law. Take the Senator's State of Idaho, for instance, or take Nebraska, or take the State of Nevada: We have laid out 7 per cent roads. Those roads have to be laid out in accordance with the approved plans of the Federal Road Department. Those 7 per cent roads are what we call interstate highways, connecting up with the roads on each side. In other words, the great, expensive roads of Idaho, Nebraska, and Nevada are, and other Western States are, the trans-State highways that connect with each other.

We have running through the State of Nevada three great transcontinental lines—three of them. We have the Lincoln Highway, which crosses the whole State; we have the Arrowhead Trail, which goes from Salt Lake City diagonally through the State to Los Angeles; and then we have what we call the Victory Highway, which runs for 350 miles across the State. Eighty-seven and one-half per cent of the lands upon which those three roads are built are owned exclusively by the Federal Government, but we have made national highways of them. It is true that the Government has contributed its part for building them, but the condition was that we had to maintain forever those three great interstate highways. Unless those highways can be beneficially used, the State never can maintain them. We are interested in maintaining those roads so that we will have traffic over them, so that we can have some gasoline tax to collect.

We find ourselves in this position, as I have said before: Here is a section of the great Arrowhead Trail in northwestern Arizona that is totally uninhabited, with practically no county government and no property to tax; and under the law the counties must participate in the building of these roads. Although the road runs directly through northwestern Arizona for only 25 or 30 miles, connecting the splendid road in Utah and Nevada, it is almost impassable.

Now, no one but Arizona may improve such road, and Arizona will not. The Government owns the land but has no authority under existing law to improve the road. This bill grants such authority.

Mr. REED of Missouri. That blocks traffic?

Mr. PITTMAN. It blocks traffic over 250 miles of road that we are trying to maintain in Nevada, 200 miles of road in California, and two or three hundred miles of road in Utah. That is what we are up against.

Mr. BLAINE. Mr. President, will the Senator yield?

Mr. PITTMAN. I yield.

Mr. BLAINE. Are these roads essentially transcontinental roads, or are they essentially local?

Mr. PITTMAN. They are essentially transcontinental roads; the Government of the United States has spent its money only on that kind of roads.

Mr. WALSH of Montana. Mr. President, answering the question of the Senator from Wisconsin, I think the purpose and the necessity of this legislation will be very clearly illustrated by the situation in my own State. The Roosevelt Highway is one of the great transcontinental highways running from the Twin Cities of St. Paul and Minneapolis to the Puget Sound region. It passes through my State to an extent of 700 miles. Within that 700 miles it crosses three Indian reservations, the Fort Peck, the Fort Belknap, and the Blackfeet Reservations. It then reaches the Flathead forest reserve, and for a distance of 250 miles goes through that forest reserve.

None of these lands contribute anything whatever. The people of the State of Montana have burdened themselves with a gasoline tax of 3 cents a gallon that yields an enormous sum, and all the counties along that northern part of the State, through which this great highway runs, have burdened themselves to the limit to improve the roads within the counties, but just as soon as you reach the Indian reservations their expenditures become naught. Instead of having a good highway, you then reach an old dirt road, over which travel is entirely impeded, and when you reach the forest reserve you encounter more difficulties than you do in the plains country, where the Indian reservations exist.

Mr. BLAINE. For information, under the present general Federal highway aid system are there not special provisions for the Indian reservations.

Mr. WALSH of Montana. There is a provision that out of the moneys allotted to that work the entire cost shall be undertaken by the General Government; but that is a small matter.

I have a letter here from the chairman of the Montana State Highway Commission, who tells us that under the existing resources of the State of Montana it will be possible to complete the entire highway system of the State of Montana within a period of about 12 years, but under the present expenditures of the National Government in the national forests it will take 33 years to complete it. So that for a period of practically 20 years the Government will be behind the State of Montana in the construction of these great transcontinental highways.

Mr. BLAINE. Take the transcontinental road, for instance, which goes from Denver southwest through Arizona and New Mexico by the way of Flagstaff. Is that one of the highways that would be covered by this bill?

Mr. PITTMAN. That is one of them.

Mr. BLAINE. That illustrates it.

Mr. PITTMAN. Let me show Senators another one, while we have this map here, which is a very good one to illustrate the matter. Here is Arizona and here is the Colorado River. That little piece of ground in there belonging to Arizona, across that river, is practically an uninhabited mountain region. The Arrowhead Trail coming from Salt Lake comes right down through here, and through this little cross of ground right there. On this side of it, down to California, Nevada has built and maintained that great highway, which is graveled all the way. It is an expensive highway. When it passes this little piece of Arizona, it gets up into Utah, and Utah has taken care of that part, and it is a magnificent road. In fact, it is a magnificent road across the continent. It is one of the great transcontinental roads.

Going north through Nevada, through this place, we have the Victory Highway, that goes to Ogden and on through to Nebraska. It connects up and becomes the Lincoln Highway in Nebraska. When it gets to Nevada, it splits into two, and one road goes through as the Victory Highway and the other as the Lincoln Highway. They are two great highways running across there connecting up with the East, and they go clear to California.

What is the result? Unless a necessary link of that road is kept up, it will be abandoned for use, and if it is abandoned for use, we lose the money.

Mr. REED of Missouri. The Senator says there are these three great highways. He means, does he not, that they are laid out and improved in part, and that there are places where they are not improved?

Mr. PITTMAN. That is true. There are certain places, like these I have mentioned, where all the land is Government land, there is no taxable property in the county, and nobody can put up any money, no one desires to. The Arrowhead Trail does not benefit Arizona. It is a great continental highway.

Mr. FLETCHER. When these extensions are made across public land, will the tendency be to open up those lands for settlement? Will there be any advantage to the Government, which owns those lands now, in having the road go through there?

Mr. PITTMAN. I do not think there is any doubt but what this road would open the land to settlement.

Mr. FLETCHER. Are the lands worth settling?

Mr. PITTMAN. I have stated the only object of the bill. Under the law which now exists the State builds a road. If it is improved by the Federal Government, the Federal Government then contributes its part of the money on the condition that the State will always maintain the road. We run down to Arizona. This road is laid out. Utah, Nevada, and California agree to it. We go on and build it. We have it all built; and here is a section entirely on the public land, no private property there to speak of, and the Government has no authority to build that road, and the State of Arizona will not authorize it, and there we are.

Mr. BORAH. Mr. President, the State which I in part represent has about 69 or 70 per cent of its area in public lands. I realize that we need the roads for which this bill provides, but I want to go on record now as stating that the State of Idaho is not going to keep up the roads built by the Federal Government across lands owned by the Federal Government in

my State to the extent of 69 or 70 per cent. It is impossible to do it. There is no need of committing ourselves to any such proposition. It will not work out.

Mr. WALSH of Montana. Mr. President, so far as the State of Montana is concerned, it is not proposed to build any additional roads, except to connect up the roads that are now in existence, and to complete them so far as they traverse these public lands.

While I was on the floor before I referred to a letter from the chairman of the State Highway Commission of the State of Montana. I ask that the same may be incorporated in the RECORD.

The VICE PRESIDENT. Is there objection?

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF MONTANA HIGHWAY COMMISSION,
Great Falls, October 11, 1927.

Hon. T. J. WALSH,
Helena.

MY DEAR SENATOR: I am attaching to this letter an article which appeared in the Sunday Tribune. I dictated this article after returning from the annual convention of State highway officials at Denver last week.

The highway program of Montana, through State revenues and Federal aid, contemplates the completion of the Government system of the State outside of the coincident forestry highway mileage in 10 years. It will require 25 or 30 years to finish forestry highway mileage in the same construction. Montana has 512 miles of forestry highway mileage coincident with the Federal system of the State. About 170 miles have been built or practically built. A large percentage of this remaining coincident mileage lies within the national forests of the Rocky Mountain area where the cost of construction is heavy per mile. To remove these barriers to interstate travel between Montana and Idaho will alone cost perhaps $2,000,000. The situation blocks procedure west from the Twin Cities to the coast and likewise the reverse journey. Clearly this is important to the whole Northwest. It is, indeed, of national concern. The two interstate trunk roads across Montana from east to west (the Roosevelt Highway and the Yellowstone Trail) can be brought to a completeness that will be quite satisfactaory in two or three years, but the mileage west from Missoula to Spokane via Wallace and via Thompson Falls, between Troy and Libby in the national forest, and the finishing of the Belton-Glacier project can not be built in twice that length of time unless help shall come from somewhere.

No greater service can be afforded Montana at this time than the doubling up for a few years of our forestry highway construction money. It is not a large item. As you know, the present forestry appropriation is $7,500,000 per year. Of this amount, $4,500,000 goes to standard highway construction. Montana now gets about $400,000 per year. If it should get twice this amount, we could overcome the difficulties herewith set forth. The Government will be simply then keeping pace, through its own property, with the highway program of the various Western States.

I would very much like to see you personally about this matter, but perhaps this may not be possible. I have been asked to confer with Montana's Washington representatives. Please let me hear from you within an early convenience, setting forth what your attitude will be and any suggestion that you may have in mind at this time. With many thanks for attention to the matter,

Very sincerely yours,

O. S. WARDEN.

[From the Great Falls Tribune]

WEST STATES SEEK INCREASE IN FOREST HIGHWAY BUILDING—DENVER CONVENTION TAKES POSITION THAT CONGRESS SHOULD HASTEN CONSTRUCTION WHERE MOUNTAIN BARRIERS EXIST

O. S. Warden has returned from Denver, where he attended the annual convention of State highway officials and engineers of the United States, which met in the Colorado city October 3 to 6.

Delegates were in attendance from every State except two. The chief of the Bureau of Public Roads, other heads of departments, and State officials were at the convention for an intense four days' study of National and State road problems and progress.

The effort of the Montana commission was chiefly directed in the convention and in several conferences with delegates from the western public-land States to emphasizing the fact that Federal appropriations for the construction of highways in the national forests and across other public lands in some States is not keeping pace with the building of roads on the Federal system outside of these Government reserves.

In Montana, for instance, under present Federal appropriations and State revenues, the Federal-aid system outside the forest will be completed in 10 years, whereas it will require from 25 to 30 years to finish the forestry highway mileage of the State.

The Montana commission asked Chairman Blood, of the Utah Highway Commission, to call a conference of delegates from the 11 public-land States. This was done. An entirely unanimous opinion prevailed that action was not only highly desirable but imperative. The Montana commission, through its chairman, offered and moved the approval of the following presentation:

"In many Western States, as road programs are developed into larger proportions, it has become a matter of nation-wide importance and deep concern that highway construction through long stretches of the national forest is not keeping up with cooperative Federal-aid and State building throughout the intermountain country. On interstate and national highways there are mountain barriers that can not be removed for many years to come unless the Government shall build through its property as rapidly and in keeping with construction mileage that approaches national forest boundaries on either side. This situation in many places is indeed tending to defeat the national highway plan for a connected system. The Government surely should not take possession of large areas (removing the same from local taxation) and then allow the mileage therein to block the interstate traveler who, except for this situation, may quite soon or even now go from State to State with safety and comfort.

"The annual appropriation for the building of standard highways in the national forests should be increased 100 per cent for the next 10 years, or until such time as it can be said that the Government is building the roads within its own property to reasonably keep pace with the Federal aid and other State programs."

The general terms of this presentation were unanimously approved. There was some difference of opinion about how much additional funds Congress should be asked to provide in order to overcome the disparity in construction of roads over the public lands and over the balance of the Federal system.

This matter was taken up with the resolutions committee of the general convention. The convention later adopted as one of its conclusions that sufficient additional highway funds should be provided by the Seventieth Congress to adequately hasten construction where there are barriers that can not be otherwise removed across national-forest areas, public lands, or Indian reservations.

The present annual forestry appropriation by the Government is $7,500,000 per year. Of this amount, $4,500,000 goes to the construction of standard highways in the national forests. Montana now gets about $400,000 per year. It will perhaps require more than $2,000,000 to complete forestry mileage on the two transcontinental highways now going entirely through the State—the Belton-Glacier project, the difficult mileage between Troy and Libby, and west from Missoula via Wallace and via Thompson Falls to Spokane are on these roads—to say nothing about other forestry projects that have been started and must be completed over the State.

Manifestly, these Rocky Mountain barriers can not be removed for many years under the present Government appropriations for forest highways. This situation blocks procedure west from the Twin Cities to the coast, and likewise the reverse journey.

Following general action on the part of the Denver convention upon this subject, there was a second conference of western delegates. It was decided to revive the old Western Public Land States Association, and through this organiaztion carry forward the work in question.

Chairman Henry Blood, of the Utah Highway Commission, was chosen president, and Z. E. Sevison, State highway engineer of Wyoming, vice president. J. D. Woods, commissioner of public works of Idaho, was chosen secretary. The executive committee of the old western association will serve, vacancies to be filled by appointment, if there are any. The president will name a legislative committee.

It was voted that the delegates to the Denver convention take this whole subject up vigorously and immediately with the Senators and Representatives from the 11 public-land States of the West, so that a definite and complete plan of action may be arranged and a consensus of opinion and need thereby be reached before Congress convenes in December. There may be a called meeting of this western association if such a session shall seem necessary.

This conference of western members took one other action. It passed the following resolution, which was presented by O. S. Warden, of the Montana commission:

"In view of the largely increasing volume of travel year by year in the national parks of the United States, this association wishes to direct attention to the necessity of building and maintaining the highways in the parks up to a standard measured by the present greater need—the Government will be fully justified in expending a much larger amount of money than heretofore to meet this growing transport requirement."

STATE OF MONTANA HIGHWAY COMMISSION,
Great Falls, October 17, 1927.

Mr. J. D. WOOD,
Secretary Western Association of State Highway Officials,
Boise, Idaho.

DEAR MR. WOOD: In support of the effort that is to be made by the Western Association of State Highway Officials in behalf of the 11 public land States of the West, and in accord with a resolution adopted at Denver on October 4, 1927, urging a substantial increase of Federal appropriations for forestry highway construction so that

the improvement of the roads within this Government-owned land may keep pace with that upon the remainder of the Federal aid system, the State Highway Commission of Montana wishes at this time to present facts and reasons for the use of its representatives at Washington, the Congress and all other officials of the Government who may give consideration to this important matter. The presentation given herewith and the accompanying map have been prepared from official figures in the forestry department.

I. Total mileage on forest highway system, 1,183.06 miles.

II. Status of improvement on each forest highway:

Route	Gravel	Graded	Unimproved
	Miles	*Miles*	*Miles*
1. Roosevelt Highway	25.80	21.22	43.98
2. Jennings Marion Highway			50.00
3. Libby Marion Highway No. 1		.50	20.50
4. Libby Marion Highway No. 2	3.79		3.21
5. Troy Noxon Highway	5.40		34.60
6. Clarks Fork Highway	21.87		53.13
7. Prospect Creek			25.00
8. Yellowstone Trail	24.70	4.08	65.22
9. Paradise Cutoff			20.00
11. Lewis and Clark		7.06	9.54
12. Fortine Olney	13.70		9.30
13. Columbia Falls-Glacier Park		36.88	38.12
14. Flathead Lake			6.00
15. Swan River		2.29	57.71
16. Skalkaho		30.00	
17. Georgetown Lake			19.00
18. French Gulch			8.00
19. Bitterroot Salmon Highway		7.30	24.70
20. Bitterroot Bighole			18.00
21. Wisdom-Gibbonsville			9.00
22. Wise River			18.00
23. Lemhi Pass			4.00
24. Pipestone Pass		2.43	5.57
25. Little White Tail			4.00
26. Butte Boulder			12.00
27. Lowland Creek			21.00
28. McDonald Pass			10.00
29. Trout Creek Antelope			24.00
30. Confederate Gulch			11.00
31. Townsend-White Sulphur Springs			10.00
32. Y G Bee-Line	31.03	24.37	
39. Flathead Pass			12.00
40. Bridge Canyon			8.00
41. Meadow Creek-Trail Creek			3.00
42. West Gallatin	34.10	10.00	
43. Yellowstone Canyon	9.11		8.89
44. Reynolds Pass			3.00
45. Madison River			35.00
46. Targhee Yellowstone	8.96		
50. Sage Creek			10.00
51. Otter Creek			41.00
52. Bloom Creek			12.00
53. Ashland-Olive Highway			25.00
54. Whitetail Stacey			16.00
55. Ekalaka			3.00
56. Thompson River			47.00

SUMMARY

Total miles improved	178.46
Total miles in stage construction (graded only)	146.13
Total mileage unimproved	858.47
Total	1,183.06

III. Total mileage of forest highway system on Federal-aid highway system:

	Miles
1. Roosevelt Highway	39.00
3. Libby Marion Highway No. 1	21.00
4. Libby Marion Highway No. 2	7.00
6. Clarks Fork Highway	75.00
8. Yellowstone Trail	94.00
12. Fortine Olney	23.00
13. Columbia Falls-Glacier Park	75.00
17. Georgetown Lake	19.00
19. Bitterroot Salmon	32.00
24. Pipestone Pass	8.00
26. Butte Boulder	12.00
28. McDonald Pass	10.00
31. Townsend-White Sulphur Springs	10.00
32. Y G Bee-Line	56.00
43. Yellowstone Canyon	18.00
44. Reynolds Pass	3.00
46. Targhee Yellowstone	8.96
Total	510.96

IV. Forest highway mileage on United States numbered system:

Route	United States No.	Miles
1. Roosevelt Highway	2	39.00
3. Libby-Marion Highway No. 1	2	21.00
4. Libby-Marion Highway No. 2	2	7.00
8. Yellowstone Trail	10	94.00
13. Columbia Falls-Glacier Park	2	75.00
17. George Town Lake	10	19.00
24. Pipestone Pass	10	8.00
32. Y G Bee-Line	87	56.00
43. Yellowstone Canyon	87	18.00
46. Targhee Yellowstone	20	8.96
Total		345.96

V. Total expenditure to date from Federal, State, and local sources $3,071,842

VI. Estimated cost of completing total forest highway system to a standard adequate for traffic and comparable to connecting State and Federal aid improvements 13,418,892

VII. Annual forest highway apportionment under present appropriations 350,000

Making a further analysis of the situation herewith presented, it may be said that the highway program of Montana contemplates the completion of the Federal-aid system of the State—in grade and gravel—outside of the coincident forestry mileage in a period of 10 years, whereas it will require from 25 to 27 years for finishing the forestry highway mileage in the same construction, using the present rate of Federal allotments for this purpose.

Montana has 511 miles of forestry highway mileage coincident with the Federal system of the State. One hundred and seventy-eight miles have been built. An important percentage of the 333 miles to be built lies within the Rocky Mountain national forest area, where much construction cost will be from $15,000 to $20,000 per mile. To remove the barriers to interstate travel between Montana and Idaho alone will cost more than $3,000,000. This mileage blocks direct procedure west from the twin cities to the coast and likewise the reverse journey. Clearly this is important to the whole Northwest—it is, indeed, of national concern. Montana can reasonably take care of its own highway transport, but it can not, with present resources, adequately build through its western mountain passes for many years to come. The two interstate trunk roads across the State from east to west—the Roosevelt Highway and Yellowstone Trail—can be brought to a completeness that will be quite satisfactory in two or three years, but the mileage west from Missoula to Spokane via Wallace and via Thompson Falls, the mileage between Troy and Libby, and the completion of the Belton-Glacier project of the Roosevelt Highway in the national forest can not be built in twice that length of time unless help shall come from somewhere. The estimated cost of completely building the projects last mentioned and constituting barriers on the interstate highways of northwestern Montana is given as follows:

The Belton-Glacier project	$510,000
Mileage from Troy to Libby	375,000
Missoula to Spokane via Thompson Falls	983,000
Missoula to Spokane via Wallace	1,323,000
Total	3,191,000

At the same time considerable of the present rate allotments must go upon forestry highway projects that have been started and which will require $977,000 for completion.

To further show how these difficulties bunch themselves in northwestern Montana, the cost of completing the forestry highway mileage in six counties of that portion of the State may be given:

Lincoln County	$1,808,000
Flathead County	727,000
Lake County	376,000
Sanders County	2,006,000
Mineral County	1,798,000
Missoula County	465,000
Total	7,180,000

The total acreage of the national forest in Montana is 15,919,690, which is just about 17 per cent of the total area of the State. It probably constitutes 50 per cent of that portion of the State containing the difficulties of forestry highway construction here presented. The Government surely should not take possession of these large areas (removing the same from local taxation) and then allow the highway mileage therein to block the interstate traveler who, except for this situation, may quite soon or even now go from State to State with safety and comfort. The Montana Highway Commission earnestly urges that the present annual appropriation of four and one-half million dollars, which goes to the construction of standard highways in the national forests, be doubled and that the amount be nine millions of dollars annually until such time as the building of roads within the Government's property shall reasonably keep pace with the Federal aid and other State programs.

Respectfully submitted.

_____,

Chairman Montana State Highway Commission.

Mr. FLETCHER. Mr. President, with regard to the Senator's State, there is a separate provision made for the construction of roads in the forest reserves and in the national parks.

Mr. WALSH of Montana. But there is none for the unappropriated public lands.

Mr. WHEELER. Mr. President, I desire to call the attention of the Senate to an editorial appearing in the Great Falls Tribune, of Great Falls, Mont., on Sunday, May 20, 1928, with reference to the President's veto of the Oddie-Colton bill, which has for its purpose the appropriation of approximately $10,000,000 for the building of forestry roads. I ask that the clerk read it from the desk.

The VICE PRESIDENT. The clerk will read.

The Chief Clerk read as follows:

[From the Great Falls (Mont.) Tribune, May 20, 1928]

AN ASTONISHING VETO

President Coolidge has taken his baseball bat and knocked out the Oddie forestry highway measure—unless it can now be passed over the Executive veto. This, of course, is a difficult thing to do. This Oddie bill corresponds with a like measure over in the House known as the Colton bill—both measures have the same authorization in funds.

This action of President Coolidge appears to us a most ungracious one. His action is disappointing. It is an astonishing attitude and one that may easily lead to the suspicion that the President is peeved over the insistence that has been put behind such measures as the McNary-Haugen bill, and further that he is in a mood to slap the West by blocking these proposals that have been most carefully prepared to relieve a distressing situation arising out of the fact that the Government is not keeping pace with the existing road programs of the 11 western land States. In other words, the Government is failing to keep up with the already constructed mileage that approaches its own property on either side.

The Oddie bill and the Colton bill would authorize the expenditure of $3,500,000 of additional funds for the construction of highways within the national forests and over other unappropriated Government land. These measures were really brought into existence through a careful study of the situation that was urged in the first instance by the Montana Highway Commission at the last annual convention of State highway officials of the whole country. Further attention was given to this matter at a session of State highway officials from these 11 public-land States of the West at Los Angeles a few weeks ago. The whole situation was clearly presented to the proper committees of the House and the Senate. There did not appear to be any division of sentiment about what should be done. There was general agreement that it surely was not correct for the Government to take over large areas of forestry acreage, and then not build the roads within its own property to keep pace with Federal aid and State programs of construction so that interstate travel may proceed in a reasonable and safe way.

It is to be noted that an extravagant sum was not required. Ten and one-half millions of dollars, distributed over three years of appropriation, is certainly modest when this Government is putting nearly a billion dollars a year into the support of its Army and Navy. These forestry and unappropriated lands have been withdrawn from local taxation and they now constitute in the State of Montana transportation barriers that can not be overcome under present revenues that are available. The Oddie or the Colton bill would have been a mighty help toward finishing such important highway projects as the Belton-Glacier Road, the most difficult mileage between Troy and Libby, the sadly needed completion of the Clarks Fork Highway, and Yellowstone Trail west of Missoula.

All of these circumstances, we believe, were presented in a personal way to Mr. Coolidge. It seems that he must have understood the situation. It is just too bad that he sees fit to block the way at this important juncture in the development of the highway programs of the public-land States of the West.

We have certainly had enough of this kind of economy at Washington.

Mr. WHEELER. I merely want to add to what has already been said with reference to the bill, that while it may seem to a good many Senators that it is a bill which will be to the advantage only of the 11 public-land States, yet as a matter of fact the bill is of more benefit to the traveling public than it will be to the people living in those States. It simply provides for the construction of the connecting links in these great continental highways, the Roosevelt Highway and the Yellowstone Trail, from Chicago and St. Paul to the Pacific coast. In Montana, for instance, the Roosevelt Highway passes through the Blackfoot Reservation, and likewise through the Fort Peck Reservation. If the appropriation is not made it means that when people traveling across the country come to those reservataions they immediately strike very difficult roads, almost impassable roads. It is impossible for the State of Montana to build the roads for the reason that they derive no income to speak of from taxes from the area which the road traverses.

The 11 public-land States of the West now have local and cooperative highway construction programs that will complete their Federal systems, outside of forest reserve areas and Indian reservations, within a 5 or 10 year period. In these same States the forest reserve and public land mileage under present appropriations and allotments can not be built to like standard in less than 40 to 50 years. The present generation would not see the end of the work.

This appropriation is absolutely essential to the development of the western public-land States. The veto of the same is a slap at the West, and I earnestly hope that the Senate will override the President's veto.

Mr. BROOKHART. Mr. President, the veto message of the President states the total amount involved in the expenditure upon what is called cooperative road building, and because of that total amount the President seems to be opposed to this particular measure. I want to call attention to a few facts which indicate that the Government is far from spending the amount of money in a general way that we ought to spend in the building of such roads.

Eighty-five per cent or more of the business of the railroads of the United States is interstate. There is less than 15 per cent that is intrastate. That means that 85 per cent of the business of the country is interstate. It means that 85 per cent of the income which is the just basis of taxation is interstate.

Out in my own State at this time we have voted $43,000,000 of county bonds to build hard roads as primary roads of the State, and there is pending the question of issuing $100,000,000 more of State bonds to connect up those roads. How much Federal aid will go to that great system of roads? Only a very few million dollars under the $75,000,000 Government appropriation. The Federal appropriation ought to be from $300,000,000 to $500,000,000 instead of only $75,000,000 if the Government would sustain its proper proportion of the expenses of building roads everywhere. I wish the road-bond issues might be defeated in those States until a national policy, adequate to take care of the Government's share of the building of roads, shall be adopted. I am for the building of the Memorial Highway down to Mount Vernon. I am for the roads proposed to be constructed under this bill. But I am also in favor of the Government doing its full share all the time, and the burden will then fall upon that portion of the commerce of the country where it justly belongs.

Mr. PITTMAN. Mr. President, will the Senator yield?

Mr. BROOKHART. Certainly.

Mr. PITTMAN. There is only one thing I want to suggest to the Senator from Iowa. After we had enacted the Federal aid highway law, then we found that we had forest reserves that were left out of it. We found that we had Indian reserves that were left out of the law. It had no application to them at all. So we endeavored to remedy that situation. Some Senators think that, having remedied that condition, we have remedied everything.

Mr. BROOKHART. That is only a little bit of the condition. That does not meet the situation at all.

Mr. PITTMAN. If a particular piece of road is not through a forest reserve or an Indian reservation, then there is no law by which the Federal Government can do anything.

Mr. BROOKHART. I got the force of the Senator's argument when he stated the proposition before.

In conclusion, I want to state that the President has just signed a bill authorizing the use of $250,000,000 of Government money to be loaned to a few men who will build ships, and which carries a subsidy of from $7,000,000 to $10,000,000 a year to these few private persons. He has just signed that kind of a bill for the benefit of a few people. But here is a good roads bill which benefits somewhat the whole country; here is a good-roads proposition that demands the attention of the whole country and the support of the whole country and the support of the Congress, and a bill of this kind is vetoed.

Mr. BRATTON. Mr. President, the subject matter has been discussed quite fully, but I want to call attention briefly to the fact that the pending bill is intended to overcome an inequality and discrimination which now exists. Under the regular Federal-aid highway system the Government pays 63 per cent of the cost of the construction and the State pays 37 per cent of the cost of construction of Federal-aid highways. Sixty-three per cent is taken from the money which is allocated among the several States interested in the program. If, however, any part of the road in a public-land State traverses an Indian reservation or a forest reserve, instead of deducting 63 per cent of the cost from the allocation made to that State, 100 per cent of the cost is deducted from the share of Federal-aid money thus allocated to that State. This means that in the case of a non-public-land State there must be deducted or charged to the State only 63 per cent of the cost, while in the neighboring State the entire sum is deducted from its allocation.

In the West we have States large in area, but sparsely settled. I undertake to say that the people out there have done marvelous things in assuming their part of the burden in road construction. The construction of roads across forest reserves improves Government property. It protects the property in case of fire. It tends to develop the mineral resources thereof. Those areas are now owned by all the States in common.

Transcontinental highways crossing them are used, patronized, and enjoyed by the people of all of the several States of

the Union. I am unable to understand why the people in those States should bear more than their just share of the burden. The bill appropriating $10,500,000, distributed over a three years' program, is intended to equalize the burden among the several States of the Union, and nothing more.

Mr. BLAINE. Mr. President, will the Senator yield for a question?

Mr. BRATTON. Certainly.

Mr. BLAINE. Ten million dollars over three years in the 11 States mentioned will build very few miles of highway. It will not mean, as I figure it, if confined to any type of highway that is considered hard surface, more than 40 or 50 miles in each State. It seems to me the Senator is just getting himself in deeper on the proposition than he is now. He will have a partially built road, a few miles of hard-surface road here and there; but he will still have all the wide gaps without good roads. It does not seem to me the amount appropriated is going to accomplish the purpose which the advocates of the bill seem to want to accomplish. I just want to get the Senator's viewpoint upon that feature.

Mr. BRATTON. I shall give it to the Senator.

Mr. ODDIE. Mr. President——

Mr. BRATTON. I yield to the Senator from Nevada.

Mr. ODDIE. This will not by any means complete the system of highways, but it will go a long way toward helping over some of the rough places. It will build enough miles in three years to materially help the situation. In addition to the regular Federal-aid road program, it will enable the Western States to do much that is very necessary to be done.

Mr. BLAINE. Mr. President, will the Senator permit another question?

Mr. BRATTON. Certainly.

Mr. BLAINE. At the end of three years will it become necessary to ask for another $10,000,000?

Mr. ODDIE. That will take care of itself.

Mr. BLAINE. What I am getting at is that this amount is insufficient for the purposes designed even under the circumstances stated by the Senator from Nevada.

Mr. BRATTON. That may be true. It may be inadequate to accomplish everything that should be accomplished, but it is sound in principle, it proceeds in the right direction, it is meritorious, and if anyone is to suffer from inadequacy the public-land States are the ones that will bear it. I point out to the Senator from Wisconsin the injustice of the Government paying only 63 per cent of the cost of constructing all of the Federal-aid roads in his State and his people enjoying the use of those roads, while in another State—namely, my State—the Government pays the whole cost so far as roads upon Indian lands and forest reserves are concerned, but deducts the whole cost thereof from the allocation made to my State. The Senator wants to be fair among the States. I know that. This measure is intended to relieve an inequality and to render help where help is needed and where it is desired.

Mr. BLAINE. May I suggest to the Senator that the Federal Government does not pay 63 per cent of the cost of constructing Federal-aid roads in my State or any other State. I do not believe that the Federal Government pays one-fifth of 63 per cent of the cost of Federal-aid roads, and so far as my own State is concerned, if the Federal Government did not contribute a single dollar toward highway aid and permitted Wisconsin to retain Federal taxes that go to other States, we would be better off financially.

Mr. BRATTON. We embarked upon this program years ago. We are going forward with it.

Mr. BLAINE. What I am getting at is this, and I ask merely for information. The small amount appropriated may be allocated to any highway by the department. The department may open new roads for travel. It may only add to the troubles and difficulties which now exist. I understand the measure does not limit the use of the money to the Federal system as it now exists, but that the department may place the money anywhere within the States designated and add new roads.

Mr. BRATTON. I think the Senator is in error about that. I call his attention to the opening sentence of the bill, as follows:

> That for the purposes of carrying out the provisions of the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, and all acts amendatory thereof and supplementary thereto.

Consequently the allocation in the States having Indian reservations and forest reserves must be made in accordance with the act of 1916, commonly called the Federal aid highway act. Obviously the department will be governed by that act in making the allocation of the funds authorized.

Mr. BLAINE. That limits the number of miles to 7 per cent of the total mileage of the State.

Mr. BRATTON. No; it is in addition to the 7 per cent system, but otherwise the allocation must be made in accordance with the Federal-aid highway system.

Mr. BLAINE. That does not prohibit the department from opening up new roads.

Mr. BRATTON. Oh, no; new roads across Indian reservations and forest reserves may be constructed. The money must be used for constructing roads across Indian reservations and forest reserves, and the entire cost will be paid out of this appropriation.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. McKELLAR (when Mr. NEELY's name was called). The senior Senator from West Virginia [Mr. NEELY] is unavoidably absent. If he were present, he would vote "yea."

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote if present, I transfer that pair to the senior Senator from West Virginia [Mr. NEELY] and vote "yea."

The roll call was concluded.

Mr. SWANSON. Making the same announcement as to the transfer of my pair as on the previous vote, I vote "yea."

Mr. GERRY. I desire to announce that the Senator from New Jersey [Mr. EDWARDS] is detained from the Senate because of illness in his family. If present, he would vote "yea."

The roll call resulted—yeas 57, nays 22, as follows:

RETIREMENT OF EMERGENCY OFFICERS OF WORLD WAR—VETO MESSAGE

The VICE PRESIDENT. The Chair lays before the Senate the veto message of the President of the United States on the emergency officers' retirement bill, which will be read.

The Chief Clerk read as follows:

To the Senate:

Herewith is returned, without approval, S. 777, a bill making eligible for retirement, under certain conditions, officers and former officers of the Army, Navy, and Marine Corps of the United States, other than officers of the Regular Army, Navy, or Marine Corps, who incurred physical disability in line of duty while in the service of the United States during the World War.

This bill provides, among other things, that those who served as emergency officers of the Army, Navy, and Marine Corps during the World War and who during such service had incurred physical disability in line of duty, and who have been, or may hereafter, within one year, be rated in accordance with law at not less than 30 per cent permanent disability resulting directly from such war service, shall be placed upon an emergency officers' retired list, and shall receive retired pay at the rate of 75 per cent of the pay to which they were entitled at the time of their discharge from their commissioned service, except pay under the act of May 18, 1920.

What this bill proposes is to compensate a limited number of emergency officers not according to their disability but according to the rank which they held in the World War. It breaches the fundamental principles of our Government to compensate service, not rank. The policy which this bill proposes for the compensation of a limited number of disabled emergency officers

is wrong. Aside from this, the bill discriminates against emergency officers of less than 30 per cent disability and all disabled enlisted men of the World War in favor of a limited number of disabled officers.

The most sacred duty of our citizenry is to enroll in the defense of their country in time of need. It is the proud record of our Nation that the sacredness of this duty has been recognized by all of the people at all times. When the emergency of the World War confronted us one of our great needs was an expansion of our regular military and naval services. Proper organization required that the expansion for the emergency be in commissioned officers and enlisted men. Both the commissioned officer and the enlisted man who entered the service for this emergency were serving in the same duty—the defense of their country. In this there was and could be no distinction between the two. There was no distinction as to the duration of their service.

We recognized no distinction in framing our laws for the care and benefit of those who were disabled. Under them both officer and enlisted man are treated alike. Their dependents are treated alike. We willingly and gladly recognized the merit of service, but we carefully guarded against the recognition of the rank or grade held during that service.

This Nation has pledged itself to care for the disabled of our World War veterans and their dependents. That pledge has and will be kept. No soldiers in history have been so bounteously cared for as we have cared for our veterans of the World War. If further aid is needed, it should be bestowed not by changing the policy of our Government, as is proposed in this bill, but by continuing that policy so that it will continue to apply alike to all disabled veterans of the World War.

In the perpetuation of our present policy the Nation will be secure. Full justice will be accorded alike to our veterans of the World War and to the other taxpayers of the country. This bill would practically double the cost of the compensation of the 3,297 emergency officers who are now 30 per cent or more disabled. Their present compensation amounts to $2,874,000 per annum, while the cost under this bill would be $5,204,000. This gives some idea of the immediate cost of the policy which this bill proposes. Once adopted, that policy will open the door to a flood of expenditures that will likely surpass anything of the kind that we have yet experienced. It will at once be apparent that it is a gross discrimination against the enlisted men. It will be difficult to make any answer to their demand for like treatment. If such a request were granted the cost would be so great as to make it practically impossible to provide our country with national defense.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 22, 1928.*

The VICE PRESIDENT. The question is, Shall the bill pass, the objections of the President of the United States to the contrary notwithstanding?

Mr. TYSON. Mr. President, this bill has been before the Senate for a long time, about five years all together, and has passed the Senate three times, so I take it that the Senate is very thoroughly informed of the nature of the measure. Therefore I do not wish to take the time of the Senate, because I do not think there is anything new that has been stated in the veto message. All of the arguments of the President have been repeatedly advanced and discussed in the Senate. So, without detaining the Senate longer, I express the hope the veto may not be sustained.

Mr. REED of Missouri. Mr. President, this proposition is so well summed up in one sentence by George Rothwell Brown in his "Post-Scripts" that I want to read that sentence:

> Oh, well, the President's veto of the disabled officers' retirement bill is not the first surgical operation most of them have undergone.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. SWANSON (when his name was called). Making the same announcement and transfer as on the previous roll call, I vote "yea."

The roll call was concluded.

Mr. McKELLAR. I desire to announce the unavoidable absence of the senior Senator from West Virginia [Mr. NEELY], and to say that if he were present he would vote "yea" on this question.

Mr. GERRY. I wish to announce that the junior Senator from New Jersey [Mr. EDWARDS] is absent on account of illness in his family. If present, he would vote "yea."

Mr. BROUSSARD. I desire to announce that my colleague [Mr. RANSDELL], if present, would vote "yea."

Mr. NYE. I desire to announce that my colleague [Mr. FRAZIER], if present, would vote "yea."

Mr. TYSON (after having voted in the affirmative). I have a general pair with the Senator from West Virginia [Mr. GOFF]; but I am informed that if he were present he would vote "yea." Therefore I am released from the pair.

Mr. CURTIS. I desire to announce the special pair of the Senator from North Dakota [Mr. FRAZIER] and the Senator from Florida [Mr. TRAMMELL] with the Senator from Delaware [Mr. DU PONT]. If present, the Senator from North Dakota and the Senator from Florida would vote "yea" and the Senator from Delaware would vote "nay."

I also wish to announce the special pair of the Senators from Indiana [Mr. ROBINSON and Mr. WATSON] with the Senator from South Dakota [Mr. NORBECK]. If present, the Senators from Inidana would vote "yea" and the Senator from South Dakota would vote "nay."

The roll call resulted—yeas 66, nays 14, as follows:

YEAS—66

Ashurst	Edge	McKellar	Shortridge
Barkley	Fletcher	McLean	Simmons
Bayard	George	McMaster	Smith

Frazier	Jones	Robinson, Ind.	

The VICE PRESIDENT. On this question the yeas are 66, the nays are 14. Two-thirds of the Senators present having voted in the affirmative, the bill is passed.

ARMY BANDMASTERS—VETO MESSAGE

Mr. STECK. Mr. President, I request that the President's message vetoing Senate bill 750 be laid before the Senate.

Mr. ASHURST. Let it be read.

The VICE PRESIDENT. The Secretary will read the veto message.

Mr. ROBINSON of Arkansas. What is the veto message, Mr. President? We can not hear what is said.

The VICE PRESIDENT. The veto message will be read.

The Chief Clerk read as follows:

To the Senate:

Herewith is returned, without approval, S. 750, a bill to amend the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, as amended, and for other purposes.

This bill would authorize the appointment of 92 commissioned officers as bandmasters in addition to the number of commissioned officers of the Army now authorized by law. These appointments would be made from band leaders who now hold the grade of warrant officer or from noncommissioned officers or other enlisted musicians who have had at least 10 years' service in Army bands.

There is no requirement in the military service for leaders of bands to be given a commissioned status. There should be such a requirement before the added cost which this bill contemplates is imposed permanently upon the taxpayer. This bill would increase our military expenses by about $86,000 per year. I would not hesitate to give my approval to this increased cost if it represented some real requirement. The Secretary of War is opposed to this proposed legislation on the ground that it does not serve to meet a need of the military service nor operate to improve that service. In fact it is his opinion that to give commissions to band leaders, thus requiring them to exercise administrative and disciplinary control over the bands, would militate against the musical instruction of the bands, which is now and must always be their main function. I am therefore constrained to return this bill without my approval.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 22, 1928.*

The VICE PRESIDENT. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding?

Mr. STECK. Mr. President, just a word of explanation. I do not suppose that many Members of the Senate know what the bill provides, except from the description in the message of the President.

The bill will increase the number of commissioned officers by the number stated, but it will decrease by the same number the warrant officers of the Army. That accounts for the small additional expense.

There are now no commissioned officers in the musical organization of the Army; and the witnesses who appeared before the Military Affairs Committee, including John Philip Sousa, insisted that it was necessary in order to keep up the morale of the bands and to give the bandsmen something to work for.

The bill was objected to by the War Department before the committee solely on social grounds. General King, who appeared before the committee, testified that in his opinion these bandmasters would be more comfortable among men of their own class than they would if they were commissioned. That was practically the only objection that was made before the committee.

The committee held hearings, and the bill came out from the Committee on Military Affairs with a unanimous report. It is the same bill that was passed by the Senate a year ago.

Mr. BRUCE. Mr. President, I desire to say just a word. I think that plainly, in one or two instances in which vetoes of the President have come under our review to-day, he overstepped his Executive province. Now, however, it seems to me that we should just as clearly overstep our province if we should undertake, after the President had exercised his Executive discretion in a matter of this sort—after all, a comparatively insignificant one—to override his veto.

Surely there is a certain degree of respect to be paid by the President to the action of Congress when Congress has enacted a law; and surely there is a certain degree of respect to be paid to the veto of the Executive when he has vetoed a measure. In other words, it does seem to me that the extreme medicine of overridden vetoes should not become the daily bread of the Senate and the House; and I think that state of things would exist if, every time some such measure as this were to be vetoed by the President, Congress should override his action.

The VICE PRESIDENT. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding? The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. SMITH (when his name was called). On this vote I am paired with the senior Senator from Indiana [Mr. WATSON], and I withhold my vote.

Mr. SWANSON (when his name was called). Transferring my pair with the senior Senator from Washington [Mr. JONES] to the senior Senator from West Virginia [Mr. NEELY], I vote "yea."

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. I do not know how he would vote on this question. I transfer my pair to the junior Senator from New Jersey [Mr. EDWARDS] and vote "yea."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL]; and

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL].

I do not know how any of these Senators would vote on this question.

Mr. BRATTON. I have a pair with the junior Senator from Indiana [Mr. ROBINSON]. Not knowing how he would vote, I withhold my vote.

Mr. McKELLAR. I desire to announce the unavoidable absence of the senior Senator from West Virginia [Mr. NEELY] and to say that if present he would vote "yea."

The roll call resulted—yeas 44, nays 32, as follows:

The VICE PRESIDENT. The yeas are 44 and the nays are 32. Two-thirds of the Senate not having voted in the affirmative, the bill is not passed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had agreed to the concurrent resolution (S. Con. Res. 21) relative to the making of a correction in reenrolling Senate bill 3752.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

H. R. 1951. An act granting six months' pay to Frank A. Grab;

H. R. 2657. An act for the relief of Thomas Huggins;

H. R. 5897. An act for the relief of Mary McCormick;

H. R. 6908. An act for the relief of Michael Ilitz;

H. R. 11978. An act granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service; and

H. R. 13481. An act granting the consent of Congress to the Alabama State Bridge Corporation to construct, maintain, and operate bridges across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama.

TWENTY-THIRD INTERNATIONAL CONGRESS OF AMERICANISTS
(S. DOC. NO. 152)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the Department of State, fiscal year 1929, amounting to $5,000, for the Twenty-third International Congress of Americanists, which was referred to the Committee on Appropriations and ordered to be printed.

PETITIONS AND MEMORIALS

Mr. ROBINSON of Arkansas presented a resolution adopted by the Arkansas Petroleum Club, of El Dorado, Ark., opposing the passage of Senate bill 3151, to limit the jurisdiction of the United States district courts, which was ordered to lie on the table.

He also presented numerous telegrams in the nature of petitions from sundry citizens and organizations of the States of Arkansas, Texas, and New York, praying for the passage over the President's veto of the bill (H. R. 5681) to provide a differential in the pay for night work in the Postal Service, which were ordered to lie on the table.

PULLMAN SURCHARGE

Mr. WALSH of Montana. I ask to have printed in the RECORD and to lie on the table a letter from the junior Senator from Montana [Mr. WHEELER] to Mr. F. J. Erdman, grand counselor, and Mr. F. J. Walters, grand secretary, United Commercial Travelers, Montana jurisdiction, relative to the Robinson bill for the repeal of the war-time Pullman surcharge.

There being no objection, the letter was ordered to lie on the table and to be printed in the RECORD, as follows:

WASHINGTON, D. C., *May 21, 1928.*

Mr. F. J. ERDMAN, *Grand Counselor,*
Mr. F. J. WALTERS, *Grand Secretary,*
United Commercial Travelers, Montana Jurisdiction.

GENTLEMEN: I was indeed very happy to receive your wires in behalf of the traveling salesmen of the State of Montana requesting my cooperation in obtaining a report of the Robinson bill for the repeal of the war-time Pullman surcharge.

I received your telegram Thursday morning and immediately presented the matter at the regular meeting of the Senate Committee on Interstate Commerce, and am glad to say that upon my motion before that committee the bill was reported without any hearings and is now on the Senate calendar.

As you probably know, the Senate has already passed this same bill on three previous occasions, but it has been blocked by the railroad lobby in the House of Representatives. Your eastern representatives will vouch for the fact that I have at all times extended the utmost possible cooperation with them in their efforts to accomplish passage of this deserving legislation.

I wish you had called my attention to it earlier so that I might have taken the matter up months ago for you. Congress is now in a

deplorable tangle, as usual, preceding its endeavor to adjourn for the summer recess, but I am nevertheless hopeful that in some manner or other we may be successful in passing the bill through the Senate in time to get a vote on it in the House.

It is most unfortunate that such a worthy cause as that of repealing this obnoxious war-time tax on travel (originally created by the Government for its own benefit, but now reverting to the private owners of the railroads for their selfish corporate advantage) should be still permitted to continue in force 10 years after the war is over. As one of the leading newspaper editorials recently stated, the only reason for its continued enjoyment by the carriers is "their ability to hang to it," and that leads me to comment on the effort which we have been making in Congress here to regulate the sinister system of railroad, oil, and public utilities lobbying, which has been such a public disgrace during the past several years.

I was surprised the other day in studing the statistics on Pullman surcharge expense and earnings to note the answer to one of the fallacious claims which the carriers have advanced in their strenuous efforts to prevent the repeal of this war-time heritage—with respect to the alleged higher cost of labor and materials—and I found that not only have all of the materials costs been radically reduced from the basis of 1920, when the Pullman surcharge was unjustly reimposed, but that in addition the Bureau of Railroad Economics of Class 1 Railroads of the United States shows that they have cut the number of employees on their lines from 2,022,832 in 1920 to 1,779,281 in 1926, a reduction of 243,551 of the number of employees; and in addition to this the average compensation per employee per year has been reduced from $1,820 to $1,655, a saving of $165 per year per employee.

In other words, they have dropped 243,551 men working in 1920, who then earned $1,820 each, or a total of $443,262,820; and they have reduced the pay of 1,779,281 other men still in their employ at the rate of $165 each, or a total of $293,581,365 per year, making the grand aggregate of labor savings $763,844,185 less than in 1920, when the Pullman surcharge was reinstated on the grounds of alleged high-labor costs. If it was necessary in 1920—which I seriously doubt—there can be no further justification for it whatsoever in 1928.

The above illustration portrays the insincerity with which the railroad lobby representatives on the one hand seek to deny the public reductions on both passenger and freight rates to which it its entitled, and on the other hand endeavor to hoodwink the splendid body of men employed on their lines into believing that the repeal of the war-time surcharge would affect their employment or their compensation.

On the contrary, the repeal of the war-time 50 per cent surcharge would obviously increase the value of travel, and this would logically require the employment of a greater number of workers than at present. With an increased demand for labor there would naturally come better rewards to such labor.

In the foregoing calculations it might seem to appear that I have not given thought to the interest of the stockholders and owners of the carriers' securities. On the contrary, it is my profound belief, based on the science of economic laws as demonstrated so many times in nearly all branches of industry, that increased volume means reduced overhead and greater net profit per unit of service or per dollar of revenue; and I am therefore convinced in my own mind that not alone would the public benefit, and the shippers and railroad labor, but that the railroads themselves and their security holders also would benefit from a more scientific application of merchandising principles in the operating of their properties.

In conclusion, let me say that it is a pleasure for me to be able to render service to the Commercial Travelers and to the other citizens of the State of Montana, and as you are undoubtedly aware my efforts always have been directed for and in behalf of the great public interest rather than in defense of those who serve the public. The public-service corporations seem very well able to take care of themselves at all times, but it is my experience that too many of our legislators do not give equal loyalty and service in defense of the public whom they are elected to represent.

With cordial greetings, believe me to be,

Sincerely yours,

B. K. WHEELER.

INLAND WATERWAY FROM NEW ORLEANS TO COLUMBUS, GA.

Mr. GEORGE. I ask to have printed in the RECORD a letter from H. H. Swift, chairman of the inland waterways committee of the city of Columbus, Ga. It is a very thoughtful letter with reference to House bill 13512, suggesting certain amendments to that bill. I desire to have the letter referred to the Committee on Commerce after being printed in the RECORD.

There being no objection, the letter was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

COLUMBUS, GA., *May 22, 1928.*

Re: Inland waterway from New Orleans to Apalachicola and from Apalachicola to Columbus.

Hon. WALTER F. GEORGE,

United States Senator, Washington, D. C.

DEAR SENATOR GEORGE: Your deep interest in this project has been heretofore manifested.

* * * * * * *

What I am particularly concerned about now is the provisions of H. R. 13512, which recently passed the House and is now pending before the Committee on Interstate and Foreign Commerce in the Senate.

The bill in question is an amendment to the act creating the Inland Waterways Corporation so as to increase its capital stock from $5,000,000 to $15,000,000, and also to amend the act creating the Inland Waterways Corporation in other particulars.

Of course, we heartily approve the proposal to increase the capital of the Inland Waterways Corporation so that it may be provided with adequate facilities to carry on its operations and to demonstrate the effectiveness and economy of water transportation on our inland waterways.

The following are the elements which are absolutely essential if commerce is to move over the inland waterways:

First. A dependable channel.

Second. Adequate terminal facilities.

Third. Carriers to move the traffic.

Fourth. Joint rail and water, or water and rail, or rail, water, and rail rates.

Heretofore the Inland Waterways Corporation has not been able to operate as effectively and successfully as it should have done, because of the failure of the railroad carriers to cooperate in the promulgation of the water and rail rates, etc.

Under subsection 3 of section 15 of the interstate commerce act, as amended, the Interstate Commerce Commission has jurisdiction over such joint rates and matters connected therewith, but the opposition of the rail carriers to such joint rates, the equitable division of the revenues therefrom, etc., has, in many instances, delayed for months and years cases before the Interstate Commerce Commission. The result is that the Inland Waterways Corporation has not operated as successfully as it should have done if these joint rates and equitable division of revenues therefrom had been effective.

My objection to the bill H. R. 13512 is particularly directed to the provisions of section 2 of the bill amending section 3 of the Inland Waterways Corporation act. I regard the provisions of section 2 of H. R. 13512 as highly discriminatory of other sections of the country than that served solely by the Mississippi River.

For instance, subsection (b) of section 2 of H. R. 13512 proposes to permit the extension of the service of the Inland Waterways Corporation, but only proposing to permit this extension to a tributary or connecting waterway of the Mississippi River. This would absolutely prohibit the barge line from operating barges between Mobile and Apalachicola and thence to Columbus over a canalized river.

Again, subparagraph (e) of section 2 of H. R. 13512 purports, by certain provisions therein, to expedite the procedure under which joint rates between rail-and-water carriers might be ordered by the Interstate Commerce Commission, but please note that this is restricted only to those persons, firms, or corporations "engaged or about to engage in a common-carrier service upon the Warrior River or the Mississippi River, or any tributaries thereof." In other words, under the provisions of H. R. 13512, if the intracoastal waterway was extended from Mobile to Apalachicola, and the Apalachicola and Chattahoochee Rivers were canalized to Columbus, a water carrier operating on such an inland waterway of the United States would not have the benefit of the expeditious mode of procedure provided in H. R. 13512 for the highly favored carriers operating on the Mississippi or Warrior Rivers. This does not need argument to show the discrimination.

I think that the provisions of subparagraph (e), restricting the application of that paragraph only to carriers operating on the Warrior or Mississippi Rivers, should be amended so that the procedure for obtaining the joint rates and equitable division of the revenue would be made to apply to all common carriers upon any of the inland waterways or intracoastal waterways of the United States. In other words, the provisions of H. R. 13512, with reference to joint rail and water rates, and division of the revenues therefrom, etc., should not be confined to any section of the United States, or to any waterway of the United States, but should be practically as broad as the provisions of subsection 3 of section 15 of the interstate commerce act.

In the report of the House bill the chairman said, "No water transportation service can successfully operate upon the inland waterways of the country to-day if it has to depend on port-to-port traffic. * * * Therefore it is absolutely necessary not only for the successful operation of the Government-owned barge lines, but for the successful operation of any privately owned transportation service, that through routes and joint rates and a fair division of the joint rates with rail carriers shall be available."

Notwithstanding the above, the House committee proposes to pass a law which will confine a remedy by which these ends may be achieved only to carriers operating on the Mississippi River. It is as unfair as anything could be.

* * * * * * *

Assuring you of my own appreciation and of the appreciation of the business interests in Columbus whom I represent, and trusting that you may be able to accomplish something beneficial, I am, with kind regards,

Yours very truly,

H. H. SWIFT,

Chairman Inland Waterways Committee.

REPORTS OF COMMITTEES

Mr. WALSH of Montana, from the Committee on Public Lands and Surveys, to which was referred the bill (S. 1512) to provide for contests of certain oil and gas permits, reported it without amendment and submitted a report (No. 1275) thereon.

Mr. CAPPER, from the Committee on the District of Columbia, to which was referred the bill (H. R. 10073) to change the name of Railroad Avenue between Nichols Avenue and Massachusetts Avenue, reported it without amendment and submitted a report (No. 1276) thereon.

Mr. BLAINE, from the Committee on the Judiciary, reported an amendment intended to be proposed to the bill (H. R. 11463) to fix the salaries of certain judges of the Territories and Insular possessions of the United States, and submitted a report (No. 1277) to accompany the said bill heretofore reported from that committee with an amendment.

Mr. THOMAS, from the Committee on Indian Affairs, to which was referred the joint resolution (S. J. Res. 139) for the relief of the Iowa Tribe of Indians, reported it without amendment and submitted a report (No. 1278) thereon.

Mr. BLACK, from the Committee on Claims, to which was referred the bill (S. 3219) for the relief of the Poston Brick Co., reported it without amendment and submitted a report (No. 1279) thereon.

ENROLLED BILLS PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that this day that committee presented to the President of the United States the following enrolled bills:

S. 1145. An act to authorize an appropriation for roads on Indian reservations;

S. 2965. An act authorizing the State of Indiana, acting by and through the State highway commission, to construct, maintain, and operate a toll bridge across the Wabash River at or near Vincennes, Ind.; and

S. 3864. An act to create a new division of the District Court of the United States for the Northern District of Texas.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. NORRIS:

A bill (S. 4551) authorizing the Treasurer of the United States to refund to the Farmers' Grain Co., of Omaha, Nebr., income taxes illegally paid to the United States Treasurer; to the Committee on Claims.

By Mr. GILLETT:

A bill (S. 4552) to provide for a survey of the Cape Cod Canal, Mass., with a view to providing improvements; to the Committee on Commerce.

By Mr. METCALF:

A bill (S. 4553) granting an increase of pension to Julia A. Singer (with accompanying papers); to the Committee on Pensions.

By Mr. VANDENBERG:

A bill (S. 4554) for the apportionment of Representatives in Congress among the several States under the Fourteenth Census; to the Committee on Privileges and Elections.

By Mr. BROUSSARD:

A bill (S. 4555) to provide for the payment of rental to the board of commissioners of the port of New Orleans of the property known as the New Orleans Army supply base, New Orleans, La.; to the Committee on Military Affairs.

A bill (S. 4556) authorizing the State of Louisiana and the State of Texas to construct, maintain, and operate a free highway bridge across the Sabine River at or near Burr Ferry, La.; to the Committee on Commerce.

By Mr. BROOKHART:

A bill (S. 4557) granting an increase of pension to Justine M. Thrift (with accompanying papers); to the Committee on Pensions.

By Mr. ROBINSON of Indiana:

A bill (S. 4558) for the relief of Will O. Jerico (with accompanying papers); to the Committee on Claims.

A bill (S. 4559) to revise and equalize the rate of pension to certain soldiers, sailors, and marines of the Civil War, to certain widows and former widows of such soldiers, sailors, and marines, and granting pensions and increase of pensions in certain cases; to the Committee on Pensions.

By Mr. DALE:

A bill (S. 4560) authorizing Elisha N. Goodsell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Lake Champlain between a point at or near Rouses Point, N. Y., and a point at or near Alburgh, Vt.; to the Committee on Commerce.

By Mr. CAPPER:

A joint resolution (S. J. Res. 163) to preserve for development the potential water power and park facilities of the gorge and Great Falls of the Potomac River; to the Committee on the District of Columbia.

OHIO RIVER BRIDGE NEAR EVANSVILLE, IND.

Mr. McKELLAR. I desire to enter a motion to reconsider the vote by which the bill (S. 4439) to extend the times for commencing and completing the construction of a bridge across the Ohio River at or near Evansville, Ind., passed last night.

The VICE PRESIDENT. The motion to reconsider will be entered.

CUMBERLAND RIVER BRIDGE

Mr. BARKLEY. Last night the Senate passed the bill (H. R. 13203) granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a toll bridge across the Cumberland River at or near Burnside, Pulaski County, Ky. The Senate and House had already passed a bill to the same effect and it has been signed by the President. I ask unanimous consent that the action on the bill last night be rescinded and that the bill be indefinitely postponed.

The VICE PRESIDENT. Without objection, it is so ordered.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on May 23, 1928, the President approved and signed the following acts and joint resolutions:

S. 1369. An act to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington;

S. 2463. An act to amend an act entitled "An act for the purchase of a tract of land adjoining the United States target range at Auburn, Me.," approved May 19, 1926;

S. 2542. An act for the construction of a private conduit across Lincoln Road NE., in the District of Columbia;

S. 3463. An act to recognize commissioned service in the Philippine Constabulary in determining rights of officers of the Regular Army;

S. 3699. An act for the relief of the land-grant railroad operated between the station formerly known as East Portland, in the State of Oregon, and Roseville, in the State of California;

S. J. Res. 23. Joint resolution providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the Old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779; and

S. J. Res. 97. Joint resolution authorizing the President to appoint three delegates to the Twenty-third International Congress of Americanists and making an appropriation for the expenses of such Congress.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House insisted upon its amendment to the joint resolution (S. J. Res. 5) to grant a preference to the wives and minor children of alien declarants in the issuance of immigration visas, disagreed to by the Senate; agreed to the conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. JOHNSON of Washington, Mr. JENKINS, and Mr. BOX were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendment of the House to each of the following bills:

S. 1609. An act recognizing the heroic conduct, devotion to duty, and skill on the part of the officers and crews of the U. S. S. *Republic*, *American Trader*, *President Roosevelt*, *President Harding*, and the British steamship *Cameronia*, and for other purposes; and

S. 1822. An act to authorize the Secretary of War to transfer or loan aeronautical equipment to museum and educational institutions.

The message further announced that the House had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to each of the following bills:

H. R. 11134. An act to authorize appropriations for construction at military posts, and for other purposes; and

H. R. 12381. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

DEFICIENCY APPROPRIATIONS

Mr. WARREN. Mr. President, I ask that the Senate resume the consideration of the deficiency appropriation bill.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes.

The VICE PRESIDENT. The pending question is on the amendment offered by the senior Senator from New Mexico [Mr. BRATTON].

Mr. WARREN. Mr. President, yesterday consent was given that committee amendments should be first considered. We have a dozen or more committee amendments which I would much prefer to have acted on now. Then we can take up the individual amendments that were not before us in the committee.

Mr. BRATTON. I withdraw the amendment. The Chair announced yesterday that we had finished with the committee amendments, and I therefore presented my amendment.

Mr. WARREN. The announcement of the Chair covered the amendments in the printed bill. These other matters are those which have come up from the Bureau of the Budget since the bill was reported, and the committee has acted on them and is now ready to lay them before the Senate.

Mr. BRATTON. I withdraw my amendment.

SUPPLY OF ARMY EQUIPMENT TO AMERICAN LEGION

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Wyoming yield to the Senater from New York?

Mr. WARREN. I yield.

Mr. COPELAND. I do not desire to do anything which indicates any lack of confidence in a committee of the Senate, but I am forced to do so, because in a sense we have a report of the Committee on Military Affairs that they have unanimously declined to act upon a bill permitting the American Legion of my State to borrow from the War Department certain mattresses and blankets and cots, at no expense to the Government, putting themselves under bond that the material will be returned in as good condition as it is received.

It is manifestly unfair that these veterans, who were sent out and asked to sleep in the mud, perhaps on mattresses now and then, should not have the privilege, in their reunions, of having the use of this Government property in order that they may carry on their conventions in a decent way.

I wish to move that the Committee on Military Affairs be discharged from the further consideration of the bill (H. R. 12621) to authorize the Secretary of War to lend War Department equipment for use at annual State convention of the American Legion of New York, a bill which has passed the House.

Mr. REED of Pennsylvania. Mr. President, I make the point of order that the motion is not in order at this time.

The VICE PRESIDENT. The point of order is well taken.

Mr. COPELAND. I intend at some time, when it is in order, to bring up this bill, because it is not proper, in my judgment, that the Committee on Military Affairs should determine that a matter of this sort should not be considered by the Senate.

Mr. LA FOLLETTE. Mr. President, the Senator may enter the motion.

Mr. COPELAND. At this time?

Mr. LA FOLLETTE. Yes.

Mr. COPELAND. If I may do that, I enter such a motion.

Mr. SWANSON. Mr. President, I fully concur with the Senator from New York. I think these matters ought to be brought before the Senate so that the Senate can pass on them one way or the other.

I have a bill pending making provision similar to that referred to by the Senator from New York, to supply tents to the American Legion in my State for use during their convention. They have telegraphed and written me that it is utterly impossible to have a successful meeting of the legion unless they can get some tents. They would pay all the expenses incurred in bringing them to the place of the convention and returning them, and would guarantee that they would be returned without any injury whatsoever. I can see, if organizations in every State in the Union were asking for these favors, that there might be some reason why their requests could not be met; but until a situation of that kind arises, where there is an emergency, the Government should do what it can to make these meetings successful. These men are prepared to go back into the service at any time the country needs them, and as there can not be a successful encampment without these loans from the Government, it does seem to me that when the Committee on Military Affairs meets to-morrow they should report these two bills and let these encampments be held in these two places. I urge that that be done.

Mr. REED of Pennsylvania. Mr. President, so far as I am concerned, I should be glad to have the committee report the bills adversely and recommend their indefinite postponement. These are not the only two bills of this nature that are pending. Pretty nearly every Senator here has introduced similar bills, and if the Congress wants to put the War Department into the hotel business, all right; but I do not believe that its personnel is sufficient to attend to all of these loans of equipment or that it has sufficient reserve supplies on hand.

Mr. FLETCHER. Mr. President, the requests not only include tents but they cover mattresses and cots, and covers and blankets, and all that sort of thing. We will have to resupply the Army if we meet this sort of demand.

Mr. DILL. Mr. President, a joint resolution has passed the House providing for a similar loan to the American Legion of my State. It seems to me the committee ought to take some action and make it applicable to all of the States, and not attempt to report out one or the other of these bills adversely or favorably, as the case may be, but that we ought to have uniform action regarding the matter.

Mr. REED of Pennsylvania. That is what we have done. The requests have been so numerous that the committee has taken unanimous action against reporting out any of these bills for the loan of equipment to State conventions. These are all State conventions. We have all been in favor of making the loans to the national conventions of these veterans' organizations, but we have to draw the line somewhere, and that is where the committee decided to draw it.

Mr. SWANSON. Mr. President, may I ask the Senator if the committee has ever reported a bill to make a loan of similar equipment to any State Legion convention?

Mr. REED of Pennsylvania. To the best of my knowledge, we never have; but at one time a bill was passed, without reference to our committee, which authorized a loan to a State encampment of the Confederate veterans in Arkansas.

Mr. SWANSON. I mean to these State Legion conventions.

Mr. REED of Pennsylvania. So far as I know, we have never authorized a loan to any State Legion convention. Congress has never done that.

Mr. DILL. Mr. President, these tents and mattresses are not seriously harmed by being used. It seems to me they could be very properly loaned in the various States. They will grow old and wear out, anyhow. I can not see any valid reason why the department should not be authorized to loan them in each of the States.

Mr. REED of Pennsylvania. Every time a blanket or a cot or a mattress is loaned out it has to go back and be renovated before it can be put in storage.

Mr. DILL. The veterans' organizations could be required to pay all the expense of renovating them.

Mr. WARREN. Mr. President, this is entirely aside from the consideration of the deficiency bill, of course, but so long as the question is before us let me say that through long experience in these matters we have found it quite impossible to loan as many of these articles as are being called for. Occasionally we have, as one Senator has said, loaned to certain associations, but we loaned tents and cots—not blankets. We refused the loan of the other equipment. In fact, the other things were seldom called for. Now various organizations apply for the loan of tents, cots, mattresses, blankets, sheets, pillow slips, towels, and every other commodity that one needs in keeping house. The Army has not a sufficient supply of that kind of thing to meet all the demands that are made.

I submit that the committee has acted wisely in halting now, to determine finally whether they have been right all this time, or whether we are going into the business of supplying a multitude of these things through the department. If we should do so, in case of war we would not have them, because they would be loaned out.

Mr. BLAINE. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Wyoming yield to the Senator from Wisconsin?

Mr. WARREN. I yield.

Mr. BLAINE. Mr. President, permit me to suggest to the Senator from New York that the thing he wants to accomplish can be accomplished in a very simple manner. There is a National Guard organization in every State. They are equipped with tents and cots and blankets and various household uten-

sils. In fact, they are equipped with all of those outfits for the purposes to which the Senator refers, and through a request made to the adjutant general of the National Guard organization arrangements can always be made for the accommodation of purely State conventions of these respective patriotic orders.

Let me suggest to the Senator from New York that in my own State the National Guard organization has always furnished the equipment under certain conditions and restrictions that did not, however, limit their use. Moreover, we not only did that for State conventions, but we also did it when the Grand Army of the Republic held their national convention in the city of Milwaukee. The State took care of them through the National Guard organization. It is a convenient way by which to take care of the Senator's request and the proper way to do it.

Mr. COPELAND. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from New York?

Mr. WARREN. I yield.

Mr. COPELAND. The difficulty with the suggestion of the Senator from Wisconsin is that this is a time when the convention is to be held and at the same time the State encampment is going on, but it does not make any difference whether that is so or not. To me it is a strange thing that we should be informed, as we have been by the chairman of the committee, that the Committee on Military Affairs declines to lend War Department equipment to a State encampment for the American Legion, for the Veterans of Foreign Wars, for the Confederate Veterans, for the Grand Army of the Republic, for the United Spanish War Veterans, or other organizations of a similar kind. Here we are seeking to build up the national defense, anxious to have it participated in by men such as these men who are veterans of the last war and who might be called upon in another war. We ought to be very glad, indeed, to furnish the material.

The Senator speaks about the renovation necessary. Blankets and things of that kind have to be renovated whether they are used or not, and the good housekeeper finds usually that articles which are in use are much better kept than those which are preserved in camphor balls.

I shall say nothing more at this time. I have entered the motion and would be very glad, indeed, if it would be found unnecessary to call it up, because if the Senator from Pennsylvania can do nothing more than to report the bill adversely, we at least then would have it on the calendar and could give it consideration to determine what the sentiment of the Senate may be with regard to this matter.

Mr. BLAINE. Mr. President, I would like, with the permission of the Senator from Wyoming, to make a further brief statement.

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Wisconsin?

Mr. WARREN. I yield.

Mr. BLAINE. If the Senator from New York will go to the Governor of New York, who is the commander in chief of the State militia or the National Guard organization of his State, he will find that arrangements can be made through the quartermaster's department of the State of New York, and so it is in every State. Action can be taken by the governor through the quartermaster's department to obtain all this equipment, equipment that belongs to the National Government, it is true, and equipment that is under the control and jurisdiction of the respective States under the quartermaster's department, for which the quartermaster's department is responsible to the Federal Government, but there is no objection to the State using that equipment for any lawful or proper purpose the State desires. The organization that seeks the use of the equipment, of course, returns it without any injury and, therefore, there is no loss to the State and no loss to the National Government. The proper way and the regular way to meet the request of the Senator from New York is for the Senator to go to his governor, he to the adjutant general, and they in turn can furnish all the equipment not only for a State convention but also for a national conference or convention of any of the organizations referred to, if they so desire.

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from New York?

Mr. WARREN. I yield.

Mr. COPELAND. I thank the Senator from Wisconsin. I am perfectly well aware of the fact that we could go to the distinguished Governor of the State of New York and that he would give every facility for the aid of these veterans who desire to have the encampment. It seems strange, however, to a group of men who served in a national emergency that there should be any unwillingness to accede to their request. But if there should be such objection, I will inform the Senator from Wisconsin that we will appeal to the Governor of New York, who very soon will be in the White House, and then we can make appeals to him on matters relating to the Federal Government.

Mr. REED of Pennsylvania. Does the Senator suggest that Governor Smith would not be willing to make the loan?

Mr. COPELAND. Oh, no. The governor of my State would gladly make the loan for the encampment in the State of New York. I assume, however, that the Senator from Pennsylvania will have his heart softened sufficiently so we may not find it necessary to change the date of the various encampments in order that they may proceed as originally planned.

HERBERT HOOVER

Mr. BLEASE. Mr. President, I hold in my hand a copy of a speech delivered by Ralph D. Cole, of Ohio, on Monday evening, May 21, 1926, at Wheeling, W. Va. The speech is one of the ablest that it has ever been my pleasure to read. There are parts of it with which I, of course, being a southern State-rights Democrat, can not agree, but there are other parts of it which are so interesting that I shall ask that it be printed in the CONGRESSIONAL RECORD. I desire to call especial attention to his remarks under the head of "Americanism."

In 1920, when Mr. Herbert Hoover was seeking the nomination for President on both the Democratic and Republican tickets, Senator FESS, of Ohio, then chairman of the Republican Congressional Committee, said:

"The Republican Party can not accept an internationalist as its standard bearer. It will demand a leader whose Americanism is not in question and whose political views are not a matter of speculation. We can not go to the country to contest the fallacies of the Wilson administration with an internationalist attached to the Wilson administration as our leader. Hoover must be greatly embarrassed in seeking the nomination at the hands of a party he conspired against with the party's opponent to defeat in 1918."

Mr. Hoover has lived an international life, builded an international character, all his opinions on fundamental questions being colored with internationalism. When a crisis crashes in life men instinctively revert to past experience for guidance. The experience of Herbert Hoover has been foreign to our standards, alien to our institutions. The President of the United States must meet a crisis armed with American experience, panoplied with American precedents.

I would like to read further from this speech, but shall not do so now. As I said, being a southern State-rights Democrat, there are parts of it in which I can not concur, but I respectfully recommend the speech to both the Democratic and Republican Senators and to the American public.

The PRESIDING OFFICER. Without objection, the request of the Senator from South Carolina is granted.

The speech is as follows:

SPEECH DELIVERED BY RALPH D. COLE, OF OHIO, MONDAY EVENING, MAY 21, 1928, AT WHEELING, W. VA.

We come to-night to think and speak of things of primary importance to America. We address our remarks to the people of West Virginia who believe in the principles of the Republican Party. West Virginia, child of the Nation's travail, carved from the heart of the mountains by the brain of Lincoln and the sword of Grant, to you, noble descendants of heroic ancestry, the Nation now makes appeal.

On the 29th day of May a primary election will be held in this State to determine your choice for the Presidency of the United States for the next four years. This is a grave responsibility, a sacred privilege, to be discharged with high intelligence and lofty purpose if free institutions are to endure. The ballot box is the symbol of liberty and peace, which has abolished the ancient tyranny of force. Let it be used to promote the happiness and prosperity of the people, and to advance the ideals of the Republic. He fails in the primary test of citizenship who disregards this duty.

QUALIFICATIONS FOR THE PRESIDENCY

What are the fundamental qualifications for the Presidency of the United States?

Daniel Webster said: "When large bodies are to be addressed on momentous occasions, when great interests are at stake and strong passions excited, nothing is valuable in speech further than is connected with high intellectual and moral endowments."

The President of the United States must be a man of "high intellectual and moral endowments"—a man of extraordinary mental power and moral courage. It is safe to assume that no man will be presented to the convention lacking in these obvious yet fundamental requirements.

The President of the United States must be a leader of men. He is not only the titular head of the Government but he must be the leader of the American people. The power to command the respect, the confidence, and the loyalty of a nation of 100,000,000 people occupying a

continental empire, is a most extraordinary endowment. The spirit of leadership is divine. God chooses his prophets and plants the divine spark of leadership in heart and brain. It may be the attribute of a prince, but more often the quality of a peasant. The lowly of birth in their rise in life pass through the gradations of human society, and catch the heart throbs of the universe of men on their way; learning thereof, he qualifies for leadership. Great leaders may tower above their fellow men, but their feet remain firm on the common level of humankind. The divine spark of leadership is implanted in man by the Almighty, and fanned into flame by human experience—living and mingling with the people he aspires to lead, learning of their lives and characters, their hopes and aspirations by association, bearing their burdens, sharing their triumphs, exemplifying their virtues and ideals by his "daily walk and conversation," and above all, by fighting their battles in their march to a higher and nobler destiny. Such a leader the Republican Party demands in 1928 as its candidate for the Presidency. Let no man be named who possesses these qualities not in full and majestic measure.

REPUBLICANISM

You are called upon to express your choice for the Presidency, and to select delegates to represent you in the Republican National Convention at Kansas City on the 12th of June. That convention will adopt a Republican platform, and must nominate a Republican for its standard bearer. That candidate must, of necessity, embody the very spirit of the platform adopted. His life, his record, his character must stand as a guaranty for the redemption of the pledges made to the American people, otherwise our professions of political faith are but "sounding brass and tinkling cymbals."

The contest in West Virginia is between United States Senator GUY D. GOFF and Secretary of Commerce Herbert Hoover. Senator GOFF is a Republican. That statement stands unchallenged, backed by more than a quarter of a century of distinguished service to his country and party. He was born in Clarksburg, W. Va., the son of Gen. Nathan Goff, patriot, scholar, lawyer, jurist, soldier, and statesman, whose entire life was an honorable and brilliant record of service and devotion to country and to the Republican Party. Among other positions of trust and importance, he was Secretary of the Navy under President Hayes, served as volunteer, lieutenant, adjutant, and major in the Union Army, member of the State legislature, Representative for three terms in the National House of Representatives, and as a Senator of the United States from West Virginia from March 4, 1913, to March 4, 1919, thus terminating one of the most eventful and useful public careers in our history.

Senator GUY DESPARD GOFF, worthy son of an illustrious father, following in his footsteps in public service and spirit, as well as legal ability, is recognized as one of the great constitutional lawyers of the country. As soon as we entered the World War Senator GOFF offered his services, and served throughout, his legal knowledge and experience proving invaluable, first in the office of the Judge Advocate General, working out plans, drafting legislation, and compiling rules for the first draft, then on the other side on General Pershing's staff, where he served until the close of hostilities. After the armistice he was assigned to Paris to take charge of the legal details involving rents, requisitions, and claims, and later he had charge of the courts of the army of occupation in Germany. Returning home he served as general counsel for the United States Shipping Board, refused the chairmanship of that board, preferring to further employ his legal talents for the benefit of the country as Assistant Attorney General of the United States. He is now serving his State as Senator of the United States, where he is a conspicuous member of the important Committees on the Judiciary, Interstate Commerce, and Mines and Mining, and where he wields powerful influence.

By birth, blood, inheritance, practical experience, and constant American contacts, by tradition and education he is equipped to go to the head of this great Nation, where he would bring to the solution of all questions a determination in accordance with American ideals and policy. He is recognized far beyond the borders of our own country as an authority on constitutional and international law. Traveling recently in South America, his interpretation of the Monroe doctrine was sought, and speaking to the Argentine people he made an address which was widely circulated, in which he said:

"On December 2, 1823, President Monroe sent his historic message to Congress, in which he established with all the force of international law his famous doctrine that moral qualities shall rule in the affairs of nations, and that the United States of North America was a brother in blood and a sister in thought to the then struggling republics of South America. It was not until January, 1825, that Great Britain saw fit to recognize the independence of the Argentine Republic and receive her into the family of nations. The question was then settled for all time, and since then both the United States and Great Britain have been and now are the true and the tried friends of this most wonderful of nations."

HERBERT HOOVER'S REPUBLICANISM CHALLENGED

We challenge the Republicanism of Herbert Hoover. He claims to be a Republican, but his record belies his word. He was born August 10, 1874. He was 22 years of age, living in California, in the campaign of 1896, when William McKinley was the Republican candidate for President and William Jennings Bryan led the hosts of the Democracy. The issues were sound money and protection. That was our most crucial political battle for the industrial development of America. Herbert Hoover, equipped for the battle of life in the public schools of America, in that decisive contest for the preservation of American financial and industrial supremacy, lacked the interest and patriotism to even cast his first vote. Do you recall the thrill of going to the polls to cast your first vote? Herbert Hoover had no thrill; he failed to qualify as an American citizen. He was then neither a Democrat nor a Republican. At the age of 23 he left his native land and he never returned to vote until 1918, at the age of 45. Having lived for twenty-odd years under the British flag, he returned to America and announced himself a "Liberal" in politics, a Liberal being one of the major political organizations of England.

In 1918 Herbert Hoover was a Woodrow Wilson Democrat. In the congressional elections of that year President Wilson demanded the election of a Democratic Congress, in the following language:

"My fellow countrymen, the congressional elections are at hand. They occur in the most critical period our country has faced or is likely to face in our time. If you ever approved of my leadership and wish me to continue to be your unembarrassed spokesman in affairs at home and abroad, I earnestly beg that you will express yourselves unmistakably to that effect by returning a Democratic majority to both the Senate and House of Representatives."

In support of that demand Herbert Hoover made the following statement:

"My own views are summarized in a word: That we must have united support for the President. I am for President Wilson's leadership not only in the conduct of the war but also in the negotiation of peace, and afterwards in the direction of America's burden in the rehabilitation of the world. There is no other leadership possible now if we are to succeed in these great issues."

The entire country was so aroused and shocked by this demand for a Democratic Congress, in the face of the loyalty of the Republican Members, that ex-Presidents Theodore Roosevelt and William Howard Taft made the following protest:

"We earnestly deprecate extending the unified, uncontrolled leadership of the Commander in Chief to the making of a permanent treaty of peace or to the framing of those measures of reconstruction which must seriously affect the happiness and prosperity of the American people for a century. We urge all Americans who are Americans first to vote for a Republican Congress."

The sponsors for Secretary Hoover, attempting to explain his support of President Wilson's demand for a Democratic Congress in 1918, contend that he merely indorsed the war policy of President Wilson, and urged that it was the duty of all loyal Americans to support the President in the conduct of the war. There is only one thing wrong with this attempted defense. It is untrue! President Wilson did demand a Democratic Congress. Herbert Hoover not only heartily joined in that demand for the support of President Wilson in the conduct of the war, but in his own language stated:

"I am for President Wilson's leadership, not only in the conduct of the war but also in the negotiation of peace, and afterwards, in the direction of America's burden in the rehabilitation of the world. There is no other leadership possible now if we are to succeed in these great issues."

This demand of President Wilson, supported by Herbert Hoover, challenged the loyalty and reflected upon the patriotism of every Republican in America and every mother in the land with a son in uniform. Republicans were good enough to fight and fall under the American flag in France or Flanders Field, but, in the judgment of Mr. Herbert Hoover, they were not fit to sit in the Congress of the United States, where they had fought the battles of President Wilson and made possible his war policy, upholding, to their everlasting honor and glory, his hands when he was opposed by his own party in both Houses of Congress. Senator GOFF, at the very time that Herbert Hoover challenged the right of Republicans to sit in the American Congress, after patriotic service at home was in the uniform of his country on the other side of the sea, on the staff of General Pershing. On the same day, November 2, 1918, that Herbert Hoover wrote that letter demanding a Democratic Congress, I, too, was in the uniform of my country in our first great drive on Flanders Field. The boys were fighting and dying that day—Republicans, Democrats, Socialists, men of all political faiths and religious creeds, all Americans, fighting in a common cause. They were inspired with one purpose, and one purpose only, to maintain the honor of the American flag and to save the civilization of the world. I had a brother a candidate for Congress that year. I was good enough to be on Flanders Field that day, but my own brother, according to Herbert Hoover, was unfit to sit in the American Congress, for one reason and one reason only—he was a Republican.

In 1920 the name of Herbert Hoover was on the Democratic ballot in several States, including Vermont and Michigan, where the following names appeared; Herbert Hoover, William Gibbs McAdoo, A. Mitchell Palmer, William Jennings Bryan, Edward I. Edwards.

Mr. Hoover's sponsors undertake to explain in extenuation of this circumstance that his name also appeared on the Republican ballot at that primary election in Michigan. It is understandable how a citizen with some degree of consistency might at different times run as a Republican and a Democrat, but how it was possible to be a Wilson Democrat and a Harding Republican at one and the same time we are unable to comprehend.

The Democrats had indorsed the League of Nations. The Republicans denounced it. Hoover was for both and against both. The Republicans favored a protective tariff. The Democrats denounced it. Hoover was for both and against both. The Democrats favored free trade. The Republicans denounced it. Hoover was for both and against both. How can a man have any political principles who will run on a Democratic and a Republican platform at one and the same time when great national issues are involved?

There must be a fundamental reason for this disposition to vacillate, this eagerness to embrace any political doctrine that bids fair to triumph. It is a question of political character. Mr. Hoover has no stability of political character. He is not well grounded in the fundamental principles that should determine the action of an American citizen in relation to questions of public policy and administration. Proof of this is found in his support of utterly conflicting measures. The cause for these contradictions in his character is quite apparent. During the entire formative period of his political character, of his opinions in relation to human government, principles and policies fundamental to the Nation's welfare, he did not live in America.

London does not live according to our standards, nor does England have America's viewpoint. It is just as impossible to catch the American viewpoint from England as it is to catch the English viewpoint from America.

The moral character of a man is shaped and molded by the time he attains his majority. It is molded in the home; in the domestic circle; under the guidance of parental influence; in the schools, where the youthful mind is taught to bud and flower; in the church, where the moral law is learned and Christian motives instilled.

The political character of a man is molded after he begins the serious study of public questions. His ideas on human government, on the fundamentals that underlie the whole structure of governmental institutions, his opinions in relation to the great principles best adapted to serve the public weal—all these influences that enter into formation of a citizen's political character are determined in the main before he attains the age of 40. During that entire formative period Herbert Hoover lived outside of the United States. He was in a foreign atmosphere, living and mingling with people alien to our institutions. He did not even vote in America until he was 45 years of age. He therefore lacks that stability of political character typical of all real Americans.

The American people will never elect for their President a man who voluntarily left his native land at the age of 23 and never returned to vote until he was 45. For 20 years Herbert Hoover lived at Red House, London. The man who lived that length of time at "Red House," London, will never live four years at "White House," Washington. Better an Americanized alien than an alienized American for President of the United States.

If Washington had lived the life of Herbert Hoover, he would have been a Tory and not the Father of His Country.

If Jefferson had lived the life of Herbert Hoover, he would not have been the author of the Declaration of Independence.

If Jackson had lived the life of Herbert Hoover, he would not have been at New Orleans.

If Lincoln had lived the life of Herbert Hoover, he would not have been the immortal leader of the American people in the battle for the preservation of the Union and the author of the Emancipation Proclamation.

If Roosevelt had lived the life of Herbert Hoover, he would have gone to London instead of the plains of the Dakotas and would never have been President of the United States and the great American of his day and generation.

If American immortals had lived the life of Herbert Hoover, we would have no American history; we would still be a colony of Great Britain.

Mr. Hoover sought the Democratic nomination in 1920, but his aspirations were demolished by one volley from the batteries of Senator JAMES A. REED, of Missouri, as follows:

"Mr. President, some day when I have the time I am going to have some remarks to make about Mr. Hoover. I pass the subject at this time with the remark: To what estate has our country come when it can be seriously proposed that a man shall be nominated for President who probably has never voted yet in the United States; whose every interest and inclination kept him in Great Britain for 23 years out of a life of 46 years; who when he returned to America knew so little about our politics that he described himself as a 'Liberal,' and who to-day is so ignorant of public policies that even now he can not tell whether he is a Democrat, a Republican, a Socialist, or a Populist; he apparently only knows that he wants to be President of the United States, and we are told he has $10,000,000."

On these grounds of incontrovertible facts and incontestable proof we challenge the Republicanism of Herbert Hoover, and his right to the Republican nomination for the Presidency of the United States.

The chairman of his campaign committee, Mr. James W. Good, stated before the senatorial investigating committee, May 11, 1928, in endeavoring to explain the large expenditures of money for Mr. Hoover, that it was necessary to do so to meet certain charges, among which were that Mr. Hoover is not an American, that Mr. Hoover is not a Republican. Mr. Hoover has contested in but two primaries up to date—Ohio and Indiana. If it required an expenditure of $250,000 to attempt to prove to the people of Ohio and Indiana that Herbert Hoover is an American and is a Republican—and failed in both—how much would it cost the Republican Party to establish his Americanism and his political faith in the November election?

It will not cost a penny to establish the Americanism and the Republicanism of Senator GOFF. His life, his record, and his character give ample proof of his qualifications for the Presidency.

THE LEAGUE OF NATIONS

The Republican Party throughout all its history has championed a consistent and patriotic program for the public welfare. It has stood invincibly for the sovereignty of the Federal Government.

Two serious assaults have been made upon the sovereignty of this Republic—secession and the League of Nations; the one sought to transfer sovereign power back to the States of the Union; the other to transfer it to a supergovernment in Europe. Both failed—the one in a battle of bullets, the other in a battle of ballots, both decisive victories for the Republic. Senator GOFF stood unflinchingly against the League of Nations at all times. "The Republic still stands in all its original power and all its pristine glory."

The man who sought to transfer that power can not be trusted to hold it.

Herbert Hoover advocated the League of Nations just as it fell, full-fledged, from the brain of Woodrow Wilson. In an address delivered at Stanford University, October 3, 1918, he said:

"The peace treaties can not be carried out without the league. Without a League of Nations to guide the Republic, Europe will go back to chaos.

"If the League of Nations is to break down, we must at once prepare to fight.

He was so intent upon the ratification of the League of Nations, and the creation of this supergovernment on the other side of the sea, that he threatened the people of America with war if they failed to adopt it. He threatened to send our boys back to Europe to fight and die; he threatened the mothers of America in case the league should fail.

A League of Nations to guide a Republic! What is wrong with America guiding herself?

Mr. Hoover naturally has more faith in English guidance than America has. He lived in London over 20 years, and made a vast fortune under the British flag; hence his distrust of our capacity to guide ourselves, and his desire to put us in the hands of a league controlled by Great Britain to shape our destiny.

Mr. Hoover said: "If the league fails Europe will go back to chaos and America must at once prepare to fight." The League of Nations did fail. Europe did not go back to chaos. America did not "at once prepare to fight." America has not fought. Peace prevails and there are no war clouds on the national horizon. Mr. Hoover's vision was wrong, his judgment unsound, his prophecy fallacious. Prophesy again, Mr. Hoover! Predict permanent peace instead of war, order and happiness in Europe instead of chaos, and that America will not go back to Europe to fight, but will stay at home and will mold her own destiny in harmony with American ideals.

Mr. Hoover's sponsors tell us that the League of Nations is past history; that Mr. Hoover stood shoulder to shoulder with Calvin Coolidge on the league; and that the League of Nations is a dead issue. "Dead issues" have a way of coming to life. There is to-day a nation-wide, highly financed organization spreading propaganda throughout the country in favor of the entrance of America into the League of Nations. If Herbert Hoover stood "shoulder to shoulder" with the Republican Party on the League of Nations, it was not until after the American people had repudiated it by a majority of 7,000,000 votes, and if we had followed the leadership of Herbert Hoover in 1918 to-day we would be a member of the League of Nations. Herbert Hoover has never publicly stated that he is not still for the League of Nations.

The issue would instantly revive if the Democrats gained a majority in the Congress. It is still debated with spirit. It is there always, lurking in the background, and the magic name of Woodrow Wilson would revitalize that issue the moment the Democrats come into power. The silver standard was a "dead issue" in 1908, but the American people refused to elect Mr. Bryan President because they knew that his judgment was unsound on a fundamental American doctrine.

We can not trust the destinies of this Nation to a man in the presidential chair who 10 years ago advocated a policy that would have thrown America into the whirlpool of European strife and revolutionized the entire domestic and foreign policy of this Republic.

PROTECTIVE TARIFF

A protective tariff is one of the fundamental doctrines of Republicanism. It is a concept of Alexander Hamilton. That policy has been responsible for the industrial development of America. It is absolutely essential to the prosperity and happiness of the American people. Referring to the policy of protection of American industry as formulated and applied by Hamilton, Daniel Webster said:

"He smote the rock of national resources and abundant streams of revenue poured forth. He touched the dead corpse of public credit and it sprang upon its feet."

No man will be nominated for the Presidency at Kansas City whose position is not sound on that doctrine. Senator GOFF has always been an able advocate of the doctrine of protection. He speaks for himself—not through his "sponsors." He has defined his position on protection in the following public utterance:

"I am for a high protective tariff. Everyone knows that in the factories of Europe the average laboring man is paid a wage upon which an American citizen can not and will not live. I am against the living wage paid in Europe—it is not enough. I am in favor of the saving wage—a fair day's work for a fair day's pay—and the leisure to enjoy it. In the welfare of the wage earner lies the security of the present and the perpetuity of the future. Articles are made cheaper in Europe than we can make them with our high wage scale in this country. So unless there is a protective duty on goods made in Europe, a duty measuring the difference between the wages paid here and the wages paid there, the American manufacturer will be compelled to close down and the American workman will be without employment. This is a plain, practical proposition, no one can deny its soundness. The tariff is a question of wages, and the working man of America reduced to the standard of the pauper paid labor of Europe. The American workman is a better workman. No one wants the great industries of this country forced to close their doors. No one wants those now employed to have nothing to do."

Mr. Hoover, has failed to announce his position on this vital issue. He has remained silent. The only evidence we have as to his attitude on the American system of protection is the word of one of his sponsors, who marshaled all his proof in an address delivered at Cleveland during the campaign in Ohio. It consisted of a statement from a former Member of Congress to the effect that "Hoover seemed to be all right on protection," and the citing of two talks that Hoover made in Oklahoma after he became a candidate for the Presidency in 1926. But he failed to disclose a single statement by Mr. Hoover on the tariff. It was simply an inference drawn from general statements in relation to our industrial progress. His evidence is not convincing. Mr. Hoover's silence is self-condemning. Two feeble references to the tariff hardly qualify him to sit in the seat of William McKinley.

Democracy is preparing to make a desperate assault on our protective tariff system. It will be as much an issue in 1928 as it was in 1896, when William McKinley was our standard bearer. It would spell disaster to the cause of eRpublicanism to accept a candidate without a record on this issue.

HOOVER'S DOCTRINE OF INTERNATIONALIZING AMERICAN INDUSTRY

Secretary Hoover says:

"I believe that we have to-day an equipment and a skill in production that yields us a surplus of commodities for export beyond any compensation we can usefully take by way of imported commodities. * * * There is only one remedy and that is by the systematic, permanent investment of our surplus production in reproductive works abroad. We thus reduce the return we must receive to a return of interest and profit."

Mr. Hoover's doctrine is the doctrine of the British Empire; it is the Democratic doctrine of free trade—the same old argument between James G. Blaine and William E. Gladstone. With our agriculture prostrate, Mr. Hoover would send billions of our money to "permanently invest" in foreign factories.

Mr. Hoover's doctrine of internationalizing American industry conflicts with the doctrine of American protection. The purpose of protection is the development of American industry and the maintenance of the American standard of wages and living; that American capital shall be invested in American enterprises, both industrially and agriculturally. We have pursued this policy for three-quarters of a century, to the enrichment of the Nation and the prosperity of our people. The doctrine laid down by Mr. Hoover—that our surplus capital shall be permanently invested in foreign countries—is as revolutionary as his advocacy of the League of Nations. He seems to assume that the resources of this country have been fully developed. This continent still holds in her mountains and valleys, in her lakes and rivers and forests, undeveloped resources for the investment of American capital, the employment of labor, and the enrichment of our own people.

Mr. Hoover's doctrine is un-American, destructive of existing enterprises, and lays the hand of stagnation on our future progress. Its ultimate purpose, and certainly its final result, would be the destruction of protection. In pursuance of Mr. Hoover's doctrine already uncounted millions of American dollars have been loaned abroad and invested in foreign enterprises. What tremendous impetus would be given to that program should Herbert Hoover become President of the United States! If he should become President he would be in such position of power that he could put this doctrine of investment of American capital in foreign nations and the building of factories abroad into complete and full effect.

Since the war the international bankers of America have loaned to Europe some $15,000,000,000, a sum equivalent to one-fourth of all the banking resources of the United States, and almost equal to the sum that has been absorbed from the invested capital in American agriculture.

These foreign investments have created the demand for the cancellation of the European debt. These foreign securities have been floated throughout the country, and those who hold these securities reason that if the European debt is canceled it will add to the value of their foreign holdings.

At the present time the United States Government holds a first mortgage for the repayment of its European loans; but if this Government should cancel those loans, the investors in these foreign securities would hold the first mortgage.

We are opposed to the cancellation of the European debt. This action has been demanded on three different grounds, none of which is sound:

1. That it would restore the economic stability of the European nations.

Cancellation of the European debt, in existing conditions, would be equivalent to repudiation. Economic stability does not come from the repudiation of obligations, public or private. Good faith in the discharge of financial obligations is inwrought into the very character of the American people, and they will not tolerate either domestic or foreign repudiation.

2. It is contended that cancellation of the European debt would ultimately accrue to our advantage; that ample return would come to us by way of increased foreign trade.

This contention is purely speculative. No one knows what the effect of cancellation would be upon foreign commerce. Commercial intercourse between nations is based upon economic gain.

3. It is contended that the cancellation of the European debt would have a tendency to restore good will toward America.

There is no sound reason why there should be ill will toward America on the part of the nations charged with these obligations, but, on the contrary, every reason why there should be lasting good will. If the expenditure of $40,000,000,000, the organization and equipment of an Army of 4,500,000 men, the marshaling of all the resources of this Republic to save those nations in the World War, if an Army of 2,500,000 soldiers fighting in France and Belgium—if all this has not endeared us to those nations, then I know of no means by which we can hope to obtain their good will. We certainly can not win it by purchase.

The Government of the United States has no moral right to cancel these obligations. The money belongs to the American people. Every citizen who purchased a bond during the war has a direct monetary interest in this transaction.

FARM RELIEF

The most serious problem before the country to-day is that of farm relief. Primarily it is the problem of the farmer, but, as a matter of fact, it is nation-wide in its scope and portent, and must be considered as a national issue.

Agriculture is the basic industry of America, and will ever so remain. Nature has so decreed. The fertility of the soil is the richest resource of this continent. This inheritance must be preserved and the tiller of the soil remain an independent economic factor in our industrial system.

There are 32,000,000 people on the farms and 20,000,000 more directly dependent upon the farms for their livelihood—52,000,000 people—one-half the continental population of the United States. The American farmer is the greatest market for the products of American industry. His purchasing power can not be seriously impaired without corresponding disastrous results to capital and labor. Industry can not permanently prosper, labor can not be permanently employed with agriculture prostrate.

PRICE-FIXING PROGRAM OF HOOVER

There is to-day a market inequality between the price the farmer pays for what he buys and the price he receives for what he sells. The cause of this disparity, the beginning of the impoverishment of agriculture was the decree of Food Administrator Herbert Hoover during the war, fixing the price of wheat at $2.20 per bushel when it was selling in open market at $2.86 per bushel. This fiat of Mr. Hoover created such a disparity between the selling price of the products of the farmer and the purchasing price of what he consumes that it absorbed not only the profits and operating expense of agriculture, but some $20,000,000,000 of its invested capital. The present industrial depression and lack of employment for American labor is due directly to this reduction of the purchasing power of American agriculture.

The work of limiting these prices was entirely the work of Mr. Hoover, accomplished by getting the grain dealers of the country to agree not to pay more than the minimum price, closing the grain exchanges on future dealings and arranging one buyer on export wheat, so that no competition could bid up the price. While Mr. Hoover held the price of wheat down to $2.20 in this country, foreign countries were paying the following prices:

	Per bushel
France	$3.94
Italy	4.33
Netherlands	3.23
Portugal	3.83
Spain	3.96
Switzerland	3.25
United Kingdom (in line with Mr. Hoover's ideas)	2.28

Is it possible that we were selling our wheat to England at $2.20 per bushel and she was selling it to the other nations at these exorbitant prices?

The price of wheat in May, 1919, was $2.20 per bushel, as fixed by Mr. Hoover. In December of the same year, after the ban had been removed, the price rose to $2.20 per bushel. Even in 1920 America produced 833,000,000 bushels of wheat and exported 366,000,000, and the price ranged from $3.45 in May to $2.65 in November. These statistics reveal the whole story of the tremendous losses sustained by the farmers by reason of the price fixing of Food Administrator Hoover.

Mr. Hoover's sponsors are trying to relieve him of responsibility in this connection by saying that the commission did it—not Hoover. Mr. Hoover was food administrator, the "dictator" of America. He ruled with an iron hand. He possessed the power and was charged with full responsibility and he allowed this thing to be done. If he sat idly by and permitted this outrage upon the American farmer and failed to even raise his voice in protest, he is just as responsible as if he had taken the positive action. He was the authoritative head. Men can not escape responsibility when they fail to perform their duty.

AVAILABILITY

There are two main elements of strength in the Republican Party—industry and agriculture. The loss of either would mean the sacrifice of the Presidency. Our candidate must be able to command the support of these two great interests if we hope to win in November.

Herbert Hoover is not satisfactory to agriculture. The great farming States of the Mississippi Valley are bitterly opposed to his nomination. These forces in the Republican Party can not be united on Mr. Hoover. This fact stands out star bright from the election in Ohio and Indiana. Every agricultural district in Ohio, even with the loss of our leader, Senator Willis, are sending anti-Hoover delegations to the national convention.

In Indiana the "embattled farmers stood and fired the shot heard around the world." Senator WATSON, the champion of the agricultural interests, against almost insurmountable odds, won a triumphant victory over Mr. Hoover; and the 33 delegates from Indiana, representing that agricultural State, are a unit against the nomination of Mr. Hoover. Illinois, Wisconsin, Iowa, Minnesota, the Dakotas, Nebraska, Kansas, Oklahoma—the granary of the world—is fighting the nomination of Herbert Hoover with unprecedented intensity.

With a wealth of presidential timber, possessing unquestioned qualifications, upon whom all the elements of the party will unite, shall we commit the unspeakable folly of naming a man who fails in this respect?

The sponsors for Mr. Hoover attempt to answer all these charges against him by saying that he stands with President Coolidge on all the essential principles of Republicanism. He personally said the same thing when President Wilson was in the White House. He then said he stood by the leadership of Woodrow Wilson, not only in the conduct of the war but in negotiation of peace, and afterwards in the direction of the burden of rehabilitation of the world. He never made such a positive declaration of loyalty to President Harding or to President Coolidge as he did for President Wilson. When Wilson was President he stood by Wilson, and said so himself. When Coolidge is President his sponsors say he stands by Coolidge. What will he do when he stands alone? Experience teaches us that when such men attempt to stand alone they fall.

AMERICANISM

In 1920, when Mr. Herbert Hoover was seeking the nomination for President on both the Democratic and Republican tickets, Senator FESS, of Ohio, then chairman of the Republican congressional committee, said:

"The Republican Party can not accept an internationalist as its standard bearer. It will demand a leader whose Americanism is not in question, and whose political views are not a matter of speculation. We can not go to the country to contest the fallacies of the Wilson administration with an internationalist attached to the Wilson administration as our leader. Hoover must be greatly embarrassed in seeking the nomination at the hands of a party he conspired against with the party's opponents to defeat in 1918."

Mr. Hoover has lived an international life, builded an international character; all his opinions on fundamental questions being colored with internationalism. When a crisis crashes in life, men instinctively revert to past experience for guidance. The experience of Herbert Hoover has been foreign to our standards, alien to our institutions. The President of the United States must meet a crisis armed with American experience, panoplied with American precedents.

DEFICIENCY APPROPRIATIONS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes.

Mr. WARREN. Mr. President, I send to the desk an amendment, which I ask may be stated.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 10, after line 17, insert the following:

EMPLOYEES' COMPENSATION COMMISSION

For an additional amount for personal services in the District of Columbia, in accordance with the classification act of 1923, and for contingent expenses, including the same objects specified under these heads in the independent offices appropriation act for the fiscal year 1929, and including personal services in the field, fees, and mileage of witnesses, contract stenographic reporting services, and rent, fiscal year 1929, $77,010.

For an additional amount for printing and binding for the Employees' Compensation Commission, fiscal year 1929, $3,000.

Mr. KING. Mr. President, I have just asked the chairman of the committee for information respecting this item of $80,000. The information furnished is exceedingly meager. It does not in my opinion justify the appropriation. It merely states that it is for salaries and expenses of employees of the compensation bureau in the District of Columbia, stenographic services, fees, and so forth. The Senator will recall that in the general appropriation bill very liberal amounts were carried for this organization.

Mr. WARREN. Mr. President, at the time it was thought so, but it seems that the commission has been compelled to send up a supplemental estimate, which has just come to us. It is intended to assist those who have been injured or to whom something has happened that debars them from labor, and which requires the attention of the bureau. The committee felt that we had better be very liberal and assist them in securing what is rightfully theirs.

Mr. KING. But this appropriation does not go to those who are injured. If there was any pretense that it was an appropriation for those who are to receive the benefits of the compensation act, I should not offer any objection, but, upon the contrary, should very heartily support it. But the appropriation is not for that purpose. It is merely for more employees.

Mr. WARREN. Oh, no; it is not. The Senator is mistaken in that respect.

Mr. KING. All I know is what the Senator tells me in the report which he handed me and which states:

Salaries and expenses, United States Employees' Compensation Commission: For an additional amount for personal services in the District of Columbia, in accordance with the classification act of 1923 and for contingent expenses, including the same objects specified under these heads in the independent offices appropriation act for the fiscal year 1929, and including personal services in the field, fees, and mileage of witnesses, contract stenographic reporting services, and rent, fiscal year 1929, $77,010.

There is nothing provided for compensation for those who are injured; it is for personal services; it is merely to increase the bureau, and we have a very large bureau now. I am not complaining, except to voice the general complaint that all of the bureaus are too large and the personnel is too numerous. What occurred to me was that we made a very liberal appropriation, and if in December it shall be apparent that they need more for the last half of the fiscal year, it could be included in the appropriation bill at that time. However, I shall not ask for a vote, if the Senator insists upon the amendment.

Mr. WARREN. It is merely carrying out the suggestions of the Budget, which, with its manifold facilities, has examined and has recommended in favor of this item.

Mr. KING. Mr. President, if the Senator is willing to take the responsibility upon the limited information which General Lord has transmitted, I shall not interpose an objection, but I do feel that the information which has been furnished is insufficient to warrant an additional appropriation.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WARREN. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 12, after line 7, it is proposed to insert:

GEORGE ROGERS CLARK SESQUICENTENNIAL COMMISSION

Toward carrying into effect the provisions of the joint resolution entitled "Joint resolution providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779," approved May 23, 1928, $200,000, to remain available until June 30, 1931: *Provided*, That in addition to the amount herein appropriated the George Rogers Clark Sesquicentennial Commission is authorized to incur contractual obligations in an amount not exceeding $800,000.

The amendment was agreed to.

Mr. WARREN. I offer another amendment, which I ask may be stated.

The PRESIDING OFFICER. The amendment will be stated.

The CLERK CLERK. On page 16, after line 20, it is proposed to insert:

Hospital facilities and services: For carrying out the provisions of the act entitled "An act to authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes," approved May 23, 1928, fiscal years 1928 and 1929, $7,000,000.

The amendment was agreed to.

Mr. WARREN. I offer an amendment which I send to the desk, but first I wish to say to Senators that every one of these amendments has been duly considered by the department concerned and recommended and transmitted by the Budget Bureau.

Mr. KING. May I inquire of the chairman of the committee whether the amount for hospitalization in the amendment just agreed to is in addition to the sixteen or seventeen million dollars recently carried in an appropriation bill that was passed or is it part of the appropriation there authorized?

Mr. WARREN. It is a part of the appropriation, of course, as I understand it.

Mr. KING. Is it a part of the appropriation which was authorized or is it an independent appropriation? That is what I inquire.

Mr. WARREN. While I do not recall just when the law was passed, it was enacted very recently.

Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 29, after line 18, it is proposed to insert the following:

BUREAU OF ANIMAL INDUSTRY

Salaries and expenses: For an additional amount for necessary expenses for investigations and experiments in animal husbandry to enable the Secretary of Agriculture to renew the water system pipe lines at the department's station located at Fort Keogh, Mont., including the same objects specified under this head in the agricultural appropriation act, fiscal year 1929, $30,000.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WARREN. I offer another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 29, after line 11, it is proposed to insert the following:

Cooperative agricultural extension work, 1929: To enable the Secretary of Agriculture to carry into effect the provisions of the act entitled "An act to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefits of the act entitled 'An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and mechanic arts,' approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture," approved May 22, 1928, fiscal year 1929, $980,000.

Mr. KING. What is the act referred to in the amendment?

Mr. WARREN. The amendment is to provide for the administration of a law which was recently passed.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WARREN. I also offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 30, line 8, after the numerals "$35,000," it is proposed to insert the following:

Provided, That the limitation in the agricultural appropriation act for the fiscal year 1929 as to the cost of buildings shall not apply to this paragraph.

Mr. WARREN. I will say that that is a minor amendment and applies to the question of form only. It does not involve the expenditure of any money.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WARREN. I offer the following amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 31, after line 2, it is proposed to insert the following:

BUREAU OF AGRICULTURAL ECONOMICS

Standards for hampers and other baskets: To enable the Secretary of Agriculture to carry into effect the provisions of the act entitled "An act to fix the standards for hampers, round-stave baskets for fruits and vegetables, and for other purposes," approved May 21, 1928, fiscal year 1929, $7,500, of which amount not to exceed $5,940 may be expended for personal services in the District of Columbia.

Mr. WARREN. I will say that amendment is designed to carry into effect a law which was recently passed.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WARREN. I offer another amendment, which is also designed to carry out what is now existing law.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 31, after line 2, it is proposed to insert the following:

Wool standards: Not to exceed $50,000 of the funds collected from persons, firms, or corporations which handled any part of the wool clip of 1918, which the Secretary of Agriculture finds it impracticable to distribute among wool growers, shall be deposited in the Treasury to the credit of a special fund which is thereby appropriated for the fiscal year 1929 for the purpose of carrying into effect the provisions of the act entitled "An act to authorize the appropriation for use by the Secretary of Agriculture of certain funds for wool standards, and for other purposes," approved May 17, 1928, including personal services and other necessary expenses, $50,000, of which amount not to exceed $25,000 may be expended for personal services in the District of Columbia.

Mr. OVERMAN. Mr. President, the amendments that the Senator is now offering, as I understand, were agreed to by the committee?

Mr. WARREN. Yes. Some of them did not come until yesterday morning, however, when it was possible only to call them to the attention of a few of the members of the committee.

Mr. OVERMAN. But the committee has passed on them?

Mr. WARREN. Yes.

Mr. KING. Mr. President, I should like to inquire what is the purpose of this amendment?

Mr. WARREN. Mr. President, I am glad to say to the Senator that this amendment will not result in taking any money from the Treasury of the United States. It will be remembered that during the war the administration took charge of the wool crop of one year under an agreement that there would be returned the difference between what was paid and what the crop was finally valued at. We have now returned all the money to the woolgrowers who can be found, and there is left quite a large amount, the disposition of which is quite another problem. This amendment proposes to put in the Treasury above the amount which has been required to pay the woolgrowers for the benefit of the making of standards in grading wool.

Mr. KING. Will this liquidate the entire matter?

Mr. WARREN. It will, unless something should come up hereafter and some grower should be able to prove that he still has a claim.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WARREN. I offer another amendment, which merely puts in a side head.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 36, line 20, before the word "For," it is proposed to insert the word "Salaries" as a side head.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WARREN. The amendment which I now send to the desk is in regard to foreign mails and is made necessary because of the bill relating to the merchant marine which recently became a law.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 69, after line 8, it is proposed to insert the following:

Foreign mail transportation: For an additional amount for transportation of foreign mails by steamship, aircraft, or otherwise made necessary to carry out the provisions of the merchant marine act, 1928, including the same objects specified under this head in the act making appropriations for the Post Office Department for the fiscal year 1929, $7,500,000.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WARREN. I now offer an amendment regarding which, I desire to say to members of the committee, I have not been able to see all of them. It is in regard to the Walter Reed Hospital and has to do with an item authorized by a law which has been passed, and we have been informed that the approval of the Budget to it will be immediately sent in.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 112, after line 13, it is proposed to insert the following:

Walter Reed General Hospital: For construction and installation of buildings, utilities, and appurtenances thereto at Walter Reed General Hospital, District of Columbia, as authorized by the act entitled "An act to authorize appropriaions for construction at military posts, and for other purposes," approved May —, 1928, including also the engagement by contract or otherwise, of the services of architects, or firms, or partnerships thereof, and other technical and professional personnel as may be deemed necessary without regard to civil-service requirements and restrictions of law governing the employment and compensation of employees of the United States, $300,000, to remain available until expended.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BINGHAM. I desire to submit an amendment.

Mr. WARREN. I may say that the amendment submitted by the Senator from Connecticut may be considered as a committee amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 78, after line 17, it is proposed to insert the following:

Twenty-third International Congress of Americanists: For the contribution of the United States toward defraying the expenses of the Twenty-third International Congress of Americanists, to be held in New York City during the week beginning September 17, 1928, as authorized by public resolution approved May 23, 1928, fiscal year 1929, $5,000.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WARREN. I send to the desk a further committee amendment and ask for its adoption.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 115, after line 3, it is proposed to insert the following:

INVESTIGATION AND SURVEY FOR A NICARAGUAN CANAL

For every expenditure requisite for and incident to the investigation and survey to determine the practicability of an interoceanic ship canal over Nicaraguan territory, to remain available until expended, $150,000.

Mr. KING. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Couzens	Harris	McNary
Barkley	Curtis	Harrison	Mayfield
Bayard	Cutting	Hawes	Metcalf
Bingham	Dale	Hayden	Moses
Black	Deneen	Heflin	Norris
Blaine	Dill	Howell	Nye
Blease	Edge	Johnson	Oddie
Borah	Fess	Kendrick	Overman
Bratton	Fletcher	Keyes	Phipps
Brookhart	George	King	Pine
Broussard	Gerry	La Follette	Pittman
Bruce	Gillett	Locher	Reed, Mo.
Capper	Glass	McKellar	Reed, Pa.
Caraway	Greene	McLean	Robinson, Ark.
Copeland	Hale	McMaster	Robinson, Ind.
Sackett	Smith	Thomas	Walsh, Mont.
Schall	Smoot	Tydings	Warren
Sheppard	Steck	Tyson	Waterman
Shipstead	Steiwer	Vandenberg	Wheeler
Shortridge	Stephens	Wagner	
Simmons	Swanson	Walsh, Mass.	

The PRESIDING OFFICER. Eighty-two Senators having answered to their names, a quorum is present. The question is on the amendment offered by the Senator from Wyoming on behalf of the committee.

Mr. COPELAND. Mr. President, may we have the amendment stated?

The PRESIDING OFFICER. The amendment will be restated.

The CHIEF CLERK. On page 115, after line 3, it is proposed to insert:

INVESTIGATION AND SURVEY FOR A NICARAGUAN CANAL

For every expenditure requisite for and incident to the investigation and survey to determine the practicability of an interoceanic ship canal over Nicaraguan territory, to remain available until expended, $150,000.

Mr. COPELAND. Mr. President, may I ask the Senator from New Jersey when it would be expected to begin the survey proposed by this amendment?

Mr. EDGE. Mr. President, the appropriation will become available at once. I can not answer the Senator from the standpoint of the actual practical operation of the engineers. I presume the work will be begun within a reasonable time, because it is the desire of the War Department and the Navy Department and the State Department, all three, that this survey shall be commenced as early as it is possible to commence it.

Mr. COPELAND. Mr. President, when the troops were sent to Nicaragua I felt very much disappointed as a citizen that the President had seen fit to send them there. However, after they actually went to Nicaragua my attitude was and is that we have undertaken to carry out a definite pledge, and that the marines must be left there until we have kept faith with that country.

When we had the report that Mr. Marshall, a citizen of my State, had been killed, I expressed great indignation that such a thing should take place. He was a private citizen of this country in Nicaragua on an entirely peaceable mission. He was there as superintendent of a mine. He had a perfect right to be there. It was my judgment then, and is still, that Mr. Marshall and every other American citizen is entitled to protection wherever he is. I would have the strong arm of government reach out to any part of the earth where an American citizen is and see that he is given protection.

Mr. HARRISON. Mr. President, may I ask the Senator a question?

Mr. COPELAND. Certainly.

Mr. HARRISON. I have not studied this amendment; but does it provide that this survey is to be made by our soldiers while they are down there now policing the country, or does it provide that the surveyors or engineers who make this survey shall have a bodyguard while they are doing it?

Mr. COPELAND. I assume that every lineman, every surveyor, every carrier of a chain, would have a troop of marines to guard him. It is the only way it could be done in safety, I take it.

Mr. President, the Congress at some time must face the question of what we are going to do about the canal; whether we are going to widen the Panama Canal and increase its capacity or whether we are going to go to Nicaragua and build the canal which Senator Morgan contended for so vigorously in the long ago. There is a great question of national policy which must be determined, and perhaps before we can determine it there must be a survey made; but I wonder if this is the time for us to talk about making a survey or sending any civilians down to Nicaragua.

I am not conversant with any reports that may have been made as to the attitude of Government officials regarding the question of the canal, whether there should be an improvement and an increased capacity of the present canal, or whether this particular canal should be constructed. Perhaps the Senator from New Jersey in due time will enlighten us about it; but my judgment is that this is not the time for the American Congress to make any other move in Nicaragua. When peace has been established, when amicable arrangements have been entered into between our Government and a stable government in Nicaragua, when we can go there as welcome visitors, it may and probably will be a perfectly proper procedure.

I would not have the Senator from New Jersey or any other Senator think that I am opposed to an increase of the capacity of our canal arrangements across the continent. I think I should vote now for an enlargement of the Panama Canal if we should determine that that could be properly done.

Mr. OVERMAN. Mr. President, the Senator of course is aware that the Panama Canal is subject to be bombed and destroyed in case of war, whereas if we had a sea-level canal there would be no trouble. I appreciate the Senator's position exactly. He does not think this is the time to take up the question of a Nicaraguan canal because of the conditions that exist there; but when the Senator comes to think about it he will be in favor of a Nicaraguan canal, because we want a sea-level canal there which will be free from danger of attack by an enemy. We need it for commercial purposes. The ships can not get through the Panama Canal now. It can not accommodate the ships that desire to pass through it at this time. We must have another canal. That seems to be settled.

Mr. COPELAND. Mr. President, I honor the Senator from North Carolina. He never speaks to me across the Chamber or privately but that I feel flattered and pleased; and perhaps I am in agreement in a general way with the Senator about the advantages of a Nicaraguan canal.

I came here as a young man and sat somewhere in one of those galleries one morning at 1 o'clock in the night and heard Senator Morgan. They kept him on his feet until 2 o'clock, and he said, "It is not right that these young Senators should keep an old man here so long"; but they made him keep on with his talk. I listened with the greatest interest, and from that time to this I have had in the back of my head that perhaps it would have been wise if we had had what the Senator from North Carolina now refers to as a sea-level canal; but this is my point——

Mr. EDGE. Mr. President, may I interrupt the Senator there? When he had the great privilege of listening to Senator Morgan, if Senator Morgan was discussing this subject, as I infer he was, he was approving quite heartily of a Nicaraguan canal, was he not?

Mr. COPELAND. Oh, yes. I do not know whether he was the father or the grandfather of the Nicaraguan route, or what he was, but he certainly sustained some very important relationship to it.

Mr. SIMMONS. Mr. President——

Mr. COPELAND. I yield to the senior Senator from North Carolina.

Mr. SIMMONS. I think the Senator can very well say that Senator Morgan was the father of the Nicaraguan route. When I first came to the Senate, in 1900, Senator Morgan was constantly delivering some of the greatest speeches I ever heard upon the Nicaraguan route for a canal. He seemed to have become so interested and wedded to that project that he lost sight of everything else that was before the Senate, and almost every week he would come in with something to say about that route, and it was always illuminating. I think he had thoroughly convinced the Senate that that was the only feasible route at that time; but just before there was a vote Senator Hanna, who had recently come to the Senate, made one day a very strong plea for a change of the plan upon which the Senate seemed to have agreed up to that time from the Nicaragua route to the Panama route. There was suddenly a very great change in the attitude of the Senate, and Senator Morgan was beaten.

I do not know anything about the present controversy; but at that time I was rather convinced that the Nicaragua route was the better of the two. If the Government can afford to spend the money, I do not know but that it would be very well to have two canals—one by way of Nicaragua and the present canal at Panama. I must confess, however, that I have not given the question very serious consideration. It has been a long time since we acted upon it; but it occurs to me that there may be possibly good reasons why we should have another canal.

Mr. COPELAND. I thank the Senator for what he has said.

Mr. KING. Mr. President, will the Senator yield, before he resumes his remarks?

Mr. COPELAND. Yes.

Mr. KING. The junior Senator from North Carolina [Mr. OVERMAN] stated a few moments ago, if I understood him correctly, that the present Panama Canal is inadequate for the needs of commerce.

Mr. OVERMAN. That is what I have been informed.

Mr. KING. May I say to the Senator that I have read the reports, and the information which I have derived is entirely different from that which the Senator has received.

Mr. OVERMAN. The traffic is constantly increasing every year; is it not? The prediction is made that the increase will be so great that finally, in order to carry on our commerce, we will be compelled to build another canal.

Mr. KING. But the report shows that with some improvements the present canal can be made to accommodate all the traffic that is anticipated for 50 years.

I thank the Senator.

Mr. COPELAND. Mr. President, I do not think I am out of harmony with the Senator from North Carolina. I do believe that the time will come when we shall have to make a survey of the Nicaraguan route. We have spent our money upon it, and we have certain rights there. But this is the point: This is not the time for the United States Government to take any step which might further inflame the minds and sentiments of the people of Nicaragua and adjoining countries. I do not want to go so far as to say that we are in a state of war with Nicaragua, but if we are not in a state of war with Nicaragua we are at least having a war in Nicaragua. I do not want to have anything done at this time that will excite the good people of that country or lead them to believe that we have ambitious plans which perhaps will run counter to some of theirs. If there were no marines in Nicaragua, if there were no internal strife in that country, I would join with the Senator from New Jersey in passing this amendment and providing for the survey, because as the junior Senator from North Carolina has pointed out there are great advantages, of course, in a sea-level canal. I have been through the Panama Canal; I know passage through it exhausts time, and in time of fog I remember we waited several hours outside of the canal for the fog to rise before we could enter, and there was a jamming of vessels there, and we were delayed by reason of the narrowness of the canal.

Furthermore—I have no doubt the junior Senator from North Carolina had thought about this—that if we made our entire development on the Isthmus it is like putting all of the eggs in one basket, and one 16-inch shell dropped on that basket, or on the canal, would destroy all our means of transportation across the Isthmus. So I am not in opposition to the general plan, I am not in opposition to the survey being made at some time, but my thought is that this is not an opportune time, that it would be unwise for us now to take any step in the Congress that would indicate to the people of Nicaragua that we have other plans relative to that country. Let us get rid of this disease, let us clean up this mess, let us get our doctors out of there, and then at some other time we can undertake to deal with this problem.

My position is that at some time, yes; but not now. I think this is the wrong time to take such a step as the amendment to the bill to provide for this survey.

Mr. EDGE. Mr. President, I will speak very briefly on the pending amendment. As has already been stated, the amendment has been presented by the Committee on Appropriations, and is a committee amendment. It has been budgeted by the Bureau of the Budget, and approved by the President in the usual way, carrying $150,000.

As I have followed him, the Senator from New York does not oppose a survey. I am sure every Senator will recognize that before any determination can be made by Congress, a survey must be made; but the Senator from New York suggests that this is not the opportune time to make a survey, because of disturbed conditions in Nacaragua.

Mr. President, I want to dissociate this proposal absolutely, from the disturbed political conditions existing in Nicaragua, as it should be dissociated; one is a domestic difficulty, which is appalling, and in which the United States has followed a policy which we have already discussed at length on the floor of the Senate, but this survey proposal should have absolutely no relation to that whatsoever. A survey is simply the next step in carrying out the treaty made during the administration of President Woodrow Wilson, known as the Bryan-Chamorro treaty, under the terms of which we paid $3,000,000 in order to have a right of way across Nicaragua for the purpose of constructing a canal.

We have invested that $3,000,000. That was some 14 years ago, if I remember correctly. In the meantime, the business of the Panama Canal, as demonstrated by the reports of the administrator of the canal, Governor Walker, has increased year by year, until in 1927 the transits through the canal were 5,475, as against only 758 in 1916, eleven years before. In other words, the increase of business through the Panama Canal from its opening, in 1915, to 1927, has been over 500 per cent.

Instead of it requiring 50 years, as the Senator from Utah suggested, before we would need further canal facilities, Governor Walker in his last report has indicated that in from 10 to 15 years the Panama Canal will have reached its capacity.

Mr. KING. Mr. President, will the Senator yield?

Mr. EDGE. I yield.

Mr. KING. The Senator misunderstood my observation. I stated that the present canal, with some enlargement, would last for 50 years and would meet the demands. I did not state that there would not need to be additional facilities.

Mr. EDGE. I am sorry I misunderstood the Senator. However, the Senator states now clearly that with some improvements the canal would, in his judgment, meet the demands for the next 50 years. He may refer to these changes simply as "enlargements." The only possible enlargement which would increase the capacity of the Panama Canal would be, naturally, the construction of another lock; in other words, widening the waterway in an effort, as I understand it from an engineering standpoint, to increase the capacity by one-third. At the same time, the engineers of the War Department—no special board being set up at all—while investigating the practicability and feasibility of the Nicaraguan Canal, will investigate the practicability and feasibility of increasing the size of the Panama Canal.

Very much enters into this beyond the mere constructing of additional locks. The matter of the water necessary to flow through the canal so that it would be navigable if increased one-third in size is a most important engineering problem. At the present moment, with the present capacity, the Government has appropriated money to build a dam upon the hills beyond Panama in order to increase the water supply for the present canal. The supply is not sufficient for the present needs, and it is obvious that if the canal is to be increased one-third, further devices to obtain water must be made.

The only object of this amendment is to provide Congress with all this necessary information so that when we are faced with the necessity of determining either to increase the capacity of the Panama Canal or to build the Nicaraguan Canal, taking advantage of the $3,000,000 option we have, Congress will have the necessary information to act intelligently.

To me the amendment is parallel with resolutions introduced almost daily asking for information from some department in order that Congress may legislate upon whatever problem may be covered in the resolution. It is simply seeking information which every Member of Congress must admit we must have some time, and until we do have it we will not be in position to dispose of this problem, which, as surely as we are in this Chamber to-day, will face us in a reasonably short time.

Then, we must take into consideration the fact that we can not construct either a new canal or reconstruct the Panama Canal short of 10 or 15 years. Add the 10 or 15 years of construction time to be consumed to the two or three years that will probably be required to finish a survey, and we will be beyond the time when commerce and trade require additional facilities to carry our goods from the Atlantic to the Pacific, and vice versa. In passing this amendment we would be simply acting as discreet business men, protecting an investment we have made and be properly equipped to decide at some time how we will proceed to increase our trade. That is all this amendment provides, and to confuse the amendment with political difficulties in Nicaragua appeals to me to be carrying the question into a field in no way justified.

Mr. COPELAND rose.

Mr. EDGE. I might say right there—if the Senator will pardon me, and I would not use this as an argument at all if political conditions had not been introduced in the discussion—that the passage by this Congress of this amendment authorizing a survey might have a very helpful poltical effect upon the present situation existing in Nicaragua. It is perfectly reasonable to assume that the Nicaraguans, with whatever party they may be associated in their own political divisions, would be mighty glad to see this great Government come to Nicaragua and expend the large amount of money which will be necessary to build this great public work across the country of Nicaragua.

Mr. VANDENBERG. Mr. President, will the Senator yield?

Mr. EDGE. I yield.

Mr. VANDENBERG. I simply want to state, as a result of seven and eight intimate winters in the Pan American zone, that I wholly indorse the observations the Senator is now making to the Senate.

Mr. EDGE. I thank the Senator. As an illustration, I might call attention to the situation existing in Panama. Before we went into Panama and completed the construction of the Panama Canal they had had many revolutions, as I recall. To-day our relations with the countries of Colombia and Panama, as everyone knows, are peaceful. Our occupation there has helped both of those countries to greater prosperity, as well as being of proper advantage to us.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. EDGE. I yield.

Mr. COPELAND. I wonder if the Senator from Michigan, when he had the seven or eight intimate seasons in that section of the world, was there during a revolution?

Mr. VANDENBERG. Yes; I was.

Mr. COPELAND. However, that is neither here nor there. I want to say this to the Senator from New Jersey, first, that he is to be applauded for his great enthusiasm and his study, and the education he has given the American people in the matter of the canal. I honor him for what he has done and what he has in mind. But to my mind it would be bad business. The Senator has referred to it as a business proposition. I do not think any business house would seek to undertake a survey under such conditions as exist there now. We are to build a canal for all time. The Senator says it will take 10 or 12 years to build the canal anyhow. It will not make any difference in the long run whether we make the survey this summer or next summer or in a couple of years. I plead with the Senate not to reject the idea of a survey, but to reject the idea of a survey just now.

Mr. EDGE. Mr. President, right on that point, this authorization does not in any way direct the Engineer Corps to go to Nicaragua at any stated time. We simply give the War Department the authorization when, in their judgment, it is a wise thing to do, to get this information which Congress must ultimately have, and which the Senator from New York and the Senator from North Carolina agree we must have. Congress, through this amendment, simply says to the Engineer Corps, "You now have $150,000, budgeted in the regular way, to make these studies of Panama and Nicaragua when you deem it wise." We are not sending the engineers to Nicaragua.

Mr. COPELAND. That is true, but the Senator has said that the political effect of this might be to better conditions. On the other hand, if the Senator will permit me to say it, the political effect might be disastrous.

Mr. EDGE. I simply suggested what I did in answer to a previous observation of the Senator.

Mr. BLAINE. Mr. President, will the Senator yield for a question?

Mr. EDGE. I yield.

Mr. BLAINE. We have several hundred marines in Nicaragua at the present time, I understand. The Senate is now making deficiency appropriations of over $3,100,000 for those marines. I want to ask the Senator how many United States marines will be required to go down to Nicaragua to protect and guard the surveyors who are going to be sent down there in view of the present very serious disturbances in that Republic?

Mr. EDGE. If the Senator from Wisconsin had honored me with his presence during the early part of my remarks, he would have been familiar with my view as to that point. I can not see any real reason to associate the continuation of our constructive public works in furnishing interoceanic canals for our own country and commerce and trade with an unfortunate situation that exists in Nicaragua. I again say, as I replied to the Senator from New York, that I am quite prepared to be satisfied with the judgment of the Chief of Engineers, who has been in charge of the great study of the Mississippi flood control and who would be in charge of this matter, to use his judgment as to when engineers should undertake the survey and upon what conditions.

Mr. WALSH of Montana. Mr. President, I would like to say a word with respect to the question addressed to the Senator by the Senator from Wisconsin.

Mr. EDGE. I yield to the Senator from Montana for that purpose.

Mr. WALSH of Montana. My understanding is that the present disturbances in Nicaragua are confined to a section of the country quite removed from the line of the proposed canal. The operations against Sandino are up in the mountainous section of Nicaragua adjacent to the Honduran border. It seems quite unlikely that any of the surveyors whose work is contemplated by the appropriation would be called upon to be in that part of the country at all.

With respect to the region to be traversed by the proposed canal, it is my understanding that both of the contending factions of Nicaragua, both the Liberals and Conservatives, profess, and profess very emphatically, their very great desire to have the canal constructed. We can very readily understand that the people of that country would be equally interested and sympathetically interested in the construction of the canal.

The growth of commerce through the Panama Canal has been so great that it has been very seriously considered in recent years whether it would not be necessary to conduct very extensive work in the upper regions of the Chagres River for the purpose of providing a greater supply of water in the lakes. We certainly ought to look forward to a very great development of that commerce.

It becomes a very serious question, then, as to whether some $100,000,000 more or thereabouts should be spent in increasing the facilities of the Panama Canal or whether it would be more economical to make the necessary venture in the construction of a new canal. It does seem to me the time has arrived when we ought to get possession of all the certain facts with reference to the matter to guide our future actions, because certainly within the next 10 to 15 years we must either undertake to expand the facilities of the Panama Canal or we must undertake the construction of a new canal.

Mr. WARREN. Mr. President, the studies of the committee have been along the lines the Senator from Montana has so well set forth.

Mr. JOHNSON. Mr. President, will the Senator permit an inquiry?

Mr. EDGE. I yield to the Senator from California.

Mr. JOHNSON. I am far from any intention to interfere with any desire on the part of the Senator from New Jersey, but I would like to inquire how his amendment is in order? On what theory is this amendment, which is contemplative and speculative at the present stage of the legislation, in order? How does it come to be in order at the present time?

The reason why I ask the question is that I have an amendment which I am going to submit and which I expect the chairman of the committee will feel it his duty to object to. But it is an amendment whereby an authorization for an appropriation already made for barracks at Sawtelle, which are in a delapidated condition and require immediate attention, whereby a part of the appropriation that has already been authorized will be permitted to be expended, so that we will not have to wait until the next session of Congress. As I understand it, there has thus far been no congressional authorization for the expenditure of any money in respect of what the Senator from New Jersey desires. Am I not correct?

Mr. EDGE. The Senator is correct.

Mr. JOHNSON. There has thus far been no legislation authorizing any such activity as the Senator from New Jersey desires. Am I not correct?

Mr. WALSH of Montana. I think the Senator is not quite correct there, because we have already paid $3,000,000 for our rights there, and of course that is in the nature of legislation looking to the construction of the canal.

Mr. DILL. But there is a bill pending on the calendar to authorize——

Mr. WALSH of Montana. I do not argue the question as to whether it is appropriate upon the deficiency bill.

Mr. JOHNSON. Let us concede what the Senator suggests, with which I was not entirely familiar. Nevertheless, even though the head of the Budget hustles it down here when he will not hustle down an amendment for an appropriation which has already been authorized for the construction of barracks for disabled soldiers—even under such circumstances this kind of an appropriation is not in order on a deficiency bill, because the authorization has not yet been made. Am I not accurate in that regard?

Mr. EDGE. I do not think so.

Mr. WARREN. We have our rights in Nicaragua, of course, under treaties existing, and we have an authorization under which the department is working.

Mr. JOHNSON. Very well. Then let me submit to the Senator this question. Just let me call attention to this case.

Mr. KING. Mr. President, I want to call attention to the rule. I am going to make the point of order against the amendment.

Mr. JOHNSON. Just a moment, if the Senator please. House bill 6690 passed the House January 26, 1928. It passed the Senate April 17, 1928. It was approved by the President April 23, 1928. That bill provides for the authorization of $2,000,000 for the erection of 12 barrack buildings at Sawtelle, a Pacific Branch of the Old Soldiers' Home. It authorizes that appropriation because no man can tell how long those old soldiers will be safely housed under the present conditions at Sawtelle.

I come here with the amendment that I desire to submit, authorizing the expenditure not of new money but of $300,000 of this appropriation in the interim between now and December next in order that the work may proceed and the old soldiers be protected. But I am perfectly frank in saying to the chairman of the committee that the head of the Budget Bureau declined to send an approval down here. Under these circumstances, I call attention to the peculiar way in which the situation presents itself.

In the one instance, with an authorized appropriation for a purpose that is undoubtedly not only sound but absolutely essential for the protection of old soldiers, the head of the Budget declines to send his approval down here. In the other instance, where there has been no authorization at all, he sends down here an amendment to the bill for a survey in Nicaragua. That is not quite playing the game on the level in the case so far as the Budget is concerned, and that is the reason why I have made the suggestion which I have made. I am not, of course, complaining of the chairman of the committee. He understands that.

Mr. WARREN. I understand that. That is entirely all right. Of course, it is within the power of the Senate and the Congress to override the Budget at any time we feel it necessary. Now, as to the bill which the Senator speaks of, I have not seen it, or at least, if I have seen it, I have not had an opportunity to study it. It occurs to me that there may be conditions in connection with the bill which require some approval or something of the kind in connection with its consideration by the Budget Bureau.

Mr. JOHNSON. I want to be frank with the Budget. The information that is given me is that General Lord has said that he intends to send a man out there to investigate, and for that reason he does not want to give an appropriation at this time. But the Congress has authorized the appropriation. The work was determined to be essential for the protection of the old soldiers, and yet we must await General Lord's investigation in respect to the matter.

Mr. REED of Missouri. Mr. President, will the Senator yield?

Mr. EDGE. I yield to the Senator from Missouri.

Mr. REED of Missouri. I just desire to ask the Senator from California what he thinks of the situation where the Congress of the United States has the sole control of appropriations, and yet an individual called the Director of the Budget presumes to certify or not to certify, according to the report of some man he sends out to find out whether Congress has done the right thing?

Mr. JOHNSON. It would be a difficult thing for me, in language that is appropriate in this body, to express my opinion of that situation. [Laughter.]

Mr. REED of Missouri. I simply want to take this occasion to say that I voted against the creation of the Budget scheme. It was at war with the whole history of our theory of government, was a foolish proposal to begin with, and every day that it is working it is more and more demonstrated that the committees of Congress can attend to the business of the Congress better than some gentleman who arbitrarily assumes an overlordship in the country. I just want to emphasize this. I heard this gentleman over the radio, something like three or four weeks ago, lecturing the Government employees who had been brought together. I heard him talk to them about the "woodpecker's club." He boasted that they had saved $2.50 by making the employees wear their lead pencils down to stubs. Then he spent about 15 minutes detailing how they were going to inaugurate another glorious reform by stopping the girls employed down there from using paper clips for hairpins. [Laughter.] That is the kind of a mind that is to-day undertaking to dictate to Congress.

Mr. KING. But he approved of the appropriation of money for use in Nicaragua to keep the marines there and to keep the marines in Haiti, to carry on an economic, if not a military, imperialism in various parts of the world. Therefore, the Senator ought to commend General Lord for his meticulous care with reference to hairpins and woodpeckers.

Mr. REED of Missouri. It will take a long time to save enough on paper clips to offset that appropriation.

Mr. CARAWAY. Mr. President, I am curious about this matter. I did not know the girls wore hairpins any longer.

Mr. REED of Missouri. Let me enlighten the Senator from Arkansas. The paper clips, I gathered from General Lord's remarks, though I know nothing about it myself, seem to be adopted for the control of bobbed hair. [Laughter.]

Mr. KING. Mr. President, will the Senator yield?

Mr. EDGE. I yield.

Mr. KING. I think in all fairness I ought to state to my friend from New Jersey that I shall raise the point of order against the amendment under one of the subdivisions of Rule XVI, which reads:

> The Committee on Appropriations shall not report an appropriation bill containing amendments proposing new or general legislation, and if an appropriation bill is reported to the Senate containing amendments proposing new or general legislation, a point of order may be made against the bill.

It is general legislation upon an appropriation bill, and is therefore subject to a point of order, which I shall not take the Senator from the floor to make but shall urge at the proper time.

Mr. EDGE. Mr. President, if the Senator from Utah desires to make the point of order I am prepared to resist it, because

I feel reasonably sure that the amendment is not subject to the point of order; but if the Senator will withhold his point of order and permit the amendment to be debated as may be desired, that is all I ask.

Mr. KING. I withhold the point of order.

Mr. LA FOLLETTE. Mr. President, I submit that if a point of order is to be made it should be made and the matter should be decided. There would be no point in discussing this subject two or three hours and then finding that the amendment is not in order.

Mr. EDGE. I understood the Senator from Utah was not going to make the point of order.

Mr. KING. I said I would not take the Senator from New Jersey from the floor to make the point of order. That would be unfair to the Senator.

Mr. EDGE. I yield the floor.

Mr. KING. The Senator having yielded the floor——

Mr. SWANSON. Let me ask the Senator a question: Was this amendment presented and referred to the committee at least one day before being considered?

Mr. EDGE. An amendment covering a similar subject matter was submitted some time ago.

Mr. SWANSON. I mean this item of appropriation.

Rule XVI provides that amendments adding new items of appropriation shall be referred to the committee at least one day before they are considered.

Mr. EDGE. The matter was brought to the attention of the committee four or five days before the amendment was considered.

If the Senator from Utah raises the point of order, I wish to discuss it very briefly.

Mr. KING. I raise the point of order that the amendment offered—I am not sure whether the amendment is offered by the Senator from New Jersey or by the chairman of the Committee on Appropriations—is obnoxious to Rule XVI, which I read a moment ago, and which, in the interest of brevity, I shall not again read.

I also insist that it is subject to the point of order, for the reason that it has not been reported in the proper and usual way by the Appropriations Committee, has not been referred to the Appropriations Committee, and does not come here after having had proper consideration by that committee, and that it was not referred to the committee one day in advance of its consideration, as required by the rule to which the Senator from Virginia [Mr. SWANSON] just called attention.

I insist, however, that the first provision of the rule which I read, the amendment being general legislation upon an appropriation bill, is controlling, and under that part of the rule as it has been construed the Chair, it seems to me, must hold that the amendment is subject to the point of order.

Mr. WARREN. I will say as to that that the amendment is entirely within the rule, because it comes from the Budget, as the law provides.

Now, as to having been presented one day before it was considered by the committee, the amendment was so presented to us three days previously, for that matter, and comes within the rule in that respect.

I will leave it to the Senator from New Jersey, who has already spoken, to discuss the point further if he so desires.

Mr. KING. Mr. President, may I ask the Senator a question?

Mr. LA FOLLETTE. I make the point of order that debate on the motion is not in order.

The PRESIDING OFFICER. The point of order is well taken.

Mr. KING. If I may make one suggestion to the Chair that I did not previously make, I desire also to suggest that any estimate must be based upon law, and there is no law authorizing the estimate.

The PRESIDING OFFICER. The Senator from Utah raises a point of order on the amendment, which the Chair sustains. Are there further committee amendments?

Mr. WARREN. There are no further committee amendments, but I believe there are several Senators who have amendments which they wish to submit.

The PRESIDING OFFICER. The bill is still before the Senate as in Committee of the Whole and open to amendment.

Mr. THOMAS. Mr. President, I offer an amendment, which I send to the desk.

The PRESIDING OFFICER. The Senator from Oklahoma offers an amendment, which will be stated.

The CHIEF CLERK. On page 36, after line 18, it is proposed to insert a new paragraph, as follows:

The limitation on the amount which may be expended for the purchase of land for the establishment of a fish-cultural station in the State of Oklahoma is hereby increased from $5,000 to $9,000.

Mr. WARREN. Mr. President, I am sorry the matter embraced in the amendment did not come to our notice earlier, but I am not going to object to the amendment. It may be inserted and go to conference.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Oklahoma.

The amendment was agreed to.

Mr. BRATTON. Mr. President, I send forward an amendment, which I ask may be stated.

The PRESIDING OFFICER. The amendment submitted by the Senator from New Mexico will be stated.

The CHIEF CLERK. On page 2, after line 5, it its proposed to insert the following:

To enable the Secretary of the Senate to pay to Natalia S. Jones, widow of Hon. Andrieus A. Jones, from the appropriation for mileage of Senators, fiscal year 1928, $839.20 for mileage of the said Hon. Andrieus A. Jones, late a Senator from the State of New Mexico.

Mr. WARREN. I make no objection to that amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. VANDENBERG. Mr. President, I offer an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 112, after the amendment already agreed to, commencing after line 13, it is proposed to insert the following:

For an additional amount for completion of hospital, including utilities and appurtenances thereto at Selfridge Field, Mich., as authorized by an act entitled "An act to authorize appropriations for construction at military posts, and for other purposes," approved May —, 1928 (H. R. 11134, 70th Cong.), $50,000.

Mr. WARREN. Mr. President, I understand that amendment to be in order under the rules, and I will make no objection to it.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. JOHNSON. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 121, after line 9, it is proposed to insert the following:

Pacific Branch, Soldiers' Home, Los Angeles County, Calif., $300,000.

Mr. JOHNSON. Mr. President, I repeat what I said a short time ago. This amendment does not provide a new appropriation, nor does it ask for any moneys that have not already been authorized. Already a bill has been passed and signed by the President authorizing the erection of 12 barrack buildings at Sawtelle, and the design of this amendment is to permit the work to be done between the adjournment of the present session of Congress and the convening of the next session of Congress; that is all. The situation is such at the barracks that it is necessary to begin the work, I am advised, at the earliest possible moment, for to delay it until the next session would be a hardship upon the men that are there at Sawtelle.

Mr. WARREN. Mr. President, we have just had the question about rules brought up, and some remarks from the Senator from Missouri [Mr. REED] about the Budget. I was not one of those who voted in favor of creating the Budget Bureau, but the Budget system was adopted by the Congress, and if we are to follow the rules we are bound by it. With all due respect to the civil service, I think the operations of the Civil Service Commission and the Budget Bureau are somewhat alike in that when we need something very badly they are obnoxious; but both the civil service and the Budget, nevertheless, seem to work out pretty well; they take a great load off the Congress. I will say to the Senator that I should have no objection to his amendment except that it does transcend the rules, and therefore I shall have to make a point of order against it. I am sorry to have to do so.

The VICE PRESIDENT. The point of order is sustained.

Mr. GLASS. Mr. President, I send to the desk an amendment which, frankly, is subject to a point of order.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 119, after line 8, it is proposed to insert the following:

Plans for Wakefield, Va., the birthplace of George Washington: For preparation of plans and estimates for the improvement of the birthplace of George Washington at Wakefield, Va., $6,500.

Mr. WARREN. Mr. President, has there been any legislation passed authorizing the expenditure of money at Wakefield?

Mr. GLASS. I may state to the chairman of the committee that a bill introduced and sent to the War Department appropriates the sum of $150,000 for the improvement of Wakefield, but the bill has not been acted upon by either House of Con-

gress, and therefore the proposed amendment is subject to a point of order.

Mr. WARREN. Mr. President, I shall have to make a point of order against the amendment because there is no authorization for the proposed appropriation.

Mr. SWANSON. Mr. President, if the Senator will permit me, I think an estimate was made for an appropriation of $150,000 in order to do the work contemplated at Wakefield. However, it was thought better before that amount was appropriated to determine whether it was sufficient or too much. We desire a survey and an estimate to be made for the improvement.

Mr. FESS. Mr. President, will the Senator yield?

Mr. SWANSON. Yes.

Mr. FESS. To refresh the Senator's memory, when the Bicentennial Commission was considering it there was a communication from General Lord stating that he was ready to make the recommendation, awaiting any action that Congress might take. As I understand, while the commission has taken no action, the item does not in any way interfere with the plans of the Budget.

Mr. GLASS. Not at all; on the contrary, the War Department itself has approved a proposed appropriation of $150,000.

Mr. SWANSON. If the Senator who has charge of the bill will permit me, I should like to say that, in my opinion, it would be in order to offer an amendment carrying $150,000, as has been estimated for. This project has been under way for a great many years.

Mr. EDGE. Let me ask the Senator how does it differ from other amendments which have been ruled out? Does it not propose new legislation to be introduced into the appropriation bill?

Mr. SWANSON. Not at all, because it has already been approved; the monument has already been erected, and so forth. We thought, however, there ought to be a survey before the full money was appropriated. This is an enterprise that has been, as I have said, under way for some time.

Mr. EDGE. By Government appropriation?

Mr. SWANSON. Of course; the monument has already been erected. We thought, as I have said, that there ought to be a survey before final determination that the amount should be $150,000. We did not know whether that would be enough or whether it would be too much; we wanted to do what was right. All we ask is a survey rather than to ask for the entire amount of $150,000. I hope the Senator will not make any objection when we have been so generous in matters of this kind.

Mr. WARREN. Mr. President, I simply make the point of order and will let the Chair decide it. Of course, we are going to be interfered with from day to day by the rules in the consideration of items of this kind, but we have made the rules and now let us undertake to follow them.

The VICE PRESIDENT. The point of order is sustained.

Mr. GLASS. Mr. President, I send to the desk a proposed amendment to come in on page 65.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. After the word "for" and the period, in line 21, page 65, it is proposed to insert:

And the sum of $5,000 for such a survey and investigation as will enable the Secretary of the Navy to report whether and where there is available on the east coast of the United States a proper site for a central eastern ammunition depot corresponding to the one herewith provided for at Hawthorne, Nev.

Mr. WARREN. I have no objection to that amendment.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. HAYDEN. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 41, line 17, after the word "only," it is proposed to insert the following proviso:

Provided further, That any lands purchased under authority of this act within the State of Arizona shall be subject to the annual payment of an amount equal to the taxes levied by said State, or any county thereof, on lands of similar character and value; and the Secretary of the Treasury is hereby authorized and directed, upon the recommendation of the Secretary of the Interior, to pay such amounts to said State or counties from the fund on deposit in the Treasury to the credit of the Navajo Tribe.

Mr. WARREN. Mr. President, I understand that to be an amendment to a House paragraph. Is that correct?

Mr. HAYDEN. That is correct.

Mr. WARREN. And that the House paragraph contains language that would bring it within the rule. At least I will not object to it.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HAYDEN. I ask leave to insert in the RECORD a letter from the chief of the Navajo Tribe of Indians relative to this matter.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter is as follows:

ST. MICHAELS, ARIZ., *December 9, 1927.*

The Hon. CARL HAYDEN,
Washington, D. C.

HONORABLE AND DEAR SIR: I am sorry that I did not get to meet you when you passed through Gallup on your way to Washington, because I was very anxious to speak to you concerning our land problem. Since the appropriation for $1,000,000 for the purchase of lands for the entire tribe did not go through last January, I have concluded that it would be best after all that we work for our own jurisdiction.

The Navajos living off the Fort Defiance jurisdiction to the south, as you perhaps know, have been leasing for many years approximately 200,000 acres from the Santa Fe Railroad, and I believe the best plan would be to ask Congress to appropriate annually $100,000 for the purchase of these lands until the entire 200,000 acres shall have been bought. I am sure, too, that you understand that we are not asking for more lands; we are only trying to buy, with our own money realized from oil, lands which members of our tribe have been occupying and using from time immemorial; the Navajos were living there long before any white man ever came here; then later on, when the railroad received its extensive land grants in 1872, our people who were living on these very lands were not at all considered. Now the railroad company is prepared to sell large parcels of these lands to whoever can pay therefor, and thus there is great danger that a good deal of the land will slip away from us. For this reason I am convinced that delay or postponement will prove disastrous to us and I must ask you to do what you can for us so that this land problem, which is the most urgent problem confronting our tribe at the present time, be solved, and that as soon as possible.

My dear Senator, you have always been a true friend to us Navajos and I know you will be glad to help us in this matter, just as you have done so often before. I especially appreciate your kind and successful efforts in placing Executive order reservations on the same basis as treaty reservations, and I shall be very thankful to you for whatever assistance you might render toward the successful issue of the plan which I have mentioned above.

Thanking you for your kind interest in our behalf, I am

Very sincerely yours,

CHEE DODGE.

Mr. KING. Mr. President, I have presented to the members of the committee some amendments relating to an item which was under discussion yesterday.

On page 31, line 19, I move to amend by adding, after the word "established" and before the word "shall," the word "as," and after the word "shall" by striking out the word "thereafter."

On page 31, line 18, I move to strike out the words "unless the" and insert in lieu thereof the words "and then only in such."

And on page 31, line 20, I move to strike out the words "in each year."

So that, as amended, it would provide for the State to make the 50 per cent contribution.

Mr. WARREN. Mr. President, I understand that that is in the line of reducing expenses. Therefore I have no objection to it.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BLAINE. Mr. President, I desire to inquire of the chairman of the committee about pages 65 and 66, the deficiency appropriation for the Marine Corps. The total amount proposed, in round numbers, is $3,200,000. As I understand, that is about double the amount reported by the Secretary of the Navy when the naval appropriation bill was before Congress, at least double the amount that the Secretary reported as expended for the marines in Nicaragua.

Mr. HALE. No; I think the figures are just the same as the figures which were given at that time when the bill was up. I think they are exactly the same.

I gave the figures in the Senate one day. I do not recall the exact date, but they were exactly the figures that are given now. At that time it was understood what the estimates would be for the deficiency, and I so announced in the Senate.

Mr. BLAINE. Then the cost of maintaining the marines in Nicaragua was $3,200,000?

Mr. HALE. No; that includes China as well as Nicaragua. The amount for Nicaragua was $1,365,010, and the amount for China was $1,852,074.

Mr. BLAINE. Then this $3,200,000 includes the amount expended for the marines in China and Nicaragua?

Mr. HALE. In China and Nicaragua; that is correct.

Mr. WARREN. Mr. President, may I say to the Senator who makes the inquiry that, of course, this is the House language and comes to us from the House, and I take it for granted that it comes duly certified from the department. The Senator from Maine, who is the chairman of the Naval Affairs Committee, which includes the Marine Corps, may answer that question.

Mr. BLAINE. The point to which I am directing my remarks is that we are spending, over and above the regular appropriation for the United States Marine Corps, $3,200,000 for the marines in foreign countries. That is my understanding.

Mr. HALE. That is correct.

Mr. BLAINE. So we are paying, in addition to the regular appropriation for the marines, $3,200,000 to interfere in the affairs of other countries, and particularly Nicaragua.

Mr. BINGHAM. Mr. President, will the Senator yield?

Mr. BLAINE. I yield.

Mr. BINGHAM. The Senator knows that most of these marines are in China. A large part of this expense is in connection with the state of affairs in China. We are not interfering in Chinese domestic affairs at all. No one familiar with the situation can claim that. We have several thousand American citizens there, missionaries, business men, and officials, who need protection at this period of Chinese history, when a civil war is going on, and when there are thousands of soldiers, badly disciplined, who have repeatedly, by their actions in the Yangtze Valley, in Nanking, and recently in Tsinan, shown their inability to be controlled by their own officers, and their willingness to loot, murder, steal, and do anything to foreigners, no matter of what nationality. Surely the Senator does not begrudge any money that may be spent to protect the lives and property of American citizens very properly resident in China who are endangered by the presence there of this great civil war.

Let me assure the Senator that we are in no way interfering with the affairs of the Chinese, but are merely endeavoring to protect our own nationals in a way which this Government always has done for more than a hundred years.

Mr. BLAINE. Mr. President, I am very happy at this moment to find that the Senator from Connecticut in no way undertakes to excuse the President in sending the marines to Nicaragua.

Mr. BINGHAM. Mr. President, that is a question which we debated before. The Senator knows my position on that question perfectly well.

Mr. BLAINE. The Senator justifies the presence of the marines in China. I am not discussing that. I am endeavoring and have been endeavoring to ascertain how much money, over and above the regular appropriation, we are expending for the armed forces in foreign countries, particularly Nicaragua.

Mr. WARREN. Almost $2,000,000 of the amount, according to the information we have.

Mr. HALE. I have already given the figures to the Senator exactly.

Mr. BLAINE. Mr. President, I can not understand the anxiety of the Senator from Maine over this situation. I for one want to protest against the appropriation of the money of the taxpayers of the United States for the support of armed forces in Nicaragua. It appears that they are making no headway in Nicaragua except to continue the loss of American boys, and for what purpose? One faction in Nicaragua refuses to comply with the demand that was made by the special representative of the President, Mr. Stimson, and the leader of that faction chose to take up arms in defense of the liberties of the people of Nicaragua. Another faction in Nicaragua at a later date refused to join with the faction supported by the armed forces of America to provide for legislation to carry out an election in Nicaragua for the election of a President.

It seems to me that the United States in Nicaragua is engaged in supporting factions. Those factions change from day to day. No one knows whom we may be supporting in Nicaragua to-morrow.

The presence of the armed forces in Nicaragua is denying the liberties of the people of Nicaragua and striking a blow at the very principle that made it possible for us here in America to have a republic.

Mr. BINGHAM. Mr. President, will the Senator yield?

Mr. BLAINE. I am not yielding now. Not only is it resulting in the loss of life of American citizens, but as well in the loss of lives of hundreds of native Nicaraguans in no manner engaged in any banditry or any violation of good order; but we are in Nicaragua to dictate and demand and command because, perchance, some one, some adventurer, has gone down there with the prospect of exploiting the natural resources of Nicaragua.

Mr. President, if there is any justification whatever for armed forces to occupy the territory of Nicaragua there is the same justification for sending our marines, our Army, and our Navy into Russia. Why, sir, has the administration failed to go into Russia to demand for American citizens the same things it is claiming to demand for American citizens in Nicaragua? The answer is plain. The administration knows that the force of Russia is sufficient to beat back any invasion of their country; but the territory of this small, weak, defenseless nation is to be occupied by this superior force, the liberties of the people of Nicaragua are to be denied, and their right to set up their own government in their own way and live their own life is being destroyed by the employment of force.

I think the most serious thing involved in the whole Nicaraguan situation is the denial of liberty. The time may come, and not far distant, when, with these weaker and smaller nations feeling keenly the injustices to which they have been subjected, we will find ourselves in a position where we can not fail to recognize, but altogether too late, that we have unjustly, improperly, and I believe unlawfully gone into those Republics to the south of us to dictate and command to them the kind of government they shall have.

So, Mr. President, I direct these remarks to a protest against the inclusion in any bill of any appropriation for the support of an unlawful and unjustifiable invasion that has been directed by the administration either in Nicaragua or in any other Republic to the south of us in Central or South America.

Mr. GLASS. Mr. President, may I appeal to the chairman of the committee not to insist upon his point of order against this little item of $6,500 for a survey and for plans for Wakefield, Va.?

Mr. WARREN. Mr. President, I have looked the matter up since it was first presented. I have no objection to it.

Mr. GLASS. Then I offer the amendment.

The VICE PRESIDENT. The Senator from Virginia offers an amendment, which will be stated.

The CHIEF CLERK. On page 119, after line 8, it is proposed to insert:

Plans for Wakefield, Va., the birthplace of George Washington: For preparation of plans and estimates for the improvement of the birthplace of George Washington at Wakefield, Va., $6,500.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Virginia.

The amendment was agreed to.

Mr. HOWELL. Mr. President, I send to the desk an amendment which I offer.

The VICE PRESIDENT. The clerk will state the amendment.

The CHIEF CLERK. On page 11, line 13, after the word "obligations," insert the words "except stenographic reporting service."

Mr. WARREN. Mr. President, there may be some question in regard to that that we may fix afterwards. I do not object to it.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. WARREN. Mr. President, I move that the Senate insist upon its amendments, ask for a conference with the House, and that the Vice President appoint the conferees.

The motion was agreed to; and the Vice President appointed Mr. WARREN, Mr. CURTIS, and Mr. OVERMAN conferees on the part of the Senate.

TELEGRAM COMMENDING SENATOR SIMMONS

Mr. HEFLIN. Mr. President, I send to the desk a telegram addressed to the senior Senator from North Carolina [Mr. SIMMONS], and I ask to have it read.

The VICE PRESIDENT. The clerk will read.

The Chief Clerk read as follows:

BALTIMORE, MD., *May 24, 1928.*

Hon. F. M. SIMMONS:

Please permit me to extend my hearty congratulations upon that superb statement you made in the Senate yesterday as to your reasons for opposing Governor Smith. I am sure that in the mind and heart of every right-thinking person you have placed yourself on a higher pinnacle than ever before by the courage and judgment displayed.

RICHARD H. EDMONDS,
Editor Manufacturers Record.

Mr. HEFLIN. Mr. President, just one word. The Manufacturers Record is perhaps the most popular and reputable business magazine in the United States; and the editor, Mr. Ed-

monds, is one of the very first citizens of the country—a very distinguished gentleman, a man of great ability, a fine scholar, a great and good American.

LOAN OF AERONAUTICAL EQUIPMENT TO MUSEUMS, ETC.

Mr. REED of Pennsylvania submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1822) to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House numbered 1, and agree to the same.

DAVID A. REED,
HIRAM BINGHAM,
DUNCAN U. FLETCHER,
Managers on the part of the Senate.

W. FRANK JAMES,
J. MAYHEW WAINWRIGHT,
JOHN J. MCSWAIN,
Managers on the part of the House.

Mr. REED of Pennsylvania. I ask unanimous consent for the present consideration of the report.

Mr. KING. What is the subject matter of the report?

Mr. REED of Pennsylvania. The conference report is on a bill allowing the loan of aeronautical equipment without expense to the Government where it is necessary for experimental purposes. The House amended the bill to change the words in the proviso that the loan of the equipment should cost the Government nothing to read that the transfer and delivery should cost the Government nothing. It merely safeguards the Government against freight charges.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

MUSCLE SHOALS—CONFERENCE REPORT

Mr. NORRIS. Mr. President, I ask that the conference report on Senate Joint Resolution 46, relating to Muscle Shoals, be taken up by the Senate for consideration.

The VICE PRESIDENT. Is there objection?

Mr. KING. Mr. President, I suggest the absence of a quorum.

Mr. NORRIS. Will not the Senator wait until the conference report is laid before the Senate?

The VICE PRESIDENT. The Chair lays before the Senate the conference report on Senate Joint Resolution 46. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	McLean	Shortridge
Barkley	Fess	McMaster	Simmons
Bayard	Fletcher	McNary	Smith
Bingham	George	Mayfield	Steck
Black	Glass	Metcalf	Steiwer
Blaine	Greene	Moses	Stephens
Blease	Hale	Norris	Swanson
Borah	Harris	Nye	Thomas
Bratton	Harrison	Oddie	Tydings
Brookhart	Hawes	Overman	Tyson
Broussard	Hayden	Phipps	Vandenberg
Bruce	Heflin	Pine	Wagner
Capper	Howell	Pittman	Walsh, Mass.
Caraway	Johnson	Reed, Pa.	Walsh, Mont.
Copeland	Kendrick	Robinson, Ark.	Warren
Couzens	Keyes	Robinson, Ind.	Waterman
Curtis	King	Sackett	Wheeler
Cutting	La Follette	Schall	
Dale	Locher	Sheppard	
Dill	McKellar	Shipstead	

Mr. CURTIS. I desire to announce that the Senator from Illinois [Mr. DENEEN] is necessarily detained from the Senate in attendance in committee.

The VICE PRESIDENT. Seventy-seven Senators having answered to their names, there is a quorum present.

Mr. NORRIS. Mr. President, I have no desire to take up time in debate. I want to say, just briefly, that the last report of the conference was agreed to after the conferees had taken the other report and provided that all the operations of this board for the manufacture of fertilizer shall be for fertilizer purposes. It was necessary to make several changes in the report in order to bring that about.

In the main, as far as I know, as far as any objection was made in the Senate which we attempted to cure at all, that is all the change there is. We changed the section about patent rights, at the suggestion of the Commissioner of Patents, providing that cases involving patent rights should be sent to the district courts of the United States instead of to the Court of Claims. On account of changes for the purpose of eliminating the manufacture of fertilizer except for experimental purposes, it has been necessary to change some of the numbers of the subsections, because one subsection we struck out entirely. Unless there is some question, I do not care to take up time in debate.

Mr. McKELLAR. What reasons did the conferees submit for making the change as to fertilizer production?

Mr. NORRIS. In a general way, the opposition that appeared in the Senate in the debate that went on here and what Senators said in regard to it, it was quite evident that a majority of the Senate, under the circumstances, was opposed to the conference report, and we conceded that.

Mr. McKELLAR. Why did the conferees insist upon putting Cove Creek into the bill?

Mr. NORRIS. There was no attempt made, so far as the conferees were concerned, to take it out. Every one of the conferees, both of the House and Senate—and that included one from the State of Tennessee—was most heartily in favor of keeping it in the bill.

Mr. McKELLAR. Then, as it is now, the bill has been changed from its form as it passed the Senate so as virtually to prohibit the manufacture of cheaper fertilizer for the farmers of the country, and merely provides for experimentation in that respect, and the result is the production of cheaper nitrates, which will benefit the fertilizer people of the country, but will not benefit the farmers.

Mr. NORRIS. It provides only, as far as fertilizer is concerned, for its manufacture for experimental purposes. Those sections of the bill which provided for experimentation in the production of fertilizer, in conjunction with agricultural colleges and agricultural agencies and experiment farms, in State, county, or district, are in the measure just as they were before, but they provided for experimental activities then. The Senate and House conferees did, I will say to the Senator from Tennessee, what it is necessary for conferees to do when they find they must yield some of the things they want in order to get a bill that will be favored by the Senate or the House, as the case may be.

Mr. COPELAND and Mr. FLETCHER rose.

The PRESIDING OFFICER (Mr. LA FOLLETTE in the chair). Does the Senator from Nebraska yield; and if so, to whom?

Mr. NORRIS. I yield first to the Senator from New York, who, I think, rose first.

Mr. COPELAND. I should like to ask the Senator from Nebraska if he will be good enough to turn to page 4.

Mr. NORRIS. Of what conference report?

Mr. COPELAND. The new one. On page 4, paragraph (e), the fifth line down, "The fixed nitrogen provided for in this act shall be in such form." Does the Senator find that place?

Mr. NORRIS. Yes.

Mr. McKELLAR. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McKELLAR. How does this conference report come before the Senate at this time?

Mr. FLETCHER. It has been laid before the Senate.

Mr. NORRIS. I asked that it be taken up. The Vice President asked if there was any objection, and there was none, and he laid it before the Senate.

Mr. MOSES. Mr. President, a parliamentary inquiry.

Mr. McKELLAR. I was not here at the time——

Mr. NORRIS. There was nothing irregular about taking it up.

The VICE PRESIDENT. The conference report was laid before the Senate at the request of the Senator from Nebraska.

Mr. MOSES. Was unanimous consent given to proceed to the consideration of the report?

The VICE PRESIDENT. Unanimous consent was not given.

Mr. MOSES. Then I call for the regular order.

Mr. NORRIS. I understood that unanimous consent was given.

The VICE PRESIDENT. No; unanimous consent was not given.

Mr. NORRIS. The Chair laid the report before the Senate.

The VICE PRESIDENT. The Chair laid it before the Senate.

Mr. NORRIS. I will repeat my request, then.

The VICE PRESIDENT. Is there objection?

Mr. McKELLAR. I object.

Mr. NORRIS. Mr. President, I submit a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Nebraska will state the inquiry.

Mr. NORRIS. If the conference report is taken up on motion, will it displace the unfinished business?

The VICE PRESIDENT. It will not displace it. The Chair would so hold.

Mr. ASHURST. Mr. President, I appeal from that decision. If the conference report is taken up on motion, with great deference to the Chair, I respectfully submit it would displace the unfinished business, because neither in parliamentary procedure nor in philosophy can two things occupy the same place at the same time.

The VICE PRESIDENT. Consideration of a conference report is privileged. The Chair looked up the precedents and is prepared to rule on the question.

Conference reports have always been regarded by both Houses as highly privileged matters, upon the theory that they tend to adjust differences of the two Houses in regard to legislation and thus bring them into an agreement, and except in certain specified instances may be presented at any time, taking precedence over pending legislation.

Because of such privileged status the consideration of a conference report does not, in the opinion of the Chair, have the effect of permanently displacing whatever matter might be pending before the Senate at the time it was taken up, but simply suspends further action thereon until the report is disposed of.

Mr. ASHURST. Mr. President, do I understand the Chair to hold that if by a majority vote the Senate proceeds to the consideration of the conference report it does not displace the unfinished business?

The VICE PRESIDENT. Thereupon the matter previously suspended by its consideration again comes before the Senate in no way prejudiced by the consideration of the conference report, unless it be matters coming up in the morning hour, which upon the expiration of that period could not be longer considered.

Mr. ASHURST. From what is the Chair reading? Is he reading a rule or from the opinion of the Chair?

The VICE PRESIDENT. He is reading from a statement which has been prepared on this particular point of order. The question has been raised by several Senators.

Mr. ASHURST. I have such respect for the fairness of the Chair, he has demonstrated so often his desire to be fair, that although to my mind it is not a logical ruling, I am content if the Chair takes that view.

The VICE PRESIDENT. The Chair desires to read the remainder of his statement.

Thereupon the matter previously suspended by its consideration again comes before the Senate in no way prejudiced by the consideration of the conference report unless it be matters coming up in the morning hour, which, upon the expiration of that period, could not be longer considered.

The privilege possessed by a conference report is on a parity with that accorded to messages from the President or the House of Representatives, as set forth in Rule VII, paragraph 7, which provides that any question pending at the time of taking up said message for consideration shall be suspended for that purpose.

Mr. NORRIS. Mr. President, I desire to make a motion.

Mr. TYDINGS. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Maryland will state the inquiry.

Mr. TYDINGS. The conferees brought in a certain report, which was laid before the Senate a night or two ago. Since that time the Senate has taken no action upon that conference report. I would like to know by what authority the conferees went out and now bring in another report when one conference report was still pending before the Senate.

The VICE PRESIDENT. The previous conference report was recommitted to the committee of conference.

Mr. TYDINGS. I did not so understand.

Mr. NORRIS. Mr. President, I now move that the Senate proceed to the consideration of the conference report on Senate Joint Resolution 46, the Muscle Shoals measure.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Nebraska.

Mr. JOHNSON. Mr. President, just before the vote is had, let me say that nobody is more interested in the determination of the Muscle Shoals matter than I am. I recognize the importance of it. I recognize that it represents more than 10 years of active labor on the part of the distinguished Senator from Nebraska [Mr. NORRIS]. I want him to have every opportunity, of course, that can be accorded by this body in order that his 10 years of effort may see their fruition; that his efforts may be determined by this body one way or the other. I recognize also that the matter now comes to us as legislation passed by both Houses of Congress upon a conference report, the very last stage of legislation.

But I do not wish, sir, that the pending business shall be suspended; I mean by that that the business which is now before the Senate undetermined, the Boulder Dam bill, shall not be superseded by any other business or any other matter whatsoever. The ruling of the Chair protects the unfinished business and, protecting the unfinished business, I presume that after a reasonable time of debate this afternoon upon the Muscle Shoals matter, it will be concluded, and that we may then proceed with the unfinished business. In view of the ruling of the Vice President upon that question, and the fact that the unfinished business will be proceeded with when the debate shall this afternoon be concluded, while I shall vote against the motion, it is apparent that the Senate desires to proceed to the consideration of the conference report on Muscle Shoals and that further debate upon the question would be futile.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Nebraska.

Mr. BRUCE. Mr. President, I simply desire to say that I hope every Member of the Senate who is hostile to the Muscle Shoals measure will vote against the motion.

Mr. MOSES. Let us have the yeas and nays.

Mr. McKELLAR. Mr. President, I desire to have something to say at this time.

Mr. LA FOLLETTE. Mr. President, I make the point of order that the motion is not debatable under Rule XXVII, which provides with reference to conference reports:

> When received the question of proceeding to the consideration of the report, if raised, shall be immediately put, and shall be determined without debate.

Mr. EDGE. When can the debate take place on the conference report if that is the rule?

Mr. LA FOLLETTE. After the motion to proceed to its consideration shall have been determined favorably.

The VICE PRESIDENT. The Chair will hold that the motion is not debatable.

Mr. BINGHAM. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state the inquiry.

Mr. BINGHAM. May we have the question stated again?

The VICE PRESIDENT. The question is on the motion of the Senator from Nebraska that the Senate proceed to the consideration of the conference report on the Muscle Shoals measure, Senate Joint Resolution 46.

Mr. MOSES. Let us have the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Washington [Mr. JONES]. Not knowing how he would vote, I withhold my vote. If permitted to vote I would vote "yea."

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. I transfer that pair to the senior Senator from West Virginia [Mr. NEELY] and vote "nay."

The roll call was concluded.

Mr. OVERMAN. I have a general pair with the senior Senator from Wyoming [Mr. WARREN]. He not being present, I withhold my vote.

Mr. BRATTON. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. BRATTON. If the motion to take up the conference report is adopted and the conference report is laid before the Senate, does that displace the unfinished business?

The VICE PRESIDENT. It does not. The Chair has ruled that it does not displace the unfinished business.

Mr. CURTIS. I desire to announce that if the senior Senator from South Dakota [Mr. NORBECK] were present, he would vote "yea."

I also desire to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from Idaho [Mr. GOODING] with the Senator from New Jersey [Mr. EDWARDS]; and

The Senator from North Dakota [Mr. FRAZIER] with the Senator from Missouri [Mr. REED].

Mr. SMITH (after having voted in the affirmative). I have a general pair with the Senator from Indiana [Mr. WATSON]. Not knowing how he would vote, I must withdraw my vote.

The result was announced—yeas 46, nays 28, as follows:

YEAS—46

Barkley	Brookhart	Cutting	Harrison
Bayard	Broussard	Dill	Hawes
Black	Capper	Fess	Heflin
Blaine	Caraway	Fletcher	Howell
Blease	Copeland	George	La Follette
Borah	Couzens	Glass	Locher
Bratton	Curtis	Harris	McMaster

McNary	Robinson, Ark.	Steiwer	Walsh, Mont.
Mayfield	Robinson, Ind.	Stephens	Waterman
Norris	Schall	Thomas	Wheeler
Nye	Sheppard	Vandenberg	
Pine	Shipstead	Wagner	

NAYS—28

Ashurst	Greene	McLean	Sackett
Bingham	Hayden	Metcalf	Shortridge
Bruce	Johnson	Moses	Simmons
Dale	Kendrick	Oddie	Steck
Edge	Keyes	Phipps	Tydings
Gerry	King	Pittman	Tyson
Gillett	McKellar	Reed, Pa.	Walsh, Mass.

NOT VOTING—20

Deneen	Gooding	Norbeck	Smoot
du Pont	Gould	Overman	Swanson
Edwards	Hale	Ransdell	Trammell
Frazier	Jones	Reed, Mo.	Warren
Goff	Neely	Smith	Watson

So the motion was agreed to; and the Senate proceeded to consider the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

The report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the title of the joint resolution and agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the text of the joint resolution and agree to the same with an amendment as follows: In lieu of the language put in by the House, insert the following:

"That for the purpose of maintaining and operating the properties now owned by the United States in the vicinity of Muscle Shoals, Ala., in the interest of the national defense and for agricultural and industrial development, and to aid navigation and the control of destructive flood waters in the Tennessee River and Mississippi River Basins, there is hereby created a body corporate by the name of the 'Muscle Shoals Corporation of the United States' (hereinafter referred to as the corporation). The board of directors first appointed shall be deemed the incorporators and the incorporation shall be held to have been effected from the date of the first meeting of the board. This act may be cited as the 'Muscle Shoals act of 1928.'

"SEC. 2. (a) The board of directors of the corporation (hereinafter referred to as the board) shall be composed of three members, not more than two of whom shall be members of the same political party, to be appointed by the President, by and with the advice and consent of the Senate. The board shall organize by electing a chairman, vice chairman, and other officers, agents, and employees, and shall proceed to carry out the provisions of this act.

"(b) The terms of office of the members first taking office after the approval of this act shall expire as designated by the President at the time of nomination, one at the end of the second year, one at the end of the fourth year, and one at the end of the sixth year, after the date of approval of this act. A successor to a member of the board shall be appointed in the same manner as the original members and shall have a term of office expiring six years from the date of the expiration of the term for which his predecessor was appointed.

"(c) Any member appointed to fill a vacancy in the board occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

"(d) Vacancies in the board so long as there shall be two members in office shall not impair the powers of the board to execute the functions of the corporation, and two of the members in office shall constitute a quorum for the transaction of the business of the board.

"(e) Each of the members of the board shall be a citizen of the United States and shall receive compensation at the rate of $50 per day for each day that he shall be actually engaged in the performance of the duties vested in the board, to be paid by the corporation as current expenses, not to exceed, however, 150 days for the first year after the date of the approval of this act, and not to exceed 100 days in any year thereafter. Members of the board shall be reimbursed by the corporation for actual expenses (including traveling and subsistence expenses) incurred by them while in the performance of the duties vested in the board by this act.

"(f) No director shall have any financial interest in any public-utility corporation engaged in the business of distributing and selling power to the public nor in any corporation engaged in the manufacture, selling, or distribution of fixed nitrogen, or any ingredients thereof, nor shall any member have any interest in any business that may be adversely affected by the success of the Muscle Shoals project as a producer of concentrated fertilizers.

"(g) The board shall direct the exercise of all the powers of the corporation.

"(h) All members of the board shall be persons that profess a belief in the feasibility and wisdom, having in view the national defense and the encouragement of interstate commerce, of producing fixed nitrogen under this act of such kinds and at such prices as to induce the reasonable expectation that the farmers will buy said products, and that by reason thereof the corporation may be a self-sustaining and continuing success.

"SEC. 3. (a) The chief executive officer of the corporation shall be a general manager, who shall be responsible to the board for the efficient conduct of the business of the corporation. The board shall appoint the general manager, and shall select a man for such appointment who has demonstrated his capacity as a business executive. The general manager shall be appointed to hold office for 10 years, but he may be removed by the board for cause, and his term of office shall end upon repeal of this act, or by amendment thereof expressly providing for the termination of his office. Should the office of general manager become vacant for any reason, the board shall appoint his successor as herein provided.

"(b) The general manager shall appoint, with the advice and consent of the board, two assistant managers who shall be responsible to him, and through him, to the board. One of the assistant managers shall be a man possessed of knowledge, training, and experience to render him competent and expert in the production of fixed nitrogen. The other assistant manager shall be a man trained and experienced in the field of production and distribution of hydroelectric power. The general manager may at any time, for cause, remove any assistant manager, and appoint his successor as above provided. He shall immediately thereafter make a report of such action to the board, giving in detail the reason therefor. He shall employ, with the approval of the board, all other agents, clerks, attorneys, employees, and laborers.

"(c) The combined salaries of the general manager and the assistant managers shall not exceed the sum of $50,000 per annum, to be apportioned and fixed by the board.

"SEC. 4. Except as otherwise specifically provided in this act, the corporation—

"(a) Shall have succession in its corporate name.

"(b) May sue and be sued in its corporate name, but only for the enforcement of contracts and the defense of property.

"(c) May adopt and use a corporate seal, which shall be judicially noticed.

"(d) May make contracts, but only as herein authorized.

"(e) May adopt, amend, and repeal by-laws.

"(f) May purchase or lease and hold such personal property as it deems necessary or convenient in the transaction of its business, and may dispose of any such personal property held by it.

"(g) May appoint such officers, employees, attorneys, and agents as are necessary for the transaction of its business, fix their compensation, define generally their duties, require bonds of them, and fix the penalties thereof, and dismiss at pleasure any such officer, employee, attorney, or agent, and provide a system of organization to fix responsibility and promote efficiency.

"(h) The board shall require that the general manager and the two assistant managers, the secretary and the treasurer, the bookkeeper or bookkeepers, and such other administrative and executive officers as the board may see fit to include, shall execute and file before entering upon their several offices good and sufficient surety bonds, in such amount and with such surety as the board shall approve.

"(i) Shall have all such powers as may be necessary or appropriate for the exercise of the powers herein specifically conferred upon the corporation, including the right to exercise the power of eminent domain.

"SEC. 5. The board is hereby authorized and directed—

"(a) To operate existing plants for experimental purposes, to construct, maintain, and operate experimental plants at or near Muscle Shoals for the manufacture of fertilizer or any of the ingredients comprising fertilizer for experimental purposes.

"(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants. Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program.

"(c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce.

"(d) To cooperate with national, State, district, or county experimental stations or demonstration farms, for the use of new forms of fertilizer or fertilizer practices during the initial or experimental period of their introduction.

"(e) The board shall manufacture fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen. The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

"(f) Under the authority of this act the board may donate not exceeding 1 per cent of the total product of the plant or plants operated by it to be fairly and equitably distributed through the agency of county demonstration agents, agricultural colleges, or otherwise as the board may direct for experimentation, education, and introduction of the use of such products in cooperation with practical farmers so as to obtain information as to the value, effect, and best methods of use of same.

"(g) The board is authorized to make alterations, modifications, or improvements in existing plants and facilities.

"(h) To establish, maintain, and operate laboratories and experimental plants, and to undertake experiments for the purpose of enabling the corporation to furnish nitrogen products for military and agricultural purposes in the most economical manner and at the highest standard of efficiency.

"(i) The board shall have power to request the assistance and advice of any officer, agent, or employee of any executive department or of any independent office of the United States, to enable the corporation the better to carry out its powers successfully, and the President shall, if in his opinion the public interest, service, and economy so require, direct that such assistance, advice, and service be rendered to the corporation, and any individual that may be by the President directed to render such assistance, advice, and service shall be thereafter subject to the orders, rules, and regulations of the board and of the general manager.

"(j) Upon the requisition of the Secretary of War or the Secretary of the Navy to manufacture for and sell at cost to the United States explosives or their nitrogenous content.

"(k) Upon the requisition of the Secretary of War the corporation shall allot and deliver without charge to the War Department so much power as shall be necessary in the judgment of said department for use in operation of all locks, lifts, or other facilities in aid of navigation.

"(l) To produce, distribute, and sell electric power, as herein particularly specified.

"(m) No products of the corporation shall be sold for use outside of the United States, her Territories, and possessions, except to the United States Government for the use of its Army and Navy or to its allies in case of war.

"SEC. 6. In order to enable the corporation to exercise the powers vested in it by this act—

"(a) The exclusive use, possession, and control of the United States nitrate plants Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings connected therewith, all tools and machinery, equipment, accessories, and materials belonging thereto, and all laboratories and plants used as auxiliaries thereto; the fixed-nitrogen research laboratory, the Waco limestone quarry, in Alabama, and Dam No. 2, located at Muscle Shoals, its power house, and all hydroelectric and operating appurtenances (except the locks), and all machinery, lands, and buildings in connection therewith, and all appurtenances thereof are hereby entrusted to the corporation for the purposes of this act.

"(b) The President of the United States is authorized to provide for the transfer to the corporation of the use, possession, and control of such other real or personal property of the United States as he may from time to time deem necessary and proper for the purposes of the corporation as herein stated.

"SEC. 7. (a) The corporation shall maintain its principal office in the immediate vicinity of Muscle Shoals, Ala. The corporation shall be held to be an inhabitant and resident of the northern judicial district of Alabama within the meaning of the laws of the United States relating to venue of civil suits.

"(b) The corporation shall at all times maintain complete and accurate books of accounts.

"SEC. 8. (a) The board shall file with the President and with the Congress, in December of each year, a financial statement and a complete report as to the business of the corporation covering the preceding fiscal year. This report shall include the total number of employees and the names, salaries, and duties of those receiving compensation at the rate of more than $2,500 a year.

"(b) The board shall require a careful and scrutinizing audit and accounting by the General Accounting Office during each governmental fiscal year of operation under this act, and said audit shall be open to inspection to the public at all times and copies thereof shall be filed in the principal office of the Muscle Shoals Corporation at Muscle Shoals in the State of Alabama. Once during each fiscal year the President of the United States shall have power, and it shall be his duty, upon the written request of at least two members of the board, to appoint a firm of certified public accountants of his own choice and selection which shall have free and open access to all books, accounts, plants, warehouses, offices, and all other places, and records, belonging to or under the control of or used by the corporation in connection with the business authorized by this act. And the expenses of such audit so directed by the President shall be paid by the board and charged as part of the operating expenses of the corporation.

"SEC. 9. The board is hereby empowered and authorized to sell the surplus power not used in its operations and for operation of locks and other works generated at said steam plant and said dam to States, counties, municipalities, corporations, partnerships, or individuals, according to the policies hereinafter set forth, and to carry out said authority the board is authorized to enter into contracts for such sale for a term not exceeding 10 years and in the sale of such current by the board it shall give preference to States, counties, or municipalities purchasing said current for distribution to citizens and customers.

"SEC. 10. It is hereby declared to be the policy of the Government to distribute the surplus power generated at Muscle Shoals equitably among the States within transmission distance of Muscle Shoals.

"SEC. 11. In order to place the board upon a fair basis for making such contracts and for receiving bids for the sale of such power it is hereby expressly authorized, either from appropriations made by Congress or from funds secured from the sale of such power to construct, lease, or authorize the construction of transmission lines within transmission distance in any direction from said Dam No. 2 and said steam plant: *Provided*, That if any State, county, municipality, or other public or cooperative organization of citizens or farmers, not organized or doing business for profit, but for the purpose of supplying electricity to its own citizens or members, or any two or more of such municipalities or organizations, shall construct or agree to construct a transmission line to Muscle Shoals, the board is hereby authorized and directed to contract with such State, county, municipality, or other organization, or two or more of them, for the sale of electricity for a term not exceeding 15 years, and in any such case the board shall give to such State, county, municipality, or other organization ample time to fully comply with any local law now in existence or hereafter enacted providing for the necessary legal authority for such State, county, municipality, or other organization to contract with the board for such power: *And provided further*, That any surplus power not so sold as above provided to States, counties, municipalities, or other said organizations, before the board shall sell the same to any person or corporation engaged in the distribution and resale of electricity for profit, it shall require said person or corporation to agree that any resale of such electric power by said person or corporation shall be sold to the ultimate consumer of such electric power at a price that shall not exceed an amount fixed as reasonable, just, and fair by the Federal Power Commission; and in case of any such sale if an amount is charged the ultimate consumer which is in excess of the price so deemed to be just, reasonable, and fair by the Federal Power Commission, the contract for such sale between the board and such distributor of electricity shall be declared null and void and the same shall be canceled by the board.

"SEC. 12. The net proceeds derived by the board from the sale of power and any of the products manufactured by the corporation, after deducting the cost of operation, maintenance,

depreciation, and an amount deemed by the board as necessary to withhold as operating capital, shall be paid into the Treasury of the United States at the end of each calendar year.

"SEC. 13. The Secretary of War is hereby empowered and directed to complete Dam No. 2 at Muscle Shoals, Ala., and the steam plant at nitrate plant No. 2, in the vicinity of Muscle Shoals, by installing in Dam No. 2 the additional power units according to the plans and specifications of said dam, and the additional power unit in the steam plant at nitrate plant No. 2: *Provided*, That the Secretary of War shall not install the additional power unit in said steam plant until, after investigation, he shall be satisfied that the foundation of said steam plant is sufficiently stable or has been made sufficiently stable to sustain the additional weight made necessary by such installation.

"SEC. 14. It is hereby declared to be the policy of the Government to utilize the Muscle Shoals properties for the fixation of nitrogen for agricultural purposes in time of peace.

"SEC. 15. The Secretary of War is hereby authorized, with appropriations hereafter to be made available by the Congress, to construct, either directly or by contract to the lowest responsible bidder, after due advertisement, a dam in and across Clinch River in the State of Tennessee, which has by long usage become known and designated as the Cove Creek Dam, according to the latest and most approved designs of the Chief of Engineers, including its power house and hydroelectric installations and equipment for the generation of at least 200,000 horsepower, in order that the waters of the said Clinch River may be impounded and stored above said dam for the purpose of increasing and regulating the flow of the Clinch River and the Tennessee River below, so that the maximum amount of primary power may be developed at Dam No. 2 and at any and all other dams below the said Cove Creek Dam.

"SEC. 16. In order to enable and empower the Secretary of War to carry out the authority hereby conferred, in the most economical and efficient manner, he is hereby authorized and empowered in the exercise of the powers of national defense in aid of navigation, and in the control of the flood waters of the Tennessee and Mississippi Rivers, constituting channels of interstate commerce, to exercise the right of eminent domain and to condemn all lands, easements, rights of way, and other area necessary in order to obtain a site for said Cove Creek Dam, and the flowage rights for the reservoir of water above said dam and to negotiate and conclude contracts with States, counties, municipalities, and all State agencies and with railroads, railroad corporations, common carriers, and all public utility commissions and any other person, firm, or corporation, for the relocation of railroad tracks, highways, highway bridges, mills, ferries, electric-light plants, and any and all other properties, enterprises, and projects whose removal may be necessary in order to carry out the provisions of this act. When said Cove Creek Dam and transportation facilities and power house shall have been completed, the possession, use, and control thereof shall be entrusted to the corporation for use and operation in connection with the general Muscle Shoals project and to promote flood control and navigation in the Tennessee River, and in the Clinch River.

"SEC. 17. The corporation, as an instrumentality and agency of the Government of the United States for the purpose of executing its constitutional powers, shall have access to the Patent Office of the United States for the purpose of studying, ascertaining, and copying all methods, formulæ, and scientific information (not including access to pending applications for patents) necessary to enable the corporation to use and employ the most efficacious and economical process for the production of fixed nitrogen, or any essential ingredient thereof, and any patentee whose patent rights may have been thus in any way copied, used, or employed, by the exercise of this authority by the corporation, shall have as the exclusive remedy a cause of action for any damages claimed to be instituted and prosecuted for the recovery of reasonable compensation on the equity side of the appropriate district court of the United States. The Commissioner of Patents shall furnish to the corporation, at its request and without payment of fees, copies of documents on file in his office.

"SEC. 18. The Government of the United States hereby reserves the right, in case of war, or national emergency declared by Congress, to take possession of all or any part of the property described or referred to in this act for the purpose of manufacturing explosives or for other war purposes; but, if this right is exercised by the Government, it shall pay the reasonable and fair damages that may be suffered by any party whose contract, for the purchase of electric power or fixed nitrogen or its ingredients, is hereby violated after the amount of the damages have been fixed by the United States Court of Claims in proceedings instituted and conducted for that purpose under rules prescribed by the court.

"SEC. 19. (a) All general penal statutes relating to the larceny, embezzlement, conversion, or to the improper handling, retention, use, or disposal of public moneys or property of the United States, shall apply to the moneys and property of the corporation and to moneys and properties of the United States intrusted to the corporation.

"(b) Any person who, with intent to defraud the corporation, or to deceive any director or officer of the corporation or any officer or employee of the United States (1) makes any false entry in any book of the corporation, or (2) makes any false report or statement for the corporation, shall, upon conviction thereof, be fined not more than $10,000 or imprisoned not more than five years, or both.

"(c) Any person who shall receive any compensation, rebate, or reward, or shall enter into any conspiracy, collusion, or agreement, express or implied, with intent to defraud the corporation or wrongfully and unlawfully to defeat its purposes, shall on conviction thereof, be fined not more than $5,000 or imprisoned not more than five years, or both.

"SEC. 20. In order that the board may not be delayed in carrying out the program authorized herein the sum of $10,000,000 is hereby authorized to be appropriated for that purpose from the Treasury of the United States, of which not to exceed $2,000,000 shall be made available with which to begin construction of Cove Creek Dam during the calendar year 1929.

"SEC. 21. That all appropriations necessary to carry out the provisions of this act are hereby authorized.

"SEC. 22. That all acts or parts of acts in conflict herewith are hereby repealed.

"SEC. 23. That this act shall take effect immediately.

"SEC. 24. The right to alter, amend, or repeal this act is hereby expressly declared and reserved."

And the House agree to the same.

CHAS. L. MCNARY,
G. W. NORRIS,
E. D. SMITH,
Managers on the part of the Senate.

JOHN M. MORIN,
W. FRANK JAMES,
B. CARROLL REECE,
PERCY E. QUIN,
WILLIAM C. WRIGHT,
Managers on the part of the House.

Mr. MCKELLAR. Mr. President, I desire to propound the following parliamentary inquiry: Is it in order at this time to move to recommit this report to the conferees with instructions to strike out sections 15 and 16?

The VICE PRESIDENT. The motion is in order under Rule XXII.

Mr. MCKELLAR. I move that the report be recommitted to the conferees with instructions to the conferees on the part of the Senate to insist upon striking out sections 15 and 16 as contained in the conference report. I desire to read those two sections. They are as follows:

SEC. 15. The Secretary of War is hereby authorized, with appropriations hereafter to be made available by the Congress, to construct, either directly or by contract to the lowest responsible bidder, after due advertisement, a dam in and across Clinch River in the State of Tennessee, which has by long usage become known and designated as the Cove Creek Dam, according to the latest and most approved designs of the Chief of Engineers, including its power house and hydroelectric installations and equipment for the generation of at least 200,000 horsepower, in order that the waters of the said Clinch River may be impounded and stored above said dam for the purpose of increasing and regulating the flow of the Clinch River and the Tennessee River below, so that the maximum amount of primary power may be developed at Dam No. 2 and at any and all other dams below the said Cove Creek Dam.

SEC. 16. In order to enable and empower the Secretary of War to carry out the authority hereby conferred, in the most economical and efficient manner, he is hereby authorized and empowered in the exercise of the powers of national defense in aid of navigation, and in the control of the flood waters of the Tennessee and Mississippi Rivers, constituting channels of interstate commerce, to exercise the right of eminent domain and to condemn all lands, easements, rights of way, and other area necessary in order to obtain a site for said Cove Creek Dam, and the flowage rights for the reservoir of water above said dam and to negotiate and conclude contracts with States, counties, municipalities, and all State agencies and with railroads, railroad corporations, common carriers, and all public utility commissions and any other person, firm, or corporation, for the relocation of railroad tracks,

highways, highway bridges, mills, ferries, electric-light plants, and any and all other properties, enterprises, and projects whose removal may be necessary in order to carry out the provisions of this act. When said Cove Creek Dam and transportation facilities and power house shall have been completed, the possession, use, and control thereof shall be intrusted to the corporation for use and operation in connection with the general Muscle Shoals project and to promote flood control and navigation in the Tennessee River and in the Clinch River.

Mr. President, there is also contained in this joint resolution authority to expend $2,000,000, which I need not include in my motion, I take it, because if the motion carries it will, as a matter of course, strike out the appropriation.

When the joint resolution passed the Senate those two provisions were not contained in it. The Senators from Tennessee did not ask that they be inserted. So far as I know, no one in Tennessee, unless it be the member of the committee of the House of Representatives from Tennessee has asked that these provisions go into the joint resolution.

Mr. President, it is well known that for years I have supported a measure to deal with the dam that has been built at Muscle Shoals in the way that it was dealt with by the joint resolution as it passed the Senate. Now, however, under the conference report it is proposed that the Federal Government shall go into my State and order the condemnation of lands the area of which may equal that of an average county in Tennessee, to take away from the State and put into the hands of the Government not only the lands themselves, but all railroads and railroad corporations and public utilities that may be on those lands, electric-light plants that may be on the lands, and all other property, including cities and towns—anything else that may be on those lands—to take villages and farms and residences away from Tennessee, over the protest of Tennessee, without any invitation from Tennessee. To my mind such a proposal is incomprehensible.

Mr. COPELAND. Mr. President, will the Senator from Tennessee yield to me?

Mr. McKELLAR. I shall do so in a moment. Some say that the Government has already done that in Alabama. I deny that the Government has done that in the case of Alabama. When the dam was built in Alabama every single State officer, every member of the legislature, every Member of the Congress of the United States from Alabama, including both of the Senators from Alabama, petitioned Congress to take that action. I have here, Mr. President, which I shall read at this point, a joint resolution adopted by the Legislature of Alabama asking that the Government erect and maintain the plant at Muscle Shoals. I read from the joint resolution adopted in the Senate of Alabama on September 16, 1915, and adopted by the House of Alabama on September 20, 1915, as follows:

House joint resolution

Whereas the navigation improvement of the Tennessee River by the United States is now in the last stages of completion between Muscle Shoals and the Ohio River; and

Whereas the inadequate canal plan for the navigation improvement of the Muscle Shoals stretch of the Tennessee River was begun by the Federal Government more than 85 years ago, this improvement costing in construction more than $3,000,000 and in cost of operation and maintenance more than $1,500,000, and the yearly cost of the operation and care of this canal being in excess of $50,000 per annum; and

Whereas the United States engineers, after nearly eight years of study and investigation, have recommended to Congress a new plan at Muscle Shoals for the joint improvement of navigation and development of water power on a very large scale, as shown on Document No. 20, Sixty-third Congress; and

Whereas this new project for navigation improvement and development of water power as recommended by the Government engineers will not only practically complete the navigation improvement of the Tennessee River from the Ohio River to the upper stretches of the Tennessee, but will also develop power on such a large scale as to make it possible to operate great factories for the fixation of the nitrogen of the atmosphere as a fertilizer and for the manufacture of explosives, and thus make the United States no longer wholly dependent, as at present, upon the country of Chile for sodium nitrate, or Chilian saltpeter, necessary for the manufacture of explosives and for fertilizers; and

Whereas the United States should not longer be dependent for its nitrogen supply upon any foreign country, but should produce its own nitrogen supply by the conservation and utilization of the water powers now going to waste in the navigable streams of the country: Therefore by this joint resolution be it

Resolved by the Legislature of the State of Alabama—

1. That the adoption by Congress of the Muscle Shoals project as recommended by the Government engineers is a matter of national concern and one directly affecting the question of preparedness and national defense.

2. That the fixation of the nitrogen of the atmosphere as a fertilizer to meet the needs of the farmers of the country, and especially the southern farmers, who are the greatest buyers of fertilizers in the Nation, and whose fertilizer bills are now annually nearly $100,000,000, is a matter of national interest and importance equal to the national interest and economic importance of the great irrigation projects in the States of the arid West, which projects have received assistance from the Federal Government in excess of $116,000,000.

3. That recent successful scientific achievements have placed at the disposal of agriculture in this country chemical compounds which allow the production of a complete or universal fertilizer.

I digress here long enough to say that instead of a complete commercial fertilizer being authorized by this report, as was authorized by the joint resolution as it passed the Senate, what is proposed to be done is to provide cheaper nitrates for the Fertilizer Trust of this country. The farmers would be left out of the equation entirely. I continue the reading of the joint resolution of the Alabama Legislature:

With cheap water power, these scientific discoveries promise to revolutionize our present system of fertilization.

4. With cheap water power, the importance of these scientific achievements and their effects upon the cotton and food crops of the country, and upon the question of national defense and the preparedness of the United States in times of war, are so far-reaching and of such unusual national interest at the present time, that the adoption of the Muscle Shoals project by Congress, and its encouragement by the President and the Secretary of War can be regarded as no less than a patriotic duty.

5. That the president of the senate and the speaker of the house of representatives shall appoint a joint committee of five members from the senate and five members from the house of representatives, as a joint legislative committee, and the president of the senate and the speaker of the house shall be each a member of these respective committees, and the governor of the State shall be the ex-officio chairman of these committees and, also, that the governor of the State is hereby requested to select and appoint 12 representative citizens from the State of Alabama, not members of this legislature, to join the legislative committees hereby created, and without expense to the State, these legislative committees and citizens' committee are requested by the legislature of the State to visit Washington during the early days of the first session of Congress, assembling in December, and present a copy of these resolutions to the President of the United States, to the Secretary of War, to the Secretary of Agriculture, to the chairman of the Commerce Committee of the Senate, to the chairman of the Committee on Rivers and Harbors, and to each United States Senator and Representative in Congress from the State of Alabama, and pressingly urge upon them the national importance and, indeed, the Nation's necessity that the Muscle Shoals project be adopted by the Sixty-fourth Congress, and during its first session.

Adopted by the senate September 16, 1915.

Adopted by the house September 20, 1915.

Mr. President, there is no semblance of similarity between the two situations—the one at Muscle Shoals and the one by which the Government goes down and seizes this great property in the State of Tennessee. In the first place, substantially an entire State—members of the legislature, the governor, citizens' committees. Members of Congress, Senators—united in committing the State of Alabama to this project. On the other hand, here is the State of Tennessee, unanimously opposed, with one exception so far as I know, to the seizure of this property within its borders.

Mr. COPELAND. Mr. President——

Mr. McKELLAR. I yield to the Senator from New York.

Mr. COPELAND. May I ask the Senator a question? Of course, this action that we take to-day, if we should adopt this report, wou'd not build the dam.

Mr. McKELLAR. Why, of course it would.

Mr. COPELAND. All we have to do is to ask the Senator from California [Mr. JOHNSON] how long it takes to build a dam. This is merely an authorization, and the whole matter would be brought here and thrashed out in Congress.

Mr. McKELLAR. Oh, no!

Mr. COPELAND. If it takes proportionately as long as it does to pass the Boulder Dam bill, I think the Senator need not worry about its being done in our time. Of course, the Senator from Tennessee is a young man and he is likely to be here still, but I do not think I will be alive when it is completed.

Mr. McKELLAR. The reasoning of the Senator from New York is like the reasoning of my good friend the Senator from Nebraska [Mr. NORRIS] the other day, when I protested against including this dam. He told me that he thought it was not right to take this property from the State of Tennessee. By the way, before I get to that part of it, let me go one or two steps further.

Not only does this proposal take these lands, these villages, these homes, these railroads, these roads, this average county in area from the State of Tennessee, and deprive it of any taxation upon that property from now on—it is just the same as if it were owned by another government, and it will be, with no power of the State of Tennessee over it—but it has been estimated by no less a personage than Mr. Henry Ford that this Cove Creek property in its present state of nondevelopment is worth in actual money something like $50,000,000. It takes that $50,000,000 away from the State of Tennessee, with no power to tax it, no power to control it, no power at all over it. It deliberately goes down and takes one of the 95 counties of Tennessee, and then, in addition to that, takes this great water power from the State, with no compensation to the State.

Mr. BRUCE. Mr. President——

Mr. McKELLAR. Will the Senator wait just one moment? Then I shall be delighted to yield to him.

Mr. BRUCE. Certainly.

Mr. McKELLAR. The other proposition is that in the third place it takes every particle of State regulation away from this great project. It is not right. Can any man justify it?

Mr. NORRIS. Mr. President——

The PRESIDENT pro tempore. To whom does the Senator yield?

Mr. McKELLAR. I promised to yield first to the Senator from Maryland. Then I will yield to the Senator from Nebraska.

Mr. NORRIS. All right.

Mr. BRUCE. I was going to say that the Senator, while he was enumerating the injuries that would be inflicted on the State of Tennessee by this bill might have mentioned, it seems to me, the fact that, of course, any power generated under this bill could be transmitted to any point in the United States, anywhere.

Mr. McKELLAR. Why, of course. I will say to the Senator that it is provided in this very bill that a transmission line shall be built to Muscle Shoals, by which every kilowatt of it could be sent to Muscle Shoals if this corporation desired to do it.

Mr. BLACK. Mr. President, will the Senator yield for a question?

Mr. McKELLAR. Yes.

Mr. BLACK. Does the Senator remember a few months ago, when I was arguing about equitable distribution of power——

Mr. McKELLAR. Ah, Mr. President——

Mr. BLACK. Let me finish.

Mr. McKELLAR. The Senator from Alabama is in an entirely different situation from the Senator from Tennessee.

Mr. BLACK. I see. I live in Alabama and you live in Tennessee; that is all.

Mr. McKELLAR. Oh, no! The Senator from Alabama is estopped from taking this position, because every representative of Alabama at that time favored what was proposed, including the senior Senator [Mr. HEFLIN]. I can hear his eloquent voice now, pleading with the Government to come down to build the Muscle Shoals Dam. The Senator is estopped from making any claim of that kind and I am not estopped, because the State of Tennessee is virtually a unit against the taking of this property out of her borders.

Mr. NORRIS. Mr. President, will the Senator yield to me?

Mr. McKELLAR. Yes; I yield to the Senator.

Mr. NORRIS. I want to ask the Senator several questions.

Mr. McKELLAR. I shall be glad to answer them if it is possible for me to do so.

Mr. NORRIS. Does the Senator know that below Cove Creek Dam there are six dams or dam sites on the Tennessee River, in the State of Tennessee, and that the building of Cove Creek Dam and using it as it is proposed by the Government as a flood-control and navigation proposition will increase the value and the output of every one of those six dams in Tennessee by over 100 per cent, and that it will decrease the unit cost of all the electricity generated by those six dams in Tennessee by more than three-fourths? Does the Senator realize that?

Mr. McKELLAR. Mr. President, there are two or three answers to that. There is one concern there that has already built a dam. The others are unbuilt. With Cove Creek taken out of it, whether they will ever be built by private capital I do not know. Whether they will ever be built by the Government I do not know; but there is still another answer to that. What good is it going to do to the people of Tennessee generally——

Mr. NORRIS. Why, it will more than double the horsepower, and cut the price in two.

Mr. McKELLAR. What good is it going to do to the people of Tennessee generally to add to the profit of an electric company that is already there, or to manufacture nitrates, as provided in this bill, for the Fertilizer Trust of the country? In other words, the Fertilizer Trust has a great, big lobby here sending petitions out to Congress every day, appearing every morning in the paper, addressed to the Congressmen, for what purpose? For the purpose of protesting against any other use of this dam except to make nitrates for the fertilizer companies of the country—not for the farmers, but for the fertilizer companies—and they are fixing prices now.

It has been only a short time since I presented facts to the Senate showing how they fixed the price of fertilizer in my State, admittedly. They admitted themselves that they fixed it from $3 to $5 a ton more in Tennessee than in the adjoining States. Are we just going to turn this great power over to the fertilizer companies for the purpose of manufacturing nitrates cheaper for them? If that is what we are doing, we are doing a very poor thing, in my judgment. I do not subscribe to it, and I am not going to support this if I can prevent it.

Mr. FLETCHER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Florida?

Mr. McKELLAR. I yield to the Senator.

Mr. FLETCHER. I want to say to the Senator that another compensation and benefit which Tennessee obtains by the expenditure of some $37,000,000 by the Federal Government in this dam is that you will obtain some 60 miles, I have been told—and I think perhaps that is about right—of navigable waterway, reaching and extending to the coal fields of Tennessee. You will gain a reservoir there, and a navigable waterway for some 60 miles. Am I not right about that? It seems to me that is a very desirable thing. You get this addition to your power and your other dams all at Government expense.

Mr. McKELLAR. Mr. President, evidently the Senator from Nebraska does not agree with the Senator from Florida. I went to see the Senator from Nebraska and asked him to leave out Cove Creek. I took this position with the Senator from Nebraska: I had helped him, as everyone in the Senate knows and many people outside of it, in every way to pass the Muscle Shoals bill. Certain southern Senators got together, and we worked on this bill faithfully. They authorized me to suggest a number of amendments by which we could all support it. The Senator from North Carolina was the leader in that matter, and was good enough to suggest that I be selected to offer the amendments, and I did; and practically all of them were adopted and put in the bill. We agreed upon a bill that the Senate passed with quite a majority; and after that, when it came back making these inroads on the State of Tennessee, introducing questions here that it seemed to me were better left out, introducing here entirely extraneous matters outside of the one that we had been trying to settle for seven years, I went to the Senator from Nebraska and asked him not to agree to that part of the amendment. I said to him then that it was not right to take all of this property away from the jurisdiction of the State of Tennessee; and, as I understood him, he agreed to that proposition, and this is what he told me:

He told me that hereafter, perhaps at a succeeding session of Congress, he would introduce a bill and do his best to get it through to give the State of Tennessee—and, by the way, he included the State of Alabama, although they were estopped to ask it—a reasonable percentage of the gross profits, something like 5 per cent, in lieu of taxation. That would help some; but that was not reported.

Mr. NORRIS. Mr. President, the Senator must know that we could not put that in a conference report.

Mr. McKELLAR. I think it could have been put in the conference report.

Mr. NORRIS. Oh, no! Let me ask the Senator a question, now. The Senator wants to be fair.

Mr. McKELLAR. Oh, entirely so. Certainly, if I wanted to be unfair, I would not select the Senator from Nebraska.

Mr. NORRIS. To be fair, it must be stated that this conference report would have been subject to a point of order if such a provision had been inserted in it—everybody knows that—because that provision was in neither the Senate bill nor the House bill.

Mr. McKELLAR. Well, the Senator regarded that as a fair proposition. The Senator felt that it was not right to take the property of the State of Tennessee without any compensation or he would not have made that suggestion to me.

Mr. President, under those circumstances, it being admittedly wrong to despoil the State of Tennessee of this property without her consent—if she were here asking for it, it would be a different thing, but she is not here asking for it—so far as I know, every official except one is opposed to it——

Mr. NORRIS. Mr. President, will the Senator yield to me?

Mr. McKELLAR. Yes.

Mr. NORRIS. I understand that this provision was put in the bill in the House mainly by the efforts of the Representatives from Tennessee.

Mr. McKELLAR. No; one Representative from Tennessee. I understand that Mr. REECE is for it.

Mr. NORRIS. Another Representative from the House has been over to see me to-day, and he is enthusiastically in favor of keeping this in the bill.

Mr. McKELLAR. Perhaps there is a difference of opinion, then; let it go at that; but certainly the State by its legislature, by its governmental authority, has never been here demanding it. They have made no request for it; and why, without their consent, should this be done? Is that the way the Federal Government is going to treat one of its States—to come here and take, without its approval, without its consent, and over its protest, its property in this fashion? Are you going to take its property in that way, one ninety-fifth of it? There are 95 counties in my State and I imagine this would be about the size of an average county. Is that what Congress proposees to do?

Senators, I do not believe you are going to do it. I just do not believe you are going to do it when these facts are presented to you. Are you going to take this enormous property, all the lands that are under this water?

The Senator from Florida says, "Why, it will give you a long line of river transportation."

Mr. FLETCHER. Sixty miles.

Mr. McKELLAR. Sixty miles of river transportation. The Senator from Florida has never been down there. It would be between the mountain peaks on either side. How could we utilize it? It could be utilized for park purposes; it might be utilized for fishing purpose; it could hardly be utilized for residential purposes. I do not know what would be the result.

Mr. FLETCHER. It could be used for the transportation of your coal.

Mr. McKELLAR. How can you transport things where people do not live, on the tops of mountains? They do not cultivate crops on the tops of mountains. They cultivate their crops and they live in the valleys below, and those valleys will be taken by this bill. You have got to have the valleys, and you take them all. You submerge an immense amount of land there, and you take it away from the taxation of both the counties and the State; and not only that, but you take away the best power that we have. We have no control at all over it. We can not have transmission lines built. There may be a hundred companies that want to settle in that neighborhood, and they could not do it unless this commission gave them the right to do it. It is not fair and it is not just, and I hope this motion will be agreed to. I have protests here from practically everybody in the State, which I have not filed.

Mr. ASHURST. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield.

Mr. ASHURST. For more than four years past the responsible officials of the State of Arizona have been calling attention to the fact that the Federal Government, for the benefit of California, was attempting to come into Arizona, capture one of Arizona's greatest resources, and over Arizona's protest convey the same 250 miles away to be used in California. We have said that if Arizona were the only State that might ever be thus invaded and thus exploited; if Arizona were the only column supporting the Federal Union to be blasted away, the Union would survive; but we say that so sure as you blast away one column, you will soon be blasting away at another column and another State will be exploited. Usurpation grows by what it feeds upon. No foreign power will overwhelm the United States, but the dry-rot of political and internal corruption and destruction of the States may overwhelm the Federal system. The time is at hand to oppose and to resist this unconstitutional Federal aggression and to stand for the rights of the States. Tennessee's cause of to-day may be your cause to-morrow. Those who would use the great shield of the Constitution as their defense must not deny that same use of it to others.

I congratulate the Senator from Tennessee [Mr. McKELLAR]. In all his career he has never done a greater service to say that, "No matter what material wealth may come to my State, she will not sell herself for 'prosperity,' or for material welfare." The Senator has made a valuable contribution to statesmanship by his refusal to listen to the siren song sung by those who say, "Prosperity will come to your State if you violate the Constitution." Arizona stands steadfastly by that sturdy doctrine.

Arizona's reply to all invasion and all usurpation is, "Arizona scorns all bribes and wears no chains."

Mr. McKELLAR. Mr. President, I want to thank my splendid friend from Arizona for the complimentary statement he has made about me.

Proceeding further, I want to talk to Senators seriously here this afternoon. Would Senators want that done in their States?

Mr. ASHURST. The Senator may rest assured they would not.

Mr. McKELLAR. Is there a man here who would like to have a county of his State turned over to the Federal Government under these circumstances?

Mr. HOWELL. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield.

Mr. HOWELL. In the State of Nebraska, in the southwest section, we have a great reservoir site, and we have been begging the Government to come there and erect the necessary dam to conserve the waters of the Platte River, so that they might be of benefit to the State. I have no doubt in my mind, but possibly if Tennessee thought that the Government would do this ultimately, it would be willing to pass around the hat to induce the Government to do it.

Mr. McKELLAR. If the Senator is in a situation so that he can invite the Government to do that in Nebraska, that is all right, and if the Senators from Nebraska come here and ask for my aid, if they think it is an aid to their people and their State, and their State wants it, that is another matter. But that is not what we are doing. Here is a proposal to take this vast amount of property away from the State of Tennessee without any compensation. We have no right to tax those lands, we have no right to tax the power that is generated there. An offer was made in the House to give Tennessee certain rights in the matter, but the House voted it down. Is it right to take Tennessee's property without due compensation? That is what is proposed. The proposal is to take her property without any compensation at all. The senior Senator from Nebraska admits that she ought to be compensated for it. Are we to come after the thing is done, are we to come after the property has been taken, are we to come with our hats in our hands and beg Congress? My colleague and myself will have to introduce claims against the United States Government; by the way, claims that would come before the committee presided over by the handsome junior Senator from Nebraska [Mr. HOWELL]. I am afraid that if those claims for many millions of dollars on the part of the State of Tennessee have the same fate that a claim for a paltry $1,750 has had before him for some years, we will have to keep our hats in our hands a long time asking for the proper compensation from the Government to the State of Tennessee.

Mr. FLETCHER. Mr. President——

Mr. McKELLAR. Just one moment. In the constitution of every State in this Union there is a provision that a citizen's property shall not be taken without due compensation. Is there a Senator here who will say that in his State there is not such a constitutional provision, that the citizen's property shall not be taken without compensation? Yet the result will be the taking of one ninety-fifth of a State's property without any compensation, when the author of the resolution admits that it is entitled to compensation. Now I yield to the Senator from Florida.

Mr. FLETCHER. I do not understand that the Government is to go right in and exercise the right to take the property without compensation. It is to exercise the right of eminent domain.

Mr. McKELLAR. The Senator from Florida confuses the two proposals. The constitution of Tennessee does provide that you can not take the citizen's property without compensation, just and adequate compensation, and of course the bill would be unconstitutional, or it would be of no effect, if it did not have a provision for compensation to the individual owner. But the proposal is to go to Tennessee and take away from her this enormous property, taxable property, belonging to the State of Tennessee, without the slightest compensation, and it is not right. The Senator from Florida would not stand for it, and no other Senator would stand for it, in my judgment.

Mr. SIMMONS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from North Carolina?

Mr. McKELLAR. I yield.

Mr. SIMMONS. The Senator has spoken frequently of taking the property of the State of Tennessee. How do they propose to take it, and for what purpose? Is it for the purpose of flooding it and establishing reservoirs?

Mr. McKELLAR. To establish a reservoir. It is estimated it would take 75 to 100 acres of land, and maybe more. I think the Senator from Nebraska yesterday estimated that it would take 100 square miles. The Senator made a statement about it.

Mr. NORRIS. A little over 85 square miles of territory.

Mr. SIMMONS. That land belongs to the State of Tennessee?

Mr. McKELLAR. Oh, no; it belongs to individuals, but the State of Tennessee now has jurisdiction over it. It is now taxing that land. It is now receiving an income from that land. There are two counties down there that are now taxing that land, that are now receiving the taxes from that land.

Mr. SIMMONS. Does the Senator mean that the resolution provides for the payment of the individual owners of that land?

Mr. McKELLAR. Yes.

Mr. SIMMONS. And his contention is that the State of Tennessee is deprived of the right of taxation?

Mr. McKELLAR. Yes; and the counties are. There are two counties which would be taken. I am not so sure what effect it would have on those two counties. If the lands are flooded to the extent I think they will be, it will virtually destroy two counties in my State. Certainly one will be substantially destroyed.

To do that without compensation to the counties or the State, and then, in addition to that, to take power that is estimated to be worth in its present undeveloped state something like $50,000,000 without compensation, it seems to me is such an unfair proposition that it ought not to be tolerated for a moment.

Mr. NORRIS. Mr. President, will the Senator give the Senate the names of the two counties that are going to be taken?

Mr. McKELLAR. Anderson County and a part of Campbell County.

Mr. NORRIS. Will it take all of Anderson County?

Mr. McKELLAR. No; it will not take all of either of them.

Mr. NORRIS. How large are those counties?

Mr. McKELLAR. It is difficult for me to say from memory. I think either one of them would be larger than the area that is proposed to be taken. They can not estimate exactly how much is to be taken.

Mr. NORRIS. The counties in Tennessee, especially in that end, are a good deal larger one way than 9 miles, are they not?

Mr. McKELLAR. Some of them are, and some of them are not.

Mr. NORRIS. Eighty-five square miles would be a little over 9 miles on either side.

Mr. McKELLAR. I estimated it would take a county 10 miles square. In Tennessee we have some counties larger than that; a great many larger than that, and some counties smaller than that.

Mr. NORRIS. There are none smaller than that in that part of Tennessee, are there?

Mr. McKELLAR. Yes; the county of Unicoi, 50 miles away, is smaller.

Mr. NORRIS. It will be safe if it is 50 miles away.

Mr. McKELLAR. Unicoi County perhaps would be, but it would take a great deal of the territory of Hancock County, 30 miles away.

Mr. REED of Missouri. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield.

Mr. REED of Missouri. I am not trying to take part in this debate, but I want to get the Senator's viewpoint.

Mr. McKELLAR. I will be glad to give the Senator any information I can.

Mr. REED of Missouri. Does the Senator think that the right of a State or municipality to levy a tax is a property right within the meaning of the Constitution which prohibits taking property without due process of law?

Mr. McKELLAR. No; I do not, but it is a property right, and the highest kind of a property right that a State can have. The right to tax, in my judgment, is the highest right that any government can have, whether national government, state government, county government, or municipal government.

Mr. REED of Missouri. The Senator says it is not a property right within the meaning of the Constitution.

Mr. McKELLAR. Of the State constitution; no. I doubt whether it is.

Mr. REED of Missouri. I undertake to say it is not a property right at all. It is a power of sovereignty.

Mr. McKELLAR. The Senator may call it what he pleases; that is immaterial.

Mr. REED of Missouri. I want to follow this a little further.

Mr. McKELLAR. I will be glad to have the Senator do so.

Mr. REED of Missouri. Suppose a railroad were to build across a State and to take the property of private individuals under the power of eminent domain. It would be doing exactly what the Federal Government is doing here, would it not?

Mr. McKELLAR. Yes.

Mr. REED of Missouri. Speaking now not with reference to property rights, but with reference to an ultimate possible injury to the State in its ability to collect taxes, of course, if property is taken for a public use it is no longer taxable.

Mr. McKELLAR. Yes.

Mr. REED of Missouri. But the money that is paid in compensation becomes immediately taxable.

Mr. McKELLAR. Yes; perhaps so, and perhaps not.

Mr. REED of Missouri. If the Federal Government were to take this great body of land—I am not saying it ought to take it, but I am discussing this one question——

Mr. McKELLAR. I understand.

Mr. REED of Missouri. If it were to take this great body of land and pay what the land is worth, it would still remain taxable by some public authority somewhere—the same amount of property.

Mr. McKELLAR. No, sir; it is not taxable at all.

Mr. REED of Missouri. The money is taxable.

Mr. McKELLAR. The money might be.

Mr. REED of Missouri. The proceeds are taxable. That is to say, if the Government were to take a piece of land worth $10,000, and now taxable as land, and were to pay that to the Senator, a citizen of Tennessee, and he remains a citizen of Tennessee, the $10,000 in his hands would be taxable by the State of Tennessee. If he moved some place else, of course, it would be taxable somewhere else if he did not lose it. If somebody else got it away from him, it would be taxable in the other man's hands.

Mr. McKELLAR. It might be if it were money, and it might not be. That is relatively true, of course; but let me call the Senator's attention to this fact: If it is within the power of the United States Government to go down into Tennessee and, by condemnation, against the will of the State of Tennessee, take one county of the 95 of that State, it would have like power to take a second county and a third county, until finally it could take the entire 95 counties.

Mr. REED of Missouri. That is an entirely different question.

Mr. McKELLAR. If we start out in that direction there is no telling where it may stop. They may want it for another purpose down there in Tennessee.

Mr. REED of Missouri. That is not the question I am discussing. I might have great sympathy for the Senator on that question.

Mr. McKELLAR. I am sure the Senator would have. I think, if I know the Senator at all—I have always had the highest admiration for him—that he would not ever subscribe to anything that was wrong. I do not think the Senator would cast his vote to say that the Government of the United States, against the will of the people of Tennessee, shall go down there and take this property regardless of the wishes of the people of that State.

Mr. REED of Missouri. The only question I was interested in was the claim that it was taking the property without process of law and the further question of the right to levy taxes as a property right. I do not agree with the Senator upon either of those propositions.

Mr. McKELLAR. Just before the Senator takes his seat let me ask him a question. The State has roads in that territory and the counties have roads in that territory. Does the Senator say that the Government should have the right to go in and condemn those roads?

Mr. REED of Missouri. I know it would not have any just right to do that, but whether it had the legal power is still another question. I only rose to try to get the Senator's views on these two questions. If the Senator is discussing the proposition from the broader standpoint that the Federal Government ought not to go into a State under the claim of navigation and expend that power to improve navigation, not really for the purpose of improving navigation, but for the purpose of creating water power, and that the State has greater rights to control the water within its borders, he would be discussing a question with which I might have very much sympathy.

Mr. McKELLAR. That is the very question I am trying to discuss. When the Government went down to take this property, it would have the right to give compensation and take the land of private individuals, but the State of Tennessee was in no such position. It had to submit, unless it went to war about it—and of course it could not do that—to what the superior Government did. It would have to do it without compensation, because confessedly the great rights that the State of Tennessee has in the property, the right to tax the land itself, the right to tax the power that is generated, the right to regulate the power that is generated—all of those rights are taken away from the State of Tennessee under the proposed bill, without

compensation, without any regulation of any kind. They could remove every kilowatt of the power out of Tennessee without the slightest regulation. That is not fair. I agree with the Senator from Missouri entirely. It is a higher question of what is right. Should this great Government, simply because it has the power to do it, go down there and take what does not belong to it?

Mr. REED of Missouri. Mr. President, if the Senator will permit another statement rather than an interrogation——

Mr. McKELLAR. I am glad to have the views of the Senator from Missouri. I have the greatest respect for them, as I have for him.

Mr. REED of Missouri. I am very much inclined to the view, although my mind is not settled upon it, that if in good faith, in a desire to promote the navigability of the stream or to control the waters of the stream so they would not destroy life and property along its banks, the Federal Government were to build a dam which incidentally generated some power, at least there might be a serious question as to whether the Federal Government ought not to be allowed to control the power that is generated and which came, as an incident, from the good-faith attempt at navigability.

Mr. McKELLAR. The Senator knows that has never been passed upon by the Supreme Court, but I quite agree with him that it is a great question.

Mr. REED of Missouri. But I have been opposed consistently—I hope consistently—since I have been a Member of this body, to the Federal Government exercising a power granted for one purpose in order to accomplish an entirely different end than that which was in contemplation when the power was granted. We have had some examples of that. We had it when we granted Mr. Hoover the right to license concerns engaged in grain dealing in order to prevent hoarding. We found it exercised for the purpose of regulating the prices of the products. There are plenty of examples of that kind in our country, and I have never voted for such an abuse of power as that.

Mr. McKELLAR. I am glad to have the views of the Senator. I would like to have him study the question, because I know that when he puts his great mind upon it, as other Senators should put their minds upon it, he will not vote to take away these rights from the State of Tennessee and from the counties of Tennessee certainly without giving proper compensation in the same bill, certainly without protecting the rights of the State of Tennessee. That is all I ask.

We went before the Senate committee; we went before the House committee; we went before the House itself; and we asked for compensation. We asked to retain State jurisdiction over the matter. We asked to retain State power of taxation. We asked even for a portion of the net proceeds of the matter. All were denied us, and have been denied us constantly, until I have reached the state of mind that I can not give my consent to the passage of the bill.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

Mr. McKELLAR. I yield.

Mr. CARAWAY. In computing the right of the State, was it the Senator's idea that they ought to collect enough out of the power plant to equal the amount that they were realizing by taxation on the land?

Mr. McKELLAR. I can not say that I have given that enough consideration to know, but I feel that something should be put in the bill that would guarantee to Tennessee her regulatory powers over the matter, guarantee to her the right of State sovereignty in regard to the matter, and give her something in lieu of taxation.

Mr. CARAWAY. Is it the Senator's idea that the State of Tennessee ought to regulate the power that is generated in the dam?

Mr. McKELLAR. It ought to have some power over it. I do not know just what particular power it should have. Under the Federal water power act it is a combined authorization, and something like that ought to be worked out in this bill.

Mr. CARAWAY. Would the Senator say that the dams at Muscle Shoals and Cove Creek, so far as regulation is concerned, ought to be the same?

Mr. McKELLAR. No. I do not think so, for the reason that the State of Alabama came in and urged the Congress to build the dam at Muscle Shoals without making any conditions about it. By their own acts they induced the building of that great dam there, and I do not think that they are in the same position with those of us in Tennessee who are standing here protesting against the taking of this great property from the State of Tennessee without compensation.

Mr. CARAWAY. I am not hostile to the Senator's position.

Mr. McKELLAR. I am quite sure the Senator is not.

Mr. CARAWAY. Here is what I have in mind. I do not believe a State can surrender its sovereignty even though it tried to do it, and therefore I do not think that Alabama could ever abandon any part of her territory.

Mr. McKELLAR. That may be true.

Mr. CARAWAY. I am not arguing that. Would the Senator be willing to prepare an amendment, so that we could ratify the conference report with his amendment providing what he thinks would be a fair compensation to the State of Tennessee?

Mr. McKELLAR. I do not know about the fair compensation. If the Senator would be willing to include in that a State regulatory power and the other matters to which I have referred, I would be willing.

Mr. CARAWAY. I think power transmitted into any State ought to be under the control of the commission of that State. I should say that Alabama ought to have the right to say that she has the right to regulate power generated at Cove Creek which is transmitted into Alabama.

Mr. McKELLAR. I want to repeat, as I said to the Senator from Nebraska when talking to him about it, and he agreed with me entirely and, indeed, said that we were both agreed on it absolutely, that any proposition of that kind should treat the State of Alabama, although she had waived her absolute right to it, in exactly the same way.

Mr. CARAWAY. I doubt whether Alabama could waive any rights.

Mr. McKELLAR. Perhaps that is so.

Mr. BLEASE. Mr. President——

Mr. McKELLAR. I yield to the Senator from South Carolina.

Mr. BLEASE. Does the bill give the Federal Power Commission the right to fix all rates?

Mr. McKELLAR. Oh, yes; of course.

Mr. BLEASE. Does not that take away State rights from the State?

Mr. McKELLAR. Absolutely. The State has no power or right, not a scintilla of power or right, regulatory or otherwise, under the bill.

Mr. BLEASE. The Republican Party would do that, of course.

Mr. McKELLAR. Oh, I would not say that.

Mr. CARAWAY. Mr. President, will the Senator yield again?

Mr. McKELLAR. Certainly.

Mr. CARAWAY. I am not trying to force the Senator's hand.

Mr. McKELLAR. I know that.

Mr. CARAWAY. But if we are going to try to ratify the conference report, and the Senator believes it ought to be done with certain reservations, does it not appeal to the Senator that he ought to reduce to writing the reservation that he thinks the conference report should have incorporated in it in order that we may ratify it?

Mr. McKELLAR. I shall be very happy to do it.

Mr. CARAWAY. I do not know what would meet the approval of the Senator from Nebraska, but if it is possible to be perfectly fair and perfectly just and finally get Muscle Shoals put to work we ought to do it.

Mr. McKELLAR. I agree with the Senator.

Mr. CARAWAY. But I shall oppose any agreement that does not treat the States of Alabama and Tennessee exactly alike.

Mr. McKELLAR. I want first to thank the Senator from Arkansas for his suggestion. I shall be very happy by tomorrow morning to prepare an amendment along the lines he has suggested.

I want to say just this about the legislation. I have been in this body and the body at the other end of the Capitol for 17 years. I was the first to offer any proposal to develop Muscle Shoals. I was a member of the Committee on Military Affairs of the House at the time and offered an amendment to an appropriation bill, providing $20,000,000 to start this great project at Muscle Shoals. I am earnestly in favor of the Government utilizing that property in accordance with the original plan. That plan was to manufacture explosives in time of war for the protection of our Republic in time of danger. The other plan was to manufacture fertilizer in time of peace.

Those two things have been uppermost in my mind in regard to this matter all the way through. I think every Senator here will bear witness to that fact. I have fought for it in season and out of season. We finally got a bill passed which provided for those things in the very best way. It was the greatest thing in the world to me, after those months and years of labor, to help to bring this about for the benefit of our Republic in time of war and for the benefit of our farmers through the medium of the manufacture of fertilizer in time of peace, to give those around the Shoals an opportunity to have cheaper current, light, and power in times of peace. All of those things were

provided for in the Senate bill. I never was so happy in my life as when we got that bill passed.

But now we have it all spoiled by, first, a conference report that takes away from Tennessee this vast property at Cove Creek and joins it up with the Muscle Shoals proposition, introducing a new phase, introducing a new issue, introducing new questions, introducing new powers, introducing new purposes all along the line. It has been the greatest disappointment in the world to me. When the report went back yesterday to the committee I thought it was going back for the purpose of removing the Cove Creek proposition. I had no idea the conferees would bring back the Cove Creek proposition in it again. But instead of that, what has happened? Instead of manufacturing fertilizer for the farmers and giving them cheaper fertilizer, what does the joint resolution now propose to do? It proposes simply to manufacture cheaper nitrates—for whom? For the farmer? How in the world can the farmers get cheaper nitrates from the Fertilizer Trust? There is no power conferred by this measure to sell a mixed fertilizer. The farmers can not use nitrates just as they are manufactured. It is chemically and physically impossible; it can not be done. What is proposed is simply to manufacture cheaper nitrates for the Fertilizer Trust—that trust which has been for fixing the prices, which in Baltimore a short time ago was fined, I believe, upon its own admission, $100,000 for fixing fertilizer prices to the farmer; yet Senators talk here about legislating in favor of the farmer.

The amount of fertilizer which would have been manufactured at the Muscle Shoals plant, if the joint resolution as it passed the Senate had gone through, would have stabilized the price, it is true, it would have brought about cheaper fertilizer prices to the farmer, but when there is substituted for fertilizer the term "nitrates" it will not result in producing a cheaper fertilizer for the farmer; but, I repeat, in producing cheaper nitrates for the Fertilizer Trust.

My friend from South Carolina [Mr. SMITH], who is one of the most accomplished men in the knowledge of chemistry whom I know, will tell Senators that nitrate constitutes about 90 per cent of the completed fertilizer; it is the principal ingredient. The potash in fertilizer is virtually immaterial in cost. Phosphoric acid is likewise somewhat immaterial. When it comes to the cost of the fertilizer the greatest part of the cost is in the nitrate. The joint resolution as now framed, instead of providing cheaper nitrates in the way of fertilizer for the farmers of the country, provides cheaper nitrates for the Fertilizer Trust, and will have no possible effect on the prices of fertilizer. The trust can charge the same price as before. Is not that true? I ask my friend from South Carolina if he does not agree with that proposition.

Mr. SMITH. The joint resolution, as now framed, provides that the nitrates which shall be manufactured at Muscle Shoals shall be put in such form as to be available to the individual farmer for application to his crops and to the soil. The intent of the conferees and the framers of this measure was that the nitrates should be in a form, if not similar to, at least as easily available to farmers as nitrate of soda which we import from Chile.

Mr. McKELLAR. That is only saying in another way what I have said. The Senator from South Carolina knows that the farmers can not use nitrates in the form in which they will be manufactured; in that form they will be of no service to him.

Mr. SMITH. They will have to be under the terms of the joint resolution.

Mr. McKELLAR. Let us see whether or not it will. I will read the provision and will appeal from the Senator to the joint resolution itself:

(e) The board shall manufacture fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen. The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients—

In combination with other ingredients—

and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

Ah, Mr. President, how is that combination made? It is made only by the fertilizer manufacturers. It is not under the joint resolution to be permitted to be made by the Government, and so long as there is no provision that the Government shall make it or that the proposed corporation shall make it, the result will be that it will not be made. We all know that.

Mr. SMITH. Will the Senator from Tennessee allow me one other word?

The PRESIDING OFFICER (Mr. THOMAS in the chair). Does the Senator from Tennessee yield to the Senator from South Carolina?

Mr. McKELLAR. I shall be glad to allow my friend from South Carolina to say what he likes.

Mr. SMITH. The idea is that it is necessary to have a carrier for the nitrogen. The nitrate of soda has a sodium carrier, which is not deleterious to the soil and has no fertilizer in quantities, but does keep the nitrogen in a very available form for plant food. As soon as it is applied to the earth in the presence of moisture it dissolves and the nitrogen is readily assimilated by the plant. One can not take pure nitrogen in itself in any form whatever and make it available for ordinary agricultural purposes; but it is very easy, comparatively speaking, or chemically speaking, to combine it with a carrier that would make it easy of handling, easily available, and at the nitrate fixation or experimental station here they have quite a number of samples. I wish I had brought them here, for they sent me down a cabinet containing various forms of fixed nitrogen that could be readily used without any other fertilizer ingredient, but with simply a carrier to hold in a fixed form the nitrogen extracted from the air. That was the purpose of that amendment.

Mr. McKELLAR. Mr. President, the Senator is entirely mistaken about it. The purpose is just the contrary of what the Senator says. I wish to read it to him, because I know he has not read this particular provision in the conference report:

(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials—

The purpose is not to deal with the farmers, as provided in the joint resolution as passed by the Senate, not to deal with the associations of farmers, and not to deal with cooperatives, but to deal with the Fertilizer Trust, with the manufacturers of fertilizer. That is the purpose under the joint resolution as now reported by the conferees.

Mr. SMITH. If the Senator will allow me, I will say the object of that paragraph he has just read was to get from the fertilizer people or from any chemical-production plant certain elements that might be necessary with which to experiment. For example, there is a new method of producing phosphoric acid; a process is being developed by which very low-grade phosphate rock can be used. The iron in the rock neutralizes the effect of sulphuric acid under the old method. The Government has developed a new process, and it was thought wise to put in a provision that would enable the use of some of this old material that was on hand for further experimentation in the effort to find a better process than the one now employed.

Mr. McKELLAR. There is not any doubt that what is proposed, so far as the farmers are concerned, is to take this vast property there and experiment with the farmers.

I wish to ask the Senator from North Carolina a question or two, if he will permit me.

Mr. SMITH. Certainly.

Mr. McKELLAR. Under the joint resolution as passed by the Senate the corporation to be created would have had the right to manufacture and sell a completed fertilizer to cooperatives, to farm organizations, to individual farmers. Is not that true?

Mr. SMITH. Yes.

Mr. McKELLAR. That provision has been eliminated from the conference report, has it not?

Mr. SMITH. Yes.

Mr. McKELLAR. Why was it taken out? It can not be taken out and left in; it can not be left in for the purpose of getting this measure through, and taken out for the purpose of taking away from the farmer the right that he should have. Why was it done? Why did the conferees take away the right of the corporation to be created, after it shall have manufactured fertilizers, to sell them to the farmer, or to farm cooperatives, or to farm organizations? Why was it done?

Mr. SMITH. If the Senator has asked me that question in good faith——

Mr. McKELLAR. I have.

Mr. SMITH. Let me say that I took considerable time the other night to try to explain to my colleagues that, outside of nitrogen, there are only two other ingredients known to the world, so far as I am aware, that constitute plant food. The other two are potash and phosphoric acid. There is such an ample supply of phosphoric acid at such an extremely low price—and the same thing is true of potash—that if the farmer can be furnished with an available form of nitrogen the problem is practically solved.

Mr. McKELLAR. Yes; and that is just what has not been done. The conferees have provided for the manufacture of nitrogen according to the conference report, but they have prohibited the sale by the proposed corporation of nitrogen to a farmer or to farm organizations. The conferees have arranged the provisions of the joint resolution so that the nitrogen can not be sold to anybody except the fertilizer people, and everyone knows that they are in a combination; everybody knows that they have a great organization right here in Washington, and are using every endeavor to obtain this particular provision. Why? Because it provides for the manufacture of cheaper nitrogen for them, and nitrogen is the principal ingredient of fertilizer.

Mr. SMITH. I do not think the Senator's inference is justified. If it is, I am very much mistaken in what has been done. I do not understand that there is any restriction on the manufacture and sale of nitrogen. There may be as to fertilizer; but I do not think there is any particular restriction on the sale of nitrogen.

Mr. McKELLAR. The joint resolution as agreed to by the conferees provides for the sale to manufacturers of a completed fertilizer. If the Senator were a member of the proposed board of three he would have no right to sell to farm organizations, he would have no right to sell to cooperative associations; he would have no right to sell to bodies of farmers or to individual farmers anywhere.

Mr. SMITH. Oh, yes; I think under the bill it could be sold if the corporation so desired.

Mr. McKELLAR. Will the Senator point out such a provision?

Mr. SMITH. I have not the measure before me.

Mr. McKELLAR. I will give the Senator a copy and let him point it out.

Mr. SMITH. I do not think there is any restriction.

Mr. McKELLAR. But the board must have authority. It is not a question of restriction; the board can not do it according to the terms of the conferees' report.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield.

Mr. BARKLEY. What good would it do to sell nitrates to the farmer? What he wants is fertilizer.

Mr. McKELLAR. It would not do a particle of good, and the joint resolution as now framed prohibits the sale of nitrates to the farmer.

Mr. BARKLEY. What could he do with them if he got them?

Mr. McKELLAR. He could not even handle them.

Mr. SMITH. Mr. President, may I answer that question?

Mr. McKELLAR. I will be very glad to have the Senator do so.

Mr. SMITH. If the farmers in the State of the Senator from Kentucky and my State and in every other State where they raise grain can be given nitrates, they can get otherwise phosphoric acid and potash.

Mr. BARKLEY. I am asking the question for information.

Mr. SMITH. I am trying to give the Senator information.

Mr. BARKLEY. I am wondering whether the ability to secure nitrates unmixed would be of any advantage to the farmer?

Mr. SMITH. That is the way he uses it now. I use it every year, the farmers of my State and the farmers of every State on the Atlantic seaboard use pure nitrogen, if they can get it in a form which they can use. The best they can get is nitrate of soda imported from Chile in sacks. It comes often in shiploads already in the sacks and is sent directly to the farm. I take it out and use it on all crops that I make. It constitutes the greatest plant food. It is necessary in strengthening the cotton fiber. The use of phosphoric acid is indicated on some land and also potash; potash is not indicated on any red soil. The presence of red clay in land indicates that it is rich in potash.

Mr. BROOKHART. Mr. President——

The PRESIDING OFFICER. The Senator from Tennessee has the floor.

Mr. McKELLAR. I yield to the Senator from Iowa.

Mr. BROOKHART. I ask unanimous consent to submit a report from the Committee on Post Offices and Post Roads on Senate Resolution 144.

Mr. NORRIS. I object.

Mr. SHORTRIDGE. Mr. President, will the Senator yield to me for just a moment?

Mr. McKELLAR. I have no objection to yielding, but the Senator from Nebraska may have. I yield if I can.

Mr. NORRIS. What does the Senator desire to do?

Mr. SHORTRIDGE. To correct the RECORD.

Mr. NORRIS. I object.

Mr. McKELLAR. I am willing to yield, if I can do so without losing the floor.

The PRESIDING OFFICER. Objection is heard.

Mr. NORRIS. There is a filibuster on.

Mr. McKELLAR. Mr. President, I am still waiting for my friend from South Carolina to point out the provision of the bill under which this board could sell nitrates to the farmer, to individual farmers or organizations of farmers. I am not asking that question facetiously.

Mr. SMITH. I am satisfied that they have that power in the bill.

Mr. McKELLAR. Well, it is not provided in the bill. I do not believe a corporation organized as this one is organized could go outside of the four corners of the bill and do any act. I do not believe that would be one of the implied things, for the reason that under the terms of this bill all of the completed fertilizer that it can manufacture is for experimental purposes. It is confined to experimental purposes.

The Senator from Nebraska had that view in the beginning. When his original bill was first presented to the Senate, during the early part of the session, it provided simply for experimentation. It was at the earnest request of southern Senators—the Senator from North Carolina [Mr. SIMMONS], the Senator from South Carolina [Mr. SMITH], the Senators from Georgia [Mr. GEORGE and Mr. HARRIS], and various other Senators from the South, where fertilizers are absolutely necessary in order to make reasonable crops—that the Senator yielded on that proposition, and permitted fertilizers to be manufactured. The Senator from South Carolina will remember the various conferences, and our earnest insistence that the farmers should have a completed fertilizer.

Now it is said that that comes in competition with private industry, with the private companies already established. In a sense that is so; but the amount manufactured by the Government would be exceedingly small, and the only effect of the Government entering into this sphere of private business to the extent that it does would be to stabilize the price of fertilizers and probably reduce them a little to the farmers of the country.

I think it is a time when we should do that. I think, instead of legislating to turn over this great plant to the Fertilizer Trust, as we will do if this conference report is agreed to, that we ought to utilize it for the benefit of the people. It ought not to be given over to a private company.

I have contended here on this floor, in season and out of season, that this plant at Muscle Shoals should be used for the benefit of all the people—for the Government first, for the farmers in the second place, and in the third place for the users of electric current, as many as could use it at a lower price. It can be done, and it ought to be done.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield to the Senator from New York.

Mr. COPELAND. Does the Senator believe that large quantities of power are needed for the making of fertilizer?

Mr. McKELLAR. No; I do not. I think the Senator from Nebraska is probably right, that under the synthetic process of manufacturing fertilizers a smaller amount can be used; but what will result if this bill passes? Great volumes of nitrates will be manufactured down there, and if a cheaper process can be found, these nitrates will be reduced in price, not to the farmer but to the fertilizer people. Now, the fertilizer people fix their price. We have just had an example of that a short time ago. The Senator will recall that there were complaints from my State that the fertilizer people had fixed the prices down there from three to five dollars a ton more than they did right across the State line in the same field; and, of course, it is immaterial whether the fertilizer people get their ingredients cheaper, as long as they are capable of fixing the price to the farmer. We are not doing anything for the farmer in that way.

Mr. COPELAND. If the Senator will permit me to say so, I think he is unduly exercised about the situation down there. In the first place, the dam at Cove Creek will not be built in this generation. I would not worry about that if I were in his place. When we come to the matter of fertilizer——

Mr. McKELLAR. You appropriate $2,000,000 in this very bill in order to start it; and, if I know anything about it, the moment it is appropriated a division will be started up here in the War Department and will begin to work on it. Of course, they are going to do it. Two million dollars will start any kind of a dam in this country; and it is all right. If Tennessee is permitted to have her rights over it, as suggested

by the Senator from Arkansas, I am perfectly willing that it be built.

Mr. TYDINGS. Mr. President——

Mr. McKELLAR. I must yield first to the Senator from New York. I interrupted him. I will yield to the Senator from Maryland in a moment.

Mr. COPELAND. I am sure the Senator from Tennessee has confidence in the Senator from Nebraska, who has made a long-time study of this problem of fertilizer development. If the Senator from Nebraska has done anything in this particular problem that is noteworthy above all other things, it is that he has instructed the Senate regarding the methods of fertilizer manufacture, and what can be accomplished at Muscle Shoals in that direction; and he has made it clear to me, if it is not clear to the Senator from Tennessee, that this plant is not suited for the manufacture of fertilizer.

Apparently the Senator is disappointed. A little while ago I thought he was going to shed tears. I really waited for a moment in anxiety, thinking he was going to burst into tears with sorrow.

Mr. McKELLAR. I might not do that, but I am greatly disappointed at the turn this bill has taken. I will say to the Senator—this new question that never should have been interjected into this bill, either one of them.

Mr. COPELAND. The bill, as we passed it here in the Senate, was a nonfertilizer bill.

Mr. McKELLAR. Oh, the Senator had not read it if he thinks that, because it provided not only for manufacturing the completed fertilizer but for selling it at the lowest possible prices to the farmers of the country.

Mr. COPELAND. Let us wait just a moment. I am talking about the original bill that we passed in the Senate.

Mr. McKELLAR. I am talking about the same bill. If the Senator will read the bill, he will find how utterly mistaken he is.

Mr. COPELAND. We came back from the House with a bill which provided for the manufacture of fertilizer at a plant and with surroundings absolutely unsuited for the making of fertilizer.

Mr. McKELLAR. Oh, no; it was exactly the same as provided in the Senate bill, precisely; and, by the way, I think the Senator voted for that bill.

Mr. COPELAND. Oh, I voted for this bill always, and I am hoping to be able to vote for it now; and I hope I can do it to-day.

Mr. McKELLAR. I doubt if the Senator can do it to-day, but I hope that it will be so amended that both the Senator and I can vote for it. I should like the best in the world to vote for the bill in substantially the same form that it was passed by the Senate.

Mr. President, the Senator speaks of the Senator from Nebraska [Mr. NORRIS]. He says that he has done a wonderful work. I subscribe to that. My only regret is that the Senator from Nebraska should have taken this step after he had won his seven years' fight. He has been working on this for seven years, just as I have. He had won the seven years' fight. It was impossible to defeat this bill as it passed the Senate. There was not a reason in the world why it should not have become law. The Senate had no fear of a presidential veto, in my judgment. After he had been successful in his long fight, I do not see why he should have injected into the bill and put into the bill a rape of Tennessee's rights, a taking away of Tennessee's property, going out of his way to take that and attach it to the bill when it ought not to have been attached to it, and the Senator from Nebraska himself thought it ought not to be attached to the bill when it was before the Senate. To take that and put it on this bill was to put in serious jeopardy the bill that he had tried so hard to get through here for so long a time. It is a great disappointment to me. I greatly regret that this new issue was put into it.

Senators, I have said to you about all that I can say on the subject. I hope you will not vote to take away Tennessee's rights in this matter. I do not think you should do it. I hope the Senator from Nebraska will be willing to accept the amendment I have offered, to strike out the two sections and let the conferees report this bill. I should dislike to vote for the bill with the fertilizer provision as it has been reported; but I would rather accept that than to have it loaded down with this provision to which I can not agree, and I do not believe anyone in the Senate in a similar position would agree to it.

MESSAGE FROM THE HOUSE—FINAL ADJOURNMENT

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had adopted a concurrent resolution (H. Con. Res. 41) authorizing the President of the Senate and the Speaker of the House of Representatives to close the first session of the Seventieth Congress by adjourning their respective Houses on May 29, 1928, at 5 o'clock p. m., in which the concurrence of the Senate was requested.

Mr. CURTIS. I move that the concurrent resolution providing for final ajournment just received from the House be referred to the Committee on Appropriations.

The PRESIDENT pro tempore. Without objection, the resolution will be referred to the Committee on Appropriations.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that to-day, May 24, 1928, the President approved and signed the following acts:

S. 1284. An act amending the act approved April 30, 1926, entitled "An act amending the act entitled 'An act providing for a comprehensive development of the park and playground system of the National Capital,' approved June 6, 1924";

S. 2823. An act amending the statutes of the United States with respect to reissue of defective patents;

S. 4229. An act to extend the time for completing the construction of a bridge across the Mississippi River near and above the city of New Orleans, La.; and

S. 4401. An act authorizing Elmer J. Cook, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Bear Creek at or near Lovel Point, Baltimore County, Md.

REPORT OF THE GOVERNOR GENERAL OF THE PHILIPPINES

The PRESIDING OFFICER (Mr. TYDINGS in the chair) laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Territories and Insular Possessions:

To the Congress of the United States:

As required by section 21 of the act of Congress approved August 29, 1916 (39 Stat. 545), entitled, "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those islands," I transmit herewith, for the information of the Congress, the report of the Governor General of the Philippine Islands, including the reports of the heads of the departments of the Philippine government, for the fiscal year ended December 31, 1927.

I concur in the recommendation of the Secretary of War that this report be printed as a congressional document.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 24, 1928.*

[NOTE.—Report accompanied similar message to the House of Representatives.]

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House having proceeded, in pursuance of the Constitution, to reconsider the bill (S. 777) making eligible for retirement, under certain conditions, officers and former officers of the Army, Navy, and Marine Corps of the United States, other than officers of the Regular Army, Navy, or Marine Corps, who incurred physical disability in line of duty while in the service of the United States during the World War, the said bill was passed, the objections of the President to the contrary notwithstanding, two-thirds of the Members agreeing to pass the same.

MUSCLE SHOALS—CONFERENCE REPORT

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer and for other purposes.

Mr. BLEASE. Mr. President, I agree fully with the Senator from Tennessee [Mr. MCKELLAR]. The greatest war that this country has ever known was fought to save the very principle which the Senator from Tennessee has just been advocating upon this floor. I am surprised to find some men signing this report who came from the South, men whose fathers believed that a man's property belonged to him, and who went on the battle fields of Virginia and other battle fields of this country and fought to keep the rights of the sovereign States from being stolen by the United States Government, just as is being tried by this bill.

You can not make anything else out of it. You can whip it around as you please, and change it as you please; but when you come down to the last analysis, it means but one thing.

That is that the United States Government intends to go into the State of Tennessee without the permission of her constituted officials, without the consent of her legislature, and say, "We are going to take not only the property of Tennessee, but we are going to take the individual property, the homestead."

I heard the Senator from North Carolina yesterday make one of the prettiest pleas I have ever heard, almost enough to make the tears come to any man's eyes, when he stood here and spoke of the old colonial home where his father was born and reared, and where his mother reared him, so dear and so sacred to his heart. The humblest home in Tennessee is just as sacred and just as dear to its occupants as that home is to the distinguished Senator from North Carolina.

Why should the Government of the United States say, "We will take your little home, we will take your graveyards and your cemeteries, we will put them any distance under the water we please. We will destroy your land, we will destroy your taxable property."

Mr. TYDINGS. Mr. President, will the Senator yield to me?

Mr. BLEASE. Certainly.

Mr. TYDINGS. I would like to submit to the Senator this proposition. As a matter of principle, if we can by legislative enactment here take a small piece of land for any purpose, carrying out that principle to its extreme, we can take a whole State.

Mr. BLEASE. The Senator from Tennessee I think explained that very thoroughly a while ago, saying that if the Government can go down into Tennessee and take a county, just bodily take it, why can it not take another county, and after a while take the entire State of Tennessee? But somebody will say it is necessary for public improvement. That argument has been used so long that thieves even have begun to use it. Common, everyday thieves, will tell you that they had to steal something because they were hungry, that they had to steal something because it was for the public good. Even the bootleggers will tell you that some of these officers who seize their liquor, seize it and sell it because they are violating the law selling it all around the country.

No man who has ever stood for State rights can vote for this resolution honestly and conscientiously. I would feel I was a disgrace to my daddy, who was a soldier in the Confederate service, if I should vote to allow the United State Government to usurp such authority and steal from the State of Tennessee her property in this manner.

What is the reason for this? Alabama came here and said, "Take it," and that is all right. I have not one word to say about that. If the State of Nebraska were to come here and say, "We want to surrender our State sovereignty and turn ourselves over to the United States and just be a little Territory or just be some kind of a little squatter land up here," I would not say a word; that would be their business. If they want to surrender their rights, they can do so. But when a sovereign State like Tennessee comes here by her representatives and says, "We object to your doing this," I will not stand for it.

What is the purpose of it? I have in my desk and will be glad to furnish to the Senate I do not know how many but a very large stack of telegrams from fertilizer people in South Carolina and some from other States protesting against the passage of this measure as it was, and I have not received a telegram from any State, even my own, from any fertilizer company since the measure has been changed so that they can further rob the farmers of this country. Here is a large bunch of telegrams, a sackful of them, protesting against the measure that was before us last night. Since the measure has been changed not a single telegram has come from my State or any other State to me saying, "We protest against the passage of that measure." Why? Because the measure now fixes it so that they can further rob the farmer, further rob the people who must have fertilizer in order to make the bread and meat that they eat in their homes. I never saw such a monstrosity.

How much further do they go, Mr. President? In the State of South Carolina there is now being constructed the largest dam in the world. It will back water 75 miles. That dam is being constructed by a corporation, and there are in my State other power companies which put their own money into these things.

When I was the governor of my State I pleaded with my legislature to pass laws regulating and taking control of these corporations, because I was afraid of this Power Trust. I am afraid of it to-day in South Carolina. But while I am afraid of it, I do not propose to vote to allow the Federal Power Commission, who I know are the enemies of the people, who I know have not a drop of blood in their bodies but what is subservient to the Republican administration, as corrupt as it is to-day—never will I cast my vote to allow them to go into the State of South Carolina and fix the power rates of that State.

The first thing I did when I came into the Senate was to introduce a resolution to investigate the Power Trust in South Carolina. The Senator from Washington [Mr. JONES] objected to my resolution. It was referred to the Committee on Commerce, and they hacked it all to pieces. They brought it back here and finally passed it in some shape so that it was not worth a snap of your finger. The Federal Power Commission sent down to South Carolina under my resolution to investigate that company and came back here with as white a lie as was ever put into the RECORD. They, or the agents they sent to South Carolina, lied about conditions there, and to-day gradually the power company in that State is putting its hands stronger and stronger upon the throats of the people of my State, and I am fighting there now. But I do not want to fight them by appealing to members of a Federal board to fix rates in my State that I know has already proven themselves incompetent and unworthy of the positions they hold on that board.

Mr. President, I could take this measure and go through it, but I do not care to do that. I have something more important to me and more important to my people than to make Tennessee's fight for her. I am standing right here on the same principle on which John C. Calhoun stood here and on which Robert Y. Hayne stood here, and that Jeff Davis stood here and advocated, for the same principles that caused Jeff Davis to resign and leave the Senate, for the same principle that made Robert E. Lee the greatest general that the world has ever known. I stand for what they stood for. I stand for the principles my father fought for, and I am surprised that southern men will approve a measure, along with people from other sections of this country who have not any use for the South. What use do you suppose the Senator from Nebraska [Mr. NORRIS] has for South Carolina? What use do you suppose the Senator from Nebraska has for Alabama and Tennessee? The Senator from Nebraska is working for the Republican Party, and I do not propose to allow him or any other man to pull the wool over my eyes and cause me to vote against what I know to be the best interests of one of the Southern States of this Union—Tennessee—or support any such measure or any such action. Love the South? Yes; he loves it!

What I mainly want to speak about is the Federal land bank at Columbia, S. C. I want to present to the American people some more proof of the hypocrisy and deceit of one Andrew W. Mellon and his crowd. I hold in my hand a marked copy of the report, Calendar No. 1165, Federal Land and Intermediate Credit Banks of Columbia, S. C. I read:

> The Committee on Banking and Currency, to whom was referred the resolution (S. Res. 159) directing this committee to make an investigation of the affairs of the Federal Land and Intermediate Credit Banks of Columbia, S. C., having considered the same, report adversely thereon with the recommendation that the resolution be indefinitely postponed.
>
> The purposes of the resolution, as stated therein, are (1) to conclude a controversy alleged to exist; (2) to determine the exact condition of the Federal land and intermediate credit banks at Columbia, S. C.; and (3) to determine what loss the Government has sustained. The preamble recites among other things, that "certain" officials of this bank are involved by the testimony adduced in criminal proceedings at which three of the defendants were convicted in the Federal court held at Columbia, S. C., in February, 1928; that there is "much talk" of mismanagement, carelessness, and irregularities on the part of the Columbia bank officials, resulting "it is rumored" in hardships to the farmers of various sections of that locality; and further alleging that carelessness, negligence, and willfulness have been shown on the part of the bank's officers in handling the funds of the Government. The resolution contemplates that on account of the foregoing, the committee should further investigate the bank's affairs and make report to the Senate.

That is not true. The resolution had no such contemplation. The resolution itself states what it is for. The resolution was for the purpose of having an investigation made down in this State where the bank is located, by a special committee to be appointed for that purpose. I had more sense than to think that the Committee on Banking and Currency, as composed in the Senate, would make a fair investigation of any matter in the Senate as a whole.

> The impression might be gained from reading the preamble that the defendants mentioned were connected with the Columbia bank, which is not the case.

That is not true. Here are the records, which will show that these men, while they were directly in the bank at Beaufort, S. C., were connected directly with the Columbia land bank.

The information presented to the committee in connection with the consideration of the resolution consists of the following:

(1) Certain letters and correspondence furnished by its author.

(2) A written report to the committee by Farm Loan Commissioner Meyer.

Listen to that! That is beautiful! The man I am asking them to investigate, the man who I say is at the head of this stealing, this rascality that is going on in South Carolina, is the man they sent to South Carolina and allowed to make a written report. This is part of his written report:

Of course, some responsibility attaches to the management of the Columbia bank for these occurrences, particularly its failure more successfully to checkmate the conspirators.

That is Meyer's language—

But since then the personnel of the bank has been strengthened, certain remedial measures have been put in effect, and others will be adopted as time and opportunity permit.

That is signed by Eugene Meyer, farm loan commissioner.

A written report to the committee by Farm Loan Commissioner Meyer, under date of April 19, 1928, together with the oral statements before the committee of Commissioner Meyer and certain representatives of the Federal Farm Loan Board.

Not testimony by witnesses in the case, not testimony from men connected with the bank, not testimony from people to whom they were referred, witnesses like Hon. Robert A. Cooper, who is an ex-Governor of the State of South Carolina, who was appointed on this Farm Loan Board, who came here to the Senate and offered to go before the Committee on Banking and Currency and tell everything in the world he knew in connection with this matter, and who was virtually shoved off of the board by Mr. Mellon and President Coolidge. They both sent for him, they both had talks with him, they both informed him that he was not in accord with the administration, and they both almost, you might say, removed him from his position because he was trying to do the honest thing by the farmers of this country.

Mr. President, Governor Cooper said, "Yes; I will be glad to go before the committee; I will be glad to give the committee any information I have." He is right here in Washington. He is practicing law with Douglas & Obear. He could have been reached over the telephone in five minutes. Have they made an effort to get him? No; they sent for Eugene Meyer.

They sent for Judas Iscariot instead of having honest men. Certain representatitves of the Federal Farm Loan Board and representatives of the Department of Justice, the very people I was asking to have investigated, the very people the resolution said I wanted to investigate, were the people they sent for as witnesses before the committee, and here is their report. What would any Senator think of a court, when an indictment was returned by a grand jury against certain people for conspiracy, if the court, instead of bringing in witnesses and taking charge of them and having lawyers to look after the matter—what would Senators think, I repeat, of a court if the court would bring the defendants, the conspirators themselves, into court and let them be the only witnesses examined, and then find a verdict, as the Committee on Banking and Currency has done?

One Senator said to me that I ought not to push the investigation, that it might step on the toes of an administration ahead of this one. I have not anything to do with that. If the Democratic administration under Mr. Woodrow Wilson, when CARTER GLASS was Secretary of the Treasury, did anything that might cause its friends to be afraid that I would step on his toes, then CARTER GLASS ought not to have served on this committee. If he was interested in it he should have gotten up and said, "I decline to serve on this committee, because I was once Secretary of the Treasury, and this thing may touch my interests." Therefore I do not think it did touch CARTER GLASS's administration at all. I do not believe that he was the least bit interested in the matter from that standpoint. I think that was simply a subterfuge to keep the resolution help up. I believe that if CARTER GLASS had been interested in it or had been afraid the investigation might bring out anything against his administration he is man enough to have said, "I decline to serve, because this may touch me." Therefore I do not pay any attention to the suggestion not to press my resolution because it might go further back than this administration.

Rather than take the time of the Senate to read all of this report, I shall refer only to certain parts of it.

On page 2, last paragraph, reference is made to the fact that under the law the Federal intermediate credit bank has no authority to loan directly to individual borrowers. Evidence was brought out in the trial in Columbia that the Intermediate Credit Bank of Columbia had ceased to be a bank of rediscount and had become a bank of discount and was making loans and passing on applications for loans to borrowers, in the first instance, contrary to law and regulations.

This evidence was uncontradicted by any official of the intermediate credit bank, but the court held that the violation of law of the intermediate credit bank was not a defense available for the defendants; that Mr. Arnold and Mr. Daniel were not on trial at that time and that could come later.

The intimation is given on page 3, next to last paragraph, that the Federal Farm Loan Board was not notified until early in August, 1926, of the situation, and then held a special examination of the Intermediate Credit Bank of Columbia by experts.

On the contrary, the Federal Farm Loan Board, or some of its officers, did have knowledge of the situation existing in Beaufort County; and in the spring of 1926 Mr. Thomas, executive assistant of the Farm Loan Board, accompanied by officials of the intermediate credit bank, went to Beaufort County and inspected the situation there and reported that they were satisfied with the situation.

On page 4, first paragraph, the statement is made—

Cash funds from the sale of crops which should have been applied to farmers' notes held by the Columbia bank went to Richardson's Beaufort bank.

Depositing these funds in the Beaufort bank was at the express direction of the Federal intermediate credit bank, as shown by their written letters and orders. They forbade the credit company or the farmer to deposit money in his own name and insisted that the proceeds of the notes for farming purposes and the payments made by the borrowers in the harvest season should be put in one fund in the bank to the credit of the credit company.

In the fourth paragraph on page 4 the statement is made that it was later found that the Columbia bank held $4,000,000 of the irregular paper. This so-called irregular paper consisted of papers in the blanket credit of $400,000, credit of the Truckers' Supply Co. of $250,000, credit to H. B. Macklin, of Coffee County, Ga. Evidence in the Columbia trial showed that these large credits were ones which the officials of the intermediate credit bank were forbidden by law and regulations of the Farm Loan Bureau to make—in that they were not allowed to discount for any one borrower, firm, or corporation an amount exceeding one-fifth of the capital stock of the agricultural credit corporation submitting the paper.

At the instance of Arnold, these large credits were cut up into smaller notes and employees on the farm and other accommodation signers signed the note and the actual borrower, Truckers' Supply Co. and H. B. Macklin, indorsed, and Mr. F. H. Daniel has already testified in a proceeding of the bankruptcy court in the eastern district of South Carolina that the intermediate credit bank did not look to the maker of the notes, but looked solely to the indorser, the Truckers' Supply Co., and, in fact, regarded these notes as an expromission of the Truckers' Supply Co.

When confronted with the official record of this testimony, he denied having so testified, and it became necessary to get the stenographer, who took down his testimony in the bankruptcy court, who went on the stand and impeached Daniel's testimony and identified the record and told how he remembered his using the word "expromission," recalled the circumstance of his writing the word in long hand, and, when transcribing his notes, recalled asking another Government witness, Mr. S. T. Everett, to look same up in the dictionary. Mr. Everett, a Government witness, was put on the stand by the defense and confirmed the stenographer's statement.

This stenographer was Mr. A. V. Mace, of Marion, S. C. While he was waiting to testify in this case he was twice approached by Mr. T. A. Donaldson, an agent for the Department of Justice, and advised to leave town and go back to Atlanta where he came from or he would get in trouble, and threatened that if he went on the stand and impeached Mr. Daniel, the assistant manager of the intermediate credit bank, that the Government would make it hot for him.

At the bottom of page 4, the statement is made that the Columbia bank did not suspect any irregularities until shortly prior to the closing of the Beaufort bank. Mr. F. H. Daniel, the assistant manager then and now manager of the Federal intermediate credit bank, testified under oath in the hearing above referred to that he first suspected irregularities and something wrong in the situation as early as the first part of October, 1925.

On page 5, second paragraph, it is stated that while it can well be admitted that if the Columbia bank had been more alert the losses

sustained would not have been so heavy, the clear fact of the matter is that the Columbia bank was imposed upon by those who received its accommodation.

Evidence brought out in the trial in Columbia, which is borne out by the record, is that officials of the intermediate credit bank were constantly back and forth to Beaufort County, S. C., and that practically all of the capital, which was then $2,000,000 of the Federal intermediate credit bank had been loaned out in loans on mortgages and to a company operating in the town of Columbia and at Beaufort, S. C., and on mortgaged securities less than four hours' ride from Columbia.

In the third paragraph of page 5, it is said:

It must not be overlooked that these defendants with others must still face trial under 211–B of the Federal farm loan act, and indictments which are pending will probably be called for trial at a special term of the Federal court, which will be held in Columbia, S. C., this summer.

The actual facts are that there are no indictments pending against the defendants under section 211–B of the Federal farm loan act. There has been no special term of the Federal court ordered to be held at Columbia, S. C., nor is it even intimated that there will be. And this statement is evidently a veiled threat that the Department of Justice cooperated with the intermediate credit bank in the further attempt to intimidate people having knowledge of the violations of law of the intermediate credit bank and prevent them from testifying before congressional committees.

On page 6 the statement is made in the first paragraph—

that Arnold was exonerated by the Federal district judge.

The statement is incorrect. On the contrary the Federal district judge said that he would not allow Arnold's actions to bind the intermediate credit bank, or the whole United States and the fact that Arnold and Daniel had conspired that the law be violated was not a defense available to the defense and refused to allow further evidence to prove that. He also repeatedly through the trial made the statement that Arnold and Daniel "are not on trial now."

The letter of Eugene Meyer to the chairman of the committee is full of misstatements which are so numerous that it is impractical to take them up now, though I may at a later time.

I wish now to mention another fact. I was informed a few days ago that Mr. McFADDEN, of the Banking and Currency Committee of the House of Representatives, had made the statement to Congressman STEVENSON that the reason why they did not proceed in the House to investigate this bank matter was because they had been unable to obtain a transcript of the testimony; that they had requested it from the department which was supposed to have control of it, and the department said they could not get it.

Mr. President, I hold now in my hand a transcript of the testimony. It was completed in February last. The United States Government has had it. Mr. McFADDEN could have gotten it. The Senate Committee on Banking and Currency could have gotten it. It has been, since February last, ready for delivery and has been delivered. Here it is. I offer it to-day to Mr. McFADDEN and his committee. I offer it to-day to the Senate Committee on Banking and Currency. Here is the testimony which I am informed Mr. McFADDEN said they could not get. Here it is now open to the inspection of any Senator who desires to walk over and examine it.

The Committee on Banking and Currency of the House over a month ago called on the Department of Justice to furnish them with a complete transcript of the proceedings in the trial of Richardson et al., in the Federal District Court of South Carolina. So far the committee has been unable to get any of this evidence and the Department of Justice is giving the reason that the same is not available.

The fact as shown by the affidavit of Miss Waring, court stenographer, is that her transcript which contains the testimony of Arnold and Daniel has been in the possession of the district attorney for over three months. The other stenographer as late as last week stated that she had never received any order from the district attorney or the Department of Justice for a transcript of her notes, nor had there been any intimation from the said department or district attorney that a copy would be desired.

Let me say right there that that stenographer, by a coincidence, is named McFadden—Miss Margaret McFadden, of Columbia, S. C., who, as my colleague will bear testimony, is not only a very capable and competent stenographer, but one of the finest young women in the entire State of South Carolina. She states that there had never been any demand made upon her for such testimony as she took in that case.

Four-fifths of the testimony has already been transcribed and is now here in Washington, available to me, despite the fact that the Department of Justice is still advising the committee that it is not available.

It was not only available to me when this was written, but is actually now lying on the desk of the Senator from Georgia [Mr. GEORGE], where I have just placed it.

The following is a letter from Miss Waring:

DEPARTMENT OF JUSTICE,
UNITED STATES DISTRICT COURT,
EASTERN DISTRICT OF SOUTH CAROLINA,
Charleston, April 21, 1928.

United States *v.* Richardson et al.

Mr. R. C. HORNE, Jr.,
Care Messrs. Travis & Travis,
Savannah, Ga.

DEAR MR. HORNE: Pursuant to your telegram of to-day, stating that you have sent me by registered mail, New York exchange for $179.60 to cover cost of testimony, $130.80, and charge, $48.80, I am to-day sending you by registered mail to Savannah, Ga., care Messrs. Travis & Travis, in three packages, judge's charge, and testimony, 327 pages in two sections.

I suppose I will receive the New York exchange to-morrow or Monday. I leave to-morrow afternoon for Florence, S. C., to be there about 10 days or two weeks.

This is written by the stenographer of the court:

In regard to sending you a certificate as to correctness and authenticity, I have never been called upon to do this, and I am not prepared to swear that there are absolutely no errors in the testimony. I may say, however, that none have been called to my attention by the district attorney's office, which has been in possession of a copy of my transcript for about two months or more.

Yet they say they could not get it. Here is this young lady's letter—the stenographer for a Republican judge, not a Democratic judge trying to shield something for another Democrat, but a Republican judge, confirmed by a large majority of the present Members of the Senate—

I will state, however, that as to the testimony it is a careful and, in my belief, a correct transcript of my notes taken as court stenographer at the trial of the case. The same applies to the judge's charge; but in addition to this the judge has gone carefully over every bit of the charge himself, and made such corrections as he saw fit, in my transcript.

Yours very truly,

MARY A. WARING.

Mr. President, I will read another affidavit, as follows:

Affidavit—United States of America—Eastern district of South Carolina—
State of South Carolina, County of Charleston

Personally appeared before me Mary A. Waring, who, being duly sworn, says:

"That she took the beginning of the testimony in the case of the United States *v.* W. E. Richardson, et al, and that she completed the said testimony and could have furnished the same to the defendant had they applied and offered to pay for the same prior to the termination of the trial of the case at Columbia.

"That this deponent has had the testimony transcribed ever since the early part of February, 1928.

Yet the Department of Justice says it can not get it; Mr. McFADDEN, of the House committee, says he can not get it; the Senate Committee on Banking and Currency did not get it because it was alleged that it had not been transcribed, and here is this lady's testimony saying she has had it ready since the latter part of February—

"but that the said testimony was not obtained from her until on or about the 21st day of April, 1928."

MARY A. WARING.

Sworn to before me this 4th day of May, 1928.

[SEAL.] RICHARD W. HUTSON,
Notary Public for South Carolina.

Mr. Hutson was the clerk of the United States court where this trial took place and where this testimony was taken. Yet these committees of Congress and the Department of Justice could not get it.

This affidavit, used by the district attorney in resisting the motion to allow time to file bill of exceptions, which, if successful, would have made it impossible for the record to be transcribed or to be made available to Congress.

There is the record. What I have read is not a Senator's statement; it is not the statement of some man who does not know what he is talking about; it is the statement of the

young lady who, I believe, was stenographer in the United States court in the State of South Carolina under Judge Smith and continued to hold her office under the incumbent, Judge Cochran. I have practiced law in the courts where she is stenographer; I have been there with a great many other lawyers, and I never heard any man speak of her ability as a stenographer but in the highest terms and praising her for the splendid work which she does. There is her affidavit. Not only is there her affidavit, but here [exhibiting] is the testimony, these great, bulky packages, I do not know how many of them—seven, I think—and the Senators can see for themselves what they are. That testimony has been in the hands of the Department of Justice since the latter part of February; and yet Mr. MCFADDEN tells Representative STEVENSON that he could not get it because the notes had not been transcribed. The Senate Banking Committee does not try to get it because the notes have not been transcribed. I want the American people to read the facts in the case. I do not care anything about it personally.

My friend from Maryland suggests that I print the testimony in the RECORD, but there is too much of it, Mr. President; I would not make that request; but I offer it and exhibit it here to-day to the chairman of the Senate Committee on Banking and Currency and to any other Senator who wishes to see it, or Mr. MCFADDEN, of the House Banking Committee, can have it if he wants it.

Now what excuse has the committee for not proceeding with this investigation? Oh, the Senator from South Dakota has a reason. What is his reason? He has a written reason in the report which he has submitted, but my idea is his reason is that when Andrew W. Mellon told him to ease up, to slow down, like many others, when Andy says that, the slowing down process is put into operation.

On page 2 in the report submitted by the committee it is stated:

> In the consideration of the facts in this case, it must be kept in mind that under the law a Fedreal intermediate credit bank has no authority to loan directly to individual borrowers.

There [exhibiting] is the testimony that they did so. There is the testimony that they not only did that, but that they passed a regulation to the effect that the truck grower who borrowed money never could handle all that money, but that they would forward that money to be deposited in the bank at Beaufort and the bank at Beaufort would take that money as custodian for the intermediate credit bank in the city of Columbia. That bank was the direct agent of the intermediate credit bank. If that is true—and here is the testimony—then I ask the Banking and Currency Committee of the Senate why it was improper to investigate the intermediate credit bank at Columbia?

The other day I offered a resolution asking Mr. Mellon to comply with the law, which he should have complied with without being requested to do so. That resolution requested him to submit his report as required by law to Congress before it should adjourn. What did he do? He sent it in here, I think, on Monday. It was taken out of the vaults of the Treasury and sent to the cemetery over which the Senator from South Dakota [Mr. NORBECK] stands guard. The dead body was transferred from Mellon's vaults to NORBECK's cemetery. Of course, he is not going to let it come out of there; certainly not. Why should he when Congress is expecting to adjourn next Tuesday? And I suppose it will, and really hope that it will. That is all they have done. They took the corpse out of the Mellon vault and carried it down and put it into NORBECK's cemetery; and the Banking and Currency Committee says that the Columbia Land Bank should not be investigated; that there is no reason to investigate it, despite all of this testimony—pages and pages of it—showing the fraud and rascality of that bank. Here it is [exhibiting]. Read it; it has been transcribed. There is not a juryman on earth, who is honest, who would not convict on the evidence that it affords. The Sinclair jury would have convicted on this testimony. Instead of singing "Bye, Bye, Blackbird," I think they would have sung, "Good-by, Andy Mellon, and the balance of your coconspirators in robbing the people of South Carolina."

I have told the Senate what has been done; and yet this great Government—it is called "great"—stands behind that thievery, and Eugene Meyer's statement is practically all that is considered. Yes; the conspirators are to blame.

But what did we do? We turned a few of them out of the bank and put some others in their places. Does that change the condition of affairs in the bank? Why were the members of the Committee on Banking and Currency afraid of the investigation which was proposed? Why are they afraid for the truth to come out? "Know the truth, and the truth shall make you free." I know why that testimony is in the hands of Attorney General Sargent. He has had this testimony read; he knows that it will convict these men for their rascality in the Columbia Land Bank; and he says, "Conceal it; hide it." When MCFADDEN asked for it he sent him word he had not got it, when it is right there in his office, as sworn to by the young lady to whom I have referred. Here it is [exhibiting]. Where did I get it? I wish I had had it when I first introduced the resolution, but I could not get it; it was in the hands of the bank folks, but two of them came up here the other day and brought it to me.

They brought in some other papers. They sat right there in this gallery, two of the officials, and wanted to come before the Senate committee. Have they been invited? No. They are here yet. If the committee wants them, I will telephone the Commodore Hotel and they will come with this record and others. If any Senator wants to talk to them, I will have them come to his office—two of the very men who were in this stealing, willing now to tell the truth. I have always heard it said that when thieves fall out, honest men would get their due.

Now let the Committee on Banking and Currency send for these two witnesses. One of them is sitting up here now. The other one did not come this afternoon, but he is ready to come, ready to tell the truth, even though Mr. Sargent puts him in the penitentiary, even though the district attorney of South Carolina indicts him and puts him in the penitentiary. They are here ready to tell of these transactions, and to swear that the farmers of South Carolina have been robbed of thousands and thousands of dollars by this intermediate credit bank in Columbia and its officers. Yet this committee says "there is nothing to investigate!"

Some people are going to hear from this in a way that they will not like. Do not you believe that the papers in the West are not publishing all this stuff! Right in South Dakota, right where the chairman of this committee comes from, the editor of the only daily newspaper in the State is handling this stuff in his paper. Already, as I put in the RECORD the other day, he sent me a letter in which he congratulates me on my fight, and says, "Go ahead." There is his letter; and, if you do not mind, some Senators when they get home and come up for reelection this fall are going to find this very same intermediate credit bank situation looking them right in the face. If you do not mind, some of the Senators right in this body are going to be asked that question on the stump: "Why did you not help to get an investigation of this Federal land bank business, not in Columbia, S. C., but in the Nation? Why do you conceal it?"

It is bound to come out. It is bound to be known. You may conceal it now; but the day is coming, and it is not far distant, when it will be just like the oil transactions, just exactly. They hid them a long time. Fall and Doheny and Sinclair had a big time. They rode in their big automobiles. They flew mighty high; but there never has been a bird yet that flew so high that he did not have to light, no matter how high he flies; and there has never been a man yet that did not have pay day. He may spend, and he may go, and he may run for a long time; but, do not you forget it, pay day is coming, and this thing is coming out.

All this material that I have been putting in this RECORD has been sent not only to those who receive the CONGRESSIONAL RECORD but hundreds of copies of it have been sent all over this country in order that certain people who are interested in this matter might know just exactly the condition that is going on here to-day, and which is being concealed by a committee of the United States Senate.

In October, 1925, the Federal Intermediate Credit Bank, by its general counsel, R. H. Welsh, prepared a crop-mortgage form in anticipation of having all agricultural-credit corporations use this form and no other. The tentative form was sent around to the different corporations, with the request that any suggestions or criticisms on it be made to the general counsel of the Federal Intermediate Credit Bank and Federal Land Bank, of Columbia. In response to this request, the following correspondence passed between R. C. Horne, jr., president of the South Carolina Agricultural Credit Co., and Mr. R. H. Welsh, general counsel of the Federal Intermediate Credit Bank, of Columbia.

Letter from South Carolina Agricultural Credit Co. to R. H. Welsh, general counsel Federal Intermediate Credit Bank, dated October 5, 1925

Mr. R. H. WELSH,
General Counsel Federal Intermediate Credit Bank,
Columbia, S. C.

DEAR SIR: We have examined the printer's proof of the proposed South Carolina production note and mortgage which you sent us, and

same seems to cover the grounds and give the necessary protection, with one possible exception.

In the line just preceding the description of the land in the body of the mortgage on the first page, the words "All the crops planted by the mortgagor during the year of the date hereof and grown on the following-described lands," etc., seem to give the necessary protection for any staple crop or crops planted after January 1. But some of our loans are made in the lower part of the State on truck farming, and as it is the custom to plant and raise two or three crops on 1 acre of ground down there, we have found it desirable to have our paper cover any crop planted in the fall, which would be "the year of the date hereof," and also cover any succeeding crop planted on the same land after January 1 during the life of the loan. This has been accomplished by leaving a blank after the word "years."

It is possible that this protection is already accorded by the amendment to the crop mortgage law passed by the last session of the legislature. We are merely calling it to your attention for what it is worth.

We feel that having one form for all agricultural credit corporations will be a great convenience both to the credit corporations, the Federal intermediate credit bank, and the clerks of court.

Very truly yours,

SOUTH CAROLINA AGRICULTURAL CREDIT CO.,
By R. C. HORNE, Jr., *President.*

Letter from R. H. Welsh, general counsel Federal intermediate credit bank, to R. C. Horne, jr., president South Carolina Agricultural Credit Co., Columbia, S. C., dated October 6, 1925

SOUTH CAROLINA AGRICULTURAL CREDIT CO.,
Columbia, S. C.

Attention of Mr. R. C. Horne, jr., president.

GENTLEMEN: I have your letter of the 5th in the above matter and beg to thank you for it. I note the suggestion in the second paragraph of your letter. The wording of the mortgage to which you refer is based strictly upon the act of 1925, found on page 91 of the acts of 1925, as No. 57. It specifically says:

"The provisions of this act shall not be held to defeat any lien in writing given over a crop or crops of truck or grain, planted or to be planted in one year and maturing in the ensuing year, if such crop or crops of truck or grain shall be specifically described in such instrument of writing with the name of the product or products and the year of planting set forth in such description."

Crops planted after the 1st of January are not covered by a mortgage taken during the preceding year. The amendment that I drew—

Now, that is the bank lawyer—the intermediate credit bank lawyer—

to the crop mortgage law of this State would have permitted the giving of the mortgage in the fall of the year for all crops planted within a year from the date of the mortgage. The "wiseacres" of the general assembly, however, took their own course and what we have as a result is the act of 1925, above referred to. There is no way that I have been able to figure out by which you can take a mortgage in the fall of the year and have it cover all crops planted during the remainder of that year, as well as those planted in the next year; on the contrary, I have been forced irresistibly to the conclusion that crops planted after the 1st of January will have to be specifically covered by their own crop mortgege separate and distinct from those planted before January 1.

Very truly yours,

R. H. WELSH, *General Counsel.*

General counsel of whom? General counsel of the intermediate credit bank at Columbia, S. C.; and this report of the Senator from South Dakota [Mr. NORBECK] says that there is no connection! Here is the attorney appointed by the Department of Justice in Washington as the general counsel for the Federal land bank in Columbia writing to these people and telling them how to handle this money. That is connection enough. Certainly the bank is responsible for the acts of its own attorney.

On November 16, 1925, the following letter was sent out by the Federal intermediate credit bank to the South Carolina Agricultural Credit Corporation, signed by J. D. Bell, manager:

SOUTH CAROLINA AGRICULTURAL CREDIT CORPORATION,
Columbia, S. C.

GENTLEMEN: We have had prepared and printed by our attorney a financial statement and note and mortgage forms which we require to be used by all credit corporations discounting with us, and upon request from you we will forward a supply to you at actual cost.

For your information, we wish to say that it will be useless to use any other forms, as we will accept only those prepared by our attorney.

FEDERAL INTERMEDIATE CREDIT BANK,
By J. D. BELL, *Manager.*

In spite of the flaw of illegality and unenforcibility of these crop-mortgage forms, the Federal intermediate credit bank arbitrarily refused to allow any other form to be used and loaned out over $1,000,000 worth of loans on this form, and issued debentures which were sold to the public and investing banks, when the Supreme Court of South Carolina has held that a crop mortgage given in the fall has no binding force after the 1st of January, sustaining the position taken by the Agricultural Credit Corporation.

Mr. TYSON. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. TYDINGS in the chair). Does the Senator from South Carolina yield to the Senator from Tennessee?

Mr. TYSON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Bayard	Fletcher	McLean	Sheppard
Bingham	Gerry	McMaster	Shipstead
Black	Glass	McNary	Simmons
Blaine	Hale	Metcalf	Smith
Blease	Harris	Norris	Steiwer
Bratton	Harrison	Overman	Stephens
Brookhart	Hayden	Phipps	Swanson
Bruce	Heflin	Pine	Tydings
Capper	Howell	Ransdell	Tyson
Copeland	Johnson	Reed, Mo.	Vandenberg
Couzens	Kendrick	Reed, Pa.	Walsh, Mass.
Curtis	Keyes	Robinson, Ark.	Walsh, Mont.
Dale	La Follette	Robinson, Ind.	Waterman
Deneen	Locher	Sackett	
Fess	McKellar	Schall	

The PRESIDING OFFICER. Fifty-seven Senators having answered to their names, a quorum is present.

Mr. NORRIS rose.

Mr. BLEASE. Mr. President——

The PRESIDING OFFICER. Just a moment. The Chair will state to the Senator from Nebraska that the Senator from South Carolina was speaking when the absence of a quorum was suggested.

Mr. BLEASE. Mr. President, after the bank had had this correspondence with these gentlemen, after the bank's own attorney had sent this letter to these men giving his legal opinion in reference to the legality of this form of mortgage, they still continued to loan, and, as this statement which has been furnished me shows, loaned over a million dollars, when the Legislature of South Carolina had already passed an act saying that those forms were no good, that they were null and void after the 1st of January. Yet they loaned this money on that illegal paper, and still the Committee on Banking and Currency of the United States Senate says that does not need looking into, that that should not be investigated.

I am just as satisfied as I am that I am on this floor that the members of the Committee on Banking and Currency of the United States Senate did not inform themselves about conditions in that bank. They certainly could not have had this record before them and read it, and have said that there was no necessity for an investigation. There is the bank's attorney, the attorney of the Federal farm-land bank, writing to these people and saying, "You can do thus and so." He speaks of the members of the Legislature of South Carolina with contempt as "wiseacres," and in the very face of that evidence these people go on and lend out a million dollars unlawfully. Yet the Committee on Banking and Currency of the Senate says that is not a matter to be looked into.

Mr. President, I reckon it is a good thing they did not order an investigation. Otherwise I would not have had anything to take up this time with. Now I read a letter dated November 23, 1925, as follows:

THE FEDERAL INTERMEDIATE CREDIT BANK OF COLUMBIA,
Columbia, S. C., November 23, 1925.

SOUTH CAROLINA AGRICULTURAL CREDIT CO.,
Columbia, S. C.

GENTLEMEN: Kindly forward us at your earliest convenience all original crop and chattel mortgages in connection with loans rediscounted for your account.

Very truly yours,

FEDERAL INTERMEDIATE CREDIT BANK,
By FRANK H. DANIEL, *Assistant Manager.*

That shows the bank was connected with it. I read it again:

Kindly forward us at your earliest convenience all original crop and chattel mortgages in connection with loans rediscounted for your account.

Very truly yours,

FEDERAL INTERMEDIATE CREDIT BANK,
By FRANK H. DANIEL, *Assistant Manager.*

Did this committee send for Frank H. Daniel? No; they sent for Eugene Meyer. Now, I read from a letter on the letterhead of the Federal intermediate credit bank of Columbia, marked "Confidential."

Mr. RANSDELL. Mr. President, will the Senator yield to me to submit a report?

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Louisiana.

Mr. BLEASE. With pleasure.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator yield to the Senator from Nebraska?

Mr. NORRIS. No; I do not ask anyone to yield. The Senator from Louisiana has no right to submit a report except by unanimous consent.

Mr. RANSDELL. I ask unanimous consent.

The PRESIDING OFFICER. The Chair sustains the point made by the Senator from Nebraska.

Mr. NORRIS. I am sorry, but I can not properly fight and oppose the filibuster that is now on, and allow any other business to be transacted.

Mr. RANSDELL. I came from a sick bed to submit two reports that have been authorized.

Mr. NORRIS. I have had two dozen similar requests made. The reports can go in when there is a time. This delay does not interfere with them in any way. There is plenty of time to submit the reports.

Mr. RANSDELL. If I could stay here, it would be all right, but I have to go back and to bed.

Mr. NORRIS. The Senator does not have to stay here to do that.

Mr. RANSDELL. Can I offer the reports? I wish merely to present two reports.

Mr. NORRIS. I have had seven or eight Senators who wanted to do the same thing. The Senator realizes that we can not properly oppose and fight a filibuster if we let those things in. If the Senator will give me his reports, I will put them in just as soon as we get through with this conference report.

Mr. RANSDELL. With that understanding, if the Senator will put in these two reports for me——

Mr. NORRIS. I shall be very glad to do it. I can not yield to the Senator unless I yield to other Senators.

Mr. BLEASE. Mr. President, this is marked "Confidential," and reads:

(Confidential)

THE FEDERAL INTERMEDIATE CREDIT BANK OF COLUMBIA,
COLUMBIA, S. C., *March 31, 1926.*

Subject: Security of deposits, Beaufort bank.

SOUTH CAROLINA AGRICULTURAL CREDIT CO.,
Columbia, S. C.

GENTLEMEN: The Federal Intermediate Credit Bank of Columbia has been unable to secure a surety bond covering deposits with the above-named bank, heretofore named by you as one of your depositories. This bank has been compelled to adopt the firm policy of requiring that a deposit not only by itself but also by an agricultural credit corporation must be secured, preferably by a surety bond or Government obligations and farm-loan bonds, but in the event these are not available, then by acceptable collateral, such as bills receivable, which may be approved by this bank.

Since the bank has been unable to secure a surety bond covering this particular depository, it begs to state the matter should be handled as follows:

First. Government obligations or Federal land-bank bonds in the amount named above may be deposited by the bank in question with the Federal Intermediate Credit Bank of Columbia, or, if such are not available, then bills receivable acceptable to the bank for one and one-half that sum. In the event that Government obligations or bills receivable are so deposited, then the inclosed form must be duly executed by the depository bank, after its board of directors have regularly authorized the same by an appropriate resolution spread upon the minutes of the bank.

Second. Should the bank in question be unable or decline to execute the inclosed form and deposit the required security, then you should at once cease to deposit in such bank the funds derived from rediscounts of farmers' obligations by the Federal intermediate credit bank or funds paid to you by the borrowing farmers in payment of such obligations.

Third. You should at once, when a situation arises as discussed in the second paragraph above, select another depository which can either be bonded or is able to and will deposit the required security as discussed in paragraph 1 above; and thereupon all funds on deposit with the bank in question must be forthwith withdrawn and deposited with the bank securing the same either by surety bond or acceptable collateral.

As these regulations are intended not only for the protection of the Federal Intermediate Credit Bank of Columbia but also for that of the agricultural credit corporations and the borrowing farmers as well, it is not only hoped but expected that there will be hearty and effective cooperation in enforcing the same on your part.

Very truly yours,

FEDERAL INTERMEDIATE CREDIT BANK,
By FRANK H. DANIEL, *Assistant Manager.*

Mr. President, there again in that letter, written and sent out marked "confidential," ties the Beaufort bank and the Federal land bank in Columbia just as closely together as two institutions could be tied together. It shows beyond a shadow of a doubt that the Federal land bank, the Federal intermediate credit bank, and the Beaufort bank were working as one, in harmony, side by side. But we find what? We find the United States Government saying, "We can not afford to prosecute these men of the Federal land bank. If we do we will show that the Federal land bank is corrupt. We will show that officials of the Federal land bank are stealing from the farmers of South Carolina. We will show that Gov. Robert A. Cooper, former Governor of South Carolina, who is now a member of the farm loan board, was right and that we were wrong when we forced him to resign because he would not be the political henchman of Andrew W. Mellon, indorsed by Calvin Coolidge. The Republican Party can not afford to indict anybody in our own bank. We will simply remove Robert A. Cooper from this board, the South Carolina member, to help hide this stink and this rascality. Then, when we get Robert A. Cooper removed we will go down to South Carolina, we will go down to Beaufort, we will take up two little fellows down there, and drag them into the courts and make the goats out of those two little fellows, and we will let the big bankmen go."

That has been going on in this country for many years, just like the big liquor drinkers. You do not bother them. It is the little fellow with a half pint that gets into trouble. It is almost an honor to steal from a bank now. If a man goes down and steals a million dollars, he pays a fine of $100,000 and goes free. We believe him to be a big man, then, and he and his wife get to be society leaders—big society folks, now, because they have stolen enough money to get into society. He says, "I have my automobiles for my wife and friends to ride in. I have my liquor for my friends to drink." The newspapers speak of them in the society column as "society leaders." They are not in great disgrace. The only man who is disgraced now is the little fellow who steals only a little something, but the man that has an opportunity to steal enough to pay a few lawyers and a couple of fines is considered a society leader. His wife is a big woman. She can wear silk and diamonds. They are big folks in society. "They done stole something big."

The bootleggers are getting to be pretty big society people nowadays. They sell liquor and fool around until they get money enough to get into society, and then they quit selling liquor and their daughter marries some fellow with a title of some kind and we read in the society column "Ex-bootlegger's daughter marries Mr. So-and-so." That is the way we are running this country, and that is the way Andrew W. Mellon and John G. Sargent are running this bank. "We can not afford to indict anybody in our bank. They are ours."

It reminds me of what a man in politics down in South Carolina said one time. Senator Tillman went to him and said—and by the way, both of them used to be members of this body—"Herbie, I can't stand any longer for this so-and-so." He said, "That man is a rascal." He said something stronger than that but I will just use that term. Herbie said, "Tillman, I know that, but, damn it, he is our rascal." That is the way with Mellon and Sargent. They knew these rascals were in this bank. Both of them knew it and I have the proof here to show it if the Committee on Banking and Currency will let me do it. But, no, "They are our rascals," as Herbie told Tillman, only he said something stronger than that.

"Oh, we will take these two little Beaufort men," and they did take them and indict them and tried to convict them. They tried to get them into the penitentiary. Then what did Eugene Meyer say? He said, "We will do like the United States Senate did. We will follow them up. They can not help themselves. We have a judge here charged with a whole lot of rascality." So they got hold of him and he came up and said, "I am guilty, but I am sorry." The Senate said, "We will pardon you; just resign." So Mr. Meyer said to these fellows, "We will pardon you; just resign." He just let them get out in that way.

Do you believe if those men had been ordinary citizens and had gone into the Treasury and stolen all that money they ever would have been let go when they were found out? No, indeed. But let some poor fellow working in the United States Treasury to-night steal a dollar and they would put him in the peniten-

tiary. They would say, "Oh, yes, we have to put him in the penitentiary because it will be such a lesson to the other people who work there." But because a man robs the people and steals their money, and a lot of it, they must not put him in jail because "They are our thieves and we must not let the public know that we have thieves working for us."

Now let me submit a little more testimony:

THE FEDERAL INTERMEDIATE CREDIT BANK OF COLUMBIA,
Columbia, S. C., April 14, 1926.

SOUTH CAROLINA AGRICULTURAL CREDIT CO.,
Columbia, S. C.

GENTLEMEN: Inclosed herewith statement in connection with depository bond. Please give this statement your usual prompt attention.

We have settled with the bonding company charging your account with the amount as shown by this statement. Under the terms of the depository bond you are called upon to pay one-half of 1 per cent on the amount of the bond in advance. At the expiration of the year, provided it can be shown that your deposit averages an amount less than the amount of the bond, a refund will be arranged with the bonding company. In no event will the refund exceed one-fourth of 1 per cent, the minimum charge being one-fourth of 1 per cent on the amount of the bond issued. The bond only covers funds on deposit in the name of your corporation and any and all funds transmitted by your corporation to this bank, or funds transmitted by us to your corporation not exceeding the face of the bond. Therefore, it is essential that all partial payments due the borrower remain on deposit in the name of your corporation.

The blanket depository bond under which coverage is issued is dated March 1, 1926, and will expire March 1, 1927.

Yours very truly,

FEDERAL INTERMEDIATE CREDIT BANK,
By FRANK H. DANIEL,
Assistant Manager.

Mr. President, there is a list of the officers of the Federal land bank. Howard C. Arnold, president of the Federal intermediate credit bank. I have just read a list of the officers. Here is a letter signed. What more evidence does anyone want to connect these men and the Beaufort bank? They are writing to the Columbia bank saying the money was on deposit there being held for them. Does not that make them the agents? For God's sake, what is an agent? I confined my law practice mostly to criminal business and damage cases, but I have good sense enough to know what a contract is. There is the manager of the bank, writing to these people as their agent that the money is there, calling for a bond. Why would they be writing to those people these letters marked "confidential" if it was not a confidential contract between the two banks? Yet the Banking and Currency Committee of the Senate has said, "We need no investigation." Of course, Andrew W. Mellon was not going to let them say they needed one. He did not want them to be exposed.

Need no investigation? I want to show something to some Senators who were not here a while ago. Mr. MCFADDEN, of the House Banking Committee, said he could not get the testimony. I have it here now on my desk before me. It has been transcribed by the stenographer since the last of February. I now offer it to Congressman STEVENSON, who happens to be sitting here in the Senate Chamber, and I ask him to please give it to Mr. MCFADDEN, of the Banking and Currency Committee of the House, and tell him with the compliments of the junior Senator from South Carolina that I furnish him not only with this evidence, but two living witnesses to prove that they have thieves in the bank in Columbia, S. C. I have put this transcript of testimony in the hands of a good custodian. I know MCFADDEN will get it, because there is one of the best men that ever sat in either end of this Capitol, and I know he is honest and conscientious in the discharge of his duties, and that is why I have asked him to deliver this testimony to MCFADDEN.

Now, let us go to the courthouse. We have come mighty near getting there already.

United States of America, Eastern District of South Carolina, in the district court. United States *v.* W. E. Richardson, R. C. Horne, jr., Beulah B. Harvey, N. P. Bryan, H. B. Macklin, Harry Bowers, commonly known as H. Bowers, and W. R. Eve, jr., defendants

Defendants made timely offer in evidence of the following letters, a letter from the South Carolina Agricultural Credit Co. to Mr. R. H. Welch, as follows:

OCTOBER 5, 1925.

Mr. R. H. WELCH,
General Counsel, Federal Intermediate Credit Bank,
Columbia, S. C.

DEAR SIR: We have examined the printer's proof of the proposed South Carolina production note and mortgage which you sent us, and same seems to cover the grounds and give the necessary protection with one possible exception.

In the line just preceding the description of the land in the body of the mortgage on the first page, the words: "All the crops planted by the mortgagor during the year of the date hereof and grown on the following described lands," etc., seem to give the necessary protection for any staple crop or crops planted after January 1. But some of our loans are made in the lower part of the State on truck farming, and as it is the custom to plant and raise two or three crops on one acre of ground down there, we have found it desirable to have our paper cover any crop planted in the fall, which would be "the year of the date thereof," and also cover any succeeding crop planted on the same land after January 1 during the life of the loan. This has been accomplished by leaving a blank after the word "years."

It is possible that this protection is already accorded by the amendment to the crop mortgage law passed by the last session of the legislature. We are merely calling it to your attention for what it is worth.

We feel that having one form for all agricultural credit corporations will be a great convenience both to the credit corporations, the Federal intermediate credit bank, and the clerks of court.

Very truly yours,

S. C. AGRICULTURAL CREDIT CO.,
By R. C. HORNE, Jr., *President.*

And the answer thereto, as follows:

FEDERAL INTERMEDIATE CREDIT BANK OF COLUMBIA,
Columbia, S. C., October 6, 1925.

Subject: Crop mortgage in South Carolina.

SOUTH CAROLINA AGRICULTURAL CREDIT CO.,
Columbia, S. C.

(Attention of Mr. R. C. Horne, jr., president)

GENTLEMEN: I have your letter of the 5th in the above matter and beg to thank you for it. I note the suggestion in the second paragraph of your letter. The wording of the mortgage to which you refer is based strictly upon the act of 1925 found on page 91 of the acts of 1925 as No. 57. It specifically says:

"The provisions of this act shall not be held to defeat any lien in writing given over a crop or crops of truck or grain, planted or to be planted in one year and maturing in the ensuing year, if such crop or crops of truck or grain shall be specifically described in such instrument of writing with the name of the product or products and the year of planting set forth in such description."

Crops planted after the 1st of January are not covered by a mortgage taken during the preceding year. The amendment that I drew to the crop mortgage law of this State would have permitted the giving of the mortgage in the fall of the year for all crops planted within a year from the date of the mortgage. The "wiseacres" of the general assembly, however, took their own course and what we have as a result is the act of 1925 above referred to. There is no way that I have been able to figure out by which you can take a mortgage in the fall of the year and have it cover all crops planted during the remainder of that year as well as those planted in the next year; on the contrary, I have been forced irresistibly to the conclusion that crops planted after the 1st of January will have to be specifically covered by their own crop mortgage separate and distinct from those planted before January 1.

Yours very truly,

R. H. WELCH, *General Counsel.*

having first proven the transmission by due course of mail and receipt, respectively, of the said letters and the authenticity of the signatures. The court excluded said letters from evidence, to which ruling the defendants then and there excepted. Said exception being duly noted. Defendants assign error upon the exclusion of said evidence upon the ground that said letters were material and relevant and their exclusion contrary to law and harmful to these defendants, because the witnesses for the Government, Arnold and Daniels, having testified that no crop mortgage had ever been accepted by the Federal intermediate credit bank, where there was any question as to its validity, said letters were impeaching in their character, showing that all crop mortgages executed in the late fall of 1925 to cover crops to be planted in 1926 were known by the Federal intermediate credit bank to be invalid under the law.

III

Defendants made timely offer in evidence of the following two letters, to wit:

FEDERAL INTERMEDIATE CREDIT BANK OF COLUMBIA,
Columbia, S. C., December 17, 1925.

Mr. W. E. RICHARDSON,
Chairman Board of Directors South Carolina
Agricultural Credit Co., Beaufort, S. C.

DEAR MR. RICHARDSON: We are now ending up the year 1925, and we are carrying considerable past due paper for corporations which have rediscounted with us. For their information and guidance we wish to advise that no new applications will be considered until all of this

year's notes are paid, except in a few sections where they had exceedingly dry weather and absolutely did not produce enough to pay their loans. In this case the loan must be adequately secured, and in most instances a mortgage over the borrower's real estate is required, even if it is a second lien. We would suggest that these people make application to the local secretary of the Federal land bank and try to get a long-time loan.

We must have a final settlement and be in position to know the financial condition of the corporations before we begin a new year. We do not rediscount over a certain line of credit for corporations, taking into consideration their unimpaired capital and surplus, and with thousands of dollars in past-due paper that has not been attended to it is impossible for us to make an estimate of their losses. We, therefore, positively will not rediscount any further until these papers are satisfactorily arranged.

Very truly yours,

FEDERAL INTERMEDIATE CREDIT BANK,
By J. D. BELL, *Manager*.

There is the connection between the banks again. "In this case the loan must be adequately secured, and in most instances a mortgage over the borrower's real estate is required." Why was this bank in Columbia giving such information if they did not have anything to do with the Beaufort bank in loaning this money?

I have here another letter to Mr. Richardson, which reads:

FEDERAL INTERMEDIATE CREDIT BANK OF COLUMBIA,
Columbia, S. C., March 27, 1925.

Mr. W. E. RICHARDSON,
President Beaufort Bank, Beaufort, S. C.

DEAR MR. RICHARDSON: At the close of business to-day your rediscounts with this bank show around $1,025,000—

Think of that! That is what they had in the bank—

and we feel in justice to your company and ourselves that this being your first year's operation in the various sections of the State, and until your capital is materially increased, that you have about the line of credit that we would be willing to allow you. And we know it would be embarrassing to you to go out in the field and solicit applications for loans and not be able to handle them.

Yours very truly,

FEDERAL INTERMEDIATE CREDIT BANK,
By ——— ———, *Manager*.

Mr. President, I repeat why was that letter of the 27th of March, 1925, sent to Mr. W. E. Richardson, president of the bank at Beaufort, stating then that it owed the bank at Columbia $1,025,000 if the Beaufort bank had no connection with the bank in Columbia? Any lawyer in the world, any jury in the world, would take those two letters, without any other proof, and connect these two banks, having first proved their authenticity and receipt by due course of mail, which said letters the court excluded from the evidence and to which said ruling the defendants then and there excepted and said exceptions were duly noted.

Mr. President, there is another matter that we might as well consider right there. Why was it when Attorney General Sargent went to Columbia that they made such an exhaustive examination of the bank at Beaufort but skimmed over the bank at Columbia; and why was it when the reports came back here they were kept so secret that nobody could see them?

I understand there are times when the United States Government is privileged, and rightly so; of course, there are communications in the department of the Secretary of State that he would be foolish to allow anybody except his most trusted men to see; of course, the same policy applies to the Department of Justice, especially in its secret work; but, Mr. President, can you or any other Senator upon the floor of the Senate tell me why, when an open piece of thievery is charged, and a man who is sent here to the United States Senate to represent his State—and when he is sent here not by any money clique, not by any bought, tied-up convention, but by the vote of the ballot box and by a large majority of the white people of his State and with the expenditure of less than $1,000 in his campaign, certainly he must be the choice of his people—when that man comes here and goes to one of the departments and asks to be allowed to see certain statements and certain records the department says, "No; we can not let you see them"?

There is but one reason for such action, and that is that that department knows that that stealing was going on; that department knows that the records and examinations which they had made showed thievery. They are conniving at it, and are just as guilty as is the man who stole the dollar out of the truck-grower's pocket.

I do not care what job he holds, from President of the United States down, a man who will conceal a thief is no better than the thief. The man who will take a report, be he Attorney General or President or Secretary of the Treasury, or any other man, and read thievery and rascality all through it, and conceal it, and not indict the men who are guilty of it, is no better than the men who did the stealing. That is what the judges charge in the courts, and that is what I state on the floor of the United States Senate. If a man to-night should steal a gold watch and take that gold watch to some other man and that man concealed it, knowing it was stolen, when the two are tried in the courthouse, there is not a judge in America but would charge the jury that the man who received the stolen property and concealed it was just as guilty as was the man who did the stealing. And I charge Andrew W. Mellon, Secretary of the Treasury of the United States, and John G. Sargent, Attorney General of the United States, with being particeps criminis to one of the greatest pieces of rascality that has ever been perpetrated in this country; one that practically drove from office ex-Governor Cooper, of South Carolina, and kept him from telling them and the world what was going on in that matter.

I dare the Senate to order an investigation and summon Cooper and other men whose names I have put in the RECORD, men who have written letters, men who have sent affidavits here, even men who are sitting in this gallery now who helped in the stealing but are ready to go before the committee and tell all about it. Yet the committee sees nothing to investigate. Well, we have had an investigation, thank God. I have filled the CONGRESSIONAL RECORD full of exhibits and, as I said a while ago, there are more people interested in reading it than some Senators think, not only in one State but in a great many other States. I think when they read this record that I have made to-day and what is yet to follow; when they find out that Mr. McFadden said he could not get the record here because it had not been transcribed; when they see that I proved by a young lady, the court stenographer, the official stenographer of a Republican judge, that the testimony has been in the hands of the Department of Justice since the last of February they will understand what is involved in this case. I think any jury that could know of the facts or read the CONGRESSIONAL RECORD would come to the conclusion that somebody has been stealing in South Carolina.

We may talk about the oil business. An effort was made to hide that, was there not? Some people think that they tried to hide it by putting poor President Harding where he could not tell of it. I have even heard that hinted, and I have reason to believe it, because I notice that for five years they maintained a guard over his tomb. I do not know what the reason was, but I am inclined to think it was, because they were afraid that if they would allow the body to be taken up and a proper examination made it would be found that he had been poisoned by some of the very crowd that had been stealing and disgracing his administration. I am not the only one who believes that; there are many others who believe it.

Now, are we doing any better under the other man than we did under Harding? Let us see. If there are many instances like that of the Columbia land bank, there are some people who are not any better than Harry Daugherty, and they are still in office; there are some people who are not any better than Fall, and they are still in office; there are some people who are not any better than Sinclair and Doheny, and they are still parties to the robbing of the Government; and the Senate is shielding them by refusing a proper investigation.

Oh, some one may say that the Department of Justice made an examination. Yes; the department examined itself. That is like sending a man to make an examination about one of his own family.

It may also be said that the Treasury Department made an examination. Yes; they made an examination of their own institution. Eugene Meyer, the head devil of all of them, made that investigation. He is the man to whom the committee listened. It was such witnesses as he that the committee had before it. It did not call a man from the bank of Columbia, not a man from the bank of Beaufort, not a witness whose name I put in the RECORD, not even Governor Cooper, a member of the Farm Loan Board, who offered to come and give his testimony. No; they shut the door in their faces. They took Meyer and his crowd, and then they say, "We do not need any further investigation." Well, I am willing to leave it to the American public who read the CONGRESSIONAL RECORD as to whether the bank down there and all the other farm-loan banks of this country should be or should not be examined into.

Now, Mr. President, let me go a little further into some of the aspects of the trial. I will refer now to the assignments of error. The assignments of error were read over and corrected by Judge Cochran himself, and are now a part of the appeal record. A young man the other day who was talking to me had a letter from the stenographer in which she said

that it was corrected by the judge. I thought I had the letter, but it seems I must have mislaid it.

In not excluding all witnesses from the court room on motion of counsel for the defense—

That, of course, is a small matter.

In excluding from the evidence a letter shown to have been written to R. H. Welch, general counsel of the Federal intermediate credit bank, by the South Carolina Agricultural Credit Co., by R. C. Horne, jr., president, bearing date October 5, 1925, and the answer thereto.

I shall not read all of this, Mr. President, but I shall ask to have the entire 10 pages printed in the RECORD as part of my remarks.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Without objection, it is so ordered.

(The assignment of errors is printed at the conclusion of Mr. BLEASE's references to it.)

Mr. BLEASE. Mr. President, I am doing this for the purpose of showing that when the case was tried the attorneys in the case endeavored to link these two banks together. They had the evidence, as I have presented it here this afternoon; they had the letters; but the judge stubbornly sat on the bench and ruled them out. He is a Republican, do not forget that; I do not know whether he got any orders from Marse Andy or not, but he must have got them from somebody, in view of the way he ruled in that case.

In refusing to direct a verdict of not guilty in favor of the defendants, upon motion at the conclusion of all the testimony, in that there was no relevant and competent testimony offered in the case that tended to show that any false statements were made in violation of section 211 (b) of the agricultural credits act of 1923.

* * * * * * *

In excluding from the consideration of the jury all evidence tending to show a mutual knowledge on the part of H. C. Arnold, president of the Federal intermediate credit bank, and any defendant or defendants submitting said financial statements that they were untrue * * *.

I am informed that every time some of the attorneys offered a letter, every time they offered any testimony to show the connection of Arnold and the other officers of the bank in this matter, the judge would immediately rule it out, just like Mellon ruled it out, just like Sargent ruled it out. The very minute, I am informed, that a letter was offered to connect Arnold, the president of this bank and the ex-superintendent of the Atlanta Penitentiary—where he ought to be now, and would be if it were not for John G. Sargent and Andrew W. Mellon—every time there was any testimony offered or one of Arnold's letters submitted—his own letters—this judge would say, "No, Mr. Arnold is not in this; Mr. Arnold has got nothing to do with it."

In excluding from the consideration of the jury all evidence tending to show a mutual knowledge on the part of H. C. Arnold, president of the Federal intermediate credit bank, and any defendant or defendants submitting said financial statements, that they were untrue, and that each one of the said parties had full knowledge that the other had knowledge thereof—

Then—

In charging the jury that if H. C. Arnold, president of the Federal intermediate credit bank, actually knew of the falsity of the statements alleged in the indictment to have been the object of the said conspiracy, and to have been made for the purpose of obtaining from the said bank an advance in money, in influencing the action of the bank thereof in making such advance, as alleged, and the defendant or defendants making said statements also knew that the president had this knowledge; that is to say, that each fully knew the truth concerning the matters embraced in the alleged false statements, said mutual knowledge thereof, known by both at the time, would not be a defense to a charge of conspiracy to violate the provisions of section 211 (b) of the agricultural credits act of 1923—

And would not connect Mr. Arnold with it.

Why, the United States Government did not have need for any lawyer at this trial. They had a lawyer on the bench. They had a prosecuting attorney sitting up there in the form of a Republican judge—a smart one, too—who no doubt had been communicated with from Washington before ever this case was started. I believe he was. I do not believe anything else, being a lawyer myself, and reading this kind of stuff that he put in on these people.

All through this paper which I have submitted you find things like this—

In charging the jury that if H. C. Arnold, president of the Federal intermediate credit bank, actually knew of the falsity of the statements alleged in the indictment to have been the object of the said conspiracy, and to have been made for the purpose of obtaining from said bank an advance in money, or influencing the action of the bank thereof—

That could not be referred to. It could not be mentioned. Whenever you said anything about the intermediate credit bank, I am informed, at this trial, every time this bank was referred to, what happened? "I object."

(A Member of the House inquired of Mr. BLEASE, in a whisper, if he might take a certain paper.)

Mr. BLEASE. Yes, sir. I want you to take it over there and give it to Mr. MCFADDEN. Tell him he said he could not get it, but I found a man who could get it, and tell him he could have gotten it if he had asked for it.

"I object." "Objection sustained." Ruled out.

When the trial came up the judge charged the jury that Mr. Arnold had nothing to do with this matter. He charged the jury that the Federal land bank had nothing to do with this matter—not a thing, Mr. President.

All the way through, all the way down the line, the intermediate credit bank and its officers have been protected by the district attorney, by the judge, by the examiners of the Treasury Department, and the Attorney General's department, by Mellon, and by Sargent.

(The assignment of errors heretofore referred to by Mr. BLEASE is as follows:)

United States of America, Eastern District of South Carolina, in the district court. United States *v.* W. E. Richardson, R. C. Horne, jr., Beulah B. Harvey, N. P. Bryan, H. B. Macklin, Harry Bowers, commonly known as H. Bowers, and W. R. Eve, jr., defendants

ASSIGNMENTS OF ERRORS

Now come the defendants, W. E. Richardson, R. C. Horne, jr., and Beulah B. Harvey, in the above-entitled case, who respectfully submit that his honor, the presiding judge, erred in the following particulars in the trial of the cause:

"1. In not excluding all witnesses from the court room on motion of counsel for the defense, in that more than 100 witnesses were present at the trial, a great number of whom testified adversely to the defendants and many of them to the same general effect, each witness having an opportunity to hear the testimony of other witnesses upon the same general subject matter to the prejudice of the defendants.

2. In excluding from the evidence a letter shown to have been written to R. H. Welch, general counsel of the Federal intermediate credit bank, by the South Carolina Agricultural Credit Co., by R. C. Horne, jr., president, bearing date October 5, 1925, and the answer thereto, bearing date October 6, 1925, in that said letters were relevant and competent to contradict Government Witnesses Arnold and Daniels, who testified to the effect that no crop mortgages were ever accepted by the Federal intermediate credit bank when there was any question as to their validity.

3. In excluding from the evidence letters bearing date December 17, 1925, and March 27, 1925, directed to the defendant, W. E. Richardson, chairman board of directors, South Carolina Agricultural Credit Co., in that said letters were relevant and material and tended to show that the Federal intermediate credit bank, regarded W. E. Richardson as being in entire charge of the Beaufort office of the South Carolina Agricultural Credit Co. and in entire control of loans upon truck crops handled by the said company.

4. In refusing to direct a verdict of not guilty in favor of the defendants, upon motion at the conclusion of all the testimony, in that there was no relevant and competent testimony offered in the case that tended to show that any false statements were made in violation of section 211 (b) of the agricultural credits act of 1923.

5. In refusing to direct a verdict of not guilty in behalf of R. C. Horne, jr., upon motion made at the conclusion of all the testimony, upon the additional ground that there was no relevant, competent testimony offered to show that the defendant had any connection with or was in any way involved in any conspiracy to make false statements, knowing them to be false for the purpose of obtaining money from, or influencing the action of the Federal international credit bank in making certain advances in money, and that the evidence submitted did not exclude every other reasonable hypothesis except that of his guilt.

"6. In excluding from the consideration of the jury all evidence tending to show a mutual knowledge on the part of H. C. Arnold, president of the Federal intermediate credit bank, and any defendant, or defendants, sumbitting said financial statements, that they were untrue, and that each one of the said parties had full knowledge that the other had knowledge thereof, except to impeach the credibility of the witness Arnold in other matters, in that such evidence was relevant and competent and tended to negative any intent of purpose to make such statements for the purpose of obtaining an advance in money from said bank, or influencing its action in making an advance in money as alleged.

"7. In excluding from the consideration of the jury all evidence tending to show a mutual knowledge on the part of H. C. Arnold, president of the Federal intermediate credit bank, and any defendant, or defendants, submitting said financial statements, that they were untrue, and that each one of the said parties had full knowledge that the other had knowledge thereof, except to impeach the credibility of the witness Arnold in other matters, in that such evidence was relevant and competent and tended to negative any wrongful or criminal intent on the part of any defendant making said statement.

"8. In excluding from the consideration of the jury all evidence tending to show a mutual knowledge on the part of H. C. Arnold, president of the Federal intermediate credit bank, and any defendant, or defendants, submitting said financial statements, that they were untrue, and that each one of the said parties had full knowledge that the other had knowledge thereof, except to impeach the credibility of the witness Arnold in other matters, in that such testimony was relevant and competent evidence and tended to show that no reliance was put on said financial statements by the Federal intermediate credit Bank, and that there was no intention on the part of the defendants, or any of them, making said statement to obtain an advance thereon, or thereby influence the action of said bank.

"9. In excluding from the consideration of the jury all evidence tending to show a mutual knowledge on the part of H. C. Arnold, president of the Federal intermediate credit bank, and any defendant or defendants, submitting said financial statements, that they were untrue, and that each one of the said parties had full knowledge that the other had knowledge thereof, except to impeach the credibility of the witness Arnold in other matters, in that such testimony was relevant and competent, and tended to show that such financial statements were not reasonably calculated to deceive said bank.

"10. In charging the jury that if H. C. Arnold, president of the Federal intermediate credit bank, actually knew of the falsity of the statements alleged in the indictment to have been the object of the said conspiracy, and to have been made for the purpose of obtaining from the said bank an advance in money, or influencing the action of the bank thereof in making such advance, as alleged, and the defendant or defendants making said statements also knew that the president had this knowledge; that is to say, that each fully knew the truth concerning the matters embraced in the alleged false statements, said mutual knowledge thereof, known by both at the time, would not be a defense to a charge of conspiracy to violate the provisions of section 211 (b) of the agricultural credits act of 1923.

"11. In charging the jury that if H. C. Arnold, president of the Federal intermediate credit bank, actually knew of the falsity of the statements alleged in the indictment to have been made the object of the said conspiracy, and to have been made for the purpose of obtaining from the said bank an advance in money, or influencing the action of the bank thereof in making such advance, as alleged, and the defendant or defendants making said statements also knew that the president had this knowledge; that is to say, that each fully knew the truth concerning the matters embraced in the alleged false statements, said mutual knowledge thereof, known by both at the time, would not be a circumstance to be considered by the jury in determining whether the defendants had any wrongful or criminal intent in making said statements if they were made by any one or more of them.

"12. In charging the jury that if H. C. Arnold, president of the Federal intermediate credit bank, actually knew of the falsity of the statements alleged in the indictment to have been the object of the said conspiracy, and to have been made for the purpose of obtaining from the said bank an advance in money, or influencing the action of the bank thereof in making such advance, as alleged, and the defendant or defendants making said statements also knew that the president had this knowledge, that is to say, that each fully knew the truth concerning the matters embraced in the alleged false statements, said mutual knowledge thereof known by both at the time would not be a circumstance to be considered by the jury in determining whether or not any reliance was put by the said bank on said alleged statements, and whether there was any intention in submitting the same to obtain thereon an advance in money or thereby influence the action of the said bank.

"13. In charging the jury that if H. C. Arnold, president of the Federal intermediate credit bank, actually knew of the falsity of the statements alleged in the indictment to have been the object of the said conspiracy, and to have been made for the purpose of obtaining from the said bank an advance in money, or influencing the action of the bank thereof in making such advance, as alleged, and the defendant or defendants making said statements also knew that the president had this knowledge, that is to say, that each fully knew the truth concerning the matters embraced in the alleged false statements, said mutual knowledge thereof known by both at the time, would not be a circumstance tending to show that such statements were not reasonably calculated to deceive said bank.

"14. In charging the jury that even if the bank was a bank of rediscount and not a bank of discount, yet false financial statements of tenants and individual farmers, used in securing loans direct from said bank were in violation of section 211(b) of the agricultural credits act of 1923.

"15. In charging the jury to the effect that even if H. C. Arnold, president of said bank, had an understanding with any of the defendants to permit the use, as a matter of form, of false financial statements, of whose falsity he and each of them had full knowledge, such mutual understanding would not be available in this case as a defense or as a circumstance bearing on the question of criminal intent or on the materiality of such statements made as such statements might come before others for action in making said loans, in that H. C. Arnold assumed all responsibility for passing on these loans, and the testimony is uncontradicted that other members of said board merely approved his recommendations, and that there is nothing to show that the defendants or any of them had any knowledge that anybody other than H. C. Arnold, president of the bank, had made an agreement with any of the defendants to permit the use, as a matter of form, of false financial statements, of whose falsity he and each of them had full knowledge, such agreement or understanding would not be available in this case as a defense or circumstance bearing on the question of criminal intent, or on the materiality of said statements, as said statements would or might come before others for action in making said loans in that said Federal intermediate credit bank was, and is, a private corporation, and that H. C. Arnold was, and is, the chief executive officer of such bank, and as such, had full authority to bind said bank.

"17. In charging the jury in substance as follows, you have the right to consider the fact that R. C. Horne, jr., was president of the Agricultural Credit Co., in determining whether Richardson would have presented any false financial statement without advising Horne of the falsity thereof, the error being that no inference could properly be made from the mere fact of Horne being president that Richardson would communicate the information to him.

"18. In charging the jury in substance as follows, to wit: The jury has a right to consider the fact that Horne indorsed these checks from the Federal intermediate credit bank in determining whether he had guilty knowledge, the error being that neither presumption nor inference of guilt or knowledge as to the falsity of a financial statement can be drawn from the indorsing of the checks referred to.

"19. In refusing to charge the defendants' seventeenth request to charge as follows:

"'17. The jury should not convict the defendants, or any one of them, under this indictment, even though there may have been an understanding between two or more of them to make statements, known to be untrue, if such statements were also to be made with the understanding that sole reliance was to be placed by the bank upon other securities in making an advance in money to the parties as alleged, in the event that such statements were presented to the bank.'

"The said request containing a sound proposition of law and applicable to the issues and the testimony offered in the case.

"20. In refusing to charge the defendants' eighteenth request to charge as follows:

"'18. The defendants can not be convicted if the officer or officers of the bank making, or authorized to make, advances in money under the law, actually knew the truth of the transaction, and each one of the parties knew, at the time, that each fully knew the truth concerning the matters embraced in the alleged false statement, or statements, even though there may have been an understanding between any two or more of defendants to make such statements.'

"The said request containing a sound proposition of law and applicable to the issues and the testimony offered in the case.

"21. In refusing to charge the defendants' nineteenth request to charge as follows:

"'19. Even though a knowledge by the bank, through its authorized officials, of the falsity of any statement alleged to have been made to it for the purpose of obtaining, or influencing it in the making of, an advance in money to the persons charged, may not be regarded as an affirmative defense to a charge of conspiracy to violate the act in the particulars alleged, yet such knowledge on the part of the bank, through its officers in the course of their employment, is a circumstance, if the fact of such knowledge be also known by the person making the statement, and mutually understood, to be considered by the jury in determining whether the accused was prompted in making such false statement with the intent or purpose to obtain thereby, or to influence the said bank in making, an advance in money.'

"the said request containing a sound proposition of law and applicable to the issues and the testimony offered in the case.

"22. In refusing to charge the defendants' twenty-fifth request to charge as follows:

"'25. Under the act amending what is known as the Federal farm loan act, whereby additional credit facilities were provided for the agricultural and livestock industries of the United States in the establishment and operation of the Federal intermediate credit banks, such banks have only the power to make loans or advances direct to any cooperative association organized under the laws of any State, composed of persons engaged in the production or the production and marketing

of staple agricultural products or livestock, when notes or other obligations representing the loan are secured by warehouse receipts, shipping documents, or mortgages on livestock, and has no legal power to discount or purchase any note, draft, bill of exchange, debenture, or other such obligation, except from a national or State bank or trust company, savings institution, cooperative bank, incorporated livestock loan company, cooperative credit or marketing association of agricultural producers, agricultural credit corporations, or another intermediate credit bank, with its indorsement, and only from these when the proceeds have been advanced or used in the first instance for any agricultural purpose, or for the raising, breeding, fattening, or marketing of livestock. And if advances are made direct to individual farmers upon their notes, crop mortgages, and financial statements, or any other form of security, such advances are illegal, and the bank and its officials are presumed to know the law and charged with a knowledge of such illegality. In such cases the law would not permit the bank or its officials to say that money was obtained from it, or that its action was influenced in making an advance, by such financial statements in violation of the law, and statements of this nature, even though offered or made for the purpose of obtaining an advance in money, or influencing the action of the bank, are not in violation of the statute.'

"the said request containing a sound proposition of law and applicable to the issues and the testimony offered in the case.

"23. In refusing to charge the defendants' twenty-sixth request to charge as follows:

"'26. At the times charged in the indictment the law expressly prohibited the Federal intermediate credit bank from discounting any obligation presented to it by the South Carolina Agricultural Credit Co., where the proceeds from such obligation had not already been advanced or used in the first instance for agricultural purposes, or for the raising, fattening, breeding, or marketing of livestock, and the penalty provision of section 1122 of the United States Code, Annotated, is not intended to protect the said bank from making illegal loans, and the financial statements offered in evidence are not such statements as are contemplated by the statute.'

"the said request containing a sound proposition of law and applicable to the issues and the testimony offered in the case.

"24. In refusing to charge the defendants' thirty-third request to charge as follows:

"'33. Defendants request the court to charge as to each of the overt acts specified in the indictment severally and collectively as to this overt act there has been a material variance between the allegations in the indictment and the proof offered.'

"the said request containing a sound proposition of law and applicable to the issues and the testimony offered in the case.

"25. In refusing to charge the defendants' thirty-fourth request to charge as follows:

"'34. There has been a material variance between the allegations in the indictment and the proof as to each of the overt acts alleged in the indictment except overt acts 24, 26, 29, and 34.'

"the said request containing a sound proposition of law and applicable to the issues and the testimony offered in the case."

For which errors the defendants, W. E. Richardson, R. C. Horne, jr., and Beulah B. Harvey, pray that the judgment of the United States district court rendered and pronounced herein be reversed and a new trial granted.

———— ————,

———— ————,

Attorneys for W. E. Richardson, R. C. Horne, jr., and Beulah B. Harvey.

FEBRUARY 16, 1928.

Mr. BLEASE. I can take these men to Richland County, where this bank is located; I can let them pick their own jury, if they will not pick men who are working for them, and convict them in the Richland County courthouse. I know I can do it.

Nor is this all. There are other farm-loan banks in this country that are in just as bad shape as the Columbia Bank is in. They know it. The farm-loan bank system has been a failure. I do not care who created it or where it came from. Instead of loaning the farmers money at a lower price, by the time the farmer pays the lawyer who draws the papers, pays some fellow to go out and look over the land and appraise it, and has to take $500 worth of stock in the bank in order to get a loan, which they promise him interest on and never pay him a cent, and make his trips to Columbia to get his money, he would have been a long way better off if he had gone to his local bank and mortgaged his little stuff and gotten money from home.

Talk about this bank being to help the farmers! I told them when they started it—I can show you the speech printed in a newspaper—that it was going to be a farce and a humbug, just another opportunity for somebody working for the Government to steal from the poor devil back home who can not help himself. That is all it has been. That is all the whole system has been, and we know it.

Now, going back for just a few minutes to Muscle Shoals, the Senator from Nebraska [Mr. NORRIS] said, a while ago, that he could not yield to anything on account of a filibuster. He never made a worse mistake in his life. When I start to filibuster it will not be about something that I am as much interested in as I am in the Columbia Bank. I may do a little bit of that kind of business before we adjourn here, if I have to, to help out some of my friends.

I think I have pretty well shown the fact on this floor that I can do it if necessary. I think I can do some of it pretty effectively, too; but I have not made this talk for any purpose of filibustering, I will assure the Senator from Nebraska. I made this talk to show up the rascality that is going on in the Republican Party, certain parts of it, that will not give me an opportunity to expose it, and are still stealing from my farmers, the poor fellows who went to the polls and voted for me, driving the little one-horse wagons, and some of them walking to send me here. I am speaking for them this evening, and I am speaking against the dirtiest gang of thieves that ever infested Washington, Harry Daugherty and his gang not excepted. That is what I spoke for. What I said on Muscle Shoals was merely incidental.

My position on Muscle Shoals is very short. Since I have the floor, and promised to keep it until 15 minutes of 7, I will do it. Charge that up to a filibuster; mark that down "No. 1."

I should like to see Muscle Shoals developed. I have heard about Muscle Shoals. My summer home in the upper part of the State is about 150 miles from it. I have some very close kinspeople who live in the little town of Florence, right near Muscle Shoals. They are very anxious to get the property to work, because they say the town is about broke, and they are just about broke with it. If they are not broke, they are badly bent; and they want to get some enterprises that will help them get some money, and build up their property there, and their business. But, Mr. President, I want it done properly.

I have no objection to their making fertilizer there and handling that fertilizer in the proper way; but I do object to a Federal power board in this city telling the city of Columbia, S. C., and the other great cities of my State and the small towns of my State what they shall pay and what shall be their price for power. I want South Carolina and South Carolinians to say what price corporations in my State shall charge for things. I want a bill that will take charge of this property and make it beneficial to all the people of the United States and not simply to farmers. I want to see it benefit all the people of this country. I want to see it built up, and built up in the proper way; but I shall never vote for any bill that allows a Federal power board to say what the people in South Carolina shall pay for power. I never expect to as long as I live.

I shall not vote for any bill that will give the United States Government the right to further rob the farmers of South Carolina. What would this fertilizer business mean out there? Why, they would make it, but the farmers would not get it any cheaper—not a bit in the world. They would not get fertilizer and cheaper than they are getting it to-day. They would not get power as cheaply as they are getting it to-day.

My State has just begun to become an industrial State. In the last few months we have had cotton mills move from Connecticut and Massachusetts both into the State of South Carolina. We are having mills come down there because they are getting closer to the cotton fields. We have the largest mills to-day in the United States of America. We have more spindles and looms running under one roof in the Olympia Mill in Columbia, S. C., than in nearly any other mill in the world. We have our home—native people working in those cotton mills—not the foreign element; not people from across the water who do not love America. The boys and girls who will get up to-morrow morning and respond to the whistles of the cotton mills in my State are the blood and bone and sinew of South Carolina.

There are working in the cotton mills of my State to-day men who are as good, as honest, as clean, with as fine characters, and men with as good blood flowing through their veins as there are anywhere in the American Nation. We do not have any trouble with our cotton-mill people. We never have any strikes. We do not have any big fights. I doubt very seriously if there have been five men who work in a cotton mill tried for murder in the courts of South Carolina in the last 25 years. They are home folks. They are our folks. They did not come here from Italy, or Greece, or some half-nigger country.

One reason that we do not have any trouble with the nigger in the cotton mill is this, and it is the truth:

Once they said they were going to work the darkey in the cotton mills. I told them it was not any use to try it; they could not do it; but they built a mill in the city of Charleston

and put colored people to working in it, and every dog-gone one of them went to sleep. The hum of the machinery in the cotton mill puts a nigger to sleep. Therefore we have no competition with him. He does not worry us a bit.

That is the reason we never see one of them working as a railroad engineer. He can get up on the engine and as long as you keep the darkey firing the engine he will work, and he is all right; but you put him up there and give him that throttle and tell him to watch the road, and the first thing you know you look up and you will see the engine going down the track with a nigger sitting up asleep at the throttle. He can not help it. God made him that way. So that is the reason we have no trouble with our cotton mills.

We are just beginning to develop this industry. We are just beginning to bring them in. Why should we go to work and break down our power companies, destroy the very power and the very strength that is bringing this taxable property and these people and this money and these pay rolls into my State?

We are not going to do it. I want to regulate those power companies. I see their finger in South Carolina politics now. I see where they are organizing down there a power trust. They are reaching around different parts of my State. In 1930 they are going to have their candidate for governor down there. They have picked him out. They are going to try to get control of the South Carolina Legislature. They are picking out certain people now to do that very thing. But that is South Carolina's business. I do not want the Federal Government going down there and interfering in it. We will take care of it; and in 1930 we will beat their men for the legislature, and we will beat their man for governor just like we beat them in the State convention the other day. We know them; we have got them spotted; and we do not need any Federal assistance to take care of our situation.

I do not propose to vote for it in this bill. I made my campaign for the Senate on State rights. Every speech I made in South Carolina was on the question of State rights, State sovereignty.

I was born that way; I was reared that way. I believe in that principle, and I never expect to vote in the Senate or anywhere else to the contrary. I am opposed to the United States Government going into any business except where it takes the Army of the United States to enforce it.

We could do away with the Postal Service. Several men could form a corporation to conduct that service, but they would steal the mail, we all know. An individual corporation could not get proper protection. Therefore it is absolutely essential that the United States Government do hold control of the mail service. It takes the power of the Government to run it and protect it. Therefore I am in favor of the Government controlling that. But I am absolutely opposed to the Government going into any business in competition with its own citizenship unless, as I have said, it is necessary for the military forces of the United States to carry on that business to success.

With that opinion, and with my views as I hold them in reference to this report, I shall vote against it, and I hope that the Senators here who are interested in Muscle Shoals will let the joint resolution go back, and see if they can not get together on it in order that something may be made of it. But I say, Mr. President, that when it comes to going into a State and taking a county, as the senior Senator from Tennessee [Mr. MCKELLAR] described here a while ago, bodily, if they could do that, when we get our big dam finished, with these gentlemen in New York who are spending millions of dollars to build that dam, buying thousands of dollars' worth of property, I suppose at the next session of the Senate all that would be necessary would be for somebody to come up here and introduce a bill stating that it is essential to get power in certain parts of this country, that the Government must take over this dam, and take over the power plant, take these people's property away from them, and then say, "We need so much of South Carolina territory; take it away from them," and leave us cold-bloodedly and deliberately up in the air.

Mr. President, I stand for individual liberty, I stand for the freedom of the States, I stand for State sovereignty, and I believe that the Senate as a whole recognizes that, and recognizes the fact that any State in this Union has a right to preserve its power, and that nobody can take it away from a State legally or rightfully, although they may wrongfully do so, by force. But there has never been an instance in this world yet where might made right.

MESSAGE FROM THE HOUSE—ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills and joint resolutions, and they were signed by the Vice President:

S. 3752. An act to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926;

H. R. 1406. An act granting six months' pay to Lucy B. Knox;

H. R. 1616. An act for the relief of Carl C. Back;

H. R. 1931. An act for the relief of Daniel Mangan;

H. R. 2272. An act for the relief of William Morin;

H. R. 2472. An act for the relief of Emile Genireux;

H. R. 2477. An act for the relief of Joseph S. Carroll;

H. R. 2494. An act granting six months' pay to Vincentia V. Irwin;

H. R. 3971. An act for the relief of the owners of the schooner *William Melbourne;*

H. R. 4652. An act for the relief of Charlie R. Pate;

H. R. 4926. An act for the relief of the Pocahontas Fuel Co. (Inc.);

H. R. 4954. An act for the relief of Thomas Purdell;

H. R. 5910. An act for the relief of Ralph Ole Wright and Varina Belle Wright;

H. R. 6049. An act to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective departments;

H. R. 7268. An act for the relief of John Hervey;

H. R. 7708. An act for the relief of John M. Brown;

H. R. 8742. An act to authorize the Secretary of War to convey to the city of Baton Rouge, La., a portion of the Baton Rouge National Cemetery for use as a public street;

H. R. 9380. An act for the relief of Frank E. Shults;

H. R. 10649. An act providing for the transfer of a portion of the military reservation known as Camp Sherman, Ohio, to the Department of Justice;

H. R. 10702. An act for the relief of Elbert L. Cox;

H. R. 11471. An act extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas;

H. R. 11917. An act granting the consent of Congress to the county of Cook, State of Illinois, to widen, maintain, and operate the existing bridge across the Little Calumet River in Cook County, State of Illinois;

H. R. 11950. An act to legalize a pier and wharf in Deer Island thoroughfare on the northerly side at the southeast end of Buckmaster Neck at the town of Stonington, Me.;

H. R. 11980. An act granting the consent of Congress to the Fisher Lumber Corporation to construct, maintain, and operate a railroad bridge across the Tensas River in Louisiana;

H. R. 12031. An act to extend the times for commencing and completing the construction of a bridge across the Rio Grande at or near a point 2 miles south of the town of Tornillo, Tex.;

H. R. 12038. An act to authorize the acquisition of certain patented land adjoining the Yosemite National Park boundary by exchange, and for other purposes;

H. R. 12063. An act for the relief of the widow of Surgeon Mervin W. Glover, United States Public Health Service, deceased;

H. R. 12100. An act to amend the act entitled "An act granting the consent of Congress to the Gateway Bridge Co. for construction of a bridge across the Rio Grande between Brownsville, Tex., and Matamoros, Mexico," approved February 26, 1926;

H. R. 12235. An act authorizing B. F. Peek, G. A. Shallberg, and C. I. Josephson, of Moline, Ill.; J. W. Bettendorf, A. J. Russell, and J. L. Hecht, of Bettendorf and Davenport, Iowa, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Tenth Street in Bettendorf, State of Iowa;

H. R. 12571. An act granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a toll bridge across the Cumberland River at or near Iuka, Ky.;

H. R. 12623. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Sabine River at or near Starks, La.;

H. R. 12624. An act to amend section 17 of the act of June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended;

H. R. 12694. An act authorizing the Secretary of the Navy to provide an escort for the bodies of deceased officers, enlisted men, and nurses;

H. R. 12706. An act for the relief of the town of Springdale, Utah;

H. R. 12806. An act authorizing J. H. Harvell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across New River at or near McCreery, Raleigh County, W. Va.;

H. R. 12894. An act granting the consent of Congress to the Board of County Commissioners of Trumbull County, Ohio, to construct a free overhead viaduct across the Mahoning River at Niles, Trumbull County, Ohio;

H. R. 12913. An act to extend the times for commencing and completing the construction of a bridge across the Allegheny River at or near the borough of Eldred, McKean County, Pa.;

H. R. 12953. An act to authorize the Board of Managers of the National Home for Disabled Volunteer Soldiers to accept title to the State camp for veterans at Bath, N. Y.;

H. R. 13069. An act granting the consent of Congress to the State of Minnesota to construct, maintain, and operate a free highway bridge across the Mississippi River at or near Aitkin, Minn.;

H. R. 13141. An act authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn.;

H. R. 13143. An act to adjust the compensation of certain employees in the customs service;

H. R. 13380. An act authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark.;

H. J. Res. 47. Joint resolution for the relief of Mary M. Tilghman, former widow of Sergt. Frederick Coleman, deceased United States Marine Corps;

H. J. Res. 77. Joint resolution concerning lands and property devised to the Government of the United States of America by Wesley Jordan, deceased, late of the township of Richland, county of Fairfield, and State of Ohio; and

H. J. Res. 292. Joint resolution authorizing the President to invite the States of the Union and foreign countries to participate in the International Petroleum Exposition at Tulsa, Okla., to begin October 20, 1928.

MUSCLE SHOALS—CONFERENCE REPORT

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. LA FOLLETTE. Mr. President, I move to lay on the table the motion of the Senator from Tennessee [Mr. McKELLAR] to recommit the conference report with instructions.

Mr. BLEASE. Mr. President I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. COUZENS in the chair). The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Cutting	McMaster	Shipstead
Barkley	Deneen	McNary	Simmons
Bayard	Fletcher	Metcalf	Smith
Bingham	George	Moses	Steck
Black	Hale	Norris	Steiwer
Blaine	Harrison	Oddie	Swanson
Blease	Hayden	Phipps	Thomas
Bratton	Heflin	Pine	Tyson
Brookhart	Howell	Pittman	Vandenberg
Broussard	Johnson	Reed, Pa.	Wagner
Bruce	Kendrick	Robinson, Ark.	Walsh, Mont.
Capper	Keyes	Robinson, Ind.	Waterman
Copeland	La Follette	Sackett	Wheeler
Couzens	Locher	Schall	
Curtis	McKellar	Sheppard	

The PRESIDING OFFICER. Fifty-eight Senators having answered to their names, there is a quorum present. The question is on the motion of the Senator from Wisconsin [Mr. LA FOLLETTE] to lay on the table the motion of the Senator from Tennessee [Mr. McKELLAR] to recommit.

Mr. McKELLAR. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. SMITH (when his name was called). I have a general pair with the Senator from Indiana [Mr. WATSON]. I transfer that pair to the Senator from Texas [Mr. MAYFIELD], and vote "yea."

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. I transfer that pair to the senior Senator from West Virginia [Mr. NEELY], and vote "nay."

The roll call was concluded.

Mr. NORRIS. I desire to announce the necessary absence of the Senator from North Dakota [Mr. NYE]. If present he would vote "yea." He is paired on this question with the Senator from Massachusetts [Mr. GILLETT].

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Louisiana [Mr. RANSDELL] with the Senator from Maine [Mr. GOULD];

The Senator from North Dakota [Mr. FRAZIER] with the junior Senator from New Jersey [Mr. EDWARDS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Maryland [Mr. TYDINGS];

The Senator from Wyoming [Mr. WARREN] with the Senator from North Carolina [Mr. OVERMAN];

The Senator from Washington [Mr. JONES] with the Senator from Virginia [Mr. SWANSON]; and

The Senator from Connecticut [Mr. McLEAN] with the Senator from Virginia [Mr. GLASS].

Mr. GEORGE. On this motion the Senator from Georgia [Mr. HARRIS] is paired with the Senator from Rhode Island [Mr. GERRY]. If present, the Senator from Georgia would vote "yea."

The result was announced—yeas 38, nays 16, as follows:

YEAS—38

Barkley	Deneen	Metcalf	Simmons
Bingham	Hale	Norris	Smith
Black	Heflin	Oddie	Steck
Blaine	Howell	Phipps	Steiwer
Brookhart	Johnson	Reed, Pa.	Wagner
Capper	Kendrick	Robinson, Ark.	Walsh, Mont.

So Mr. McKELLAR'S motion to recommit was laid on the table.

Mr. TYSON. Mr. President, we have been for a long time trying to settle the question of Muscle Shoals and the conferees of the House and Senate have at last turned in a report that is unanimous.

I voted for the Senate joint resolution 46 when it passed the Senate, and though it was not entirely satisfactory to everyone it was the best bill that could be had, and after so long a time it seemed that this great property of the United States should no longer be permitted to lie idle, and feeling that this was the very best that could be done under the circumstances I voted for what is known as the Norris Resolution.

The bill which we sent to the House was a fairly good bill and one that was reasonably fair to the power interests of the country, to the fertilizer interests, and to the farmers and to the people generally, but the House was not satisfied with the Senate bill and substituted a very different bill, and now the conference report that has been brought back to the Senate and which is before us now is practically a new bill and so scrambled that no one knows exactly what it does and does not provide for, and is certainly not satisfactory to many who voted for the Norris bill as it passed the Senate.

Laying aside any criticism I may or may not have of any other features of the bill reported by the conferees, the objection I shall address myself to is the provision it makes for coming into my State of Tennessee and taking possession of the most important and valuable power site in Tennessee without any consent or negotiation with the State.

For a long time the development of the water power resources of the State of Tennessee, on the Tennessee River and its tributaries, has been held up because of the failure of the

United States Congress to pass a bill providing for the operation and disposition of Muscle Shoals.

The distinguished Senator from Nebraska [Mr. NORRIS], who has worked so hard to present a bill to this Senate which could be passed, for a long time had the idea of building the Cove Creek Dam on the Clinch River, a tributary of the Tennessee River in the State of Tennessee, and linking it up with the Muscle Shoals proposition. This dam site is on Cove Creek in Tennessee, in another State and situated some 450 miles by river from Muscle Shoals.

The failure of the Federal Power Commission to grant permits to build the Cove Creek Dam and other dams in Tennessee to private parties has held up development of the Tennessee River in the State of Tennessee for the last two or three years, as not a single permit was given on the Tennessee River below Cove Creek by the Federal Water Power Commission during that time, due to the fact that certain elements in Congress were attempting to connect up the Cove Creek Dam and two or three prospective dams in Tennessee with Muscle Shoals, and for that purpose the Federal Water Power Commission had an arrangement with certain Members of Congress by which it would grant no permits on the Tennessee until Muscle Shoals was disposed of.

Mr. President, I feel that the Federal Power Commission had no right under the law to delay granting permits in my State, as it has done for the last two years. When Senate Joint Resolution No. 46 was passed at this session of Congress and sent to the House it carried no provision for connecting Cove Creek Dam with Muscle Shoals. Those of us from Tennessee thought we had at last succeeded in divorcing the Cove Creek Dam proposition from Muscle Shoals. Therefore it was with great regret that I found that the House had passed a substitute for the Senate Joint Resolution No. 46 carrying the linking up of Cove Creek with Muscle Shoals, without the consent of the State of Tennessee; and it is with still greater regret that I find the conferees on the part of the Senate have accepted the substitute of the House in the conference report for making Cove Creek a part of the Muscle Shoals project as reported, without any provision for compensation to Tennessee.

While the bill carries authority for an appropriation of $2,000,000 to begin operations on Cove Creek Dam, there is no assurance that the dam will be built nor that it will not be held up, as it has been for the last several years.

Mr. President, as one of the Tennessee delegation I feel that the way in which this matter has been handled is a great injustice to Tennessee. All but one of the Tennessee delegation in the House stood firmly against the incorporation of the Cove Creek Dam in this Muscle Shoals bill and offered amendments to preserve the rights of Tennessee, but four of the delegation finally voted for the bill.

I want to read here an amendment offered by one of the Tennessee delegation in the House which, if it had been incorporated in the bill, in my judgment, would have preserved the rights to Tennessee and would have enabled me to vote for the conference report. The amendment was offered by Mr. GARRETT of Tennessee, and reads as follows:

> Page 8, line 20, after the figures "1928," insert: "And the corporation herein created shall be subject to all the laws of the States in which it operates in the same manner and to the same extent as would a private corporation engaged in such enterprises, and when the Cove Creek Dam and power plant hereinafter provided for shall have been constructed by the United States Government the laws of the State of Tennessee and the regulations of the constituted authorities of Tennessee shall apply in full force and effect to the sale, lease, distribution, or other disposition of the power produced and the water released for power developing purposes at all downstream plants or projects, to the imposition of taxes and tolls on all the properties, and to the regulation and control of all rates and charges: *Provided*, That the provisions of this section shall not apply to navigation locks nor the operations concerned therewith."

This amendment was voted down by the House.

I am heartily in sympathy with the stand which the Tennessee delegation took in the House and their efforts to keep Cove Creek from being incorporated into this bill, except under proper and fair conditions to Tennessee.

Mr. President, of course we in Tennessee are anxious to have our water powers developed. We are anxious to develop our State. We are very glad of any help that the Government may properly give us. We appreciate the fact that the Government of the United States has spent money in surveying the Tennessee River and its tributaries in Tennessee, and we are willing to cooperate in any fair and just measure and we will be very glad for the Government to build this dam under fair and proper conditions to our State, but I feel that the way in which this Cove Creek Dam has been taken, under the terms of this bill, without any consultation whatever with the authorities of Tennessee, without proper hearings by the committees of the Senate and House, or opportunity for us to present our views in regard to Cove Creek Dam, is but little less than spoliation.

This bill provides for the erection of a dam at Cove Creek, which will produce a great deal of power at an expenditure of a large sum of money.

Mr. President, the Government of the United States comes into the State of Tennessee, in a time of profound peace, without any consultation whatever with its constituted authorities, and proposes to erect, under the terms of this bill, this great dam without giving any compensation whatever to the State of Tennessee; and proposes to regulate the rates which are to be charged for the power which is to be generated at the Cove Creek Dam without regard to the laws or authorities of the State of Tennessee.

It must be admitted that every State is entitled to its own natural resources and to any advantage which may accrue to that State by the utilization of such resources. Unless there was some great emergency for war purposes the State of Tennessee should have the prior right to build this dam. She has not been consulted as to whether she desires to build this dam, and I deny that there is any emergency that would warrant the United States in taking possession of this dam site without consulting the State of Tennessee.

The State of Tennessee has considered this Cove Creek Dam a great natural resource; a resource from which it might obtain a large revenue during all the years to come.

A water-power proposition, as you know, is very different from any other proposition that we know of. It is a perpetual resource, and a developed water power is one of the surest means of revenue of anything to be found. It is something which will go on if properly cared for forever, and notwithstanding all this the United States Government is proposing to come into the State of Tennessee and take charge of this vast natural resource and use it perpetually entirely for the benefit of the United States Government without one penny of contribution to the State.

Mr. President, the taking of the Cove Creek Dam in this way may be legal under the present strained interpretation of the laws, but we of Tennessee do not believe it to be true; we believe that the people of Tennessee have some rights in the streams which pass through its borders, and we do not believe that the United States Government should come in and take the resources of the State in this way without our consent.

There has been no request on the part of the people of Tennessee for the United States to build this dam, and the United States Government is not building this dam especially in the interest of or for the benefit of or by the request of the people of that State. Under the power given to it under the Constitution to control navigation on the navigable waters of the United States, the Congress is proposing to build this dam ostensibly in the interest of navigation and flood control.

As a matter of fact, Mr. President, everyone knows, and no one will deny, that this is not a navigation project; it is not a flood-control project; it is purely a project for the purpose of increasing the power at Dam No. 2 at Muscle Shoals, at a plant owned by the United States Government, and it is to be constructed solely for the purpose of benefiting the United States Government in enabling it to produce more power for sale, and to produce more fertilizer and nitrates for sale, at Muscle Shoals. Incidentally there will be increased or better navigation between Cove Creek and what is known as Dam No. 3, just above Dam No. 2, at Muscle Shoals, in the State of Alabama.

If this was a bona fide navigation project authority should have been given and an appropriation made to erect a dam at Dam No. 3 in the State of Alabama and also at Riverside in the State of Alabama, for the reason that unless these two dams are built navigation on the Tennessee River will be of no great advantage to anyone, because there is no practicable advantage in having navigation bettered between Cove Creek and Dam No. 3, as but little if any more freight or trade will be carried along this part of the river than is carried now, because Dam No. 3 and a dam at Riverside are necessary before the Tennessee can be made navigable to the Ohio River.

It is true there will be some advantage in the matter of flood control below Cove Creek Dam if this dam is built.

Furthermore, in the matter of navigation, Mr. President, this dam will absolutely prohibit any navigation of the Clinch River from points below the dam to those above the dam, as, of course, there can be no lock built which could accommodate the passage of boats because the lock would have to be 225 feet high, and I assume everybody will admit this would be impracticable.

It will be admitted by all that the beds of the navigable rivers belong to the States, and are held in trust for the people of the States. The water which is in the river within a State for the time being belongs to the people of a State. The water which comes down upon all the land and watersheds contiguous to the Tennessee River in Tennessee is supplied from the land owned by all the people contiguous to the river, and this water is as much the property of the people who live upon its banks.

We have observed the great fight which has been made here for the waters of the Colorado River. We have seen seven States contiguous to the Colorado River trying to get together to determine to distribute equitably the waters of the Colorado River, and they have undertaken to form a compact for the purpose of determining an equitable distribution of the waters of that river and its tributaries, thereby indicating their belief in their rights to the waters of that river, and the Congress of the United States has now before it a bill to try to help those States to determine the equitable way in which the waters of that river shall be distributed among those States, thus recognizing the sovereign rights of those States in the matter in controversy.

But the United States comes along and takes the waters of the Tennessee River in the State of Tennessee at Cove Creek without consultation with the authorities of the State and proposes to convert the waters of Tennessee to its own use without any compensation to the State.

The laws of the United States give the United States the right of eminent domain to condemn property at its value and to pay for the same, and yet it comes and proposes to take the bed of the Tennessee River in the State of Tennessee and the waters of that river for its own benefit without paying the State a cent.

Mr. President, I ask what is the just and right thing to do in this matter? Is it right and fair and just for the United States to take this position with reference to Cove Creek?

The question of the rights of a State seem to be in such confusion that no one knows exactly what are the rights of a State or what are the rights of the United States.

I submit, Mr. President, before this matter was undertaken to be settled a proper law should have been enacted by the Congress of the United States determining so far as practicable what were the rights of the States and of the United States in the navigable waters of the United States.

The Federal water power act sets out the method by which private parties may secure a permit to build a dam across a navigable stream. The constitutionality of that act has been questioned by some of the most able lawyers in my State. That act provides that no permit shall be given to any private party or parties until they have complied with all the laws of the State in which they are applying for a permit, and yet the United States comes along and proposes to take these same rights without saying a word to the people of the State of Tennessee.

When the Associated Power Co.'s proposition was before the Senate some two years ago, as I remember it, in their bid they offered to pay the United States some $72,000,000 more for Muscle Shoals if they were permitted to build a dam at Cove Creek. This amount was to be extended over a period of 40 years, thereby indicating the great value which they estimated the dam at Cove Creek would be to Muscle Shoals.

In other words, something more than $1,750,000 per year would be given because of this dam at Cove Creek, all of which would accrue to the United States; and yet the United States Government under this bill proposes to come into the State of Tennessee and build a dam and get the entire benefit of this vast property for all time without giving to the State of Tennessee a single dollar.

The people of Tennessee own the land upon which falls the water, and it is to be stored up for the benefit of the United States Government. This dam will be tax exempt and the State of Tennessee will forever be deprived of a single dollar from this great natural resource which their people thought they owned.

Furthermore, Mr. President, this bill proposes to condemn for reservoir purposes something like 54,000 or 55,000 acres of land in Tennessee, which, when it gets into the hands of the United States Government, will be released from taxation from the State of Tennessee. This large area of 54,000 acres of land is nearly 90 square miles and the taking of this land and exempting it from taxation and precluding it from production will be another loss to the State of Tennessee.

Now, Mr. President, if this dam could not have been built by anyone else but the Government and had we asked the Government to build it, that would have been another thing, but, as a matter of fact, repeated efforts have been made on the part of corporations to get a permit to build a dam at Cove Creek, where large amounts of money would have been expended and where the dam, if it was built by private parties, would have been subject to taxation by the State of Tennessee and where the State would have had actual taxation control of the property and of the distribution of the power generated there and where the State would have had the regulation of the rates which were charged for this power.

Under the present plan of this bill all the taxes which the State of Tennessee would have received if private parties had built the dam will be lost, and the control and disposition of the power will be lost, and the United States Government may send it where it pleases, to Muscle Shoals or elsewhere, and the United States claims the right to distribute this power in the State at any rates which the Government may deem best, thereby creating a dual system of rates in the State which may result in great confusion by having two sets of authorities making rates in our State.

Such a law will actually override the sovereignty and independence of our State.

Mr. President, of course, Tennessee can not assert any rights which the Constitution does not give her and no law which we can pass can take away from her any right which the Constitution gives her if she asserts that right in a proper manner before the Supreme Court of the United States, and while I have no authority to speak for any of the authorities of my State, I wish to say that in my judgment this bill will lead to litigation.

Notwithstanding the large amount of money to be expended in the State, I do not believe that the people of the State will submit to this proposition without having their rights determined before the Supreme Court of the United States.

The Legislature of the State of Tennessee has not been in session for something over a year, but it will be in session again next winter; and at that time, if this bill shall have been passed and signed by the President, I have no doubt that the Legislature of Tennessee will take such action as may be necessary to preserve whatever rights the people of our State have under the Constitution of the United States.

The matter involved here is one of tremendous importance, and is not only one in which the State of Tennessee is interested but in which every other State of the Union is interested; for if the United States can come in and take possession of the Cove Creek Dam without any negotiations or any consent or any arrangement with the State of Tennessee, it can take every dam site on every navigable river in any other State of the Union without compensation.

The extraordinary injustice of this thing, it seems to me, is shown by the fact that the United States Government, in the great forest reserves which have never belonged to the States but to the Federal Government, when they have been set aside as such forest reserve, has as a matter of equity granted 25 per cent of the license and other fees and sale of timber to the States in which the reserves have been established.

Mr. COPELAND. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. GEORGE in the chair). Does the Senator from Tennessee yield to the Senator from New York?

Mr. TYSON. I will yield if I do not lose the floor.

Mr. COPELAND. I simply want to ask this question of the Senator: Does he believe that this dam will ever be built?

Mr. TYSON. I believe, Mr. President, that it will be built by the United States Government ultimately, if this bill should pass and the President should not veto it; but I believe that the President will veto it. I also believe that if the United States Government does not build it, it will be built by some one else. There have been parties trying to get an opportunity to get a permit to build this dam for three years. I do not know what the situation is now, but I assume that it is the same now as it has been in the past.

Mr. COPELAND. Mr. President, certainly the Senator has observed the endeavor of the Senator from California [Mr. JOHNSON] to secure the passage of a bill for the building of a dam at Boulder Canyon. The Senator will not live long enough, there will not be a man left alive who is now in this Chamber, to see this dam built. This is simply an authorization; and it must come back to Congress to determine whether the money shall be actually voted.

I think myself that the Senator is unduly exercised. I would share his apprehension if the dam were actually to be constructed if this bill passes; but I do not believe that the dam will ever be built.

Mr. TYSON. Mr. President, I should like to see the dam built, and I am willing to see the United States Government build it, provided it recognizes what I consider the rights and equities of the State of Tennessee. I have no objection, if that is done, to the United States Government building this dam. I

do not care who builds it. The only thing I want is to see that the equities and rights of the State of Tennessee are cared for and recognized.

Mr. COPELAND. Mr. President, if the Senator will yield further, as long as the Senator's State is so well and ably represented as it is at present the Senator need have no anxiety, because before the dam can be built the actual voting of money will come before Congress, and the conditions then can be set up, so that the rights of the State of Tennessee can be preserved.

Mr. TYSON. I am not quite so optimistic about that as is the Senator. I want to see the dam built, and I think ultimately it will be built. It is too valuable a property to remain idle, as it has been. It is a great property, one of the greatest resources of the State of Tennessee, one that the State of Tennessee has been expecting to get revenue from; and I am not willing to see anything done that does not preserve our rights and our opportunities to get a fair and just amount of revenue out of this great natural resource.

Furthermore, the United States Government permits the paying to the States of 37½ per cent of the royalties from oil from the public domain of the United States for oil from lands lying within the borders of States, as a matter of equity and fair dealing, in lieu of the taxes which the State would get if the lands were sold.

I ask, Should the United States Government, simply in the interest of increasing the power at Muscle Shoals—for a claim that it is in the interest of navigation can not be considered as bona fide—treat the State of Tennessee with less consideration than has been given to States in the Union in which there are public lands?

I am opposed to the conference report for the reasons I have set out; and, while I shall be glad for the United States to build a dam at Cove Creek under proper conditions, I do not want a dam built at Cove Creek by the United States Government unless it will recognize the just rights and laws of the State of Tennessee, and will give her an interest in this dam commensurate with what is fair and just to the sovereign State of Tennessee under all the circumstances.

In order that my position in the future may be clear, and that no rights of the State of Tennessee may be jeopardized by any action which shall be taken here, I want to say that I am against this conference report, as I believe there may be litigation in this matter, and that the State of Tennessee will attempt to ascertain and assert whatever rights the Constitution gives her; and I am unwilling, Mr. President, to place myself in a position which will in any way indicate that I admit that this bill properly recognizes the sovereign rights of the State of Tennessee.

If Congress will recognize the rights and laws of Tennessee, as provided in the amendment submitted by Mr. GARRETT, of Tennessee, a copy of which I have already had read, I will vote for this conference report.

I understand that my colleague, Senator MCKELLAR, submitted this proposition to the conference committee, but that it took no action upon his request.

Mr. President, in order to show that this dam site is not necessary except as a matter of increasing the power at Muscle Shoals, and that this is not a bona fide navigation or flood-control project, I desire now to read into the RECORD an extract from the hearing on the Muscle Shoals bill which was had in the House on Tuesday, March 1, 1927, which is very applicable to what is being done now.

This is the statement of Hon. Hubert Work, Secretary of the Interior. It shows how the State of Tennessee has been deprived of the opportunity of having its natural water-power resources developed by virtue of the fact that bills have been repeatedly introduced into Congress, and the water-power resources of Tennessee have been delayed by virtue of the fact that they were waiting to see whether these bills could be passed here before we were allowed to have a permit to develop any water power on the Tennessee River from the Cove Creek Dam all the way to the Alabama line.

Mr. JAMES, of the House, asked Mr. Work this question:

Mr. Secretary, we still have Muscle Shoals with us, as we did when you were before the joint committee. We had several private bids at that time, and we have several private bids at this time. But our committee of seven men are unanimous in the opinion that we can not accept any one of those bids at the present time. Our committee is also unanimous in the opinion that we ought not to consider any bid that does not contain a forfeiture clause in regard to the manufacture of fertilizer, to the effect that if the bidder ceases to manufacture fertilizer we will get back our property.

We may have to come to Government operation, or we may have better bids the next time, as far as the forfeiture clause is concerned.

In the meantime, we are very much interested in the matter of Cove Creek Dam, now pending before the Federal Power Commission. According to Mr. Leighton, the vice president of the East Tennessee Development Co., Dams Nos. 2 and 3, if completed, will give about 109,000 primary horsepower, and with the Cove Creek Dam completed, it will make 134,000 horsepower more.

It is figured that it will cost about $76,000,000 for Dams 2 and 3, and only $20,000,000 for the Cove Creek Dam.

In other words, by spending about one-fourth the amount of money we will get far more horsepower than by spending the other amount.

Our committee is unanimous in the opinion that we would like to have no permit granted for the Cove Creek Dam until we have a chance next fall to try to get a private bid that is acceptable, or, if not, to go to Government operation. So we thought it would be a good thing to have the different members of the Federal Power Commission tell us what their views are.

We thought that there was not any doubt about Cove Creek Dam not being taken up until such time as Congress disposes of Muscle Shoals. But when the secretary of the Federal Power Commission, Mr. Merrill, was here he said there was nothing in the proceedings of the commission to show that they had ever taken up the matter of that action before the commission. I think you will remember that I brought the matter up at a meeting of the joint committee, and Secretary Jardine said "until disposed of." I was wondering whether you had had any meeting of the commission lately.

Secretary WORK. We probably would not write anything in the proceedings of our meeting that would appear to stand in conflict with the law. We are organized under the law of Congress, and we are supposed to proceed on that basis.

Mark you, he says, "we are supposed to proceed" on the basis of the law.

Assuming that we did want to delay it, we would not write that in the proceedings.

Mr. JAMES. You will remember when you were there what the Secretary of War said, and he was interrupted by Secretary Jardine, who said, "until the matter was finally disposed of."

Secretary WORK. Speaking unofficially, you do not want the dam constructed until Muscle Shoals is disposed of, on the theory that the power market will be supplied and the value of Muscle Shoals will be lost?

I want to call your attention to the fact that these gentlemen are simply and purely putting up Cove Creek Dam as a power proposition for Muscle Shoals, and fearing that the value of Muscle Shoal will be lost without Cove Creek Dam. I want to give you that, so that you may get an idea of the enormous value of the Cove Creek Dam.

Mr. JAMES. No; it is not that. If we are going to have a private bidder down there for Muscle Shoals—for instance, the bid of the Cyanamid Co. was contingent upon getting the Cove Creek Dam. If we do not have the Cove Creek Dam we would only get 1,000,000 tons of 2-8-2 fertilizer, whereas if we get the Cove Creek Dam we would get 2,000,000 tons, or a difference of 1,000,000 tons of fertilizer, if we do have the Cove Creek Dam.

Mark you, Mr. President, this is purely for fertilizer and power. Nothing whatever is said about navigation or flood control.

In case we have to go into business ourselves and operate plant No. 2, if we can have the Cove Creek Dam we will have 134,000 more horsepower for $20,000,000, whereas we only get 109,000 horsepower for $76,000,000. In other words, if it is a revenue getter it will give us more power down there at about one-fifth the cost.

Think of it! Undertaking to go up into Tennessee and get a dam site worth all that vast amount of money, and not saying a thing to the State of Tennessee, and then not being willing to give a single dollar to the State of Tennessee for this vast resource which they are proposing to take, not for such public purposes as are necessary. This is not a national-defense matter at all. It is purely a power proposition, to sell more power and more fertilizer, to make more money for the United States Government at the expense of the State of Tennessee.

Secretary WORK. Then the theory is that this dam has a definite value in relation to Muscle Shoals?

Mr. JAMES. Absolutely.

Secretary WORK. And if the Government is going to keep Muscle Shoals, they want to keep that subsidiary dam so as to enhance the value of Muscle Shoals?

That is the idea. Think of it, Mr. President, taking the resources of Tennessee to enhance the value of Muscle Shoals. This is the Military Affairs Committee of the House questioning the Secretary of the Interior, and these are the questions by the chairman of the committee and the answers of the Secretary:

Mr. JAMES. Yes; and for two reasons. If we have to operate it ourselves, we will get 134,000 additional horsepower for $20,000,000. Every witness who has testified before us has said that in case somebody else besides the Government built the Cove Creek Dam, and we have Muscle Shoals, the power can be regulated up there so as to interfere with our property at Muscle Shoals. In other words, they could practically destroy the value down there.

Secretary WORK. They would compete with you in the market?

Mr. JAMES. Not only that, but they could so regulate the water up here so that we could not get the full power down there [indicating].

Mr. MCSWAIN. Does the Secretary understand that Cove Creek is not primarily a local power project? It is a storage project, and the manner of regulating the discharge of water at the storage dam determines the continuity of the power below.

Secretary WORK. I can see where it will be an advantage to the Muscle Shoals Dam, of course. But we own the Muscle Shoals Dam now, and if we go ahead and complete the Cove Creek Dam, or allow it to be completed, that will detract from the value of our property.

Mr. JAMES. If we allow somebody else to do it, it will detract from the value of our property, and in addition to that, if we have to manufacture fertilizer down there ourselves, we can get 134,000 horsepower for an expenditure of $20,000,000, whereas now it is going to cost $76,000,000 for only 109,000 horsepower.

In other words, Mr. President, there was a difference of $56,000,000 between what it would cost to get 109,000 horsepower and what it would cost to get 134,000 horsepower.

We are afraid we can not get a private bidder if the Cove Creek Dam is built by anybody except the Government. The American Cyanamid Co. will only give us 1,000,000 tons of fertilizer instead of 2,000,000 tons if anybody else builds that dam.

On the other hand, if we have to build it we will be turning over the most valuable part to somebody else, but we would not get any revenue.

Indicating that they are in this business to build Cove Creek Dam for revenue; that is the idea—revenue for the United States Government, not for any great national purpose, not for navigation, not for flood control, but for revenue.

The Secretary of Agriculture has a proposition by which all of the revenue from power would go to him for the manufacture of fertilizer, and if we do that, we will have that much more money to turn over to him for experimentation. There are other dams up there, but the key dam is the Cove Creek Dam, which is a storage reservoir.

In addition to that, the committee, being unanimous on that proposition, we are going to ask the Secretary of War, in order not to delay the borings, to spend a part of the money he has for the borings, and if at any time it is turned over to a private bidder, he will get his money back. So it will not delay those people in getting action on the Cove Creek Dam, because the boring has to be done, either by the Government or private individual. But we would rather have it done by the Government, so as not to lose any time.

Secretary WORK. So the two men most interested are the Secretary of War and the Secretary of Agriculture, for the two reasons you give?

Mr. JAMES. Yes.

Secretary WORK. You just want us to mark time?

Mr. JAMES. We would like to have you do that for the reason that we figure we can not dispose of the property to advantage to a private bidder, and we would be at a great disadvantage if we operate it ourselves and somebody else has the key dam.

Secretary WORK. Those people who want to build the dam urge us to build it on the theory that anything we can do will enhance the value of the Muscle Shoals Dam. That is their argument, and the only one they have.

Mr. JAMES. We do not agree on that.

Secretary WORK. It would if one person owned both.

Mr. JAMES. Yes; if one person owned both, it would. But to turn it over to power companies there, and to turn over Muscle Shoals to a private bidder, would not work out.

Secretary WORK. I see the point.

Mr. WRIGHT. In other words, Mr. Secretary, our investigations demonstrated the fact that the construction of the dam at what is known as Cove Creek, on the Clinch River, which is the key dam, would mean that considerable water power would be generated by the construction of the dam, but its principal feature and its chief value would be that it would serve as a reservoir, by which the water between this dam, which is about 400 miles from Dam No. 2 at Muscle Shoals, would regulate the flow of the water all the way down. If that dam should fall into the hands of adverse interests, who would not allow the water to flow as it should, it might materially cripple the Muscle Shoals property, already owned by the Government.

Secretary WORK. I understand that the Tennessee people think it is none of the Federal Power Commission's business.

Mr. WRIGHT. We are proposing a plan by which we really expedite the development at Cove Creek, because we believe the War Department will have its preliminary survey and borings completed quicker than any private concern would do it. We are not trying to impede progress of the section where the people are complaining to you. We are trying to help them.

We feel it would be a very grave mistake for a temporary permit to be granted to private interests until such time as Congress can act in reference to the disposition of Muscle Shoals, and we are not going to act at this session.

Secretary WORK. We will have a meeting of the Federal Power Commission on Thursday morning. I am one of the members of that commission, and we will take up the matter.

Mr. JAMES. We will not ask you at the next session of Congress to delay it because if we do not have a good private bid by the 1st of next December, as much as I dislike Government operation, we will have to have temporary Government operation.

Secretary WORK. You have a plant there, and if you can not sell it you will have to operate it or lose money.

Mr. President, that goes conclusively, it seems to me, the object, because this Cove Creek Dam proposition came from the House, it was not put in when the bill was in the Senate. The Senator from Nebraska [Mr. NORRIS], as I have said, undertook to get the Cove Creek Dam provision in the bill a long time, and our power propositions were held up down there; and finally the Senator thought for some reason, I do not know why, that it should not be put in; and the last bill which was presented to the Senate, and which we passed, did not have the Cove Creek Dam provision in it; but the powers that be in the House wanted the Cove Creek Dam in the bill, as Senators can very well see, and for reasons which are well known, and therefore they insisted on putting in this great, valuable property, but not in the interest of navigation; there was not a single thing said in this hearing about navigation or flood control. It is all in the interest of increasing the power and the revenue at Muscle Shoals.

Mr. President, I ask, in all seriousness, in all candor, in all good faith, is it right and proper and just that a property that is worth at least $100,000,000 to the State of Tennessee should be taken away from her without a single cent of compensation? The public utilities commission of our State is refusing any private power company a permit in our State unless they are willing to pay a license fee of from a quarter of a mill to 1 mill per kilowatt-hour for all power that may be produced. At least 100,000 primary horsepower can be produced at Cove Creek Dam if it is built in a proper way and not built too high, and if the State of Tennessee could get 1 mill per kilowatt-hour, the income to the State of Tennessee would amount to six or seven hundred thousand dollars a year for all time. The State of Tennessee ought to have the right to build that dam if it wants to, but it has had no opportunity to say whether it wants to build it or not. If the dam were built, every dam site below would have its water power greatly increased, and the State of Tennessee could get an additional revenue from every single dam built below the Cove Creek Dam. We estimate that this property is worth anywhere from one million to two million dollars in revenue to the State of Tennessee every year.

I am appealing to Senators, in all justice and fairness, not with any idea of trying to hold up this measure; if Cove Creek is taken out of the measure I shall vote for it, but I could not feel that I was doing the right thing to stand here and permit the Senate of the United States, without my protest, to go into my State and to take this great natural resource that we have there, which, when developed, will be a resource for all time.

The Senator from Nebraska [Mr. HOWELL], as I understand it, said he would like to have the Government come to Nebraska and build a dam there. As I understand it, that dam would be built for the benefit of the State of Nebraska, and would be turned over to Nebraska. I do not know whether that is true or not. We are not asking the United States Government to come and build a dam at Cove Creek for us. We can get other parties to do it, and it can be a source of very great revenue to us. I submit that the United States Government should not come there without our consent, without negotiating with us, and determining upon what is the proper and right thing to do by us, and take this great natural resource from us.

Mr. COPELAND obtained the floor.

Mr. FESS. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. FESS. I ask unanimous consent to have inserted in the RECORD——

Mr. NORRIS. I object.

The PRESIDING OFFICER. Objection is made.

Mr. NORRIS. I will not object after we have disposed of this conference report. Here is another Senator here ready to make a request. If I had yielded in this instance, he would

have been right on my back. I am not going to yield for anything of that kind as long as I can prevent it.

Mr. COPELAND. Mr. President, night before last, speaking regarding this measure, I voiced a protest against the building of the dam at Cove Creek. If I had my way, I would omit from the conference report all reference to Cove Creek.

Mr. McKELLAR. Mr. President, may I ask the Senator, then, if that is true, why he voted against directing the committee to omit it a few moments ago? The Senator had an opportunity to vote that the committee should omit it, but he did not join with those of us who wanted to have it omitted.

Mr. COPELAND. If the Senator will rest his soul in peace for about one minute, I will tell him why. I was about to give the reason.

When I came to study the bill to-day with reference to Cove Creek—and I hope the Senator from Nebraska will not be far away, because I want to resume a colloquy I started with him about five hours ago——

Mr. NORRIS. I am not leaving the Chamber.

Mr. COPELAND. When I came to study the bill, I found that both the Senators from Tennessee, as I view it, have no cause for worry. I have not been in the Senate as long as has the senior Senator from Tennessee [Mr. McKELLAR]. I have been here a little longer than has the junior Senator from Tennessee [Mr. TYSON], but I have been here long enough to know that there is a great difference between an "authorization" and an "appropriation."

I was disturbed during the speaking of the senior Senator from Tennessee, and was almost converted, because he brought out at the time—that is, I thought he made the statement—that $2,000,000 has already been appropriated for this work.

Mr. McKELLAR. Oh, no; authorized to be appropriated in this bill.

Mr. COPELAND. I discovered that that is the case. If I had found that $2,000,000 had actually been appropriated, I think I should have been obliged to vote for the Senator's amendment, but in the face of the proposed legislation, Cove Creek Dam is not going to be built in this generation. If it is built during the next 50 years, it will not be a matter of surprise to me, because I will not be on earth, but it will be a surprise to a lot of people living in Tennessee at that time.

The senior Senator from Tennessee knows very well how heartbreaking it is to get an appropriation for something. I heard the Senator from California [Mr. JOHNSON] this afternoon begging the chairman of the Committee on Appropriations to add an appropriation to the pending appropriation bill to carry out a project which was authorized, no one knows how long ago.

All in the world that the bill before us now does, so far as Cove Creek is concerned, is to authorize an appropriation hereafter to be made available by the Congress to construct a dam across Clinch River.

Mr. McKELLAR. If the Senator thinks that is a perfectly futile thing and that the dam will not be built even after the authority is given, why is he willing to vote to do a perfectly futile thing? If the Senator thinks this means nothing, and I understand his argument, is that the authorization of the full dam which will cost $37,000,000 and the authority for the appropriation of $2,000,000 at this time is of no avail and means nothing, why is not the Senator willing to strike it out of the bill, especially when he says he thinks it ought to be stricken out?

Mr. COPELAND. I can answer the Senator's question. I am unwilling to ask for another conference report because I want to see the bill pass. It is too late in the session for a further conference.

Mr. McKELLAR. Does not the Senator think it would stand a great deal better chance to pass without a new project of $37,000,000 tacked on it than it would with it?

Mr. COPELAND. Not if the Senate has a chance to vote upon it. If the Senate has a chance to vote, it will pass the bill. Whether or not there is a filibuster in process which will delay it, the Senator from Tennessee knows better than I. But to be frank about the authorization, I do not think it is worth the paper it is written on.

Mr. McKELLAR. Does the Senator mean to say that he is going to solemnly cast his vote for an amendment which he does not think is worth the paper it is written on? I do not see how it is possible for the Senator from New York to cast his vote for a proposition of that kind.

Mr. COPELAND. If the Senator will wait until I have a chance to cast my vote, he will see. I am going to vote for the bill provided the answers given by the Senator from Nebraska [Mr. NORRIS] pretty soon are satisfactory. I am not disturbed about this particular feature of the bill, the Cove Creek Dam, because it is such an unimportant part of it. As I have said, I have no belief that in this generation will that dam be built.

Night before last I urged two objections to the then pending conference report. The first one related to Cove Creek. That I am satisfied now is of no consequence. The other was that I objected to the Government going into the fertilizer business.

As the conference report comes back to us it seems eminently satisfactory in every respect save one. To that I shall refer.

Five hours and 45 minutes ago I asked the Senator from Nebraska a question which he did not have any opportunity to answer. I will ask him now if he will be good enough to turn to page 4 of the report. On page 4, subparagraph (e), line 5, I find these words:

> and in combination with such other ingredients.

When I read this proposal in connection with the original report it seems perfectly clear to me that there is no intent on the part of the conferees at present to combine nitrogen in a form to make it a fertilizer. In that same paragraph in the original report it said:

> The fixed nitrogen for fertilizer provided for in this act shall be in such form and in combination with such other ingredients—

And so forth.

May I ask the Senator from Nebraska, do the words "and in combination with such other ingredients" contemplate the actual making of fertilizer?

Mr. NORRIS. In my judgment, they do not.

Mr. COPELAND. And that is not their purpose?

Mr. NORRIS. No.

Mr. COPELAND. So when we go into court, as the junior Senator from Tennessee [Mr. TYSON] has suggested, we will know that the intent of the author of the bill and the one who is presenting it was that no fertilizer should be made except for experimental purposes.

Mr. NORRIS. I think that is right.

Mr. COPELAND. And this particular reference to "fixed nitrogen provided for in this act and in combination with such other ingredients" is not meant such a combination as is ordinarily sold as fertilizer?

Mr. NORRIS. It does not mean making a completed fertilizer. Of course, I ought to say to the Senator, so there will be no misunderstanding, that nitrogen, as the Senator knows, is one of the three ingredients in fertilizer.

Mr. COPELAND. I understand.

Mr. NORRIS. There are certain soils probably that need nitrogen only and need no potash and need no phosphorous. Ordinary fertilizer that is sold is composed of those three ingredients. But the Senator might have a farm that needed only one. If he had some way of applying that one ingredient it might be said that it was a fertilizer. Fertilizer is not sold that way, as the Senator knows, and there was no intention of putting the Government into the business of making fertilizer in any way.

Mr. GLASS. In other words, the purpose of the last conference report is to take the Government out of the business?

Mr. NORRIS. Exactly.

Mr. COPELAND. And the Senator from Nebraska understands this report does take the Government out of business?

Mr. NORRIS. Yes; I so understand it.

Mr. COPELAND. Then so far as the fertilizer business is concerned the purpose of the act is to permit nothing more than experimental work—that is, the making of experiments to develop higher grades of fertilizer?

Mr. NORRIS. Yes.

Mr. COPELAND. And there is no intent on the part of the framers of the bill to make fertilizer and put the Government in the fertilizer business?

Mr. NORRIS. The Senator is right.

Mr. COPELAND. I thank the Senator.

Mr. NORRIS. I would like to say, so that I will not be misunderstood, that the conferees acted in a representative capacity. The action that we took does not necessarily mean that I, personally, or any one of us, was favorable to it.

Mr. COPELAND. Oh, I understand.

Mr. NORRIS. I do not want some one afterwards to say that I wanted to do so-and-so. I did that because I believed it to be my duty as a member of the conferees to come to the wishes of the body which I represented.

Mr. COPELAND. The Senator was convinced that, so far as the Senate is concerned, it did not want to put the Government in the fertilizer business?

Mr. NORRIS. Exactly.

Mr. COPELAND. And the Senator in all good faith went back with the conferees and has brought us a bill which takes the Government out of the fertilizer business?

Mr. NORRIS. Yes, sir.

Mr. COPELAND. I think we clearly understand each other. The third objection which has been urged against the joint resolution is that it originally provided that the Secretary of War do certain things and the Secretary of Agriculture should do certain things, but the conferees accepted the House provision and have provided a board of directors.

I am right, am I not, in assuming that if the Secretary of War were directed to do certain things under a measure passed by Congress, he would carry out the direction just exactly as a board of directors would and in no different way; that if the Secretary of Agriculture were asked to do something, he would do it?

If this is true, I can not see any difference whatever who operates the property and administers the enterprise, whether it is one way or the other. Does the Senator from Nebraska see any difference?

Mr. NORRIS. There may be a difference, but the principle is absolutely the same. We might disagree as to whether this method or that method was the best, whether we ought to paint the house green or whether we ought paint the house white, but if we painted it we would have accomplished the good result which comes from painting.

Mr. COPELAND. And sometimes we might paint it green with white stripes.

Mr. NORRIS. Yes.

Mr. COPELAND. So far as I am concerned, after this explanation, I want to congratulate the conferees. I think they brought us a measure two days ago that was a bill which could not be supported. They put the Government into the fertilizer business through that bill. But now they have taken out that proposal and brought us a bill which will permit the use of Muscle Shoals in a way to permit us to carry out our original promise to the American people to have this plant operated in time of war for the making of explosives and in time of peace for the development of fertilizer.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. McKELLAR. Does the Senator consider Cove Creek, Tenn., a new expenditure of $37,000,000, a part of his compliance with our original resolution about Muscle Shoals?

Mr. COPELAND. I do not.

Mr. McKELLAR. I can not understand why the Senator is willing to jeopardize this bill, which is an excellent one in other respects.

Mr. COPELAND. Shall I say it over again for the benefit of the Senator?

Mr. NORRIS. Mr. President, may I interrupt the Senator?

Mr. COPELAND. Certainly.

Mr. NORRIS. I hope he will not take up time in saying it over again. That is what the Senator from Tennessee wants. He is asking these questions just to have the Senator from New York take up time.

Mr. McKELLAR. Mr. President, I expect to leave no stone unturned to defeat this bill as long as Cove Creek is in it. Let there be no misunderstanding about that. It is a matter of such vast importance that I propose to leave no stone unturned to defeat the bill. If it is a matter of physicial endurance, it is going to be a matter of physical endurance. I am going to use every ounce of energy of which I am possessed to defeat the bill unless Cove Creek is taken out of it.

Mr. COPELAND. I will say frankly that I think the Senator is fighting windmills.

Mr. McKELLAR. He may be, but he is going to fight them. I will say that to the Senator from New York and all others who are interested.

Mr. COPELAND. So far as the authorization is concerned, that is all we have in the bill. There can be no dam at Cove Creek, there can be no dam across the Clinch River, until the matter is brought here to the Congress and the appropriation made. If that time ever comes the able Senators from Tennessee will be here to fight that appropriation.

Mr. McKELLAR. Yes; and the Senator from New York will be on the side of those who are undertaking to despoil Tennessee of her property. I have no doubt when it comes to appropriations to help that spoliation the Senator from New York would do then just what he is doing now—undertake to despoil Tennessee of her property. So far as I am concerned, if it is possible to prevent that step I am going to prevent it.

Mr. COPELAND. Does the Senator from Tennessee think he was entirely just in making that statement?

Mr. McKELLAR. I think so. I looked at it this way. I looked at it from the standpoint of the effort that is being made here to despoil Tennessee of her property——

Mr. NORRIS. Mr. President, I rise to a point of order. The Senator from Tennessee has already made two speeches and is now making the third. I make the point of order that he is not entitled to do that in one legislative day.

Mr. McKELLAR. I have not got the floor. I have a perfect right to interrupt as long as there is no objection.

Mr. COPELAND. I want to say to the Senator from Tennessee that I shall never vote for any money to build a dam at Cove Creek unless the State of Tennessee is satisfied.

Mr. McKELLAR. Why vote to authorize it?

Mr. COPELAND. When he says that I will be on the side of those seeking to despoil Tennessee, he says that which is purely a figment of his imagination.

Mr. McKELLAR. I am glad to hear it. I hope the Senator is correct. I hope the Senator will not vote to do it to-night or at any other time.

Mr. COPELAND. So far as the measure before us is concerned I can cast my vote for it in good conscience and with great pleasure, because I think it will further the interests of the people of the United States.

Mr. BRUCE addressed the Senate. After having spoken for some time——

Mr. BINGHAM. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Maryland yield to the Senator from Connecticut?

Mr. BRUCE. I do, provided I do not lose the floor.

Mr. BINGHAM. I move that the Senate adjourn.

Mr. NORRIS. Mr. President, I want to call the attention of the Senate——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Nebraska?

Mr. BRUCE. Of course, if the Senate wants to adjourn I am not filibustering and I have no intention to filibuster.

Mr. BINGHAM. I moved that the Senate adjourn. That motion is not debatable.

The PRESIDING OFFICER. The question is on agreeing to the motion to adjourn.

Mr. ASHURST. I ask for the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. SMITH (when his name was called). I have a pair with the Senator from Indiana [Mr. WATSON]. I transfer that pair to the Senator from Texas [Mr. MAYFIELD] and vote "nay."

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. I transfer that pair to the junior Senator from Utah [Mr. KING] and vote "yea."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Delaware [Mr. DU PONT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Maine [Mr. GOULD] with the Senator from Louisiana [Mr. RANSDELL];

The Senator from North Dakota [Mr. FRAZIER] with the Senator from New Jersey [Mr. EDWARDS];

The Senator from New Mexico [Mr. CUTTING] with the Senator from Maryland [Mr. TYDINGS];

The Senator from Washington [Mr. JONES] with the Senator from Virginia [Mr. SWANSON];

The Senator from Wyoming [Mr. WARREN] with the Senator from North Carolina [Mr. OVERMAN]; and

The Senator from Rhode Island [Mr. GERRY] with the Senator from North Carolina [Mr. SIMMONS].

The result was announced—yeas 14, nays 50, as follows:

YEAS—14

Ashurst	Broussard	Fess	Pine
Bayard	Bruce	Hayden	Waterman
Bingham	Dale	McKellar	
Blease	Edge	McLean	

NAYS—50

Barkley	Fletcher	Locher	Sackett
Black	Gillett	McMaster	Schall
Blaine	Glass	McNary	Sheppard
Borah	Hale	Metcalf	Shipstead
Bratton	Harris	Moses	Smith
Brookhart	Harrison	Norris	Steiwer
Capper	Hawes	Nye	Tyson
Caraway	Heflin	Oddie	Vandenberg
Copeland	Howell	Phipps	Wagner
Couzens	Johnson	Reed, Mo.	Walsh, Mass.
Curtis	Kendrick	Reed, Pa.	Wheeler
Deneen	Keyes	Robinson, Ark.	
Dill	La Follette	Robinson, Ind.	

NOT VOTING—30

Cutting	Gould	Pittman	Thomas
du Pont	Greene	Ransdell	Trammell
Edwards	Jones	Shortridge	Tydings
Frazier	King	Simmons	Walsh, Mont.
George	Mayfield	Smoot	Warren
Gerry	Neely	Steck	Watson
Goff	Norbeck	Stephens	
Gooding	Overman	Swanson	

So the Senate refused to adjourn.

Mr. BRUCE. Mr. President——

Mr. NORRIS. Mr. President, I make the point of order that, the Senator from Maryland having yielded for a motion to adjourn and that motion having been acted on by the Senate, he has lost the floor.

Mr. BRUCE. I did not yield so as to lose the floor.

The VICE PRESIDENT. The point of order is well taken.

Mr. BRUCE. The Senator from Connecticut made the point that he had the right, and the point was uncontested that he had the right, to interpose his motion to adjourn whether I yielded or not.

The VICE PRESIDENT. The Chair will recognize the Senator from Maryland for a second speech. The Senator from Maryland lost the floor when the motion to adjourn was put.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield to me to present a unanimous-consent request?

Mr. BRUCE. The Senator from Pennsylvania will see that I stand on rather treacherous ground now; otherwise I should gladly yield.

Mr. HARRISON. Mr. President, may I ask the Senator a question?

Mr. ASHURST. He can not answer it without yielding.

Mr. HARRISON. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Mississippi will state the inquiry.

Mr. HARRISON. If the Senator merely yields for a question, does the Senator lose his right to the floor?

The VICE PRESIDENT. The Senator can yield for a question.

Mr. HARRISON. The question is, Would not the Senator yield if the Senator from Nebraska [Mr. NORRIS] will yield for a unanimous-consent request that we may call up the conference report on the revenue bill, provided the Senator from Maryland does not lose the floor?

Mr. BRUCE. Provided I do not lose the floor. That is the essential question now.

Mr. NORRIS. I object to the conference report coming up.

Mr. BRUCE. I expect I had better go on, because the suspicion of filibuster might attach to me the first thing I know. [Laughter.] I would not like to incur a disgraceful suspicion like that.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit a question?

Mr. BRUCE. I would prefer not to do so.

Mr. REED of Pennsylvania. I certainly would not take the Senator off the floor. I ask it in all good faith.

Mr. BRUCE. I will ask the Senator to keep down the interrogation point just now.

Mr. REED of Pennsylvania. I will make it very brief. I want to ask the Senator from Nebraska if he will not consent to a vote without debate on the publicity amendment to the tax bill? It is the sticking point in the way of a complete agreement.

Mr. ASHURST. Mr. President, I rise to a point of order. The Senator from Maryland declined to yield. If he yields, he will lose the floor, and I wish him to be notified of that fact.

Mr. REED of Pennsylvania. I am not asking the Senator to yield except for a question.

Mr. ASHURST. If he yields at all he will lose the floor. He can not yield the floor and hold it.

Mr. REED of Pennsylvania. If he yields for a question he would not lose the floor.

Mr. BRUCE. Mr. President, I expect I had better steer right on.

The VICE PRESIDENT. The Senator from Maryland will proceed.

Mr. BRUCE. Mr. President, I can honestly say that I do not rise for the purpose of participating in any filibuster, if any is pending looking to the retardation of the passage of this joint resolution. To tell the truth, I am afraid that I am very poorly qualified for the office of the filibusterer. I lack the fertility of suggestion and the ready resource that are essential to the character of an effective filibusterer. Indeed, I am afraid that if I were to attempt to filibuster my mental product would very soon run out into hopeless intellectual degeneracy.

I rise to make some observations on the conference report that has been submitted to us, because I am committed, heart and soul, by the profoundest convictions that I am capable of forming, to inflexible opposition to the resolution. I am opposed to it, first of all, because, so far as some of the powers that it attempts to confer upon the Federal Government are concerned, I believe that Congress has no constitutional authority to bestow them upon the Federal Government.

The plant at Muscle Shoals was established as the result of the part that we took in the great World War, and I would not undertake for a moment to deny that in the exercise of its war powers the Federal Government would be empowered to establish a plant at Muscle Shoals or at any other point in the United States for the purpose of producing the nitrates which are of such a high degree of military importance in time of war; but I deny that even if the purpose of the Government in part were to produce nitrates at Muscle Shoals for war purposes, it would have the right, under the guise of producing nitrates for such a purpose, to produce them upon an enormous or even a great scale for purely commercial purposes. If it were to attempt to pervert its power to produce nitrates for war purposes to their production for commercial purposes on a large scale, it would be simply engaged in a fraud that the Supreme Court of the United States would not be long in striking down.

But, be that as it may, where is there a lawyer, familiar with the rudiments of law, who is prepared to contend that the Federal Government has any constitutional power whatsoever to produce commercial fertilizer or electric power?

We might as well talk about the Government having the power to go into the business of producing boots and shoes, or hats and caps, or coats and trousers, or pig iron, or automobiles, or harvesting machinery, or any other product of a purely industrial nature. There is not one word in the Federal Constitution to which can be logically or reasonably referred the power of the Government to embark upon any ordinary industrial enterprise or upon any ordinary industrial business. I defy any lawyer in the Senate, I care not how subtle the operations of his mind, or how exquisite his ability to split hairs, to find the slightest color of authority in the Federal Constitution for the Federal Government to produce commercial fertilizers or electric power at Muscle Shoals.

It might be contended by a sound lawyer that the Government in the exercise of such powers as it has relating to the field of agriculture would have the right to set up an experimental plant at Muscle Shoals for the purpose of experimenting in the production of fertilizers merely as a matter of demonstration; but we all know that nothing but a comparatively small plant is necessary for such a purpose, and I say that if the Government instead of setting up a comparatively small and bona fide plant at Muscle Shoals for the purpose of experimenting in the production of fertilizers should go into the business on a large scale at Muscle Shoals of producing fertilizers in great commercial quantities, in that instance, too, it would be engaging in a fraud that the Supreme Court of the United States, to repeat my language of a few moments ago, would not be long in striking down.

So just as certainly as can be said of anything—mark my words—if this measure shall go into effect attempting to confer upon the Federal Government the authority to produce power at Muscle Shoals, it will be declared in that respect by the Supreme Court of the United States to be an absolutely nugatory, unconstitutional, and void thing. And that, as I have intimated, would be just as true if the resolution still, as it unquestionably did a few hours ago, boldly attempted to confer upon the Federal Government the power to produce commercial fertilizers for sale to public patrons. So, except to a very limited extent, this measure, I say, endeavors to clothe the Federal Government with powers with which the Congress is powerless to clothe the Federal Government under the limitations imposed upon its scope by the organic law of the land.

If the Federal Government can go down to Muscle Shoals and engage in the business of producing power, why can it not go down there for the purpose of producing any one or more of the thousand and tens of thousands commodities that enter into trade exchanges?

If the Federal Government can do that, it can go down to Alabama and cultivate its soil on a large scale in competition with the farmer himself for whose benefit these nitrates are supposed to be about to be created; and it can go down there, as I have already said, and begin to turn out by the ton, or by the thousand, or the million pieces any and all merchantable commodities of every sort that are produced through private agencies for the comfort or the pleasure of mankind.

Is it not, therefore, as plain as anything can be—as plain as the moon when she is riding through the heavens on a cloudness night—that, so far as this bill attempts to confer upon the Federal Government the power to produce power at Muscle Shoals, it is but the first step in the direction of what might ultimately become a complete scheme of State socialism,

a form of civil polity under which all industrial energy would be monopolized by the State, and all industrial agencies of every kind would be concentrated in the State?

That is where I part company with my friend the Senator from Nebraska, for whom I have such a great respect; and when I speak of my great respect for him I am not simply speaking of his talents. Talent is something quite common in public life; but the Senator from Nebraska has those attributes of character that are not so common in public life—that is to say, a keen sense of justice, fair-mindedness, and incorruptibility in all its more refined as well as robust forms. But, of course, his political philosophy in dealing with such measures as the pending bill is one which is hopelessly repugnant to mine and to that of not a few other Members of the United States Senate.

As we all know, the junior Senator from Nebraska [Mr. HOWELL] has the same faith in Government operation that a small child has in the omnipotence of his father; and it almost seems to me as if the senior Senator from Nebraska [Mr. NORRIS] has the same faith in Government operation that in the seventeenth century human beings had in the power of the king's touch to cure what was called the "king's evil," or scrofula.

The senior Senator from Nebraska, like so many other individuals at the present time, seems to think that all that it is necessary to do either to secure pecuniary profit for or to confer a material blessing upon a community is to turn everything, whether of a private or a public nature, over to the management of the Government. He wants it to take charge of the electric light and power industry. Apparently he wants it to take charge of every public utility of every kind. In his enthusiasm apparently he is not disposed to set any limits of any sort to what he conceives to be the beneficent workings of Government operation as respects those provinces of human effort that in the past history of the United States have been left to individual initiative, enterprise, and energy.

That is not my philosophy at all. I believe that this great country has been built up upon the foundations of individual initiative, enterprise, and energy, and that America never would have become the industrial miracle that she has become if this Government operation of industrial enterprises which is now almost incessantly held up to our faces for our admiration had been interfering in the past with private business as it is now seeking to do.

I was amused at some of the suggestions which the Senator from Nebraska made as to the importance of safeguarding inventions that might be conceived by Government officials or officeholders of even lower grade in connection with the production of fertilizers, or power, or anything else at Muscle Shoals. Why, you can count almost upon the fingers of one hand the inventions which have been made by Government officials or officeholders. Everybody knows that the effect of governmental red tape or bureaucracy is to kill inventive genius, and that such genius is almost exclusively found in those domains of private activity in which it is left freely to work out its splendid results.

In my judgment, the meanest business in which the Government can be engaged, the meanest, the most ungenerous, the most ignoble—short of bloody tyranny—is that of competing with its own citizens in business.

Take some of my constituents in the city of Baltimore! I turn to telegrams which they have sent to me, and in which they exhibit the deep-seated anxiety, not to say distress, with which their souls have been filled by the menace of the pending measure.

Here is the firm of G. Ober & Sons Co.

Here is the Virginia-Carolina Chemical Co.

Here is the Central Chemical Co.

Here is the American Agricultural Chemical Co.

Here is the Davison Chemical Co.

These are all companies of the finest standing, of the very highest degree of commercial prestige in the business world. They send these telegrams to me, deploring the threatened annihilation by the Federal Government—their Government as well as my Government, or the Government of the Senator from Nebraska—of their business, and the utter financial ruin, that that result would bring upon them.

Among these companies is, as I have said, the G. Ober & Sons Co. I am particularly familiar with the history of that great fertilizer company. I am particularly familiar with its operations. They extend throughout the length and breadth of the South, at any rate. Its business has been maintained practically by one family now for three generations, if I am not mistaken. It began with the father, came down to the sons, and now has come down to the grandson.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. BRUCE. Yes.

Mr. BARKLEY. The conference report, which is now under consideration, brought in last night, as I understand, eliminates that part of the joint resolution which authorized this corporation to manufacture fertilizer for commercial purposes and only authorizes it to produce fixed nitrogen for experimental purposes. In what way, in the new form, does it bring the Government into competition with the products of any of the chemical companies to which the Senator has referred?

Mr. BRUCE. In my opinion, it does nothing of the sort. I am not saying that it was not the intention of the framers of the conference report to give it that effect; but in the report we see the rudiments of the author's original creation just as plainly as we see in the vertebral column of a human being the vestiges of the caudal appendage that was once attached to it, or as we see in the appendix vermiformis evidence that at one time it was an active, useful organ.

For instance, on page 4 I find this language:

> The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients—

Let the Senator from Kentucky heed that language—he need not heed the caution that my friend the Senator from Nebraska is now whispering to him. I have no disposition, as I said, to filibuster about this measure. I am simply pouring out the unstudied thoughts that have come into my mind as I speak.

Mr. BARKLEY. I had not assumed, I will say to the Senator, that he was filibustering; but it was my understanding that the argument which he is now making might have applied to the bill as it was reported by the conference committee first.

Mr. BRUCE. It still applies, though not to the same aggravated extent.

Mr. BARKLEY. I am wondering what provision of this measure authorizes the manufacture of commercial fertilizer.

Mr. BRUCE. On page 4 the Senator will find that the conference report still states that—

> The fixed nitrogen provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

Mr. BARKLEY. But nitrogen, as I understand, is not a fertilizer within itself, except as it may be applied to a limited number of crops, a very limited number, too.

Mr. BRUCE. Nitrogen, of course, is not a complete fertilizer. It must be blended with potash and phosphoric acid to make a whole fertilizer. I have raised too much tobacco not to know that; and that could be done by this Government corporation under the provisions of this report.

I will return for a moment to where I was when I was interrupted. That language, of course, is ample to warrant the Federal Government, when it gets to work at Muscle Shoals, in blending anything that it pleases, I care not what it may be—phosphoric acid, potash, or anything else—with nitrogen.

Mr. FLETCHER. "For experimental purposes."

Mr. BRUCE. Suppose it is for experimental purposes; does the Senator suppose that I will allow my mind to be imposed upon for a moment by any such verbal limitation as that?

I will not say it is willfully deceitful, that it is purposely dishonest, but the Senator knows as well as I do that the Senator from Nebraska would not feel the interest he does in this measure if he thought that this plant at Muscle Shoals was to be used simply for the purpose of carrying on a few comparatively paltry experiments as a mere matter of agricultural demonstration work. The real idea is, under the semblance of experimentation, to turn out great quantities of commercial fertilizers for sale, because, whether commercial fertilizers are turned out at Muscle Shoals by way of experimentation merely or not, they will certainly, when produced, not be thrown into the Tennessee River or be turned to any purposes except those of sale.

The fact that, experiment or no experiment, the real idea of this conference report is still to turn out at Muscle Shoals commercial fertilizers in large commercial quantities is shown by another paragraph of the report. Listen to this: Nothing could more clearly tend to show how hollow the idea is that the original thought of producing commercial fertilizers has been altogether abandoned by the framers of the report.

Among the powers conferred upon the Federal Government in this conference report as it now stands is the power "to contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants." In other

words, what this conference report contemplates is that, experimentation or no experimentation, the Government will need to produce fertilizers in such great quantities at Muscle Shoals that it may even find it necessary to call on private producers of fertilizers for such excess fertilizers as its great fertilizer business may render proper.

So I say that, in my judgment, the Senator from Nebraska erred in opposing the motion to recommit this conference report to the conferees, if for no other reason because adhering to this report still are the highly objectionable fertilizer features that characterized the Norris resolution itself and the first conference report.

I say to the Senator from Kentucky, however, that even if that were not so I was justified in resorting to the business of producing commercial fertilizers when undertaken by the Government, as demonstrating, by way of analogy, the total lack of constitutional power on the part of the Government to engage in the production of electric power.

Even if this conference report is to be taken as involving an abandonment of the idea of producing commercial fertilizers except for the purpose of experimentation at Muscle Shoals, it still indicates on its face an express, an avowed, intent to produce enormous quantities of electric power; and I say that the Central Government has no more constitutional authority to produce electric power at Muscle Shoals than it has to produce commercial fertilizers at Muscle Shoals; no more power, to repeat myself, than to produce boots and shoes, caps and hats, coats and trousers, pig iron, automobiles, or harvesting machinery at Muscle Shoals.

As John Randolph of Roanoke said upon one occasion, so far as the pending measure seeks to confer upon the Government the right to produce electric power at Muscle Shoals, it has the sardonic grin of death upon its countenance, that sardonic grin which would soon be converted into the absolute repose of death by the Supreme Court of the United States.

Let me get back to the line of observation that I was pursuing when I was interrupted by the Senator from Kentucky. I say that this great Government should blush with shame at the thought of entering into business rivalry with any of its citizens who are engaged in an industrial line of business, whether that business be the business of producing commercial fertilizers or electric power, and working their ruin.

The officers of all these companies to which I have referred fully realize what it means for any private individual or any private corporation to enter into relations of business competition with the General Government, with its overflowing Treasury and its unlimited power to tax its own citizens for the purpose of replenishing that Treasury whenever it is necessary to replenish it.

(At this point Mr. BINGHAM moved an adjournment, and the Senate, on a yea-and-nay vote, refused to adjourn.)

Mr. BRUCE. Mr. President, the destructive significance of the pending measure will be realized by the Members of the Senate, I am sure, so far as the State I have the honor to represent in part is concerned, when I mention the fact that no less than $25,000,000 of capital is invested in the fertilizer business in the State of Maryland, and there is one single electric light and power company doing business in Maryland, with a plant on the Susquehanna River, that has a capital of upwards of $60,000,000. Indeed, it must have a capital far in excess of that, because the dam which it has recently constructed across the Susquehanna River involved an outlay, I am told, of $60,000,000. So it will be realized by the Senate, I am sure, just what my State, to say nothing of any State represented by any other Member of the Senate, has at stake in this measure.

I say again that I can not conceive of a more reprehensible thing in which the Government of this country could be engaged than that of competing in private business fields with its own citizens.

Just think what the pending resolution means to those fertilizer concerns in the State of Maryland that I have enumerated. In each instance some individual or group of individuals, beginning in a more or less humble way, had by his or their energy, enterprise, and integrity built up a thrifty business. The original sponsors of those enterprises and their successors have discharged, both in peace and in war, the obligations that they owed to their Government. The chief spirit of one of those concerns was one of the gallant soldiers that left our shores to battle for his country in the World War. Among the duties that those concerns have discharged to the Government has been the duty of punctually and scrupulously performing their tax obligations.

Now, the Government comes along, and, as I read the conference report, threatens them with irretrievable pecuniary disaster, utter destruction of all that corporate wealth, all that great business activity, all that extraordinary business prestige and standing which they have built up, in one instance, at any rate, as I have said, built up in the course of no less than three generations of men. What can be more unfair, more unjust than business competition between the Government and one or more of its own citizens?

If it conducted a private business as the ordinary individual does, there might be no cause for complaint. But everyone knows how hopelessly handicapped an individual or private corporation is when it undertakes to enter into relations of business rivalry with the Government.

The Government has no tax to pay. In its audits it need care nothing about depreciation. It does not care whether items are properly or improperly charged up to operating expenses or capital; in other words, all those things that one business man competing with another business man has to keep the very closest watch over the Government does not necessarily have to pay any heed to at all. When it undertakes the management of a private enterprise, electric or otherwise, and incurs a deficit, all it has to do is to tax its citizens a little more onerously than before to make it up. I have over and over again challenged any Member of this body to cite one single solitary instance in which the Federal Government has ever undertaken to carry on any private business of any sort and has not carried it on at a pecuniary loss.

So, in the very nature of things, when the Government and the citizen come to competitive grips with each other the citizen must perforce go to the wall. If the Government were at a loss for any other means for driving him to the wall all it would have to do would be to be more and more lavish and to incur larger and larger deficits from year to year, and render competition with itself wholly impossible. So this measure is a measure fraught with injustice to the individual citizen, to the honest, industrious, enterprising, useful citizen who has through long years of faithful energy and patient effort built up a livelihood or more than a livelihood for himself.

The great concerns to which I have referred have erected structures of material prosperity that would topple to the ground like houses of cards were the Federal Government to go on with the plans that it now has under way to produce fertilizers at Muscle Shoals. In other words, the pending measure will operate as nothing less than spoliation on a gigantic scale of individuals and private corporations who are engaged in the fertilizer business and in the business of producing electric power.

But not content with despoiling individuals this tyrannical ruthless measure contemplates nothing less than the spoliation of whole States, as the senior Senator from Tennessee [Mr. MCKELLAR] and the junior Senator from Tennessee [Mr. TYSON] have so clearly pointed out. What would the city of New York have thought in its early history if the Government had come to New York, and by setting up a colossal business of its own in different parts of the United States, deprived the private merchants and shippers of New York of the benefits of their superb port. Suppose the Federal Government should come to Baltimore and, in the same way, rob it of the great privilege which it enjoys in being so close to the great West. And yet it is just that sort of thing that the pending measure proposes to do as respects the State of Tennessee and the State of Alabama.

There ever since the divine fiat created the sea and the land that superb river, the Tennessee River, with its splendid tributaries, has been pouring its vast tide from the Alleghenies to the sea. In the processes of time that river has become a material asset of surpassing importance to those two States. As time goes on the power furnished by it might through the instrumentality of private capital become a source of almost incalculable wealth to those two States. No other States of which I know have any single asset of such vast value. And now the Federal Government is to go down to the Tennessee River, spend millions of dollars of the taxpayers' money there, and by building transmission lines in every direction, under its obligation according to the terms of this conference report equitably to distribute the power created at Muscle Shoals among the States, strip the States of Tennessee and Alabama almost entirely of the natural advantages derivable by them from the power of the Tennessee River.

In this instance, therefore, as I have said, we not only have an effort on a scale of immense magnitude to despoil individual business men and private corporations, but to despoil whole communities, whole States of natural benefits that belong to them. I do not hesitate to say that if I were a citizen of Tennessee or a citizen of Alabama when I contemplated the extent to which the Federal Government proposes to divert the

natural resources of those States from them, my heart would be filled with the bitterness of gall.

And, Mr. President, there is no occasion for it. I have just called attention to the fact that the State of Maryland without any difficulty found a corporation willing to build a dam across the Susquehanna River at a cost of $60,000,000, for the production of light and power, and I have not the slightest doubt that, if only these oppressive schemes of Government operation could be abandoned, private capital would flow in rich abundance to the Tennessee River as the potential seat of great industries of one kind or another.

If the States of Alabama and Tennessee were only left alone there would be a great influx of capital into them, and the power of the Tennessee River would not be transmitted to points hundreds of miles, perhaps, away from those States, but would be utilized by the States of Tennessee and Alabama to make those States blossom as the rose.

As I see it, so far as the production of power is concerned, the Government has no constitutional authority whatever to produce power at Muscle Shoals for fertilizer or for other purposes, for that matter. The only constitutional power that it has there of an industrial nature is to produce war munitions, or, in the exercise of its ordinary proprietary power as a mere property holder, to lease the Muscle Shoals plant to private lessees. The latter it could readily do if any real serious, honest effort were made to do it. I do not hesitate to say that it would be better for the Government to sell these plants, with proper reservations as to the production of nitrates in time of war, than to retain them to be conducted under the blighting, paralyzing influence of Government operation.

We all know what the Government corporation, if it shall be formed, will come to. It will be the same sleepy, sluggish, lethargic thing that every Government agency that undertakes to carry on a business enterprise is. It will be loaded down with officers and employees imposed upon it by political patronage. Only a few weeks ago the Senator from Florida [Mr. FLETCHER] testified to the fact that the Shipping Board had at one time no fewer than some 2,400 employees, when 600 would have answered every purpose; that is to say, some 2,400 employees saddled upon the Shipping Board by the influence of Senators and other Federal officials and of Federal and State politicians of low or high degree; and that is the fate that would befall this Government corporation. It would be as inefficient as the ordinary Government corporation is. It would be overloaded with political favorites and personal dependents, as every Government corporation is.

At the end of every year there would be a pecuniary deficit that would have to be met by the taxpayers of the country generally; and all this at the expense, the daily expense, of the honest, upright, industrious, enterprising individual citizens of the land engaged in the power business or the fertilizer business; and these results are to be brought about largely in consequence of this demagogic cry about the Power Trust.

I should just like to know what form of power there is that does not tend to abuse. Not more certainly do our animal propensities tend to abuse than power in any form, whether vested in the individual or in the corporation or in the public official, does. It is the business of government to keep such abuses in check; and as long as it is not diverted from its true functions it has proved itself to be entirely adequate to the task.

To quote John Randolph of Roanoke again, the only thing that can limit power is power; and if government is honestly and efficiently administered, it should always be competent for it, with its power of legislation, to keep the Power Trust or any other trust within the bounds of the law. So far as electric power is concerned, if the States of Tennessee and Alabama are doing their duty at the present time there would be no trouble about keeping within lawful bounds any power generated at Muscle Shoals. Those States, I take it for granted, have public-service commissions empowered to regulate the rates and administrative practices of electric light and power compan[illegible]; but this bill proposes to have the Federal Government wipe those public-service commissions out of existence, and itself to take over the function of regulating rates for electric power at Muscle Shoals. In other words, not content with working the spoliation of entire States, not content with working the spoliation of the individual citizen and the individual business corporation, this bill undertakes to thrust its oppressive hand into the internal political organizations of these States, and to bring to an end the very tribunals that they have set up for the purpose of regulating the rates and administrative practices of public-utility corporations.

When I think of the ruin, the havoc, of individual and corporate prosperity that the pending resolution, if it goes into effect, will operate, it is pictured to my mind as a kind of vast, conscienceless caterpillar tank set in motion for the purpose of crushing under its pitiless wheels some of the most important private industries in the land.

I know that my words are in vain. I know that the philosophy I am preaching is an effete philosophy. I know that all those old Jeffersonian ideas that have been the very vital breath of my existence are becoming obsolete. I see them violated every day, not only by Republican Members of this body—who have never professed any especial allegiance to them—but by my own colleagues. But so long as I live I shall uphold them; I shall contend for them; I shall insist upon their application to every exigency that arises in the life of the Nation.

Government, on the whole, in its own place is all that it should be. Leave it to its police and other functions, and there is no fault, generally speaking, to be found with it. But a large part of all the evils and abuses of our time originates in the constant encroachments of the Federal Government upon the domain of private business, and its incessant interference with the private affairs, rights, and duties of its own citizens.

We should stop that thing. The path along which the zealous, disinterested, and able Senator from Nebraska is taking us is a path that leads straight to State socialism. That fact doubtless has no terrors for him, because his faith in the beneficence of Government operation seems to be practically unlimited; but it has fears—direful, tragic fears—for me, because the ultimate result of this idea of having the Government take over one great private industry after another will be, as has been so often said, to kill, to deaden, to paralyze all those great spiritual forces to which our people owe their strength and our country its grandeur.

Destroy the spirit of individual energy, initiative, and enterprise in this country, make the private business of this country feel that there is no longer any security for it against governmental interference or competition, and, take my word for it, you will do nothing less than completely subvert the solid foundations upon which the prosperity and the greatness of this country have heretofore always rested.

So I trust in my very soul that this conference report will not be adopted; that it will be rejected, not in scorn, not in contempt—I would not say that—but in the spirit of true wisdom, based upon the long course of economic experience that this country now has behind it.

Mr. SACKETT. Mr. President, I do not want to speak long upon the subject of Muscle Shoals. I have already addressed the Senate several times upon the matter; but we have here tonight a conference report which came to the desk to-day at noon in its final form, and has not been submitted to the country as a whole. We can not know what the people of this country think of the method by which we to-day undertake to dispose of the Muscle Shoals problem, and I feel that the Senate should have the advantage of such an analysis of the conference report as it is possible to make at this time.

I do not want to take part in any filibuster. I am not interested in that feature; but I do believe that there are matters in this conference report that ought to be thoroughly understood by the Members of the Senate.

It is about seven or eight pages long, and in the whole conference report there are only three or four sections of prime importance in order to understand what it is that we are expected to do.

If the Members of the Senate will read carefully sections 5, 6, 9, 15, and 16, and section 11 in particular, they will get the whole meat of this effort to dispose of Muscle Shoals.

It makes no difference to the country at large, I take it, whether the institution is to be run by the Secretary of War or whether it is to be run by a private corporation, and a large part of the report is taken up by a provision for the setting up of the method by which it shall be administered. But the adoption of this report does bring about a new era in governmental methods in the United States, in that it adopts one of the principles of State socialism which we have not heretofore entered into on any such scale as is here provided for.

I am not an opponent, a "bitter-ender" of Government operation in every particular, and I do believe there is a place for it, and limitations which should be set to that place. Wherever private initiative is willing to undertake the business of this country, I think the business should be reserved for private initiative. Whenever the needs of the country require a new development and private initiative is not willing or able to undertake it, then I think we reach the place where it is proper for the Government of a great country like this to step in and blaze the trail and provide the means by which this country can go forward in that particular.

I think we have instances where it has been a great benefit to this country to have the Government step in. But when you offer to put the Government into a part of the business enterprise of this country which is already occupied, and fully occupied, by private initiative, then I think you bring about a new state of State socialism for which this country is not ready, and which the people of the country will not support.

I make that premise because I want to call to the attention of the Senate that this is essentially a proposition which has been set before us for a number of years by the Senator from Nebraska, through which he seeks to bring the Government into the electrical business of the country, in order to arrive at certain results which he believes will follow from the Government's entrance into that business, and that is a regulation through Government competition of the rates charged for electric energy throughout the country. In order to do that he had before the Committee on Agriculture when I first came to the Senate a proposition that the Government should take over the full electrical development of all the numerous dams which could be created upon the Tennessee River. Those of you who know the Tennessee River will recall that there are a dozen different places where electric power can be created from water power where dams should be built, and the amount of electrical energy which would be firm power on that river is probably the greatest to be found on any river in the eastern section of the United States. It was the Senator's idea—and I do not quarrel with him at all upon that idea, except to say that I disapprove it—that the United States Government should undertake the development of each of those power sites, and should go into the business on a tremendous scale.

That effort of the Senator from Nebraska was not successful, and we still have the problem of Muscle Shoals. But the conference report which the committee brings in to-day does go into the problem of Government ownership of the entire Tennessee River with a grip that I do not believe can ever be broken. Owning the Muscle Shoals Dam at the western end of the power development, it now seeks to develop the eastern end of the power development in the Cove Creek Dam. Between those two dams there will be ten or a dozen additional sites. With the enormous reservoir of waters that would be created at the eastern end of the river, at Cove Creek, no private initiative, in my judgment, would ever be willing to develop the intermediate dams, because the Government at each end of the stream would so control the flow of that river that it would have it in its power to defeat any efforts to create a great power service from any of the intermediate dams, and no private capital in any such amount as is going to be needed to build dams across that stream, with the power houses, can ever be induced to put themselves between the two jaws of Government ownership on the Tennessee River.

For that reason, I think that before Senators take a vote upon the conference report Senators should consider that they are locking the Tennessee River up against private development, not only taking the two places which are mentioned in this conference report, but taking hundreds of thousands of additional horsepower which may be developed at intermediate dams, and the ultimate result must be, if they are ever developed, that they must be developed by the Government of the United States.

We have ample power through the South for its needs to-day. It has been provided by private initiative. The Tennessee River is the great resource of the future, and it ought to add to the reservoir of power which has already been created, as and when it is needed. There is ample capital in private hands to do that work if the people of the United States will that it should be so done. The number of applications that have been filed upon that river by private capital to-day show that that is true, and that there is no need for the Treasury of the United States to be tapped for the purpose of causing that development.

Another thing I wish to call to the Senate's attention is this: That this measure requires an expenditure by the United States Government of at least $60,000,000 in its development under this bill, and I believe that it will be found before it is through that it will far exceed that amount of money.

I make that prediction for this reason: Two years ago, when the experts came before the committees that were examining this river, it was estimated that the Cove Creek Dam would reach to twenty or twenty-two million dollars. Last winter when they appeared before the House committee which had charge of this question, that estimate had been raised to $37,000,000. There have not to-day been sufficient data accumulated or surveys made to enable us to know in a definite way that $37,000,000 will cover the cost at Cove Creek.

It is provided in this conference report that there shall be transmission lines built in any direction that is required from Muscle Shoals by the Government of the United States. There is no limit to the number that may be built or the cost of those transmission lines.

It is provided in this report that when the Government comes into the fertilizer business it must have a capital of $10,000,000. We could not finish nitrate plant No. 2, which authority is given to finish, for less than $10,000,000 and make it a proper producing plant. The power is given under this measure to this corporation to make nitrogen under any other plan, and you can not build a plant using the synthetic process to-day for less than eight or ten million dollars, and you have not much production in a plant that can be built for that amount of money.

So I say that this measure, in the form in which it comes to us now, is a $60,000,000 drain upon the Treasury of the United States at the least amount, and what is going to be obtained from that drain? You are going to increase to some extent the power now available as primary power at the Muscle Shoals plant. You are going to have more electricity there to distribute as firm power. You are going to have a small amount of firm power to distribute from the Cove Creek Dam when it is finished, but if it is going to be used by a storage reservoir, that great amount of 200,000 horsepower, which the joint resolution provides shall be placed in that dam, is bound to be idle much of the time after that dam has been built.

You are going to build that dam upon the Clinch River, 50 miles from its mouth, a river that is not much more than a good-sized creek. The reports of the War Department for year after year surveying, with the idea that that river can be improved for navigation, will show the type of river it is, running between high hills, and when they tell you that it can be improved for navigation to the depth of a foot and a half, you see the type of river it is proposed to dam here at Cove Creek.

In this report that comes to us to-day for the first time we find that it is claimed that this dam is valuable for navigation and for flood control. There have been no floods coming down the Clinch River in the past that warrant an expenditure for flood control, because there is nothing to destroy. It is a wilderness country, with but very small settlements. That river runs through narrow valleys and gorges, and is not subject to overflow. The total amount of water which comes down the Clinch River in low-water periods is 750 second-feet. It is not a river of such size that if it is not dammed and every drop of water that comes out of it can freely flow that its volume could be felt upon the gauge at the city of New Orleans.

It is not a flood-control problem in any sense. There is not a particle of evidence before any committee of the Senate or of the House that I have seen—and I have seen most all of it—that brings forward the damming of the Clinch River as an element of flood control.

The building of Cove Creek Dam will not add to the navigation of the Tennessee River materially, for this reason: The Tennessee River is no different from the Ohio or any of the similar rivers that run far into the interior. In order to make them navigable there have to be dams built every short stretch of the river, say 50 miles, and those dams shut back the water, and through the locks the boats are let down into the next pools. Those rivers running in that territory, when they are locked and dammed, from those slack pools, and river navigation continues all through the low-water season. Similar rivers without large storage reservoirs give low-water navigation when properly locked and dammed.

If you had this enormous reservoir storing water on the Clinch River which, by the way, is only a small tributary of the Tennessee—if you had that enormous amount of water there it would not be necessary to let it down for navigation of the Tennessee. So it is not a flood-control problem, it is not a navigation problem, it is not a real power problem, but Cove Creek Dam will increase the power at Muscle Shoals and give to the corporation a greater amount of power to spread over the country in the eastern part of Tennessee and across the mountains into North Carolina.

It has been stated on the floor of the Senate to-night that if the Government did not build the Cove Creek Dam it would not be built. But I refer Senators to the contract which the Air Nitrates Corporation offered 2 years ago and submitted to the Senate, in which they reserved the right to build the Cove Creek Dam before the Government should have an opportunity to build it. Under all the engineering information which they then had they felt that as a matter of private ownership it was sufficiently valuable to reserve that right to them before the Government should take hold.

It is carrying out the idea of the Senator from Nebraska that when the Government distributes the electricity which is produced at this dam and at Muscle Shoals they will be able to

compete in municipalities of various sections of the country with electric power privately owned, because they can sell at a cheaper rate than the present electric companies sell it.

I want to say to the Senate that these dams are within the Appalachian coal region. They are close at hand to the coal mines of that country. The difference in cost of production at the dam, when we consider the cost of the dam and the auxiliary plants that are necessary, and the cost of production at a steam plant close to mines within striking distance of the dam, is so small that that difference could not be translated into a consumer's bill. We can produce electricity at this dam at the shoals for about four-tenths of a cent per kilowatt. The modern steam plant, built in that same neighborhood, to-day produces its electricity at five or six tenths of a cent per kilowatt. That is one-fifth of a cent per kilowatt, and when we try to translate that amount of money into a consumer's bill who pays 5 or 6 cents a kilowatt we find there is no possibility of giving him the benefit of any great saving.

The high cost of that electricity to the consumer lies in the charges made for the distribution of it. If the city of Birmingham, Ala., which is built practically upon a coal mine, desires to give municipal electricity to its people, it would be cheaper under present conditions for that city to build a great steam plant within the limits of the city of Birmingham than it would be to transmit electricity from Muscle Shoals, 75 or 80 miles away. It could do it and produce it for as little money. It has had that opportunity from the very beginnings of the city. It has tried it. It does not continue it. The cost of the distribution which has to take place from the time it leaves the plant until it reaches the user is the great element of cost. The distribution would be common to both plants.

There are a number of things in the report to which I wish to call the attention of the Senate. It gives the power to this board to sell electricity to States or municipalities, corporations or partnerships, or individuals, according to the policies that are set forth, for a period of 10 years. But under section 11 it is provided that if any city, county, municipality, or other public or cooperative organization not organized or doing business for profit but for the purpose of supplying electricity to its own citizens desires, it shall have the opportunity of purchasing this electricity for 15 years.

That is simply an instance of the effort here to distribute electricity in competition with the present electric power companies by companies who shall not make a profit, and in that particular be more able to compete with the existing companies.

If it should so happen—and it is a thing I think the Members of the Senate should take into consideration—that municipalities did not require all this power, then this company is authorized to sell it to corporations and individuals who are engaged in the power business; but in section 11 it is provided that it can not be sold except under Federal regulation; that is, that the rates to be charged must be approved by the Federal Power Commission. The effect of that provision is this: Every one of those States has a State regulatory board; but the conference report sets aside every State's right of regulating their own charges for electricity, and, in spite of their laws, it puts it into the hands of the Federal Power Commission. I wonder what the men in this body, who seem to be so desirous of maintaining State rights in every particular, think of a provision of that kind which sweeps aside the State's opportunity to regulate its own rates and puts the power rates of this institution in the hands of the Federal Power Commission.

As I said in the beginning, it is not my purpose to try in any way to prevent a vote upon this measure, but I do wish to call the attention of the Senate to the fertilizer provisions which have been put into the conference report and to say to the Senate that we have not yet heard from the people of the country upon those fertilizer provisions. Neither from those producers who will be in competition with this Government operation at Muscle Shoals nor from those who shall be the consumers of the fertilizer that is made in this country. I think they should be given time to give their views upon the subject.

There are two horns to the fertilizer dilemma here. In the course of a colloquy this afternoon between the Senator from Nebraska [Mr. NORRIS] and the Senator from New York [Mr. COPELAND] I understood the Senator from Nebraska to say that the change in the report now indicated that this Government corporation would not be in the fertilizer business but would be making nitrogen which could be sold to the fertilizer companies. Mr. President, have we forgotten the thousands of pages of speeches made in this body, where the Members have said that the great thing to be gained by Muscle Shoals was to make cheaper fertilizer for the farmers?

In this report, under that construction, there is not one big dollar of advantage to the farmers of the country. It provides for the manufacture of nitrogen. It is only for the manufacture of nitrogen, that is an element which goes to the extent of less than 10 per cent into a ton of fertilizer. There is nitrogen enough to-day to furnish all the commercial mixed fertilizer that is sold in the country. If all we are going to do is to create more nitrogen than we have to-day, the only savings to the farmers who use commercial fertilizer is going to be in the slight reduction of cost which these Government experiments may be able to bring about in the production of that 10 per cent of the ton.

If the other construction of the fertilizer provision that has been put upon it in this body is the true construction, and we are going to add to nitrogen the other ingredients that go into fertilizer, then we do not satisfy the people that make fertilizer in the country any more than the first conference report satisfied them, because it leaves this Government institution in competition with them.

It was the hope of those of us who have sat through the hearings before the committees that out of this Muscle Shoals there might come the creation of a new type of fertilizer that should be possible of distribution to the farmers of the country in ever-decreasing cost, a concentrated type which must be studied and fixed and provided for use upon the farm. But there is not a single thing in the bill under the interpretation that has been given to it on the floor of the Senate to-night that would add to the value of or reduce the cost of the fertilizers which are going to be made at Muscle Shoals for the farmers of the country.

Mr. McKELLAR. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Kentucky yield to the Senator from Tennessee?

Mr. SACKETT. I yield for a question.

Mr. McKELLAR. I want to ask the Senator if in any of the hearings before the committee the question of the inclusion in the bill of the Cove Creek Dam was ever considered by any witness appearing before the committee?

Mr. SACKETT. Yes; I think there was. I recollect that there was. It will be noticed that in the Air Nitrates Corporation bid one of the provisions was that they should have the opportunity of building the Cove Creek Dam.

Mr. McKELLAR. That was the bid, but were there any hearings about it?

Mr. SACKETT. There were hearings about it, quite extensive hearings. In the event that they did not wish to build it, then it was a condition precedent to the acceptance of their bid that the Government should build it. The Cove Creek Dam site is 350 miles from Muscle Shoals. Muscle Shoals power can be transmitted economically not more than 300 miles. Cove Creek Dam, 350 miles farther east, is 150 miles from the center of the industrial district of North Carolina, and when Muscle Shoals is tied up with a provision that Cove Creek Dam must be built, the only conclusion I could reach after studying the situation was—and it was backed by the fact of an existing contract selling to the Union Carbide Co. half the power of Muscle Shoals because they could not use it—that they wanted Cove Creek Dam because it was 150 miles from the industrial situation on the eastern slope to which point power could be economically transmitted.

There are things in the bill that must be thoroughly understood before an intelligent vote can be cast.

Mr. McKELLAR. Then all of this power or current would be transmitted to North Carolina under the terms of the bill?

Mr. SACKETT. The power from the Cove Creek Dam would be within transmission distance of the industrial section on that slope of the Alleghenies.

Mr. NORRIS. Mr. President, I make the point of order that the Senator from Kentucky has lost the floor by yielding to the Senator from Tennessee not for the purpose of asking a question but for the purpose of making a statement.

Mr. SACKETT. I think the Senator asked me a question.

Mr. NORRIS. But the last interruption was not a question, and the Senator yielded the floor.

Mr. SACKETT. I did not yield for a statement; I yielded for a question.

The PRESIDING OFFICER. The point of order is not well taken. The Senator from Kentucky will proceed.

Mr. SACKETT. Mr. President, I want to say to the Senator from Nebraska that I am not finding fault with his advocacy of this measure; I am not trying in any way to prevent a vote on it; I am simply trying to analyze the joint resolution in order that Senators may know exactly what they are to vote upon.

I wish to say to the Senators from Alabama that I do not know whether they have thoroughly read the provisions as to

the operation of the Muscle Shoals fertilizer plants. There will be found in section 5, paragraph (e) this provision:

The board shall manufacture fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen.

There is no requirement in the conference report that the public corporation to be created shall operate at any time nitrate plant No. 2 at Muscle Shoals. The option is given to it either to operate the present plants or to build plants for the production of atmospheric nitrogen by new and different processes. I think the argument made by the Senator from Nebraska at the present session of the Senate can not be refuted when he told us that plant No. 2, adapted to the cyanamide process, is now out of date; and that if the production of atmospheric nitrogen were to be undertaken by business men who knew the job, it would be produced under the synthetic process.

In the conference report the option is given either to run the existing plants or to build new plants for the production of nitrogen by the synthetic process. Every scientist who has come before the committee in whose judgment credence could be placed has said without equivocation that the nitrogen of the future would be made under the synthetic process; and under this joint resolution I venture the prediction that it will all be made in that way, and that plant No. 2 and plant No. 1 and all the plants to-day at Muscle Shoals for nitrogen production will lie idle, because no business organization would feel, unless required by substantive law, that it was right for it to spend the millions that will be necessary to rehabilitate those plants and put them in operation for the manufacture of nitrogen that could be used satisfactorily in fertilizer.

Furthermore, I want to say to the Senators from Alabama that one of the great hopes of the people near Muscle Shoals, as told to me in conversations, was that a great industrial community might rise in that neighborhood; but under the joint resolution as now framed by the conferees, which requires the electricity to be produced there to be distributed equally among the States and to be sold first to municipalities and counties and aggregations of individuals in cooperative enterprises, there will be almost no chance of building up an industrial community to be served by the great power plants of Muscle Shoals which could furnish power to run the mills that might employ the citizens of that district. That is something that will be heard from in the future, if it is not heard to-day.

There are many reasons why this conference report will not serve the best interests of the growing industrial section of the South. If the Government is going to make electricity cheaper than the price for which distributed to-day, there will be required additional drains upon the Treasury of the United States, for the reason that the cost of production in the Muscle Shoals plant can not be materially less than the cost of production in any competing plants. The only way in which a saving can come to the people of the country must be from the cost of distribution. If the cost of distribution is too high, it can be met by competition in the cost of distribution from any steam plant built at any crossroads in the great industrial centers of the South.

There is an opportunity in that direction alone materially to reduce the cost of electricity to the people of that section. That can be done without the Government operating Muscle Shoals or Cove Creek Dam or tying up industrially in public ownership every dam that lies between Cove Creek and Muscle Shoals, and compelling private initiative to work between the jaws of the great Government juggernaut which this joint resolution builds against the development of that Valley.

I have spoken as I have in the hope that it will cause some of the Senators more carefully to read the provisions of the conference report, and to realize that we are embarking upon a new scheme of Government ownership and operation of public utilities to which this country has not been accustomed and which does not, in truth, hold out to the people of any section the promise that they will be benefited. It does encourage a fear in the people of the country as a whole that this dip into the Treasury of the United States must be reflected in the taxes of every man, woman, and child.

Mr. President, I do not speak in behalf of any power interest or in behalf of any fertilizer interest. I have not seen a single man connected with either of those industries. I simply read the provisions of the joint resolution as presented in the conference report and judge it by the experience I have had in examining and hearing examined the witnesses who have appeared before the Senate committee in exposition of this subject and to set forth their views.

I see the force of many arguments which have been made; I have tried to treat this as a great governmental question, with a view of determining in my own mind whether it would be wise for the Government to go into the business to the extent of some $60,000,000 in addition to what we have already spent at Muscle Shoals in time of emergency incident to the war, or whether we shall with good foresight turn Muscle Shoals over to the individual who will pay the highest for the privilege of using the power plants at Muscle Shoals. We can employ the money which thus accrues to the Government to develop a new chemical industry in the production of concentrated fertilizer, which holds out the only hope of increased crops and cheaper production to the farmers of the United States.

Mr. President, I am ready now to close. I hope I have not taken more time than a pure exposition of the joint resolution would warrant; but I hope that the Senate will realize before it acts that it has before it a novel proposal which has only been on the desk since 12 o'clock to-day and of which the country has not as yet heard.

[TO BE CONTINUED]

HOUSE OF REPRESENTATIVES

THURSDAY, *May 24, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Out of the dark of the night have come the radiance and the promise of the day. We praise Thee, O Lord, for Thou art the source of all our earthly hopes. Thy plans unfold like the springtime blossoms that reveal hidden beauty and wonder. Hold us to patient service, so that conscience may never censure. As we look up, aspire, and resolve, let us count it grandly true that these are not in vain. They lift us up from the maze of just things, and from where the throng is not dense and the touch is not rough. Come, Father of love, to all our homes, and keep them in tune with the things that are divinely beautiful. Then shall we come and go like happy children playing among the flowers. Bless us with a living, glowing joy that shall never fade away. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment bills and joint resolutions of the House of the following titles:

H. R. 1406. An act granting six months' pay to Lucy B. Knox;
H. R. 1616. An act for the relief of Carl C. Back;
H. R. 1931. An act for the relief of Daniel Mangan;
H. R. 2272. An act for the relief of William Morin;
H. R. 2472. An act for the relief of Emile Genireux;
H. R. 2477. An act for the relief of Joseph S. Carroll;
H. R. 2494. An act granting six months' pay to Vincentia V. Irwin;
H. R. 3971. An act for the relief of the owners of the schooner *William Melbourne;*
H. R. 4652. An act for the relief of Charlie R. Pate;
H. R. 4926. An act for the relief of the Pocahontas Fuel Co. (Inc.);
H. R. 4954. An act for the relief of Thomas Purdell;
H. R. 5910. An act for the relief of Ralph Ole Wright and Varina Belle Wright;
H. R. 6049. An act to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective departments;
H. R. 7268. An act for the relief of John Hervey;
H. R. 7708. An act for the relief of John M. Brown;
H. R. 8742. An act to authorize the Secretary of War to convey to the city of Baton Rouge, La., a portion of the Baton Rouge National Cemetery for use as a public street;
H. R. 9380. An act for the relief of Frank E. Shults;
H. R. 10649. An act providing for the transfer of a portion of the military reservation known as Camp Sherman, Ohio, to the Department of Justice;
H. R. 10702. An act for the relief of Elbert L. Cox;
H. R. 11471. An act extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas;

H. R. 11917. An act granting the consent of Congress to the county of Cook, State of Illinois, to widen, maintain, and operate the existing bridge across the Little Calumet River in Cook County, State of Illinois;

H. R. 11950. An act to legalize a pier and wharf in Deer Island thoroughfare on the notherly side at the southeast end of Buckmaster Neck at the town of Stonington, Me.;

H. R. 11980. An act granting the consent of Congress to the Fisher Lumber Corporation to construct, maintain, and operate a railroad bridge across the Tensas River in Louisiana;

H. R. 12031. An act to extend the time for commencing and completing the construction of a bridge across the Rio Grande at or near a point two miles south of the town of Tornillo, Tex.;

H. R. 12038. An act to authorize the acquisition of certain patented land adjoining the Yosemite National Park boundary by exchange, and for other purposes;

H. R. 12063. An act for the relief of the widow of Surg. Mervin W. Glover, United States Public Health Service, deceased;

H. R. 12100. An act to amend the act entitled "An act granting the consent of Congress to the Gateway Bridge Co. for construction of a bridge across the Rio Grande between Brownsville, Tex., and Matamoros, Mexico," approved February 26, 1926;

H. R. 12235. An act authorizing B. F. Peek, G. A. Shallberg, and C. L. Josephson, of Moline, Ill.; J. W. Bettendorf, A. J. Russell, and J. L. Hecht, of Bettendorf and Davenport, Iowa, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River, at or near Tenth Street in Bettendorf, State of Iowa;

H. R. 12571. An act granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a toll bridge across the Cumberland River at or near Iuka, Ky.;

H. R. 12623. An act granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Sabine River, at or near Starks, La.;

H. R. 12624. An act to amend section 17 of the act of June 10, 1922, entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended;

H. R. 12694. An act authorizing the Secretary of the Navy to provide an escort for the bodies of deceased officers, enlisted men, and nurses;

H. R. 12706. An act for the relief of the town of Springdale, Utah;

H. R. 12806. An act authorizing J. H. Harvell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across New River at or near McCreery, Raleigh County, W. Va.;

H. R. 12894. An act to extend the times for commencing and completing the construction of an overhead viaduct across the Mahoning River at or near Niles, Ohio;

H. R. 12913. An act to extend the times for commencing and completing the construction of a bridge across the Allegheny River at or near the borough of Eldred, McKean County, Pa.;

H. R. 12953. An act to authorize the Board of Managers of the National Home for Disabled Volunteer Soldiers to accept title to the State camp for veterans at Bath, N. Y.;

H. R. 13069. An act granting the consent of Congress to the State of Minnesota to construct, maintain, and operate a free highway bridge across the Mississippi River at or near Aitkin, Minn.;

H. R. 13141. An act authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn.;

H. R. 13143. An act to adjust the compensation of certain employees in the Customs Service;

H. R. 13380. An act authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark.;

H. J. Res. 47. Joint resolution for the relief of Mary M. Tilghman, former widow of Sergt. Frederick Coleman, deceased, United States Marine Corps;

H. J. Res. 77. Joint resolution concerning lands and property devised to the Government of the United States of America by Wesley Jordan, deceased, late of the township of Richland, county of Fairfield, and State of Ohio; and

H. J. Res. 292. Joint resolution authorizing the President to invite the States of the Union and foreign countries to participate in the International Petroleum Exposition at Tulsa, Okla., to begin October 20, 1928.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House of Representatives was requested:

S. 1142. An act amending the act of January 25, 1917 (39 Stat. L. 868), and other acts relating to the Yuma auxiliary project, Arizona;

S. 1547. An act for the relief of Johns-Manville Corporation;

S. 1831. An act to authorize the President to class as secret certain material, apparatus, or equipment for military and naval use, and for other purposes;

S. 1958. An act for the relief of William J. Cocke;

S. 2462. An act for the relief of John F. Walker;

S. 2505. An act granting increase of pensions under the general law to soldiers and sailors of the Regular Army and Navy and their dependents, for disability incurred in service in line of duty, and authorizing that the records of the War and Navy Departments be accepted as to incurrence of a disability in service in line of duty;

S. 2519. An act for the relief of Robert W. Miller;

S. 2751. An act to amend section 213, act of March 4, 1909 (Criminal Code, title 18, sec. 336, U. S. C.), affixing penalties for use of mails in connection with fraudulent devices and lottery paraphernalia;

S. 2989. An act for the relief of John B. Moss;

S. 3088. An act for the relief of Donald M. Davidson;

S. 3136. An act creating the Roswell land district, establishing a land office at Roswell, N. Mex., and for other purposes;

S. 3258. An act to amend section 300 of the World War veterans' act, 1924, as amended;

S. 3453. An act to confer jurisdiction upon the Court of Claims to hear and determine the claim of Clara Percy;

S. 3484. An act for the conservation of rainfall in the United States;

S. 3569. An act to equalize the pay of certain classes of officers of the Regular Army;

S. 3632. An act for the relief of Commodore J. M. Moore, United States Coast Guard, retired;

S. 3637. An act to provide Federal cooperation with the States in devising means to protect valuable shore lands from damaging erosions, and for other purposes;

S. 3736. An act for the relief of soldiers who were discharged from the Army during the World War because of misrepresentation of age;

S. 4315. An act authorizing and directing the Secretary of War to sell 3,304.8 square feet of the Fort Brown Military Reservation, Brownsville, Tex., to the Gateway Bridge Co.;

S. 4376. An act for the relief of Harry M. King;

S. 4385. An act to establish the Teton National Park in the State of South Dakota, and for other purposes;

S. 4450. An act authorizing the Ripley Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ripley, Ohio;

S. 4451. An act to amend the act entitled "An act authorizing Roy Clippinger, Ulys Pyle, Edgar Leathers, Groves K. Flescher, Carmen Flescher, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Wabash River at or near McGregors Ferry in White County, Ill.," approved May 1, 1928;

S. 4456. An act granting the consent of Congress to the boards of county commissioners of the counties of Escambia and Santa Rosa, in the State of Florida, to construct, maintain, and operate a free bridge across Santa Rosa Sound in the State of Florida;

S. 4457. An act authorizing the Northwest Florida Corporation, its successors and assigns, to construct, maintain, and operate a bridge across Perdido Bay at or near Innerarity Point, in Escambia County, Fla., to the mainland of Baldwin County, Ala.;

S. 4461. An act to provide for the policing of military roads leading out of the District of Columbia;

S. 4474. An act authorizing the South Carolina and the Georgia State Highway Departments to construct, maintain, and operate a toll bridge across the Savannah River at or near Burtons Ferry, near Sylvania, Ga.;

S. 4487. An act authorizing the Uvalda Booster Club, its successors and assigns, to construct, maintain, and operate a bridge across the Altamaha River at or near Towns Bluff Ferry connecting Montgomery and Jeff Davis Counties, Ga.;

S. 4504. An act granting the consent of Congress to the State of Arkansas, through its State highway department, to construct, maintain, and operate a toll bridge across White River at or near Augusta, Ark.;

S. J. Res. 80. Joint resolution authorizing an appropriation for bank protection for the control of floods and the prevention of erosion of the Missouri River;

S. J. Res. 91. Joint resolution authorizing an appropriation for bank protection for the control of floods and the prevention of erosion of the Missouri River at or near the town of Yankton, in the State of South Dakota; and

S. J. Res. 161. Joint resolution authorizing the President to invite representatives of foreign governments to attend an international aeronautical conference on civil aeronautics in Washington on December 12, 13, and 14, 1928.

The message further announced that the Senate agrees to the amendment of the House of Representatives to the bill S. 3593, entitled "An act to authorize the leasing or sale of lands reserved for agency, schools, and other purposes on the Fort Peck Indian Reservation, Mont.

The message also announced that the Senate had passed with amendments, in which the concurrence of the House was requested, bills of the House of the following titles:

H. R. 6685. An act to regulate the employment of minors within the District of Columbia;

H. R. 6687. An act to change the title of the United States Court of Customs Appeals, and for other purposes;

H. R. 9194. An act authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle between the Sioux and Pawnee Indian Tribes in Hitchcock County, Nebr., fought in the year 1873;

H. R. 10869. An act amending section 764 of Subchapter XII, fraternal beneficial associations, of the Code of Law for the District of Columbia;

H. R. 12877. An act authorizing the Los Olmos International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande River at or near Weslaco, Tex.;

H. R. 13383. An act to provide for a five-year construction and maintenance program for the United States Bureau of Fisheries; and

H. R. 13563. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

ADJUSTMENT OF THE NORTHERN PACIFIC LAND GRANTS

Mr. SINNOTT. Mr. Speaker, by direction of the Committee on Public Lands I ask unanimous consent for the present consideration of the joint resolution (H. J. Res. 318) amending the joint resolution entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjustment of the Northern Pacific land grants, and for other purposes," approved June 5, 1924 (43 Stat. 461), as amended by the joint resolution approved March 3, 1927 (44 Stat. 1405).

The Clerk read the joint resolution, as follows:

Resolved, etc., That the joint resolution entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjustment of the Northern Pacific land grants, and for other purposes," approved June 5, 1924, as amended by joint resolution approved March 3, 1927, be, and the same is hereby, amended as follows:

"That wherein said joint resolution approved June 5, 1924, as amended by the said joint resolution approved March 3, 1927, there appears the word and figures June 1, 1928, the same shall be amended to read June 30, 1929."

SEC. 2. That the joint committee provided for in the above resolution approved June 5, 1924, shall have leave to report at any time by bill or otherwise.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

LETTER FROM NATIONAL AUTOMOBILE CHAMBER OF COMMERCE

Mr. DICKINSON of Missouri. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a letter from the National Automobile Chamber of Commerce, by its president, Roy D. Chapin, calling upon the car manufacturers to fulfill signed pledge to reduce delivered price of motor vehicles by amount of tax, if proposed repeal measure is passed, as contained in the revenue bill; in other words, to strike the tax from the delivered price of all motor cars sold.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

The letter is as follows:

NATIONAL AUTOMOBILE CHAMBER OF COMMERCE,
New York, May 1, 1928.

PRESIDENT CHAPIN CALLS UPON CAR MANUFACTURERS TO FULFILL PLEDGE TO REDUCE DELIVERED PRICE OF MOTOR VEHICLES BY AMOUNT OF TAX IF PROPOSED REPEAL MEASURE IS PASSED

To Members:

1. By unanimous vote the members of the Senate Finance Committee have recommended repeal of the motor excise taxes. It is hoped the measure will be passed upon by the Senate within the next 10 days

2. During the discussion which preceded the committee vote, the charge was made by Undersecretary of the Treasury Ogden Mills that the industry would absorb the tax reduction and that the consumers would not receive any benefit in the form of a lowered delivered price for cars or busses.

3. Answering this statement before the committee, the undersigned, speaking as president of the National Automobile Chamber of Commerce, said: "I wish to reiterate the signed pledge of the entire motor industry that if this tax is repealed it will immediately be deducted from the delivered price of all motor cars."

4. The pledge referred to was made in the form of individual letters signed by the presidents of all the motor-car manufacturing companies of the United States. These letters were filed with the Ways and Means Committee of the House and are a matter of public record.

5. The Finance Committee accepted my statement, as is demonstrated by its vote.

6. This bulletin is sent you as a reminder of your obligation (your letter filed with committee) and with the request that, immediately upon word that the tax has been repealed, you notify all your representatives to strike the tax from the delivered price of all cars sold.

NATIONAL AUTOMOBILE CHAMBER OF COMMERCE,
ROY D. CHAPIN, *President.*
H. H. RICE (*General Motors*), *Chairman,*
A. R. ERSKINE (*Studebaker*),
GEORGE M. GRAHAM (*Willys-Overland*),
F. J. HAYNES (*Dodge Bros.*),
ALVAN MACAULEY (*Packard*),
PYKE JOHNSON, *Secretary,*
Taxation Committee.

CONSTRUCTION AT MILITARY POSTS

Mr. JAMES. Mr. Speaker, I call up the conference report on the bill (H. R. 11134) to authorize appropriations for construction at military posts, and for other purposes.

The Clerk read the conference report.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11134) to authorize appropriations for construction at military posts and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 2, 3, 4, and 5, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: Strike out the figures "$12,989,284" and insert in lieu thereof "$13,268,284"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"That there is hereby authorized to be appropriated not to exceed $6,499,500, to be expended for the construction and installation at military posts of such technical buildings and utilities and appurtenances thereto as may be necessary, as follows:

"Albrook Field, Canal Zone: Hangars, $200,000; Air Corps shops and warehouse, $126,000; headquarters and operations building, $40,000; radio, parachute, and armament building, $25,000; gasoline and oil storage, $75,000; paint, oil, and dope warehouse, $5,000; improvement of landing field, $600,000.

"France Field, Canal Zone: Hangars, $80,000; operations building, $30,000; photo, radio, parachute, and armament buildings, $61,000; air-depot shops, $160,000; air-depot warehouse, $200,000; improvement of landing field, $103,000.

"Hawaiian Department, Wheeler Field: Hangars, $240,000; Air Corps field warehouse, $45,000; Air Corps field shops, $81,000; headquarters and operations building, $40,000; photo,

radio, parachute, and armament buildings, $61,000; gasoline and oil storage, $15,000; paint, oil, and dope warehouse, $5,000; improvement landing field, $110,000.

"Bolling Field, D. C.: Hangars, $160,000; gasoline and oil storage, $12,000; paint, oil, and dope warehouse, $5,000; improvement landing field, $100,000.

"Chanute Field, Ill.: Hangars, $120,000; Air Corps shops and warehouse, $126,000; headquarters and operations building, $40,000; photo, radio, parachute, and armament buildings, $61,000; school building, $80,000; gasoline and oil storage, $10,000; paint, oil, and dope warehouse, $5,000.

"Crissy Field, Calif.: Hangar, $40,000; photo building, $36,000; gasoline and oil storage, $5,000; paint, oil, and dope warehouse, $5,000.

"Duncan Field, Tex.: Hangars, $80,000; air-depot shops, $243,000.

"Fairfield air depot, Ohio: Air depot shops, $243,000.

"Fort Sam Houston, Tex.: Hangar, $40,000; Air Corps field shops and warehouse, $60,000; headquarters building, $20,000; photo, radio, parachute, and armament buildings, $61,000; gasoline and oil storage, $5,000; improvement landing field, $20,000.

"Marshall Field, Kans.: Hangar, $40,000; Air Corps field shops and warehouse, $60,000; headquarters building, $20,000; photo, radio, parachute, and armament buildings, $61,000; gasoline and oil storage, $5,000; paint, oil, and dope warehouse, $5,000; improvement of landing field, $15,000.

"Maxwell Field, Ala.: Gasoline and oil storage, $5,000; paint, oil, and dope warehouse, $5,000; improvement of landing field, $13,000.

"Mitchel Field, N. Y.: Hangars, $80,000; photo building, $36,000; gasoline and oil storage, $10,000; paint, oil, and dope warehouse, $5,000.

"Post Field, Okla.: Hangar, $40,000; Air Corps field shops and warehouse, $60,000; headquarters building, $20,000; radio, parachute, and armament buildings, $25,000; gasoline and oil storage, $5,000; paint, oil, and dope warehouse, $5,000.

"Rockwell Field, Calif.: Hangars, $160,000; Air Corps warehouse, $45,000; headquarters and operations building, $40,000; radio, parachute, and armament buildings, $25,000; gasoline and oil storage, $10,000; paint, oil, and dope warehouse, $5,000.

"Rockwell air depot, Rockwell Field, Calif.: Air-depot shops, $243,000; air-depot warehouses, $500,000.

"San Antonio Primary Training School, San Antonio, Tex.: Hangars, $440,000; Air Corps shops and warehouse, $126,000; headquarters and operations building, $40,000; wing headquarters building, $60,000; photo, radio, parachute, and armament buildings, $61,000; school building, $40,000; gasoline and oil storage, $9,500; paint, oil, and dope warehouse, $5,000; improvement of landing field, $150,000.

"Selfridge Field, Mich.: Air Corps warehouse, $45,000; photo building, $36,000; gasoline and oil storage, $10,000; paint, oil, and dope warehouse, $5,000; improvement of landing field, $50,000."

And the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"That the Secretary of War is hereby authorized to cause condemnation proceedings to be instituted for the purpose of acquiring certain tracts of land in the vicinity of Fort Kamehameha Reservation, Territory of Hawaii, hereinafter described, for use as a flying field, and that a sum not exceeding $1,145,000 is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the acquisition of the fee-simple title to said land either by purchase or condemnation, to wit: That portion of the Queen Emma and Damon Estates lying directly north of and adjoining Fort Kamehameha Reservation, east of the Fort Kamehameha-Puuloa Junction Road, south of the plantation road just north of Loco-Lelepaua and extending to the Rodgers Airport and Keehii Lagoon on the east consisting approximately of 1,434 acres, at a cost not exceeding $420,000, and also a portion of the Halawa district consisting of about 862 acres and immediately adjoining the Queen Emma and Damon Estates at a cost not exceeding $725,000."

And the Senate agree to the same.

JOHN M. MORIN,
W. FRANK JAMES,
JOHN J. MCSWAIN,
Managers on the part of the House.

DAVID A. REED,
FRANK L. GREENE,
DUNCAN U. FLETCHER,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11134) to authorize appropriations for construction at military posts, and for other purposes, submit the following written statement explaining the effect of the action agreed on by the conference committee and submitted in the accompanying conference report:

On No. 1: Strikes out the total carried in the bill and substitutes the total brought about by the changes agreed to by the conference committee.

On No. 2: This amendment provides for officers' quarters and noncommissioned officers' quarters at Fort Douglas, Utah, in the amounts of $75,000 and $54,000, respectively.

On No. 3: This amendment adds an additional $48,000 to the bill for the construction of noncommissioned officers' quarters at Camp McClellan, Ala.

On No. 4: This amendment merely changes the total authorized for officers' quarters at Selfridge Field, Mich., so that $250,000 will be authorized for barracks and $50,000 for completion of the hospital.

On No. 5: This amendment provides an authorization for $126,334 to complete the new cadet mess hall, etc., at West Point. This authorization was passed by the House in H. R. 11623 on May 16, 1928.

On amendment No. 6: This amendment brings into H. R. 11134 the provisions of H. R. 12688, which passed the House on April 16, 1928. It provides for the construction of technical buildings and utilities required for the development of the five-year Air Corps program.

On amendment No. 7: This amendment brings into H. R. 11134 the provisions of H. R. 11847, which passed the House on May 12, 1928. It provides for the acquisition of portions of the Queen Emma and Damon estates and a portion of the Halawa district in the vicinity of Fort Kamehameha, Hawaii.

As agreed to by the conference committee the measure contains a total authorization of $20,912,784, made up of $13,268,284 in the provisions of H. R. 11134 proper, $6,499,500 in H. R. 12688, made a part of H. R. 11134, and $1,145,000 in H. R. 11847, made a part of H. R. 11134.

JOHN M. MORIN,
W. FRANK JAMES,
JOHN J. MCSWAIN,
Managers on the part of the House.

Mr. BYRNS. Mr. Speaker, may I ask the gentleman if this is a unanimous report of the conferees?

Mr. JAMES. Yes.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

LOAN OF AERONAUTICAL EQUIPMENT

Mr. JAMES. Mr. Speaker, I call up the conference report on the bill (S. 1822) to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions.

The Clerk read the conference report.

The conference report and accompanying statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 1822 having met, after full and free conference have agreed to recommend and do recommend to their respective House as follows:

Amendment numbered 1: That the Senate recede from its disagreement to the amendment of the House numbered 1, and agree to the same.

W. FRANK JAMES,
J. MAYHEW WAINWRIGHT,
JOHN J. MCSWAIN,
Managers on the part of the House.

DAVID A. REED,
HIRAM BINGHAM,
DUNCAN U. FLETCHER,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill S. 1822, an act to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions, submit the following written statement explaining the effect of the action agreed on by the con-

ference committee and submitted in the accompanying conference report:

There was but one amendment in disagreement, that of the House to the Senate measure, striking out the word "delivery" and inserting the words "transfer or loan," in the proviso protecting the Government from loss, so that the proviso as agreed to by the conference committee will read: "*Provided further*, That no expense shall be caused the United States Government by the transfer or loan or return of said property."

W. FRANK JAMES,
J. MAYHEW WAINWRIGHT,
JOHN J. MCSWAIN,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

COL. WILLIAM L. MARLIN AND THE VETERANS' BUREAU

Mr. THOMPSON. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD on the subject of legislation with respect to the Veterans' Bureau.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. THOMPSON. Mr. Speaker, I wish to rise, as it were, to a question of personal privilege. In dealing with the Cleveland Veterans' Bureau, of which Col. William L. Marlin is regional manager, I have had considerable trouble during my terms in Congress. I have had numerous cases in the past 10 years and I have always endeavored to be kindly and sympathetic with the ex-service man when he applied to me for help, but at no time did I go outside of my office to solicit veterans. All the cases that have come to me, and they have been numerous, have come voluntarily. I did the best I could for them.

The Julius C. Rothman case, C-641456, of which Dr. C. O. Beardsley, the commander of the American Legion Post of Ottawa, Ohio, had a statement of protest in the CONGRESSIONAL RECORD on December 15, 1926; the Clarence R. Kaser case, C-157888, of Edgerton, Ohio, with whom I have had dealings for many years and who has been subjected to a set of snoopers; the Herman J. Kraegel case of Holgate, Ohio, C-465051; the Raymond C. Giesige case, C-145872; the S. J. Joost case, of Holgate, Ohio, and numerous other cases which I could mention, form a list of indictments against the official record of the Veterans' Bureau at Cleveland under the management of Col. William L. Marlin.

These men had appealed to me for relief and some were not receiving anything from a supposedly grateful Government. They had used every resource at their command to receive recognition from the bureau at Cleveland and in each instance had been turned down as not eligible for compensation. These veterans and many others came to me personally to ask for assistance in securing compensation for the injuries they had suffered during the late war. After careful investigation I found every case worthy of the best the Government has to give to wounded and disabled men, and carefully brought all facts in these cases to the authorities of the Veterans' Bureau at Cleveland, which owes its existence to the needs of these men and not to the needs of arbitrary and ambitious officers of the regional office at Cleveland.

I worked patiently for several years without result in some of the most worthy cases, and fully believing these cases to come within the law, I became aggressive and made insistent demands on the regional manager at Cleveland to give these men, not charity, but such compensation as they are entitled to under the laws passed from time to time by Congress. This action on my part seems to have aroused the ire of William L. Marlin and he has shown this to me repeatedly in discourteous and curt letters of refusal to grant my pleas. I now have the proof. I have received the pronounced enmity and open hostility of the regional manager at Cleveland in my efforts on behalf of these men, which I consider part of my duty as their Representative in Congress. Personally I have nothing to gain, but I do have the greatest sympathy for these veterans and their families and have cast my vote in this House time and time again for appropriations vast enough to cover the needs of every veteran for disabilities received in the line of duty.

Just why officials in charge of the regional offices make special efforts to deny these men compensation is hard to understand. They make the burden of proof on these soldiers beyond all reason, and in many cases badly disabled men are unable to receive any measure of relief for the reason that they can not assemble proof demanded. The veteran himself may be living proof, physically and mentally, of the ills he has suffered and yet on some trivial technicality he is denied every right that the Government wants him to have.

I think it is time some of these officials were called upon for an accounting. After all proof has been produced and accepted the veterans are subject to call for physical examination at any time, always with the view of having their compensation cut down, rather than increased. If veterans are too ill or too badly disabled to appear when called, nurses or snoopers are sent to the veterans' places of residence at Government expense, and following these visits, many times, compensation is arbitrarily cut down or off. I frequently fight for recognition of cases of this kind where I know the veterans to be worthy of every cent they get from the Government.

Persons who uphold the actions of regional officials will point out the many splendid hospitals and homes that this Government has established in an effort to do justice to ex-service men. This is all true, and it would seem that every soldier who fought under the Stars and Stripes who is now disabled and unable to compete in the duties of the world, should have every possible care; however, if this matter is carefully gone into, it will be discovered that these spacious institutions seem to be more in the interest of officials and attendants in charge than for the common soldier. I have repeatedly had veterans tell me they would rather die than to be returned to these places for physical examination and so-called "treatment."

If, for these reasons, Mr. Marlin chooses to oppose me for Congress and possibly retire me from Congress, I am willing to meet the issue, but not until the truth is known about his official acts.

Finally, I wish to protest against this man's pernicious political activity. He has gone so far as to stir up strife at my home town of Defiance by the removal of a captain of a company of the Ohio National Guard over which he is a colonel, a year or two ago, because the captain would not bow the knee to this dictatorial Colonel Marlin in his treatment of ex-service men of my vicinity.

He entered the local American Legion camp at Defiance one day when there was not a quorum present, and had a resolution passed indorsing his action on a certain case in which I had been active.

He has threatened to put a force of men in the coming campaign for the nomination to defeat me at the primary in August. He has an ex-service man as a candidate for nomination now, although he may deny it. It is nothing for him to misrepresent to his superior officers of the Veterans' Bureau concerning his political activities. I felt this activity in the last campaign and knew something was wrong, but I did not suppose that a man under civil service and a regional manager of a Veterans' Bureau office would stoop to seek to defeat a Member of Congress for being loyal, as he sees it, to the ex-service men who so badly need attention.

He has now embarked on the political seas of activity, regardless of his civil service status, and if he defeats me for the nomination, it can be attributed largely to the arbitrary methods and militaristic rule of the regional office at Cleveland. The employees are all supposed to do his will and execute his orders. He is a colonel and his orders must be obeyed, and he does not seem to have much sympathy for ex-service men or civilians, or even Congressmen. I understand he made the boast once upon a time that letters from Senators or Congressmen did not receive any special favor from him, that it was just as well for a veteran not to have senatorial or congressional influence behind him.

Since when has the regional manager at Cleveland become so mighty that he can afford to build up a political machine in his district with his army of employees, not only to defeat Congressmen whom he dislikes but also to show ex-service men in his district that he is "the boss" and that they have no claims which he is bound to consider. He is arbitrary, dictatorial, dangerous, and unsympathetic. When the United States Veterans' Bureau was decentralized I voted for such action, deferring to the wishes and arguments of the American Legion somewhat against my better judgment. I doubted at the time that it was a wise move, and I am forced to say that subsequent events have not proved to me that I was wrong.

Before there was one fountainhead of administration and action; after there was established many and various branch offices, appeal boards, and so forth, throughout the country, each with its quota of authority and power. It became extremely difficult to force an issue at any one place on any one claim or to follow a case through the channels and find out exactly where there was any distinct authority to hand out swift justice.

After decentralization in line with a desire for economical administration—which was possibly brought about by the greatly increased overhead expense of the added regional of-

fices—a strict policy came into existence which, in particular claims that came to my attention, seemed to me and to others also to work injustice. I naturally took up the cudgels vigorously in behalf of these cases at the regional office concerned—which in my district is the regional office at Cleveland, Ohio, presided over by Col. William L. Marlin. Very often I took Colonel Marlin to task severely in my letters on particular cases. I have no apologies to offer for that. There were no personalities considered in my actions but only a desire for the cutting of red tape and the quick relief of claimants who deserved same.

Now, as an example of one weakness of the regional system, I call attention to the fact that Colonel Marlin, regional manager at Cleveland, Ohio, became personally affronted at my efforts, conceived a personal dislike for me, and as a result, according to certain evidence I possess it is actually a handicap to an ex-soldier's claim now if I intervene in his behalf. It is certainly no help to him. Time and again word has come back to me of constituents of mine who have apparently been received with less courtesy when the regional office at Cleveland learned I was interested in the case.

Mr. Speaker, I have a case just in Washington now on appeal, Henry J. Schuette, C-280-132, Defiance, Ohio. It has gotten nowhere in Chicago or Cleveland. One of the officials of the Veterans' Bureau here in Washington, after looking at the "dummy" file of records on the case kept here, said he thought the case on appeal would receive the award contended for, on the basis of facts before him.

Other cases I can mention, that have dragged out and delayed and received no substantial action until the time and trouble was taken to bring them here to Washington on appeal. To be specific, I refer to one Clarence R. Kaser, C-1157888, Edgerton, Ohio. I have been active in this case for years, and just within a few months it had to be brought to Washington to the director to save the boy's compensation and attendant allowance.

Mr. Speaker, I mention these cases—and I can mention others—simply to show the trouble, delay, and inconvenience—yes, and suffering, that can be caused, apparently in the regular routine of business, in one of these regional offices. And I submit, Mr. Speaker, that any officer who makes it difficult for these ex-service men in connection with their cases, simply because they are represented by a man personally disliked by that officer, is unworthy of his position.

Another thing about establishment of these regional offices. It brings the various managers in closer contact with the people—the area in which they work is restricted, and consequently an alluring field is opened for political activity. Regional managers are under civil service and supposed to be outside politics. But here, again, the weakness of the system is shown. In addition to the activities relative to veterans' claims, which I have shown above, as a result of incurring the personal dislike of the regional manager by calling him to task, I have been made the target of adverse political activity. The regional manager, being a military man and a leader in the National Guard of Ohio, has, through his officers and other connections in my district, fostered a good deal of enmity toward me politically among the very class I have supported—the veteran class. Two years ago many of his subordinates, who had always been my supporters, were against me. For the coming campaign he is alleged to have persuaded an ex-soldier to oppose me in the primary. To certain people he has made statements—not knowing they were my friends—that he would use every effort to defeat me in the primary; and if I were successful then, would redouble his efforts in the general election.

Thus does a regional manager of the United States Veterans' Bureau, under civil service, seek to intimidate a Member of Congress and defeat a Member of Congress who has dared to call him to task in line of duty and with reference to the regional manager's duty. Thus, also, does he play loosely with the claims of innocent veterans who dare to seek my aid in prosecution of their claims.

Mr. Speaker, since so much evidence of discrimination in veterans' cases and undue political activity directed at Members of Congress is being accumulated in my files against the regional manager at Cleveland, Ohio, I desire to state that during the summer I intend to brief this evidence for the consideration of Congress at the next session and then request, by resolution, an investigation of this situation by a special committee of the House appointed for this purpose.

IMMIGRATION VISAS

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the joint resolution (S. J. Res. 5) to grant a preference to the wives and minor children of alien declarants in the issuance of immigration visas, with House amendments, insist on the House amendments, and agree to the conference asked by the Senate.

Mr. SNELL. Is that the resolution we passed here just the other day?

Mr. JOHNSON of Washington. Yes; it was passed without a roll call.

The SPEAKER. The gentleman from Washington asks unanimous consent to take from the Speaker's table the joint resolution (S. J. Res. 5), with House amendments, insist on the House amendments, and agree to the conference asked. Is there objection? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. JOHNSON of Washington, JENKINS, and BOX.

PENSION BILL

Mr. KNUTSON. Mr. Speaker, I call up the conference report on the bill (H. R. 12381) granting pensions and increase of pensions for certain soldiers and sailors of the Regular Army and Navy, their widows, etc., and ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12381) granting pensions and increase of pensions for certain soldiers and sailors of the Regular Army and Navy, their widows, and so forth, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 8, 9, and 12.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 5, 6, 7, 10, 11, 13, 14, 17, 18, 19, 20, and 21, and agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the figures proposed to be inserted by said amendment insert "$20"; and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows: In lieu of the figures proposed to be inserted by said amendment insert "$100"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with amendments as follows:

"Page 2 of the Senate engrossed amendments in the case of David J. Menard, strike out the figure '30' and insert in lieu there the figure '20.'

"Page 2, in the case of Lawrence Waterhouse, strike out the following language, 'said increase to date from February 17, 1927.'

"Page 3, in the case of John Rose, strike out the figure '25' and insert in lieu thereof the figure '17.'

"Page 4, in the case of Tillie M. Foley, strike out the figure '30' and insert in lieu thereof the figure '20.'

"Page 5, in the case of Henry Buck, strike out the following language: 'the name of Henry Buck, civilian employee, quartermaster department, Nez Perce Indian war, and pay him a pension at the rate of $12 per month.'

"Page 6, in the case of George W. Cleveland, strike out the figure '30' and insert in lieu thereof the figure '20.'

"Page 6, in the case of Leon P. Chesley, strike out the following language: 'the name of Leon P. Chesley, late of the One hundred and twenty-first Company, United States Coast Artillery, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.'"

And the Senate agree to the same.

HAROLD KNUTSON,
J. M. ROBSION,
JNO. W. MOORE,
Managers on the part of the House.
PETER NORBECK,
HENRIK SHIPSTEAD,
DANIEL F. STECK,
Managers on the part of the Senate.

STATEMENT

The managers on part of the House on H. R. 12381 show by way of explanation that 132 House bills were included in said bill.

The committee of conference carefully examined the merits of each individual case over which any difference of opinion existed and mutually agreed to restore all bills of meritorious character.

The Senate amendment contained the names of 27 beneficiaries. The House disagreed with the Senate on 28 items and made 14 corrections as amendments.

The Senate took exception to 21 of the 132 House bills and agreed to the retention of 7 of them.

HAROLD KNUTSON,
J. M. ROBSION,
JNO. W. MOORE,
Managers on the part of the House.

The conference report was agreed to.

FARM RELIEF

Mr. GREENWOOD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on farm relief.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. GREENWOOD. Mr. Speaker, equality and justice are basic elements of democratic government. American representative democracy especially exalts these two vital principles. The Declaration of Independence emphasizes the equality of men and the Constitution asserts in its preamble that our laws are designed to promote justice.

We presume these fundamental principles maintain between groups and industries as well as between individuals. Government therefore should be the equal servant of all. Uncle Sam should play no favorites.

In times of great necessity industry and business have many times come to the Federal Government for special consideration. The infant industries were among the first to ask protection. The taxing power of the Federal Government was appropriated to levy tariffs, not for revenue but to create a barrier against foreign merchandise. Industries are no longer infants but they still claim protection as a fixed, vested policy.

The railroads, feeling the need for governmental aid and observing how manufacturing was being favored, also claimed kindred in the family of Uncle Sam and had their claims allowed. They are now operating under rates that guarantee them a fixed earning. Transportation is a prosperous child of government, coming under the commerce clause of the Constitution. They have the special privilege of a commission to fix rates and the benefits of a revolving fund to stabilize earnings. With this as a precedent no one should become overagitated if agriculture asks to use the same commerce clause and a revolving fund to control the exportable surplus of farm products, all of which must enter the channels of commerce for disposition.

Again, observe how the public utilities are the child of the State and have their earnings guaranteed, often on inflated valuations.

Labor being able to organize and act collectively has impressed the Congress with its demands. Hours have been reduced to 8 per day with a 48-hour week, while the farmer still labors 72. Compensation laws to cover injuries and legislative machinery to settle disputes between employer and employees have been provided. Congress is also being asked to legislate to curb the courts in the arbitrary use of injunctions in labor disputes. This reform will likely be accomplished. Then labor will no longer be denied a trial by jury. As a Representative who believes in helping the workingman, I was glad to support the laws restricting immigration. The American workingman should be protected from the competition of foreign, cheap, and unskilled labor.

All of these instances but emphasize the many groups and industries that have come with petitioning hands to Congress and have been graciously received. The farmer observes these acts of parental love, and as a child of government feels that he has been crowded out of the family circle. He has worked longer and harder than any of his brothers and has received the smallest portion of the income. While prosperity prevails in industry, with stocks and bonds ever soaring higher and higher, farm values are shrinking and agriculture is in bankruptcy.

Does anyone doubt there is a farm problem?

In the year 1910 mortgage indebtedness on farm lands totaled $3,500,000,000, and in 1920 it had increased to $12,450,000,000, and now it is even greater. During the period since 1920, while other values were growing, farm lands shrank from $63,000,000,000 to less than $45,000,000,000, the most enormous loss ever sustained by any group. During this period of depression, caused mainly by a vicious deflation policy adopted by the Federal reserve banking system, credits were curtailed and foreclosures increased as never before. There have been 171,000 farms sold at forced sale, and bank failures are totaled at 3,941. It is estimated that almost 1,000,000 people have been forced to leave the farms because of these sales and failures. The depletion of the farms, with an exodus of the people to the industrial centers, constitutes our greatest and most menacing problem. Already more than 50 per cent of our population live in cities and towns under conditions that neither improve their health, their happiness, nor their morals.

Farming is our biggest business. It is the most important. Life itself depends upon the production of food and clothing. The disadvantage of low prices of farm products and the low comparative value of the farmer's dollar arises from the disparity of the farmer in relation to these other favored groups. These are able to control prices on their products. A table inserted herein and comment thereon shows how the farmer is mulcted out of wealth by exorbitant tariff rates which are built to rob the consumer and favor the manufacturer.

It has always been emphatically declared by some political economists that high protective tariff schedules spell prosperity. It is time for the farmer to come out of this deceptive delusion. For his benefit let him study this table, compiled by the Agricultural Department, as to the comparative purchasing power of the farmer's dollars for the last 35 years and keep in mind which party was in power. The years and figures are from the department and the insertion of the party are my own. This table places political responsibility by administrations. It clearly demonstrates that agriculture is much the better off under a low, or Democratic, tariff:

	Cents		Cents
Republican Party:		Republican Party:	
1890	83	1908	93
1891	89	1909	100
1892	87	1910	96
Democratic Party:		1911	97
1893	87	1912	101
1894	85	Democratic Party:	
1895	85	1913	100
1896	81	1914	105
Republican Party:		1915	103
1897	86	1916	97
1898	88	1917	107
1899	83	1918	112
1900	86	1919	112
1901	92	1920	96
1902	95	Republican Party:	
1903	88	1921	84
1904	93	1922	89
1905	90	1923	61.3
1906	88	1924	62.4
1907	90	1925	60.3

I have no desire to discuss the theory of the tariff. Suffice to say that I am not a free trader, neither do I believe in using the taxing power of the Federal Government as means of robbery of the many for the benefit of the few. I do not care to talk about the ancient doctrine of infant industries that do not now exist. Nor to refute the argument about tariff for the benefit of labor, when the return goes into the pocket of the capitalist, who never renders an accounting to labor for this legislative trust fund. I merely want to show the farmer he is worse off under a high than under a low tariff, and for this purpose I am inserting another table showing relative costs of necessary articles on the farm, and how much more he is expected to pay now with a cheap farm dollar than he did in 1 under a Democratic administration, when his dollar, as shown by the former table, was worth a dollar and more:

Implements	1914	1928
Hand corn sheller	$8.00	$17.50
Walking cultivator	18.00	38.00
Riding cultivator	25.00	62.00
1-row lister	36.00	89.50
Sulky plow	40.00	75.00
3-section harrow	18.00	41.00
Corn planter	50.00	83.50
Mowing machine	45.00	95.00
Self-dump hayrake	28.00	55.00
Wagon box	16.00	36.00
Farm wagon	85.00	150.00
Grain drill	85.00	165.00
2-row stalk cutter	45.00	110.00
Grain binder	150.00	225.00
2-row corn disks	38.00	95.00
Walking plow, 14 inch	14.00	28.00
Harness, per set	46.00	75.00

While many of these finished articles are on the free list, yet the component parts are highly protected. The raw mate-

rial is therefore controlled, the output is limited, and the price fixed at a fancy figure. Our great natural resources of raw materials, our patent laws protecting inventions, the genius of American business and the ability of the American workman to produce, in most instances should be sufficient protection. There is no necessity for the use of the Federal taxing power to permit the exploitation of the American consumer.

In this age of rampant commercialism I may appear a little old-fashioned, but I can not escape the conviction that the Federal taxing power has been perverted from its original constitutional purpose of raising revenue for the administration of a Government economically conducted. Instead of assisting beginning and undeveloped industries until they can stand alone it continues to support the giants of industrialism. The excessive favoritism of the present tariff and its destructive influence to agriculture, I believe, is the most serious menace of the economic welfare of the American people.

I therefore make a plea for the consumers of America, that great forgotten class, that are trying to make their income meet these unjust burdens under a policy that taxes the many for the special benefit of the few. I can well understand why a manufacturer or one whose investments lie in a protected industry that controls the production, and therefore fixes the price, would be for the Fordney-McCumber tariff, but it is beyond my understanding why any farmer, small business man, professional man, or laborer should as a consumer desire to sanction this system of inequality that pulls wealth and income from the farms and rural communities to the industrial centers of America.

There are those who claim the present tariff law benefits the farmers. It is a bold assertion, but one which the present deplorable condition of the farmer emphatically contradicts. What does investigation disclose? The American Farm Bureau Federation estimates the present tariff costs the farmers on necesssities purchased an annual sum of $426,000,000 and that the farmers gain by the same law $125,000,000. Here is a clear loss of $301,000,000 in which the farmer contributes to the wealth of the manufacturer. Is it any wonder that New England and other manufacturing centers say, "Leave well enough alone; do not tamper with the tariff." The man always says "Leave well enough alone" when he has his hand in the other fellow's pocket. Under the present tariff law for every dollar the farmer gains it costs him $4. Also the Fair Tariff League, indorsed by many leaders of farm organizations, such as the National Grange, Farm Bureau Federation, and Farmers' Union, in a statistical summary of the leading agricultural States estimates the present tariff in those States costs the farmers $15 of added costs to $1 gained to the farmer by the operation of this law.

Knowing these facts, will the farmers be contented to vote for extreme protection, when they are being deceived and mulcted by this so-called beneficial tariff?

High tariffs can not raise the price of commodities of which there is an exportable surplus. Agriculture every year produces such a surplus for export, which is thrown upon the foreign market, and this export price controls the domestic price. When goods are going out and not coming in what good is a tariff wall? This wall may repel some trader who would bring goods here and exchange them for our farm surplus. Thus the tariff wall raises the price of all manufactured goods that the farmer buys and keeps him from trading abroad his surplus for many needed commodities which the farmer could use if the price was not prohibitive. The farmer is therefore at an economic handicap, and no amount of advice, sympathy, or subterfuge will bring relief as long as the man who tills the soil it not treated with legislative equality or justice.

Will the farmer still be satisfied with three cheers and a slap on the back and continue to vote for tariffs that rob him and reduce him to bankruptcy or will he use his political influence to help his industrial condition by voting for a party who will readjust the tariff schedules so that economic equality and justice may prevail?

It appears to be impossible to obtain revision of these exorbitant tariff rates from this administration. Many have in debate admitted the injustice of the present schedules. They are conceded to be obsolete and unfair, but there seems to be an invisible influence that controls and prevents even the consideration and modification of this policy of iniquity existing in the Fordney-McCumber tariff.

Since the tariff is not to be lowered then to obtain relief by lifting agricultural products to a level of manufactured products, the McNary-Haugen bill has been designed. I have three times voted for this bill and I believe it will bring the necessary relief. It does not propose to put the Government in business any more than the Government is already in the business of manufacturing, transportation, or banking. The rural population pleads for equal treatment at the hands of the Government. Surplus production is a vital factor in bringing agricultural prices back to a pre-war parity. Agricultural surplus can only be managed and controlled by some centralized, governmental agency. The bill provides for this control and arranges machinery to collect through the equalization fee the cost of operation, and thus prorates the same over the entire field of production of any commodity. It is a method designed to perpetuate itself, keep its reserve fund for control intact, and also curb overproduction. Without this feature of the equalization fee the funds are merely a subsidy, which when exhausted kills the system. Since a surplus is the salvation of our country against starvation the producers should not be penalized, but rather encouraged.

There has been unnecessary delay in recognizing the depressing conditions of agriculture and providing measures of relief. The representatives of 4,000,000 farmers have appeared before the committees of Congress and have almost unanimously indorsed the McNary-Haugen bill. This bill represents the best efforts from many sources of an honest, sincere attempt to assist the American farmer in orderly marketing, proper production, with prevention of farm surpluses from utterly destroying the domestic market. The Government under this bill would not buy or sell, but would help to organize cooperative groups and furnish capital to store and market the farm surpluses.

The production of farm products have an average annual value to the farmer of $10,000,000,000 and for which the consumer pays annually $30,000,000,000. In this wide margin of difference between what the producer gets and the consumer pays, lies the field for the operation of this legislation. The consumer can be protected from exploitation and the producer can be better rewarded for his labors. The Government will be the instrumentality of stabilization by bringing together the scattered groups for cooperative efforts. Great fluctuation in prices, damaging alike to both producer and buyer, will be prevented.

The administration should have had no hesitation in enacting this measure into law after the 1924 election. The platform contained pledges and the candidates made promises. These promises have faded into thin air, and like Judas Iscariot, the administration has turned its back on the one it professed to love. The Republican Party has had control of Congress for 10 years and has had the Presidency for 8 years and the chief distinction that the last two administrations can claim consists in having a President whose sole activity toward agriculture has been to veto farm relief legislation as fast as Congress can enact bills and send them to him. Congress has conferred and collaborated with the farm organizations, carefully considered, reported out, and passed these relief measures, only to be blocked in every effort by a Republican reactionary and obstructionist President. It is now up to the farmers at the ballot box to assert their rights.

Now, in conclusion, let me make some observations looking to farm relief. Farmers of the inland territory want cheap water transportation. This will allow the loading of vessels at inland ports for foreign shipments. We want to ship our farm products to the ports of the world without reloading. We need a revision of the freight rates consisting of reclassification, adjustments with certain preferential rates on foodstuffs. Also the States may help by revision of the taxing laws so that tangible property, because it is in sight and accessible, is not made to bear an unjust burden of the local government. The farmers pay one-fifth of the Nation's taxes and receive but one-twelfth of the national income. This situation calls for immediate alleviation. There should be a lowering and equalizing of tariff duties in the interest of the farmer. Pending the accomplishment of these changes the McNary-Haugen bill offers relief for better prices by governmental aid in marketing the surplus farm production.

The West and South being mutually interested should begin to work together in self-defense. The claim of wealth and prosperity means nothing unless there is a better distribution of its benefits to those who produce it. If politics and Federal legislation are interwoven into the industrial and business fabric of America, we must accept the challenge of this combination in the agricultural section and unite for action. We are determined that prosperity must be more than spotted and provincial. It must be general to satisfy the farmer.

It is up to the agricultural classes both organized and unorganized to stand by their friends and those who have worked and voted to bring equal opportunity and economic justice to those who produce the comforts of food and clothing for America. There is hope that the administration may change

and we get an Executive whose perspective can reach the farthest village and farm of America. We want no condition of serfdom. Only agricultural independence and economic equality on the farm can preserve uniform democracy in our country.

WHERE WAS ANDREW JACKSON BORN?

Mr. DOUGHTON. Mr. Speaker, I ask unanimous consent that my colleague, Mr. HAMMER, may have permission to extend his remarks in the RECORD by printing an article on the birthplace of Andrew Jackson.

The SPEAKER. Is there objection to the request of the gentlemen from North Carolina?

There was no objection.

Mr. HAMMER. Mr. Speaker, under the permission to extend my remarks in the RECORD I include the following statement prepared by John Trotwood Moore, director libraries, archives, and history, State of Tennessee:

The congressional committee known as the Joint Committee on Printing has been doing a much-needed historical work during the past four or five years in publishing authentic, correct, and concise biographies of the Presidents of the United States, Senators, Congressmen, and other Federal officials, past and present, for permanent preservation in the national archives. So many of these officials, especially Senators, Congressmen, and Cabinet officers of the past, left so little data of their lives that it has been a stupendous, painstaking task. Take an obscure and long-forgotten Member of Congress, say 100 years ago, who served one term in Congress and then vanished from the scene. Where was he born? Where did he die? What became of him, and where was he buried?

Naturally, the historical departments of all States have been called upon to help in this research. Senator MOSES is chairman of this committee and Mr. Wold is the very efficient secretary. When it came to the place of birth of Andrew Jackson, seventh President of the United States, the committee was confronted with serious and conflicting testimony. The birthplace of the seventh President was strenuously claimed by both the States of North and South Carolina, and their respective champions, Representatives WILLIAM F. STEVENSON, of South Carolina, and WILLIAM C. HAMMER, of North Carolina, each delivered on the floor of the House a convincing array of historical facts tending to establish their respective claims. In the confusion of so many differing statements from men so eminently qualified to speak authoritatively on the subject, and, without doubt, each sincere and honest in his belief, the writer was requested by Secretary Wold to go to the Waxhaw settlement in North and South Carolina (for the ancient Indian settlement extends across the borders of both States) and give to the committee his own views on the subject from personal investigation and first-hand information gathered on the spot. This he did on October 22, 1926, being met by a large delegation composed of citizens of both States and spending portions of two days and nights in that vicinity, the nearest town being Monroe, N. C.

Let it be understood in the beginning that this writer does not consider the question of Jackson's birthplace, as between these two splendid States of homogeneous people of the finest traditions of Anglo-Saxon lineage, as of any great importance.

The fact that he was born is the main thing for history and the glory of his breed.

VISIT HOME SITE

After thorough investigation the writer returned convinced beyond any doubt that Andrew Jackson was born in the George McKemey (spelled also McCamie, McKamie) log cabin on the night of March 15, 1767, which cabin is to-day situated about 407 yards on the North Carolina side of the State line between the States and about 10 or 12 miles from the town of Monroe, N. C.

My work was greatly facilitated by the untiring efforts of Congressman WILLIAM C. HAMMER of the seventh district, who, with other patriotic citizens of that district, met me and gave me every opportunity to thoroughly investigate this matter. In this connection I wish to add that the greatest possible credit is due Mr. HAMMER for the thorough investigation he made of this subject and his unanswerable presentation of it on the floor of the House of Representatives. As an historian I will further say that it is seldom any congressional district has so able a Congressman and historian at the same time.

Let me briefly array the proof presented by both sides, and give the reason for our decision in support of the North Carolina claims.

Let it be known in the beginning that all the early confusion and differences of opinion arising on this subject were brought about by an error in the survey establishing the true line between those States soon after the complete separation of the two provinces by royal authority in 1729. After the separation, a dispute arose as to the boundary line, which was not finally settled until the final survey—which is the established line of to-day—was ratified by the general assemblies of both States on November 2, 1815.

At that time Andrew Jackson had in a little more than one year destroyed the powerful nations of the Creek Indians, making possible the treaty of Ghent and completely routing for the first time in its history a British army of more than twice his own force, and saved the entire Louisiana Purchase from the jeopardy of British possession and annexation of Canada. After over a century of history, including three greater wars on the Western Continent, and a world war in Europe, involving nearly every white nation in the world, this is still considered the most brilliant and far-reaching victory ever gained by American arms. At that time, when the correct line was run between the two States, Andrew Jackson was 48 years old, and was living at the Hermitage, near Nashville.

DOUBT ABOUT LINE

But at the time of his birth, March 15, 1767, there was grave doubt about the line, and when it is remembered that it was admitted on both sides that the line run in 1737, 30 years before Jackson was born, was 11 miles short of reaching the thirty-fifth degree of north latitude, to which the surveyor had been instructed to run, thus producing a triangle with an hypotenuse following 11 miles from the true point of a straight line north and south within the true line as established November 2, 1815, and the false hypotenuse as run in 1737, was an area 5 or 6 miles in extent in which on one side or the other of the line close to it were located the homes of the five Hutchinson women (all sisters of Andrew Jackson's mother), who had married, the most of them in north Ireland, and emigrated with their husbands to America; and all settled in the Waxhaw settlement, vaguely extending from 10 to 20 miles each way into what is now North and South Carolina. These sisters were Margaret, who married George McKemie; Mary, who married John Leslie; Sarah, who married Samuel Leslie; Jane, who married James Crawford; Grace, who married James Crow; Elizabeth, who married Andrew Jackson, sr.

As stated, all of these built cabin homes within 4 or 5 miles of each other at the farthest, nearly all on lands touching Waxhaw Creek, except one, Andrew Jackson, sr., the last to come from north Ireland with his wife, Elizabeth Hutchinson, and their two little boys, Hugh and Robert, and, being the poorest of all who had married the comely, sprightly, thrifty, well-bred, and from the keen competition for their hands, most desirable Hutchinson sisters, he was able to enter in 1765, when he reached the Waxhaw settlement, only 200 acres of rather poor land on Twelve Mile Creek, 10 miles farther north and then as now, clearly within the borders of North Carolina.

He built a rude log hut by a spring, and with two years of strength-killing labor, tilling and clearing without aid or help save only the sturdy arms of his brave young wife, he was only able to pay $70 on this land, not enough to take it out of the entry office; and, broken in strength and heart, he succumbed to pneumonia in the bleak and bitter days of February, 1767, leaving a helpless wife, expecting shortly another child, and with two little boys to the none too tender life of a frontier civilization made up chiefly of savage fighting, spiritless drudgery, uncomfortable living, cruelty, and ignorance. But that log cabin, crude and comfortless as it was, stricken with dire poverty and overwhelmed with remorseless sorrow, lacked but a few days of being the birthplace, as it had been the beginning, of the life of a man whose iron will, mighty vision, and matchless courage was the first to make of his country a real democracy for the world.

AN UNMARKED GRAVE

On a bleak and freezing February day in 1767 they hauled his body on a sled to the old Waxhaw Church, some 10 miles away, and buried it in a grave that as yet has never had a stone with his name on it—the father of greatness who fought as brave a battle against as great odds for his wife and babies as ever his brilliant son did at New Orleans.

Can it be that the Nation he did so much to save and to make shall forget him? I can not believe it. And so I stood at that grave, unmarked, and, but for an accident, unknown—even as his wife, buried in a potter's field near Charleston—and pledged that the people of Tennessee would put a monument there to Andrew and Betty Jackson, father and mother of Tennessee's greatest citizen.

Things were very desperate with Betty Jackson, as she was called, in that lonely and rude log cabin by a rocky spring, in a small, cleared spot of woodland, on the edge of the frontier and 10 miles farther away than any of her sisters. Hugh, her oldest boy, was about four; Robert, scarcely two, both requiring constant watchful care, and another son soon to be born. Her husband had been too poor even to own a negro to help him clear the forest and build his log hut. Nor did he own a "likely wench," as the slave women were called, and purchasable at half the price of a manservant, $100 to $200. She had even helped her husband build his rude cabin, so far as the interior went, daubing the logs and the chimney with plastic mud, making the roped beds with only two posts, the other side being attached to the logs of the house. On a little hand loom she brought with her from north Ireland she had woven the jeans clothes for her man and her boys. The Hutchinson family was a family of linen weavers, and she doubtless wove the linen of fleece or cotton and milked their one cow, made endless trips to the rock spring for water, churned, cooked, sewed, washed their clothes, and kept her boys from mischief. The only description ever given of her, "a dumpy little red-headed Irish woman, always knitting, always busy, respected and loved by everybody."

Now, "dumpy, little, and red-headed"—that means compactness, health, energy, pep; red-headed, in that means temper and fight. Her great gangling son, of long legs and long, narrow peaked head on a slender body that carried it 6 feet and 2 inches high, resembled her in only two things—the red head of the fighter and the steel blue-gray eye that never quailed.

TRIED TO MOVE

With no one to wait upon her in her coming sickness, no one to cut wood and build fire and keep her warm, no one to guard against the sneaking, lurking Indians, the wild beasts in the swamps of the wood, with not a dollar, perhaps, in the hut, and little meal and potatoes and bacon, there was nothing for the stricken little red-headed woman to do but to go to her sister, Jane Crawford, 10 miles back further in the settlement and near the old Waxhaw log church. James Crawford, husband of her sister Jane, and his brother, Maj. Robert Crawford, were far better to do than Andrew and Betty, or either of the husbands of her other sisters. They owned each a large plantation, had moved to America 16 years before Andrew Jackson and Betty had come, and had greatly prospered, owning slaves and livestock of all kinds, raised large quantities of cotton and tobacco, and had homes of two stories with stairs, wide porticos, and a lawn in front of the most pretentious mansions of the entire countryside. Moreover, they were men of the first importance and standing—leaders in militia service and affairs of the county of Lancaster, S. C., where their plantations lay just 2 miles, or a little more, over the line, according to the survey of 1815. So imposing was the Robert Crawford home, and so prominent its owner, that it was selected to be the stopping place of President George Washington on his tour of the South in 1791.

It was finally decided among the sisters that their sister, Jane Crawford, being childless and a semi-invalid, that Betty and her two little boys should be taken there where Betty could keep house for her sister, and the boys find a home. Accordingly, on a cold day in March, in a small wagon, sitting on the feather mattress on top of all her worldly goods, holding her two little boys at her side, the little red-headed mother of her immortal son bid with tears good-by to the little cabin in which she had seen so much grueling labor and sorrow and set out for the home of her sister, Jane Crawford, 10 miles away, near the old Waxhaw Church. In going to her sister, Jane Crawford, Betty Jackson had to pass by the cabins of two of her sisters, Sarah Leslie and Margaret McKemie. Their husbands, like Betty's, were poor, their estates small, and their log cabins little roomier than her own. Their cabins stood scarcely half a mile apart on the public road.

REACHES HER HAVEN

When she reached her sister's cabins, Betty was cold and tired. It had been a long journey over a rough and rocky trail that passed for a road. Besides, she was growing ill—she sensed it. Her little boys were cold and hungry and it was nearly night. It was 2½ miles farther to her sister Jane Crawford's. She stopped for the night with Margaret McKemie. There had been much hard work in packing and loading even her small wagon load of household stuff. There had been tears and heartaches in leaving her little cabin where last she had seen her husband alive. She had been married to him but six years, and through the last two on the frontier of a new civilization, in a new land of wide, open spaces bordering on an unknown forest of wilderness and savage, had been hard and of bitter self-denial, yet they had been happy until death came by, in the thought that now, in this new country, of unlimited land and liberty, a new day had dawned from the tyranny of the old land they had left. And now, not 30 and a penniless widow, facing the rearing and care of three children.

No mother in all the world ever went to her lonely bed of labor and pain as went Betty Jackson that night on the Ides of March, to be delivered of a child whose father's comforting arms lay cold and crossed in a distant graveyard, powerless to comfort and caress her in the bitterest of all nature's ordeals. Neither in Shakespeare nor in the Bible, which together have recorded the dumb sorrow of silence written in the woman's tearless eyes who feels that pain of motherhood and knows there is no loving father for her child. Margaret McKemie, sister of Betty Jackson, did the natural and sensible thing in this unexpected dilemma. Near her, scarce a quarter of a mile away, lived another sister, Sallie Leslie. She was not only a sister but was experienced in the birth of children—a capable, strong, and sensible woman. Some even termed her by the old English and honored name of midwife. She was hastily sent for, and came quickly by a near cut through the field, so short a distance that the firelight in the small windows of each cabin could be seen at the other. She brought her little daughter, Sarah, along, 7 years old, because she had no one to leave her with at home. She arrived none too soon and sent hastily for another neighboring woman, living only a short distance across another field, Mrs. Molly Cousart, a professional midlady, who did reach there shortly after Jackson was born and in time to dress him, and as soon as his mother was able to travel she went to live with her sister, Jane Crawford, about 2½ miles away on the South Carolina side of the line. Here Jackson lived until his mother died, at which time he was about 14 years of age. That McKemie cabin is to-day 407 yards over on the North Carolina side.

PROOFS ARE PRESENTED

Let us see upon what proof we base these assertions, since they would establish North Carolina's claim to his birthplace.

Little attention was paid to Jackson's birthplace until he became famous and an outstanding man in national affairs. This is the way of the world in pioneer days; little attention was ever paid to the cabin in which greatness was born. Cabins were always quickly built and as quickly they rotted to decay or gave way invariably to more substantial and finer homes as the industrious and sturdy owner acquired wealth and standing among his neighbors, acquired by the products of his farm, his industry and thrift. The invariable rule was the log cabin first, the finer home of plank and brick afterward.

Many plantations in the South to-day still can show the log cabin of the first owner, now used as a stable or servant house, in humble contrast to the fine mansion, often of brick, near it. Part of the log cabin of the original Hermitage where Jackson lived when he fought the Battle of New Orleans still stands near the great colonial brick mansion which he built while President of the United States in 1835. Lincoln's people were not so thrifty. They built their log cabin on poorer land in Kentucky and with the death of Nancy Hanks, the mother, moved west into Indiana and still later Illinois. Like Jackson, it was only after the death of Lincoln that any real and enthusiastic search was made to find the cabin in which he had been born. It was only after Jackson died, in 1845, that any real authentic data were collected to show where he was born.

LEAVES WAXHAW SETTLEMENT

The question of his birthplace was never a happy theme to Jackson. At 14 years of age, orphaned, poor, without funds, and no prospect of ever being anything but a country school teacher, and finally a country lawyer riding a backwood circuit, he left the Waxhaw settlement in disgust, never to return again. His oldest brother, Hugh, had been killed in battle, then only 17. His other brother, Robert, he had seen slashed over the head, causing later his death, even as he himself had been slashed, by a cowardly brute of a British officer because the lads, 14 and 16 years old, captured in battle near Waxhaw Church, refused to be his menials and black his boots. And this after he had seen 115 of his comrades massacred in cold blood by the same British in treachery, after they had been surrendered and captured at Waxhaw Church the day before; about 150 wounded, 50 taken prisoners, all accomplished by treachery and deceit. And his mother dead and buried in an unknown grave far from home.

No wonder he never forgot. No wonder when the 8th day of January, a third of a century afterwards, when he saw that brazen and blasphemous body of cocksure British bullies rushing his deadly breastworks of Decherd rifles, and knowing the pale and ghastly memories on the white horse of death that led them to their sure destruction, that he turned to an officer near him with a grim gleam of Scotch cruelty and Calvinism in his eyes as he said: "And now, by hell, we'll give them a taste of Waxhaw."

It was a bitter taste that has never left the British mouth; to this day no historian of theirs has ever told the truth about Jackson.

CLAIMED SOUTH CAROLINA

Jackson cared little about his birthplace and never mentioned it until in 1824, when he had become a candidate for President, and in politeness answered the letter of Joseph H. Witherspoon as to where he was born.

Jackson's answer was: "I was born in South Carolina, I have been told, at the plantation whereon James Crawford lived, about 1 mile from the Carolina Road crossing the creek."

This is practically South Carolina's claim—that Jackson was born on the Crawford plantation—but they do not show any house, cabin, or any particular place where he was born. Only an ancient map drawn by a surveyor in 1820 who arbitrarily placed a cross at a certain place on a supposed road and called it Gen. Andrew Jackson's birthplace.

No great man was ever born anywhere and died in the memory of old people who had lived with him until he was 14 years old, or their children who, perhaps, had never seen him but had heard their fathers and mothers tell of him, but can establish without doubt the house wherein he was born. Especially if a majority of all these people living where he was born were held by the ties of kinship, such as the six Hutchinson sisters and their neighbors. If Jackson had said he was born in the James Crawford home or any other house, no one would dispute the claim. Or if he had said that his mother had told him that he was born in the Crawford house or in any certain house, no one would doubt it. But he did not say this, and his very wording seems to indicate that it was not from his mother that he got this information or he would have clinched it by saying so.

TESTIMONY AVAILABLE

There are old people still living in the Waxhaw settlement whose testimony would establish the fact that Andrew Jackson was born in the McKemie cabin, even if Colonel Walkup had not gathered in 1845 the affidavits which so indisputably established the fact.

Accompanying me on my recent trip, among many others, was Squire McWhorter, now nearly 80 years old, an elder, I am told, in the old Waxhaw Church, and a man of the finest standing in the community where he had lived so long. In pointing out where the McKemie cabin stood this fine old gentleman told me that his grandfather, who was born in 1793, often had shown him the McKemie cabin which stood there, with the remark that his grandmother, Sarah Leslie, had often pointed out the cabin to him and told him that it was in this cabin that she had helped to bring Andrew Jackson into the world.

This alone should establish the fact if Colonel Walkup's affidavits had never been gathered.

Our South Carolina friends are in error when they claim that North Carolina made no claims to Jackson's birthplace until after Jackson's death. In 1828 J. D. Craig, postmaster of Findleysville, N. C., a native of South Carolina, who lived in the Waxhaw, sent to George Nevills, of Ohio, chairman of a Jackson committee, numerous statements as to the birthplace of General Jackson. Mr. Craig contended that he had no desire to take from his native State laurels to which she was entitled and confer them on North Carolina, but that after Jackson wrote Colonel Witherspoon the "as I have been told" letter as to his birthplace, he (Craig) wrote Col. E. Duff Green, editor of the United States Telegraph, that there were living witnesses to prove Jackson was born in North Carolina. The letter was published. (See United States Telegraph, July, 1828, in Library of Congress.) George Nevills, of Ohio, chairman of a Jackson committee, immediately wrote Mr. Craig asking for certificates and affidavits to refute scandalous reports about Jackson and wife.

CRAIG LETTER ON FILE

Later, in 1858, Mr. Craig wrote to Colonel Walkup from his home in Caswell, Miss., where he had lived the first 20 years, stating he had seen much published about Jackson and his parents that was incorrect; he had written a letter to the editor of the Lancaster Ledger, giving the history of the family. The Craig letter to Colonel Walkup was received too late to be published in the Wadesboro Argus, containing the Walkup evidence, but it is on file, together with other evidence in the "Walter Clark collection," with the historical commission at Raleigh, N. C.

Mr. Craig stated in this letter that he was 71 years old and his memory was good. He was born and reared in Lancaster County, S. C., married and settled on Waxhaw Creek within 2 miles of Jackson's birthplace. He was often at McKemy's house before it was pulled down. It was about 400 yards east of Cureton's pond (no pond there now, as the land is drained and in cultivation), opposite where Cureton built his cotton gin and screw. Mr. Craig then gave an accurate description of the highway along the State line, and the location and distances of the homes of the pioneers.

Mr. Craig states further that he secured affidavits forthwith from James Faulkner, a good Presbyterian like himself, and belonging to Waxhaw Church, and living on Cain Creek in what is now Lancaster County, S. C. After spending the night with Mr. Faulkner, the two went to Squire David Latham's, where Mr. Faulkner made oath that his father came to America some time before the Revolutionary War and left him behind with an uncle to get schooling; that he knew Andrew Jackson, sr., and family; that George McKemy married the oldest of the Hutchison sisters and had one child that died; that McKemy came to America 16 years before Jackson's father and family and two other families came; that Jackson sailed from Learn, Ireland, landing at Canniniggigo, Pa., and went direct to the Carolinas.

Testimony of Mr. Craig's witnesses, Faulkner further swore that after the war was over he sailed from Learn and on landing at Wilmington, N. C., went to George McKemy's, where on his first night he slept with Andrew Jackson, then a lad of about 14 years. He understood Jackson was born in that house. Faulkner added that his (Faulkner's) first wife was a Leslie, and a cousin of General Jackson. Craig wrote that he often heard James Faulkner, father of the James Faulkner who made the affidavit for Walkup, say that Jackson was born at McKemy's, in North Carolina.

QUESTION UP AGAIN

Jackson died June 8, 1845, and immediately the papers in recounting his life spoke of his having been born in South Carolina. To refute this, Col. S. H. Walkup, of North Carolina, distinguished lawyer and afterwards colonel in the Confederate Army, began to gather testimony. It seems he collected this and first published it in a speech he made in Union County, July 4, 1845. Later, in 1858, while assisting the historian preserved in the North Carolina historical commission at Raleigh. There are 14 of these affidavits in all, but only the most important will be reproduced here with three letters written to Colonel Walkup in 1845, as follows:

LANCASTER DISTRICT, S. C.,
August 5, 1845.

Mr. S. W. WALKUP.

SIR: Agreeable to your request, and to fulfill my promise to you, I herewith send you Mrs. Lathan's history of the birth of Andrew Jackson, as related to me by herself about the year 1822, as well as my memory now serves me. Mrs. Lathan states that herself and Gen. Andrew Jackson were sisters' children; that Mr. Leslie, the father of Mrs. Lathan, Mr. McCamie, Mr. Jackson, the father of Andrew, and Mr. James Crawford all married sisters; Mr. Leslie and Mr. McCamie located themselves in Mecklenburg, N. C., Waxhaws; Mr. Crawford located in Lancaster District, S. C., Waxhaws; Mr. Jackson located himself near Twelve Mile Creek, Mecklenburg, N. C.; that she was about seven years older than Andrew Jackson; that when the father of Andrew died Mrs. Jackson left home and came to her brother-in-law's, Mr. McCamie's, previous to the birth of Andrew; after living at Mr. McCamie's a while Andrew was born, and she was present at his birth; as soon as Mrs. Jackson was restored to health and strength she came to Mr. James Crawford's, in South Carolina, and there remained.

I believe the above contains all the facts as given by Mrs. Lathan to me. Mrs. L. was a lady of very fair standing in society.

BENJAMIN MASSEY.

LANCASTER DISTRICT, S. C.,
August 22, 1845.

Mr. S. H. WALKUP:

Mrs. Leslie, the aunt of General Jackson, has often told me that General Jackson was born at George McCamie's, in North Carolina, and that his mother, soon after his birth, moved over to James Crawford's, in South Carolina; and I think she told me she was present at his birth; but at any rate she knew well he was born at McCamie's, and that the impression that he was born at Crawford's arose from his mother moving over there so soon after his birth. Mrs. Leslie was a lady of unblemished character and excellent reputation.

JOHN CARNES.

The following are some of the affidavits given to Colonel Walkup in 1858, which, together with other evidence, was passed on by the historian Parton on his visit to the Waxhaw that year, and embodied in his Life of Jackson. The only other historian who ever published a Life of Jackson, who visited the place and went over the testimony first hand, like Parton, was Buell, and he arrived at the same conclusion.

AUGUST 28, 1858.

Mr. James Faulkner, of Steel Creek, N. C., states that he is 62 years of age and is the son of James and Mary Faulkner; that his mother was a daughter of Samuel and Sarah Leslie, and therefore his mother was full cousin of General Jackson, and his grandmother was sister of Mrs. Jackson; that he was born and raised in South Carolina, and that Mrs. George McCamie and Mrs. James Crawford were sisters of Mrs. Jackson and his grandmother, Mrs. Sarah Leslie. He locates the places where they settled and shows that Mr. Andrew Jackson, sr., settled and died on Twelve Mile Creek, N. C.; that George McCamie settled a quarter of a mile east of Cureton's pond and a quarter east of the public road, and in North Carolina; that Mrs. Leslie was a very near neighbor to Mr. McCamie, and in North Carolina; and that James Crawford settled about 2½ miles southwest in South Carolina. He states particular reasons and circumstances why he knew the McCamie place, viz, that his father lived with McCamie in 1785, for one year, and spoke of hobbling and turning out the horses to graze in Cureton's pond, and of his making only 15 bushels of corn at that place that year as his share of the crop; and further, that his uncle, George Leslie, lived with McCamie for several years and until the death of his aunt, Mrs. McCamie, in 1790; that he was named for McCamie to inherit his property. He states that old Mr. Jackson died before the birth of his son, General Jackson, and that his widow, Mrs. Jackson, was quite poor, and moved from her residence on Twelve Mile Creek, N. C., to live with her relations on Waxhaw Creek, and whilst on her way there she stopped with her sister, Mrs. McCamie, in North Carolina, and was there delivered of Andrew, afterwards President of the United States; that he learned this from various old persons, and particularly heard his aunt, Sarah Lathan, often speak of it and assert that she was present at his, Jackson's, birth; that she and her mother, Mrs. Leslie, was sent for on that occasion and took her, Mrs. Lathan, then a small girl about 7 years of age, with her, and that she recollected well of going the near way through the fields to get there; and that afterwards, when Mrs. Jackson became able to travel, she continued her trip to Mrs. Crawford's and took her son Andrew with her, and there remained. He thinks also that his aunt said that her mother was the midwife who delivered Mrs. Jackson on that occasion; that his aunt was a woman of good character and sound mind and memory to the time of her death.

JAMES FAULKNER.

Before:

JOHN M. POTTS, *Justice of Peace.*
SAM'L H. WALKUP.

At the same time there was taken the affidavit of John Lathan, son of Sarah Lathan. Sarah Lathan was born Sarah Leslie, daughter of Sarah Hutchison. John Lathan, therefore, was a grandson of Sarah Leslie, Andrew Jackson's aunt, and who assisted her sister Elizabeth on the night of March 15, 1767, when the little Andrew was born in the cabin of his other aunt, Margaret Hutchison McCamie:

WAXHAWS, NEAR THE WAXHAWS CHURCH,
Lancaster District, S. C., August 30, 1858.

The following is about what I have heard my mother, Sarah Lathen, say in frequent conversation about the birthplace of Andrew Jackson, President of the United States. She has often remarked that Andrew Jackson was born at the house of George McCamie, and that she (Mrs. Lathen) was present at his birth. She stated that the father of Andrew Jackson, viz, Andrew Jackson, sr., lived and died on Twelve Mile Creek in Mecklenberg County, N. C., and that soon after his death Mrs. Jackson left Twelve Mile Creek, N. C., to go to live with Mr. Crawford in Lancaster District, S. C.; that on her way she called at the house of George McCamie, who had married a sister of hers (Mrs. Jackson), and whilst at McCamie's she was taken sick and sent for Mrs. Sarah Leslie, her sister, and the mother of Mrs. Sarah Lathen, who was a midwife and who lived near Mrs. McCamie's; that she, Mrs. Lathen, accompanied her mother, Mrs. Sarah Leslie, to George McCamie's; that she was a young girl and recollects going with her mother; they walked through the fields in the night, and that she was present when Andrew Jackson was born; that as soon as Mrs. Jackson got able to travel after the birth of Andrew, she went on to Mr. Crawford's, where she afterward lived.

The maiden name of my grandmother and sisters (Mrs. Jackson, Mrs. McCamie, and Mrs. Crawford) were Hutchison. One of them married Samuel Leslie, my grandfather; one married James Crawford; one married George McCamie; and one married Andrew Jackson, sr. Jackson lived on Twelve Mile Creek, N. C.; Leslie lived on the north side of Waxhaw Creek, N. C., to Charlotte, S. C., about 1 mile east of said road, and east of a large branch, and near to George McCamie's, as I understood, but not so near the road as McCamie's. I don't know where McCamie lived. Crawford lived near Waxhaw Creek in South Carolina.

My mother, Sarah Lathen, was the daughter of Samuel and Sarah Leslie, and died about 35 years ago, and was over 60 years old at her death. My mother lived near me until her death, and we lived about 7 or 8 miles from Samuel Leslie's and William J. Cureton's place and about 2 miles from old Waxhaw Church, in South Carolina. I am 70 years of age, and have a very distinct recollection of all the facts above stated as true and correct as stated by my mother and as recollected by myself.

JOHN LATHEN.

Tests:

DIXON LATHEN.
SAMUEL H. WALKUP.

SEPTEMBER 1, 1858.

I, Hugh McCommon, now aged 69 years, a resident of Waxhaws, in Union County, N. C., do hereby certify that I was born and raised within a mile of this place where I now live, and that my father's house was about one and a half miles due east from what is known as the George McCamie place. I have always well known the Georgia McCamie house from my boyhood, and it was always called the old McCamie house. It lays about one-fourth of a mile southeast from Cureton's Pond, and about the same distance east of the public road leading from Lancaster Courthouse, S. C., to Charlotte, in North Carolina. The remains of the old chimney are still visible. It is in North Carolina, Union County, and about 1 mile north of Waxhaw Creek. Jeremiah Cureton, sr., lived once in the same George McCamie house, which he afterwards turned into a ginhouse; and I have had cotton picked and packed in the same house when I was a small boy for my mother. It lies about one-fourth of a mile northeast of where Green Yarbrough now lives. It was always called by old Jery Cureton and other old persons, "the McCamie place." I have often heard several old persons say that Gen. Andrew Jackson, President of the United States, was born in the above described old George McCamie place.

That his mother was on her way from her residence on Twelve Mile Creek, N. C., to Mr. Crawford's, in South Carolina, and stopped at George McCamie's, who was a relation, and whilst at McCamie's was delivered of Andrew Jackson. I heard several old persons speak of this fact and among the rest was old George McWhorter, who said he was well acquainted with Gen. Andrew Jackson in boyhood and went to school with him and had many a fight with him, and who said that Jackson would never give up, although he was always badly beaten, as he (McWhorter) was the stronger of the two. McWhorter told me he was in the Revolutionary War toward its close, doing some service with the Whigs. He was a man of unquestionable good moral character and undoubted veracity and lived and died in the same neighborhood and died about 18 years ago. I also was well acquainted with the two old houses where Samuel and James Leslie lived. They lived near each other, not more than 100 yards apart, on the west side of a branch and about 100 yards from the branch, about a quarter of a mile southeast from the George McCamie place and about three-quarters of a mile from Waxhaw Creek, on the north side, and about half a mile east of the public road leading from Lancaster, S. C., to Charlotte, N. C. my parents lived about 1½ miles east of the Leslie's, and I have been there oftentimes, and they have done many errands of kindness as neighbors for my mother. The houses and men were all old when I was a boy. My father lived at the same place where I was born and raised before the war of the Revolution. Old Archy and Molly Cousar lived about three-quarters to a mile west of the Leslie's and George McCamie's. There was no woodland between Leslie's and McCamie's since I knew them. From Leslie's and McCamie's to the old Crawford and Wren places would be over 2 miles and a considerable portion of the distance has always been woodland until of late years. All of which is given under my hand as correct.

HUGH M'COMMON.

Tests:

HUGH C. NESBIT.
SAMUEL H. WALKUP.

CRAIGSVILLE, S. C., *September 1, 1858.*

Gen. S. H. WALKUP.

SIR: Your note of yesterday was handed me this morning and contents noted. Patent facts abundantly justify me in appending the following: I hereby certify Messrs. Thomas and Samuel Faulkner and John Lathen are my immediate neighbors and men of the highest respectability, and have been from early life orderly members of the branch of the Presbyterian Church with which I am connected, and their district is an impenetrable ægis against any suspicion involving their veracity.

D. R. ROBINSON.

Testimony of Samuel McWhorter:

"In 1765 Andrew Jackson, his brother-in-law, James Crawford, and his wife's brother-in-law, George McKemey, and other relatives moved with their families to America. Arriving at Charlestown, they located in the Waxhaw settlement, where many of their Scotch-Irish friends had preceded them. George McKemey bought land on Waxhaw Creek, some 6 miles from the Catawba River and about a quarter of a mile from three-fourths to a mile northwest of James Walkup's old mill, and that McCamie lived northwest a short distance from his house; and that old Sam Leslie lived very near to his father's house; and that they, the Leslies (Samuel and James), and George McCamie and John McCommon were all near neighbors and very intimate friends. My father was a Revolutionary soldier, he said, under Major Crawford, and was at Charleston, S. C., and drew a pension for several years before his death at the rate of about $41 per annum. The family record, an old Bible, exhibits this record in my father's handwriting: 'George McWhorter, born the 8th day of February in the year of our Lord 1762,' and is taken from the original family record now in possession of the family of my brother, John McWhorter, and I know this to be a correct copy of the original, which I have seen. My father lived at this place about 38 years before his death, and died February 4, 1841, about 80 years of age; he retained his mental faculties in full strength up to the time of his death.

"I have frequently heard my father and grandmother, Elizabeth McWhorter, speak of the birth of Andrew Jackson being at George McCamie's house in North Carolina. She said Mrs. Jackson was on her way from her residence on Twelve Mile Creek, N. C., to her relations in Waxhaws, and stopped to stay all night with her sister, Mrs. McCamie, and was taken in labor there; and that she, Mrs. McWhorter, was sent for as a near neighbor and was present at the birth of Andrew at the house of George McCamie in North Carolina; and that she took my father with her the next day when she visited Mrs. Jackson at McCamie's. My grandmother lived with my father about two years when I was about 9 or 10 years old, and died about 50 years ago. I am now 61 years of age. All of which I certify to be correct.

"SAMUEL MCWHORTER.

"Tests:

"SAMUEL H. WALKUP,
"H. C. WALKUP."

WALKERSVILLE POST OFFICE, N. C., *September ½, 1858.*

This is to certify that I, Jane Wilson, have heard many old persons, during the time Gen. Andrew Jackson was a candidate for President in 1828, speak of his having been born in North Carolina near old Jeremiah Cureton's store in South Carolina. The reputation of his birthplace being in North Carolina was very general. I remember hearing old Moses Vick speak on a public day of General Jackson being born in North Carolina, near Cureton, and claim that he was related to Jackson. I heard old George McWhorter also remark frequently that General Jackson and he were playmates and very familiar and went to school together; and he asserted that he knew the very spot where General Jackson was born, and named the place, and said it was in North Carolina, near old Jeremiah Cureton's store. A great many other old persons also on the same public day at Wilson's, and at other times, I have heard speak of Jackson having been born as above stated. I am now 59 years of age.

JANE WILSON.

Witness:

S. H. WALKUP.

Thomas Cureton's house, near corner stone between North and South Carolina, August 31, 1858:

"I, Thomas Cureton, sr., being about 75 years of age, do hereby certify that my father, James Cureton, came to this Waxhaw settlement from Roanoke River, in North Carolina, about 73 years ago, as I am informed and believe, when I was about 1 year old; and my brother, Jeremiah Cureton, who was about 20 years older than myself, came with him. My brother, Jeremiah Cureton, bought the George McCamie place some time after he came to this country, in about 1796, and settled down on the same place and in the same house where George McCamie lived. He remained there a few years and until he bought the place where William J. Cureton now lives. I know the George McCamie place well. It lies in North Carolina about a quarter of a mile east of the public road leading from Lancaster Courthouse, S. C., to Charlotte, N. C., and to the right of said road as you travel north, and lies a little east of south from Curetons Pond on said public road, and a little over a quarter of a mile from said pond. My brother, Jeremiah Cureton, was of the opinion, from information derived from old Mrs. Molly Cousar, the mother of Richard Cousar, that Andrew Jackson, President of the United States, was born at the George McCamie place, as above described. Mrs. Cousar was a neighbor and lived then, at the time of the birth of Gen. Andrew Jackson and until her death, in South Carolina, about 1 mile west from the George McCamie house, and was a very old woman when she died, which was about 35 years ago. She was a woman of undoubted good moral character and her veracity was unquestionable. The Leslie houses lay about half a mile in the southern direction from the McCamie house and north of Waxhaw Creek and east of the public road. I have lived for the last 72 or 73 years within 3 or 4 miles of the McCamie place.

"All of which is hereby certified to be correct and true to the best of my opinion and belief.

"THOMAS CURETON.

"Witness:

"SAMUEL H. WALKUP."

CURETON'S STORE, S. C., *September 3, 1858.*

My recollection, from what my father, Jeremiah Cureton, sr., told me, was that he, my father, lived on the old tract called the George McKamie's tract and in the house where George McKamie lived, and where it was said that Andrew Jackson, President of the United States, was born; and that he, my father, afterwards removed to the place where I now live. My father has frequently pointed out to me the old McCamie house as the place where, he said, he always understood Andrew Jackson was born; that old persons who knew all about his birthplace had said that was where Jackson was born; and that old Mrs. Mollie Cousar was one of the persons he spoke of having made that statement; and he spoke very confidently, from information he had received from various old persons, that the George McCamie house was where Jackson was born. This McCamie house lies about a half mile southeast of where I now live, and is in Union County, N. C., formerly called Mecklenburg County, N. C., and is a little over a mile southeast of what is called Cureton's Pond and about a quarter of a mile east of the State line and the public road leading from Lancaster Courthouse, S. C., to Charlotte, N. C., about 1½ miles north of Waxhaw Creek. I have the old land papers for said fact, which was patented to John McCane, 1761, upon a survey dated September 8, 1757; conveyed by McCane to Repentance Townsend, April 10, 1761, and by Townsend to George McCamie January 3, 1766; and by George McCamie to Thomas Crawford, 1792; and from Crawford and wife Elizabeth to my father July 23, 1796; and by my father to myself, and which I still own. My father came from Virginia with my grandfather, James Cureton, to Roanoke, N. C., and from there to Waxhams, S. C., and purchased the McCamie place, where he lived for a few years, and then removed to the place where I now reside in Lancaster District, S. C., where he remained until his death in 1847, being then 84 years of age. This is about all I can recollect from information derived from my father and these old land papers about the McCamie house and place.

W. J. CURETON.

Witness:

S. H. WALKUP.

In 1858 Col. S. H. Walkup, of Union County, undertook the task of gathering testimony as to the time and place of Jackson's birth. He spent a great deal of time in the work and accumulated conclusive evidence that Jackson was born in the "Waxhaws" March 15, 1767. The affidavits were published in the North Carolina Argus of Wadesboro, September 23, 1858, and were later printed in pamphlet form and in Parton's Biography of Jackson. The Charlotte and Lancaster papers of 1858 engaged in a controversy over the questions involved, but all finally acquiesced in the completeness of Colonel Walkup's presentation of the factor.

Fourteen affidavits were secured. They were made by persons, in several instances unknown to each other, yet they corroborate with uniformity every important detail. The substance of them is as follows: Six sisters—Misses Hutchinson—married and emigrated with their husbands to this country and settled in the "Waxhaws." Margaret married George McKemy and settled on Waxhaw Creek in North Carolina; Jane married James Crawford and settled on Waxhaw Creek in South Carolina; Elizabeth married Andrew Jackson, sr., and located near the present site of Pleasant Grove camp ground in North Carolina; Sarah married Samuel Leslie and settled near George McKemy's; Grace married James Crow and settled near Lands Ford, S. C. Andrew Jackson, sr., built his cabin 9 miles from South Carolina, and the site of it is known to this day. There in February, 1767, he died, leaving a widow and two sons—Hugh and Robert. His body was interred in old Waxhaw Cemetery, near Lands Ford. Mrs. Jackson, soon after the death of her husband, started to the home of her sister in South Carolina. On the way she stopped to visit Mrs. George McKemy, another sister, and in her home on the night of March 15, 1767, Andrew Jackson was born. So, as Mrs. Jackson recovered sufficient strength, she went, with her three boys, to the home of James Crawford in South Carolina, and there Andrew lived for 13 years. The Crawford place was 2½ miles from the McKemy place.

In the affidavits Benjamin Massey, John Carnes, John Lathan, James Faulkner, and Thomas Faulkner, the three latter being second cousins of Jackson, all declare that Mrs. Sarah Leslie and Mrs. Sarah Lathan (aunt and cousin of Jackson, respectively) often asserted that Jackson was born at George McKemy's and that they were present at the birth; that Mrs. Leslie "was sent for on the night of his birth, and she took her daughter, Mrs. Lathan, and recollected well of walking the near way through the fields in the nighttime." In addition is the testimony of Mrs. Elizabeth McWhirter and her son George and Mrs. Mary Cousar, who state that they were "near neighbors and present on the night of the birth of General Jackson at the house of George McKemy, in North Carolina," March 15, 1767, which testimony rests upon the statements of Samuel McWhirter, grandson of Mrs. Elizabeth McWhirter, and Thomas Cureton and Jeremiah Cureton, who heard the old persons speak often and positively of the facts.

For many years it was not known in which State the McKemy cabin was located, but the records of land titles in the Mecklenburg County courthouse established the fact that the site of the cabin has always been in North Carolina. In a deed given by McKemy to Crawford in 1792 it described as being "north of Waxhaw Creek." The McKemy tract of land was surveyed in 1757 for John McKemy, and was patented in 1761, and was sold by John McKemy to Repentance Townsend in 1761, and by Townsend to George McKemy in 1766. McKemy sold it to Thomas Crawford (son of James Crawford) in 1792; Crawford to Jeremiah Cureton, from whose estate it was purchased by J. L. Rodman, the present owner. The records of the transactions prior to 1842 are in the Mecklenburg County courthouse; after that year in Union County.

Thus we have the sworn testimony of 14 persons whose irreproachable character will be vouched for by persons now living, many of them unknown to each other and all agreeing in reporting the settled family traditions that Andrew Jackson was born in the McKemy cabin March 15, 1767, and the incontrovertible testimony of the county records that the McKemy place is and always has been in North Carolina.

In a letter recently to Colonel HAMMER, Member of Congress from North Carolina, and who has gone more fully and completely into this subject than any man and whose speech in Congress June 18, 1926, is irrefutable. Historian Craven says:

"The only thing that has even been in favor of the idea that Andrew Jackson was born in South Carolina is South Carolina imagination. Jackson's parents lived near Monroe, some 12 miles inside of North Carolina. Just before the birth of Andrew his mother started to visit near the South Carolina line and the child was born in the home of George McKemy, who was a brother-in-law of Mrs. Jackson. A few weeks later the mother and child went to the home of another relative named Crawford. For many years it was not known in which State the McKemy house stood, until an investigation of the records 15 years ago disclosed the recording of all deeds of the property in Mecklenburg and Union Counties, N. C. There never has been any doubt about it since, as it has been admitted for a hundred years that Andrew was born in the McKemy home, though he did not know in which State it was. From the age of 3 weeks to 17 years Andrew lived in South Carolina, but just as soon as he grew to manhood he returned to his native State and never left it until he was legislated out of it by the western part being made into the State of Tennessee. These are facts that have been proven so conclusively that there is no longer any dispute about it except for intellectual exercise and recreation for a few South Carolinians who have not had time to read up on it.

"When in the work for Tompkins I went to work on this subject there was a great debate between the Charlotte Observer and the Charleston News and Courier (Caldwell and Hemphill). I really wrote the editorials on this subject for Mr. Caldwell, though he sometimes worked on them, too. The South Carolina side presented complete proof that Jackson was born in the McKemy cabin, and we were caught and could not deny it. So I went to work to find out where it was and found the records as cited, showing that George McKemy

owned the place in Mecklenburg County (now Union) and that he never owned any property in South Carolina. It was South Carolina that proved Jackson was born in the McKemy cabin, and then we proved that the cabin was always in North Carolina. They have never had any argument since. There never has been any doubt about Jackson being born in the McKemy cabin. The records show the cabin is now and was then in North Carolina."

SOUTH CAROLINA'S CLAIMS

The claim of South Carolina has been very ably presented by its distinguished historian, Mr. A. S. Salley. But it is not sufficient to overcome the facts presented by North Carolina.

Briefly, South Carolina claims are chiefly based on two grounds: First, that Andrew Jackson himself repeatedly stated that he was born in South Carolina; second, on the evidence of Boykin's map. A copy of this map is in our hands and shows that the surveyor placed a star at the point over the South Carolina side of the line and marked it: "The birthplace of Andrew Jackson." The arbitrary act of a surveyor who places a cross mark on a map and calls it a birthplace of a distinguished man, with no further proof that a house stood there, or further evidence that the man was born there save only his diction to that effect, is not sufficient proof that such was the fact. In our visit to this spot we could find no one who ever heard of a house standing at the designated cross mark of Surveyor Boykin, and reading his line, by miles indicated, places in reality the supposed cabin a mile or two beyond where he claimed that the cabin stood. Positive evidence is preferred always to hearsay; the North Carolina claimants all state positively that Andrew Jackson was born at McKemy house and can show where the house stood and a photograph of it before it was torn down. But the claimants of South Carolina can show no cabin nor spot where any cabin stood at the cross mark designated by Surveyor Boykin. Indeed, there is evidence, if the older people of North Carolina are correct, that the South Carolina claimants originally agreed that the McKemy cabin was the correct place and not until a survey placed that cabin on the north side did they locate it elsewhere. We find no written evidence of this fact, however, save the statement of older people who were living then.

ERROR IS EXPLAINED

In regard to the other and far more formidable claim of South Carolina, to wit: "Jackson's own statement that he 'was born in South Carolina,' as he had been told, on the plantation whereon lived James Crawford," and his other statements to this effect, the last of which is in his last will and testament, it is plain that Jackson believed that he was born in that State. But we believe this is readily explained by an old letter which the writer found in the New York Times of December 27, 1892, written by the historian, Augustus C. Buell, and dated Philadelphia, December 23, 1892.

It must be remembered that Buell wrote a very excellent two-volume life of Jackson, which was published in 1874 and that while many lifes of Jackson have been written, only two of the authors of them, Parton, in his three volume Life of Jackson, and Buell, in his two volume Life of Jackson, ever went to Waxhaw settlement in both North and South Carolina and got first-hand evidence on the subject. Parton wrote the greatest of all lifes of Jackson. In fact, few greater biographies have ever been written. He spent several weeks in Union County, in 1858, went thoroughly into the Walkup evidence and the South Carolina claims, much of which he presents in full in this first volume and without hesitation states that Jackson was born in the McKemy cabin in what was then supposed to be in South Carolina, but was, in fact, by a true survey of the line, in North Carolina. Parton was a painstaking and accurate historian and had no doubt of the correctness of his conclusion. The only other historian who visited the spot in person was A. C. Buell, who followed Parton 25 years later, went over the same evidence, and reached the same conclusion. Later, in his letter to the New York Times, Buell clearly explains why Jackson claimed that he was born in South Carolina. I quote his statement, as follows:

"Noting the statement of Mr. A. J. Shipman that the birthplace of Andrew Jackson was in North Carolina and not in South Carolina, it may be remarked that two points are involved: First, the location of the cabin in 'the Waxhaw settlement'; second, the location of the boundary line between the two States. The present village of Waxhaw is in Lancaster County, S. C., some little distance from the line. But the 'Waxhaw settlement' was northeast of the village of to-day. The location of the cabin was determined by Mr. Parton, and it proved to be a fraction of a mile north of the State line now recognized. I had the honor to be personally acquainted with Mr. Parton and discussed this question with him in Washington City 30 years ago. I contended that at the time of Jackson's birth (1767) the 'Waxhaw settlement' was included in and under the jurisdiction of the colony of South Carolina, and it continued to be so considered until the rectification of the boundary by Floyd in 1793 or 1794. No accurate survey had been previously made. Floyd found that the boundary trended a little too much northerly and went west of the Great Peedee River, and his correction of it southerly brought the site of the Jackson log cabin just within the territory of North Carolina.

"Jackson himself was well aware of this fact, but he maintained that as his birthplace was within the jurisdiction of South Carolina when he was born he was a native of that State, or colonoy then, and that no subsequent rectification of the State line could alter or effect the fact of his nativity any more than it could any other transaction prior to the correction of the line and while the jurisdiction of South Carolina was undisputed.

"AUGUSTUS C. BUELL.

"Philadelphia, December 22, 1892."

It was a beautiful day in October, 1926, when I journeyed to the spot where once stood the log-cabin home of Andrew Jackson and his wife, Elizabeth. No sign of the cabin was to be seen save the mound of red clay that was made when the daubed log-built chimney fell in decay. Old barren fields, much of it grown up in sedge grass and bushes, were around. The beautiful strip of native forest was near—pine, hickory, a beech or two, and oak, and from the edge of this woodland in 20 steps of where once stood the cabin a deep, clear spring of purest water flowed out from under the roots of a gnarled old tree of hickory. In the wild grass where had stood the cabin flashed out the shimmering silver blades of the little wild plant that is not a weed nor yet a flower—more than both—life everlasting.

Hickory and life everlasting! Methought that nature, seeing that man had neglected the spot, was adorning the shrine with garlands symbolical of his immortality—hickories and life everlasting.

WHICH SHALL IT BE—CONSERVATISM OR LIBERALISM?

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an address I delivered the other day in New Yory City.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SIROVICH. Mr. Speaker and fellow Members of the House, political activities are characteristic only of a highly developed civilization predicated on a rather substantial average of literacy among human beings and accompanied by a widespread diffusion of learning. Constitutional government, which makes provision for political differences and the organization of political parties based on those differences, can thrive only where the average man and woman can become easily acquainted with political issues.

The thousand years following the death of Christ were relatively barren in their political significance since they represented centuries of darkness, of ignorance, of unspeakable misery and poverty, when petty barons fastened their ironclad rule on small areas, and the voice of humanity was wholly inarticulate.

Baronial and feudal autocracy was destroyed by a number of factors, chief among which was the discovery of gunpowder by the monk, Doctor Schwartz, which rendered the individual a power to be reckoned with in time of battle; the invention of the printing press by Gutenberg, which, through the slow processes of centuries, finally broke down the barrier of illiteracy; the Renaissance, which ultimately brought occidental culture to the intellectual level enjoyed by the ancient society that knew Plato, Aristotle, Cicero, and Horace; and by the Reformation which released millions of men and women from religious bondage.

In the wake of feudalism came autocratic monarchies, tempered sometimes by benevolence, such as characterized the rule of Frederick the Great, in Prussia; and at other times by political reforms such as that immortal document, the Magna Charta, which was wrung from the unwilling hands of John I at Runnymede in 1215; the establishment of the writ of habeas corpus; and the English Bill of Rights.

Autocracy in time yielded to parliamentary government, constitutional monarchy, and ultimately to democracy itself; leading inevitably to the establishment of political groups, which in time assumed the dignity of parties.

John Stuart Mill, the eminent British philosopher and economist, once aptly stated that in any enlightened community there must be of necessity two parties, one representing the forces of stability and order and the other the ideals of progress and reform.

This statement was made more than three-quarters of a century ago, and despite the many kaleidoscopic changes that have come over the character of governments throughout the face of the civilized world the basic division of parties in all countries adhering to a constitutional form government has been substantially along the lines suggested above.

In England the historic division has been along the lines of conservatism and liberalism, and while at the present time there are nominally three parties in England when the aims

and motives of these parties are subjected to a searching analysis we find that in reality they represent merely two divisions of opinion, the Conservatives standing for stability and order, while the Liberals and the Laborites are merely divided in their views concerning progress and reform.

In the countries of the continent the parties have been split into various minor subdivisions known as blocs, each bloc representing merely a different shade of either conservatism or liberalism, but in the main they adhere to the rigorous categorical classification of John Stuart Mill.

Ironically as it may seem, even within the ranks of the Socialist Party, the party which has presented the first definite economic program for government in the history of modern worlds, the same division along the lines of conservatism and liberalism, is to be found.

The right wing of the Socialist Party, as represented by the controlling Socialist interests in France and Germany, represent the conserving theory, the theory that the gains made by socialism should merely be conserved and that no further attack on constitutional government should be made; while the left wing as embodied in the principles of the dominating party in Soviet Russia, the bolsheviki, insist on a demolition of the present-day constitutional government and a complete and radical change in our economic structure.

In Italy, it might be stated parenthetically, a novel departure has been attempted from constitutional government.

The controlling party, the Fascisti, has adhered to the theory of the destruction of all other parties, the destruction of democracy itself, and the annihilation of parliamentary government by setting up the superstructure of a middle class dictatorship, but in my humble opinion this movement represents merely an economic trend in Italy to preserve the assets of the country and at the proper moment, when the rehabilitation of the economic life of Italy has been had, that country will unquestionably return to constitutional government.

When we make a primary examination of political conditions in America we find something very surprising; we find a definite trend in both parties toward conservatism, toward, in other words, stability and order and the retention of the present system in all its aspects.

This condition is primarily an outgrowth of economic changes brought about by the war which has made us financially and industrially the greatest Nation on the face of the globe and possibly the most powerful nation in an economic sense in the history of mankind.

The possession of earthly goods and property makes whole peoples, as well as individuals, conservative by its very nature and the present transitory period merely represents a degree of satiety on the part of the American people which is unprecedented in political history.

When we view and contemplate changes that might occur in the future, we see very clearly that such changes must mean merely a return to the old political and economic balance between the two major parties. One party must represent the forces of stability and order, be conservative by instinct and practice, and the other party must of necessity represent the forces of progress and reform and be liberal in its views.

We are dealing essentially with two different entities, one a political factor and the other an economic one. When we analyze both factors separately and then attempt to synchronize them into a whole in their application to the principles of the Republican and Democratic Parties, we shall see that both historically and economically, the Republican Party is destined to play the rôle of conservatism, while the Democratic Party, if it would but succeed, must present itself to the Nation as the party of progress, liberalism, and reform.

The economic changes that have come over the world since the beginning of the nineteenth century have been almost catastrophic in their nature.

When the people of enlightened countries saw the close of the eighteenth century, the railroad was but a mere dream, and sailboats paddled their leisurely way for three months across the Atlantic Ocean.

When the nineteenth century had closed an industrial civilization had been ushered into being in merely the span of one century that beggars description in the thoroughness of the changes it brought about. Railroads, factories, steamships, electricity, the phonograph, telephone and telegraph had all come into being, and so thoroughly changed the character of economic society that mere political changes, such as the establishment of a Republican Government in America or the downfall of autocracy in France, seem as mere ripples on the earth's surface.

These new economic and industrial changes marked the end of the agrarian feudal system and brought to life the factory system with all its accompanying benefits, and evils as well.

This industrial revolution promoted the rise of great cities, with their congested slums, their housing problems, their living problems, and also brought into being a conflict between those who employed human beings to work for them and those who were so employed. This conflict has been described as the conflict between capital and labor. In reality it is a more basic conflict. It is a struggle of one class to take advantage of enormous changes wrought by the genius of man and the struggle of another and larger class to prevent abuses and impositions.

This transitory system has now reached its climax, and we are living in the era of the perfect flower of the capitalistic system, an era when both capital and labor enjoy advantages that certainly could not have been conjured up in the minds of peoples in other times.

When our economic system has become so perfect, both through force of inventions and the concentration of enormous sums of money, it is difficult for us to conceive a system which from a purely monetary standpoint has reached such a high stage of perfection.

However, every system, regardless of the tremendous benefits it brings to the community at large must of necessity have its accompanying evils, and it is along the lines of attempting to remedy these accompanying evils that the two major parties of our country must take their stand either one way or the other, whether with the forces of conservatism, which refuses assistance to those who are suffering from the evils of the present economic system, or with the forces of liberalism and reform, which insists that those evils must be frankly and candidly recognized and ameliorated.

In the era prior to our entrance into the Great War, the Democratic Party under the inspiring leadership of that great statesman, whose name shall stand out as a shining light in the history of the world, Woodrow Wilson, had definitely taken its place with the progressive forces of the Nation, and by a rapid series of reforms, like the introduction of the Federal reserve system, to prevent the occurrence of panics and thus preclude the ruination of the great masses through unemployment, the Clayton Antitrust Act, which prevents undue combinations of capital to defeat the will of the majority, through the Adamson eight-hour law, which guarantees an eight-hour day to those employed on the railroads, and through the vast number of workmen's compensation, social insurance laws, child welfare, and widows' pension measures, adopted in the various States under the inspiration of President Wilson's leadership and by and through the efforts of the Democratic Party, the great party of Jefferson and Jackson had become definitely committed to a policy of liberalism and it faced the Nation as the liberal party of the United States of America.

A halt was called due to the hysterical period of the Great War and partially due, as outlined above, to the comfortable prosperity enjoyed by the American people.

Our work is still to be done. The Democratic Party can not succeed as a conservative party. There is room for only one party of stability and order in America, and that dubious distinction has been preempted by the Republican Party.

The Republican Party ever since the Civil War, and more frankly to-day, has definitely represented the interests of those who have managed to acquire tremendous wealth out of the natural resources and the culminating efforts of the American people, which represents the views of this great and, we must admit, somewhat useful class of citizens in its opposition to any social legislation, in its definite adherence to a policy of taxing the wealthy in a minimum degree, in its opposition to Government ownership of public utilities like railroads, waterworks, gas and electricity plants.

The Republican Party has a perfect right, and perhaps it is well for the Nation that it exercises that right, to play the rôle of conservatists, but the Democratic Party can not merely be satisfied with imitating the Republican rôle; it must play the part for which the principles of its great leaders and the doctrines of its early founders have cast it.

The Democratic Party must again frankly adhere to a platform of social reform, must again dedicate itself to a betterment of housing and living conditions, and it must once more stand forth as the steadfast defender of the great mass of labor against the monopolistic interests of the country.

It is only by being frankly what it was destined to be that the Democratic Party can ever achieve any measure of success.

Democrats can not furnish any opposition for Republicans in the conservative field, for that field represents a half century of Republican effort. The great bulk of conservative voters are Republican throughout the Nation, and by attempting to play a conservative rôle the Democratic Party must of necessity merely alienate hundreds of thousands of American men and women who have followed its standard even to defeat

rather than abandon the progressive principles for which it stood.

It is more important for the Democratic Party not to be wrong on any subject than for it to count the number of those who stand with it.

The principles of liberalism have suffered a slight eclipse in the decade following the Great War, but the eclipse is fast passing; economic changes are quickly readjusting themselves, and there is a crying need for the amelioration of economic abuses through political artifices.

This need was slightly indicated by the 5,000,000 votes cast in 1924 for Senator La Follette, who represented forces not only of liberalism but extreme radicalism, forces that were not merely committed to constitutional changes to aid the great mass of people but also advocated radical changes in our economic life and the absolute Government ownership of all utilities either of a public or quasi-public nature. Five million votes are not to be easily regarded, and it is safe to say that of this 5,000,000 at least 4,500,000 were votes of men and women who would be normally Democratic if the Democratic Party but devoted itself to its historic task.

The hysteria and reaction of the Great War is fast passing away and we are returning to normal conditions, and what is of greater importance, the psychology of the American mind is again becoming normal.

The sun of liberalism is once more shining through the dark clouds of bitter reaction and the Democratic Party must be prepared to once again accept the leadership of the liberal forces of the Nation. In so doing, it can not fail.

Representing these liberal forces of progress and reform, there is looming upon the Democratic horizon the militant figure of a man of destiny, coming from the sidewalks of New York, the great East Side, who in all probability will be called upon as the leader of Democracy of our Nation and their candidate for the Presidency of the United States. Al Smith, symbolizing and embodying in a life of public service the principle of progress and reform, will bring to the Presidency of the United States a fresh point of view that is wholly unfettered by hidebound traditions, and autocratic and aristocratic antecedents, and who will pierce through the meaningless entities of sovereignties and governments to the great benefit of the masses that compose the peoples of the world.

Al Smith who, in his work on the factory commission, that brought about workingmen's compensation and employers' liability, and on the commission to inquire into the subject of widows' pensions and child welfare, on which body I had the honor to serve with him, brought about greater social reforms through legislation than has been known in any State of the Union; who, in his labors as a delegate to the constitutional convention of 1915 grasped very clearly the need for administrative reorganization of the government of our State; and who, in his subsequent work as Governor of the State of New York has been able to breathe the spirit of humanity into the interpretation of the financial statements of our State government, will unquestionably approach international affairs in the same human, progressive, and socially minded spirit that has characterized all his efforts of almost a quarter of a century.

Voltaire once aptly declared that "we care most for those portraits which more nearly represent ourselves." It might similarly be said of Al Smith that we care most for him because we see in him the same lack of cant, of hypocrisy, and of a firm desire to move the status quo that are characteristic of the plain peoples of the world combined with that extraordinary common sense that has heretofore been the guiding light in all his deliberations.

The United States, which has come to be recognized as the strongest estate of modern times, possibly the strongest world power economically that civilization has ever known, without any pretense at maintaining a great colonial empire, with a distaste for both militarism and imperialism, can well find its leadership in its efforts to humanize international relations as well as to continue in its onward and forward march, fighting for progress and reform, can well afford to follow to victory the vigorous, militant, and virile figure of destiny, Alfred E. Smith.

MEXICAN IMMIGRATION

Mr. BOX. Mr. Speaker, numerous press reports which have been coming to my desk for several days from the Southwest bear such headlines as the following:

> Radicals working among local Mexicans—Four leaders arrested—Court denies habeas corpus writ for Mexican laborers—Sheriff issues warning to all valley Mexicans.

The character of the reports is indicated by the headlines quoted and leaves little doubt that a rather serious labor trouble exists in the Imperial Valley of California and perhaps other regions, in which Mexican aliens are forbidden to assemble in crowds, several leaders are arrested and jailed, and some of them heavily fined. It is said that great numbers of these alien peons are now threatened with deportation to Mexico on account of alleged lawless, radical conduct. I know nothing and do not pretend to speak of the merits of the labor trouble existing in that vicinity. Unless the leaders arrested, imprisoned, and fined are acting lawlessly, their arrest and imprisonment is not justified. If the conduct of the leaders and the imported Mexican peon laborers is as lawless as their treatment indicates, they constitute a bad element to have imported into the United States by scores of thousands annually.

In this connection I call the attention of the House to statements made by me before the House Committee on Immigration and Naturalization in support of the bill (H. R. 6465) for the restriction of Mexican immigration, in which I said:

> The uninformed and unthinking frequently take the view that very ignorant and badly downtrodden people are not dangerous under the influence of radicalism. The very reverse is true. The mobs of Ancient Rome, the peasants of France in the days of the French Revolution and Reign of Terror, and the parts recently played by Russian city workers, peasants, and serfs, all prove that such material is the best fuel for the fires of revolution. In proportion to her population, Mexico is now by far the most bolshevistic country in the Western Hemisphere.
>
> If there are representatives of the great sugar companies of the West here, I will suggest for their careful consideration the question whether or not they are not now disturbed about the prospect of trouble with the I. W. W. in the beet fields and elsewhere in the West. I will leave that with the representatives, if such there be here, for their earnest consideration. They know whether they are in the midst of those troubles or not.
>
> I understand that these Mexicans in the United States have leaders, Spanish and Mexican, who are able to lead them about as they lead their own people at home, where they create great disturbances; and under a more aggressive leadership in America, backed up by their own people taking part in this lawless disturbance, there is great danger that they and others like them will aggravate our situation.

I respectfully invite the attention of the membership of the House to the hearings conducted by our committee on my bill, H. R. 6465, and earnestly advise Members that the trouble mentioned in the press reports referred to is but a minor feature of the situation being caused by the mass importation of tens of thousands of these peons. Press reports indicate that their importers are attempting to jail some, overawe some, and cause others to be deported, and that they propose to refill the places of those jailed and deported by bringing in crowds of others of the same kind.

MUSCLE SHOALS

Mr. MORIN. Mr. Speaker, I present a conference report on Senate Joint Resolution 46 relating to Muscle Shoals and Dam No. 2 for printing in the RECORD.

RECOGNIZING THE HEROIC CONDUCT, ETC., OF OFFICERS AND CREWS OF THE U. S. S. "REPUBLIC," "AMERICAN TRADER," "PRESIDENT ROOSEVELT," "PRESIDENT HARDING," AND THE BRITISH STEAMSHIP "CAMERONIA"

Mr. WHITE of Maine. Mr. Speaker, I call up the conference report on the bill (S. 1609) recognizing the heroic conduct, devotion to duty, and skill on the part of the officers and crews of the U. S. S. *Republic, American Trader, President Roosevelt, President Harding,* and the British steamship *Cameronia.*

The Clerk read the conference report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1609) recognizing the heroic conduct, devotion to duty, and skill on the part of the officers and crews of the U. S. S. *Republic, American Trader, President Roosevelt, President Harding,* and the British steamship *Cameronia,* and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same.

WALLACE H. WHITE,
FREDK. R. LEHLBACH,
EWIN L. DAVIS,
Managers on the part of the House.

CHAS. L. MCNARY,
DUNCAN U. FLETCHER,
W. L. JONES,
Managers on the part of the Senate.

The conference report was agreed to.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent to address the House for five minutes on the subject of general pension legislation, also the public-building program.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

PENSIONS—PUBLIC-BUILDING PROGRAM

Mr. KNUTSON. Mr. Speaker, as chairman of the Committee on Pensions I am frequently called upon by colleagues and others to define the several pension acts now upon the statute books. For the convenience of the membership of the House I herewith give a brief synopsis of the pension laws applying to all services, save those of the Civil and World Wars.

The act of July 16, 1918, was unsatisfactory in that it allowed Spanish war widows but $12 per month, with $2 per month additional for each child under the age of 16 years. Under that law the widow had to prove dependency, which was objectionable to many claimants.

The act of September 1, 1922, increased the rate to widows from $12 to $20 per month, with $4 per month for children under the age of 16 years. This act also eliminated the dependency feature. These rates were further liberalized by the act of May 1, 1926, which raised the rate to $30 per month, with $6 per month for each minor child under 16 years of age.

Commissioner of Pensions Scott characterizes the act of May 1, 1926, as the "best drawn and most liberal pension law ever enacted by an American Congress." It raised the rates for veterans of the Spanish War, Philippine insurrection, and Boxer rebellion to a maximum of $50 per month, with a rate of $72 where the pensioner requires the regular aid and attendance of another person. This act also waived the requirement that disability be service connected, thereby enabling many thousands of disabled to be placed upon the pension rolls. It gave a horizontal increase of 66 per cent.

Until the enactment of the Indian war act of March 3, 1927, generally known as the Leatherwood bill, we had dealt niggardly with those who made possible the settlement of the great West. Previous acts in their behalf had limited benefits to participants of wars specifically named, working an injustice on the survivors of other and equally important wars and campaigns. The Leatherwood law increased the rate from $20 to $50 per month to the soldiers, and widows pensions were increased to $30, with an allowance of $6 for each child under 16 years. This act also provides pensions for widows who have remarried but are now widows.

In closing I wish to embrace the opportunity afforded to commend my colleagues on the committee during the past eight years for their unselfish and intelligent cooperation in my effort to make the lot easier and happier for those who have served their country unselfishly and well in times of national stress. Work on the Pensions Committees of the two Houses of Congress entails much time, patience, judgment, and, above all, a sympathetic understanding and a sincere desire to relieve distress, when compatible with the general pension policy of the Republic. I am happy to say that each member of the Pensions Committee of the House has brought to his task on that committee the several attributes so necessary to its efficient and successful conduct, and for their unselfish help I acknowledge my profound appreciation and deep thanks.

While I have the floor I also wish to make a few observations on the public-building program.

GRANITE—THE ROCK OF AGES

The Federal Government has embarked upon the most pretentious public-building program in its history. New park areas are being laid out and a number of magnificent public buildings will be erected. The plan, when completed, will make the city of Washington the most beautiful capital in all the world. These buildings should be constructed with view to permanence, and in this connection I wish to call attention to the desirability of using granite.

To begin with, there is a psychology about granite that gives a feeling of absolute permanence, based upon the very foundation of the world itself. Granite is not a congealed mud or sedimentary stone. It is the most lasting building material known to man. What structures can compare with the great pyramids in Egypt, which are faced with granite similar to that found in the granite-producing districts of Minnesota?

St. Cloud granite has a minimum amount of pore space, which means minimum absorption; therefore, a minimum amount of expansion and contraction on account of varying temperature, resulting in minimum deterioration.

Of all stone, Minnesota granite has the greatest resistance to weather, hence is most adaptable for building purposes in a country with such a varied climate as ours.

Granite is the only building stone possessed of a true combination of beauty, strength, and durability. It has a wide range of colors, which is suited to many purposes.

Minnesota granite will not stain, fade, scale, or deteriorate; neither can it be marred, scarred, scratched, or damaged. Unlike some stones which fade and become lifeless when exposed to the elements, Minnesota granite retains its luster and polish and is as enduring as the rock of ages—symbolic of permanence.

While the initial cost of using granite is somewhat higher than for the softer stones, in the long run it is by far the more economical. The softer and lighter-colored stones require an elaborate and expensive method of cleaning, while Minnesota granite can be cleaned with brush and plain soap. This is a very important item in considering the expense of construction.

Building engineers are agreed that, prorated over a 20-year period, polished granite, whether for exterior or interior construction, is the cheapest material they can use. Its permanence obviates the necessity for replacing. Private building concerns recognize this very important item, and therefore use granite where permanence is desired.

Granite can not be equaled for memorials. For what could be more in keeping with the undying memory of a great man or deed than a structure built of the Nation's most durable stone.

Minnesota is the second largest granite-producing district in the world, and is capable of supplying all of the Nation's needs in the way of permanent building material, memorials, and monuments.

Minnesota granite producers operate the best mechanically equipped structural and memorial granite-manufacturing plants in the world, and improvements are being added constantly. I mention this so that those who are charged with executing the building program that we have recently embarked upon may know that Minnesota producers are equipped to handle all of the business that may be placed with them.

Mr. Speaker, the Republic will endure for all time to come, and we should construct our public buildings and memorials from material that will endure as long as the Republic stands. There is but one stone that will do this, and that is granite—the rock of ages.

FIVE-YEAR CONSTRUCTION FOR THE UNITED STATES BUREAU OF FISHERIES

Mr. WHITE of Maine. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 13383) to provide for a five-year construction and maintenance program for the United States Bureau of Fisheries, with Senate amendments.

The SPEAKER. The gentleman from Maine asks unanimous consent to take from the Speaker's table the bill (H. R. 13383), with Senate amendments, and agree to the Senate amendments.

The Senate amendments were read.

The SPEAKER. Is there objection?

Mr. CRAMTON. For the present I object.

BRIDGE ACROSS THE KANAWHA RIVER, DUNBAR, W. VA.

Mr. DENISON. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 13399) authorizing the Baltimore Gas Engineering Corporation, a Maryland corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near Dunbar, W. Va. The author of the bill, the gentleman from Virginia [Mr. ENGLAND] says that it is a matter of great urgency.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

Mr. LAGUARDIA. Reserving the right to object, is this for their own use?

Mr. DENISON. That is what the author tells me.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

FISCAL RELATIONS BETWEEN THE UNITED STATES AND THE DISTRICT OF COLUMBIA

Mr. SIMMONS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the subject of the fiscal relations between the United States and the District of Columbia.

The SPEAKER. The gentleman from Nebraska asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. SIMMONS. Mr. Speaker and Members of the House, on February 21, 1928, during the consideration of the District of Columbia appropriation bill I discussed the subject of fiscal relations between the United States and the District of Columbia. The discussion at that time dealt largely with the subject

of taxes on real and tangible personal property—for it is from those two items that the greater part of the District revenues come. So far as I know, no one has questioned the figures offered to the House at that time.

Following that discussion, it was suggested by some Members that they would like to have a study made of various other tax items and sources on a comparative basis between the District and other taxing bodies. At the request of the then chairman of the Appropriations Committee, Mr. Madden, the Bureau of Efficiency is making such an investigation, with the expectation that it will be ready for the next session of the Congress. In the meantime, it is possible, and it seems advisable, to discuss some features of the tax situation not heretofore touched upon.

Time has not permitted me to go into the tax situation in detail in all the States or cities. The statement made and the question asked in the Senate by the Senator from Colorado [Mr. PHIPPS], that Washington's "taxes can not be made greater and that personal property rates are now entirely too high * * *. The limit has been reached. Does anyone doubt that Washington has practically reached the limit of her taxable resources?" I venture to answer that I doubt seriously that Washington has reached the limit of her taxable resources. Such an answer must be a comparative one—and for the purpose of comparison I have selected the Senator's State of Colorado and its great capital city, Denver.

Members may take this outline and by inserting their State and cities with their State and city rate determine whether the District of Columbia is undertaxed, overtaxed, or adequately taxed. Members, of course, will reach their own conclusions; mine is that the District is very much undertaxed, when compared with other cities.

Denver is about three-fifths the size of Washington. The city and county of Denver collected in 1927, $450,000 in auto-license fees from approximately 75,000 cars. Washington collected during the period $141,116 in auto-license fees from approximately 95,000 cars. The District of Columbia has the lowest auto-license tax in the United States. Colorado collects a license fee on passenger cars with a minimum fee of $5. In the District it is $1. Private commercial cars and trucks in Colorado pay from $10 to over $50. In the District the charge is $1. Passenger cars for hire have a minimum fee of $20 in Colorado with $1 extra for each seat over nine. In the District of Columbia the rate is from $6 to $12. Colorado charges an auto dealer a minimum fee of $20. Here dealers pay the regular rate for other cars. It is not practicable to analyze the 105,000 registrations in Washington, but a conservative estimate of the amount the District would collect if we had a license tax here equal to that in Colorado is $740,000. There is actually collected here $141,116. In Colorado the money collected from the license fees goes 50 per cent to the State fund for roads and 50 per cent to the county fund for roads. In the District license fees are placed in the general fund and used for general city purposes. In that the people of the District have a decided advantage over every other city in the United States.

In Maryland the license fees go into a special fund for expenses within limits of appropriation made by the general assembly. The balance goes one-fifth to the city of Baltimore and the remainder to the State roads commission for construction, maintenance, and repair of State highways.

In Virginia the auto-license fees go into a special fund expended under direction of the State highway commission for the maintenance and construction of roads and bridges included in the State highway system, including roads of the State highway system located in incorporated towns whose inhabitants do not exceed 2,500 or whose houses are located at least 200 feet apart.

In practically all the States the license fees are spent almost exclusively on country and out of the city roads.

Forty-four States of the Union levy a tax on gasoline. The average tax is 2.55 cents. Colorado levies a 3-cent-a-gallon tax. The District of Columbia has a tax of 2 cents per gallon. The city and county of Denver collected in 1927 $1,250,000 in gasoline taxes. In the District the collection was $1,057,850.02. If we had a 3-cent tax here as Colorado has the District would collect $600,000 more than it collected last year.

Maryland, the District's neighbor on the north, has a tax of 4 cents a gallon. If we levied that tax here the District treasury would receive $1,200,000 more than is now received.

Virginia, the District's neighbor on the south, levies a tax of 5 cents. If that tax were collected in the District we would have in the treasury here $1,800,000 more than is now collected.

There is in addition this very great difference between the District and the States of the Union. Let me illustrate with Colorado, Maryland, and Virginia as compared with the District. The gasoline tax collected in the District of Columbia must by law be appropriated exclusively for road and street improvement and repair within the city where it is collected. Thus the gas tax inures to the direct benefit of the city of Washington and its taxpayers.

In Virginia, unless changed by the last legislature, 66⅔ per cent goes to the construction of roads and bridges in the State highway system and 33⅓ per cent for construction of roads and bridges in the county highway system. Thus, money collected in the cities of Virginia is spent in and on county roads. Maryland's gasoline tax money goes into the State road maintenance fund and is expended by the State legislature for that purpose. Colorado's gasoline tax money goes 50 per cent to the State highway fund, 50 per cent to the counties in proportion to the number of miles of State routes and State highways in each county.

Similar provisions are in the laws of most of the States, provisions which provide that gasoline-tax money collected in the city be spent in the country, while in Washington gas-tax money collected here in the sum of $1,057,850.02 in 1927 is spent here on city streets relieving the taxpayer here of a burden that other city dwellers carry.

On February 21, 1928, when discussing the District of Columbia appropriation bill, I inserted in the CONGRESSIONAL RECORD, page 3369, a statement on comparative tax rates of cities made by the Detroit Bureau of Governmental Research. I again call it to the attention of the House and any others who may be interested. It is an independent study, made with no purpose to serve save to reach the truth. There taxes are adjusted to a uniform basis of 100 per cent basis of assessment, thus permitting a direct and correct comparison between cities. Further, there is an adjustment of rates to indicate what the actual tax rate would be were the full value used in assessing. Finally worked out, Washington's tax rate is fixed at $15.30 per $1,000—the District auditor says said rate should be $16.20, which, for our purpose here, I accept. Denver's rate in the same table is fixed at $25.52 per $1,000 of value. Thus, it will be seen that Denver pays a much greater tax than does Washington.

Had the taxpayer of Washington in 1927 paid a tax equal to that paid in Denver there would have been a real-estate levy here of $24,151,297 as against an actual levy in the District in 1927 of $17,034,614. In other words, if the District had had in 1927 a tax rate equal to the adjusted rate of $25.52 shown for Denver (the actual rate in Denver was $31.90 as against an actual rate in the District of $18) we would have had a tax levy in the District of $7,116,683 more than actually levied. This is based on a rate of $1.80 for Washington and $2.52 for Denver. But on a percentage basis, using again the Detroit table, the District figure is $16.20 to $25.52 for Denver, or Washington has a tax rate 63.5 per cent of that in Denver. Applying that percentage to the District levy we would collect here $29,011,169 as against an actual real-estate levy of $19,169,934, or if the District of Columbia paid a percentage basis equal to that of Denver we would collect here $9,841,235 more than is now collected on real estate.

These figures and those of the table show that if Washington is "taxed to the limit" then the other cities of the Nation including Denver are taxed much beyond the limit.

INHERITANCE TAX

Colorado levies an inheritance tax of from 2 per cent beginning with $2,500 up to 16 per cent on $500,000 or more. In 1927 the State of Colorado collected in inheritance and estate taxes $686,739.89. There is no such levy in the District of Columbia. Forty-five States of the Union levy an inheritance tax in some form.

CORPORATION TAXES—DOMESTIC

In Colorado no par value stock is assigned the value of $1 per share for initial taxes in domestic corporations. There is no such provision in the District of Columbia. Colorado charges a series of incidental fees for corporations beginning business. No such fees are charged in the District of Columbia.

FOREIGN

Colorado charges an admission tax on foreign corporations with a minimum fee of $30. No such fee is charged in the District of Columbia. Other incidental fees are charged for which there is no similar charge in the District of Columbia.

ANNUAL TAXES

Colorado charges an annual license tax on domestic corporations based on the total authorized capital stock beginning with a minimum fee of $10. There is no comparable tax in the District of Columbia. A fee is charged in Colorado for filing the annual report of domestic corporations. No such fee is chargeable in the District of Columbia. A like annual charge is made against foreign corporations doing business in Colorado. No such charge is made in the District of Columbia.

In the District of Columbia there is an exemption of $1,000 to the heads of families on household goods, etc. In Colorado it is $200. This is an exemption from taxation of practically all the homes of Washington. It has been estimated that the District would collect $748,000 more in taxes if the exemption of $1,000 were reduced to $200, such as Colorado and many of the States have.

If the District of Columbia levied taxes comparable to Denver's and had the exemption of $200 that Colorado gives her citizens it is estimated that there would be collected here $1,122,880 more than is now collected.

Colorado levies a license tax of 2 cents on each $1,000 capital stock in business in the State and 2 per cent tax on insurance-company gross premiums in the State. The District of Columbia levies a license tax of 1½ per cent.

Every State but five authorizes the levy of a poll tax in some form. Colorado levies a $3 road tax by road districts. There is no poll tax in the District of Columbia.

Washington's per capita tax levy for all purposes in 1926 was $36.87. Denver's was $48.70.

In 1926 Denver spent per capita for current expenses of schools $15.45, while Washington spent $14.77. In Denver the school expense was 38.1 per cent of the total city and school expense. In Washington it was 30.7 per cent.

In this connection it may be well to remember the statement of Mr. Theodore W. Noyes, editor and owner of the Washington Star, that "the approximately accurate standard of measuring comparative tax burdens is the per capita of taxes actually paid in the various cities."

The District of Columbia does not levy a general franchise tax on corporations which receive no special franchise or privilege.

The question is asked, "If the advocates of the plan (lump sum) believe that $9,000,000 was fair in 1924, how can they claim that the same sum is fair in 1929?" The answer is perfectly obvious. Nine million dollars was too much in 1924. It is too much in 1929.

There is such a variance in the laws of the States dealing with intangible property and many of the corporation taxes that a brief summary is not possible. I hope to be able to give the House the result of a detailed study of these two taxes next session. Nothing in my studies so far indicate an excessive or unusual tax in the District of Columbia in either the intangible or corporation-tax field.

However, I am able to give you a list of intangibles which are exempt from taxation in the District, which may be of value to members by way of comparison with their own States. The exemptions are:

EXEMPTIONS

1. Savings deposits of individuals in a sum not in excess of $500 deposited in banks, trust companies, or building associations, subject to notice of withdrawal and not subject to check.

2. Shares of stock of the local banks, including savings banks, the telephone and electric light companies, the gas companies, and street railway companies, the bonding and title insurance companies, and building associations, of the District of Columbia, and any other corporation paying a tax upon its gross receipts, earnings, premiums, etc.

3. Shares of stock of any business company incorporated in the District of Columbia, and receiving no special franchise or privilege in addition to incorporation, whose property, real and personal, or capital stock is subject to taxation here.

4. Shares of stock of business corporations which are incorporated in other jurisdictions, but chiefly for the purpose of doing business in the District of Columbia, and receive no other special franchise or privilege here, and whose property, real and personal, or capital stock, is subject to taxation here, and which are engaged in business here.

5. United States bonds. State, and municipal bonds, District of Columbia bonds, and such other bonds as are specifically exempted by Congress from taxation, are not subject to taxation under the intangible personal property act of the District of Columbia.

6. Deposits in bank and trust companies of corporations and individuals neither resident nor doing business in the District of Columbia.

7. Bank notes or notes discounted or negotiated by any bank or banking institution, saving institution, or trust company.

8. Savings institutions having no capital stock, building associations, fireman's relief associations, secret and beneficial societies, labor unions, and labor-union relief associations, beneficial organizations, paying sick or death benefits, either or both, from funds received from voluntary contributions or assessments upon members of such associations, societies, or unions.

9. Life or fire insurance companies having no capital stock.

10. Corporations, limited partnerships, and joint-stock associations within said District, liable to tax under the law of the said District on earnings or capital stock, shall not be required to make any report or pay any further tax under this section on the mortgages, bonds, and other securities owned by them, in their own right, but such corporations, partnerships, and associations holding such securities as trustees, executors, administrators, guardians, or in any other manner, shall return and pay the tax imposed by this section upon all securities so held by them as in the case of individuals.

11. National-bank stock is exempt from taxation under section 5219 of the United States Statutes. Such stock is taxed in the city or town where the bank is located and not elsewhere.

12. The exemption provided by law on deposits runs to the sum of $500, subject to notice of withdrawal, and not subject to check. Above that amount, the excess is taxable. As to stock held by individuals in building associations, the same ruling should be followed that applies to stock held in local banks—i. e., that such stock is exempt from taxation, whatever the amount held.

13. An individual residing elsewhere but having a bank deposit in the District of Columbia (as a matter of convenience) would not be taxable in this jurisdiction.

14. Proceeds from war-risk insurance.

Again the statement was made in the Senate that—

the rate of five-tenths of 1 per cent on the full value of intangibles is clearly unreasonable and above any rate exacted elsewhere in this country, so far as I have been able to learn.

Again I must call attention to the State of Colorado. Intangibles and tangibles are taxed exactly at the same rate in Colorado, according to my information. Denver's tax rate on all available information which we have is at least one-third more than that in Washington. But in Washington intangibles are taxed at 30 per cent of the rate on tangibles. Denver's rate is fixed by the Detroit bureau at $25.52—which applies to both tangibles and intangibles. That rate is decidedly favorable to Denver and yet the Washington rate on intangibles is $5. Or Denver's rate is not less than five times the Washington rate.

Is there any large city in your home State where grade-school children throughout the entire municipality can only attend sessions half a day because of lack of sufficient buildings? How many cities with a population of more than 100,000 inhabitants house many of their children in portable frame buildings with outside wash rooms?

The above question was asked in the Senate by Senator PHIPPS. The answer is that there was an actual enrollment in the schools of Washington March 12, 1928, in the elementary grades of 50,723. Of that number, slightly more than 5 per cent, or 2,674, were housed in 75 portable buildings, 65 being in the elementary schools and 10 in vocational and the seventh and eighth grades of the junior high.

On March 31, 1928, Denver had 75 children in part-time classes, 340 elementary-school pupils, and 200 junior high-school pupils in temporary quarters, 160 elementary-school pupils in portable buildings, and 180 in church rooms and gymnasiums—with modern facilities available in all temporary quarters. Thus Denver has a total of 880 pupils in temporary quarters as against 2,674 in Washington. Denver expects to eliminate all part-time and temporary quarters except for 125 elementary pupils this year. Denver in this respect would seem to be ahead of the District, but even Denver is "not without sin."

Again the statement was made that—

Irrespectiye of the rate of taxation I wish to state that my home city of Denver has more adequate school accommodations than Washington, the Capital of the Nation. We have better library facilities and better-cared-for streets. We do not have to wait for five years in order to obtain sufficient schools for our children, nor will we have to beseech Congress each year for that purpose. We have those schools now.

I submit the following for the consideration of the House:

Denver in 1925–26 had 23.8 pupils in daily attendance in junior high schools per teacher. Washington at the same time had one teacher for 19.5 pupils.

In the senior high schools Denver had one teacher for 22.3 pupils, while Washington had one teacher for 20.3 pupils.

In the elementary grades Denver had one teacher per 26.8 pupils, while Washington had one teacher per 25.8 pupils. In the kindergarten Denver had one teacher to 45.4 pupils, while Washington had one teacher for 16.5 pupils.

These figures are based on average daily attendance.

The city and county of Denver have a bonded indebtedness for—

Schools	$10,227,000
Water	21,573,600
Moffat Tunnel (Denver share)	13,613,600
Viaduct	260,000
Building site	500,000
Paving	763,000
Total	46,937,200

The District of Columbia has no indebtedness, bonded or otherwise, and is on a cash basis.

Not only has Washington no bonded or other indebtedness but on June 30, 1927, that city had to its credit in the Treasury of the United States a cash balance of $11,451,944.16, subject only to outstanding appropriation obligations amounting to $7,781,055.59, leaving a free and unencumbered cash balance of $3,670,888.57.

Denver had a per capita net city debt in 1926 of $112.95. Washington has none.

Complaint is made that while the United States grants considerably over $9,000,000 a year to the District for the general expenses of the District that it likewise granted in 1926 something over $115,000,000 in subventions to the States—and that therefore the Federal contribution here is as nothing in comparison and that the District is "slighted not favored" by the United States. What are the facts about this $115,000,000? First, the $9,000,000 plus which the District received from the Federal Treasury goes to pay the general operation costs of the city government. No other city in the United States receives such a contribution. As I have heretofore pointed out this contribution pays the entire cost of the public playgrounds, public buildings and parks, National Capital Park and Planning Commission, including $600,000 for the purchase of land, the Zoo, Anacostia development, the police department, the fire department and almost all the salary roll of the city amounting to over $2,000,000. I submit that it very materially relieves the taxpayer of Washington of his general tax burden. But what of the $115,000,000 contributed by the United States to the States? This data is found in Financial Statistics of States, 1926, prepared by the Department of Commerce, pages 28 and 76.

During that year the United States granted the States for education, $11,778,829. These contributions were for the support of State Universities and agricultural and mechanical colleges. There are none such in the District of Columbia supported by District funds and of necessity no such contribution can be made to the District.

For soldiers and sailors' relief and homes $896,008 was given to 28 of the States. Here a relief item is carried in the District bill, paid out of District funds to which the United States contributes. Eighty-four million one hundred and ninety-five thousand five hundred and forty-five dollars was contributed for cooperative construction of Federal-aid highways. The District received no such contribution. Were it the capital of a State or a city in a State and not the Capital of the Nation, Washington would have received no part of this money, for under the Federal aid act the money can not be spent on highways or streets of a municipality having a population of 2,500 or more, except streets along which, within a distance of 1 mile the houses average more than 200 feet apart. So that no city benefits from that fund, and while Washington does not either, it should not be overlooked that Washington does receive Federal money to help build, repair, and maintain its streets, and that no other city has that advantage or help, so far as I have been able to determine.

Eight million three hundred and twenty-nine thousand three hundred and eighty-one dollars went to the aid of agriculture—from which Washington receives the same indirect benefit that any city receives.

One million thirty-five thousand seven hundred and thirty-two dollars was contributed to 44 of the States for health aid, largely, I understand, for carrying out the provisions of the maternity act.

Nine million two hundred and thirty-seven thousand three hundred and ten dollars went in miscellaneous contributions of one sort and another to 31 of the States.

So while it sounds formidable to say that the Federal Government contributes $115,000,000 to the States, an examination of the contributions and their purposes disclose that there has been no contribution of any appreciable amount to cities as such comparable in any way with the contribution made to Washington and that Washington receives the same benefits that other cities receive from the $115,000,000 of United States money.

What was the effect of the Senate amendment which we were asked to accept? They said they wanted us to return to the substantive law of 60–40. The Senate amendment called for a return of 60–40, and specifically provided that the tax rate of $1.70 should not be changed. In that they asked to change the substantive law, for at the present time the law requires a tax rate sufficient to raise funds to meet the appropriation, and if we accept 60–40 a tax rate of $1.70 is 50 cents too much. The Senate then specifically decided that Washington is not overtaxed. The Senate does not propose to lower the taxes in Washington. What then do they do? They proposed to create a surplus of $6,723,000 to the credit of the District of Columbia. It was to come exclusively from the Treasury of the United States. The practical effect, then, of the Senate action was to establish the principle of percentage contribution on the basis of 60–40 and take $6,723,000 from the Treasury of the United States and give it to the District.

The substitution of one-third and two-thirds instead of 60-40 has been proposed. What does that mean? With the continuation of the $1.70 tax rate it would mean a surplus in the District treasury for 1929 of over $4,000,000. It would mean a contribution by the United States this year of not $9,000,000 but of $11,421,325, from which there would be a return to the United States of about $700,000, or a net contribution by the United States of about $10,700,000.

Next year, without increasing the District tax in any way, the bill could go to $44,750,000, and the Federal contribution would be approximately $13,792,000, against which there would be a return payment of about $800,000, or a net contribution of $13,000,000 a year by the United States would be the result of adopting one-third and two-thirds as a basis of fiscal contribution.

But what is the purpose of all this? In the RECORD, page 5501, is inserted a list of improvements totaling $83,000,000 that the city developers want. They are: An airport, $1,500,000; farmers' produce market, $1,000,000; sewers, $10,000,000; garage shops, incinerators, and so forth, for city refuse division $800,000; bridges, $4,000,000; municipal center and municipal buildings, $19,000,000; opening and extension of streets, $4,000,000; public-library extension, $1,696,000; city-hospital extension, $3,150,000; District Training School and other welfare buildings, $1,400,000; a new jail, $500,000; additional school buildings, $11,000,000; elimination of grade crossings, $680,000; water-front development, $3,691,000; additions at the zoo, $1,145,000; public buildings and parks, $4,501,600; National Capital Park and Planning Commission, $15,000,000. It will be noted that this is a fairly ambitious program for any city. But in this respect the fact should not be lost sight of that about 25 per cent of the amount annually appropriated for Washington takes care of improvements of this character, so that during the next five years over one-half of these improvements will be normally provided for. This would leave only $38,000,000 in improvements instead of $83,000,000 not provided for. With the increased revenues of the District arising from property-value increases the remaining $38,000,000 of this program will be largely met within the next five years.

Obviously the improvements are municipal and but remotely, if at all, connected with the Federal establishment here. Any city of the United States save Washington would expect to pay for these improvements, probably by a bond issue or issues. How do the people of Washington propose to pay for these improvements? The answer is they do not propose to pay for them. They expect the United States Government to pay for them. If they are ever successful in their present campaign to establish the 60–40 plan, the United States Government will pay for them.

The Senate has determined that the $1.70 tax rate shall continue. As the District develops, of course, there will be increased assessments and more taxes. But based on the present revenue collections, the estimated revenues for 1928 will be $27,585,000. Neither the House nor Senate provisions changed that. Figuring, then, that at 60 per cent, the amount payable by the United States representing 40 per cent, would be not $9,000,000 plus, as at present, but $18,380,000. Or a total amount can be appropriated under 60–40, continuing the $1.70 tax rate, of $45,965,000. To this should be added the gas tax and water fund of $3,400,000, making a grand total of $49,365,000. The Senate bill carries $38,151,000, or $11,214,000 less than could be appropriated under 60–40 and the $1.70 tax rate. Thus it will be seen that the purpose behind the desire to return to 60–40 is not to reduce the taxes, for the Senate has rejected that. The purpose is to compel the people of the United States to pay for a great municipal improvement program of $83,000,000 in the District of Columbia, and if we had accepted the Senate proviso the House would have accepted a program of city development at United States expense.

In my statement to the House February 21, 1928, I stated that the removal of the property in the "triangle area" that is being purchased by the Government would not decrease revenues of the District. That statement was based on the assessor's testimony that the money paid for the triangle property would be spent for new improvements on other tax-paying sites subject to taxation.

The statement is also made that Washington is assessed for more than full value in the business area.

The Southern Railway Building is being purchased by the Government at a cost of $2,680,000. It was assessed at $1,749,240, and paid taxes of $29,727. They have repurchased a site and propose to build a new building at Fifteenth and K Streets.

They have purchased 11 different units at a cost of $1,601,500. The property purchased was assessed at $951,494. The Southern Railway Co. paid assessed value plus 70 per cent for this property. They will place thereon a new building costing as much or more, I am informed, than the building which is being taken over by the Government. The District will therefore lose nothing in revenues by that transaction, which illustrates the principle laid down by the assessor.

This statement is submitted as an outline for those who desire to give further study to this question. It supports the conclusion that the Congress has repeatedly reached that the property of Washington is not overtaxed and that the United States has been, is now, and will continue to deal justly and liberally by the people of the Capital City.

APPORTIONMENT OF PRESIDENTIAL ELECTORS

Mr. McLEOD. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD upon the bill (H. R. 13712) to apportion the electors in the election of President and Vice President and to enforce the provisions of Article II, section 1, clause 2, of the Constitution of the United States.

The SPEAKER. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection

There was no objection.

Mr. McLEOD. Mr. Speaker, in further support of the arguments I have already set forth, as to the necessity of acting at once on H. R. 13712, which would apportion electors in the coming presidential election, and enforce Article II of the Constitution by giving eight of the great States of the Union their rightful vote for President and Vice President, I urge consideration of the following opinion:

The only matter questioned in the committee was the purpose of the statute which it is sought to amend, and the meaning of the words in the Constitution, Article II, which read, "may be entitled," with reference to the number of electors.

In reply to the assertion, in connection with H. R. 13712, that Congress has not the power to apportion electors for President and Vice President among the several States on the basis of a census which would produce a different result from that which would obtain if the existing apportionment of Representatives in Congress were to continue to govern the number of electors to be chosen, I wish to offer the following in further support of my contention: Congress not only has the power but is subject to a constitutional duty to pass the above-mentioned bill at once, which I introduced before the Congress on May 12, 1928.

My bill, H. R. 13712, would amend a statute enacted in 1792. It would change no other law. The following proposition, therefore, appears to be self-evident, that if Congress has not the power to amend this statute, then the Second Congress, in 1792, had not the power to enact the statute, because all powers of Congress are derived from the same source; that is, the Constitution of the United States and particularly in this instance from Article II, section 1, clause 2—

> Each State shall appoint, in such manner as the legislature thereof may direct, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in Congress.

And so forth.

It is clear there is no express grant of power to Congress in this clause. The difficulty arises out of the reference to the number of Senators and Representatives to which the States "may be entitled" in Congress.

A different and entirely separate article of the Constitution, namely, Article I, section 2, clause 3, provides a general rule for determining the number of Representatives to which the several States may be entitled, as follows:

> Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of 10 years, in such manner as they shall by law direct.

In other words, the Constitution says, so far as we are concerned here, Representatives shall be apportioned among the several States according to their respective numbers, to be determined by a decennial census. Something is left to be done by Congress to determine the number of Representatives to which the several States may be entitled, as their populations of the respective States from time to time change relationship one with the other. But this power left to Congress can not rise higher than the Constitution from which it derives its authority; Representatives shall be apportioned according to a periodic census. Congress is subject to a constitutional duty to reapportion the Representatives on the basis of each succeeding decennial census, after the first census, which is taken in accordance with the provisions of the Constitution. On this point I quote from the reports of the proceedings of the Constitutional Convention by Madison, page 352:

> Mr. Randolph's motion requiring the legislature to take a periodical census for the purpose of redressing inequalities in the representation was resumed.
>
> Mr. Sherman was against shackling the legislature too much. We ought to choose wise and good men and then confide in them.
>
> Mr. MASON. The greater the difficulty we find in fixing a proper rule of representation, the more unwilling ought we to be to throw the task from ourselves on the general legislature. He did not object to the conjectural ratio which was to prevail in the outset; but considered a revision from time to time according to some permanent and precise standard as essential to ye fair representation required in the first branch. According to the present population of America, the northern part of it had a right to preponderate, and he could not deny it. But he wished it not to preponderate hereafter when the reason no longer continued. From the nature of man we may be sure that those who have power in their hands will not give it up while they can retain it. On the contrary, we know they will always, when they can, rather increase it. If the Southern States, therefore, should have three-fourths of the people of America within their limits, the northern will hold fast the majority of Representatives. One-fourth will govern the three-fourths. The Southern States will complain, but they may complain from generation to generation without redress. Unless some principle, therefore, which will do justice to them hereafter shall be inserted in the Constitution, disagreeable as the declaration was to him, he must declare he could neither vote for the system here, nor support it in his State. * * *.
>
> Mr. Williamson was for making it the duty of the legislature to do what was right and not leaving it at liberty to do or not do it. He moved that Mr. Randolph's proposition be postponed in order to consider the following: "That in order to ascertain the alteration that may happen in the population and wealth of the several States, a census shall be taken of the free white inhabitants and three-fifths of those of other descriptions on the first year after this Government shall have been adopted and every year thereafter; and that the representation be regulated accordingly."
>
> Mr. Randolph agreed that Mr. Williamson's proposition should stand in the place of his. He observed that the ratio fixed for the first meeting was a mere conjecture; that it placed the power in the hands of that part of America which could not always be entitled to it; that this power would not be voluntarily renounced; and that it was consequently the duty of the convention to secure its renunciation when justice might so require by some constitutional provisions. If equality between great and small States be inadmissible, because in that case unequal numbers of constituents would be represented by equal number of votes, was it not equally inadmissible that a larger and more populous district of America should hereafter have less representation than a smaller and less populous district? If a fair representation of the people be not secured, the injustice of the Government will shake it to its foundations. What relates to suffrage is justly stated by the celebrated Montesquieu as a fundamental article in republican governments. If the danger suggested by Mr. Gouverneur Morris be real, of advantage being taken of the legislature in pressing moments, it was an additional reason for tying their hands in such a manner that they could not sacrifice their trust to momentary consideration. * * *

So long as Congress performs the above-mentioned constitutional duty regularly, the apportionment of electors is automatically effected. The framers of the Constitution believed that Congress must necessarily always perform this duty with reasonable promptness, and that therefore no further question would arise. I quote an excerpt from the statement of Hamilton or Madison in the Federalist, No. LVIII, of February 22, 1788:

> Those who urge the objection seem not to have recollected that the Federal Constitution will not suffer by a comparison with the State constitutions in the security provided for a gradual augmentation of the number of Representatives. The number which is to prevail in the first instance is declared to be temporary. Its duration is limited to the short term of three years. Within every successive term of 10 years a census of inhabitants is to be repeated. The unequivocal objects of these regulations are, first, to readjust from time to time the apportionment of Representatives to the number of inhabitants, under the single exception that each State shall have one Representative at least; secondly, to augment the number of Representatives at the same periods, under the sole limitation that the whole number shall not exceed 1 for every 30,000 inhabitants. * * *
>
> There is a peculiarity in the Federal Constitution which insures a watchful attention in a majority both of the people and of their

Representatives to a constitutional augmentation of the latter. The peculiarity lies in this, that one branch of the legislature is a representation of citizens, the other of the States. In the former, consequently, the larger States will have most weight; in the latter the advantage will be in favor of the smaller States. From this circumstance it may with certainty be inferred that the larger States will be strenuous advocates for increasing the number and weight of that part of the legislature in which their influence predominates. And it so happens that four only of the largest will have a majority of the whole votes in the House of Representatives. Should the representatives of the people, therefore, of the smaller States oppose at any time a reasonable addition of Members, a coalition of a very Few States will be sufficient to overrule the opposition; a coalition which, notwithstanding the rivalship and local prejudices which might prevent it on ordinary occasions, would not fail to take place when not merely prompted by common interest but justified by equity and the principles of the Constitution.

We know how far away our country has grown from the forces and circumstances which Hamilton predicted, in the foregoing statement, would invariably operate to force regular reapportionments of the Representatives. We note also how unfounded were the beliefs of numerous other framers of the Constitution (shown in excerpts from the Madison Debates quoted above) that they had provided a guarantee in the Constitution that reapportionment of Representatives would be made at frequent intervals.

Since a deadlock in Congress, such as we have experienced over the past eight years, has occurred over the question of apportionment of Representatives, the question arises as to whether the apportionment of electors shall also be defeated.

Regardless of its failure to perform the aforementioned constitutional duty, Congress still has full power as to the determination of its own membership. But as the choosing of electors has to do solely with the election of President and Vice President, it is not to be supposed that a Congress, acting in defiance of constitutional duty, continues to have full power over the machinery for the election of President. Such a condition is repugnant to the theory of separation of powers in our Government. It is also repugnant to the express words of the Constitution and the interpretation placed upon those words by the framers of the Constitution in the convention.

Madison Debates, page 412:

Mr. WILSON. It seems to be the unanimous sense that the Executive should not be appointed by the legislature unless he be rendered ineligible a second time; he perceived with pleasure that the idea was gaining ground of an election mediately or immediately by the people.

Mr. MADISON. If it be a fundamental principle of free government that the legislative, executive, and judiciary powers should be separately exercised, it is equally so that they be independently exercised. There is the same and perhaps greater reason why the Executive should be independent of the legislature than why the judiciary should. A coalition of the two former powers would be more immediately and certainly dangerous to public liberty. It is essential, then, that the appointment of the Executive should either be drawn from some source, or held by some tenure, that will give him a free agency with regard to the legislature.

I also quote from a statement by Alexander Hamilton in the Federalist, No. 68, March 14, 1788:

The mode of appointment of the Chief Magistrate of the United States is almost the only part of the system of any consequence which has escaped without severe censure, or which has received the slightest mark of approbation from its opponents. The most plausible of these, who has appeared in print, has even deigned to admit that the election of the President is pretty well guarded. I venture somewhat further and hesitate not to affirm that if the manner of it be not perfect, it is at least excellent. It unites in an eminent degree all the advantages the union of which was to be wished for.

It was desirable that the sense of the people should operate in the choice of the person to whom so important a trust was to be confided. This end will be answered by committing the right of making it not to any preestablished body but to men chosen by the people for the special purpose, and at the particular conjuncture.

It was equally desirable that the immediate election should be made by men most capable of analyzing the qualities adapted to the station and acting under circumstances favorable to deliberation, and to a judicious combination of all the reasons and inducements which were proper to govern their choice. A small number of persons, selected by their fellow citizens from the general mass, will be most likely to possess the information and discernment requisite to such complicated investigation.

It was also peculiarly desirable to afford as little opportunity as possible to tumult and disorder. * * * Nothing was more to be desired than that every practicable obstacle should be opposed to cabal, intrigue, and corruption. * * * They have not made the appointment of the President to depend on any preexisting bodies of men who might be tampered with beforehand to prostitute their votes, but they have referred it in the first instance to an immediate act of the people of America, to be exerted in the choice of persons for the temporary and sole purpose of making the appointment.

Congress, therefore, as a preestablished and preexisting body of men in the sense referred to by Hamilton, was intended to be excluded from having any influence in the selection of the Chief Executive. The election of President is a governmental function of equal dignity with the powers of Congress, both subject to the same Constitution. It can not be argued, therefore, that the machinery for the former was intended to be so incidental to the exercise of the powers of the latter as necessarily to stand or fall together.

Farrand, in his Records of the Federal Constitution, volume 3, page 382, quotes a debate in the United States Senate January 23, 1800, as follows:

Mr. C. Pinckney, of South Carolina, * * * remembered very well that in the Federal convention great care was used to provide for the election of the President of the United States independently of Congress; to take the business as far as possible out of their hands. The votes are to be given by electors appointed for that express purpose, the electors are to be appointed by each State, and the whole direction as to the manner of their appointment is given to the State legislatures. Nothing was more clear to him than that Congress had no right to meddle with it at all; as the whole was intrusted to the State legislatures, they must make provision for all questions arising on the occasion.

Mr. Baldwin, of Georgia, * * * must say for himself * * * that the Constitution in directing electors to be appointed throughout the United States * * * for the express purpose of intrusting the constitutional branch of power to them, had provided for the existence of as respectable a body as Congress, and in whom the Constitution on this business has more confidence than in Congress. * * *

Suppose, then, Congress should continue indefinitely, as it has done since 1920, to refuse to reapportion its membership on the basis of a periodical census. Would anyone contend that the apportionment of electors could not be changed? Or if the apportionment of electors were not changed for 10 or 15 or 20 years simply because Congress failed to apportion its membership for that long time, would anyone contend that at the end of that period each State would have the number of electors to which it was "entitled" in accordance with the Constitution? Certainly not. On this theory the election of a President could be made to depend absolutely on the action of Congress in that the latter could bring about a result contrary to the will of the people.

It is clear, therefore, that apportionment of electors is not necessarily a consequence of apportionment of House membership. Conversely, apportionment of the House membership is not necessarily a consequence of an apportionment of electors, for the House may agree on the number of Representatives to which the several States may be entitled and at the same time may refrain from accepting those respective numbers of members from the several States. But the performance of the first part of the duty is sufficient to formulate a uniform rule for an apportionment of electors, which is all that is sought under the bill in question.

Remembering that Congress would thereby create no additional obligation upon themselves to reapportion the membership of the House according to such agreement, suppose for the moment that such an obligation were created. Suppose, as Mr. Page suggested previously in this hearing, that such an agreement by Congress would be tantamount to an apportionment of Representatives. Has not Congress full power to do the complete act? It would not be a violation of the powers of Congress even if the passage of the proposed bill should be construed in the latter manner. But I do not think it necessary so to construe it. The apportionment of electors and the apportionment of Representatives under conditions now obtaining in Congress are separable questions. The Second Congress of the United States, as reported in the Annals of Congress, volume 2, pages 405, 406, dealt with both apportionment of electors and apportionment of Representatives simultaneously, but by separate bills, considered in different committees. One was acted upon without reference to the consideration of the other. One relates to the executive branch of the Government and the other to the legislative branch. One refers to Article II of the Constitution, the other refers to Article I.

And this should also be borne in mind: So long as Congress merely designates the number of electors to which the several States shall be entitled it is at least complying with Article II of the Constitution in its exact language, whereas if Congress does not apportion electors and does not reapportion the membership of the House it will fail to comply with either Article I or Article II of the Constitution. The former appears plainly

to be the more constitutional and by far the less blameworthy of the two courses.

The next question is one of policy. Unless this bill is enacted during the present session of Congress, in the election of President and Vice President next fall, eight States will be deprived of 12 electoral votes to which, by the census of 1920 they are entitled, and these 12 votes will be cast by 11 other States which, according to the same census, have no equitable or just claim to them. The result in the case of a close contest may be a disputed election, and much dangerous and destructive confusion throughout the United States will result.

The Second Congress of the United States, in 1792, when they enacted the statute which this bill would amend, felt that they were impelled by a strong public policy. When I have finished with my next observation, I am sure it will be unanimously agreed that not only will my proposed amendment not subvert the policy which the Second Congress had in mind, but will actually serve that same public policy much more effective under present circumstances than the existing statute. And to my mind, it will accomplish this result in accordance with the Constitution, whereas, as I have shown above, there are reasons for grave doubt that the statute as it stands is in accordance with the Constitution.

The debate in Congress, as reported in the Annals of Congress, volume 2, pages 405, 406, upon the passage of the section which is now title 3, chapter 2, section 2 of the United States Code (R. S. 132) is as follows:

Mr. Gerry moved to insert a clause which specified that "the electors shall be equal to the number of Senators and Representatives to which the several States may by law be entitled at the time when the President and Vice President thus to be chosen should come into office: *Provided, always*, That where no apportionment of Representatives shall have been made after any enumeration, at the time of choosing electors, then the number of electors shall be according to the existing apportionment of Senators and Representatives."

Mr. MURRAY. * * * The present representation in Congress is by no means equal; the States, in their conventional deliberation, produced the present proportion of Representatives more from compromise than authenticated data; no census had then measured to the public the proportions of population which one State bore to another; and Representatives, including Senators and electors of President and Vice President, being the same in number, and the scale of Representatives being unfounded in facts and evidence, the inequality which is evident is not to be wondered at. This proposition remedies the inequality; the proviso was not perfectly agreeable to his wishes, but as it refers the number of electors to a scale of representation ascertained by an actual enumeration, and at the same time will remove the probability of confusion by making each State uniform with others as to the rule of fixing the number of electors, he should vote for it.

We are now confronted with a situation in which the statute of 1792 no longer "refers the number of electors to a scale of representation ascertained by an actual enumeration," as intended by the Constitution. There is "evident inequality" now to be corrected just as there was then. The policy which the Second Congress had in mind, of making a uniform rule among the various States for the determination of the number of electors, is made much clearer and more effective by my proposed amendment than it will be in the coming election of President under the statute of 1792.

Gentlemen, you can not escape one of the following conclusions: First, Congress has not the power under the Constitution to pass a statute governing the number or distribution of electors, and therefore in order to avoid future confusion section 2, of chapter 2, of title 3 of the United States Code should be repealed; or, second, Congress has the power under the Constitution to pass a statute apportioning electors, and as a matter of policy under present conditions should and must pass H. R. 13712.

I have shown above that if you choose the first alternative, you must be prepared to accept the doctrine that each State is the sole judge of the number of electors to which it is entitled, with the consequent possibility of confusion. I believe, therefore, that you must admit the existence of a power, although limited by the words of the Constitution, whereby Congress may enact such an amendment as I propose, and I believe you must acknowledge the wisdom and justice of enacting this proposed amendment immediately.

The text of my bill is as follows:

Be it enacted, etc., That title 3, chapter 1, section 2 of the United States Code (Rev. Stat. sec. 132), be, and the same is hereby, amended to read as follows:

"The number of electors shall be equal to the number of Senators and Representatives to which the several States are by law entitled at the time when the President and Vice President to be chosen come into office: *Provided*, That in any election prior to an apportionment of Senators and Representatives on the basis of the enumeration of 1920, or any subsequent enumeration, the electors shall be apportioned among the several States as follows: Alabama, 12; Arizona, 3; Arkansas, 9; California, 16; Colorado, 6; Connecticut, 8; Delaware, 3; Florida, 6; Georgia, 14; Idaho, 4; Illinois, 29; Indiana, 14; Iowa, 12; Kansas, 9; Kentucky, 12; Louisiana, 9; Maine, 5; Maryland, 8; Massachusetts, 18; Michigan, 17; Minnesota, 12; Mississippi, 9; Missouri, 16; Montana, 4; Nebraska, 7; Nevada, 3; New Hampshire, 4; New Jersey, 15; New Mexico, 3; New York, 45; North Carolina, 13; North Dakota, 5; Ohio, 26; Oklahoma, 10; Oregon, 5; Pennsylvania, 38; Rhode Island, 4; South Carolina, 9; South Dakota, 5; Tennessee, 12; Texas, 21; Utah, 4; Vermont, 3; Virginia, 12; Washington, 8; West Virginia, 8; Wisconsin, 13; and Wyoming, 3."

ADDRESS OF HON. CHARLES W. PARKER, LL. D.

Mr. GRIFFIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein an address made by Hon. Charles W. Parker, of New Jersey, upon the occasion of a presentation of a tablet to St. Ann's Church in the Bronx, N. Y., commemorating the life and work of Lewis Morris, the first Colonial Governor of New Jersey, and in that connection—if I may be indulged a moment—permit me to say that I am prompted to renew this request because I have ascertained since Tuesday that we have two Members in this House who are the direct descendants of the Morris family, namely, the gentleman from New York, Mr. HAMILTON FISH, and the gentleman from Virginia, Mr. R. WALTON MOORE.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. GRIFFIN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address delivered at the unveiling of a tablet to his memory at St. Ann's Church, corner One hundred and fortieth Street and St. Anns Avenue, Morrisania, Borough of the Bronx, New York City, under the auspices of the Society of Colonial Wars in the State of New Jersey, by Charles W. Parker, LL. D., justice of the Supreme Court of New Jersey, April 21, 1928:

LEWIS MORRIS, 2D, FIRST COLONIAL GOVERNOR OF NEW JERSEY

The task allotted to me to-day is an agreeable one. As a Jerseyman and representative of a line of Jerseymen extending back some 250 years as residents of Perth Amboy, the capital of the Province, and of Woodbridge, and still earlier of Staten Island in New York, it has been most interesting to review the events connected with the separation of the colonial governments of those two Provinces; as a present resident of Morristown, in the township of Morris and county of Morris, like interest has attached to a somewhat hasty, though I trust not too superficial, inquiry into the life and character of the first colonial Governor of New Jersey as a separate political organization; a man of strong and vigorous personality, whose honesty has never been successfully impugned and who left his impress on posterity in the form of many distinguished descendants, among whom we may mention his son, Robert Hunter Morris, chief justice of New Jersey from 1738 till 1764; his grandson, Robert, first chief justice of New Jersey under the Constitution of 1776 and later judge of the Federal court; another son, Lewis, born 1698, chief justice of the admiralty court of New York; his son, Lewis, born 1726, signer of the Declaration; his son Lewis, graduate of Princeton 1774, aide to Generals Sullivan and Greene in our Revolution; and Gouverneur Morris, brother of Lewis, the signer, born 1752, delegate to the Constitutional Convention, minister to France under the Directory, and United States Senator; Gouverneur Morris the second, veteran of the Mexican War; Gouverneur Morris the third, founder of this sweet old church, which he built in memory of his mother, and in whose God's acre within sound of my voice there rest nearly a score of his honored kinsmen.

Returning to the subject of our sketch, his father Richard and uncle Lewis were prominent Roundheads, and fought in the Cromwellian wars. The family crest, a blazing castle, has been ascribed to an exploit of his uncle Lewis at that period, though that origin is open to doubt. This uncle Lewis, after serving in England under Cromwell, was sent by him in 1654 as an officer in an expedition to the West Indies, and was second in command at the attack on Jamaica.

Later he settled at Barbados, and after the Restoration in 1660 political considerations and property interests led him to remain in the West Indies until 1674. Richard, the father of Gov. Lewis Morris, had also been an officer in Cromwell's army, and finding the climate of England unhealthy after the Restoration, had gone to Barbados, removed to New Amsterdam, which was then under Dutch control, bought up several thousand acres which was later erected into a manor and which is still known as Morrisania, and settled thereon. There Lewis Morris, afterwards chief justice and governor, was born late in 1671. He made a very poor start in life; his

mother died when he was but a few months old, and his father did not long survive her, dying in 1672 or 1673. In the following year Uncle Lewis came to this country from Barbados, settled at Morrisania, assumed charge of the rearing of young Lewis, and made him his heir.

We read in Gordon's History of New Jersey that "the early years of the nephew were wild and erratic," and in Smith's New Jersey, that in 1683, in one of the several considerable disturbances in the Province (of New Jersey), especially about Middletown and Woodbridge, Lewis Morris, afterwards Governor of New Jersey, being a party, was taken prisoner and confined in a log house; his partisans pried up the logs high enough for him to creep out." A rather precocious performance for a boy of 12; the chances are that it was his uncle or some other Lewis. (Papers, p. 6, note.) We read further, that in one of his youthful freaks he strolled away to Virginia and thence to Jamaica, where he undertook to support himself as a scrivener; from which it would seem that he had early acquired some knowledge of the law and its formulas. Having sown his wild oats, he returned to New York and made his peace with his uncle, who died in May, 1691, when Lewis was about 20, leaving a will so mutilated by erasures and interlineations as to raise serious legal questions which Lewis happily solved by fair settlement with the holders of outstanding claims, insomuch that he was never disturbed in the enjoyment of this great property. Would that he had always been so tactful and diplomatic!

The next important event to note is his marriage, November 3, 1691, to Isabella Graham, daughter of the attorney general of New York. With her he lived 55 years and by her had 12 children, only 4 of whom, 2 sons and 2 daughter, survived him.

New Jersey seems to have had much attraction for him; and now, at his majority, we find him in Monmouth County, perhaps drawn there by business considerations, for he owned a tract called Tintern of between three and four thousand acres, comprising iron mills as well as farms. The name still survives as that of the village of Tintern Falls, a few miles west of Long Branch. By this time he was sufficiently learned in the law to be appointed one of the judges of the "Court of Common Right" of New Jersey under the still-existing proprietary government. We learn from Judge Field's valuable paper on the provincial courts of New Jersey that this court was a new venture in the field of judicature—at least by that name. Organized in 1682 it had all the powers of our New Jersey Supreme Court, civil and criminal, and in addition full equity powers, which, however, were seldom exercised. At first its home was Elizabeth Town, but in 1686 it was moved to Perth Amboy, a town with a most interesting history, retaining its quaintness and charm up to my time, though robbed of all that later on by the discovery of clay and the combination of railroads with frontage on tidewater. This court was composed of from 6 to 12 members, and the appointment of Morris as one of them seems to speak of his abilities as well as of his political consequence and status as a substantial citizen; indeed, he must be classed as a young man of great wealth, owning about 3,000 acres of manor at Morrisania and 3,560 acres in Monmouth County, and a considerable number of slaves on each of these properties. This appointment as a judge was in 1692, and I assume that his tenure lasted until the famous "surrender" of the proprietors to the Crown in 1702, of which so much has been said and written.

He was also a member of Governor Hamilton's council. Whitehead says of him in the introduction to the "Papers of Gov. Lewis Morris" that "notwithstanding his youth (he) soon exercised great influence in public affairs, developing very early in his career those mental qualities and that sagacious discernment of men's characters and actions which subsequently caused him to be considered more knowing in the law and a great adept in the wily intrigues of colonial politics than any of his compeers." Or, as we should now say, he became a skillful politician. He was more than that; he was a determined and vigorous fighter and a dangerous opponent. He contested in 1698 the claims of Jeremiah Basse as proprietary governor on the ground of lack of a quorum at his appointment, so that on May 6, 1698, Morris was removed from the council, and on May 11 was fined £50 for contempt of the very court of common right whereof he was or had been a judge. But the Basse question was the source of continual quarrels; others of his opponents were imprisoned; "feuds and confusion followed," Smith tells us; a compromise was attempted by the reappointment of Hamilton, but this failed to settle the matter; and, to make a long story short, in 1702 came the surrender of the proprietary government in both East and West Jersey. This was due in large measure to the efforts of Morris, who secured the concurrence of the local proprietaries, and with their backing went to England and was there instrumental in persuading the other proprietors, and after the delivery in April, 1702, of the instrument of surrender returned to America. The question of establishing an executive government of New Jersey separate from that of New York was even then suggested and debated, and in connection with it the availability of Morris as Governor of New Jersey was considered; but the plan of separation being rejected, the claims of Morris were put aside, and in December, 1702, "the good Queen Anne," who had just come to the throne as successor of William III, signed the commissions of Edward, Viscount Cornbury, as Governor of New York and of New Jersey.

Time forbids any comment on the Cornbury administration except in its bearing on the subject of this paper. Generally speaking, Cornbury appears to have been one of the best hated men that ever held public office. One or two short quotations from Gordon will elucidate the point:

"The people, who in the very wantonness of freedom, had involved themselves in contentious strife, discovered that they had exchanged King Log for King Stork."

"His character is described as a compound of bigotry and intolerance, rapacity and prodigality, voluptuousness and cruelty, and the loftiest arrogance with the meanest chicane."

We need not stop to discuss the details of Cornbury's administration. What concerns us at this point is that Morris, a member of Cornbury's council, became at once his leading opponent, was suspended, reinstated, and suspended again, in the course of about a year. For about two years he remained in private life, but in 1707 came again to the fore, as an elected member of the General Assembly of New Jersey. In collaboration with Samuel Jenings, a Quaker, and speaker of the assembly, he prepared for that body a lengthy remonstrance to the Queen, making a number of accusations against Cornbury. This manifesto, for it amounted to that, being read in open assembly by Jenings, provoked an equally lengthy reply from Cornbury, and also a private communication to the Queen which was discovered and answered by the assembly. Cornbury and his friends were unsparing of epithets; they called Jenings and Morris "men known neither to have good principles nor good morals; wicked, designing men," "men known to be uneasy under all government," and so on. The net result was that Morris was reappointed to the council in 1708 under Lord Lovelace who succeeded Cornbury and again suspended by Lieutenant Governor Ingoldsby, who on the death of Lovelace, became acting governor until the appointment of Gen. Robert Hunter in 1710 as Governor of New Jersey and New York.

Hunter and Morris were close friends, and Morris became head of the council in New Jersey and gave Hunter his vigorous support in New York, finally overcoming the opposition to Hunter which had manifested itself in that Province. Hunter was recalled in 1719, or left of his own volition, and was succeeded by William Burnet, a son of the Bishop Burnet who was so intimate with William III. Hunter had given Burnet in England a good account of Morris, and Burnet in 1720 appointed him as chief justice of New York, an office which he filled with great credit until 1733, when he was removed by Governor Cosby as the result of a dispute over the propriety of the Supreme Court of New York exercising jurisdiction in equity. Morris drew up a long argument expressing his views on the subject and dissenting from the other judges, and when the governor asked for a copy inclosed the copy in a letter which gave offense and led to his suspension. At this period Cosby was unpopular and Morris popular; he was elected almost at once to the New York Assembly and was received with most favorable popular demonstrations.

It was a stirring time. To quote from Whitehead's comment on the Morris papers, "The Province became immediately divided into two parties; the opposition, or country party, of which (Morris) was the head, and the governor's or court party, having for its chief James Delancey, who had been appointed to the vacant judgeship." It was the era of the trial for criminal libel of John Peter Zenger, a cause celebre of those days. Zenger was a printer, and in November, 1733, began to publish a newspaper called the New York Weekly Journal as the organ of the country party, lampooning the government unmercifully, until the governor in desperation had Zenger arrested for seditions libel and tried to get the grand jury to indict him, which that body refused to do.

The governor, not being entirely helpless in those days in the hands of a grand jury, went to the attorney general, and that official filed an information, which had the same effect. Zenger was put on trial, admitted the libel and undertook to justify it, but was overruled by the chief justice. "Very well," said Andrew Hamilton, Zenger's counsel, "the jury are judges both of law and fact, and we are content to leave it to the jury." His confidence was not misplaced; the jury acquitted, and Zenger was released after having been held without bail for over eight months, and in the language of a writer in the biographical encyclopedia, "was received with tumultuous applause by a concourse of people who had assembled to learn the result."

Meanwhile a combination had been formed to get rid of Cosby, and Morris was chosen to go to England as an emissary. His plans for sailing were made with great secrecy, and he was on the high seas before his absence was discovered. Cosby countered with a complaint to the lords of trade against Morris, demanding his dismissal from the New Jersey Council, in which he still held office. The dismissal was recommended, but overruled by the Privy Council, so Cosby failed. On the other hand, Morris failed to secure the ouster of Cosby, but the latter died in March, 1736, and Morris returned home early in October, to be received with the loud acclamations of his constituents.

Morris was now 65 years of age, apparently at the height of his popularity, a wealthy man, his children long since grown, and his two sons now attaining distinction; but like other active men, knew not when to stop. One would think that after so many stormy years

he would have realized the truth of St. Paul's injunction to Titus (III, 9): "But avoid foolish questions, and genealogies, and contentions, and strivings about the law; for they are unprofitable and vain." Now, however, a restless ambition was to lead him back to New Jersey, where he was destined to lose his popularity and to end his days.

He began by an attempt to seat himself as acting governor by right of seniority in the council. This was resisted, was appealed to the other side of the water, and the appeal went against him. But his defeat was of short duration, for a movement to separate the executive departments of New York and New Jersey, which had been for some time progressing, now came to a head, and in February, 1738, Morris was appointed Governor of New Jersey, her first independent colonial governor, and a native, not an importation. He entered on his duties at Perth Amboy in the late summer of that year. About the same time his son, Robert Hunter Morris, became chief justice of New Jersey.

He was well received, and made a good start by quitting the council, making that body a part of the legislature, and confining himself to executive functions, a new departure. The legislature created a new county and named it after him and voted him a liberal salary, but the era of good feeling was a short one. His point of view seems to have changed; he was seeing things at a different angle. I am content to ascribe his actions at this period to age, poor digestion, and blood pressure, and to let it go at that. In October, 1739, he writes thus to his friend, Sir Charles Wager:

"I was glad to find by yours that you were in good health in an age so far advanced as yours is, and I hope it will continue for the sake of your family and of so many others who are so much concerned in it; I am following close at your heels, being within a few days of entering into my 69th year, but thank God enjoy a good state of health, but sencivle of some decay of memory, & loss of teeth w'ch have long since left me to mumble my meat as well as I can with my gumms. We have a man in New York, one Scurlock, nigh four score years, who for nigh 15 years Pass'd has liv'd solely upon milk punch made with Rum, without eating or drinking anything else & seems as hearty well & strong as a man of fifty.

I have known another instance of the same kind, but neither of these men had much business with thinking, and very much unconcerned whether the Emperor got Constantinople or the Turks Vienna, w'ch might not a little contribute to their length of days." A wise sentiment, of which he failed to make personal application. Such a thing was foreign to his nature; he did not know how to let matters take their course; and in those times, when the only dentists were barbers, when their only function in relation to teeth was extraction, and when, as I gather from the quotation, there were no artificial teeth, much in the way of cantankerousness is to be forgiven to a man of 68 of a naturally combative disposition, who can not Fletcherize, but can only "mumble his meat with his gums."

Whatever the cause, there was an increasing antagonism between the governor and the legislature as the years rolled on; there were mutual recriminations and misunderstandings. The histories of this period give ample details of such matters and I prefer not to repeat them here. I think it is fairly plain that the man grew increasingly irritable from failing health as he advanced in years. For the last two years of his life he was a sick man. On May 8, 1746, after a final dispute with the legislature, he signed a bill regulating the militia, the only one perfected at that session. On that day or the next, his illness became alarming, and on May 21 he died at his place called "Kingsbury near Trenton." On the 26th his remains were transported to Perth Amboy, and thence by water to Morrisania. He was 75 years of age. Thus passed on one of the most interesting and picturesque characters of that formative period of the Colonies; an only child, but the father of a numerous family and ancestor of many and distinguished descendants; a handsome man of pleasing presence, if his portrait by John Watson truly depicts him; an able lawyer and judge, and clever politician. We of New Jersey are liable to think of him primarily as our quarrelsome first governor, forgetting what he had been and had accomplished, and that he came to that office at a time of life when he should have been enjoying a well-earned retirement from the hurly burly of politics, and "unconcerned whether the Emperor got Constantinople or the Turks Vienna." I prefer to think of him as the lawyer, the judge, the legislator, the antagonist of such men as Cornbury and Cosby, the friend of Hunter and Burnet, and until he was long past his prime, the popular favorite, if not popular idol. All these he was while he lived on the broad acres surrounding this hallowed spot where to-day we install a tablet to his memory; and as we close this hasty survey of his stormy life, these, and his ideal family relations, are the aspects of it that should especially challenge our attention and arouse our appreciation, and enable us thereby to pay a fitting tribute of respect to his memory.

LEAVE TO ADDRESS THE HOUSE

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent to proceed out of order for 10 minutes after the gentleman from Oklahoma [Mr. MCCLINTIC] has concluded his remarks this morning.

The SPEAKER. The gentleman from New York asks unanimous consent that at the conclusion of the remarks of the gentleman from Oklahoma [Mr. MCCLINTIC] under the special order he may proceed for 10 minutes. Is there objection?

Mr. DOUGLAS of Arizona. Mr. Speaker, reserving the right to object, with reference to what?

Mr. SIROVICH. In relation to one of my former instructors, who lately died, Professor Noguchi.

The SPEAKER. Is there objection?

There was no objection.

Mr. DYER. Mr. Speaker, I ask unanimous consent that after the conclusion of the Boulder Dam bill, and not to interfere with conference reports or matters on the Speaker's table, the Commissioner from the Philippines [Mr. GUEVARA] may be permitted to address the House for 15 minutes.

The SPEAKER. The gentleman from Missouri asks unanimous consent that at the conclusion of the consideration of the Boulder Dam bill the Commissioner from the Philippines [Mr. GUEVARA] may be permitted to address the House for 15 minutes. Is there objection?

There was no objection.

DISABLED EMERGENCY OFFICERS

Mr. GILBERT. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. GILBERT. Mr. Speaker, at this time, when the divergence of views entertained by the President and those entertained by Congress seems to be widening, I take this opportunity to read a telegram similar to many others that I have received, showing the public reaction to an economy program which asserts itself only against veterans and their widows and orphans, fourth-class postmasters and other underpaid Government employees, farmers, and others who are really in distress and approves a reduction of $200,000,000 in taxes to the excessively rich.

DAWSONSPRINGS, KY., *May 24, 1928.*

RALPH GILBERT,

Washington, D. C.:

Won't you remind Congress that thousands of friends of disabled emergency officers are watching an economy which gives two hundred million to millionaires and refuses an insignificant two million to men who made fortunes for the rich possible?

BAXTER RAMSEY,
Commander J. Franklin Bell Post.

Mr. GREEN. Mr. Speaker, will the gentleman yield?

Mr. GILBERT. Yes.

Mr. GREEN. I had a telegram this morning from 3,000 in the State of Florida asking the passage of the Tyson-Fitzgerald bill over the President's veto.

THE FRANKING PRIVILEGE

The SPEAKER. Under special order of the House the Chair recognizes the gentleman from Oklahoma for 15 minutes.

Mr. MCCLINTIC. Mr. Speaker, some time ago I filed a minority report against the so-called naval shipbuilding bill, which featured aircraft and submarines as a substitute for the majority report filed by Mr. ANDREW, the gentleman from Massachusetts, who filed the affidavit concerning the alleged misuse of my frank. I thought I had a right to file that minority report, notwithstanding the fact it was not adopted by the House. Later on several thousand of my minority reports were mailed out under my frank. In a few weeks thereafter the gentleman from Massachusetts [Mr. ANDREW] sponsored an affidavit which he read before this House, which claimed that those who had used my frank had violated the privilege by inserting in the envelope certain extraneous literature. For the reason that the Naval Affairs Committee has sent this controversy to the Post Office Department, because the press has carried a lot of information concerning the subject, and because the Post Office Department has made a thorough investigation and has rendered a report, I feel that it is fair to myself and fair to this House to let the Members know whether or not my franking privilege was abused, and whether or not there was a frame-up in this connection. It is for that reason that I have asked that every Member of the Naval Affairs Committee be present this morning. They have been given proper notice.

I have here a copy of the report which was made by the Post Office Department, and which is signed by Hon. Harry New, Postmaster General. I shall read the last two paragraphs of the report. Mr. Weeks, the man referred to in the paragraph which I shall read, is the person who filed an affidavit charging misuse of my frank and at the same time claimed that he used an assumed name in order to obtain information from the

Council for the Prevention of War, in order that they might not learn his identity. I read from the report:

"Mr. Weeks is the only person to whom such matter was sent, who alleges that he received both the speech of Representative McCLINTIC and the private matter of the National Council for the Prevention of War in an envelope bearing the frank of Representative McCLINTIC.

It will be noted that the report says that Mr. Weeks is the "only" person. Continuing, the report reads:

It would appear from all the circumstances as disclosed by the investigation that Mr. Weeks may be mistaken in his statement that the private matter of the National Council for the Prevention of War received by him was in the envelope bearing the frank of Mr. McCLINTIC, since it appears that only the speech made by Representative McCLINTIC in the House of Representatives was mailed under his frank, and that the matter pertaining to the National Council for the Prevention of War was mailed under postage. It, therefore, appears that there was no violation of the franking privilege.

It will be remembered that Congressman ANDREW denied giving out the first newspaper story concerning this alleged violation, and inasmuch as he was the only person who received this charge from one Harold Weeks, it can be concluded that the newspaper fraternity evidently obtained the data upon which they wrote the story by the process of mental telepathy. Anyhow, it will be interesting to this House to know that the inspector detailed to look after this work interviewed those connected with the Government Printing Office, the House folding room, the Post Office Department, the National Council for the Prevention of War, citizens of Wellesley Hills, Mass., the author of the affidavit, and dozens of persons who have received the minority report on the naval shipbuilding bill, which is the subject of this controversy. I am glad to say to this House that not a single person in the United States has corroborated the statements contained in the affidavit filed with the Post Office Department by the gentleman from Massachusetts [Mr. ANDREW].

A Member's frank is his chief asset in looking after the public's correspondence. It is not possible to attack the use of the same without casting reflection on the Member whose name is printed on the envelope. It is an awfully cheap sport who will sponsor the work of an unreliable person for the purpose of injuring one of his colleagues on a committee. The gentleman from Massachusetts was told, when he sought advice from the distinguished floor leader, Mr. TILSON—who is always fair—the proper thing to do in this case and that was to see me first before taking any action. Did he do it? No. On the other hand, he went over and presented this data to the gentleman from Illinois [Mr. BRITTEN], whose judgment has not proved to be the best in many instances in the past. Therefore, I had no way of knowing anything about this charge until it was published in the Washington Star.

Who is this Harold M. Weeks, who assays the rôle of a snooper in this instance? In the affidavit sponsored by the gentleman from Massachusetts there is contained a statement that he has used an assumed name in corresponding with the National Council for the Prevention of War for the purpose of obtaining information without letting them know his true identity. In other words, he assumed the rôle of a spy. The gentleman from Massachusetts compliments this man Weeks as being a splendid, patriotic soldier, and the attorney who drew up the affidavit called attention to the excellent reputation which he bore in his own community. In this connection, I want to insert in the RECORD at this point letters from some of the citizens of Wellesley Hills, Mass., which show that he is a questionable character, a trouble maker, and an undesirable citizen. Therefore, the statement made by the attorney, Mr. Judson Hannigan, seems to be false:

BOSTON, MASS., *May 5, 1928.*

Representative McCLINTIC,
House of Representatives, Washington, D. C.

DEAR MR. McCLINTIC: I have read in the daily newspapers the charges made against you by one Harry W. Weeks, of Wellesley Hills, Mass., and write you these few lines to state that I believe it was about time a member of the military forces of the United States refrained from snooping upon civilians and performed his military duties. This soldier Weeks is a constant trouble maker, and through his gumshoe methods he has made an effort to have public officials of the town in which he resides removed from office. I believe the chiefs of police and fire departments of that town can give you much information on him.

His present duties are with the intelligence section of the Army, with station at Boston, Mass., and I understand he spends much of his time on Government salary snooping around looking in keyholes in an effort to steal some of the fame of Sherlock Holmes.

This note is sent you in a spirit of fair play and with hopes that the military forces of our country may be used for the purpose authorized by law.

Sincerely yours, ——— ———

MY DEAR MR. McCLINTIC: I hesitate to say anything about any one, but I am impelled to say nothing in favor of this person. I have been seven years in an official position before and during the World War in the United States Army and have come in contact with him also in this town. His actions have not been commendable. I doubt very much his sanity and regret that I can not say anything else.

Yours sincerely, ——— ———

In addition, it will be interesting to this House to know that Weeks received from the War Department the sum of $137.70 for the work that he did during the month of April in connection with the charge brought against the violation of my frank. I desire to insert in the RECORD a letter from the Secretary of War, which gives his military record and corroborates this statement:

WAR DEPARTMENT,
Washington, May 16, 1928.

Hon. JAMES V. McCINTIC,
House of Representatives.

DEAR MR. McCLINTIC: I have your letter of the 14th instant in which you request information concerning the pay of Harold M. Weeks.

The April, 1928, pay roll shows he received pay as follows for that month:

Base pay	$72.00
Longevity pay	7.20
Monetary allowance in lieu of rations and quarters	58.50
Total	137.70

The records show that this soldier enlisted May 31, 1917, in Massachusetts National Guard; reported for Federal service July 25, 1917, and was honorably discharged April 29, 1919, a private, first class, Headquarters Company, One hundred and first Sanitary Train, M. D.; reenlisted May 1, 1919, and was honorably discharged April 30, 1920, as sergeant major, Infantry; reenlisted May 1, 1920, transferred as sergeant to detached enlisted men's list (intelligence police) December 17, 1920, and was honorably discharged April 30, 1923, as sergeant, detached enlisted men's list (intelligence police); reenlisted in grade May 1, 1923; appointed staff sergeant, detached enlisted men's list (intelligence police), December 8, 1924, and was honorably discharged April 30, 1926, as staff sergeant, detached enlisted men's list (intelligence police); reenlisted in grade May 1, 1926, and is now serving as staff sergeant, detached enlisted men's list (intelligence police).

Sincerely yours,

DWIGHT F. DAVIS, *Secretary of War.*

Mr. MORTON D. HULL. Mr. Speaker, will the gentleman yield?

Mr. McCLINTIC. Yes.

Mr. MORTON D. HULL. That is from whom?

Mr. McCLINTIC. From the War Department. This man Weeks is one of the detached enlisted men who run around snooping and seeking information against Members of Congress and others.

Mr. MORTON D. HULL. Can the gentleman advise us what his information is with reference to his getting this money from the War Department?

Mr. McCLINTIC. I will put it in the RECORD.

It will be interesting to the Congress to know that the War Department maintains a bureau which allows its personnel to make affidavits of any kind they see fit against Members of Congress. Judging from the statements contained in the letter I have received, this man Weeks is the kind of an individual that could be sent out to manufacture any sort of a charge desired. When it is taken into consideration that he has superior officers who would necessarily have to give him permission to file such a record as he did in this matter, it will be interesting to know what attitude the War Department is going to take in a case of this kind; to say the least, if the intelligence bureau of this department is filled up with individuals like this man Weeks, an innocent man's life would not be worth anything should he incur the ill will of such an aggregation.

I have received many interesting letters from those who felt that this man Weeks was of about the lowest type of humanity, and I insert at this point a letter and a copy of a communication addressed to Mr. Weeks:

WASHINGTON, *April 30, 1928.*

Hon. J. V. McCLINTIC,
Seventh Oklahoma District,
House Office Building, Washington, D. C.

DEAR SIR: You may be interested in the inclosed copy of a letter written by me last week to that pestilential family namesake of mine,

Harold M. Weeks, of Massachusetts, who received so much publicity in connection with the franking matter reported in the press.

I found it difficult to keep my remarks within mailable bounds, as I was tempted to turn loose samples of a somewhat extensive vocabulary in that direction acquired during over 45 years of residence in California and in Mexico. But I am sure that the lovely Harold had no difficulty in detecting the depth of my detestation for such busybodies and mischief-makers as he—"tattletales," we used to call them in my own boyhood.

I have not appreciated being asked by acquaintances whether the two-legged skunk bearing my family name is related to me. I hope not.

Sincerely and sympathetically yours,

GEO. F. WEEKS.

WASHINGTON, *April 27, 1928.*

Mr. HAROLD M. WEEKS,
Wellesley Hills, Mass.

MY DEAR SIR: As (presumably) a codescendant of the Weeks brothers of the Dorchester immigration of 1630–32; as a direct descendant of a Revolutionary War soldier; as a native of Massachusetts; as a man of 76 years who has vivid memories of the horrors of our own Civil War of 1861–1865; as a newspaper correspondent in the field in Mexico during the revolutionary era of 1910–1920; as a man thoroughly opposed to war, whether personal or national, except in cases of malicious attack, and then only after all measures to prevent violence shall have failed; bearing in mind the utter futility of the recent "World War to prevent war," in which I am ashamed to acknowledge I acted as an unwitting disseminator of grossly false statements, believed by me to be true because of their source, and following which the world is now preparing on every hand for another and infinitely worse conflict; not being affiliated in any manner except by sympathy with the antiwar organization referred to in the clipping or any of like character; being all this I am deeply pained to see the name of our common family thrown open to adverse criticism by a member thereof, as in the present case.

As one at all times jealous of the good repute of the family patronymic, I have felt moved to address you and to ask your calm consideration of the unfragrant exhibition which you have seen fit to make of the name borne by both, and in my own case by a very numerous number of descendants.

If you should see fit to stroll over to the old Dorchester "burying ground," I have no manner of doubt but that you will note unmistakable evidences of the disturbance of the bones of the pioneers of the Weeks family in the sepulchers which they have occupied so long and so peacefully.

I tender you no apologies for apprising you of how at least one Weeks regards the rolling of the family name in the mire.

Yours regretfully,

GEO. F. WEEKS.

P. S.—Incidentally I myself have been a lifelong Republican, edited and published Republican newspapers, and voted the Republican ticket until I was disfranchised by residence in this city—the very same "taxation without representation" against which my great-grandfather fought! Also had a son in the Spanish-American War!

The attorney, Mr. Judson Hannigan, made a statement in which he indorsed the splendid reputation of this snooper, Harold M. Weeks, and I want to say to you that I will always take the information that comes from the home of the person rather than from some outside attorney who probably gets a fee for drawing up the affidavit.

For about one week the newspapers throughout the Nation carried this story concerning the alleged misuse of my frank. This organization for the prevention of war admits it sent out to the same people about 15,000 pamphlets in a separate envelope which contained proper postage. If this organization had placed these pamphlets in my franked envelope, the same would have had to be steamed open, and it stands to reason that out of this number going to every State in the Union someone would have advised the gentleman from Massachusetts, the Post Office Department, myself, or his own Representative in Congress that he, too, had received this extraneous matter under my frank.

I said in my first speech that this was a "frame up," and I brand this man Weeks as the cheapest perjurer that was ever sponsored by a Member of Congress in a case of this kind. I have no respect for any Member of Congress who will take up with trash, and anyone who will uphold a perjurer or a crook is no better than a perjurer or a crook.

The gentleman from Massachusetts has denied giving out the first statement to the press, and unless it is cleared up it will always remain a mystery as to how the newspaper reporters received this information. When he had concluded his Utopian speech before these facts were brought out his statements appeared to have the right ring and were received in good form by the Members of this House. Less than 30 minutes after he had delivered this speech a number of newspaper men were eating their lunch in the House dining room, and while so doing gave vent to their feelings concerning the way this matter had been handled. One of my friends—a gentleman well known to many Members of Congress—happened to be sitting at the same table, and after the meal was over he put in writing, while the conversation was fresh in his mind, just what took place and what was said, and I want the Clerk to read this statement so that it will clear up the matter as far as the origin is concerned.

The Clerk read as follows:

FRIDAY, *April 27, 1928.*

Yesterday, while at lunch in the House restaurant I was seated at the table with several newspaper men, and the conversation turned on to your matter with Representative ANDREW. One of the newspaper men said that it ended in a love feast, and that the matter had gone to the Post Office Department and they would probably do nothing, and thereby leave the newspaper men holding the sack.

The representative of the paper, during the conversation, remarked that he felt sure that they tried to frame MCCLINTIC. One of the others asked if he thought ANDREW was in on the frame-up, and he replied that he did, as when he gave out the story he asked that it be used in such a way that MCCLINTIC would not have opportunity to deny it that day. He further said that the only one that came back (meaning the franked envelope) or that they had heard about was one supposed to have been received by a man whose name, as I remember it, was Weeks, and that he was the party that had secured information from this organization under an assumed name, and was, in fact, a spy in the organization to learn what was going on. Something was said that if Mr. ANDREW was not in on the frame-up he was damn ignorant to fall for it. The man who, I believe, represents a Boston paper remarked that he felt like writing up the whole story, and seemed to be set in his view that it was a frame-up on you and that ANDREW was in on it, or aware of it.

Mr. MILLER. Mr. Chairman, will the gentleman yield?

Mr. MCCLINTIC. In a moment. I want to be fair to the gentleman from Massachusetts [Mr. ANDREW], and if he wants to know the name of the newspaper man I will give it to him. I have no object in this matter other than bringing out all the facts. My franking privilege has been attacked and the Post Office Department has exonerated me and the organization which was accused of violating this frank.

It is not necessary for me to accuse Mr. ANDREW of being unfair. Everybody connected with the press realizes that this story had to come from him in some way; therefore, to be just, I am going to say that when this information was brought to me I located the newspaper man and let him read this statement, and I want to say to this House that he didn't deny making the statement.

When this matter came up before the Naval Affairs Committee the gentleman from Illinois [Mr. BRITTEN] apparently took great delight in trying to embarrass me by asking how many of these envelopes I had turned over to the National Council for the Prevention of War. I did not hesitate about giving him the information, but later I asked him a question in the following language.

I quote from the record:

Mr. MCCLINTIC. * * * And on the other hand I have been told that your franking privilege has been used by these militaristic organizations.

Mr. BRITTEN. I do not know any military organization that has used my frank. Certainly it has not used it with my consent.

You will note that he stated to the committee that he had no knowledge of his frank being used by a militaristic organization. Every Member of this House knows that the Government Printing Office will not execute an order for the carrying of a person's frank unless it is given in the proper manner. I am not interested in this matter other than to show that the committee has apparently been deceived; therefore I present to this House a part of the hearings held in connection with the naval shipbuilding bill, which was obtained from the United States Infantry Association, a militaristic organization, and, of course, if the gentleman from Illinois says that the organization had this franked without his knowledge then that will end the matter. The gentleman made the statement that he knows nothing about his frank being used for this purpose.

I also want to say to Mr. ANDREW that if he is awfully keen to find out some one who has violated his franking privilege here is an envelope bearing the name in the corner of the gentleman from Illinois, which contains three lines that at no time appeared in the CONGRESSIONAL RECORD or the hearings. I also wish to say that according to Mr. Andy Smith, the repre-

sentative of the Public Printer here at the Capitol, a person can not include in a part of the CONGRESSIONAL RECORD or in a part of hearings statements that were not made in the same.

Mr. BRITTEN. Will the gentleman yield?

Mr. McCLINTIC. Yes.

Mr. BRITTEN. Will the gentleman be good enough to tell me what document he has in his hand?

Mr. McCLINTIC. I will give it to the gentleman. I have made the statement I did not know whether the gentleman knew anything about it.

Mr. BRITTEN. I never heard of the organization in my life or do I know anything about it. What is the name of the organization?

Mr. McCLINTIC. The United States Infantry Association.

Mr. BRITTEN. Is that on the envelope?

Mr. McCLINTIC. No; it is not on the envelope, but that is where it came from.

Mr. BRITTEN. How does the gentleman know?

Mr. McCLINTIC. I know where it came from, because it came through regular channels. If the gentleman states he does not know anything about it, then some one has used his franking privilege in a way that should not be countenanced by this House.

Mr. BRITTEN. If the gentleman will permit, I would like to call the attention of the House to the fact that this is an extract from the hearings of the Committee on Naval Affairs and nothing else. It is no speech of mine. It is an extract from the remarks of a man by the name of E. B. Johns, of Washington, D. C., and is an extract from the hearings themselves. It contains nothing else.

Mr. McCLINTIC. But it contains three or four lines that are not frankable. They are neither part of any CONGRESSIONAL RECORD nor of any hearing. I know whereof I speak because I have examined the RECORD and the hearings.

Mr. MILLER. Will the gentleman yield?

Mr. McCLINTIC. Yes.

Mr. MILLER. I would like to have the gentleman state the name of the man who made the statement read by the Clerk a moment ago.

Mr. McCLINTIC. I will give the name of the newspaper man to the gentleman who is implicated.

Mr. MILLER. I think in fairness to the membership of the House the name should be given right now.

Mr. McCLINTIC. I will give the name of the man who apparently knows all the facts in this controversy.

The gentleman from Massachusetts could have avoided all this controversy if he had had any respect for the advice given by our distinguished floor leader [Mr. TILSON]. He made the statement that he tried to see me, but the truth of the matter is that he did not speak to me until four days after the newspapers carried his story. I had been in my office every day, and I do not accept his statement as being made in good faith. I also want to say that the gentleman from Georgia [Mr. VINSON] apparently took a great deal of pride in criticizing my attitude in defending the charge that had been made against the use of my franking privilege. He seemed to enjoy the applause that came from the majority side of the House, and the press carried the statement throughout the Nation that he had defended the person who was sponsoring this spy from Massachusetts. I wish to tell the House that since that date he has made an apology to me and offered to come before the House and make any statement that I saw fit. I did not ask him to do this, but, on the other hand, I had him go to the floor leader [Mr. TILSON] and find out whether or not the gentleman from Massachusetts had acted honorably in the matter and how the newspaper men viewed this subject. I realize that sometimes a person uses poor judgment and gets into a mess, and I want to give the gentleman from Georgia credit for clearing his skirts in this matter.

Now, Mr. Speaker, I regret exceedingly that this controversy came up. I had nothing to do with it, and I merely followed my congressional right in asking that a full investigation be made. I asked the Postmaster General if he would not let me see the inspector's report relative to the kind of reputation this man Weeks has up in Massachusetts, but he did not want to do it, so I did not press it any further.

I want to say to this House that if the member of the committee had followed the advice of his own leader we would not have had all this controversy, because I am the last person who would ever stand for the violation or abuse of my own frank by any person. I knew I had not violated any rule; I knew I had not violated any law; and I am very glad indeed that the Postmaster General and the Post Office Department have exonerated me in every way they could. [Applause.]

DEATH OF DR. HIDEYO NOGUCHI

The SPEAKER. Under the special order of the House the gentleman from New York [Mr. SIROVICH] is recognized for 10 minutes.

Mr. BRITTEN. Mr. Speaker, I desire to be recognized for not to exceed five minutes on a question of personal privilege.

The SPEAKER. Without objection, the Chair will recognize the gentleman from Illinois for five minutes at the conclusion of the remarks of the gentleman from New York.

There was no objection.

Mr. SIROVICH. Mr. Speaker, ladies, and gentlemen, yesterday there died on the golden coast of Africa one of the most eminent and distinguished scientists of the twentieth century, Dr. Hideyo Noguchi, born in Japan, yet belonging to the citizenship of the world.

America, the land of liberty and of his adoption, gave him the laboratory of opportunity to demonstrate his profound and scientific knowledge, so that his genius could explore those mysterious realms which harbor virulent organisms that have been responsible for the causation of the terrible plagues, scourges, and diseases that have afflicted and ravaged humanity the world over for thousands and thousands of years.

If life is but a dream and death be its awakening, then in the world of dreams the work, the fame, the name of Hideyo Noguchi will forever endure.

His contributions to the service and knowledge of humanity will immortalize his name and bequeath a heritage of scientific and useful service to a grateful posterity for having been able to force from the unyielding bosom of nature those mysterious secrets that for centuries nature has held inviolate and unbroken, until the fertile imagination and persistent efforts of the genius of Noguchi forced nature to surrender its secrets to the microscope of science. [Applause.]

The Supreme Architect of the Universe reveals Himself to humble and lowly man in three mystical and inexplicable ways. First, through the life of the universe, which we term nature. Second, through the thoughts of man, which we term art. And third, through the precision and exactness of the mind, through correct observation and thinking, which we term science.

In this great arena of life intellectual man worships at the shrine of nature, science, and art. Here in this temple of culture are seated side by side to each other nature, science, and art, presided over by God Almighty Himself, to whom we graciously bow our heads in humble submission as the Great All Powerful from whom all life and goodness flows. [Applause.]

The disciples of nature, art, and science recognize no distinction in race, creed, and color. The world is their country. The brotherhood of mankind is their shibboleth and watchword, and love and service to humanity everywhere is the cement that binds them together until the curtain of life falls upon them. [Applause.]

Who are the men who have immortalized their names on the altar of medical service? Hippocrates the Great was the father of medicine. He lived 300 years before Christ was born. The oath that every physician subscribes to, ere he is permitted to embark upon his medical career, is named after him and is known the world over as the "Hippocratic oath."

Four hundred years after the death of Hippocrates there flourished in Rome the greatest commentator on the 60 books written by Hippocrates, a physician whose name was Galen. For 15 centuries Galen was worshiped by the medical fraternity as the foremost figure on the medical firmament, whose skill and ingenuity in the field of medicine was revered and honored by the countless legions who were his devoted followers.

In the year 1132 there was born in Cordova, Spain, the most eminent physician of his time, Moses Maimonides. He was educated in Tripoli, Morocco, and Algiers. He was physician to Saladin the Great of Cairo, Egypt, who sent him out to treat Richard the Lion-hearted when he led the second crusade to redeem the Holy Lands from the infidels. Maimonides was the outstanding figure in medicine, in science, in art, and in philosophy during the dark ages of our world.

During the period of the Renaissance, the years 1500 to 1600, Italy gave to the world five of the greatest anatomists the world has ever known—Jacobus Sylvius, the uncanny genius whose work on the human brain is immortalized by the great Sylvian fissure of the brain that is named after him—Andreas Vesalius, the distinguished and learned pupil of Sylvius, who discovered the fact that veins have valves, and whose anatomical clinics were crowded and packed with students from all over Europe who came to pay tribute to his phenominal knowledge of human anatomy—Fallopius, the adroit and expert scholar after whom the Fallopian tubes of the female generative organs are named—

Bartelemo Eustachius who was the first to describe the Eustachian tube, that runs from the back of the nose to the middle ear, whom posterity has honored in naming the Eustachian tube after him, and last, but not the least—François Rabelais, one of the greatest anatomists of the world who lectured on every phase of human anatomy, demonstrating his lectures on the dissected body to crowded, enthusiastic, and overawed audiences.

Paracelsus, who was contemporaneous with these brilliant anatomists, was born in Switzerland in 1493, and was the pioneer in anticipating the field of infection and contagion, and the first doctor to introduce mineral substances in the treatment of disease as professor of medicine in the University of Basle. Associated with him in his investigations was Ambrose Pare, professor in the University of Paris, who through his indefatigable zeal, skill, and technique laid the foundation of modern surgery and was the greatest surgeon of his time.

From the years 1600 to 1700 three mighty characters held the center of the stage in the field of scientific medical endeavor—Jean Baptiste Van Helmont, born in Brussels, Belgium, considered the father of biological chemistry, and the first physician to ever examine chemically the blood and urine of human beings to definitely determine the causative factor of disease. Helmont was considered one of the greatest masters of his day.

The year 1628 commemorates forever the outstanding contribution of England to the science of medicine. That period will forever remain famous as the year that William Harvey discovered the circulation of the blood, that revolutionized the concept and the function of the heart and blood vessels, because Hippocrates and his ancient disciples thought that the air was transported throughout the blood vessels of the body in order to feed the innate heat.

Dr. Thomas Sydenham was worshiped by his contemporaries and by the public at large as one of the greatest clinicians and diagnosticians of his time.

From the year 1700 to 1800 England contributed the greatest public benefactor to humanity in the person of Edward Jenner, who in 1796 discovered the principle of vaccination, a discovery of the highest importance to civilization, that has made it possible through vaccination to drive that malignant and pestilent scourge of smallpox from the face of the world.

The years 1800 to 1900 finds every nation of continental Europe, including our own beloved country, America, all vying with each other to subjugate sickness and disease, so that longevity might be prolonged and the health of humanity bettered.

In America the versatile, talented, and gifted author and doctor, Oliver Wendell Holmes, the father of our distinguished Judge Holmes, of the United States Supreme Court, was first to write upon the subject of puerperal sepsis. He felt that motherhood was paying too great a penalty upon the altar of childbirth. He proved that puerperal sepsis was caused by dirt infection. He was laughed at and jeered at for his views. But 50 years later Doctor Semmelweiss, an obstetrician, of the University of Budapest, confirmed his views. The medical fraternity treated Semmelweiss as the American doctors treated Oliver Wendell Holmes. Semmelweiss, keenly sensitive to this terrible criticism, became insane and died in a madhouse. To-day a monument stands in his memory in the principal square of Budapest, a statue that rightfully belongs to our own beloved scholar and scientist, Dr. Oliver Wendell Holmes. [Applause.]

The Battles of Bunker Hill and Lexington did not bring as much amazement to the citizens of Boston as did the newspaper announcement in the spring of 1846 that Dr. William Morton had discovered a gaseous substance called ether, that could anesthetize any human being and make him unconscious to the knife and scalpel. This drug revolutionized surgery, for prior to its discovery victims of surgical intervention had to be subjected to the deadening effects of opiates and saturated with liquor to deaden their anguish and pain.

Millions of human beings were literally dying every year from infection following operations, until in 1866 Guerin invented absorbent-cotton dressings, which formed a barrier to the spreading of this condition.

Two years later, in 1868, the world was electrified by the announcement that the great Lord Lister had solved the cause of infection by practicing the methods of antisepsis before, during, and after operations, which reduced the frightful morbidity and mortality following operations, and made surgery safe and sound when applied to any condition in which the knife had to be used in order to save life or limb.

It was just about this time that the greatest scientific genius of the nineteenth century, Pasteur, came upon the horizon of science. Within a short time he demonstrated to a skeptical and amazed world that infection was due to a bacterial invasion. To a dazed and dumbfounded world he revealed these new organisms—cocci, bacilli, spirillæ, fungi, yeasts. A new world. A conquest of chemical culture and the microscope. These discoveries of Pasteur completely resurrected surgery and chiefly transformed the treatment of modern diseases.

Thus far Egypt, Greece, Italy, Spain, France, England, and America had blazed the trail of medical and surgical pioneering. Teuton culture and civilization became inspired by these intrepid soldiers of the microscope, the agar culture, and chemistry, and finally Germany gave to the world the peer and master of all bacteriologists of all time in the person of Doctor Koch, who thrilled and bewildered an amazed world when he announced the discovery of the tubercle bacillus that was responsible for the causation of tuberculosis and led the mortality tables of the world in the causation of death from consumption.

Ehrlich, the wizard of biochemistry, is Germany's and the world's greatest contributor to the successful treatment of modern disease. His "606," known as salvarsan, is an absolute specific in the treatment of syphilis, that had ravaged the world for centuries and made syphilitic treatment the curse of the possessor and the bane of the physician.

From time immemorial the organism that caused syphilis was unknown. Only a decade ago a great German savant and scholar isolated this frightful assassin of human life under the field of the dark microscope, and to perpetuate his memory the scientific world named this reaction after the founder in the examination of human blood and calls it in his honor "the Wassermann test."

In this, the twentieth century of civilization, America ranks in the forefront as the proud possessor of the greatest scientists of the world. Behold its roster in Public Health Service—men who have distinguished themselves in arduous and dangerous research to promote the interests and happiness of mankind.

Where is there a patriotic man or woman who will forget the courageous heroism of Doctor Lazear, who, under the supervision of Dr. Walter Reed, gave up his life upon the altar of science in order to have himself infected with the mosquito to prove to the world that the mosquito is the cause of malaria and yellow fever?

It was this wonderful experiment in which Lazear gave up his life that gave the knowledge to Doctor Gorgas to eradicate yellow fever and malaria from the Panama Canal, which made it possible for American engineers to build the canal.

DR. HENRY R. CARTER

World-recognized authority on yellow fever and malaria. In 1900–1901, by purely epidemiological studies, demonstrated that yellow fever must be conveyed by an intermediate host, and measured with accuracy the periods of incubation in that host and in man, thus laying a solid scientific basis for the subsequent experimental verification.

DR. CHARLES WARDELL STILES

Discovered the American species of hookworm, demonstrated its great prevalence, worked out its epidemiology, devised methods for the control of the disease, and inaugurated the successful campaign against it.

DRS. MILTON J. ROSENAU AND JOHN F. ANDERSON

Pioneers in the study of anaphylaxis, concerning which they contributed many of the fundamental facts. This phenomenon is of great importance in the modern conception of disease processes.

DRS. GEORGE W. M'COY AND C. W. CHAPIN

Discovered and cultivated the bacillus tularense, making methods available for its further study. They did their work in 1910 on California ground squirrels.

DR. EDWARD FRANCIS

Contributed nearly all that is known concerning the disease tularemia in man. Showed its methods of transmission and what to do in order to avoid it.

DR. R. R. SPENCER

Worked out a vaccine against Rocky Mountain spotted fever. Demonstrated its efficacy in experimental animals and its harmlessness by injecting himself first. Showed by use in hundreds of persons who are exposed by occupation that it confers a large measure of protection. The preparation of this vaccine involves a new principle of immunology. Vaccine used on humans, 1925.

DR. JOSEPH GOLDBERGER

Showed the dietary origin and cure of pellagra. This is a most notable achievement, since this disease has baffled the best European talent for centuries. At times it has threatened to become seriously prevalent in the United States, but with this new knowledge the threat has been permanently removed. Study of pellagra begun in 1912, and is going on at the present time.

DR. WADE H. FROST

Planned and conducted the first thoroughgoing and fundamental investigation of the problems offered by the pollution of streams in this country. In view of the increase of population and manufactures along our streams this has been a most valuable activity. Investigation of the pollution of the Ohio River began under his direction July, 1913.

DR. JOHN M'MULLEN

Demonstrated the practicability of virtually eradicating trachoma and preventing blindness therefrom in mountainous areas of Kentucky and other States by the establishment of small hospitals and the employment of skillful treatment.

BACTERIOLOGIST ALICE EVANS

In 1918 she showed similarity of causes of Malta fever and contagious abortion and occurrence of latter infection in people. Now increasingly recognized as a cause of human illness.

DR. VICTOR HEISER, CHIEF QUARANTINE OFFICER, PHILIPPINES, 1903–1915

Demonstrated the possibility of establishing effective health service in a large tropical country with diverse aboriginal population.

DR. M. A. BARBER

Originated single-cell culture method which he first used in 1902. This opened up a prolific field of investigation. The use of Paris-green control of mosquitoes in 1921. This cheap method has made malaria control feasible in many areas where it was formerly impossible because of the expense.

In the science, skill, and technique of surgery, America leads the world. Where are the surgeons that are comparable to the Mayo brothers, of Rochester, Minn.; Crile, of Cleveland; Ochsner, of Chicago; Cushing, of Boston; Deaver, of Philadelphia; Kelly and Wilmer, of Baltimore; Blake, Brewer, Albert A. Berg, John Erdman, John J. McGrath, Howard C. Taylor, George Schwartz, John Pollack, and John Prescott Grant, of New York City—men of the highest caliber and ability, whose very names are household words in the cities from whence they come, where thousands of their benefactors are praying for their health and happiness? [Applause.]

Within a radius of a mile from the fourteenth Congressional district, which I have the honor to represent, is the greatest medical research center in the world. It is called the Rockefeller Institute. It is a monument to two of the greatest philanthropists that the world has ever known, John D. Rockefeller and his wonderful and gracious son, who is emulating his father in devoting his fortune to the best service of his fellow man. This brilliant institute has become famous through three of nature's noblemen—a triumvirate whose name and fame will persist as long as time endures.

These distinguished scholars thus far represent the three greatest scientists of the twentieth century—Alexis Carrel, Simon Flexner, and Hideyo Noguchi.

Alexis Carrel won the Nobel prize a few years ago for his brilliant discoveries in the realm of physiology, biology, and collateral subjects. He is the outstanding genius of our present time.

Simon Flexner, a great name to conjure with, internationally famous. He will live in the memory of generations that are to come for having isolated the infantile-paralysis virus, for his cure of snake venom, and, above all, for the serum that he has perfected that helps to cure and save the lives of thousands of sufferers from epidemic meningitis. As long as anywhere the tradition of science survives, Flexner's work will endure. What conquerer has ever had such victories attached to his name as Flexner has in his service to mankind? [Applause.]

Hideyo Noguchi—the great son of Nippon—came to this country in 1900 and subsequently became associated with Professor Flexner and Doctor Carrel. He devoted his supreme and brilliant talent to ferret out the causes of terrible diseases which baffled medical skill, and whose treatment made no impress upon the nature of the disease. Seldom did he fail in his accomplishment; success usually crowned his efforts.

Through his genius the organism that caused paresis was isolated. Paresis was filling the insane institutions of the world with the victims of this unfortunate malady. He localized the organism in the brain and through the microscope forced it to reveal itself to the amazed scientific world. Noguchi proved that paresis was caused by the spirochita pallida, the organism that caused syphilis.

The versatility and genius of Noguchi further manifested itself in his brilliant discovery of the organism that was responsible for the causation of trachoma—an eye affliction and disease that caused more blindness in the world than any other condition known to mankind.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent of the House to proceed for two more minutes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SIROVICH. Mr. Speaker, ladies and gentlemen. Hideyo Noguchi was not content with his extraordinary and brilliant conquests in this his adopted land; he was looking for new fields of endeavor, new lands for conquest. In the name of science he set sail for South America to determine the cause of yellow fever in that land. In a short time the world was again thrilled by his announcement—he had again triumphed. He isolated the yellow-fever organism in South America. To determine whether the yellow fever of Africa was caused by the same species as South America he set sail for that pesthole in Africa.

In a short while Noguchi had himself infected with the dreaded organism that caused African yellow fever. Chills and fever raked his body fore and aft. His militant and brilliant mind refused to surrender to the hosts of yellow fever's organism. The battle waged on. At last Noguchi isolated the organism and gave to the world the knowledge that the yellow fever of South America and Africa were caused by two different hosts. Science triumphed, but Noguchi fell a victim to this dreadful disease. He died a martyr to duty. He will live in the memory of humanity and mankind. Greater love hath no man, than to give up his life for another. God bless his soul!

Mr. Speaker, ladies and gentlemen, if the grave is the end of all life, then Hideyo Noguchi's name will forever remain immortal through the great contribution he has given to mankind; but if the grave be the gateway to some future state of existence then Hideyo Noguchi, in conjunction with the great illustrious immortals that have gone beyond the Great Divide to sleep in eternal rest, will forever be revered, honored, and remembered by grateful mankind for having given of his to-day that others may have their to-morrow. [Loud applause.]

CIVIL-SERVICE SALARY INCREASE BILL

Mr. LEHLBACH. Mr. Speaker, I present a conference report on the bill H. R. 6518, the civil-service salary increase bill, for printing in the RECORD.

THE FRANKING PRIVILEGE

Mr. BRITTEN. Mr. Speaker, at this late hour I do not desire to take the time of the House unnecessarily, but I think after the address that has been made by my colleague from Oklahoma [Mr. McCLINTIC] it is only fair that I should state to the House two or three things in the direction of which they may not already be informed.

In the first place, no member of the Committee on Naval Affairs, as far as I know, was interested in what the gentleman from Oklahoma did with his franking privilege, and no member of the committee was interested in the investigation of the use of his franking privilege until the matter was presented to the committee by the gentleman from Oklahoma himself, who demanded an investigation.

Mr. McCLINTIC. I did not demand an investigation, but asked that the committee confront me with witnesses who made this charge, and this was not done.

Mr. BRITTEN. He requested an investigation by the committee. When a member of the committee in good standing, as the gentleman from Oklahoma is with every member of the committee, requested an investigation of his personal matter, it was granted, and would be by any other committee in the House.

Subsequent to that, when the date for the investigation arrived and the question of jurisdiction arose, on motion of the gentleman from Georgia [Mr. VINSON] that the committee had no jurisdiction, no authority to proceed with an investigation on a roll call, the gentleman himself [Mr. McCLINTIC]—and the gentleman has no objection to my imparting this information——

Mr. McCLINTIC. No.

Mr. BRITTEN (continuing). When it came time to investigate, and Mr. VINSON moved to refer the entire matter to the Post Office authorities, on a roll call the gentleman from Oklahoma answered present, and then immediately I changed my vote from yea to nay, in order to vote with the gentleman.

Mr. McCLINTIC. I would not vote on the question because I was a party to the controversy, but I asked to be confronted with the witness, and you had no witness there, although I offered to pay his expenses.

Mr. BRITTEN. I am trying to vindicate the gentleman; I am not attacking him. It is nobody's business what he does with his franking privilege—that is a matter for the House

itself to consider. The entire matter rested on the suggestion of the gentleman himself. No member of the committee ever suggested that there was a misuse of the franking privilege by the gentleman; we were all specific about that. No Member of the House has said that he violated his franking privilege. The whole question arose by the suggested misuse of the privilege by some one else—a pacifist organization. Every member of the committee was in accord with the gentleman, and every member of the committee desired to work with the gentleman and show to his constituents as well as to the country that he had not violated his franking privilege. There was no intention to put the gentleman—as his remarks might imply—to put the gentleman in a hole.

The gentleman now calls attention to something that had been sent out in one of my envelopes and which something, as near as I can read it, is an exact duplicate of the printed hearings before the committee. Is there any gentleman present who would deny to Edward E. Spafford, national commander of the American Legion, a reprint of his remarks before the committee if he asked for them? Certainly not. Is there anyone who would deny to Mrs. William Sherman Walker, that patriotic leader of the Daughters of the American Revolution, a few thousand copies of her remarks before the committee in order that she might send them to some of the 167,000 members of that patriotic organization? Of course not.

The SPEAKER. The time of the gentleman has expired.

Mr. BRITTEN. Mr. Speaker, I ask for five minutes more.

The SPEAKER. Is there objection to the request of the gentleman?

There was no objection.

Mr. McCLINTIC. I think I made the statement that I had no objection to the use of the gentleman's frank for that purpose. I brought out that the gentleman had allowed his frank to be used in a different manner from the testimony contained in the RECORD, and my report was nothing but a substitute for the majority report.

Mr. BRITTEN. The gentleman does not want to convey to the House the impression that I brought up any matter against him?

Mr. McCLINTIC. No; not there. The point is, your answer left the impression with the committee that no other person's frank had been used except mine. I had no objection to the gentleman's being used by any of these organizations.

Mr. BRITTEN. The truth of the matter is that there is a great difference between organizations. I shall not complain of what the gentleman did. That is his business. He made a speech on the floor of the House and wrote the minority report upon the bill that was before the House, and he turned 20,000 printed copies of his remarks and minority report over to this pacifist organization. That is his privilege, and I have no objection to his having done so. But I want the House to understand that in my case nothing was sent out except an extract from the hearings themselves by the individuals who appeared before the committee. It is presumed they went to their own organizations. I contend there is a great difference between the American Legion as an organization, the Daughters of the American Revolution as an organization, and some 12 or 15 others whose names I have here, who appeared before that committee, which are striving constantly year in and year out to uphold the National Government in all of its desires, and to maintain a proper national defense under the Washington treaty, and an underground organization of worms that are trying to undermine the Government every time they get a chance.

Mr. McCLINTIC. Does the gentleman want to leave the impression that my minority report was not favorable to a proper defense?

Mr. BRITTEN. Oh, no. I am not talking about the gentleman's minority report.

Mr. McCLINTIC. I was mighty glad to get any organization to mail out my report, which was in favor of aircraft and submarines.

Mr. BRITTEN. That is evident.

Mr. McCLINTIC. I am glad to have this organization or any other carry out my ideas.

Mr. BRITTEN. That is all right. I have no objection to that, but there is a great difference between organizations, and I am not referring to this one alone, but I am referring here to the American branch of the Women's International League——

Mr. JACOBSTEIN rose.

Mr. BERGER. Mr. Speaker, will the gentleman yield?

Mr. BRITTEN. Not now—which sent out a statement in January of this year, this American branch of the Women's International League, whose main office is some place in Europe——

Mr. BERGER. Mr. Speaker, will the gentleman yield?

Mr. BRITTEN. Not now—calling attention to a conference then going on in Habana, Cuba, which statement said:

> This is the time to write your Congressman and see the editors of your newspapers. What are you doing to stop the war in Nicaragua? This is the time to voice your objections to what is going on in the promotion of national defense.

I say that that kind of an organization can not be spoken of in the same breath, in the same room, or in the same nation with such organizations as the Daughters of the American Revolution and the American Legion.

Mr. BERGER. Why not?

Mr. BRITTEN. Because one seeks to uphold the Government and the other to destroy it.

Mr. BERGER. I deny that. I believe just the contrary is true.

Mr. BRITTEN. I accept the gentleman's denial. These organizations to which I have just referred, and particularly the National Council for the Prevention of War, on the pretense of having killed the Navy bill, and it is a pretense, sent out cards requesting contributions of a dollar to $5 or $10—

> because we are keeping the country and the world at peace, and what have you done for world peace, have you sent us any money?

Statements of that kind are being sent out upon the pretense of having accomplished something. I repeat that those organizations are in no sense comparable to the patriotic organizations who are sending out some of their own remarks before the Committee on Naval Affairs and nothing else. [Applause.]

BOULDER DAM

Mr. SMITH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 5773, with Mr. LEHLBACH in the chair.

The Clerk reported the title of the bill.

Mr. SMITH. Mr. Chairman, I yield 10 minutes to the gentleman from Connecticut [Mr. TILSON].

Mr. TILSON. I have hesitated to take any time from either the proponents or the opponents of this bill, because, to be perfectly truthful, I have studied the bill seriously for only about a year, and no one with only a year's study can claim to understand anything like all the difficulties of the problem dealt with in this bill. I have sat through this debate and have heard practically everything that has been said. I heard with interest and pleasure the gentleman from Arizona [Mr. DOUGLAS] yesterday in a masterly argument, and if he could have convinced me I was ready to say that I would join him and help him defeat action on the bill at this session. After hearing him through there were still certain points that remained in my mind that I was not satisfied that he had answered. I am now going to think out loud to the members of this committee the thoughts that occur to me as to these points.

The Boulder Dam project is a very great undertaking, one of the very greatest that has ever been proposed by man. It ought not to be held up or delayed except for very good reasons. All are agreed as to one thing, which is that flood control on the lower Colorado, in order to reasonably protect life and property in the Colorado delta, is one thing in which the Government ought to interest itself. The question then arises as to how this should be done. If in the doing of the thing that all agree ought to be done we can at the same time do something else useful and highly beneficial, common sense would say that we ought to do it.

Mr. DOUGLAS of Arizona. Mr. Chairman, will the gentleman yield?

Mr. TILSON. I prefer not to yield, because I do not profess, as I said in the beginning, to be expert enough to answer the gentleman's questions. I prefer that he would wait until I am through to answer me if he will. I thank the gentleman for his courtesy and am sorry not to yield, but I am afraid that I can not add much in the way of light.

I was saying when interrupted that if in the doing of this thing that we must do—flood control, I mean—we may at the same time perform a great and useful service in addition, then I think there should be very good reasons for refusing to do it.

It is agreed that flood control is necessary, and that the proposed Boulder Dam will adequately serve this purpose. It is claimed that flood control alone can be effected by the erection of a smaller dam somewhere else, and this I believe to

be true. It is admitted that while a lower dam at some other place might regulate the stream flow, it would not produce power.

Mr. DOUGLAS of Arizona. Mr. Chairman, will the gentleman yield there?

Mr. TILSON. No; let me go on. Undoubtedly my remarks will be full of inaccuracies owing to lack of full information, but I hope that the gentleman will wait until I am through and then correct all of my inaccuracies en bloc.

The proposition to build a high dam at Boulder or Black Canyon will undoubtedly produce power and a great deal of it. Now, I am as much opposed as anybody could possibly be to the Government going into the power business, or into any other business. I am absolutely flatfooted or bottomed on the proposition to keep the Government out, so far as possible, of any industrial enterprise. Here is another instance, however, like some that we have faced heretofore on other matters, where the conditions are such that we must face them. The duty of flood control must be met. The dam at Boulder or Black Canyon will serve the purpose admirably; and at the same time, it is claimed by the proponents of this bill, will do something else of a highly useful character. It is further proposed that those who receive the benefit of the additional service shall pay not only the additional expense but the entire cost of the whole undertaking.

It is stated very clearly, as it seems to me, in one section of the bill that before the Government spends any money in connection with the project it must, by contract or otherwise, make adequate provision for amortizing the cost. And I understand that it is proposed to cut out the "otherwise" so as to make it clear that the intention of the law is that, before any money is expended, the Secretary of the Interior must be satisfied that provisions are made for amortizing the entire cost of the undertaking.

Are we to assume that the Secretary of the Interior is going to act in bad faith, and that he will not do what he is required to do by this law? I do not believe that we should assume this. I credit to the Secretary of the Interior, whoever he may be, the same honest intentions that I would have under like circumstances. If I were in his position I should be careful, in fact, very scrupulous, about carrying out this law in spirit as well as in the letter. Clearly the spirit of it is that the people in southern California who are to receive the benefit or, at any rate, the principal benefit, of this enterprise, shall pay for it; and I understand that they are entirely willing to assume the responsibility of paying for it. They are willing, as I understand the proposition, before any work is done or money expended, to enter into contracts binding them to pay for it.

Here then is a clear case, it seems to me, where we can serve two useful purposes, in fact, three, at the same time—flood control as soon as the dam is constructed, irrigation in the future when needed, and at the same time produce power, which should be made to pay for everything in the end.

If it is not so arranged that the power to be created shall eventually pay the full cost, then this a "gold brick" being passed to us. I for one have faith in the administration of my Government that it will accept no "gold bricks," but that this tremendous undertaking will be carried out on a business basis and that the contracts that are to be entered into will be valid and binding before any money is expended on this project.

These being the facts in the case, it seems to me, as an outsider living far away from the Colorado Basin, as one who has no interest except a general interest in the welfare of my country, and not wishing to stand in the way of any great improvement, I would not be justified in voting to postpone indefinitely the beginning of so great a project.

The questions I have thus raised are those that have bothered me most, and I believe that these same questions are bothering others; but I have resolved in my own mind that with the situation presented by these facts before me I can not stand up any longer and say "We will not do anything at all." [Applause.]

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. TILSON. I yield to the gentleman.

Mr. COX. I am in hearty accord with the statement of the gentleman, and recognize the fact that Congress can not well adjourn without doing something to take care of this subject. But I would like to ask the gentleman if it is his impression that those who are benefited as the result of flood control are expected to pay for flood protection?

Mr. TILSON. I so understand.

Mr. COX. I do not understand that to be true. I think this comes, so far as flood control is concerned, in complete parity with the Mississippi Valley problem.

Mr. TILSON. Please do not take up too much of my time.

Mr. COX. All right.

Mr. TILSON. It seems to me that the flood-control problem is the thing we must face, because while the menace may not be such as to threaten to overwhelm people at any moment, still considering the amount of silt the river is carrying down each year it is only a question of time when something serious will happen down there in the delta of the Colorado. I think we ought to begin some time in advance to take steps that will effectually prevent such a calamity. [Applause.]

Mr. DOUGLAS of Arizona. Mr. Chairman, I yield to myself five minutes.

The CHAIRMAN. The gentleman from Arizona is recognized for five minutes.

Mr. DOUGLAS of Arizona. Mr. Chairman, inasmuch as the gentleman from Connecticut [Mr. TILSON] did not feel he had the time to yield, I have, more or less against my will, taken this opportunity to reply to the few statements he has made.

He has stated that flood control is necessary. I think he is right. He has stated that it can be given either by the construction of a low dam, which will produce no power, or by the construction of a high dam at Boulder Canyon, which will produce not only flood control but also, as he contends, something useful. His first statement is erroneous. A dam 100 feet high at Mohave will produce approximately 200,000 horsepower, and I refer the gentleman to the report made by the United States Geological Survey.

Mr. SWING. Will the gentleman tell us what LaRue says about that reservoir being empty about eight months out of the year?

Mr. DOUGLAS of Arizona. Not for the 10,000,000 acre-foot dam nor for the 22,000,000 acre-foot storage dam at Mohave. In the second place, the gentleman has said that the Boulder Dam, the high dam, will produce something useful. I am glad that at that point he did not use the word "profitable." He did, however, subsequently imply that to be the case.

The Boulder Dam power, members of the committee, if sold at a figure to provide sufficient revenues to reimburse the Federal Government for its cost, will be sold at a figure between one mill and half a mill, or a mill and a half higher than that same power can be produced by steam in the load center or by Colorado power at an economic site.

Now, what is the sense or logic of Congress authorizing a power project when the power to be developed at that project is going to be more costly than power developed elsewhere?

Mr. TILSON. Will the gentleman yield?

Mr. DOUGLAS of Arizona. I have yielded myself five minutes, sir, and I have another gentleman to whom I desire to yield time, so I can not yield. Now, then, the gentleman says the city of Los Angeles, nevertheless, is going to contract for that power. A contract is a binding and effective contract only if the parties thereto are mutually benefited. The very minute the city of Los Angeles appreciates that she can get power cheaper, what is the city of Los Angeles going to do? She is going to come to Congress and she is going to say, "I want to annul or amend the contract."

Now, as a matter of fact, if the gentleman has looked at the Senate bill he will find there is a provision in that act which compels the Secretary of the Interior to sell the power upon a competitive basis, and I submit this to the gentleman from Connecticut: That to sell power on a competitive basis is absolutely incompatible with selling power to amortize cost. Any contract which the Secretary of the Interior may make with the city of Los Angeles will be a political contract, and I submit to the Members of this House that almost every political contract which has ever been made has been either annulled or amended, and that is the sort of contract the Members of this House are authorizing the Secretary of the Interior to make.

Gentlemen, those are the economics of the bill, and I submit to the Members of this House that in view of that situation it is impossible for the Federal Government to be reimbursed for its expenditures. [Applause.]

Mr. Chairman, I yield the balance of my time to the gentleman from Kansas [Mr. SPROUL].

The CHAIRMAN. The gentleman from Kansas is recognized for eight minutes.

Mr. SPROUL of Kansas. Mr. Chairman and members of the committee, I wish to call the attention of the Members to a national and internationally well-known policy of this Government, namely: That the Government shall always refrain from engaging in competitive business; to pursue such policy and attitude toward private business as shall not discourage, but shall encourage it to seek investment in all lines of legitimate business. This policy of the Government has always induced capital to be and continue active in all channels of legitimate enterprises both small and large. Our statesmen and the press have taught these ideals and policies of Government.

The schools of our country have taught young men and women the science of economic business management, qualifying them to be self-reliant, aggressive business citizens.

Along with the equal liberties, opportunities, franchises, privileges, and immunities which are guaranteed by the Government to its citizens to make them a proud, patriotic, sovereign people in being active in governmental affairs are equal ecouragements, immunities, and assurances concerning business affairs. In fact, Mr. Chairman, the genius of our Government lies in the interest it has shown for the making of a good citizenry—an independent, self-reliant, resourceful, sagacious, and keen-minded people. Now, shall we be unappreciative of the great document, the Constitution, and the purposes of our people in the operation of the Government under it in such way as to virtually destroy its greatest worth; to rue the course which the Nation has pursued toward private industry and enterprise. By our action in putting the Government in business, shall we end a most enviable and exemplary career for our people and Government? Shall we take the first long stride toward communism?

Shall this Government, merely because there exists within its territorial boundaries a site for a great power dam, and much capital is required to construct the dam, break away from our historical and most successful national policy and build this dam and operate the power project connected therewith?

This Government enterprise would only be a beginning of the Government in business. There are many other attractive water-power sites in the United States. The "pork barrel" and other lobbying methods by which this proposition may be put over can and will be adopted to put over similar enterprises throughout the United States. And when we once begin and complete the first and largest of all of these projects, five or seven States will have pledged their support to similar enterprises to especially benefit other sections of the country. When a number of them have been completed and put into operation by the Government, more bureaus and their nefarious powers will have been added to the Government's burdens. When the Government thus gets well started into competitive industrial activities, private capital will retreat. Then the Government will have to continue in business, and we will have at least modified communism with all of its un-Americanism.

I believe it was President Harding who especially emphasized our national policy of staying out of business by saying, "There should be more business in government and less government in business." This policy has up to the present time been stressed and followed by President Coolidge. Whether he will continue to adhere to it remains to be seen.

The Colorado River admittedly has never been and never will be a navigable stream in the sense that commerce by means of boats and ships will be conducted on it. No one seriously contends such a thing for it. So that there is no reason, no justice, no fairness, no truth in the assertion in the bill that the legislation is for improving the river for navigation. Such statements are deceptive and misrepresentative.

Two other purposes for the legislation are set forth in the bill. One is to improve irrigation and reclamation. By many it is claimed that no greater number of acres will be irrigated should the plans of the bill be carried out. If that be true, the expenditure of millions of money merely to build a canal within the borders of the United States, making the water from the same river available in United States instead of in Mexico to irrigate the same lands, would be money wasted. On the other hand, should it be desired to put under irrigation and cultivation additional lands, at a time when the farmers' markets are destroyed by overproduction; at a time when the Federal Government has been endeavoring to discover a legislative method for securing the farmers a living market for their produce, then and in that event the legislation is ill advised and unwarranted, because surely everyone would say that the Government should not tax its people to produce more farm produce when the farmers are already suffering from overproduction. There would be no common sense, no business economy in such a movement.

Another declared purpose of this legislation is flood control. It is estimated that the maximum appraised value of all the agricultural lands susceptible to injury from floods in the Imperial Valley is only $36,000,000. Like everybody else who have purchased lands and moved upon them, the people who own and live upon the lands in the Imperial Valley are certainly not deserving of any more attention than other people throughout the United States who live upon lands threatened with flood damage.

Does the Government of the United States owe to the people of the Imperial Valley any greater obligation to protect them against floods than it does to people similarly situated in other parts of the country? We certainly think not. What are the facts concerning the flood peril to the inhabitants of the Imperial Valley? It is said there has been one overflow or flood inundation within the past 21 years, this one flood occurring in 1916, 12 years ago. While a few lives were lost, all were lost through their own individual carelessness.

Within the past four years the damage in money to the people in my district in the State of Kansas has been fully as much if not more than the total value of the lands and property along the Colorado River in the Imperial Valley. Damages perhaps equally extensive have been done by floods in many different places throughout the United States within very recent years, and yet the Congress is not undertaking to prevent the recurrence of such damages to the respective localities in the different parts of the United States. While it has recently enacted legislation to protect the flooded area along the lower Mississippi River, a really and in truth navigable stream, over which the Federal Government has exclusive jurisdiction, yet in no case has the Federal Government undertaken to protect the lands and property in such a small area in any other part of the country. So that it can be truthfully said that the Government is not proposing to enact the so-called Boulder Dam bill merely to protect the property and lands in the Imperial Valley against floods. The Government surely would not be so unfair as to deny many other imperiled sections and people equal protection with those living in the Imperial Valley. So that we may truthfully say the purposes of this bill are not to improve navigation, are not for reclamation or irrigation purposes, and are not primarily for flood protection, but, on the other hand, the Government has been especially superinduced by very objectionable lobbying to enact national legislation for special and local interests.

Specifically, the purposes are to provide a guaranty to southern California cities that they shall have an unlimited amount of water for municipal purposes and also to supply them incidentally with what would be termed "cheap power," although this is probably merely imaginary, because it is extremely doubtful that cheaper power can be furnished without great loss to the Government.

It is a pertinent question, Mr. Chairman, to the American people, to ask how much this great venture will cost the people. We may say from all expert opinions which have been advanced that the completion of the structure, together with power plants, will cost between one hundred and twenty-five and two hundred and fifty millions of dollars.

The plan provides that guaranties in the way of bonds or contracts shall be put up by and from the five or six States guaranteeing to the Government the purchase of water or power in sufficient quantities and at sufficient prices to insure the return to the Government of the cost price of the enterprise plus 4 per cent interest thereon within 50 years. In many parts of the country money is worth 8 per cent interest. Yet, the people throughout the country indirectly loan these hundreds of millions of money to the Government that it virtually gives to four or five States for their special benefit. Can it be shown to the people who really pay these taxes how it will benefit them? It will be a great detriment to them. It is a great detriment to the Government. The fact that there is a great dam site possibly available to the Government and the further fact that the Government is able to build the dam though the Government does not need it are certainly not good reasons for the passage of the bill.

I do not believe, Mr. Chairman, that any sufficient and enforceable contracts can be made by either or all of the States or the municipalities within the States especially interested to assure the repayment of the money involved with 4 per cent interest. If this proposition were submitted to the respective taxpayers throughout the United States for their approval, with the understanding that they would begin respectively paying their proportionate share of this $200,000,000 with the first payment by the Government on the project, realizing that the money to be advanced by them would be returned at the end of 50 years, with 4 per cent interest thereon, not 5 per cent of the people of the United States would indorse the project, and yet, how lightly we as Members of Congress look upon this mammoth venture.

It seems to me that we should think of where these hundreds of millions of dollars are to come from; of just what class of people are to furnish all of this money to the Government. Mr. Chairman, it comes from the farmers, every one of them; it comes from the miners, the mill workers, the railroad laborers, the organized and unorganized labor; it comes from every citizen who purchases food, clothing, or anything else required by him or her in their everyday life. These are the people who through labor, sacrifices, and denials contribute to these hundreds of millions which the Congress in unbridled prodigality gives away to private and semiprivate purposes and uses, to

sections of the country and to people in certain localities, to whom the Government is under no obligation whatsoever. The Government is under no obligation to furnish a particular city with a supply of water. Such a thing has never been done so far as we know. And so we are taking the people's money by the millions and giving it to prosperous, growing cities, and communities.

One objection to the Government getting into the water-power business is that labor in coal mines, in producing coal to be used in producing electric power in cities, will be displaced and the labor in the coal mines will be out of employment by the use of water power. The miner, therefore, who would have a share of these millions of taxes to pay would be robbed by the Government of employment and business in which to get the money to pay his share of the tax burden.

If this bill is not unconstitutional it surely ought to be. While the Government is thinking of making a nice present in the form of hundreds of millions of dollars to people the Government is under no obligation to, should not we think of the resulting hardships that we are imposing upon the people who have it to pay?

Is there anything just, is there anything equitable, is there anything fair done by this bill to those who have this money to pay? No; on the other hand, it is miscarried justice and equity.

One of the Representatives from the city of Los Angeles, in support of this bill, says that Los Angeles is prepared to raise a hundred million of dollars to promote its interest for more water. If that be true, why not allow the State of California, or Nevada, or Wyoming, or Utah, or Colorado, or New Mexico, or Arizona, or collectively or any other way they choose to raise the necessary money to build and operate this dam, instead of involving the Federal Government in the enterprise? If this tremendous dam, more than 650 high, should by earthquake or imperfect construction give way turning the great body of water loose, who would be responsible for all the terrible damages produced from such a calamity? Why, the Federal Government, of course. Then, instead of our having protected somebody against floods we would have brought the floods upon them. The Federal Government would be liable, in all probability, especially if through any negligence and carelessness the dam should break and the damages follow.

Oh, Mr. Chairman, there is nothing in this bill but demerit, injustice, unfairness, unconstitutionality, a violation of our national policy of keeping the Government out of business, great damage to industry and the people of the country. But, ultimately, when the taxpayers' money has been wasted, they will never get even the interest back, much less the principal; and when the time comes that the people rebel against the Government being in business this dam will be given away or sold for a song. It is the most ill-advised venture upon which the Government has ever ventured. It will either lead us into a communistic government or else we will give it away and sustain its entire loss. And the latter would be preferable to the former.

Mr. SMITH. Mr. Chairman, I yield the remainder of my time to the gentleman from Colorado [Mr. TAYLOR].

Mr. TAYLOR of Colorado. Mr. Chairman, with only the few minutes alloted to me to close the debate on this bill that has held the attention of the House for the past two days, it is utterly impossible to sum up all of the hundreds of questions that have been raised, and I must decline to be interrupted or to answer any questions.

I will mention hastily only a few matters, and will speak primarily from the standpoint of the four upper-basin States of Colorado, New Mexico, Utah, and Wyoming, and try to show the House why this legislation is so far-reaching and vitally necessary for their welfare.

The Colorado River is often called the Nile of America. It is the only great river in the world entirely within an arid region. For this reason it is intrinsically the most valuable stream in all the world. The very life, the prosperity, and future development of all those seven great Southwestern States depend upon who controls the system and manner of use of the waters of that river. The main stream and its tributaries contain the only water there is in all that great drainage basin of 250,000 square miles. There would not be one inhabitant to-day in all that great region if it were not for the waters of that river. Just a few years ago it was a wild and barren waste, occupied by only a few thousand Indians and myriads of wild animals. And while it is now only partially developed, yet between the source of that great river in the Rocky Mountain National Park in my congressional district and the Gulf of California, 1,700 miles below, there are living to-day several million of the most virile, energetic, loyal, and highest class of American citizens under our flag.

By untold hardships, privations, perseverance, and toil they have during the past half century reclaimed that arid wilderness and created property values of many hundreds of millions of dollars. Moreover, they have builded there as high a type of civilization as there is anywhere on this planet. The noblest instinct of the human race is the longing to establish a home and rear a family. Why did all those people and their parents leave their eastern homes and friends and go out into that most uninviting region to obtain a home?

Listen, my colleagues, and I will tell you. It was because Uncle Sam invited them to do so, and as an inducement he faithfully promised all those pioneers a sufficient amount of that public domain to make a home upon, and also a sufficient amount of the waters of that great river and all its tributaries to properly irrigate that land and also for domestic and all other useful purposes. That 250,000 square miles of unoccupied Government land in the Colorado River drainage basin and all of the waters of that great river and all of its tributaries were unconditionally offered as a premium and irrevocably dedicated to the use and benefit of those pioneer settlers and their descendants forever for the purpose of reclaiming and populating that region. The Government reserved some tracts of lands but made no reservation of any of that water.

Congress has enacted a great many public land laws to protect settlers in their rights to their land claims. And when each one of these States was admitted into the Union its constitution and the enabling acts of Congress admitting every one of them expressly authorized, confirmed, and dedicated forever the waters of all the streams in each State to the people for their use and benefit for irrigation, domestic use, and any and all other useful purposes. The right to both the land and the water became a birthright to the people of each of those States. In fact, this right of a public-land settler in an arid region to take and own water to irrigate his land and also water to drink and water his stock has been the established and recognized law of the West for nearly a hundred years.

That universal law is now written in hundreds of statutes and thousands of decisions. By that law of the arid West each one is entitled to only the quantity of water that he actually takes out of the stream, and beneficially uses; that is, applies to some beneficial purpose. When he does divert and make that use of the water, that quantity of water is his sole property, just as much as the land is his when he gets a patent to it from the Federal Government.

Then, in the orderly use of that water as between the various owners, what is called the "Doctrine of Priority" applies. That is, "First in time, is first in right." A court determines every man's right on every stream, both as to his priority—that is, the date that his appropriations should have—and also the quantity of water in cubic feet per second of time to which he is entitled.

Those priorities are all numbered chronologically on all the streams and tributaries. It is all thoroughly systematized. An entire stream is treated as one entity, and every man has a prior, senior, and superior right to his amount of water ahead of every other man on the same stream whose date is subsequent to his. And, on the other hand, every man's water right is junior and subservient to every right ahead of him, and State officials see that everyone gets his share and no more.

Now, there are very few streams containing enough water to supply all the claimants. The ordinary natural flow of nearly all those streams is now appropriated. But the high water, the flood water, is not appropriated. Consequently, the doctrine of priority of rights becomes tremendously important. Neither county lines nor State lines cut any figure. It is the stream itself that counts.

The Colorado River is one stream, one entire entity from the source of its longest tributary—the Green River up in the Wind River Mountains in Wyoming—to the Gulf of California, 1,750 miles, is one stream. That principle has been so decided by the United States Supreme Court in the case of Wyoming against Colorado.

An appropriation of water in one State is superior to a subsequent appropriation on the same stream in another State.

Colorado and Kansas and Wyoming litigated that question in the United States Supreme Court for over 20 years, and spent millions of dollars. That litigation was ruinously expensive and not at all satisfactory to either State. So to avoid a repetition of that experience and, in fact, to prevent interminable litigation, strife, loss, and expense between each and all of these seven States in the Colorado River Basin, litigating each other about eight years ago, we all mutually agreed to appoint representatives of each State and get together and see if we could not amicably come to a mutual agreement as to a division, apportionment, and system of use of all the waters of that river among those seven States.

On August 19, 1921, Congress passed an act expressly consenting to those seven States entering into that kind of a seven-State compact. Each State appointed its commissioner, and Secretary Herbert Hoover was appointed by the President as the ex officio head of the commission. They worked very diligently, and after a great many meetings, on November 24, 1922, at Santa Fe, N. Mex., all the commissioners reached a mutual understanding and all signed an elaborate interstate agreement approved by Mr. Hoover. That has ever since been known as the "seven States compact." Roughly speaking, the commission assumed from the measurements that the average minimum flow of the entire stream, including all its tributaries, was about 16,000,000 acre-feet of water. An acre-foot of water is enough water to cover an acre of land 1 foot deep. That is the way engineers estimate the quantity of the flow of a stream. The commission could not agree upon a division of all that water up among each one of those seven States. But inasmuch as the four upper States of Colorado, New Mexico, Utah, and Wyoming are above the long Grand Canyon of the Colorado River and the three lower States of Arizona, California, and Nevada are below the Grand Canyon, that was a natural topographical division between that upper basin and the lower basin. So the compact specifically awards 7,500,000 acre-feet of the water of that river to the four upper States jointly and collectively to be thereafter divided among them in such manner as they may be able to agree upon.

And awards 8,500,000 acre-feet of water to the three lower basin States jointly.

That lump-amount division was absolutely fair and right to each of those two basins. All the States agree to that. No one does or can deny that. The legislatures of all the States except Arizona promptly agreed to and ratified that compact. Arizona never has, and declares she never will ratify that compact until she reaches an agreement with California as to what share she is going to get out of that 8,500,000 acre-feet that is allotted to the lower basin. The four upper States have been patiently waiting all these years. But those two States have never been able to come to an agrement, and the whole compact has been held up now for nearly six years on that account.

In the meantime, Arizona has been rapidly appropriating water and acquiring priority rights—in fact, all of the flow of the Gila River, a large tributary of the Colorado River—and making vast reclamation developments while all important development in the other six States is practically at a standstill by reason of Arizona holding out.

There is no possible way of estimating the irreparable damage those upper States have been caused by this delay. But that is not the worst of it. Some enterprising American citizens claiming the protection of our Government and laws and also the Mexican Government and laws several years ago purchased for a trifling sum a million or more acres of land in old Mexico, just adjoining our border, and they compelled the Imperial Valley, Calif., people to give them free half of all the water they take out of the Colorado River in the United States and run through their own canal, because that canal runs around down into and about 60 miles through old Mexico on its route from the river to the Imperial Valley in California.

With that free water those Americans have been very industriously bringing in about 30,000 acres of new land every year, and irrigating it with Colorado River water that we all need and own in those seven States, and they are very rapidly acquiring priority right to it. During the time this compact has been so held up, California has been prevented from building a canal all in our country to get away from that demand made by those ingenious Americans under the guise of the Mexican Government. And those American citizens operating that land in old Mexico have already brought under cultivation about 200,000 acres of that land, and if Arizona can hold off this compact a little longer, they will have the whole million acres under irrigation with our water for nothing, and it will prevent our own development in our States just that much.

If Arizona—and now Utah has joined her—can prevent the passage of this bill and any adjustment of this matter for a few years longer, there will be no water left in that river for us to divide. Mexico will have it all. I do not charge anybody with being paid for it. But this delay by this quarrel between those States is worth many millions of dollars a year to Mexico and those so-called American citizens and their associates in this gigantic scheme of looting our country for the benefit of Mexico and themselves. And sometime when we come to making a treaty with Mexico over the use of that river, as we will have to do before long, we will be compelled to let that water run down to her.

But these years and years of bickering between California and Arizona has a very much more serious hazard and menace to the upper four States than even the Mexican situation. Those lower States, especially California, have developed and are now developing very much more rapidly than the four upper States are. The cities of southern California are growing at the rate of 150,000 population a year, and they have about reached the limit when they have absolutely got to have this Colorado River water to drink and for irrigation, power, and all kinds of uses.

There are now pending before the Federal Power Commission over 30 applications for permits and licenses to put in high dams and large power plants and vast irrigation projects on that river, all of them to be located in that lower basin. Some are for Los Angeles and other cities, but most of them are by large power companies or associations. If even one-fifth of those permits are ever granted before we get settled in some way this apportionment of that river made between the upper and the lower basins they will make and acquire appropriations of water authorized by Federal permits that will take every drop of both all the natural flow and all the flood waters of the entire stream and all its tributaries. If that happens, nobody in any of those upper four States will ever in the future be permitted to take out another ditch, or put in a reservoir, or power plant, unless and until they go down to California or Arizona, or to their offices in Los Angeles or New York City, and obtain permission from those power companies to do so, and pay a royalty for the privilege and for the amount of water they each use. Our rights of future development will be irrevocably gone forever. That is the frightful calamity that we in the upper basin States are threatened with right now. That would be such an appalling and outrageous hardship upon Colorado, New Mexico, Utah, and Wyoming, that I know no honest man on the floor of this House wants to inflict that infamy upon us. That is what I have been fighting against for 20 years. That is why we must have this bill passed.

Our upper States are newer and farther from markets, and we are not ready to develop yet. We have some four or five million acres of arid land that we can irrigate sometime, if our water is not taken away from us in the meantime. Two-thirds of all the water, of all the gigantic floods, that are poured into the Gulf of California by that river come from 20 counties on the western slope of Colorado in my district. In the entire United States there are only 60 mountain peaks of over 14,000 feet elevation, and 42 of them are in my congressional district. That water comes from those peaks and falls nearly 10,000 feet in Colorado. That is power enough to almost run the entire western half of this country.

I have lived right on the banks of the main stream of that great river for over 40 years, and being the only Member of Congress that ever has lived beside it, I feel not only a very great personal interest in and affection for it but also a very great responsibility and a solemn duty to do my utmost to prevent, if humanly possible, this and all succeeding generations in Colorado from being deliberately robbed of their birthright in that stream. In the years to come our beautiful capital city of Denver and many other cities and towns will need that water, and I do not want them to be compelled to pay some power company for it.

While, as most of you know, the act of Congress of March 4, 1927, of which I was the author, prohibits the Federal Power Commission from granting any permits on that stream or any of its tributaries before March 5, 1929, and we are by that act protected until that time, nevertheless, that date will soon be here, and I am most desperately anxious to have something definitely done by the States, or by the United States Supreme Court, or by Congress before that time, to preserve our future water rights in those four upper States.

We have not the present market or the means of making use of our rightful share of that water now. We can not now make actual legal appropriations of it. We must for several years yet let practically all that water we are not now using run down to our neighbors below. We will be glad to have them use it in the United States in the meantime. But we want our just share of it reserved to us, so that when in future years we gradually bring in more land and build cities and put in power plants of our own we will not be prevented from doing so by an injunction from some Federal court down in California. The water will always run down to the lower States anyway. But we want to be protected in our right to use it first. Our just proportion of the unappropriated flood waters of that stream is worth many billions of dollars to the future welfare of each of those four upper States.

Now, there are only three possible ways of our being protected. The natural and best way would be by all those seven States ratifying that compact, as they should, and having it approved by Congress. That is the safest, most honest, inexpensive, and fairest way to adjust and settle it forever. But Arizona blocked that for five years, and Utah has joined her

during the past year, so there is no present hope of a seven-State compact. There are too many adverse interests.

The next best way of determining, guaranteeing, and protecting the respective rights in that stream of all of the seven States would be to bring a suit in the United States Supreme Court for that purpose. There is no question but what under the Constitution and decisions that court has jurisdiction and would take jurisdiction of such a suit. I have always been in favor of that course, instead of being held up and brazenly robbed all these years. But, of course, there would be some expense and it would require some time, and thus far no State seems willing to start it, so that remedy is unavailable now.

The only other way is by this bill specifically enacting the provisions of that seven-State compact into a Federal law, and requiring at least six of those States, including California, to ratify it and let the seventh State of Arizona or Utah take her chances on going it alone, if she refuses to come in. This is the only practical way we have of adjusting this 7-year-old controversy and allowing development to proceed throughout those seven States. That is the main object and purpose of this bill so far as the upper States are affected by it, and I am confident the terms of the bill are fair and amply protect the rights of all of those seven States.

The four upper States should be and three of them are willing to take their joint allotment of that 7,500,000 acre-feet and divide it among themselves afterwards. And the three lower basin States should be willing to do the same. But Arizona has never been willing to do so. In a word, what the upper States want by this legislation is to protect our water rights for future development, and also to prevent the present gigantic waste of flood waters that might be used, and also prevent Mexico from getting all of it. We are not otherwise directly concerned in this long and bitter strife between Arizona and California.

Arizona Senators and Representative now loudly proclaim that Congress has no constitutional authority to pass this bill, and that its enactment would be unconstitutional, and they defiantly threaten to bring an injunction suit in the United States Supreme Court to restrain the Secretary of the Interior from executing this law. To me that bluff has always seemed perfectly absurd and utterly ridiculous. I do not see how anybody can be fooled or scared by that.

There are, in my judgment at least, four good reasons why such a suit would not be entertained by that court for a minute:

First. The Colorado River is a great international stream, with express international treaty and other mutual national obligations pertaining to it between our country and Mexico. Will any sane lawyer say that Congress has no authority to enact legislation pertaining to the control of that great river?

Second. It is a navigable stream. It is navigable both in fact and in law. Moreover, it is expressly recognized by and declared to be a navigable stream by the treaty of Guadalupe-Hidalgo between the United States and Mexico. Will any intelligent person say that Congress can not legislate upon matters affecting the use of a navigable stream when we have been doing so every day for a hundred years? No State, or city, or corporation or anybody can even build a bridge across any navigable stream anywhere in the United States without an act of Congress expressly permitting it;

Third. Will any Federal court hold that Congress has no authority to enact legislation for flood control when we have been doing so for a great many years, and just this week authorized an appropriation of some $400,000,000 for that purpose; and

Fourth. It is a great interstate stream, and a boundary stream between States, and running for 1,750 miles through and over the public domain of the United States. All that public land is still under the control and jurisdiction of the Federal Government. If any State thinks Congress is going to abdicate its jurisdiction over the lower part of that river, let it go ahead and start something.

In other words, the four upper States have three great objects in the enactment of this legislation:

First. To protect and secure their exclusive and conceded right to the 7,500,000 acre-feet of water by the enactment of the seven-State compact into a national and six interstate laws.

Second. To conserve the water from waste and to stabilize the flow.

Third. To prevent as soon as possible Mexico from acquiring any further adverse rights to the water.

The lower-basin States have some six great objects in the enactment of this law:

First. To protect the Imperial Valley 250 feet below sea level from destruction by floods.

Second. To stabilize the flow of the stream and to supply domestic water for Los Angeles and many other southern California cities and conserve the water and prevent the present enormous waste.

Third. To irrigate a large amount of new land.

Fourth. To build the all-American canal and get away from furnishing Mexico 50 per cent of all the water they divert from the stream.

Fifth. To generate enough power to pay for the entire project within from 30 to 50 years.

Sixth. To as soon as possible stop Mexico from acquiring further rights that will be superior to ours. Arizona and Utah are just as much interested and will be just as much benefited by all those objects as the other five States are.

The gentleman from Arizona [Mr. DOUGLAS] made a speech of two and a half hours attacking the feasibility of the Boulder Canyon Dam. That is purely a matter of engineering that we are amply providing for and guarding against. It is enough for us to know that the Government, through the Geological Survey and the Reclamation Service and others, has spent $2,000,000 and 10 years' time in that very investigation, and more than 40 of the most eminent and best engineers in this country have pronounced it a perfectly feasible and safe and practical engineering proposition, and I am sorry the gentleman from Arizona does not agree with them.

He says there might be earthquakes in that vicinity. Of course, there might also be earthquakes here in Washington. But I am told there are old stone and adobe buildings down there that have stood for nearly a hundred years without a crack in them. All the criticisms made by the gentleman were made hundreds of times against the construction of the Panama Canal, and that seems to have turned out to be a wonderfully successful piece of engineering.

This million-dollar power lobby here in Washington boldly says this bill shall not pass. The question naturally arises as to who is running this Government. The hearings now being conducted by the Federal Trade Commission show that the power interests not only have a large number of very high-priced agents operating here in Washington, but that some of them are ex-Senators, ex-governors, and other prominent ex-officials, and that vast sums have been and are being expended upon thousands of newspapers throughout the country, and upon business men's organizations, and schools everywhere, and women's clubs, and apparently anybody that will take the money, and that there are millions of dollars being expended by the combinations of power companies all over the country to influence public sentiment and to prevent the passage of this Boulder Canyon bill.

They have three great objects in view before this Congress at this time, namely: The first is to either grab Muscle Shoals themselves or kill the bill providing for its operation. The second is to kill this bill and prevent the Government from building the Boulder Canyon Dam, and thereafter seize that river themselves by the aid of the Federal Power Commission. The third is to prevent any dams being constructed on the Mississippi River or any of its tributaries in connection with flood-relief legislation. They are determined to prevent the Government from building any dams or generating any power anywhere.

Their hue and cry against the Government going into business is a hypocritical and false pretense. Congress has no intention of putting the Government into the retail power business at all. Congress has no desire of any such course. Some of us are trying to prevent these enormous natural resources from being stolen by false pretenses for the purpose of exploiting the people thereafter. There is only one question involved in this bill, namely: Will you vote to preserve that river for benefit of this and all succeeding generations of the people of those seven States, or will you make the Power Trust a present of it? This Colorado River is too large and valuable a property to ever be turned over to any private concern.

The rights of those seven States are too vast and vital to ever intrust to any private corporation. The right of those States and of all the concerns taking water therefrom are too enormous and far-reaching to ever be turned over to the tender mercies of any power trust. There is only two sides to this question. Our votes will be either in the interest of the people of those States, or for the benefit of the power trust. There is no other issue.

This dam should be built by the Federal Government to protect the Imperial Valley from utter destruction, and conserve the gigantic floods of that river so the States may all obtain their just right thereto. Uncle Sam should for many years to come stand at the switchboard and see that all those seven States and all the cities adjacent to the river and industrial plants are permitted to obtain their just share of that power as they need it. The States and cities and corporations and all

persons should buy that power from Uncle Sam wholesale at the switchboard, and pay such price as is necessary to amortize its entire cost and reimburse the Government for the construction, and thereafter the project should be turned over to those seven States for their mutual use and benefit, and let it be conducted by the States substantially the same as the water users associations are to-day successfully conducting the reclamation projects and power plants thereon for the use and benefit of the surrounding public.

That is not putting the Government into business. It is honestly protecting the rights of the people to their use of this water which they now own. While the people own it now, yet there must be some supreme supervisory system of control to protect the weak against the strong and allow future development of the newer States and poorer and less developed communities. That is the humane, the fair, and honest purpose of this bill, which the power interests are striving so desperately to defeat. They do not want any seven or six State compact, because they want their plants in the lower basin to appropriate and include our 7,500,000 acre-feet up the stream.

A few of us from those Southwestern States have been earnestly and hopefully and persistently working on this matter for years, trying to protect and conserve for all the future generations of those seven States this, their greatest birthright. I do not propose to let the Power Trust hold all those seven States by the throat and compel them to pay an extortionate price for the use of our own water.

We are being fought by the most gigantic and unscrupulous and corrupt lobby that has ever been organized in the history of our country. But Abraham Lincoln once said he "had an abiding faith that the American people will ultimately wobble around right," and I can not believe that there are enough gullible officials or dishonest people in the country to prevent the passage of this bill. If there are any defects in this bill, they can be cured in the Senate, or in conference, or by amendment. It is the greatest constructive measure for the welfare of those States that has ever come before the American Congress in the history of our Government, and I can not believe that future generations will be compelled to look back to this generation and say that we sold them out and were traitors to their welfare.

I know no lobby can buy or bluff or fool this House. This bill will pass this body by nearly a hundred majority, and I know that sooner or later it will become a law, and that the untold millions of people in all those States will forever thank us for our courage and our honesty. [Applause.]

The CHAIRMAN. The time of the gentleman from Colorado has expired. All time has expired, and the Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That for the purpose of controlling the floods, improving navigation, and regulating the flow of the lower Colorado River, providing for storage and delivery of the waters thereof for reclamation of public lands and other beneficial uses within the United States, and for the generation of electrical energy as a means of making the project herein authorized a self-supporting and financially solvent undertaking, the Secretary of the Interior, subject to the terms of the Colorado River compact hereinafter mentioned, is hereby authorized to construct, operate, and maintain a dam and incidental works in the main stream of the Colorado River at Black Canyon or Boulder Canyon adequate to create a storage reservoir of a capacity of not less than 20,000,000 acre-feet of water and a main canal and appurtenant structures located entirely within the United States connecting the Laguna Dam with the Imperial and Coachella Valleys in California: *Provided,* That all contracts for the delivery of water for irrigation purposes provided for in section 5 shall provide that all irrigable land held in private ownership by any one owner in excess of 160 acres shall be appraised in a manner to be prescribed by the Secretary of the Interior and the sale prices thereof fixed by the said Secretary on the basis of its actual bona fide value at the date of appraisal without reference to the proposed construction of the irrigation works provided for by this act; and that no such excess lands so held shall receive water from said canal if the owners thereof shall refuse to execute valid recordable contracts for the sale of such lands under terms and conditions satisfactory to the Secretary of the Interior and at prices not to exceed those fixed by the Secretary of the Interior; also to construct and equip, operate, and maintain at or near said dam, and within a State which has approved the Colorado River compact hereinafter mentioned, a complete plant and incidental structures suitable for the fullest economic development of electrical energy from the water discharged from said reservoir; and to acquire by proceedings in eminent domain, or otherwise, all lands, rights of way, and other property necessary for said purposes.

Mr. JOHNSON of Washington. Mr. Chairman, I offer an amendment.

The CHAIRMAN. There is a committee amendment. The committee amendment will be considered first. The Clerk will report the committee amendment.

The Clerk read as follows:

Page 1, line 3, after the word "floods," insert "improving navigation."

The CHAIRMAN. The question is on agreeing to the committee amendment.

Mr. WHITE of Colorado. Mr. Chairman, I move to strike out the last word.

Mr. JOHNSON of Washington. Mr. Chairman, I think I rose first.

The CHAIRMAN. Does the gentleman from Colorado want to discuss the committee amendment?

Mr. WHITE of Colorado. No; I do not care to.

Mr. DOUGLAS of Arizona. Mr. Chairman, I want to discuss the committee amendment.

The CHAIRMAN. The gentleman from Arizona is recognized for five minutes.

Mr. DOUGLAS of Arizona. Mr. Chairman and members of the committee, it is interesting to note that during the five or six years, as is claimed by the members of the committee, that this bill has been before the Committee on Irrigation and Reclamation mention has never been made of navigation. It is interesting to note that in all the reports upon which this bill is predicated it has never been stated that one of the purposes of this project was to improve navigation.

I think the members of the committee should know what the Director of the Reclamation Service, under whose auspices this project will be constructed, if it is constructed, says with reference to navigation. Here is a report by Dr. Elwood Mead, Director of Reclamation:

The present Commissioner of the Bureau of Reclamation, Elwood Mead, and W. W. Schlecht and C. E. Grunsky, constituting the All-American Canal Board, report on pages 13 and 14 of their report on the all-American canal of 1920 to the effect that there are great difficulties on the Colorado in connection with navigation; that the construction of the Laguna Dam in 1904 has interposed a barrier to navigation 12 miles above Yuma; that the construction of that dam "is an indication that the United States regards the navigability of the Colorado River as of no importance."

Here is the second statement:

The utilization of the river's waters for irrigation far outweighs any possible utilization thereof for navigation.

Maj. R. R. Raymond, of the Corps of Engineers of the United States Army, reported in House Document No. 1141 of the Sixty-third Congress, second session, as to the navigability of the Colorado.

The report of the Commissioner of Reclamation on the all-American canal contains the following with reference to Major Raymond's report:

He visited the river, however, and says:

"Below Yuma the river flows through a delta country, which is constantly being built up by the large quantity of silt carried by the river. The channel is unstable and can not be made stable at reasonable cost. At present the principal channel in Mexico passes through Volcano Lake. In addition to the fact that this part of the river lies in a foreign country, it should be noted that there is so little water available in the river below the heading of the Imperial Canal during low stages that navigation throughout the year is impracticable. The amount of water extracted from the river for irrigation will increase rather than decrease."

After referring to the fact that the growth of commerce along the river would imply an increase of the demand for irrigation water, Major Raymond concludes that—

"The improvement of the Colorado River for navigation would defeat its own ends and would be a detriment to the adjacent country, except possibly that flood control would be beneficial."

He finds the situation such that he does not even recommend a survey of the river, and says:

"Attention is invited to the conclusion reached by officers who have examined this river heretofore, which agree with my own. The development of the country by irrigation in recent years makes the improvement even less desirable to-day than it was formerly."

Surely the above should be conclusive as to the navigability of the Colorado River.

There is a long series of reports upon the navigability of the Colorado River and upon the justification of spending money to improve navigation.

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. Just as soon as I finish this statement, this sentence: None of these reports has ever recom-

mended that the Congress appropriate one cent of money to improve the navigation on the Colorado River. Mr. Arthur P. Davis, one of the consulting engineers of the Los Angeles Bureau of Power and Light, stated on January 26 that the Colorado River was not navigable, and Mr. Arthur P. Davis is one of the proponents of this bill, being employed by the great agency that wants the bill.

Mr. W. B. Mathews, the counsel of the city of Los Angeles, on page 858 of the hearings on Senate Resolution 320, testified very emphatically that the Colorado River is not navigable, and he quotes many legal decisions with reference to what a navigable stream is, and he concludes:

To be navigable in fact a watercourse must have a useful capacity as a public highway of transportation. The Colorado River does not meet this test. It may have done so in part in very early days, but for more than a third of a century it has been practically devoid of profitable utility as a commercial highway. This is certainly true of the river in and above Black Canyon.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. DOUGLAS of Arizona. Mr. Chairman, I ask for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. SWING. I do so very reluctantly, but I must object. A gentleman has informed me that he has 17 amendments.

Mr. DOUGLAS of Arizona. I assure the gentleman I have but six basic ones.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. DOUGLAS of Arizona. I assure the gentleman from California that I have no intention whatsoever of offering any dilatory amendments.

Mr. Mathews says:

It may be said to be a matter of common knowledge that the Colorado River, particularly in and above Black Canyon, is devoid of practical usefulness to the public as a highway in its natural state. In fact, measured by the standard of commercial and profitable utility, the entire stream above Yuma has long since ceased to be a navigable watercourse.

I refer the members of this committee to the photographs which the Members have doubtless received of the Colorado River below the international boundary line, dry, without a drop of water in it.

Mr. CRAIL. Mr. Chairman, will the gentleman yield?

Mr. DOUGLAS of Arizona. I certainly will, for a question.

Mr. CRAIL. Will the gentleman from Arizona say if the water is dammed there will not be a constant stream of water in that river?

Mr. DOUGLAS of Arizona. I will be delighted to answer that question. Irrigation and navigation are absolutely incompatible. One defeats the other. You can not leave water in a stream and still take the water out of the stream.

Mr. WINTER. Mr. Chairman, will the gentleman yield there?

Mr. DOUGLAS of Arizona. Yes.

Mr. WINTER. Does not the gentleman absolutely ignore the theory that practically 60 or 70 per cent of the water used for irrigation will be returned to the bed of the stream?

Mr. DOUGLAS of Arizona. The gentleman does not, because it is claimed that the great body of this water is to be used in the Imperial Valley, and the drainage from it is into Salton Sea and not into the Colorado River.

Mr. WINTER. Sixty per cent of this water would come down the river.

Mr. DOUGLAS of Arizona. No. I do not concede that 60 or 70 per cent will constitute the return flow.

Let me go on further, if I may. In the terms of the bill itself in the first section, there is the phrase, "Improving navigation." In the Colorado River pact, which is made an integral part of this bill by section 12, there is this statement:

Inasmuch as the Colorado River has ceased to be navigable for commerce, the use of the water for navigation shall be subservient to all other purposes.

Now, members of the committee, I submit that a bill can not be passed for the purpose of improving navigation and still contain a provision in it which destroys that purpose.

Mr. MONTAGUE. Will the gentleman yield?

Mr. DOUGLAS of Arizona. I yield to the gentleman.

Mr. MONTAGUE. Did the original bill introduced by Mr. SWING contemplate the improvement of navigation?

Mr. DOUGLAS of Arizona. There has never been a provision in the bill for the purpose of improving navigation until three weeks after the hearings on the bill closed in January of 1928.

Mr. MONTAGUE. That is carried in the amendment now in the bill.

Mr. DOUGLAS of Arizona. Yes.

Mr. MONTAGUE. It did not contemplate navigation at first, then?

Mr. DOUGLAS of Arizona. It did not.

Mr. MONTAGUE. But contemplated it later by an amendment?

Mr. DOUGLAS of Arizona. Yes. Members of the committee, there is but one conclusion the members of the committee can draw and that is that the phrase improving navigation is introduced solely for the purpose of creating a fictitious constitutional authority.

The CHAIRMAN. The time of the gentleman from Arizona has again expired.

Mr. SWING. Mr. Chairman, I rise in favor of the amendment. The gentleman from Arizona is inaccurate in saying that no previous bill carried a provision for the improvement of navigation. The first bill I introduced carried a provision for the improvement of navigation.

Mr. DOUGLAS of Arizona. I beg the gentleman's pardon. Will the gentleman state when?

Mr. SWING. The first bill I introduced when I came to Congress in 1921 carried a provision for the improvement of navigation.

Mr. DOUGLAS of Arizona. But there has not been one since.

Mr. SWING. And practically every witness that appeared before the committee discussed the navigability of this river. It is not against the navigability of a river that it can not be completely navigated from one end to the other and it is not against the power of Congress to provide aid in securing navigation on a river that at the moment the river is not navigable. If rivers were navigable by nature, then there would be little or no occasion to aid in the improvement of them. It is because there are obstructions in a river that Congress is called upon year after year to vote money to aid in making rivers navigable.

In this case the history is that valuable commerce went up and down this river in the early days from the Gulf of California to Coveville for many, many years, and every man in the House who has had occasion to visit the dam site at Boulder and Black Canyons has himself navigated the stream for some 20 miles upon motor boats that are to-day making commercial trips up and down that river, and if this dam is built it will provide navigable waters for 100 miles above the dam, and if the stream is equated in the way the gentleman from Arizona has said it is to be equated by at least a 10,000 second-foot flow below it will be navigable between Boulder Dam and the Laguna Dam, near Yuma, a distance of over 200 miles.

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. SWING. Yes.

Mr. COOPER of Wisconsin. On this question of navigation I want to ask this: As I understand it, the treaty of Guadaloupe-Hidalgo specifically mentions this as an international boundary stream and declares it to be navigable. That is true, is it not?

Mr. SWING. I think that is so.

Mr. COOPER of Wisconsin. That being so, could the Congress of the United States properly legislate concerning a great navigable stream, declared to be navigable by treaty, without mentioning navigation?

Mr. SWING. I think there is great merit in the point the gentleman makes.

I want to add this one sentence and then I am through. The gentleman from Arizona has announced that there are no amendments which can be made to this bill which will make it acceptable to him. He has stated, furthermore, that as soon as this bill becomes a law his State intends to file a suit in the Supreme Court for the purpose of trying to have it declared unconstitutional. Now, the reason why he wants this reference to the improvement of navigation stricken out of the bill is that when the United States Government is called into court by the State of Arizona it will thereby be deprived of a proper and logical defense to the action brought by that State.

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. SWING. Yes.

Mr. DOUGLAS of Arizona. The gentleman's statement is absolutely correct, and I am opposed to this amendment because it is a dishonest one.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for one additional minute.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. OLIVER of Alabama. Reference has been made by the gentleman from Arizona to the fact that there is a clause in the compact declaring that navigation shall be subservient to other purposes. When you declare that navigation is subservient you thereby declare that there is navigation.

Mr. SWING. Certainly.

Mr. OLIVER of Alabama. And Congress is exercising its right by saying that if there should be some parties at some places on the river who are seeking to exercise the right of navigation to the detriment of flood control or irrigation that it suspends that superior right?

Mr. SWING. Exactly. The language of the compact is that—

* * * the use of its waters for the purpose of navigation shall be subservient to uses of such waters for domestic, agriculture, and power purposes.

The CHAIRMAN. The time of the gentleman from California has again expired. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. JOHNSON of Washington. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Washington offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Washington: Page 2, line 12, after the colon, insert the following: "*Provided*, That the laws of any State in which any part of the construction work herein authorized is performed, in respect of the employment of laborers and mechanics on State, county, or municipal works, shall apply to the employment of laborers and mechanics upon any part of the construction work herein authorized."

Mr. JOHNSON of Washington. Mr. Chairman, after giving this bill as much consideration as time would permit I have decided I want to support the bill, but I desire to see it perfected in some details. The amendment which I have offered is to make the bill, if this project is considered Federal, conform with the constitutions of California and Arizona with regard to the employment of labor.

The amendment reads:

Provided, That the laws of any State in which any part of the construction work herein authorized is performed in respect of the employment of laborers and mechanics on State, county, or municipal works, shall apply to the employment of laborers and mechanics upon any part of the construction work herein authorized.

This is in the State constitutions of some States. State laws of California, Arizona, and 25 other States have laws against employment of alien labor on State works. Such a provision should be in this bill; otherwise, my friends, we might have the spectacle of the United States of America building in the great Southwest with Mexican peon labor a structure as great as the greatest pyramid. That must not be. [Applause.] I hope the amendment will be adopted.

Mr. NEWTON. Will the gentleman yield there?

Mr. JOHNSON of Washington. Yes.

Mr. NEWTON. As I understand it, this amendment places all public improvements by the States or the Federal Government on the same basis in respect of giving preference to American labor.

Mr. JOHNSON of Washington. Yes; exactly so. It is right and proper, and in my opinion it will save a world of trouble when the time comes to make contracts for construction.

Under leave to extend my remarks, I add the constitutional provisions of California and Arizona, and the laws of Nevada, California, and Arizona in regard to employment of alien labor on State works.

NEVADA

Revised Laws, 1919. Employment of labor on public works, aliens; section 1 (as amended 1921, ch. 129); who may be employed: Only citizens or wards of the United States or persons who have been honorably discharged from the military service of the United States shall be employed by any officer of the State of Nevada, or by any contractor with the State of Nevada, or by any political subdivision of the State, or by any person acting under or for such offices or contractor, in the construction of public works, or in any office or department of the State of Nevada, or political subdivision of the State, or department of the State of Nevada, or political subdivision of the State, and in all cases where persons are so employed, preference shall be given to honorably discharged soldiers, sailors, and marines of the United States and to citizens of Nevada: *Provided*, Nothing in this act shall be construed to prevent the working of prisoners by the State of Nevada, or by any political subdivision of the State, on street or road work or other public work; nor to prevent the working of aliens who have not forfeited their right to citizenship by claiming exemption from military service, as common laborers in the construction of public roads, when it can be shown that citizens or wards of the United States or persons who have been honorably discharged from the military service of the United States are not available for such employment; nor to prevent the exchange of instructors between the University of Nevada and similar institutions of the North and South American countries: *And provided further*, That any alien so employed shall be replaced by any citizen, ward, or ex-service man of the United States applying for employment. (All contracts void if above not complied with. Penalty for violation, $100 to $500 and/or imprisonment for not more than six months, or both.)

ARIZONA

Constitution, article 18, section 10. Employment of aliens on public works: No person not a citizen or ward of the United States, or who has declared his intention to become a citizen, shall be employed upon, or in connection with, any State, county, or municipal works or employment: *Provided*, That nothing herein shall be construed to prevent the working of prisoners by the State, or by any municipality thereof, on street or road work, or other public work. The legislature shall enact laws for the enforcement, and shall provide for the punishment of any violation of this section.

Revised Statutes, 1913, paragraph 3105; aliens not to be employed: No person not a citizen or ward of the United States, or who has not declared his intention to become a citizen shall be employed upon, or in connection with any State, county, or municipal works, or employment: *Provided*, That nothing herein shall be construed to prevent the working of prisoners by the State, or by any county or municipality thereof, on street, or road work, or other public work. (Violations—fine not less than $100 nor more than $300 for each offense.)

V. CALIFORNIA

Constitution, article 19—Chinese labor—employment—immigration.—Section 3. Employment on public works.—No Chinese shall be employed on any State, county, municipal, or other public works, except in punishment for crime. Section 4 (legislature to discourage coolie immigration "by all means within its power," etc.).

Revised Statutes: Chapter 417—employment of aliens in public service. Section 1 (as amended 1921, ch. 366). Restrictions.—No person except a native-born or naturalized citizen of the United States shall be employed in any department of State, county, city and county, or city government in this State: *Provided, however*, That the prohibitions of this act shall not apply (a) to the employment as a member of the faculty or teaching force in public schools of this State nor in schools supported in whole or in part by the State of any person who has declared his intention to become a citizen of the United States, nor of any native-born woman of the United States who has married a foreigner; (b) to any member of the faculty or teaching force of any college or university supported in whole or in part by the State; (c) to any specialist or expert temporarily employed by any department of the State or any county, city and county, or city, and engaged in special investigation; (d) in an emergency when it is necessary to protect life, health, or property against fire, flood, or other calamity arising from natural causes.

Sec. 3 (payment of wages, etc., not to be paid out of State, county, or municipal treasury unless and except such persons native born or naturalized, with above exceptions).

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington [Mr. JOHNSON].

The amendment was agreed to.

Mr. DOUGLAS of Arizona. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DOUGLAS of Arizona: Strike out everything after the enacting clause and insert in lieu thereof the following:

"That the President of the United States is hereby authorized to appoint a board of five engineers of unquestionable national reputation, which shall examine into and investigate the Colorado River for the purpose of making recommendations to the President as to the most feasible method and cost of obtaining flood control, as to the best systematic general program of development: *Provided, however*, That not more than one engineer appointed to such board shall have been in the past or shall be now in the employ of or retained by the Bureau of Reclamation, or shall be resident of any of the States of the Colorado River Basin.

"SEC. 2. That the Secretary of War is hereby authorized to construct on the Colorado River flood-control structures, recommended by and located at a site or sites to be selected by the above-mentioned board of engineers.

"SEC. 3. That for the purposes of erecting such flood-control structures on the Colorado River"——

Mr. LAGUARDIA. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LAGUARDIA. Has not the amendment been read at sufficient length to make a point of order against it?

The CHAIRMAN. The Chair does not think so. The Clerk will continue reading the amendment. It is not obviously subject to a point of order in the opinion of the Chair.

Mr. SMITH. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 5773, had come to no resolution thereon.

FURTHER MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had resolved that the bill (S. 2972) entitled "An act for the protection of fish in the District of Columbia, and for other purposes," be returned herewith to the House of Representatives in compliance with its request.

The message also announced that the President of the United States having returned to the Senate, in which it originated, the bill (S. 777) entitled "An act making eligible for retirement, under certain conditions, officers, and former officers of the Army, Navy, and Marine Corps of the United States, other than officers of the Regular Army, Navy, or Marine Corps, who incurred physical disability in line of duty while in the service of the United States during the World War," with his objections thereto, the Senate proceeded, in pursuance of the Constitution, to reconsider the same; and

Resolved, That the bill do pass, two-thirds of the Senate agreeing to pass the same.

The message further announced that the President of the United States having returned to the Senate, in which it originated, the bill (S. 3674) entitled "An act to amend the act entitled 'An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,' approved July 11, 1916, as amended and supplemented, and for other purposes," with his objections thereto, the Senate proceeded, in pursuance of the Constitution, to reconsider the same; and

Resolved, That the bill do pass, two-thirds of the Senate agreeing to pass the same.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 1794. An act establishing additional land offices in the States of Montana, Oregon, South Dakota, Idaho, New Mexico, Colorado, and Nevada.

DISABLED EMERGENCY OFFICERS

The SPEAKER. The Chair lays before the House a resolution of the Senate accompanying a veto message from the President, which the Clerk will report.

The Clerk read as follows:

IN THE SENATE OF THE UNITED STATES,
May 3 (calendar day of May 24), 1928.

The President of the United States having returned to the Senate in which it originated the bill (S. 777) entitled "An act making eligible for retirement under certain conditions officers and former officers of the Army, Navy, and Marine Corps of the United States other than officers of the Regular Army, Navy, or Marine Corps, who incurred physical disability in line of duty while in the service of the United States during the World War," with his objections thereto, the Senate proceeded in pursuance of the Constitution to reconsider the same and resolved that the bill do pass, two-thirds of the Senate agreeing to pass the same.

The Clerk read the message of the President.

(For President's message see proceedings of the Senate.)

The SPEAKER. The objections of the President will be entered at large upon the Journal and the bill and the message printed as a public document. The question is, Shall the House on reconsideration, agree to pass the bill, the objections of the President to the contrary notwithstanding?

Mr. JOHNSON of South Dakota. Mr. Speaker, this measure was so thoroughly debated for two days on the floor of this House that little could be said that has not been said. It is very clear to me, however, from this debate and from the President's message that this measure manifestly has provisions that are inequitable. It is clear to me that an unknown but substantial number of men who are to-day drawing no disability compensation, but have heretofore secured a permanent rating of 30 per cent under some previous administration of the Veterans' Bureau, will immediately be brought under its provisions.

I have always felt that a fair and just bill could be drawn and submitted such a measure as a substitute, and until that sort of measure is presented to the House I have the profound conviction that this measure should not become the law and that the President's veto should be sustained.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is, Will the House on reconsideration agree to pass the bill, the objections of the President to the contrary notwithstanding?

The question was taken; and there were—yeas 245, nays 101, answered "present" 2, not voting 82, as follows:

[Roll No. 86]

Eaton	Kendall	Sabath	Yon
England	Kerr	Sears, Fla.	Zihlman
Fisher	Kunz	Spearing	
Fitzgerald, W. T.	Kurtz	Strong, Kans.	

So (two-thirds having voted in favor thereof) the bill was passed, the objections of the President to the contrary notwithstanding.

The following pairs were announced:

On this vote:

Mr. Golder and Mr. Connally of Texas (for) with Mr. Garrett of Tennessee (against).

Mr. McSwain and Mr. Deal (for) with Mr. Bankhead (against).

General pairs:

Mr. Ackerman with Mr. Jeffers.
Mr. Begg with Mr. Connery.
Mr. Reid of Illinois with Mr. Oldfield.
Mr. Butler with Mr. Hudspeth.
Mr. Eaton with Mr. Corning.
Mr. Free with Mr. Bulwinkle.
Mr. Manlove with Mr. Sears of Florida.
Mr. Wurzbach with Mr. Wingo.
Mr. Temple with Mr. Woodrum.
Mr. Ramseyer with Mr. Bell.
Mr. Purnell with Mr. Carley.
Mr. Bachmann with Mr. Drane.
Mr. Clancy with Mr. Hare.
Mr. Beedy with Mr. Kerr.
Mr. Zihlman with Mr. Underwood.
Mr. W. T. Fitzgerald with Mr. Sullivan.
Mr. Gifford with Mr. Blanton.
Mr. Michaelson with Mr. Cox.
Mr. Robsion of Kentucky with Mr. Spearing.
Mr. Peavey with Mr. Yon.
Mr. Reece with Mr. Hammer.
Mr. Britten with Mr. Griffin.
Mr. Boise with Mr. Whitehead.
Mr. Strother with Mr. Fisher.
Mr. Connolly of Pennsylvania with Mrs. Norton of New Jersey.
Mr. Anthony with Mr. Busby.
Mr. Williamson with Mr. Tillman.
Mr. Clark with Mr. Kunz.
Mr. Hughes with Mr. Dickstein.
Mr. Kurtz with Mr. Lyon.
Mr. Hale with Mr. Sabath.
Mr. Magrady with Mr. Bloom.
Mr. Nelson of Wisconsin with Mr. Wilson of Mississippi.
Mr. Kendall with Mr. Harrison.
Mr. Bowman with Mr. Johnson of Oklahoma.
Mr. Beck of Wisconsin with Mr. Bowling.
Mr. White of Kansas with Mr. Berger.

Mr. McSWAIN. Mr. Speaker, I find that I am paired with the gentleman from Alabama, and I withdraw my vote of "aye."

Mr. O'CONNELL. Mr. Speaker, the lady from New Jersey, Mrs. NORTON, is absent on account of illness. If present, she would have voted "aye."

Mr. CULLEN. Mr. Speaker, my colleague, Mr. CARLEY, of New York, is necessarily absent. If here, he would vote "aye."

Mr. DOUGLASS of Massachusetts. Mr. Speaker, my colleague, Mr. CONNERY, is absent on account of illness in his family. If present, he would vote "aye."

Mr. BERGER. Mr. Speaker, I was not present, but I want to vote "no."

The SPEAKER. The gentleman does not qualify.

Mr. JOHNSON of Texas. Mr. Speaker, my colleague, Mr. HUDSPETH, is absent on account of illness. If present, he would vote "aye."

Mr. SCHNEIDER. Mr. Speaker, my colleague, Mr. PEAVEY, is absent on account of illness. If present, he would have voted "aye."

Mr. BRITTEN. Mr. Speaker, I was not present during the roll call, but if here I would have voted "aye."

The result of the vote was announced as above recorded.

ADJOURNMENT SINE DIE

Mr. TILSON. Mr. Speaker, I offer the following resolution and ask its immediate consideration.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House Concurrent Resolution 41

[70th Cong., 1st sess.]

CONGRESS OF THE UNITED STATES,
IN THE HOUSE OF REPRESENTATIVES.

Resolved, That the President of the Senate and the Speaker of the House of Representatives be authorized to close the first session of the Seventieth Congress by adjourning their respective Houses on the 29th day of May, 1928, at 5 o'clock p. m.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken; and on a division (demanded by several Members) there were 306 ayes and 57 noes.

Mr. SCHAFER and others demanded the yeas and nays.

The SPEAKER. The yeas and nays are demanded. All those in favor of taking the question by the yeas and nays will rise. [After counting.] Twenty-seven Members have risen, not a sufficient number, and the yeas and nays are refused.

So the resolution was agreed to.

Mr. COOPER of Wisconsin. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. COOPER of Wisconsin. The hour for final adjournment having been adopted, there will be no rules governing this body for the remainder of the session—the rules are suspended from now on?

The SPEAKER. After the resolution is agreed to by the Senate the Speaker can recognize Members to suspend the rules.

BOULDER DAM

Mr. SMITH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 5773) for the construction of works on the Colorado River Basin, and so forth.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union, with Mr. LEHLBACH in the chair.

The CHAIRMAN. The Clerk will complete the reading of the amendment offered by the gentleman from Arizona.

The Clerk read as follows:

SEC. 3. That for the purposes of erecting such flood-control structures on the Colorado River and of defraying salaries and expenses of said board of engineers as fixed by the President, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $15,300,000, or as much thereof as may be necessary.

SEC. 4. That construction of said structures, if they be dams, shall not be commenced until the Colorado River compact, signed at Santa Fe, N. Mex., November 24, 1922, shall have been ratified by the States or Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming, and shall have been approved by the Congress of the United States; or until all of said States and the Congress shall have agreed by compact that no title to waters in excess of present perfected rights which may be stored by such flood-control dam shall be acquired.

SEC. 5. The Colorado River compact signed at Santa Fe, N. Mex., November 24, 1922, pursuant to act of Congress approved August 19, 1921, entitled "An act to permit a compact or agreement between the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming respecting the disposition and apportionment of the waters of the Colorado River, and for other purposes," is hereby approved by the Congress, such approval to become effective when said compact shall have been approved and ratified by the respective legislatures of the said seven States.

SEC. 6. That the Republic of Mexico is hereby placed on notice that waters stored by any dam which may be constructed under this act are for use solely within the United States.

Mr. LAGUARDIA. Mr. Chairman, I make the point of order that the amendment is not germane.

Mr. SWING. Mr. Speaker, I want to add to arguments to the point of order, that it substitutes a complete new plan for the bill now pending before the House. The amendment provides that the Secretary of War shall take certain action with reference to this river problem while the bill provides for the Secretary of the Interior having control.

The amendment takes the location away from the Boulder Dam site fixed in the bill and leaves the location to be hereafter determined at some other place. It changes the type and character of structures to be built different from the provisions of the bill, which are for a dam power plant and canal. Under the amendment only flood-control works can be built which might be a dam or levees. In other words, the bill contains authorizations for the construction of definitely described works, while this amendment provides for the substitution of a plan which is unknown and which is to be hereafter ascertained, and therefore it must be some other kind of structures or else the change would not have been proposed and there would be no point to offering the amendment.

In addition to that the bill pending before the House according to its title is to provide for the construction of works for the protection and development of the lower Colorado River

Basin while the amendment that is offered provides for the appointment of a commission to investigate and report.

Under decisions that have been rendered in the consideration of a tariff bill, it has been held that on a bill levying specific tariff duties it is not in order to offer an amendment to authorize the appointment of a commission to investigate and report what the rates ought to be. In addition to that, this amendment contains another new and unrelated provision involving international relations with Mexico, a matter which is foreign to the bill now pending before the committee.

Mr. LAGUARDIA. And, Mr. Chairman, may I add to the statement made by the gentleman from California [Mr. SWING], that the purpose of the amendment is to hold all operations in abeyance pending the ratification of a certain compact.

Mr. DOUGLAS of Arizona. Mr. Chairman, it is my understanding—and I think it has been stated very clearly by the distinguished minority leader, the gentleman from Tennessee [Mr. GARRETT]—that an amendment is germane when the fundamental purpose of the amendment is consistent with the fundamental purpose of the bill which it proposes to amend. The bill to which my amendment is offered provides for flood control. It does not designate the site, as the gentleman from California [Mr. SWING] has stated, and I refer the Chair to page 2 of the bill, where it is provided that a dam shall be constructed at Black Canyon or Boulder Canyon, or over a length of approximately 30 miles, on the Colorado River. The bill authorizes the Secretary of the Interior to construct certain works. The bill provides for the ratification of the Colorado River compact by the Congress, which ratification is to become effective when six of the seven States party to the compact shall have approved it. The bill provides for an additional investigation, and I refer the Chair to section 14. It has been contended, with reference to the international question by the gentleman from California [Mr. SWING], that the bill implicitly provides that all of the stored waters must be used in the United States. If that be true, then the gentleman from California can not object to a more explicit statement of limitations to be placed upon Mexico. Those, Mr. Chairman, are the fundamental purposes of H. R. 5773.

What are the fundamental purposes of my proposed amendment? It provides for an investigation which is provided for in section 14 of the bill. It provides that as a result of that investigation there shall be determined a site or sites at which flood-control structures are to be erected on the Colorado River.

The only difference with reference to the specific location of sites at which structures are to be erected as between my proposed amendment and the bill which it seeks to amend is a difference of degree. The amendment which I have offered does not provide a specific site, nor does it limit the length of the river upon which it may be located to 30 miles. The bill which my amendment seeks to amend is greatly more specific as to where the structures are to be erected, but it does not designate the site at which the structures are to be erected, for the reason that it is stated in section 1 on page 2 that the dam shall be built at Black Canyon or Boulder Canyon. The distance between the two points is over 30 miles, so that the only difference between the amendment which I have offered and the bill which is to be amended with reference to the definite designation of the site is one of degree. The amendment authorizes the Secretary of War to construct flood-control structures. It does not provide that the Secretary shall construct a dam. The bill which is sought to be amended is different in that respect, in that it does specifically authorize construction of a dam and does not leave to the discretion of the Secretary of the Interior the construction of levees in lieu of the dam. The amendment provides for the appropriation of a certain sum of money to defray the expenses of constructing the flood-control structures and to defray the expenses of the Board of Engineers. The bill before the House provides for an appropriation for a flood-control structure, and it likewise provides for an appropriation for an investigation. The amendment provides for a ratification of the Colorado River compact. The bill which is before the House likewise provides for the ratification of the Colorado River compact.

There is one difference, however, which I must state in this connection, and that is that my amendment provides, in the event that the Colorado compact is not approved by the legislatures of seven States, for the ratification of another compact which shall provide that all the States shall waive title to any waters in excess of the present perfected title which may be stored by any dam which may be constructed. That is a difference between the amendment and the bill, but I submit to the Chair that it is not a difference of such magnitude as to make the amendment inconsistent with the fundamental purpose of the bill before the committee. The amendment contains a legislative notification to Mexico that any waters which may be stored by a dam constructed under the terms of the amendment shall be for exclusive, beneficial use within the United States. I submit that although there is not a specific provision similar to that in the bill which is to be amended, that provision in the amendment does not constitute a sufficiently great difference to rule the amendment not germane upon the ground that it is inconsistent with the fundamental purposes of the bill which it seeks to amend.

I submit that the amendment contains, with the exception of two minor things, nothing more than is contained in the bill which is to be amended, and, therefore, I submit to the Chair that the fundamental purpose of the amendment is consistent with the fundamental purpose of the bill which it would amend.

The CHAIRMAN. The Chair is prepared to rule. The amendment offered by the gentleman from Arizona [Mr. DOUGLAS] is in the nature of a substitute for the bill under consideration.

Now, the rule is that where an amendment by way of a substitute bill is offered, if the substitute effects the same general purposes that the bill under consideration seeks to effect and in the same general manner as the purposes are sought to be effected by the bill under consideration, it is germane, even if it be not germane section by section to the specific sections of the original bill.

However, an examination of the bill under consideration discloses that it provides not only for the control of floods, but it provides also for the distribution of the water so stored, both for domestic uses and for irrigation. It provides for the creation and distribution of electrical energy, while the amendment under consideration deals simply and solely with the control of floods. Consequently and obviously it is not germane to the bill under consideration, and the point of order is sustained.

Mr. SWING. Mr. Chairman, I offer a perfecting amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from California.

The Clerk read as follows:

Amendment offered by Mr. SWING: At the end of section 1 insert "*Provided further*, That the Secretary of the Interior is hereby authorized and directed to appoint a board of five eminent engineers and geologists, at least one of whom shall be an Engineer officer of the Army on the active or retired list, to examine the proposed site of the dam and review the plans and estimates made therefor before beginning construction, and to advise him from time to time as he may require as to matters affecting the safety, feasibility, and adequacy of the proposed structure and incidental works, the compensation of said board to be fixed by him for each, respectively, but not to exceed $50 per day and necessary traveling expenses, including per diem of not to exceed $6 in lieu of subsistence, for each member of the board so employed for the time employed and actually engaged upon such work."

Mr. DOUGLAS of Arizona. Mr. Chairman, I offer a substitute amendment.

Mr. SWING. Mr. Chairman, I ask for recognition. I am willing to let the gentleman from Arizona submit his amendment to the House. I ask unanimous consent that the gentleman's amendment be read for information, not out of my time.

The CHAIRMAN. Without objection, the Clerk will report the amendment offered by the gentleman from Arizona.

The Clerk read as follows:

Substitute amendment offered by Mr. DOUGLAS of Arizona to the amendment offered by Mr. SWING: Page 2, line 6, after the words "Colorado River," strike out "Black Canyon or Boulder Canyon" and insert in lieu thereof the following: "At a site or sites selected by the board of five independent engineers of unquestionable national reputation which the President of the United States is hereby authorized to appoint and which shall examine into and investigate the Colorado River for the purpose of making recommendations to the President as to the most feasible and most economic method of obtaining the objects desired."

Mr. SWING. Mr. Chairman, in my opinion there has been ample and sufficient engineering to authorize Congress to proceed upon this project, but in view of the fact that there has been some criticism by the opposition, and in view of the fact that this will be a structure in excess of any structure that has heretofore been built, and inasmuch as it involves the safety of human life and property, I am as anxious as any man on this floor can be to see that the structure is made safe and sound for the people who live below it and for the property it is designed to protect, and, secondly, to protect the United States' investment in the dam.

Mr. LEATHERWOOD. Mr. Chairman, will the gentleman yield?

Mr. SWING. Not now. I have here nine volumes of engineering reports. Here are five volumes of typewritten hearings in which the matter has been gone into fully. Practically all

the engineers agree that either the Boulder or Black Canyon site is the place for the first dam to be built. The two sites are virtually the same because they would hold the water in the same reservoir.

Mr. DOUGLAS of Arizona. Mr. Chairman, will the gentleman yield there for a statement of fact?

Mr. SWING. I am referring to the statements of engineers before the Reclamation Committee made during the exhaustive hearings in 1924.

Mr. DOUGLAS of Arizona. I refer the gentleman to those statements.

Mr. SWING. This provision included in the amendment I have offered is simply an added precaution and safety. It is action that would be taken anyway by the Secretary of the Interior without the amendment. This amendment has been submitted to the Secretary of the Interior and has received his approval, and I ask its acceptance.

Mr. DOUGLAS of Arizona and Mr. LEATHERWOOD rose.

The CHAIRMAN. Does the gentleman from Utah yield to the gentleman from Arizona?

Mr. LEATHERWOOD. I yield to the gentleman from Arizona, but I want to be recognized afterwards.

Mr. DOUGLAS of Arizona. Mr. Chairman, I agree with the gentleman from California [Mr. SWING] that a real engineering investigation is an essential, prior to the injection of the Federal Government into the construction of a project the magnitude of which is scarcely appreciated by anyone.

I take issue with the gentleman from California, however, with reference to the method by which that investigation should be obtained. I point out to Members of this House that the Secretary of the Interior last year appointed four special advisers, three of whom had already committed themselves to the project before they were appointed as impartial advisers. One of them had been the governor of a State which for years had been advocating the passage of the act. Another, Mr. W. F. Durand, for 19 years had been in the employ of the Los Angeles Bureau of Power and Light. He also had committed himself definitely in favor of the project. The third was Governor Emerson, who represented a State which was in favor at that time of favorable action on this legislation.

I submit that if there is to be an honest and an adequate engineering investigation made of the proposed project it should be made not by engineers to be appointed by the Secretary of the Interior but, on the other hand, by engineers to be appointed by the President of the United States. I have confidence that the President of the United States will appoint engineers of sufficient independence of mind and of sufficient freedom from political influence to submit to him and to the Congress the truth about the project, but in view of past performances I can not say I have the same amount of confidence in the Secretary of the Interior.

Mr. LAGUARDIA. Does the gentleman believe that good consulting engineers are available at $50 a day?

Mr. DOUGLAS of Arizona. If the gentleman will read my amendment and section 14 of the bill, he will find that there are adequate funds appropriated in the bill for the investigation.

Mr. LAGUARDIA. I was referring to the other amendment.

Mr. DOUGLAS of Arizona. I also take issue with the gentleman from California when he says that the project has been adequately engineered, and I refer him to page 69, Volume V, of the Weymouth report, on which the bill is predicated, in which Mr. Weymouth himself says "The designs are of a preliminary nature and that should the dam be built a great many additional studies would be required."

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. DOUGLAS of Arizona. Mr. Chairman, I ask unanimous consent to proceed for one additional minute.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. DOUGLAS of Arizona. I also call the gentleman's attention to the statement made by Mr. Weymouth on page 33, I believe it is—if it is not I will point it out to the gentleman—of the ninth volume of the Weymouth report, in which, in effect, Mr. Weymouth says that the cost estimate of the 26,000,000 acre-foot dam is predicated upon a curve and not upon actual detailed estimates.

I submit, Mr. Chairman, that if there is to be an adequate engineering investigation it must be made by engineers appointed by the President and not by the Secretary of the Interior.

Mr. CRAMTON. Mr. Chairman, I offer a perfecting amendment to the Swing amendment.

The CHAIRMAN. The Chair will recognize the gentleman from Utah [Mr. LEATHERWOOD] for the purpose of discussing the pending amendment.

Mr. LEATHERWOOD. Mr. Chairman, for more than two years I have listened to the proponents of this measure declare in committee that the engineering features of this bill are perfect; that nothing remained to be done, and that the last word had been said so far as the engineering connected with this bill was concerned. I have been astonished to hear two of the prominent proponents of the bill admit here on the floor of the House in debate that they knew so little of the bill that they did not dare yield for a question from the opponents of the bill. I am now astonished to hear for the first time that the engineering connected with this bill is so imperfect and so crude that it is necessary to attach a legislative amendment, incurring great and additional cost, for the Secretary of the Interior now to go out and find out whether he has a real and good place to build the dam or not. It is said that confessions are good for the soul, and I am glad to hear the proponents of this bill gradually confess that they do not know anything about it.

Mr. CRAMTON. Mr. Chairman, I offer a perfecting amendment for the Swing amendment. At the end of the Swing amendment I move to amend by inserting the language I have sent to the Clerk's desk.

The CHAIRMAN. The gentleman from Michigan offers an amendment to the amendment offered by the gentleman from California, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON to the amendment offered by Mr. SWING: At the end of the amendment strike out the period, insert a semicolon, and add the following proviso: "*Provided*, That the work of construction shall not be commenced until plans therefor are approved by said special board of engineers."

Mr. CRAMTON. Mr. Chairman, I have a great deal of confidence in the engineers who have favorably reported upon the feasibility of the construction of the dam in question. I do not understand that any such conclusion is to be drawn from the amendment offered by the gentleman from California as is suggested by the gentleman from Utah, but it is true, as the gentleman from California has suggested, that much study must be given in the actual working out of definite and final plans. Therefore the gentleman from California has offered his amendment, but my reading of the amendment leaves me in doubt as to what would be the function of that special board of engineers, and inasmuch as the engineering phase of this question is of so much importance I believe it desirable that the bill state definitely just what is the function of that board.

The Swing amendment provides that the board shall study and review; but in the event the board should disapprove the plans for the construction of the dam then what would be the authority of the Secretary of the Interior as to proceeding with construction? I think it should be made clear. It is not unusual to have a board of consulting engineers and such boards have been formed with respect to many other projects. I remember we did that in connection with the San Carlos project. After we had authorized the project and had commenced to spend money on the project we provided for a consulting board of engineers. I think it should be clear that if we have such a board, and after their study they say the plans are not desirable, then I think the Secretary should be stopped from proceeding thereunder. I understand my amendment is agreeable to the gentleman from California.

Mr. SWING. I have no objection to it.

Mr. COLTON. Will the gentleman from Michigan yield?

Mr. CRAMTON. I yield, certainly.

Mr. COLTON. If the amendment prevails and there is any danger such as the gentleman has indicated, could not the Secretary of the Interior and would he not likely appoint this board right from the Reclamation Service?

Mr. CRAMTON. My amendment does not affect the appointment of the board. My amendment only has to do with the effect of approval or disapproval by the board of the plans. I have no fear as to the make-up of the board. It is the custom of the Secretary of the Interior in appointing such boards to choose engineers entirely apart from the regular governmental service.

Mr. COLTON. But there is nothing in the amendment that provides for that.

Mr. CRAMTON. No; and, so far as I am concerned, having some familiarity with the practice of the department and some knowledge of the Government engineers connected with the Reclamation Service, I would not think it an entire disaster if they were included, but to include them defeats somewhat

the purpose of the amendment. The services of the engineers of the Reclamation Service are available already. This amendment is to supplement their service by a board of engineers outside of the Reclamation Service, to give them advice, and naturally the Secretary would not appoint them from the Reclamation Service.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. LEATHERWOOD. Mr. Chairman, I ask that the gentleman may have two minutes additional, because I want to ask a question.

The CHAIRMAN. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. LEATHERWOOD. Do I understand from the gentleman from Michigan that this amendment is desirable so far as the Secretary of the Interior is concerned?

Mr. CRAMTON. The gentleman will have to make his question a little clearer, so I can understand what he has in mind.

Mr. LEATHERWOOD. Is this legislation or is this amendment desirable so far as the Secretary of the Interior is concerned.

Mr. CRAMTON. The Swing amendment or my amendment?

Mr. LEATHERWOOD. Either or both.

Mr. CRAMTON. I have had no consultation with the Secretary of the Interior with reference to either one.

Mr. LEATHERWOOD. I am somewhat in the dark, because a bill exactly identical in language and character was presented to the Committee on Irrigation and Reclamation the other day, and the chairman kindly asked me to take the matter up with the Secretary of the Interior, and I asked him if the bill had anything to do with Boulder Dam or if he intended to have any additional engineering. Unfortunately, I do not have his reply here, but he stated that it had no connection with Boulder Dam.

Mr. CRAMTON. I am advised by the gentleman from California [Mr. SWING], and I think he has so stated on the floor, the Secretary of the Interior has approved the amendment presented by the gentleman from California. My amendment has not been submitted to the department.

I now yield to the gentleman from New York.

Mr. LAGUARDIA. I was just going to point out to the friends of this bill that under the gentleman's amendment the construction of this project can be held in abeyance indefinitely until plans that are approved are submitted.

Mr. CRAMTON. I think even the friends of the project want to be sure of the plans before they go ahead.

Mr. MOORE of Virginia. Mr. Chairman, I ask unanimous consent that we may have the Swing amendment, as proposed to be amended by the amendment of the gentleman from Michigan [Mr. CRAMTON] read for information.

The CHAIRMAN. Without objection, the Clerk will again report the Swing amendment and the Cramton amendment.

The Clerk again read the Swing amendment as proposed to be amended by the Cramton amendment.

Mr. DOUGLAS of Arizona. Mr. Chairman, I would like to state that I agree with the gentleman from Michigan——

The CHAIRMAN. For what purpose is the gentleman from Arizona occupying the floor?

Mr. DOUGLAS of Arizona. I would like to speak on the perfecting amendment to the amendment of the gentleman from California.

The CHAIRMAN. The gentleman is recognized for that purpose, but the Chair thought the gentleman had an amendment which he desired to offer.

Mr. O'CONNOR of New York. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. O'CONNOR of New York. I understand the situation to be that the gentleman from Arizona has a substitute amendment pending for the Swing amendment.

The CHAIRMAN. No; the gentleman has not an amendment pending. It was merely read for the information of the committee.

Mr. O'CONNOR of New York. I understood that it was offered as a substitute.

Mr. DOUGLAS of Arizona. It was offered as a substitute.

The CHAIRMAN. The amendment has not yet been offered. This is what the Chair was trying to indicate to the gentleman from Arizona.

Mr. DOUGLAS of Arizona. I beg the Chair's pardon. That being the case, I now offer as a substitute amendment the amendment which has been read.

The CHAIRMAN. The gentleman from Arizona offers the amendment which has previously been read for the information of the committee.

The Clerk reported the amendment of the gentleman from Arizona [Mr. DOUGLAS].

Mr. DOUGLAS of Arizona. Mr. Chairman, I think it should be made clear to Members of the House that the great bulk of the engineering evidence is not in favor of Boulder Dam. I think it should be made clear to the House that this committee of five of the most eminent engineers that can be found reported to the American Engineering Council, none of them in the employ of the power company, although some have been consulted by power companies, and made the very definite and specific recommendation as to what should be done with reference to the engineering features of the proposed project.

That board or committee stated that the evidence was not conclusive, either that the project was sound from an engineering point of view or an economic point of view, but said that before either the Federal Government or private capital would be justified in undertaking the terrific expenditure involved in the construction of this project a further and complete engineering investigation should be made of the Colorado River.

The gentlemen from Colorado and California have stated that the Southern California Edison Co. in 1924 testified before the committee that it would build Boulder Canyon Dam. I defy the gentleman from California to point out any such statement made by Mr. Ballard or Mr. Barre or any representative of the Southern California Edison Co. He will find that Mr. Ballard testified that his company would spend thirty or forty million dollars a year in the development of a project on the Colorado River, but that it would not be necessarily located at Boulder Dam, but, he said somewhere in the lower section. I think, although I am not certain of this, that he will find that Mr. Barre, representing the Southern California Edison Co., testified that it was to be located at Hualpai Rapids and not Boulder Canyon.

I submit that inasmuch as all Government engineers except those of the Bureau of Reclamation have disapproved the Boulder Canyon site, inasmuch, Mr. Chairman, as the money for the investigation by the Bureau of Reclamation was advanced by the city of Los Angeles and affiliated agencies with the specific provision that the moneys must be applied to the Boulder Canyon investigation and no other, and inasmuch as the Boulder Canyon or the Black Canyon are the only two dam sites that have ever been drilled by the Government—except four holes at Bulls Head—that it can not be unanswerably maintained that the bulk of the engineering evidence is in favor of Boulder Canyon.

Mr. LAGUARDIA. Mr. Chairman, I rise in opposition to the amendment, and I ask unanimous consent that I may proceed for 15 minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for 15 minutes. Is there objection?

There was no objection.

Mr. LAGUARDIA. Mr. Chairman, Boulder Dam has become a national problem. It no longer concerns the States directly benefited; it now concerns the whole Nation. Many of us here in the House distant from the Pacific coast are as much interested in this great project—have given it as much study and are as anxious for the passage of this bill—as the Members from southern California, Colorado, or Nevada. I want to point out to the sponsors of the bill, and I do so in all friendliness, that they should guard against weakening their position. By that I mean that all amendments should be resisted, amendments coming from opponents of the bill and enemies of Government operation.

Mr. Chairman, it is not our purpose to work out the engineering features of this project. That is not our job. It is our duty to pass an act providing for the construction of the dam, the construction of the canal, and the construction of the power plant. The type of construction, the engineering calculations, and the details of construction do not enter into the legislative end of this great undertaking. Yes, I have heard doubt expressed on the floor of the House by Members who are so bitter against Government operation and who seemingly believe that government exists and people live only for the purpose of enriching greedy public-utilities corporations. Yes, I have heard timid men express grave doubt whether this project is feasible from an engineering point of view. We have even heard it stated on the floor of the House that the dam could not be built, that it would not function, and even predicted that the wall would soon give way and a terrible catastrophe happen. Such timidity, such fears, such doubts, and such evil forebodings always accompany the initial steps of great undertakings. A mere moment of reflection in the past will recall the abuse and the criticism directed against DeLesseps when he suggested the building of the Suez Canal. It was impossible, the timid ones cried, before the building of the St. Gothard

Tunnel, which pierced the Alps. The Eiffel Tower, which blazed the way for the building of our own skyscrapers, was decried as a foolhardy, impossible task that would one day crumble down and kill thousands of people. Poor DeLesseps was again hounded when he undertook the building of the Panama Canal and was defeated in that undertaking not only by the crooks, but more than anything else by the pessimists. Why, gentlemen, go over yonder to that little room and take from the shelves the CONGRESSIONAL RECORD containing the discussions prior to the authorization for appropriations for the building of the Panama Canal by the United States and you will find the same kind of talk that we have heard against this very bill. It can not be done; its engineering all wrong; the locks will not hold.

The locks are not practical—the same kind of talk that has been urged against this very project. One gentleman complained that the bill does not provide for the necessary power and machinery, I think it was, for the construction of the dam. Well, what of it? It is not the legislative function to attach blue prints of steam shovels and temporary power plants for the construction of an undertaking. So that all this timidity, all this expression of fears, is to be expected in opposition to any great undertaking, to any new project. Men of vision, men of courage, men desirous of rendering useful service are not at all discouraged or disheartened by such opposition.

I am not so sure that the amendment just offered by the gentleman from Michigan is at all necessary if this bill will pass the other body during this session. If the bill should pass the other body, I do not hesitate to say that the amendment weakens rather than strengthens the bill. If the bill should not pass the other body during this session, provisions can easily be made to carry on and continue the studies of this great project during the recess period. The bill will surely pass either this or the short session, and the project will be built for the simple reason that no opposition, no vicious selfishness, no power can stop progress.

I want to say at the outset that what I have said as to the opposition and what I shall say particularly to the lobby and Power Trust interests is in no way personal or to be construed as a personal criticism of any of my colleagues who are opposed to this bill. The gentleman from Arizona [Mr. DOUGLAS] has made as able a presentation of his side of the case as could have been made. The justification of his opposition is, of course, a matter of personal judgment and his own conscience. I am sure every Member of the House admires the splendid presentation and the thorough study he must have given to this project. He has demonstrated without doubt his ability, and, in fact, his keenness, readiness, and ability reminds one of the younger Pitt and he has the added charm and personal attraction of a Disraeli. [Laughter and applause.]

The gentleman from Arizona dwelt at length on the engineering difficulties. That, I believe, is answered as I have just stated, by the fact that the dam will not be built by Congressmen and Senators, but by experienced, competent, and qualified engineers. As to the engineering side of the question there can be no doubt. Then the gentleman from Arizona joins with others, some of whom have acquired quite a reputation as constitutional lawyers, in contending that the bill is not constitutional. Anyone serving in this House will know that the cry of unconstitutionality is always raised in opposition to measures where logical, sound, or economic reasons are not available.

I do not hesitate to say that if the Constitution had been adopted yesterday, just as it was a hundred and forty years ago, and we were considering this bill to-day, the building of this dam, and of a power plant by the Government might be declared unconstitutional. If the Constitution had been adopted yesterday, the framers drafting that document and the people of the various States ratifying it, having knowledge of present-day conditions, the development of electricity, the need of power amounting to a necessary of life, the development of irrigation and the present advanced stage of hydroelectric plants, would of course by its silence on the subject exclude the Federal Government from building the dam and operating a power plant. But gentlemen, the Constitution was not drafted yesterday; neither was it ratified and adopted yesterday. When the Constitution was drafted and adopted, electricity had not yet been developed. Very little was known about it. It had not even advanced very far in the laboratory stage. Hydroelectric power was then not even dreamed. Flood control was not a menace for the reason that the population was so small and available land so plentiful that people could live distant from flood areas. There was only one means of communication, and that was by coach. And coaches traveled on roads. That was the only known means of communication, and the Constitution specifically gave to the Federal Government jurisdiction over and the power to build and maintain post roads. The Constitution gave to the Federal Government the power to regulate commerce between the States and the foreign countries. There is no doubt, there can be no doubt, that the then every known means of communication and the control and regulation of commerce was vested in the Federal Government. There was no question about it.

There was not even any debate about it. The commerce clause of the Constitution was adopted by the Constitutional Convention without debate and by unanimous vote. Now as to navigation, it can not be seriously contended that by reason of the very little, if any, commerce on the Colorado at the present time that the Federal Government can not embark on an undertaking to do anything it desires to promote navigation on that stream. It was never doubted, it was never questioned, and from the earliest days, both in practice and by decisions of the Supreme Court, the power to regulate commerce was construed to give to the Government control and jurisdiction over navigation and all navigable streams. It was held in the very early days and is the law to-day that the size of the stream, the depth of the water, the amount of commerce has nothing to do with the jurisdiction of the Federal Government.

Any stream, regardless of size and depth, on which a canoe can be floated comes within the provisions of the Constitution and the jurisdiction of the Federal Government can not at this late day be questioned—

> To regulate in the sense intended by the Constitution is to foster, protect, control, and restrain with appropriate regard for the welfare of those who are immediately concerned and of the public at large.

Surely no living legislator, no Member of a Congress which only a few days ago passed a flood relief bill of such proportion, far-reaching effect, and enormous cost, will question or can question the power of the Federal Government on such matters. Why, in the last rivers and harbor bill there were many items carrying large appropriations for insignificant ditches that never will have a steamboat on them. There can be no question as to the power of the Government to appropriate money and to dredge and work on these streams. Whether it is judicious or prudent to do so is not the test—the constitutional test. To go back to the flood, if it is constitutional and it is not questioned, to appropriate several hundred million dollars for the control of flood in the Mississippi Valley, surely it is constitutional to authorize the appropriation of $31,000,000 for the control of flood in the Imperial Valley. I challenge any of the constitutional authorities in the House to say that one is constitutional and the other is not. Will the gentlemen who claim that the flood-control feature in this bill is merely a pretext want to urge that the Mississippi flood-control appropriations are constitutional because a flood has already occurred in that region? What a silly position to take. Since when is a catastrophe a necessary condition precedent to a constitutional power of the Federal Government? We did not appropriate several hundred million dollars for the control of floods in the Mississippi Valley because of the last flood. The money was appropriated, the Federal Government has jurisdiction and the power to spend that money, and that was done and will be done to protect the people of that region against floods in the future. No one can tell when another flood will occur. It may never occur. So in the Imperial Valley, no one can tell when a flood will occur. It may never occur. But the remoteness of the time of the catastrophe has nothing to do with the constitutionality of a law providing protection against such catastrophe, regardless of the time of its expectancy. So, gentlemen, there is nothing to the argument that because there has not been a flood in a long time, or because the value of wealth produced in the flooded area is less than the cost of providing flood relief, the Federal Government should not interfere, or if it desires to interfere has not the power to do so.

Therefore no question can be raised or opposition urged in the face of what this Congress is doing and every Congress before it has done to the bill now under consideration in so far as providing for a project which will improve the navigability of the Colorado River and afford flood protection to the Imperial Valley. That leaves one question. I do not fear to face it. That leaves the one question of whether or not the Federal Government as an incidental to the project or undertaking of regulating navigation and a flood control may build a power plant. We now return to the conditions in the country and the stage of electricity at the time the Constitution was adopted. We can not and no court would dare to say that the Federal Government can not have, and should not have, jurisdiction and control over radio communication because the Constitution is silent on the question of radio. No one would urge that the

Federal Government can not establish regulations for the construction, factors of safety, and other details of a steamboat, because steamers were unknown at that time. Would anyone urge that because refrigerators and cold storages were unknown when the Constitution was adopted that the Federal Government can not regulate and supervise shipments of cold-storage meats and other food products? It does. Constitutional limitations must necessarily be construed in the light of changed conditions. It is left for each age to say what the laws for that age shall be. The question put bluntly and squarely resolves itself to this: Given a navigable stream, running through several States, receiving the waters from several tributaries originating in several States, and given the necessity of the Federal Government to regulate this stream for the purpose of navigation by providing a uniform flow of water throughout the year, and given the existence of the danger, no matter how remote, of flood in a region contiguous to this stream, and given the necessity of building a huge dam to carry out both of these purposes, has the Federal Government the power to utilize this same water for the purpose of turning a turbine to generate electricity? That is all there is to it. I do not fear the outcome of any test of constitutionality that may be applied. With changed times, with changed conditions, with the advancement of science and electrical engineering, the time will come, and not in the very distant future, when the right of the Federal Government to utilize any stream for hydroelectric purposes will not be questioned.

Mr. TUCKER. Then the gentleman seeks to get into court under the commerce clause and build a great hydroelectric plant?

Mr. LAGUARDIA. Exactly; and I make no bones about it. The gentleman knows I am always frank and never hesitate to come out with the truth.

Of course, this matter of constitutionality is elastic. The Constitution is not so rigid and inflexible that its provisions can not be adopted and applied to the conditions existing in the age in which we are living. Why, the flexibility of the Constitution was put to an extreme test a few days ago. This House passed a bill appropriating $5,000,000 to construct and maintain a road from here to Mount Vernon. The propriety, the necessity, the prudence of the Government building that particular road and maintaining it forever hereafter were questioned. But what interested me most of all is that some of the most scholarly constitutional authorities in this House were strong for that bill and are opposing this Boulder Dam project on the ground of its constitutionality. It is indeed interesting to note how these gentlemen justify and square their attitude toward the road and against this project. As against this they say that the question of navigation and flood control is a mere fiction and that under that pretext the Government has no right or power to construct and operate a power plant. But as to the Mount Vernon Road, one of these scholarly gentlemen said that the Government was justified in building and maintaining this road under the express grant in the Constitution to build and maintain post roads, although he admitted that there would never be an ounce of mail carried over this road. Another constitutional authority in the House, opposed to the Boulder Dam project, stated to me that the road could be justified as a military necessity, and admitted, too, that in all likelihood troops would never use it or a cannon lumber down its highway. While the third gentleman who has expressed doubt as to the validity of this bill said that he was certain of the propriety of the Government building and maintaining the Mount Vernon Road on the ground that the Government, being charged with maintaining an Army, was necessarily charged with burying its dead soldiers; that a Commander in Chief of the Army was buried at Mount Vernon, and that necessarily carried with it the power and authority to build a road to that grave. I submit, gentlemen, and I submit to my colleagues to whom I am referring that it is not necessary to bend or strain the Constitution to any such extent in order to make it applicable and justify every provision in the Boulder Dam bill.

Why, gentlemen, this bill before us is the most engaging piece of legislation that has been considered by the American Congress since the building of the Panama Canal. Just pause for a moment to contemplate what we are doing. It can not but appeal to the imagination of every man and woman of this House. Here we have a huge watershed forming into a tremendous stream passing through several States and of practically no use and serving no beneficial purpose. Nature in its hurry seemingly to do other things left her job unfinished.

Imagine this huge canyon to be dammed by a wall over 600 feet high, creating a gigantic natural reservoir site impounding 26,000,000 acre-feet of water. Millions and millions of horsepower now going to waste year after year will be harnessed and utilized to generate electricity which will be sent hundreds of miles and bring cheer, comfort, and move the wheels of industry. Just think of this stream overflowing and rushing on in one season of the year and a limping, useless creek at other times of the year being turned into a magnificent stream with a daily uniform flow of water throughout the year to be utilized as a great artery of commerce for that region of the country. The Imperial Valley, now threatened by flood, to be secured in its safety with a constant supply of water to irrigate its soil and increase its productivity. The project is thrilling, and one must really lack in vision or be so one sided in seeing only dividends and coupons for private corporations to fail to register in considering this great undertaking. Boulder Dam in its gigantic proportions, in the very difficulty of the task, has brought out the creative genius of man. It has called forth for the best that this country can give to march forth to correct the defects of nature. Just as it has brought forth the best that there is in men, just as it has urged the most noble instincts of men to be of service to humanity, curiously enough it has brought forth the vilest, the basest, and emphasized to an unheard-of degree the meanness that men can resort to when motivated only by greed and selfishness. We can not in the consideration of this bill avoid speaking very frankly about the forces that have been opposing this project for the past six years. Opposed to this bill there has been the most vicious, disgraceful venal lobbies that ever existed in the history of the world. [Applause.] Talk about propaganda. Some of the gentlemen opposed to this bill, and I want to say I am sure they are opposed owing to misunderstanding as to the effect on certain localities—they have spoken about propaganda. They have talked about newspaper articles. Why, gentlemen, there never has been a more determined, persistent, organized, systematized opposition to any measure than has been fighting this bill for the past six years up to this very day. A ruthless opposition provided with unlimited funds based on a selfish, greedy purpose to control all of the power in this country and to have not only the health and happiness of the people but the entire industry of the country, at their mercy. Gentlemen, the Power Trust and the power lobby are not fiction. The Power Trust is not a mere figure of speech. There is a Power Trust. There is this tremendous control of the public-utility corporations of this country.

Only here and there where we have municipal owned and operated power plants or gas plants have the people any relief. It is by these isolated cases of municipally owned and operated plants that we know positively the extent of the exploitation of this greedy, disgraceful trust managed by vicious, greedy, avaricious men with no sense of decency or propriety. Eighty per cent of the national production of gas and electricity is now in the hands of 15 holding and operating groups. These 15 holding groups are united in the opposition to this and other Government projects, whether State or municipal, and one of its operating agencies is the joint committee of national utility associations. The hang out or den—I want to make sure not to designate it as an office or headquarters—of the joint committee of national utility associations, from whence its nefarious, corrupt, and disgraceful practices emanate, is at 420 Lexington Avenue, New York City. The five companies which control half of the whole production are the Electric Bond & Share, Insull, Northeastern, North American, and Byllesby interests. The Federal Trade Commission is now going into these facts, and before it is through with its investigation—and I hope by the time we get back in December we will have the official figures showing the control of this vicious trust.

In 1927 alone this trust has increased its power by getting control of no less than 828 individual companies. The lobby has worked on legislatures in every State of the Union. Wherever there is in contemplation the acquisition by either State or municipality there you will find this same lobby opposing the project and carrying on its foul, vicious, and corrupt practices. Yes, gentlemen, it has been working in districts in every State. With its sop of letting the public buy some of its stock, always keeping control themselves and making the dear public believe that it owns the local electric light company, it not only has exacted exorbitant fees but it has wielded influence over public officials through pressure brought by these misguided stockholders who believe they own the company.

While it is seeking to prevent legislation, with its lobbies all over the country, it has carried on a campaign of misinformation, of deliberate lies in civic, political, women's, and other clubs throughout the country. An army of trained and able speakers willing to utter words put in their mouths by this

vicious source at so much a speech have appeared in various forums and before all these clubs as public-spirited speakers and not disclosing that they were the paid mouthpieces of this vicious organization. Not only that, gentlemen, but this lobby and this Power Trust, through the agencies that I have mentioned, have gone so far as to buy and pay for the kind of instruction that it desires to be given to American children in public schools and private colleges. So convinced is the Power Trust of the unnatural existing conditions, of the utter lack of fairness in having a necessary of life under an absolute monopoly, so certain are they that without the artificial stimulus of misinformation, corruption, and graft they can not continue to exploit the American people, that they are willing to spend part of their ill-gotten profits to subsidize or bribe, to use the proper term, instructors to warp the minds of pupils and atrophy the power of thinking of the coming generation. Oh, gentlemen, you gasp. Wait until you read the complete hearings of the investigation now being carried on by the Federal Trade Commission. And without waiting for that report let me tell you I have right here in my hands a photostatic copy of a check for $10,000, being the one-third annual subsidy for this kind of inspired scientific knowledge. This check is dated January 27, 1928, made out by the National Electric Light Association to the Graduate School of Business Administration of Harvard University. Thirty thousand dollars a year to this school. Now, we go a little farther West. I have here a photostatic copy of a check on the Bankers' Trust Co. of New York, made by the same National Electric Light Association, for $12,500, being half the annual subsidy of $25,000 for the school of land and public utility economics of Northwestern University. Here is a check for $407 paid to Prof. Theodore J. Grayson, who holds a chair in the University of Pennsylvania and who goes out and lectures as a professor of the university on public utilities, always, of course, against Government operation and never disclosing that he is the hireling at so much a speech of the Power Trust. The check is dated October 21, 1927, and is drawn by the joint committee of National Utility Associations I referred to a while ago. How about this for camouflaged respectability? I have here a photostat of a letter from the New Jersey Gas Association which involves three newspapers of that great State receiving "inspired" information. No doubt the details will be brought out by the Federal Trade Commission investigation.

To give you an idea of the undercover methods of the sly, sneaky way this gang of power companies worked themselves into the college, this is what Mr. J. S. S. Richardson, in the employ of the associations, stated:

> My committee recently arranged with a leading publishing house to make corrective suggestions prior to the publication or republication of textbook issues. I am inclosing outlines of the public utility courses recently run in the University of Pennsylvania and Temple University. The plan was put across in the usual way. We laid the groundwork circumspectedly and with care, so that the actual suggestion that such courses be started came from the faculties of the institutions themselves. The rest was routine.

Gentlemen, do you get that? "The plan put across in the usual way." The "usual way" being, of course, payments of cold cash. How they worked "circumspectedly and with care," how they were careful that it should not be made public that the "suggestion" came from the Power Trust. If the purpose was honest, there would have been no necessity of this underground, roundabout, sneaky, hidden method being employed. Why, gentlemen, the Power Trust has even gone so far as to tamper with textbooks, and in more States than is now generally known. I tell you now, gentlemen, and I will be corroborated before long, that in many of the States they have been able to get to the textbooks of the public schools and write the daily lessons of economics, public utilities, to suit their own selfish interest. What a stigma they have placed on the educational record of the students innocently attending these subsidized schools. What a bar sinister to place on the educational records of schools. How ashamed they must all feel of their schools. Why this bribery in the form of subsidies, this method of reaching the textbooks would make a student an illegitimate alumnus of an immoral alma mater. [Laughter and applause.]

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. LAGUARDIA. No, I am sorry I have not the time. Now, gentlemen, the lobby has been operating right here in Washington. I have here a photostatic copy of a statement submitted to the joint committee of national utility associations showing the expenses of a Stevens P. Davis, who is called the judge by his pals of the power gang. This is a statement showing expenses in Washington. One item shows the hotel expense and meals from January 12 to 27 at the Mayflower Hotel of Mr. Cortelyou and Davis in the amount of $1,282.14. That must have been some party. Imagine hotel bills for two, including meals and incidentals, and I am reading from the statement, amounting to a hundred dollars a day. I wonder what the incidentals were. [Laughter.]

Now the reason this attracts my attention is that Cortelyou is the president of one of the gas companies of New York City. It was this gas company, you gentlemen will remember, for I have spoken of it several times, which conducted quite an "educational" campaign to set aside a State law fixing the rate for gas. Whoever they might not have educated, they surely succeeded in educating the judge, and the master the judge appointed, and succeeded in getting a decision their way. Gentlemen, I do not hesitate to say on my responsibility that the decision on the facts in that case was not an honest decision. You all remember the exorbitant fees paid to the master and the order of the Supreme Court to refund part of the fee, and the expression of the gas company, that they were perfectly satisfied and did not want any of the money they paid the master back. I will not bore you with that now, but it is the same Cortelyou of the same gas interests in New York that is in with this power lobby, and his company is part of the committee on utility associations that has been carrying on this campaign of education, bribery, corruption, and other lofty purposes. At this very moment the gas companies in New York are seeking to establish the right to charge a fixed rate to each consumer if the consumer does not use that amount of gas. In other words, a fixed charge as a minimum to be obtained from the gas company for each consumer and a charge above that on the quantity of gas consumed. I understand there is an application pending right now by the gas companies to establish this new way of public-utility larceny. They are at this very moment looking around to debauch some judge to appoint their man as master and will take the case to court when they succeed in fixing the master. I serve warning now: Let that judge beware if such a proposition goes through and if there is a repetition of what happened in the Consolidated Gas Rate case.

Oh, of course, great and many are the arguments against Government operation. Oh, it is unconstitutional; oh, it is wasteful; oh, it is inefficient; oh, it is uneconomic, says the Power Trust and the power lobby. The sad thing is that they are able to find men in public office who will parrot these expressions. Why, the power lobby has been so active against Government operations, they have been so persistent against Government operation, they have have sent abroad so much misinformation, that it seems to me any fair-minded man can see through their real purpose. This power lobby working for the Power Trust has so disregarded decency, ethics, fair dealing, as to become a real menace to society. They are really nothing else but social cooties. [Laughter.]

Gentlemen, let us be fair on this question of Government operation. All this opposition to Government operation comes from selfish sources. Of course, Government operation is not popular when it is in the hands of opponents to Government operation. Of course, Government operation is not successful when the opponents put the Government in business that is not profitable. Why, only a few days ago right here in this House you passed the inland waterways barge bill. What did that do? Why it continued a Government operation of tugboat and barge lines on the inland waterways. You invested $15,000,000 in that corporation and not one of the opponents of Government operation and not one Member who is now opposing Government operation of this great power plant voted against that bill. Why? I will tell you why. Because in that bill you provided that the Government should invest $15,000,000, and that the Government should operate and the Government should continue to operate until there is a loss but as soon as the operation is on a profit-paying basis, then the Government is compelled to go out of business and to turn it over to a private corporation. Then the opponents of Government operation will have the cheek and the temerity to say, "Oh, look, the Government operated at a loss and now it is operated by a private corporation at a profit." It will be forgotten that private corporations would not undertake to initiate this barge service or to pioneer it to the point of bringing it up to a profit-paying basis. The opponents of Government operation were silent then. First, because they saw the necessity of the Government providing this much-needed barge service; then because it was to be turned over to private operation as soon as it was profitable; and then because it would furnish another comparison, though untruthful and unfair, between Government and private operation. Look at Cape Cod Canal. There you had just the reverse. First, private capital invested. They operated. The operation was not profitable. There were no huge profits to be

made. What happened? Then after private capital saw that they could not make any money they dumped it onto the Government and succeeded in getting a profit out of their original investment by charging the Government an excessive price. Now opponents to Government operation will say the Government can not operate Cape Cod Canal at a profit. With all the opposition and the disadvantages the Government is successfully maintaining Muscle Shoals at this time. Give the Government a chance to operate Muscle Shoals to its complete capacity and an opportunity to sell power to the consumers and it will be demonstrated what a blessing Government operation of a hydroelectric plant really is. Imagine, gentlemen, if the Post Office was operated by a private corporation. Imagine the exorbitant rates, the constant haggling for higher rates, the exploitation of its workers, without thinking for a moment the possibility of sending a letter from New York to San Francisco for 2 cents.

Another instance of how unfair this opposition to Government operation is and how unjust the charge that Government operation is not successful was demonstrated right here in the House again only a few days ago. Every opponent of Government operation has been constantly harping on the loss sustained by the Government through the Shipping Board. "Get out of business," says the Power Trust and others to the Government. "Let your ships be operated by private companies," continue the opponents of Government operation. The Government is criticized because it shows a loss in the operation of the many lines under the control of the Shipping Board. In the same breath and in support of the Jones-White shipping bill it was admitted that private companies can not operate ships at a profit, and they were here on their knees begging for a subsidy. Then why criticize the Government and blame the loss of the Shipping Board on Government operation? In fact, the Jones-White bill which passed the House and Senate makes up the losses and gives a direct subsidy to certain classes of ships, no matter what you call that subsidy. For the Government to give money to private corporations who operate under a loss is, according to the opponents of Government operation, sound, good economics, and good business. But for the Government to operate these same ships at a loss, the same loss, is inefficient, wasteful, and dangerous. So when some of us face the inevitable, and in keeping with the times, see and advocate the necessity of the Government stepping in, managing and operating for the benefit of all of the people certain natural resources, the means of transportation and communication, we are called radicals, Bolshevists, unsound, and uneconomical and with a dash of unconstitutional for good measure; but if you bow to the Power Trust, send your children to learn economics from their hired professors, put the Government in business where there is a loss, and put private capital in as soon as it is profitable, and keep the Government out of any natural function of government if it is profitable to a trust, then you are constructive, you are sound, you are constitutional, and you are a great statesman. [Laughter and applause.]

So, gentlemen, I say that, no matter what happens, this great project must be constructed, developed, and operated for the benefit of all of the people living in that region of the country. I firmly believe water or electric power can be furnished and distributed to the consumers at a fair and reasonable rate only by the Government or through one of its agencies. Let us not be blind to the past; let us not be indifferent to the present, but keep abreast of the times and without hesitancy establish the precedent now that any gift of God, whether at Boulder Dam, Muscle Shoals, the Columbia River, or at Niagara, was not put there to be given to the Power Trust to enjoy and to exploit for their own selfish interests. Let us establish the precedent right here and let us pass this bill and let it be known that from now on the people will get enjoyment of the natural resources to which they are wholly and justly entitled. [Applause.]

The CHAIRMAN. The gentleman's time has expired. All time on the amendment has expired. The question is on the amendment offered by the gentleman from Michigan [Mr. CRAMTON].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. CRAMTON. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 73, noes 3.

So the amendment was agreed to.

The CHAIRMAN. The vote recurs on the substitute offered by the gentleman from Arizona [Mr. DOUGLAS].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. DOUGLAS of Arizona. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 43, noes 54.

So the amendment was rejected.

The CHAIRMAN. The vote recurs on the amendment offered by the gentleman from California [Mr. SWING], as amended.

The amendment as amended was agreed to.

Mr. DOUGLAS of Arizona. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Arizona offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DOUGLAS of Arizona: Page 3, line 8, after the word "purposes," insert a new paragraph, as follows:

"Inasmuch as improving navigation is one of the above purposes of the act, it is hereby provided that no construction shall be commenced and no money expended until the Army Corps of Engineers have reported that the appropriations authorized herein are justifiable for the purpose of improving navigation, and that the commercial benefits which may accrue from the improvement of the stream for navigation is commensurate with the appropriations herein authorized."

Mr. SWING. Mr. Chairman, I make the point of order that it is not germane.

Mr. DOUGLAS of Arizona. The gentleman is not denying that this improvement is for the purpose of improving navigation?

Mr. CRAMTON. Perhaps the gentleman does not want to make it exclusively a matter of improving navigation.

Mr. DOUGLAS of Arizona. Perhaps the gentleman does not want to improve navigation at all.

The CHAIRMAN. The Chair overrules the point of order.

Mr. COLTON. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

Mr. SWING. Mr. Chairman, I would like to ascertain the time that is still further desired on this amendment. I move that all debate on this amendment and all amendments thereto close in five minutes.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. DOUGLAS of Arizona. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 25, noes 64.

So the amendment was rejected.

Mr. SWING. Mr. Chairman, I move that all debate on this section and all amendments thereto close in 10 minutes.

The motion was agreed to.

The CHAIRMAN. The gentleman from Utah offers an amendment, which the Clerk will report.

The Clerk read as follows: Amendment offered by Mr. COLTON: Page 3, after the Swing amendment, add the following: "*Provided further,* That no work shall be commenced or expense incurred under the provisions of this bill until the Secretary of the Interior shall have submitted the measure to the Attorney General and shall have received an opinion from the Attorney General that the measure is constitutional."

Mr. LAGUARDIA. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. Does the gentleman from Utah desire to be heard on the point of order?

Mr. COLTON. Mr. Chairman, it is not subject to a point of order. There may be a question of policy but certainly the amendment is germane to this section and is certainly in order.

Mr. LAGUARDIA. Except it makes the legislation subject to the viewpoint of the Attorney General.

Mr. NEWTON. That does not make the amendment not germane.

Mr. COLTON. Even that would not make the amendment not germane.

Mr. LAGUARDIA. Oh, yes, it would; it destroys the purposes of the bill.

The CHAIRMAN. The Chair is ready to rule. The Chair overrules the point of order.

Mr. COLTON. Mr. Chairman and members of the committee, this is one of the most important pieces of legislation that has been before this Congress in a generation. The gentleman from Colorado [Mr. TAYLOR] a while ago announced a doctrine, if I understood him correctly, which is absolutely new from a legal standpoint. He said there were three ways that the waters of this river could be allocated. First, by the Supreme Court of the United States; second, by a compact entered into between the States, and, third, under the provisions of this bill. If that means anything at all it means that the Congress of the United States can allocate the waters of that stream. Gentlemen, that is contrary to every principle upon which our whole body of irrigation law rests. If this bill does seek to

divide or allocate the waters of the Colorado River, I maintain it is absolutely unconstitutional; that it is against all of the decisions of the court that have been made with reference to this question, and it declares an absolutely new policy.

Congress has never heretofore in the history of this country undertaken to allocate the waters of a stream between the States. If this bill is passed and this measure becomes a law, certainly no expense should be incurred or any work commenced until the Secretary of the Interior has submitted it to the legal department of the Government and has found out whether or not it is constitutional.

I am simply seeking by this amendment that this vital question, which embarks the Government and the Congress upon a new policy with reference to the allocation of the waters of a stream, be submitted to the legal department of the Government. In the Western States we have maintained, and have maintained from the beginning, that the right to the ownership of the water is in the States. This undertakes to turn over the right to impound these waters, and section 5 provides that the Secretary of the Interior may arrange to distribute or deliver the water lower down the river and also under the canal that is provided for in this bill. That being true, we declare in effect that the water may be allocated by the Secretary of the Interior, and we declare further that the water may be controlled by him. That means that the Congress and the executive department are now embarking upon the policy of controlling, distributing, and allocating the waters of this river. If that is true, I say that before that new policy is adopted it should be submitted to the legal department of this Government for an opinion as to its constitutionality. In the case of Colorado against Kansas it was plainly held that the right to the water was in the States. The Government has no control except for navigation purposes. The gentleman's argument, pushed to its logical conclusion, is dangerous to the rights of all the States.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Utah.

The question was taken; and on a division (demanded by Mr. COLTON) there were—ayes, 28, noes 45.

So the amendment was rejected.

Mr. MOORE of Virginia. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Virginia: At the end of the Swing amendment, as amended, add the following: "No authority hereby conferred on the Secretary of the Interior shall be exercised without the President's sanction and approval."

Mr. CRAMTON. Will the gentleman yield?

Mr. MOORE of Virginia. Yes.

Mr. CRAMTON. I take it that what the gentleman from Virginia desires is that the program of construction shall not be initiated without that approval, but as the gentleman's amendment reads, every time the Secretary of the Interior proposes to do something under this act, either at the beginning or subsequently, he will have to get the President's approval.

Mr. MOORE of Virginia. In answer to that let me explain the purpose of the amendment. It is not very important whether the language is exact or not, because this measure will undoubtedly go to conference if it is passed here. The general purpose of the amendment is perfectly clear, and I offer it as a friend of the measure and one who expects to vote for the measure.

Section 1 of this bill, which is such an important part of it, as it has been amended, leaves to the Secretary of the Interior, without any control whatever, the final word as to the construction of the plant at Boulder Canyon, with all of its incidents, and as to the construction of the canal. He has a free hand and there is no restraint that is contemplated.

Now, favoring the measure, I wish to safeguard the public interests. I have great respect for the present Secretary of the Interior, but we can not foresee who will be the Secretary of the Interior to-morrow.

Mr. SCHAFER. Will the gentleman yield?

Mr. MOORE of Virginia. No; not now.

And we know who was the Secretary of the Interior, with some very large discretionary powers vested in him several years ago, and I am not willing, if I can prevent it, for the Government to embark on an enterprise of this magnitude, which will involve such a vast expenditure, without giving the final word to the President of the United States instead of to the Secretary himself. [Applause.]

I do not know that I could, by any elaboration, make plainer the object of the amendment, and I do not think the committee ought to have any hesitation in adopting it along with similar subsequent amendments.

Mr. SWING. I am very glad to accept the gentleman's amendment. I think it is a very good one. [Applause.]

The amendment was agreed to.

The Clerk read as follows:

SEC. 2. (a) There is hereby established a special fund, to be known as the "Colorado River Dam fund" (hereinafter referred to as the "fund"), and to be available, as hereafter provided, only for carrying out the provisions of this act. All revenues received in carrying out the provisions of this act shall be paid into and expenditures shall be made out of the fund, under the direction of the Secretary of the Interior.

(b) The Secretary of the Treasury is authorized to advance to the fund, from time to time and within the appropriations therefor, such amounts as the Secretary of the Interior deems necessary for carrying out the provisions of this Act, except that the aggregate amount of such advances shall not exceed the sum of $125,000,000. Interest at the rate of 4 per cent per annum accruing during the year upon the amounts so advanced and remaining unpaid shall be paid annually out of the fund.

(c) Moneys in the fund advanced under subdivision (b) shall be available only for expenditures for construction and the payment of interest, during construction, upon the amounts so advanced. No expenditures out of the fund shall be made for operation and maintenance except from appropriations therefor.

(d) The Secretary of the Treasury shall charge the fund as of June 30 in each year with such amount as may be necessary for the payment of interest on advances made under subdivision (b) at the rate of 4 per cent per annum accrued during the year upon the amounts so advanced and remaining unpaid, except that if the fund is insufficient to meet the payment of interest the Secretary of the Treasury may, in his discretion, defer any part of such payment, and the amount so deferred shall bear interest at the rate of 4 per cent per annum until paid.

(e) The Secretary of the Interior shall certify to the Secretary of the Treasury, at the close of each fiscal year, the amount of money in the fund in excess of the amount necessary for construction, operation, and maintenance, and payment of interest. Upon receipt of each such certificate, the Secretary of the Treasury is authorized and directed to charge the fund with the amount so certified as repayment of the advances made under subdivision (b), which amount shall be covered into the Treasury to the credit of miscellaneous receipts.

Mr. CRAMTON. Mr. Chairman, I move to strike out the last word.

I should like to ask a question of the gentleman from California [Mr. SWING] and suggest one or two amendments for his consideration.

In subdivision (b) there is provision for the advance from the Treasury to the Secretary of the Interior and then provision for the payment of interest. I think subdivision (b) ought to make clear what I think is the intention, that the interest should run from the time the money is advanced. This could be done by inserting after "4 per cent per annum" the words "from the date of advance."

In connection with this I would like to call the gentleman's attention to subdivision (c). Having authorized payment of interest in subdivision (b), subdivision (c) seems to ignore it because it says, "Moneys in the fund advanced under subdivision (b) shall be available only for expenditures for construction and the payment of interest, during construction, upon the amounts so advanced.

Mr. SWING. That is right.

Mr. CRAMTON. If the words "during construction" are dropped out there and the words which I have suggested inserted in subdivision (b), I think both points would be clarified.

Mr. SWING. Let me say to my friend and colleague from Michigan that these four paragraphs—(b), (c), (d), and (e)—were very carefully worked out by that able Assistant Secretary of the Treasury, Mr. Winston, together with the aid of two of his best men in the department. He also had the benefit of the assistance of the one who was at that time the legislative counsel of the House.

Mr. CRAMTON. Does not the gentleman think we would better use some of our own judgment, instead of relying on somebody else, when it is clear that under subdivision (c) there is no authority to pay any money for interest after construction; and the two amendments I have suggested simply clarify the language.

Mr. SWING. I think section (b) clearly provides in the last sentence that there shall be interest at the rate of 4 per cent per annum accruing during the year upon the amounts so advanced during that year.

Mr. CRAMTON. All right, let us let that go; but having authorized payment of interest, subdivision (c) practically for-

bids actually paying it except interest during construction. If you will drop out the words "during construction" the whole thing is saved.

Mr. SWING. Personally I am content to rest upon the provisions as written by the Treasury Department, and I hesitate to change them.

Mr. CRAMTON. Subdivision (c) provides that the money that has been advanced shall be available only for what? For two things—first, for expenditures for construction, and second, for payment of interest during construction. Now, there is nothing that promises payment of interest after construction.

Mr. ARENTZ. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. ARENTZ. It will take approximately six years at the minimum to absorb the power that will be generated at this plant. This is called the absorption period. In figuring out the cost of the power to the consumer or the buyer, the municipality or the State, a price must be set, including the interest during the absorption period. This absorption period may be nine years.

Mr. CRAMTON. But that has nothing to do with subdivision (c).

Mr. ARENTZ. Yes; the interest will be included in the cost of these contracts. After the cost of construction the only revenue derived will be from the sale of power and of water.

Mr. CRAMTON. Subdivision (c) covers the use of this fund from the day you commence until possibly 50 years from now, and if you drop out the words "during construction," I will waive the other part of the suggestion.

Mr. SWING. Subdivision (b) covers only the money actually appropriated out of the Treasury of the United States into this fund.

Mr. CRAMTON. Yes.

Mr. SWING. It does not cover moneys in the form of revenue from the project, but only the actual appropriations. Now, out of these actual appropriations covered by subdivision (b), subdivision (c) provides that during the course of construction interest shall be paid to the United States Treasury. Now, afterwards there is 4 per cent interest drawn.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CRAMTON. Mr. Chairman, I offer an amendment. On page 4, line 3, strike out the words "during construction."

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. CRAMTON: Page 4, line 3, strike out the words "during construction."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The question was taken; and on a division (demanded by Mr. DOUGLAS of Arizona) there were 41 ayes and 27 noes.

So the amendment was agreed to.

Mr. DOUGLAS of Arizona. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. DOUGLAS of Arizona: Page 3, line 25, after the word "fund," insert "*Provided further*, That before the Secretary of the Treasury shall advance such amount to the fund the contractees with whom the Secretary of the Interior may have entered into contract in compliance with the provisions of this act shall have placed in the hands of the Secretary of the Treasury trust fund bonds bearing interest at not less than 4 per cent in the aggregate amount of such advances."

Mr. DOUGLAS of Arizona. Mr. Chairman, Members of the House know I am opposed to this bill, but if the House is going to pass the bill I would like to see the Federal Government reimbursed for its expenditures. I am absolutely certain that the only way in which all of the taxpayers in the United States can be protected against the terrific loss is by a provision which will compel all the contractees to put up with the Secretary of the Treasury trust-fund bonds equal in amount to the advances made. If that is not done, gentlemen of the House, I predict that inside of 50 years you will have a deficit on your hands of approximately $300,000,000, if not more; and not an amortized project.

In view of the economic situation, if the House intends to pass this bill I submit that it would be the part of wisdom to compel the contractees to put up such collateral security as is provided by this amendment.

I appreciate that the gentleman from California is going to say that the city of Los Angeles can not, because it has not the bonding authority, but I submit this to the gentleman: That if the city of Los Angeles wants this project as much as it apparently seems to, judging from the amount of money it has spent, then it can very easily amend its charter and the Legislature of California can easily be persuaded to permit such an amendment.

Mr. SWING. Mr. Chairman, the proposal of the gentleman from Arizona is preposterous. There never has been such a complete provision in any bill to guarantee to the Government a safe return of its money as that which this bill now contains. Never before has a project been authorized where the law required that before the contract was let, before any work was done, or even before Congress made the appropriation that there should be binding contracts put up with the Secretary of the Interior agreeing to take water and power at rates prescribed by him which in the aggregate would assure the Government the complete return of its money and interest.

The gentleman from Arizona is not trying to perfect the bill, he is trying to kill the bill. He favors whatever obstacles and obstructions that will tend to delay and impede if not prevent the work. He is ingenuous and able, and I compliment him on his ability to think up these amendments for this purpose.

Mr. DOUGLAS of Arizona. Mr. Chairman, I think the gentleman has overstated the case. I am perfectly sincere and honest in offering this amendment. I have no ulterior purpose in it; I know it is the only way in which all the taxpayers in the United States can be protected.

Mr. SWING. The gentleman knows that it can not be done and never has been required in all the history of this country.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arizona.

The question was taken; and on a division (demanded by Mr. DOUGLAS) there were 21 ayes and 43 noes.

So the amendment was rejected.

The Clerk read as follows:

SEC. 3. There is hereby authorized to be appropriated from time to time, out of any money in the Treasury not otherwise appropriated, such sums of money as may be necessary to carry out the purposes of this act, not exceeding in the aggregate $125,000,000.

Mr. BLACK of New York. Mr. Chairman, I move to strike out the figures at the end of the section.

Mr. Chairman and gentlemen of the committee, I do not believe the purpose of great public projects should be held back due to legislative fear, due to the fact that some people always see ghosts when the public is about to expend some money. Early in my own legislative experience I was always afraid when the State was going to do something big somebody was going to steal a 2-cent stamp and ruin the project, but I find that a great many of these projects have turned out to be a great help to the State of New York.

I know gentlemen connected with public utilities. They are nice men, but they are not nice men, not by a dam site, on the first of the month when my bills come in for electricity, gas, and telephones. I know their philosophy. Some of them would like to monopolize the air and feed it to the public through nozzles with meters attached. Others would like to attach switches to the sun and the moon and charge us at the end of the month for this natural light. I think they ought to call the illegitimate alumnus referred to by the gentleman from New York [Mr. LAGUARDIA], John Dough, and he ought to belong to the taka-piecea-graft fraternity.

The great question here is not the fear that the Government is going to lose a lot of money, but I think the great question here is this, that we are going to write into the law the principle of public ownership, and it is going to serve as a weapon in every community that is being increasingly gouged by their public utilities, and this is a warning to the public-utility companies of the country that they have got to stop the gouging of the public, that the public has a weapon, that the Nation is willing to go into this utility business, you might call it, although some would prefer to have it called going into industrial business. But this is quite different than an industrial business. A public utility already is subject to rate regulation because of its nature, it being in the form of a monopoly. It is not a competitive industrial.

I think the speech of the gentleman from Connecticut [Mr. TILSON] has made a great number of votes for this bill. He gave the idea that the men have in mind who are outside the affected territory, and what they see in this proposition, in its being of lasting and of great public benefit. It is a strange thing to me that any time a public-utility company, privately owned, takes over a natural resource, it is a wonderful proposition, but as soon as the public wants to take it over and operate it for public use it becomes something in the nature of a catastrophe. Those outside the zone affected by this bill in voting for this bill issue a challenge on behalf of the people to the public-utility corporations of this country that they must stay within reason, or the public communities are going

to take over these utilities and operate them in the public interest. [Applause.]

The Clerk read as follows:

SEC. 4. (a) No work shall be begun and no moneys expended on or in connection with the works of structures provided for in this act, and no water rights shall be claimed or initiated hereunder, and no steps shall be taken by the United States or by others to initiate or perfect any claims to the use of water pertinent to such works or structures until the States of California, Colorado, Nevada, New Mexico, Utah, and Wyoming shall have approved the Colorado River compact mentioned in section 12 hereof and shall have consented to a waiver of the provisions of the first paragraph of Article XI of said compact, which makes the same binding and obligatory only when approved by each of the seven States mentioned in said section 12, and shall have approved said compact without condition save that of such six-State approval, and until the President by public proclamation shall have so declared.

(b) Before any money is appropriated or any construction work done or contracted for, the Secretary of the Interior shall make provision for revenues, by contract or otherwise, in accordance with the provisions of this act, adequate, in his judgment, to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within 50 years from the date of the completion of the project, of all amounts advanced to the fund under subdivision (b) of section 2, together with interest thereon.

With the following committee amendment:

Page 5, line 7, strike out the word "of" and insert the word "or."

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. ARENTZ. Mr. Chairman, I offer the following committee amendment which I send to the desk.

The Clerk read as follows:
